

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

M.

MACÆ, I. a people of Africa who occupied the coast to the northwest of and near the Greater Syrtis. They are thought to have been the same with those named Syrtites by Pliny. Herodotus states that they had a curious custom of leaving only a tuft of hair in the centre of their head, carefully shaving the rest, and that, when they went to war, they used the skins of ostriches instead of shields (4, 175). The river Cinype flowed through their territory. (Compare *Diod. Sic.*, 3, 48.)—II. A people of Arabia Deserta, on a projection of land where the Sinus Persicus is narrowest. Ptolemy calls the promontory Assabo: its modern name, however, Cape Mussendou, bears some faint resemblance to that of the Macæ. (*Bischoff und Meller, Wörterb. der Geogr.*, s. v.)

MACÆIA, an ancient name of Crete.

MACEDONIA, a country of Europe, lying to the west of Thrace, and north and northeast of Thessaly. The boundaries of this country varied at different times. When Strabo wrote, Macedonia included a considerable part of Illyria and Thrace; but Macedonia Proper may be considered as separated from Thessaly, on the south, by the Cambanian Mountains; from Illyria, on the west, by the great mountain chain called Scardus and Bernus, and which, under the name of Pindus, also separates Thessaly from Epirus; from Mœsia, on the north, by the mountains called Orbelus and Scamias, which run at right angles to Scardus; and from Thrace, on the east, by the river Strymon. The Macedonia of Herodotus, however, was still more limited, as is afterward mentioned. Macedonia Proper, as defined above, is watered by three rivers of considerable size, the Axios, Lydias, and Haliacmon, all which flow into the Sinus Thermaicus, the modern Gulf of Saloniki. The whole of the district on the seacoast, and to a considerable distance into the interior, between the Axios and the Haliacmon, is very low and marshy.—The origin and early history of the Macedonians are involved in much obscurity. Some moderns have attempted, against all probability, to derive the name from the Kittim mentioned in the old Testament (*Gen.* 10, 4.—*Numb.* 24, 24.—*Jer.* 2, 10.—*Ezek.* 27, 6.—*Dan.* 11, 30). This opinion appears to have arisen, in part, from the description of the country inhabited by the Kittim, which is supposed to answer to Macedonia; but still more from the fact, that, in the book of Maccabees, Alexander the Great is said to have come from the land of Cheitiseim (*ἐκ τῆς γῆς Χερρῆσιμ*, 1 *Macc.* 1, 1), and Perseus is called king of the Kittians (*Κιττιῶν*, 1 *Macc.* 8, 5).—In inquiring into the early history of the Macedonians, two questions, which are frequently confounded, ought to be carefully kept distinct, namely, the origin of the Macedonian people, and that of the Macedonian monarchy under the Temenidæ; for, while there is abundant reason for believing that the Macedonian princes were descended from an Hellenic race, it appears probable that the Macedonians themselves were an Illyrian people, though the country must also have been inhabited in very early times by many Hellenic tribes. The Greeks themselves always regarded the Macedonians as barbarians, that is, as a people not of Hellenic origin; and the similarity of the manners and customs, as well as the languages, as far as they are known, of the early Macedonians and Illyrians, appear to establish the identity of the two nations. In the time of Herodotus, the name of *Macedonia* comprehended only the country to the south and west of the Lydias, for he observes that Macedonia was separated from Bottia by the united mouth of the Lydias and Haliacmon (*Herod.*, 7, 127). How far inland Herodotus conceived that Macedonia extended, does not appear

from his narrative.—According to many ancient writers, Macedonia was anciently called Emathia (*Plin.*, 4, 17.—*Justin.*, 7, 1.—*Aul. Gell.*, 14, 6); but we also find traces of the name Macedoniana, from the earliest times, under the ancient forms of Macetæ (*Μακεταί*), and Macedni (*Μακεδνοί*). They appear to have dwelt originally in the southwestern part of Macedonia, near Mount Pindus. Herodotus says that the Dorians dwelling under Pindus were called Macedonians (1, 56.—Compare 8, 43); and, although it may for many reasons be doubted whether the Macedonians had any particular connexion with the Dorians, it may be inferred, from the statement of Herodotus, that the Macedonians once dwelt at the foot of Pindus, whence they emigrated in a northeasterly direction.—The origin of the Macedonian dynasty is a subject of some intricacy and dispute. There is one point, however, on which all the ancient authorities agree; namely, that the royal family of that country was of the race of the Temenidæ of Argos. The difference of opinion principally regards the individual of that family to whom the honour of founding this monarchy is to be ascribed. The account of Herodotus seems most worthy of being received. According to this writer, three brothers named Gavanæ, Aëropus, and Perdiccas, descended from Temenus, left Argos, their native place, in quest of fortune, and, arriving in Illyria, passed thence into Upper Macedonia, where, after experiencing some singular adventures, which Herodotus details, they at length succeeded in acquiring possession of a principality, which devolved on Perdiccas, the youngest of the brothers, who is therefore considered, both by Herodotus (8, 137) and Thucydides (2, 89), as the founder of the Macedonian dynasty. These writers have also recorded the names of the successors of this prince, though there is little to interest the reader in their history.—Before the time of Philip, father of Alexander, all the country beyond the river Strymon, and even the Macedonian peninsula from Amphipolis to Thessalonica, belonged to Thrace, and Pæonia likewise on the north. Philip conquered this peninsula, and all the country to the river Nessus and Mount Rhodope; as also Pæonia and Illyria beyond Lake Lychinitis. Thus the widest limits of Macedonia were from the Ægean Sea to the Ionian, where the Drino formed its boundary. The provinces of Macedonia in the time of Philip amounted to nineteen. Macedonia first became powerful under this monarch, who, taking advantage of the strength of the country and the warlike disposition of the inhabitants, reduced Greece, which was distracted by intestine broils, in the battle of Cheronea. His son Alexander subdued Asia, and by an uninterrupted series of victories for ten successive years, made Macedonia, in a short time, the mistress of half the world. After his death, this immense empire was divided. Macedonia received anew its ancient limits, and, after several battles, lost its dominion over Greece. The alliance of Philip II. with Carthage, during the second Punic war, gave occasion to this catastrophe. The Romans delayed their revenge for a season; but, Philip having laid siege to Athens, the Athenians called the Romans to their aid; the latter declared war against Macedonia; Philip was compelled to sue for peace, to surrender his vessels, to reduce his army to 500 men, and defray the expenses of the war. Perseus, the successor of Philip, having taken up arms against Rome, was totally defeated at Pydna by Paulus Æmilius, and the Romans took possession of the country. Indignant at their oppression, the Macedonian nobility and the whole nation rebelled under Andriscus; but, after a long struggle, they were overcome by Quintus Cæcilius, surnamed, from his conquest, Macedonicus; the nobility were exiled, and the country became a Roman province B.C. 148. It is very difficult, however, to determine the boundaries of this Roman province of

Macedonia. According to the "Epitomizer" of Strabo (lib. 7), it was bounded by the Adriatic on the west; on the north by the mountains of Scardus, Orbelus, Rhodope, and Hæmus; on the south by the Via Egnatia; while on the east it extended as far as Cypselus and the mouth of the Hebrus. But this statement with respect to the southern boundary of Macedonia cannot be correct, since we know that the province of Macedonia was bounded on the south by that of Achaia; and although it is extremely difficult, if not impossible, to fix the precise boundaries of these provinces, yet it does not appear that Achaia extended farther north than the south of Thessaly.—Macedonia now forms part of Turkey in Europe, under the name of *Makedonia* or *Fikha Vilajeti*, and contains about 700,000 inhabitants, consisting of Walachians, Turks, Greeks, and Albanians. The southeastern part is under the pacha of Saloniki; the northern under beys or agas, or forms free communities. The capital Saloniki, the ancient Thessalonica, is a commercial town, and contains 70,000 inhabitants.—Ancient Macedonia was a mountainous and woody region, the riches of which consisted chiefly in mines of gold and silver; the coasts, however, produced corn, wine, oil, and fruits. Modern Macedonia is said to possess a soil more fruitful than the richest plains of Sicily, and there are few districts in the world so fertile as the coast of Athos or the ancient Chalcidice. The land in the valleys of Panormi and Cassandria, when grazed by the lightest plough, yields, it is said, a more abundant harvest than the finest fields in the department between the Eure and the Loire, or the granary of France; if the wheat in its green state be not browsed by sheep or cut with the scythe, it perishes by too much luxuriance. Macedonia is also famous for its cotton and tobacco, and its wines are some of them equal to those of Burgundy. (*Malte-Brun, Geogr.* vol. 6, p. 156, *seqq.*—*Eng. transl.*—*Cramer's Anc. Greece*, vol. 1, p. 164, *seq.*—*Encycl. Us. Knowl.* vol. 14, p. 241.)—For a list of the ancient kings of Macedonia, with remarks on their reign, consult *Clinton's Fasti Hellenici*, p. 221, *seqq.* 2d ed.

MACEB, I. a Latin poet, a native of Verona. He was the author of a poem on birds, entitled *Ornithogonia*, and of another on snakes, under the title of *Theriaca*. This last was an imitation, in some degree, of the *Theriaca* of Nicander. (*Quint., Inst. Or.* 10, 1, 56.—*Spalding, ad Quint., Inst. Or.* 6, 3, 96.) We have no remains of either of these works. The poem *De Herbarum virtutibus*, commonly ascribed to him, is now regarded as a production of the middle ages. (*Gyrald., Dial.* 4, p. 217, *seqq.*—*Bruckhus., ad Tibull.* p. 274.—*Veesenmyer, Bibliogr. Analekt.* p. 84.)—II. A friend of Ovid's, who wrote a continuation of the *Iliad*, and also an *Antehomerica*. He has been frequently confounded with the preceding, but flourished, in truth, at a later period. The former died in Asia, B.C. 17. (Compare the remarks of *Wernsdorff, Poet. Lat. Min.*, vol. 4, p. 579, *seqq.*)

MACHANIDAS, a powerful tyrant of Sparta, whose views at one time extended to the subjugation of all Peloponnesus. He was defeated and slain by Philopomen in battle near Mantinea. (*Plut., Vit. Philop.*)

MACHAON, a celebrated physician, son of Æsculapius, and brother to Podalirius. He went to the Trojan war, where his skill in surgery and the healing art proved of great service to his countrymen. Machaon was one of those shut up in the wooden horse, and is by some supposed to have fallen on the night that Troy was taken. He received divine honours after death, and had a temple erected to him. (*Hom., Il.* 2, 731.—*Virg., Æn.* 2, 263.)—Schwenck derives the name from the old verb μάχω, the root of μάχη, and makes it denote one who is skilful with the hand. (*Andeut.* p. 206.) "Machaon," observes the President Goguet (*Origin of Laws, &c.*, vol. 2, p. 267,

Eng. transl.), "was himself a very able physician. He was a soldier as well as a physician. He was wounded dangerously in the shoulder in a sally which the Trojans had made. Nestor immediately brought him back to his tent. Scarce are they entered there, before Machaon took a drink mixed with wine, in which they had put the scrapings of cheese and barley-flour. (*Il.* 11, 506, *seqq.*) What ill effects must not this mixture produce, since wine alone is very opposite to the healing of wounds! The meats which Machaon afterward used (*Il.* 11, 629) do not appear in any way proper for the state in which he found himself. In another part of the *Iliad* (4, 218) Menelaus is wounded with an arrow: they make Machaon immediately come to heal him. The son of Æsculapius, after having considered the wound, sucks the blood, and puts on it a dressing to appease the pain. Homer does not specify what entered into that dressing. It was only composed, according to all appearances, of some bitter roots. This conjecture is founded on the following circumstance: in the description which the poet gives of the healing of such a wound, he says expressly that they applied to the wound the juice of a bitter herb bruised (11, 845). It appears that this was the only remedy which they knew. The virtue of these plants is to be styptic." To what is here said may be added the remarks of an eminent physician of our own country. "It appears that the practice of Machaon and Podalirius was very much confined to the removal of the darts and arrows with which wounds had been inflicted, and afterward to the application of fomentations and styptics to the wounded parts; for, when the heroes recorded by Homer were in other respects severely injured, as in the case of Æneas, whose thigh-bone was broken by a stone thrown by Diomedes, he makes no mention of any other than supernatural means employed for their relief." (*Hosack's Medical Essays*, vol. 1, p. 38.)

MACEA, a river flowing from the Apennines, and dividing Liguria from Etruria, now the *Magra*. (*Lucan.* 2, 426.—*Liv.* 39, 32.) The Arnus formed the southern boundary of Liguria until the reign of Augustus. (*Plin.* 3, 5.)

MACRIANUS, Titus Fulvius Julius, a Roman, who, from a private soldier, rose to the highest command in the army, and proclaimed himself emperor when Valerian had been made prisoner by the Persians, A.D. 260. He is one of the so-called "thirty tyrants" of later Roman history, but appears to have been, as far as we can judge from his brief period of authority, an able prince. Macrianus was proclaimed emperor along with his two sons Macrianus (Junior) and Quietus. When he had supported his dignity for a year in the eastern parts of the world, Macrianus marched towards Rome to crush Gallienus, who had been proclaimed emperor. He was defeated in Illyricum by the lieutenant of Gallienus, and put to death with his elder son, A.D. 262. (*Treb. Poll., Vit. Macrian.*)

MACRINUS, I. M. Opilius Severus, a native of Mauritania, was pretorian prefect under Caracalla, whom he accompanied in his expedition against the Parthians, and caused to be murdered on the march. Macrinus was immediately proclaimed emperor by the army, A.D. 217, and his son Diadumenianus, who was at Antioch, was made Cæsar; both elections were confirmed by the senate. Macrinus, after a battle with the Parthians near Nisibis, concluded peace with them. On his return to Antioch he reformed many abuses introduced by Caracalla. But his excessive severity displeased the soldiers, and an insurrection, excited by Mæsa, the aunt of Caracalla, broke out against Macrinus, who, being defeated near Antioch, fled as far as Chalcedon, where he was arrested and put to death, A.D. 218, after a reign of about 14 months. His son Diadumenianus shared his fate. He was succeeded by Heliogabalus. (*Jul. Capitol., Vit. Macrin.*

—*Herodian*, 4, 12, 2, *seqq.*)—II. A friend of the poet Persius, to whom his second satire is inscribed. They had been fellow-students under Servilius Numanus. (*Lemaire, ad Pers.*, *Sat.*, 2, 1.)

MACROBII, a people of Æthiopia, highly celebrated in antiquity, and whom Herodotus has copiously described. An expedition was undertaken against them by Cambyses, and in this way they have obtained a name in history. A rumour of the vast quantity of gold which they possessed determined Cambyses to march against them. He sent, however, beforehand some spies into their country, from the nation of the Ichthyophagi, as they understood their language. The accounts, which the neighbouring people gave, represented the Macrobiani as a tall and beautiful race, who had their own laws and institutions, and elected the tallest among them to the dignity of king. The Ichthyophagi, on asking the monarch of the Macrobiani, to whom they brought presents as if ambassadors from Cambyses, for what length of time his subjects lived, were told for the space of 120 years, and sometimes longer. Hence the name given them by the Greek writers of Macrobiani (Μακρόβιοι, "long-lived"). Gold was the metal in commonest use among them, even for the fetters of their prisoners. Herodotus adds, that Cambyses, on the return of his spies, immediately marched against the Macrobiani, but was compelled to return, from want of provisions, before he had proceeded a fifth part of the way. (*Herod.*, 3, 17, *seqq.*)—Bruce takes the Macrobiani for a tribe of the Shangallas, dwelling in the lower part of the gold countries, Cuba and Nuba, on both sides of the Nile, to the north of Fazakla. (*Travels*, vol. 2, p. 554, *seqq.*) Heeren, however, more correctly thinks, that the people in question are to be sought for farther south, in another region. None of the Shangallas, that we know of, live in cities, or have reached that degree of civilization imputed to the Macrobiani. He thinks it probable, therefore, that the Macrobiani of Herodotus should be sought for on the coast, or in one of the ports of Adal, and in the vicinity of Cape Guardafui. This would place them in the country of the Somalies, who are, perhaps, their descendants. (*Heeren, Ideen*, vol. 2, pt. 1, p. 333, *seqq.*)

MACROBIUS, I. a Latin writer, who flourished in the first half of the fifth century, under Theodosius the Younger. His full name is Aurelius Macrobius Ambrosius Theodosius. (*Funcc., de veget. L. L. senect.*, 4, 27.—*Fabric., Bib. Lat.*, vol. 3, p. 180.) As he was not a Roman by birth, and seeks in this an excuse for his Latin style (*Sat.*, 1, 1), he has been regarded by some critics as a native of Greece. (*Fabric., l. c., in notis.*) In the manuscripts he bears the title of *Vir Consularis et illustris*; and from this some have concluded, that he is the same with the Macrobius mentioned in a law of the Theodosian code (lib. 6, tit. 8) as *Præfectus sacri cubiculi*, or chamberlain of the royal bedchamber. Other critics have remarked, however, that this office was commonly given to eunuchs, and that Macrobius the writer had a son. It is also uncertain whether Macrobius was a Christian or not. The supposition that he held the office of chamberlain under a Christian emperor has been the chief, or, perhaps, the only ground for imagining him to have been a Christian, since the language of his writings and the interlocutors in the dialogues are entirely heathen. (Consult *Mahul, Dissertation sur la Vie, &c., de Macrobe.*—*Class. Journ.*, vol. 20, p. 110.)—The works of Macrobius are three in number: 1. *Commentariorum in Somnium Scipionis libri duo*. This work is addressed to his son Eustathius. Besides an explanatory view of the *Somnium Scipionis* of Cicero, it contains much information respecting the opinions of the later Platonists on the laws which govern the earth and the other parts of the universe. There is a Greek version by Maximus Planudes, which was first published, from the MS. in the King's

Library at Paris, by Hess, *Hal.*, 1833, 8vo. Some critics have thought that the commentary we have just been considering ought to be regarded as a part of the second work of this writer, of which we are going to speak, and from which it has been detached through the carelessness of the early editors. There seems no good reason for this opinion.—2. *Saturnaliurn convivorium libri septem*. Likewise addressed to his son. This is a compilation after the manner of the Attic Nights of Aulus Gellius: it has, however, the dialogue form, and is supposed to be the transcript of a conversation which took place at table during the celebration of the Saturnalia. The principal interlocutors are a certain Vectius Pretextatus, Q. Aurelius Symmachus and his brother Flavianus, Cæcinnus Decius Albinus, Avienus, a physician, a grammarian, &c. It contains discussions of a great variety of historical and mythological topics, explanations of many passages of ancient authors, remarks on the manners and customs of the Romans, &c. An idea of the general nature of the work may be formed from the titles of some of the chapters: *Of the origin of some Roman words.*—*Of the origin of the Saturnalia.*—*Of the Roman year and its divisions.*—*Proof that all the gods of fable were originally symbols of the sun.*—*Of Cicero's bons mots.*—*Of Augustus.*—*Of Julia.*—*Details on the luxury of the Romans.*—*Observations on the Æneid, and a comparison between Virgil and Homer.*—*Why those who turn round are attacked with vertigoes.*—*Why women have softer voices than men.*—*Why shame makes one blush.*—*Why bodies plunged in water appear larger than they really are, &c.* Many things in Macrobius are drawn from Aulus Gellius, and some from Plutarch.—3. The third work of Macrobius treated of the difference between the Greek and Latin languages, and also of their analogy: *De differentiis et societatibus Græci Latiniq. Verbi*. We have only an extract from this, made by one Joannes Scotus, who lived in the time of Charles the Bald. (*Schöll, Hist. Lit. Rom.*, vol. 3, p. 322, *seqq.*—*Bähr, Gesch. Röm. Lit.*, p. 724, *seqq.*) The best edition of Macrobius is that of Gronovius, *Lugd. Bat.*, 1670, 8vo. The edition of Zeune, *Lips.*, 1774, 8vo, has a very faulty text, but very useful and extensive notes. The text is a careless reprint of that of Gronovius. The Bipont edition, 1788, 2 vols. 8vo, has no notes, but a very correct text. The *Notitia Literaria* prefixed is also very useful.—II. An ecclesiastical writer, who lived in the sixth century. He was at first a priest of the Catholic church in Africa, but afterward made common cause with the Donatists. We have a fragment remaining of a letter of his to the people of Carthage, but nothing exists of a treatise which he wrote while yet belonging to the orthodox persuasion, entitled "*Ad confessores et virgines.*"

MACRONES, a nation of Asia, occupying the northern parts of Armenia, probably between the town of Arze and the coast of the Euxine. They are mentioned in the Anabasis as one of the nations through whose territories the Greeks marched. The Macrones are called Macrocephali by Scylax (p. 33), but Pliny seems to distinguish them as two different people (6, 4). Herodotus informs us that the Macrones used circumcision, having, as they themselves reported, derived the practice from the Colchians. (*Herod.*, 2, 104.) The natural inference to be drawn from this passage is, that the Macrones were of Colchian origin. Strabo affirms, that this people were in his time no longer called by their ancient appellation, but were named Sanni (*Strab.*, 548); and Eustathius, who confirms this statement, writes the word Tzani, according to the more modern Greek orthography (*ad Dionys. Perieg.*, 766). Cramer thinks, that the modern name of *Djanik* is a corruption of Sannice. (*Asia Minor*, vol. 1, p. 286.)

MADAURA, a city of Numidia, near Tagaste, and northwest of Sicca. It appears to have been a place of some importance, and, in the *Notitia Numidia*, Prudentius Metastensis is named as its bishop. It is commonly regarded as the birthplace of Apuleius, though Mannert is in favour of the Roman colony *Ad Medera*. No traces of Madaura remain. In an inscription of Gruter's (p. 600, n. 10), the name of the city is given as Medaura. (Mannert, *Geogr.*, vol. 10, pt. 2, p. 321.)

MÆANDER, a river of Asia Minor, rising near Celæne in Phrygia, and, after forming the common boundary between Lydia and Caria, falling into the Ægean below the promontory of Mycale. It was remarkable for the winding nature of its course (*σκολιὸς ὄν ἐν ἐκπεδόλῳ*.—*Strabo*, 577), and hence all obliquities or windings took the name of Mæander. (*Strab.*, l. c.) It received the waters of various streams, the Mæryas, Orghæ, &c., but was not remarkable for its size as far as regarded breadth, though a deep river, and fordable only in a few places in the early part of its course. According to Xenophon (*Anab.*, 1, 2), the Mæander rose in the palace of Cyrus, flowing from thence through his park and the city of Celæne. In the vicinity rose the Mæryas, which formed a junction with the Mæander in the suburb of Celæne, where afterwards stood the city of Apamea. (Compare the remarks of Leake, *Tour*, p. 158, *seqq.*) According to Strabo (663), the common boundary of Caria and Phrygia, on the Mæander, was at Oarura. After the river had reached Lydia and Caria, it widened, and entered upon what the ancients denominated the plain of the Mæander, which extended from the borders of Phrygia to the sea, nearly 100 miles. This plain varied in breadth from 5 to 10 miles, and was ornamented with a number of fine cities and towns. Great changes have taken place on the coast, at the mouth of the Mæander, by the great deposition of mud and earth in the course of ages: changes that have so completely altered the face of things as described by the ancients, that the first of modern geographers was totally misled in his estimate of the ancient geography, by attempting to reconcile it with the modern, on the ground of the imperfect descriptions of it in the ancient books. D'Anville had no conception that the Gulf of Latmus received the Mæander, but supposed a considerable space to exist between them. Nor was he aware that the gulf itself no longer existed; that its wide opening to the sea was closed up by alluvions; and that the island of Lade, so often mentioned as a rendezvous in the history of the naval warfare of ancient times, had become a part of the main land, rising, like the rock of Dumbarton, from the marshy soil; and, moreover, that the inner part of the gulf was transformed into a fresh-water lake. The mud of the Mæander, having been deposited across the southeast arm of the gulf, formed its upper part into a lake; which soon became fresh, when the access of the sea-water was barred out, as it receives a great quantity of land waters from the surrounding mountains. It is named the Lake of *Bæf*, from a town at the southeast corner: it is about 12 miles in length, and from 3 to 5 in breadth. Chandler represents the water as insipid and not drinkable. The modern name of the Mæander is *Minder*. (Rennell, *Geogr. of Western Asia*, vol. 2, p. 30, *seqq.*) Mr. Turner describes the Mæander in a part of its course as about seventy feet wide, and having a current towards the sea of about a mile an hour: he observes, however, that this must be much more rapid, when the streams, formed by rain and melted snow, pour into it from the mountains. He describes the water as very thick and muddy; and the mud in particular at the bank as extremely deep. (*Tour in the Levant*, vol. 3, p. 96.)

MÆTÆ, a people in the north of Britain, near the wall of Severus, comprising the Ota-

deni, Gadeni, Selgovæ, Novantæ, and Damnii. (*Dio Cass.*, 76, 12.)

MÆCENAS, CAIUS CILNIUS, was descended, it is said, from Elbius Volterrenus, one of the Lucumones of Etruria, who fell in the battle at the lake Vadimonis, A.U.C. 445, which finally brought his country under total subjection to the Romans. His immediate ancestors were Roman knights, who, having been at length incorporated into the state, held high commands in the army (*Horat.*, *Sat.*, 1, 6, 3), and Mæcnas would never consent to leave their class to be enrolled among the senators: but he was proud (as may be conjectured from its frequent mention by the poets) of his supposed descent from the old Etrurian princes. It is not known in what year he was born, or in what manner he spent his youth; but Meibomius (*Mæcnas*, *L. Bat.*, 1653, 4to) conjectures that he was educated at Apollonia, along with Augustus and Agrippa; and that this formed the commencement of their memorable friendship. He is not mentioned in the history of his country till we hear of his accompanying Augustus to Rome after the battle of Mutina. He was also with him at Philippi, and attended him during the whole course of the naval wars against Sextus Pompey, except when he was sent at intervals to Rome, in order by his presence to quell those disturbances, which, during this period, frequently broke out in the capital. In the battle of Actium he commanded the light Liburnian galleys, which so greatly contributed to gain the victory for Augustus, and he gave chase with them to Antony when he fled after the galley of Cleopatra. During the absence of Augustus in Egypt, Mæcnas, in virtue of his office of prefect, was intrusted with the chief administration of affairs in Italy, and particularly with the civil government of the capital. (*Pedo Albinov.*, *Epiced. Mæcn.*) After Augustus had returned from Egypt without a rival, and the affairs of the empire proceeded in a regular course, Mæcnas shared with Agrippa the favour and confidence of his sovereign. While Agrippa was intrusted with affairs requiring activity, gravity, and force, those which were to be accomplished by persuasion and address were committed to Mæcnas. The advice which he gave to Augustus in the celebrated consultation with regard to his proposed resignation of the empire, was preferred to that of Agrippa: Mæcnas having justly represented that it would not be for the advantage of Rome to be left without a head to the government, as the vast empire now required a single chief to maintain peace and order; that Augustus had already advanced too far to recede with safety; and that, if divested of absolute power, he would speedily fall a victim to the resentment of the friends or relatives of those whom he had formerly sacrificed to his own security. (*Dio Cassius*, 53, 14, *seqq.*) Having agreed to retain the government, Augustus asked and obtained from Mæcnas a general plan for its administration. His minister laid down for him rules regarding the reformation of the senate, the nomination of magistrates, the collection of taxes, the establishment of schools, the government of provinces, the levy of troops, the equalization of weights and measures, the suppression of tumultuous assemblies, and the support of religious observances. His measures on all these points, as detailed by Dio Cassius, show consummate political wisdom, and knowledge in the science of government. Mæcnas had often mediated between Antony and Augustus, and healed the mutual wounds which their ambition inflicted. But when his master had at length triumphed in the contest, the great object of his attention was to secure the permanence of the government. For this purpose he had spies in all corners, to pry into every assembly, and to watch the motions of the people. By these means the imprudent plots of Lepidus (*Vell. Paterc.*, 2, 88) and Muræna were discovered and suppressed without danger

or disturbance; and at length no conspiracies were formed. At the same time, and with a similar object, he did all in his power to render the administration of Augustus moderate and just; and, as he perfectly understood all the weaknesses and virtues of his character, he easily bent his disposition to the side of mercy. While he himself, as prefect of the city, had retained the capital in admirable order and subjection, he was yet remarkable for the mildness with which he exercised this important office, to which belonged the management of all civil affairs in the absence of the emperor, the regulation of buildings, provisions, and commerce, and the cognizance of all crimes committed within a hundred miles of the capital. Seneca, who is by no means favourable, in other respects, to the character of Mæcenas, allows him a full tribute of praise for his clemency and mildness. (*Epist.*, 114.) So sensible was Augustus of the benefits which his government derived from the counsels and wise administration of Mæcenas, and such was his high opinion of his sagacity, fidelity, and secrecy, that everything which concerned him, whether political or domestic, was confided to this minister. Such, too, were the terms of intimacy on which they lived, that the emperor, when he fell sick, always made himself be carried to the house of Mæcenas; so difficult was it to find repose in the habitation of a prince! During the most important and arduous periods of his administration, and while exercising an almost unremitting assiduity, Mæcenas had still the appearance of being sunk in sloth and luxury. Though he could exert himself with the utmost activity and vigilance when these were required, yet in his hours of freedom he indulged himself in as much ease and softness as the most delicate lady in Rome. (*Vell. Paterc.*, 2, 88.) He was moderate in his desires of wealth or honours; he was probably indolent and voluptuous by nature and inclination; and he rather wished to exhibit than conceal his faults. The air of effeminacy which he ever assumed, was perhaps good policy in reference both to the prince and people. Neither could he be jealous of a minister who was apparently so careless and indifferent, and who seemed occupied chiefly with his magnificent villas and costly furniture. He usually came abroad with a negligent gait and in a loose garb. When he went to the theatre, forum, or senate, his ungirt robe trailed on the ground, and he wore a little cloak, with a hood like a fugitive slave in a pantomime. Instead of being followed by lictors or tribunes, he appeared in all public places attended by two eunuchs. (*Senec., Epist.*, 114.) He possessed a magnificent and spacious villa on the Esquiline Hill, to which a tower adjoined remarkable for its height. The gardens of Mæcenas, which surrounded the villa, were among the most delightful in Rome or its vicinity. Here, seated in the cool shade of his green spreading trees, whence the most musical birds constantly warbled their harmonious notes, he was accustomed to linger, and pay at idle hours his court to the muses. Being fond of change and singularity, the style of Mæcenas's entertainments varied. They were sometimes profuse and magnificent, at others elegant and private; but they were always inimitable in point of taste and fancy. He was the first person who introduced at Rome the luxury of young male's flesh; his table was served with the most delicious wines, among which was one of Italian growth and most exquisite flavour, called from his name *Mæcenatianum* (*Plin.*, 8, 43); and hence, too, the luxurious Trimalchio, who is the *Magister Convivi* in the Satyricon of Petronius Arbiter, is called *Mæcenatidius*, from his imitating the style of Mæcenas's entertainments. (*Plin.*, 14, 6.) His sumptuous board was thronged with parasites, whom he also frequently carried about to sup with his friends, and his house was filled by musicians, buffoons, and actors of mimes or panto-

mimes, with Bathyllus at their head. These were strangely intermingled in his palace with tribunes, clerks, and lictors. But there, too, were Horace, and Varius, and Valgius, and Virgil! Of these distinguished poets, and of many other literary men, Mæcenas was, during his whole life, the patron, protector, and friend. Desert in learning never failed, in course of time, to obtain from him its due reward; and his friendship, when once procured, continued steady to the last. Among the distinguished men who frequented the house of Mæcenas, a constant harmony seems to have subsisted. They never occasioned uneasiness to each other; they were neither jealous nor envious of the favour and felicity which their rivals enjoyed. The noblest and most affluent of the number were without insolence, and the most learned without presumption. Merit, in whatever shape it appeared, occupied an honourable and unmolested station. Mæcenas is better known to posterity as a patron of literature than as an author; but, living in a poetical court, and surrounded with poets, it was almost impossible that he should have avoided the contagion of versification. He wrote a tragedy called *Octavia*, a poem entitled *De Cultura*, and some Phalæcian and Galliambic verses. All these have perished except a few fragments cited by Seneca and the ancient grammarians. To judge from these extracts, their loss is not much to be regretted; and it is a curious problem in the literary history of Rome, that one who read with delight the works of Virgil and Horace, should himself have written in a style so obscure and affected. The effeminacy of his manners appears to have tainted his language: though his ideas were sometimes happy, his style was loose, florid, and luxuriant (*Senec., Epist.*, 19); and he always aimed at winding up his periods with some turn of thought or expression which he considered elegant or striking. These conceits were called by Augustus his *calamistri*: and in one of that emperor's letters, which is preserved in Macrobius, he parodies the luxuriant and sparkling style affected by his minister. Mæcenas continued to govern the state, to patronise good poets, and write bad verses, for a period of twenty years. During this long space of time, the only interruption to his felicity was the conduct of his wife Terentia. This beautiful but capricious woman was the sister of Proculeius, so eminent for his fraternal love (*Horat., Od.*, 2, 2, 5), as also of Licinius Murena, who conspired against Augustus. The extravagance and bad temper of this fantastical yet lovely female, were sources of perpetual chagrin and uneasiness to her husband. Though his existence was imbittered by her folly and caprice, he continued, during his whole life, to be the dupe of the passion which he entertained for her. He could neither live with nor without her; he quarrelled with her and was reconciled almost every day, and put her away one moment to take her back the next; which has led Seneca to remark, that he was married a thousand times, yet never had but one wife. Terentia vied in personal charms with the Empress Livia, and is said to have gained the affections of Augustus. The umbrage Mæcenas took at the attentions paid by his master to Terentia, is assigned by Dio Cassius as the chief cause of that decline of imperial favour which Mæcenas experienced about four years previous to his death. For, although he was still treated externally with the highest consideration, though he retained all the outward show of grandeur and interest, and still continued to make a yearly present to the emperor on the anniversary of his birthday, he was no longer consulted in state affairs as a favourite or confidant. Others have supposed that it was not the intrigue of Augustus with Terentia which diminished his influence, but a discovery made by the emperor, that he had revealed to his wife some circumstances

concerning the conspiracy in which her brother Murena had been engaged. Suetonius informs us, that he had felt some displeasure on that account; but Murena's plot was discovered in the year 732, and the decline of Mæcenas's political power cannot be placed earlier than 738. The disgust conceived by masters when they have given all, and by favourites who have nothing more to receive, or are satiated with honours, may partly account for the coldness which arose between Augustus and his minister. But the declining health of Mæcenas, and his natural indolence, increasing by the advance of years, afforded of themselves sufficient cause for his gradual retirement from public affairs. His constitution, which was naturally weak, had been impaired by effeminacy and luxurious living. He had laboured from his youth under a perpetual fever (*Plin.*, 7, 51); and for many years before his death he suffered much from wakefulness, which was greatly aggravated by his domestic chagrins. Mæcenas was fond of life and enjoyment; and of life even without enjoyment. Hence he anxiously resorted to different remedies for the cure or relief of this distressing malady. Wine, soft music sounding at a distance, and various other contrivances, were tried in vain. At length, Antonius Musa, the imperial physician, who had saved the life of Augustus, but accelerated the death of Marcellus, obtained for him some alleviation of his complaint by means of the distant murmurings of falling water. The sound was artificially procured at his villa on the Esquiline Hill. During this stage of his complaint, however, Mæcenas resided principally in his villa at Tibur, situated on the banks of the Anio, and near its celebrated cascades. This was indeed a spot to which Morpheus might have sent his kindest dreams; and the pure air of Tibur, with the streams tumbling into the valley through the arches of the villa, did bestow on the worn-out and sleepless courtier some few moments of repose. But all these resources at length failed. The nervous and feverish disorder with which Mæcenas was afflicted increased so dreadfully, that for three years before his death he never closed his eyes. In his last will, he recommended Horace, in the most affectionate terms, to the protection of the emperor: "*Horatii Flacci, ut mei, memor esto.*" He died in 745, in the same year with Horace, and was buried in his own gardens on the Esquiline Hill. He left no child, and in Mæcenas terminated the line of the ancient Etrurian princes. But he bequeathed to posterity a name, immortal as the arts of which he had been through life the generous protector, and which is deeply inscribed on monuments that can only be destroyed by some calamity fatal to civilization. Mæcenas had nominated Augustus as his heir, and the emperor thus became possessed of the Tiburtine villa, which had formed the principal residence of the minister during the close of his life, and in which the monarch passed a great part of the concluding years of his reign. The death of his old favourite revived all the esteem which Augustus had once entertained for him; and, many years afterward, when stung with regret at having divulged the shame of his daughter Julia and punished her offence, he acknowledged his irreparable loss by exclaiming, that he would have been prevented from acting such a part had Mæcenas been still alive. So difficult was it to repair the loss of one man, though he had millions of subjects under his obedience. "His legions," says Seneca, "being cut to pieces, he recruited his troops—his fleets, destroyed by storms, were soon refitted—public edifices, consumed by the flames, were rebuilt with greater magnificence; but he could find no one capable of discharging the offices which had been held by Mæcenas with equal integrity and ability." (*Dunlop's Roman Literature*, vol. 3, p. 26, seqq., *London*, ed.)

MÆDI, a people of Thrace, above the Palus Bisto-

nia, noticed by Thucydides in his narrative of the expedition of Sitalces into Macedonia, but of whom Herodotus seems to have had no knowledge. (*Thucyd.*, 2, 98.)

MÆLIUS, a Roman, slain by Ahala, master of the horse to the dictator Cincinnatus, for aspiring to supreme power. (*Liv.*, 4, 13, seqq.)

MÆNĀDES (*Μαινάδες*), a name applied to the Bacchantes or priestesses of Bacchus, and alluding to their phrenzied movements. It is derived from *μαινωμαι*, "to rave."

MÆNĀLUS (*plur.* Mēnala), I. a mountain in the south-southeastern part of Arcadia, sacred to the god Pan, and considered, on account of its excellent pastures, to be one of the favourite haunts of that rural deity. (*Theocr.*, *Idyl.*, 1, 123.—*Virg.*, *Georg.*, 1, 17.—*Ovid.*, *Met.*, 1, 216.) The modern name is *Roïno*. Dodwell says that its height is considerable, and that, like the other Peloponnesian mountains of the first order, it is characterized by intersecting glens and valleys, watered by numerous rivulets, and cultivated with sylvan scenery. It is not, however, as he remarks, to be compared with Taygetus either for grandeur or beauty. Mēnalus extends far to the northeast, bounding the western side of the plains of Mantinea and Orchomenus, and occupying a tract of country anciently called Mainalia (*Pausan.*, 8, 9), to which the Delphic oracle gives the epithet of "cold" (*δυσχείμερος*).—*Pausan.*, I. c.—*Dodwell*, vol. 2, p. 418).—II. A town of Arcadia, in the vicinity of Mount Mēnalus, which took its name, according to Pausanias (8, 3), from one of the sons of Lycaon, its founder. It was in ruins in the time of Pausanias, and its situation has not been clearly investigated by modern travellers. (*Dodwell*, vol. 2, p. 418.)

MÆNUS or MÆNVUS, a river of Germany, falling into the Rhine at Moguntiacum (*Mayence* or *Mainz*), and now the *Main*. The Romans first became acquainted with it on getting possession of Moguntiacum. Ptolemy makes no mention of this river, but would seem to have been acquainted with its sources. It is worthy of remark, that the inhabitants on the Main, in the vicinity of Wurtzburg, still call the river, after the Roman fashion, the *Mæn*. The name Mænus is a later form than the other. (*Eumen.*, *Paneg. Const.*, c. 13.—*Mannert*, *Geogr.*, vol. 3, p. 423.)

MÆONIA. *Vid.* Lydia.—The Etrurians, supposed to have derived their civilization, or, according to others, to have sprung, from a Lydian colony, are often called *Mæonide* (*Virg.*, *Æn.*, 11, 759), and the Lake Trasymenus in their country is styled by Silius Italicus *Mæonius Lacus*. (*Sil. Ital.*, 15, 35.)

MÆONIDES, a surname of Homer, in allusion to his supposed Lydian or Mæonian origin. (*Vid.* Homerus.)

MÆONIS, I. an epithet applied to Omphale as queen of Lydia or Mæonia. (*Ovid.*, *Fast.*, 2, 310, 352).—II. The same epithet is also applied to Arachne as a native of Lydia. (*Id.*, *Met.*, 6, 103.)

MÆOTÆ, a general name for the tribes dwelling along the Palus Mæotis. (*Plin.*, 4, 12.—*Strab.*, 495.) Mela (1, 2) uses the epithet *Mæotici*, and Vopiscus calls them *Mæotide*.

MÆOTIS PALUS, or *Sea of Azof*, a large marshy lake between Europe and Asia, northeast of the Euxine, and connected with it by the Cimmerian Bosphorus, or Straits of *Jenicali*. It is formed by the Tanais (*Don*) and other rivers. Its waters are brackish; they are well stored with fish, but are shallow to a great distance from the banks. No rock has been observed in any part of it. The surface is about twelve inches higher in spring than in the rest of the year. (*Malte-Brun*, vol. 6, p. 405, *Am. ed.*)—The Palus Mæotis is said by Herodotus to have been also called *Mæctis* (*ἡ Μαίητις τε καλεῖται*.—4, 86, 46), and the *Mother of the Pontus Euxinus* (*ἡ Μητέρα τοῦ Πόντου*.—4, 86). This name, *Mæctis*, is the earlier and general form.

(Compare *Wesseling, ad Herod.*, 4, 45.)—We have here a curious link in the chain connecting the early religion of India with that of the countries to the west. The leading idea appears to be one of a cosmogonical nature, and to refer to the action of the humid principle as the generating cause of all things. Hence the Aphrodite of the Greeks, rising from the bosom of the waters (*ἀναδυμένη*.—*Ἀφροδίτη παντογενής*.—*Orpheus, H.*, 54, ed. *Herm.*), or, in other words, the great Mother of all (*Μήτηρ*). She is the *Μούθ* (*Terra Mater*) of the Egyptians, the same with their Isis. (*Cruzer, Symbol.*, vol. 1, p. 354); the *Μῶρ* (*Mot*) of Sanchoniathon (*limus, aut aquosa mixtionis putredo*.—*Bochart, Geogr. Sacr.*, 2, 2, p. 706); the *Χάος* of Hesiod (*Theog.*, 123); the *Μῆτρης*, to whom a temple was erected in the vicinity of the Hypanis and Borysthenes (*Herod.*, 4, 53.—*Wess.*, *ad loc.*); the *γῆ μήτηρ*, the primitive slime (*Cruzer, Symbol.*, vol. 4, p. 329); the *Μήτηρ*, ἡ προεστύτη πάσα (*Hesych.*, ed. *Alberti*, p. 597); the *Μῆτρς* of Hesiod and one of the Orphic poets (*Orpheus, Argon.*, ed. *Herm. Aposp.*, 6, 19, n., p. 461); and the *Μαία* of the Donic dialect (*Lamb., Vit. Pythag.*, ed. *Kiesling*, p. 114, 56).—The root of this word is to be found in the Sanscrit. (Compare *Hesychius, Μαί, μέγα*. *Ἰνδοί*.) *Mana-Mai* (*Magna Mater*) is worshipped at the present day by the Buddhists in Nepal. (*Kirkpatrick, Account of Nepal, &c.*, p. 114.)—The worship of the great mother (*ἡ δυνὶ μήτηρ βασιλεία*.—*Orpheus, Hymn.*, 49, 4, ed. *Herm.*, p. 313); the mother of gods and nurse of all things (*θεῶν μήτηρ, τροφὸς πάντων*.—*Orpheus, Hymn.*, 26 et 27, ed. *Herm.*, p. 286, *seqq.*); the *Metis* whom Jove espoused as his first consort, after the conflict with the Titans (*Hesiod, Theog.*, 886), appears to have spread from east to west, and one of the early seats of this worship to have been in the vicinity of the Palus Mæotis, whose slimy waters were regarded as a type of that primitive slime from whose teeming bosom the world was supposed to have been formed. (*Ritter's Vorhalle*, p. 57.—*Id. ibid.*, p. 161, *seqq.*)

Μαεΐα Sylva, a forest in Etruria, southwest from Veii. It originally belonged to this city, but was taken by Ancus Marcius. (*Liv.*, 1, 33.) Pliny reports that it abounded with dormice. (*Plin.*, 8, 58.)

Μαίριος, a miserable poet of the Augustan age, who, along with Bævus, frequently attacked the productions of Virgil, Horace, and other distinguished writers of the day. They are both held up to ridicule in turn by Virgil and Horace, and owe the preservation of their names to this circumstance alone. (*Virg., Eclog.*, 3, 90.—*Voss, ad loc.*—*Servius, ad Virg., Georg.*, 1, 210.—*Horat., Epod.*, 10, 2.—*Weichert, de oblect. Horat.*, p. 12.—*Bähr, Gesch. Röm. Lit.*, vol. 1, p. 125.)

ΜΑΓΕΤΟΒΙΑ, a city of Gaul, the situation of which has given rise to much discussion. Some place it near Binge, below Moguntia; and they found this opinion on the opening lines in the poem of Ausonius upon the Mosella. D'Anville, however, and subsequent writers, discover traces of the ancient name in the spot called at the present day *la Moigte de Brois*, at the confluence of the Arar and Ogné, near a village named *Pontailleur*, which belonged formerly to Burgundy. This opinion is confirmed by an inscription found in this quarter on the fragment of an urn, dug up, along with other articles, in 1802. The inscription is *ΜΑΓΕΤΟΒ*. (*Cæs.*, B. G., 1, 31.—*Lemaire, Ind. Geogr.*, *ad Cæs.*, *s. v.*)

ΜΑΓΙ, the name of the priests among the Medes and Persians, and whose order is said to have been founded by Zoroaster. The Magi formed one of the six tribes into which the Medes were originally divided (*Herod.*, 1, 101); but, on the downfall of the Median empire, they continued to retain at the court of their conquerors a great degree of power and authority. It would appear, however, that they did not witness with

indifference the sovereignty pass from the Medes to the Persians; and it was probably owing to the intrigues of the whole order, that a conspiracy was formed to deprive Cambyzes of the throne, by representing one of their number as Smerdis, the son of Cyrus, who had been previously put to death by his brother. Herodotus, who has given the history of this conspiracy at length, evidently regarded it as a plot, on the part of the Magi, to restore the sovereignty to the Medes, since he represents Cambyzes, on his deathbed, as conjuring the Persians to prevent the Medes from again obtaining the supremacy. (*Herod.*, 3, 65.) And the Persians themselves must have looked upon it in the same light, since, after the discovery of the conspiracy, and the murder of the pretended Smerdis by Darius Hystaspis and his companions, a general massacre of the Magi ensued, the memory of which event was annually preserved by a festival called "the Slaughter of the Magi" (*Μαγοφόνια*), during which none of the Magi were allowed to appear in public. (*Herod.*, 3, 79.—*Ctes.*, *Pers.*, c. 15.) This event, however, does not appear to have impaired their influence and authority; for they are represented by Herodotus, in his account of the Persian religion, as the only recognised ministers of the national worship (1, 138).—The learning of the Magi was connected with astrology and enchantment, in which they were so celebrated that their name was applied to all orders of magicians and enchanters. Thus, the Septuagint translates the Chaldee *Ashap* by the word *Magus* (*Μάγος*.—*Dan.*, 1, 20.—*Id.*, 2, 2, 27.—Compare *Acts*, 13, 6, 8). The word was also applied to designate any men celebrated for wisdom; whence the wise men of the East, who came to see the infant Saviour, are called simply Magi. (*Matth.* 2, 1.) It would appear from a passage in Jeremiah (39, 3), that the Babylonian priests were also called Magi; if at least the interpretation of *Rab-Mag*, "chief of the Magi," be correct. (*Gesenius, Hebr. Lex.*, *s. v. Mag.*) The etymology of the word is doubtful. In Persian the name of priest is *mah*; and it is not improbable, as Gesenius has conjectured, that the term may be connected with the root meaning "great," which we have in the Greek *μέγας*; the Latin *mag-is* and *mag-nus*; the Persian *māh*; and the Sanscrit *mah-at*. It is a curious fact, that the Hindu grammarians derive *mah-at* from a verb *mah*, signifying "to worship." (*Wilson's Sanscrit Dict.*, *s. v. Mah-at*.—*Encycl. Us. Knowl.*, vol. 14, p. 280, *seq.*)—The Magi were divided into three classes: the first consisted of the inferior priests, who conducted the ordinary ceremonies of religion; the second presided over the sacred fire; the third was the *Archimagus* or high-priest, who possessed supreme authority over the whole order. They had three kinds of temples; first, common oratories, in which the people performed their devotions, and where the sacred fire was kept only in lamps; next, public temples, with altars, on which the fire was kept continually burning, where the higher order of Magi directed the public devotions, and the people assembled; and, lastly, the grand seat of the Archimagus, which was visited by the people at certain seasons with peculiar solemnity, and to which it was deemed an indispensable duty for every one to repair, at least once in his life. This principal temple was erected, it is said, by Zoroaster, in the city of Bactra (the modern *Balk*), and remained till the seventh century, when the followers of Zoroaster, being driven by the Mohammedans into Carmania, another building of the same kind was raised, to which those who still adhered to the old Magian religion resorted. They were divided into several sects; but this division probably rather respected the mode of conducting the offices of religion than religious tenets. No images or statues were permitted in the Magian worship. Hence, when Xerxes found idols in the Grecian temples, he, by the advice of the Magi, set them on fire, saying that the

gods, to whom all things are open, are not to be confined within the walls of a temple. The account which Diogenes Laertius gives of the Magi is this (1, 6, seqq.): "They are employed in worshipping the gods by prayers and sacrifices, as if their worship alone would be accepted; they teach their doctrine concerning the nature and origin of the gods, whom they think to be fire, earth, and water; they reject the use of pictures and images, and reprobate the opinion that the gods are male and female; they discourse to the people concerning justice; they think it impious to consume dead bodies with fire; they allow of marriage between mother and son; they practise divination and prophecy, pretending that the gods appear to them; they forbid the use of ornaments in dress; they clothe themselves in a white robe; they make use of the ground as their bed, of herbs, cheese, and bread for food, and of a reed for their staff." And Strabo relates, that there were in Cappadocia a great number of Magi, who were called *Pyrethi*, or worshippers of fire, and many temples of the Persian gods, in the midst of which were altars, attended by priests, who daily renewed the sacred fire, accompanying the ceremony with music. The religious system of the Magi was materially improved by Zoroaster. Plutarch, speaking of his doctrine (*Is. et Os.*, p. 369.—*Op.*, ed. Reiske, vol. 7, p. 468), says: "Some maintain, that neither is the world governed by blind chance without intelligence, nor is there one mind alone at the head of the universe; but since good and evil are blended, and nature produces nothing unmixed, we are to conceive, not that there is one storekeeper, who, after the manner of a host, dispenses adulterated liquors to his guests, but that there are in nature two opposite powers, counteracting each other's operations, the one accomplishing good designs, the other evil. To the better power Zoroaster gave the name of Oromasdes, to the worse that of Arimanius; and affirmed that, of sensible objects, the former most resembled light, the latter darkness. He also taught that Mithras was a divinity, who acted as a moderator between them, whence he was called by the Persians the Mediator." After relating several fabulous tales concerning the contests between the good and evil demon, Plutarch, still repeating the doctrines of Zoroaster, proceeds: "The fated time is approaching in which Arimanius himself shall be utterly destroyed; in which the surface of the earth shall become a perfect plain, and all men shall speak one language, and live happily together in one society." He adds, on the authority of Theopompus, "It is the opinion of the Magi, that each of these gods shall subdue and be subdued by turns, for six thousand years, but that, at last, the evil principle shall perish, and men shall live in happiness, neither needing food nor yielding a shadow; the God who directs these things taking his repose for a time, which, though it may seem long to man, is but short." Diogenes Laertius (*l. c.*), after Hecatasus, gives it as the doctrine of Zoroaster, that the gods (meaning, doubtless, those of whom he last speaks, Oromasdes and Arimanius) were derived beings.—It will appear probable, from a comparison of these with other authorities, that Zoroaster, adopting the principle commonly held by the ancients, that from nothing, nothing can be produced, conceived light, or those spiritual substances which partake of the active nature of fire and darkness, or the impenetrable, opaque, and passive mass of matter, to be emanations from one eternal source; that to derived substances he gave the names, already applied by the Magi to the causes of good and evil, Oromasdes and Arimanius; and that the first fountain of being, or the supreme divinity, he called Mithras. These active and passive principles he conceived to be perpetually at variance; the former tending to produce good, the latter evil; but that, through the mediation or intervention of the Supreme Being, the contest would at last terminate in

favour of the good principle. (*Enfield's History of Philosophy*, vol. 1, p. 63, seqq.)

MAGNA GRÆCIA or MAJOR GRÆCIA (*Liv.*, 31, 7.—*Justin.*, 20, 2), an appellation used to designate the southern part of Italy, in consequence of the numerous and flourishing colonies which were founded by the Greeks in that part of the country. There is some difficulty in determining how far this name extended, but it does not appear to have been applied to the country beyond Cumæ and Neapolis; and some geographers have even thought, though without sufficient reasons, that it was confined to the colonies on the Gulf of Tarentum. Pliny apparently considers Magna Græcia to begin at the Locri Epizephyrii (3, 15); but Strabo (175) even includes the Grecian towns of Sicily under this name. The time when the name of Magna Græcia (*Μεγάλη Ἑλλάς*) was first applied to the south of Italy is uncertain. It does not occur, as far as we are aware, in the early Greek writers, such as Herodotus, Thucydides, &c., but it is used by Polybius (3, 39), and succeeding Greek and Roman writers. Taking the name in the widest signification which is given to it by Strabo, Magna Græcia may be justly considered as an appropriate name; since it contained many cities far superior in size and population to any in Greece itself. The most important of these were, Tarentum, founded by the Lacedæmonians; Sybaris, Crotona, and Metapontum, by the Achæans; Locri Epizephyrii, by the Locrians; and Rhegium, by the Chalcidians; and in Sicily, Syracuse, founded by the Corinthians; Gela, by the Cretans and Rhodians; and Agrigentum, by the inhabitants of Gela. (*Encycl. Us. Knowl.*, vol. 14, p. 283.—Compare *Cramer's Anc. Italy*, vol. 2, p. 339.)

MAGNA MATER, a name given to Cybele. (*Vid.* Cybele, Pessinus, and Ludi Megalesii.)

MAGNENTIOS, a German by birth, who, from being a private soldier, rose to the head of the Roman empire in the West. He was at first a prisoner of war, but, to free himself from chains, he joined the Roman troops, and became distinguished for valour. He was commander of the Jovian and Herculean bands, stationed to guard the banks of the Rhine at the time when Constantine I. had incurred the contempt of the army by his indolence and voluptuousness, and having revolted against that prince, and caused him to be killed near the Pyrenees, A.D. 350, he proclaimed himself Emperor of the West. At Rome he acted with great tyranny, and by his extortions was enabled to keep in pay a large army to support his usurped authority. So formidable, indeed, did he appear, that Constantius, emperor of the East, and brother of the deceased Constantine, offered him peace, with the possession of Gaul, Spain, and Britain, but his offer was rejected. A war ensued, and Magnentius was totally defeated. He fled to Aquileia, and afterward obtained a victory over the van of the pursuing army at Ticinum. Another defeat, however, soon followed, and Magnentius took refuge in Lugdunum (*Lyons*). Here his own soldiers, who had accompanied him in his flight, surrounded the house in which he was, and sought to get possession of his person and deliver him up to the conqueror; but he prevented this by despatching himself with his own sword, after having slain several of his relations and friends who were around him. (*Le Beau, Hist. du Bas-Empire*, vol. 1, p. 354, seqq.)

MAGNESIA, I. a city of Lydia, described by Strabo (14, 647) as situate in a plain, at the foot of a mountain called Thorax, and not far from the Mæander. Hence, for distinction's sake from Magnesia near Mount Sipylus, it was usually styled "*Magnesia at the Mæander*" (*Μαγνησία ἐν Μαιάνδρῳ*). In its immediate neighbourhood flowed the small stream Lethæum, which issued from Mount Pactyas lying to the north, and joined the Mæander not far from this place. Mag-

nesia, according to Pliny (5, 39), was fifteen miles, according to Artemidorus (*sp. Strab.*, 683), 120 stadia, from Ephesus. Strabo makes it a city of Æolian origin, which is not contradicted by another statement of the same writer, when he makes the Magnesians to have been descended from the Delphians who occupied the Montes Didymi of Thessaly.—Magnesia was sacked by the Cimmerians during their inroads into Asia Minor. It was afterward held by the Milesians, and was one of the cities assigned, for his support, to Themistocles, by the King of Persia. The modern *Ghisel-hissar* (Beautiful Castle) had been generally thought to occupy the site of the ancient Magnesia. M. Barbé du Boage, however, in the notes to his translation of Chandler, gave convincing reasons for thinking that *Ghisel-hissar* occupied the position of Tralles; but it was not until Mr. Hamilton explored the ruins of Magnesia at *Ischbasar*, and discovered the remains of the celebrated temple of Diana Leucophrone, that the question could be considered as satisfactorily determined in favour of the latter place. (*Leake's Journal*, p. 242, *seqq.*)—II. A city in the northern part of Lydia, southeast of Cumæ, and in the immediate vicinity of the Hermus. It lay close to the foot of Mount Sipylus, and hence, for distinction' sake from the other Magnesia, was called "*Magnesia near Sipylus*" (*Μαγνησία πρὸς Σειπύλῳ*). Its founder is not known, nor its earlier history. It was first brought into notice by the battle fought in its neighbourhood between Antiochus and the Romans (187 B.C.). It was not a place of much importance under the Roman dominion, as the main road from Pergamus to Sardis passed on one side of it. At the close of the Mithradatic war the Romans gave it its freedom. It was frequently injured by earthquakes, and was one of the twelve cities destroyed by the earthquake in the reign of Tiberius, which that emperor, however, quickly rebuilt. (*Tacit.*, *Ann.*, 2, 47.—*Plin.*, 2, 84.) It became afterward the seat of a bishopric. The modern name is *Magnissa*. (*Tavernier*, 1, 7.—*Mannert*, *Geogr.*, vol. 6, pt. 3, p. 373.)—III. A district of Thessaly. The Greeks gave the name of Magnesia to that narrow portion of Thessaly which is confined between the Peneus and Pagassan Bay to the north and south, and between the chain of Ossa and the sea on the west and east. (*Strabo*, 441.—*Scyl.*, *Peripl.*, p. 24.—*Pliny*, 4, 9.) The people of this district were called Magnesians, and appear to have been in possession of it from the remotest period. (*Hom.*, *Il.*, 2, 766.—*Pind.*, *Pyth.*, 4, 140.—*Id.*, *New.*, 5, 56.) They are also universally allowed to have formed part of the Amphicypion body. (*Æschin.*, *de fals. leg.*, p. 122.—*Pausan.*, 10, 8.—*Harpocrat.*, s. v. Ἀμφικύριον.) The Magnesians submitted to Xerxes, giving earth and water in token of subjection. (*Herod.*, 7, 132.) Thucydides leads us to suppose they were in his time dependant on the Thessalians (2, 10). They passed with the rest of that nation under the dominion of the kings of Macedon who succeeded Alexander, and were declared free by the Romans after the battle of Cynoscephalæ. (*Polyb.*, *Excerpt.*, 18, 29, 5.—*Livy*, 33, 33.) Their government was then republican, affairs being directed by a general council, and a chief magistrate called Magnetarch. (*Liv.*, 34, 31.—*Strab.*, 9, 442.—*Xen.*, *Anab.*, 6, 1.—*Cramer's Anc. Greece*, vol. 1, p. 419, *seqq.*)—IV. A city of Magnesia, on the coast, opposite the island of Sciatthus. It was conquered by Philip, son of Amyntas. (*Cramer's Anc. Greece*, vol. 1, p. 427.)

MAGO, I. a Carthaginian admiral, who gained a naval victory over Leptines, the commander of Dionysius the elder, off Catania, in which the latter lost 100 vessels, and more than 20,000 men. (*Diod. Sic.*, 14, 90.) Some years after this we find him at the head of a land force, endeavouring to make head against Dionysius in person; but, being defeated, he was com-

pelled to take shelter in the neighbouring town of Abacumrum. (*Diod. Sic.*, 14, 90.) Being subsequently placed at the head of another expedition into Sicily, he met with equal ill success. (*Diod. Sic.*, 14, 95.) He fell at last in battle against Dionysius, B.C. 383. (*Diod. Sic.*, 15, 15.)—II. Son of the preceding, succeeded him in the command of the Carthaginian fleet B.C. 383. He defeated Dionysius in a great battle, in which the latter lost more than 14,000 men, and compelled him to sue for peace and pay 1000 talents to the Carthaginians. A considerable time after this, he came, at the head of 180 vessels, with 60,000 men, to take possession of Syracuse, which was, according to agreement, delivered up to him by Icetes, excepting the citadel, which was held by the forces of Timoleon. No final advantage, however, accrued to Carthage; for Mago, suspecting treachery on the part of his new ally, and having long wished for a pretence to depart, weighed anchor on a sudden and sailed back to Africa, "shamefully and unaccountably," says Plutarch, "suffering Sicily to slip out of his hands." (*Plut.*, *Vit. Timol.*)—III. Grandfather of the great Hannibal. He succeeded Mago in the command of the Carthaginian fleet, and made himself conspicuous for the rigid discipline which he introduced. The Carthaginian senate, fearing lest Pyrrhus might quit Italy in order to seize upon Sicily, sent Mago, at the head of 120 vessels, to offer aid to the Romans, in order that the King of Epirus might find sufficient employment for his arms in Italy. The offer, however, was declined. Mago was succeeded by his two sons Hasdrubal and Hamilcar. (*Justin.*, 18, 2, *seqq.*—*Id.*, 19, 1.)—IV. Son of Hamilcar and brother of Hannibal. He commanded an ambuscade at the battle of Trebia (*Liv.*, 21, 54), and was also present at the battle of Cannæ, B.C. 216. Having been sent to Carthage to carry the news of the latter victory, he is said to have poured out in the vestibule of the senate-house the golden rings obtained from the fingers of the Roman knights who had fallen in the battle. These, when measured, filled, according to the common account, three modii and a half; though Livy, with true national feeling, states that there was another and more correct tradition, which made the rings to have filled not much more than a single modius. (*Liv.*, 23, 12.) The modius contained a little over one gallon, three quarts dry measure. Mago was subsequently sent into Spain, where he was defeated by the Scipios at Iliturgis (*Liv.*, 28, 49), but he afterward joined his forces with those of Asdrubal the son of Gisco, and defeated and slew Publius Scipio. At a later period, he was himself again defeated along with Hanno, Asdrubal's successor, by Silanus, the lieutenant of Scipio. (*Livy*, 28, 2.) On fleeing to Gades, he was ordered by the Carthaginian senate to cross over with a fleet to Sicily, and carry succours to Hannibal. He conceived thereupon the bold design of seizing upon Carthago Nova as he sailed along. Failing, however, in this, he was obliged to stop at the Balearic Islands in order to procure new levies. Here he made himself master of the smaller island of the two (the modern *Minorca*), and fortified and gave his name to the harbour. (*Vid. Magonis Portus.*) The following summer Mago landed on the coast of Liguria, with 12,000 foot and 200 horse, took Genoa by surprise, and made himself master also of the harbour and town of Savo, and was soon at the head of a numerous army, by the junction of a powerful body of Gauls and Ligurians with his forces. Held, however, in check by the consul Cethegus, who prevented him from uniting with Hannibal, he turned his arms in a different direction, and penetrated into Insubria, but he was severely wounded in battle with the Romans. He reached, however, Liguria by an able retreat, and there met an order from the senate at home, requiring him to return immediately to Carthage, then massacred

by Scipio. He embarked his troops and set sail, but died of his wound at the island of Sardinia, B.C. 203. (*Liv.*, 30, 18.) Cornelius Nepos differs from other writers as to the manner of his death, and says that he either perished by shipwreck or was murdered by his servants. (*Nep., Vit. Hannib.*, c. 8.)—V. A Carthaginian who wrote a work on agriculture in the Punic tongue, which was translated into Latin by order of the Roman senate. It was in twenty-eight books according to Varro. The latter informs us also, that it was translated into Greek by Cassius Dionysius of Utica, who made twenty books of it; and that it was still farther condensed by Diophanes of Bithynia, who brought it down to six books. (*Varro, De R. R.*, 1, 1.)

MAGON, a river of India falling into the Ganges. According to Mannert, the modern name is the *Ram-ganga*. (*Geogr.*, vol. 5, pt. 1, p. 92.)

MAHARBAL, a Carthaginian officer in the army of Hannibal, appointed to carry on the siege of Saguntum when Hannibal marched against the Cretani and Carpetani. (*Liv.*, 21, 12.) After the battle of the Lake Trasymenus in Italy, he was sent in pursuit of the flying Romans. (*Liv.*, 22, 6.) At the battle of Cannæ he commanded the cavalry, and strenuously advised Hannibal, after the latter had gained his decisive victory, to march at once upon Rome. (*Liv.*, 22, 61.—*Id.*, 23, 18.)

MALA, daughter of Atlas and Pleione, and the mother of Mercury by Jupiter. She was one of the Pleiades; and the brightest of the number, according to some authorities: others, however, more correctly make Halcyone the most luminous. (*Vid. Pleiades*, and consult *Ideler, Sternnamen*, p. 146.)

MAJORIANUS, Julius Valerius, grandson of the Majorianus who was master of the horse in Illyria during the reign of Theodosius. He distinguished himself early as a brave commander under Aëtius, and at the death of the latter he rose to such distinction that he was elected Emperor of the West in the room of Avitus, whom he compelled to resign the imperial dignity in 467. He was assassinated by Ricimer, one of his generals, after a reign of four years and a half, at Dertona in Liguria. (*Pierer, Lex. Univ.*, vol. 13, p. 98.)

MALEA, I. a promontory in the southeastern part of the island of Lesbos, now Cape St. Marie.—II. A celebrated promontory of the Peloponnesus, forming the extreme point to the southeast, and separating the Laconic from the Argolic Gulf. Strabo reckons 670 stadia from thence to Tenarus, including the sinuosities of the coast. Cape Malea was considered by the ancients the most dangerous point in the circumnavigation of the peninsula, even as early as the days of Homer. (*Od.*, 1, 80; 3, 286.) Hence arose the proverbial expression, "After doubling Cape Malea forget your country." (*Strab.*, 378.—*Eustath.*, ad *Od.*, p. 1468.—Compare *Herod.*, 4, 179.—*Thucyd.*, 4, 53.—*Scyl.*, p. 17.) It is now usually called Cape St. Angelo, but sometimes Cape Maleo. (*Cramer's Ancient Greece*, vol. 3, p. 196.)—III. A city of Phthiotis. (*Vid. Malia*.)

MALEVENTUM, the ancient name of Beneventum. (*Liv.*, 9, 27.)

MALIA, the chief city of the Malienses, in the district of Phthiotis in Thessaly, from which they probably derived their name. (*Steph. Byz.*, s. v. *Μαλιεύς*.) It was near the head-waters of the Sinus Maliacus, now the Gulf of Zeïtoun.

MALIACUS SINUS, a gulf of Thessaly, running up in a northwest direction from the northern shore of Eubœa, and on one side of which is the Pass of Thermopylæ. It is noticed by several writers of antiquity, such as Herodotus (4, 33), Thucydides (3, 96), and Strabo (433). It now takes its name from the neighbouring city of Zeïtoun. It should be observed that Livy, who often terms it the Maliacus Sinus (27, 30; 31, 46), elsewhere uses the appellation of Ænianum

Sinus (38, 5), which he has borrowed from Polybius (10, 42.—*Steph. Byz.*, s. v. *Αλβία*.—*Cramer's Anc. Greece*, vol. 1, p. 435.)

MALIENSES or MALII, the most southern tribe of Thessaly. They are called by the Attic writers *Μηλῆες*, Melians, but in their own Doric dialect *Μαλιῆς*. Scylax, indeed, seems to make a distinction between the *Μηλῆες* and *Μαλιῆς*, which is to be found in no other author. Palmerius (*ad Scyl.*, p. 32) considers the whole passage to be corrupt. The Malians occupied principally the shores of the gulf to which they communicated their name, extending as far as the narrowest part of the Straits of Thermopylæ, and to the valley of the Sperchius, a little above its entrance into the sea. (*Herod.*, 7, 198.) They are admitted by Æschines, Pausanias, and Harpocration, in their lists of the Amphictyonic states; which was naturally to be expected, as this celebrated assembly had always been held in their country. The Melians offered earth and water to Xerxes in token of submission. (*Herod.*, 7, 132.) According to Herodotus, their country was chiefly flat: in some parts the plains were extensive, in others narrow, being confined on one side by the Maliac Gulf, and towards the land by the lofty and inaccessible mountains of Trachinia. (*Cramer's Anc. Greece*, vol. 1, p. 435.)

MALLI, a people in the southwestern part of India intra Gangem, along the banks of the Hydraotes. (*Strabo*, 699.) It was in attacking a fortress of the Malli that Alexander was severely wounded. (*Plut., Vit. Alex.*) The territory of this people would seem in some degree to correspond to the modern province or soobah of Moultan. (*Vincent's Voyage of Near-chus*, p. 130.)

MALLOS, a town of Cilicia Campestris, eastward from the river Pyramus; now a small village called *Malo*. (*Mela*, 1, 13.—*Curt.*, 3, 7.—*Lucan*, 3, 325.)

MALTHINUS, a name occurring in Horace (*Serm.*, 1, 2, 27). It was thought very effeminate among the Romans to appear in public with the tunic carelessly or loosely girded. For this Mæcenas was blamed; and the question arises, whether Horace means, under the character of Malthinus, to portray his patron, or whether the reference is merely one of a general nature. Opinions, of course, are divided on this subject. At first view, it appears hardly probable that the poet would embrace such an opportunity, or adopt such a mode, of censuring his friend and benefactor, one to whom he owed so large a share of his own elevation. And yet, when we take into consideration all the circumstances of the case, the respective characters of the bard and his patron, as well as the sincere and manly nature of the intimacy which existed between them, it would seem as if this very way of attacking the foibles of Mæcenas was the result of a genuine friendship, the applying a desperate remedy to a disgraceful failing. But, it will be asked, does not the presence of *stulti* in the text militate against this idea? We answer, by no means, if the term be taken in a softened sense. Bothe regards it here as equivalent merely to "*quicunque imprudenter aut inepte agunt*," and this explanation derives support from the following line of *Afranius* (*ap. Isidor.*, 10, litt. S.): "*Ego stultum met existimo, fatuum esse non opinor*." In addition to what is here stated, we may observe, that the very name of *Malthinus*, as indicating an effeminate person, may contain a covert allusion to Mæcenas, whose general habits in this respect were known to all. The word is derived either from the Greek *μάλθιν*, or from the old Latin term *maltha*, equivalent to *molle*, and used, according to Nonius, by Lucilius.

MAMERTINA, a name of Messana in Sicily. (*Vid. Mamertini*.—*Martial*, 13, ep. 117.—*Strab.*, 7.)

MAMERTINI, a band of Campanian mercenaries, originally employed in Sicily by Agathocles. After having

been established for some time at Syracuse, a tumult arose between them and the citizens, in consequence of their being deprived of the right of voting at the election of magistrates, which they had previously enjoyed. The sedition was at last quelled by the interference of some of the elderly and most influential citizens, and the Mamertines agreed to leave Syracuse and return to Italy. Having reached the Sicilian straits, they were hospitably received by the inhabitants of Messana; but, repaying this kindness by the basest ingratitude, they rose upon the Messanians by night, slew the males, took the females to wife, and called the city Mamertina. (*Diod. Sic., fragm., lib. 21.*) This conduct on the part of the Mamertines led eventually to the first Punic War. (*Vid. Punicum Bellum.*)—The origin of the name Mamertini is said to have been as follows. It was customary with the Oscan nations of Italy, in time of famine or any other misfortune, to seek to propitiate the favour of the gods by consecrating to them not only all the productions of the earth during a certain year, but also all the male children born during that same space of time. Mamers or Mars being their tutelary deity, they called these children after him when they had attained maturity, and, under the general and customary name of Mamertini, sent them away to seek new abodes. (*Vid. Mamertium.*)

MAMERTUM, a town of the Bruttii, northeast of Rhegium. It appears to have been originally founded by a band of Campanian mercenaries, who derived their name from Mamers, the Oscan Mars, and are known to have afterward served under Agathocles and other princes of Sicily. (*Vid. Mamertini.*) Barrio and other native antiquaries have identified this ancient town with the site of *Martorana*; but this place, which is situated between *Nicastro* and *Cosenza*, seems too distant from Locri and Rhegium to accord with Strabo's description. (*Strab., 261.*) The majority of modern topographers, with Cluverius at their head, place it at *Oppido*, an episcopal see, situate above *Reggio* and *Gerace*, and where old coins appertaining to the Mamertini are said to have been discovered. (*Cramer's Anc. Italy, vol. 2, p. 438.*)

MAMILIA LEX, *de limitibus*, ordained that there should be an uncultivated space of five feet broad left between farms, and if any dispute happened about this matter, that a single arbiter should be appointed by the prætor to determine it. The law of the twelve tables required three arbiters.—This law was proposed by C. Mamilius Tuninus, A.U.C. 642, who had been consul in 514 A.U.C. (Consult *Ernesti, Index Leg. ad Cic., s. v. Mamilia.*—*Goerenz, ad Cic., de Leg., 1, 21.*)

MAMURIUS VETURIS, an artificer in the reign of Numa. When the *Ancile* or sacred shield fell from heaven, the monarch showed it to all the Roman artists, and ordered them to exert all their skill, and make eleven other shields exactly resembling it. All declined the attempt, however, except Mamurius, who was so successful in the imitation, and made the other eleven so like unto it, that not even Numa himself could distinguish the copies from the original. (*Vid. Ancile* and *Salii.*) Mamurius asked for no other reward but that his name might be mentioned in the hymn of the *Salii*, as they bore along these sacred shields in procession. (*Plut., Vit. Num.*—*Ovid, Fast., 3, 392.*)

MANURRA, a native of Formis, of obscure origin. He served under Julius Cæsar in Gaul, as *Præfectus fabrorum*, and rose so high in favour with him, that Cæsar permitted him to enrich himself at the expense of the Gauls in any way he was able. Manurra, in consequence, became possessed of enormous wealth, and returned to Rome with his ill-gotten riches. Here he displayed so little modesty and reserve in the employment of his fortune, as to have been the first Ro-

man that incruated his entire house with marble. This structure was situate on the Cosian Hill. We have two epigrams of Catullus against him, in which he is severely handled. Horace also alludes to him with sly ridicule in one of his satires (1, 5, 87.) He calls Formis "*Mamurrarum urbs*," the city of the Lamiian line being here named after a race of whom nothing was known. (*Vid. Formis.*)

MANCIUS, C. Hostilius, a Roman consul, who, though at the head of 30,000 men, was defeated and stripped of his camp by only 4000 Numantines. (*Liv., Epit., 65.*) The remnant of the Roman army was allowed to retire, upon their making a treaty of peace with the Numantians, but the senate refused to ratify the treaty, and ordered Mancinus to be delivered up to the enemy; but they refused to receive him. Mancinus thereupon returned to Rome, and was reinstated in his rights of a citizen, contrary to the opinion of the tribune P. Rutilius, who asserted that he could not enjoy the right of returning to his country, called by the Romans *jus postliminii*. (*Cic., de Orat.*—Compare *Cic., de Off., 3, 50.*—*Flor., 2, 18.*—*Id., 3, 14.*—*Vell. Paterc., 2, 1.*—*Duker, ad Flor., l. c.*)

MANDANE, a daughter of King Astyages, and mother of Cyrus the elder. (*Vid. Astyages.*)

MANDĒLA, a village in the country of the Sabines, near Horace's farm. The poet alludes to its cold mountain atmosphere. It is now perhaps *Bardella*. (*Horat., Ep., 1, 18, 105.*)

MANDUŒI, a people of Celtic Gaul, clients of the Ædui, whose chief city was Alesia, now Alise. Their territory answered to what is now the department de la Côte d'or. (*Lemaire, Ind. Geogr., ad Cæs., s. v.*)

MANDURIA, a city of Apulia, nearly half way between Brundisium and Tarentum. It still retains its ancient name. This otherwise obscure town has acquired some interest in history from having witnessed the death of Archidamus, king of Sparta, the son of Agesilaus. He had been summoned by the Tarentines to aid them against the Messapians and Lucanians, but even his bravery was insufficient to subdue their foes. He fell in the conflict, and his body, as Plutarch relates, remained in possession of the enemy, notwithstanding the large offers made by the Tarentines to recover it. This is said to have been the only instance in which a Spartan king was debarred the rites of burial. (*Plut., Vit. Agid.*—*Athen., 12, 9.*—*Strabo, 280.*) Manduria was taken by the Romans in the second Punic war. (*Liv., 27, 15.*) A curious well is described by Pliny as existing near this town. According to his account, its water always maintained the same level, whatever quantity was added to or taken from it. (*Plin., 2, 103.*) This phenomenon may still be observed at the present day. (*Swinburne's Travels, vol. 1, p. 222.*)

MANĒTHO (Μάβης, Μανέθ, Μανέθων, Μανέθων), a celebrated Egyptian writer, a native of Diospolis, who is said to have lived in the time of Ptolemy Philadelphus, at Mende or Heliopolis, and to have been a man of great learning and wisdom. (*Ælian, de An., 10, 16.*) He belonged to the priest-caste, and was himself a priest, and interpreter or recorder of religious usages, and of the sacred, and probably, also, historical writings, with the title of *ἱερογραμματεὺς*. It appears probable, however, that there were more than one individual of this name; and it is therefore doubtful whether all the works which were attributed by ancient writers to Manetho, were in reality written by the Manetho who lived in the reign of Ptolemy Philadelphus. Manetho wrote a history of Egypt (*Ἀγυπτιακά*) in three books, in which he gave an account of this country from the earliest times to the death of Darius Codomanus, the last king of Persia. There is every reason for supposing that this was written by the Manetho who lived under Philadelphus. Considerable fragments are preserved in the treatise of Jose-

plus against Apion; but still greater portions in the "Chronicles" of George Syncellus, a monk of the ninth century. The "Chronicles" of Syncellus were principally compiled from the "Chronicles" of Julius Africanus and from Eusebius, both of whom made great use of Manetho's "History." The work of Africanus is lost; and we only possess a Latin version of that of Eusebius, which was translated out of the Armenian version of the Greek text preserved at Constantinople. Manetho indicates as his principal sources of information certain ancient Egyptian chronicles, and also, if Syncellus has rightly comprehended his meaning, the inscriptions which Thoth, or the first Hermes, had traced, according to him, in the sacred language, on columns. We say, if Syncellus has rightly comprehended him, because it appears that the passage, in which Manetho speaks of the columns of Egypt, has not been taken from his history of Egypt, but from another work of a mystic character, entitled *Sothis*. The inscriptions just referred to, as having been written in the sacred dialect, Agathodæmon, son of the second Hermes, and father of Taut, had translated into the vulgar dialect, and placed among the writings deposited in the sanctuary of a temple. Manetho gives the list of thirty dynasties or successions of kings who reigned in the same city; for thus are we to understand the word *dynasty*, which, in Manetho, is not synonymous with *reigning family*. Hence some of his dynasties are composed of several families. The thirty-one lists of Manetho contain the names of 113 kings, who, according to them, reigned in Egypt during the space of 4465 years. As we cannot reconcile this long duration of the Egyptian monarchy with the chronology of the Scriptures, some writers have hence taken occasion to throw discredit on Manetho, and have placed him in the class of fabulous historians. (Compare, in particular, *Petav., Doctr. Temp.*, lib. 9, c. 15.) A circumstance, however, which would seem to claim for this historian some degree of confidence is, that the succession of kings, as given by him, does not by any means correspond to the pretensions of the more ancient priests of Egypt, who enumerated to Herodotus a list of monarchs which would make the duration of the kingdom of Egypt exceed 30,000 years! We know also, from Josephus, that Manetho corrected many things in Herodotus which betrayed a want of exactness. Larcher accuses Manetho of having been a mere flatterer of the Ptolemies. (*Hist. d'Herod.*, vol. 7, p. 323.) But the latter has found a defender in M. Dubois-Aymé. (*Description de l'Égypte*, vol. 1, p. 301.) Other and more equitable critics, such as Calvisius, Usher, and Capellus, have endeavoured to reconcile the chronology of Manetho with that of the Scriptures, by rejecting as fabulous merely the first fourteen, fifteen, or sixteen dynasties. Marsham, however, was the first to accomplish this end, and that, too, without retrenching any part of Manetho's catalogue. (*Chronicus Canon Egyptiacus, Hebraicus, Græcus*, Lond., 1672, fol.) He has made it appear, that the first seventeen dynasties of Manetho might have reigned simultaneously in different parts of Egypt, and that thus the interval of time between Menes (whom Marsham believes to have been Ham, the son of Noah), and the end of the reign of Amasis, is only 1819 years. Two great men of the 17th century, Newton and Bossuet, have approved of the system of Marsham: and yet it would certainly seem to be faulty, in placing, contrary to all probability, the commencement of the Egyptian monarchy immediately after the deluge, and in limiting to 1400 years the period that elapsed between Menes and Sesostrius. To remove these inconveniences, Pezron, giving the preference to the chronology of the Septuagint, modified the system of Manetho, by reckoning 2619 years from Menes to Nectanebus, the last king of the 30th dynasty of Manetho. He places Menes 648 years after the deluge, at the epoch

of Debora. Whichever of these systems may be the true one, it would seem that even though the chronology of Manetho presents some difficulties, we ought not for that reason to refuse him all confidence as an historian. As Cambyzes had destroyed, or transported into Persia, the ancient documents of Egyptian history, it is more than probable that the priests of Egypt replaced them by new chronicles, in which they must necessarily have committed, without intending it, some very great errors. It is from these erroneous sources that Manetho would appear to have drawn, in good faith, his means of information. It is no easy matter, however, after all, to ascertain the real value of Manetho's "History," in the form in which it has come down to us. The reader may judge of the use that has been made of it for Egyptian chronology, by referring to Rask's *Alte Egyptische Zeitrechnung* (Altona, 1830); to the works of Champollion, Wilkinson's *Topography of Thebes*, and the other authorities which will be indicated by a reference to these works. (*Encycl. Us. Knowl.*, vol. 14, p. 379.)—Besides this work, Manetho wrote some others, which are lost. These were, 1. *Ἱερὰ Βίβλος* ("Sacred Book"), treating of Egyptian theology.—2. *Βίβλος τῆς Σώθως* ("Book of Sothis"), an astronomical, or, rather, astrological work, addressed to Ptolemy Philadelphus.—3. *Φυσικὴν ἑπιτομήν* ("Epitome of Physics").—4. A poem, in six cantos, which has come down to us under the title of *Ἀποτελεσματικά*, and treats of the influence of the stars. It is evidently the production of a much later age, as Holstenius thought, and as Tyrwhitt has demonstrated. (Compare Heyne, *Opusc. Acad.*, vol. 1, p. 85.) Among the works published by the credulous Nanni, of Viterbo, there is a Latin one ascribed to Manetho, and entitled "*De Regibus Egypti*."—The fragments of Manetho have been collected by Joseph Scaliger, and published in his treatise "*De Emendatione Temporum*." (Schöll, *Hist. Lit. Gr.*, vol. 3, p. 215, seqq.) The *Ἀποτελεσματικά* were first edited by Gronovius, *Lugd. Bat.*, 1608, 4to. There is a later edition, by Artius and Rigler, *Colum.*, 1832, 8vo. In Ruperti's and Schlichthorst's "*Neues Magazin für Schullehrer*," Götting., 1793 (vol. 2, pt. 1, p. 90, seqq.), there is a dissertation of Ziegler's on the *Ἀποτελεσματικά*, in which he undertakes to show that this poem was written after the time of Augustus. (Hoffmann, *Lex. Bibliogr.*, vol. 3, p. 76.)

MANILIUS LEX, I. by Manilius the tribune, A.U.C. 687, for conferring on Pompey the charge of the war against Mithradates. Its passage was supported by Cicero, who was then prætor, and also by Julius Cæsar, but from different views. (*Vid. Pompeius*).—II. Another, by the same, that freedmen might vote in all the tribes, whereas formerly they voted in some one of the four city tribes only. This law, however, did not pass. (*Cic., pro Muræna*, 23.—*Ernesti, Ind. Lex.*, s. v.)

MANILIUS, I. Marcus or Caius, a Latin poet, known only by his poem entitled *Astronomica*, in five books. The manuscripts do not agree about the name of this poet; some of them calling him Manlius, others Mallius. Bentley believed him to have been born in Asia. Two reasons led him to entertain this opinion; the strange construction which appears in some of the verses of Manilius, and the improbability that, at the period when this poet appeared, the Romans paid any great attention to the phenomena of the heavens and the lessons of astrology. It is true, the fourth book of the poem contains two verses (the 41st and 776th) in which Manilius speaks of Rome as *his city*; but these two lines are boldly declared by the great English critic to be interpolated. He endeavours to make it appear that the author of the *Astronomica* is neither the astrologer Manilius of whom Pliny speaks (35, 17), nor the mathematician of the same name, of whom, on

another occasion, he makes mention (36, 10). Bentley believes that the poet is to be placed in the age of Augustus; but he has no other ground for this belief than the observation which he has made, that Manilius never uses the genitive termination *i* (*auxilii, ingenii, imperii, &c.*), but the contracted form in *t* (*auxili, ingent*), which marks a writer of the Augustan age. Propertius among the poets first used the form in *i*.—The poem of Manilius is unfinished. The five books which are extant treat principally of the fixed stars; but the poet promises, in many parts of his work, to give an account of the planets. The language is in many instances marked by great purity, many poetic beauties appear, and the whole betrays no inconsiderable degree of talent in managing a subject of so dry and forbidding a nature. It appears from many parts of the work that Manilius was a staunch adherent of the Stoic philosophy. The best editions are, that of Bentley, *Lond.*, 1739, 4to, and that of Stoeber, *Argent.*, 1767, 8vo. (*Schöll, Lit. Romane*, vol. 1, p. 276.)—II. An epigrammatic poet, one of whose epigrams is cited by Varro. (*Anth. Lat.*, vol. 1, p. 673.)—III. Manius, a Roman consul, A.U.C. 605. He left a work on the Civil Law, and another entitled *Manii Monumenta*. (*Schöll, Lit. Rom.*, vol. 1, p. 182.)

MANLIUS, the name of one of the most illustrious patrician gentes of Rome. Those most worthy of notice are: I. Marcus Manlius Capitolinus, who was consul B.C. 390 (*Liv.*, 5, 31), and was the means of preserving the Capitol when it was nearly taken by the Gauls (*Liv.*, 5, 47), from which exploit he received the surname of Capitolinus. He afterward became a warm supporter of the popular party against his own order, and particularly distinguished himself by the liberality with which he assisted those who were in debt. He publicly sold one of his most valuable estates, and declared that, as long as he had a single pound, he would not allow any Roman to be carried into bondage for debt. In consequence of his opposition to the patrician order, he was accused of aiming at kingly power. The circumstances attending his trial and death are involved in much obscurity. It would appear that he was accused before the centuries and acquitted; and that afterward, seeing that the patrician order were bent on his destruction, he seized upon the Capitol and prepared to defend it by arms. In consequence of this, Camillus, his personal enemy, was appointed dictator, and the curies (i. e., the patrician assembly) condemned him to death. According to Livy, who implies that Manlius did not take up arms, he was thrown down from the Tarpeian rock by the tribunes; but Niebuhr supposes, from a fragment of Dio Cassius (lib. 31), compared with the narrative of Zonaras (7, 24), that he was treacherously pushed down from the rock by a slave, who had been hired for that purpose by the patrician party. (*Rom. Hist.*, vol. 2, p. 610, *seq.*, *Eng. transl.*) The house which Manlius had occupied was razed to the ground; and the Manlian gens resolved that none of its patrician members should again bear the name of Marcus. Manlius was put to death B.C. 381.—II. Titus Manlius Capitolinus Torquatus, was son of L. Manlius surnamed Imperiosus, who was dictator B.C. 361. When his father Lucius was accused by the tribune Pomponius, on account of his cruelty towards the soldiers under his command, and also for keeping his son Titus among his slaves in the country, Titus is said to have obtained admittance to the house of Pomponius shortly before the trial, and to have compelled him, under fear of death, to swear that he would drop the prosecution against his father. This instance of filial affection is said to have operated so strongly in his favour, that he was appointed in the same year, B.C. 359, one of the military tribunes. (*Liv.*, 7, 4, *seq.*—*Cic., de Off.*, 3, 31.) In the fol-

lowing year Manlius distinguished himself by slaying, in single combat, a Gaul of gigantic size, on the banks of the Anio. In consequence of his taking a chair (*torques*) from the dead body of his opponent, he received the surname of Torquatus. (*Liv.*, 7, 10.) Manlius filled the office of dictator twice, and in both instances before he had been elected consul: once in order to conduct the war against the Cærretes, B.C. 351; and the second time in order to preside at the comitia for the election of consuls, B.C. 346. (*Liv.*, 7, 19, *seqq.*) Manlius was consul at least three times. (*Cic., de Off.*, 3, 31.) In his third consulship he defeated the Latins, who had formed a powerful confederacy against the Romans. In this same campaign he put his own son to death for having engaged in single combat with one of the enemy contrary to his orders. (*Liv.*, 8, 5, *seqq.*)—III. Titus Manlius Torquatus, was consul B.C. 235, and obtained a triumph on account of his conquests in Sardinia. (*Vell. Patere.*, 2, 38.—*Eutrop.*, 3, 3.) In his second consulship, B.C. 224, he conquered the Gauls. (*Polyb.*, 2, 31.) He opposed the ransom of the prisoners who had been taken at the battle of Cannæ. (*Liv.*, 22, 60.) In B.C. 216 he defeated the Carthaginians in Sardinia (*Liv.*, 23, 34, *seqq.*), and in 212 was an unsuccessful candidate for the office of Pontifex Maximus. (*Liv.*, 25, 5.) In 211 he was again elected consul, but declined the honour on account of the weakness of his eyes. (*Liv.*, 26, 22.) In 208 he was appointed dictator in order to hold the comitia. (*Liv.*, 27, 33.) The temple of Janus was closed during the first consulship of Manlius. (*Liv.*, 1, 19.—*Vell. Patere.*, 2, 38.)—IV. Cneius Manlius Vulso, was consul B.C. 189, and appointed to the command of the war against the Gauls in Galatia, whom he entirely subdued. An account of this war is given by Livy (38, 12, *seqq.*) and Polybius (22, 16, *seqq.*). After remaining in Asia the following year as proconsul, he led his army home through Thrace, where he was attacked by the inhabitants in a narrow defile, and plundered of part of his booty. He obtained a triumph B.C. 186, though not without some difficulty. (*Liv.*, 39, 6.—*Encycl. Us. Kævol.*, vol. 14, p. 336, *seq.*)

MANIUS, the son of the German god Tuiston, of whom that nation believed themselves descendants. (*Tacit., G.*, 2.) The god Tuiston evidently marks the stem-name of the Germans (Tuistones, Teutones, Deutschen), and from him comes forth the *Man* of the race, i. e., the Teutonic race itself. (Compare *Manert, Geschichte der alten Deutschen*, p. 2.)

MANTEINÆ, one of the most ancient and celebrated cities of Arcadia, said to have been founded by Mantineus, son of Lycaon. It was situate near the centre of the eastern frontier, at the foot of Mount Artemisius, on the banks of the little river Ophis (*Pausan.*, 8, 8), and was at first composed of four or five hamlets; but these were afterward collected into one city (*Xen., Hist. Gr.*, 5, 2, 6, *seqq.*—*Strab.*, 387), which became the largest and most populous in Arcadia previous to the founding of Megalopolis. (*Polyb.*, 2, 56.) The Mantineans had early acquired celebrity for the wisdom of their political institutions (*Polyb.*, 6, 43, 1), and when the Cyreneans were distracted by factions, they were advised by an oracle to apply to that people for an arbiter to settle their differences. Their request was granted, and accordingly Demonax, one of the principal citizens of Mantinea, was sent to remodel their government. (*Herod.*, 4, 161.) The Mantineans fought at Thermopylæ, but arrived too late to share in the victory of Plataea, a circumstance which, according to Herodotus (9, 77), produced so much vexation, that upon their return home they banished their commanders. In the Peloponnesian war they espoused the Lacedæmonian cause; but having taken offence at the conclusion of the treaty between that people and the Athenians after the battle of Amphipolis, they were in-

dued to form an alliance with Argos and Elis, with which confederates they finally made war against Sparta. (*Thucyd.*, 5, 29, *seqq.*) In the battle which was fought on their territory, they obtained at first a decided advantage against the Lacedæmonian troops opposed to them; but the left wing of the allied army having been routed, they were in their turn vigorously attacked, and forced to give way with heavy loss. (*Thucyd.*, 5, 66.) This ill success led to the dissolution of the confederacy, and induced the Mantineans, not long after, to renew their former alliance with Sparta (*Thucyd.*, 5, 78), to which they adhered until the peace of Antalcidas. At this period the Lacedæmonians, bent on strengthening their power in the peninsula to the utmost, peremptorily ordered the Mantineans to pull down their walls, or to prepare for war, as the thirty years' truce agreed upon between the two states had now expired. On their refusal to comply with this unjust and arbitrary demand, a Spartan army entered the Mantinean territory, and laid siege to the city. The inhabitants defended themselves with vigour, and might have held out successfully, had not Agesipolis caused the waters of the river Ophis to be diverted from their channel, and directed against the walls of the town, which, being of brick, were easily demolished. By this Mantinea fell into the hands of the Spartans, who destroyed the fortifications, and compelled the inhabitants to change their constitution from a democracy to an oligarchy, and to separate, as formerly, into four townships. (*Xen., Hist. Gr.*, 5, 2, 7.—*Pausan.*, 8, 8.—*Polyb.*, 4, 27.) After the battle of Leuctra, however, the Mantineans, under the protection of Thebes, again united their population and re fortified their city, notwithstanding the opposition of the Lacedæmonians. (*Xen., Hist. Gr.*, 5, 5.) Mantinea acquired additional celebrity from the great but undecisive battle fought in its plains between the Bœotians and Spartans, in which Epaminondas terminated his glorious career (B.C. 362); and it continued to be one of the leading cities of Arcadia till it joined the Achæan league, when it fell for a short time into the hands of the Ætolians and Cleomenes, but was recovered by Aratus four years before the battle of Sellasia. (*Polybius*, 4, 8, 4.) The Mantineans having, however, again joined the enemies of the Achæans, they treacherously put the garrison of the latter to the sword. (*Polyb.*, 2, 58, 4.) This perfidious conduct drew down upon them the vengeance of Antigonus Doson and the Achæans, who, making themselves masters of the city, gave it up to plunder, and sold all the free population as slaves; a chastisement which Polybius considered as scarcely equal to their offence, though its cruelty had been set forth in strong colours by the historian Phylarchus. The name of the city was now changed to Antigonea, in compliment to Antigonus Doson. We learn also from Pausanias, that the Mantineans had merited the protection of Augustus from having espoused his cause against Marc Antony. Their town still continued to flourish as late as the time of Hadrian, who abolished the name of Antigonea and restored its ancient appellation.—The site of the famous battle of Mantinea was about thirty stadia from the city, on the road to Pallantium, near a wood named Pelagus. The tomb of Epaminondas had been erected on the spot where he breathed his last: it consisted originally of one pillar only, surmounted by a shield and a Bœotian inscription; but another pillar was afterward added by the Emperor Hadrian. (*Pausan.*, 8, 11.)—The ruins of Mantinea are pointed out to modern travellers on the site now called *Palaepoli*. (*Gell's Itin. of the Morea*, p. 141.—*Dodwell*, vol. 2, p. 422.—*Cramer's Ancient Greece*, vol. 8, p. 300, *seqq.*)

MANTINŌBUM OFFIDIUM, a town of Corsica, placed by Ptolemy directly east of the mouth of the river Volerius, where was a bay which now answers to that of *S. Fiorenzo*. Hence the modern *Bastia* will corre-

spond to the ancient town, for it lies directly east of the bay just mentioned. (*Mannert, Geogr.*, vol. 9, pt. 2, p. 519.)

MANTO, a daughter of the prophet Tiresias, endowed with the gift of prophecy. She was made prisoner by the Argives when the city of Thebes fell into their hands; and as she was the worthiest part of the booty, the conquerors sent her to Apollo, the god of Delphi, as the most valuable present they could make. Manto, often called Daphne, remained for some time at Delphi, where she gave oracles. From Delphi, in obedience to the oracle, she came to Claros in Ionia, where she established an oracle of Apollo. Here she married Rhakius, the sovereign of the country, by whom she had a son called Mopsus. Manto afterward visited Italy, where she married Tiberinus, the king of Alba, or, as the poets mention, the god of the river Tiber. From this marriage sprang Ocnus, who built a town in the neighbourhood, which, in honour of his mother, he called Mantua. (*Schol. ad Apoll. Rhod.*, 1, 308.—*Pausan.*, 7, 3.—*Tzetz.*, ad *Lycophr.*, 980.—*Virg.*, *Æn.*, 10, 199, *seqq.*—*Heyne, Excurs.*, 1, ad *Æn.*, 10.—*Müller, Etrusk.*, vol. 1, p. 138.) The Italian legend about Mantua evidently owed its origin to similarity of name. (*Keightley, Mythol.*, p. 345, *in not.*)

MANTŪA, a city of Gallia Cisalpina, situate on an island in the Mincius, southeast of Brixia, and south of the lake Benacus. It is supposed to date its foundation long before the arrival of the Gauls in Italy. Virgil tells us it was of Tuscan origin, and derived its name from the prophetess Manto, the daughter of Tiresias. (*Æn.*, 10, 199, *seqq.*—Compare the remarks of Müller on this passage, *Etrusker*, vol. 1, p. 138, *in not.*) Whatever of poetical invention there may have been in the origin thus ascribed to Mantua, there can be no doubt of its having been a town of considerable note among the Etrurians, when they were in possession of that part of Italy where it was situated. The position of the ancient place was not different from that which the modern Mantua at present occupies. That it was not a place of any great size in Virgil's time may be collected from what the poet himself says of it. (*Eclag.*, 1, 20.) Strabo (213) classes it with Brixia, Bergomum, and Comum, but Martial attaches to it the epithet of "*parva*" (14, 193). Its vicinity to Cremona was an unhappy circumstance to Mantua; for, as the territory of the former city was not found sufficient to contain the veteran soldiers of Augustus, among whom it had been divided, the deficiency was supplied from the neighbouring lands of the latter; a loss most feelingly deplored by Virgil, though he was fortunate enough to escape from the effects of this oppressive measure. (*Georg.*, 2, 198.—*Eclag.*, 9, 27; 1, 47.) We are informed by the grammarian Donatus, in his Life of Virgil, that this great poet was born at Andes, a village near Mantua. (*Cramer's Anc. Italy*, vol. 1, p. 67, *seqq.*)

MARATHON, a town of Attica, northeast of Athens, and not far from the coast. It was said to have been named from the hero Marathon (*Plut., Vit. Thes.*—*Suid.*, s. v. *Μαραθών*), and was already a place of note in the days of Homer. (*Od.*, 7, 81.) From the scholiast of Sophocles (*Œd. Col.*, 1047), who quotes Philochorus on the Tetrapolis, we learn that it possessed a temple consecrated to the Pythian Apollo. Demosthenes reports that the sacred galley was kept on this coast, and that on one occasion it was captured by Philip. (*Phil.*, 1, p. 49.) Eurytheus was said to have been defeated here by Iolaus and the Heraclidæ (*Strab.*, 377), and Theseus to have here destroyed a bull by which the country was infested. (*Plut., Vit. Thes.*—*Strab.*, 399.) Marathon, however, is most famous for the victory obtained by the Greeks over the Persians in the plain in its immediate vicinity. The Persian army was commanded by Datis and Artaphernes,

while the Athenians, who had eleven generals including the polemarch, were for the day under the orders of Miltiades. According to Cornelius Nepos (*Vit. Miltiad.*), the Persians were a hundred thousand effective foot and ten thousand horse; yet Plato, meaning probably to include the seamen and the various multitude of attendants upon Asiatic troops, calls the whole armament five hundred thousand; and Trogus Pompeius, according to his epitomizer Justin (2, 9), did not scruple to add a hundred thousand more. These writers, however, did not perceive that, by encumbering the Persians with such useless and unmanageable crowds, they were not heightening, but diminishing, the glory of the conquerors. The Athenians numbered six-and-forty different nations in the barbarian host; and the Ethiopian arrows, remains of which are still found at Marathon, seem to attest the fact that Darius drew troops from the remotest provinces of the empire. Yet our calculations must be kept down by the remark, that the whole invading army was transported over the sea, according to Herodotus, in 600 ships. This, on the footing which he fixes elsewhere, of 200 men to each trireme, would give 120,000: and we ought probably to consider this as the utmost limit to which the numbers of the invaders can reasonably be carried. Those of the Athenians, including the Plataeans, are uniformly rated at about 10,000. It is possible that the number of the tribes had some share in grounding this tradition: it probably falls short of the truth, and certainly does not take the slaves into account, who served most likely as light-armed troops. When all these allowances are made, the numerical inequality will be reduced to a proportion of five to one.—It is remarkable, that, though Herodotus represents the Persians as induced to land at Marathon with a view to the operations of their calvary, he does not say a word either of its movements in the battle, or of any cause that prevented them. It seems not to have come into action; but perhaps he could not learn by what means it was kept motionless. Yet there was a tradition on the subject, probably of some antiquity, which appears to have assumed various forms, one of which was adopted by Nepos, who relates, that Miltiades protected his flanks from the enemy's calvary by an abattis: a fact which it may be thought Herodotus could scarcely have passed over in silence if it had been known to him, but which might have been the foundation of a very obscure account of the matter, which is given by another author. In the explanation of the proverb, *χωρίς ἰππέως* (*Suidas*.—*Cent.*, 14, 73, *Schott*), we read, that when Datis invaded Attica, the Ionians got upon the trees (?), and made signals to the Athenians that the calvary had gone away (*ὡς εἶπεν χωρὶς ὁ ἰππέως*), and that Miltiades, on learning its retreat, joined battle and gained the victory; which was the origin of the proverb, *ἐπὶ τῶν τήν τάξιν διαλύοντων*. (*Thirlwall's Greece*, vol. 2, p. 241, *seq.*)—The Persians lost in all six thousand four hundred men. Of the Athenians only one hundred and ninety-two fell; but among them were the polemarch Callimachus; Stesibius, one of the ten generals; Cynagirus, brother of the poet *Æschylus*, and other men of rank, who had been earnest to set an example of valour on this trying occasion. Cornelius Nepos observes that Marathon was ten miles from Athens; but as, in fact, it is nearly double that distance, it is probable that we ought to read twenty instead of ten. Pausanias affirms it was half way from Athens to Carystus in Euboea. In the plain was erected the tumulus of those Athenians who fell in the battle, their names being inscribed on sepulchral pillars. Another tumulus was raised for the Plataeans and the slaves.—Still, however, after the defeat at Marathon, the Persian armament was very formidable; nor was Athens immediately, by its glorious victory, delivered from the danger of that subversion with which it had been threatened. The

Persian commanders, doubling the promontory of Saronium, coasted along the southern shore of Attica, not without hope of carrying that city by a sudden assault. But Miltiades made a rapid march with a large part of his forces; and when the Persians arrived off the port of Phalerus, they saw an Athenian army encamped on the hill of Cynosarges which overlooks it. They cast anchor, but, without attempting anything, weighed again and steered for Asia.—Marathon, which still preserves its ancient name, is situated, according to a modern traveller, "at the northwestern extremity of a valley, which opens towards the southeast into the great plain in which the battle was fought. This extends along the coast from the northeast to the southwest. At the extremity and near the sea is seen the conspicuous tomb raised over the bodies of the Athenians who fell in the battle; and close to the coast upon the right is a marsh, wherein the remains of trophies and marble monuments are yet visible." (*Clarke's Travels*, vol. 7, p. 23, *Lond. ed.*) From a memoir of Col. Squire, inserted in *Walpole's Memoirs* (vol. 1, p. 328), we farther learn, that "the land bordering on the Bay of Marathon is an uninterrupted plain about two miles and a half in width, and bounded by rocky, difficult heights, which enclose it at either extremity. About the centre of the bay a small stream, which flows from the upper part of the valley of Marathon, discharges itself into the sea by three shallow channels. A narrow rocky point, projecting from the shore, forms the northeast part of the bay, close to which is a salt stream connected with a shallow lake, and a great extent of marsh land. The village of Marathon is rather more than three miles from the sea. Towards the middle of the plain may be seen a large tumulus of earth, twenty-five feet in height, resembling those on the plain of Troy." (*Cramer's Anc. Greece*, vol. 2, p. 385, *seqq.*)

MARCELLA, I. daughter of Claudius Marcellus by his wife Octavia, and sister to Marcus Marcellus. She was first married to Apuleius, and afterward to Valerius Messala. (*Sueton.*, *Vit. Aug.*, 53.)—II. The younger, daughter of Claudius Marcellus by his wife Octavia, and sister of the preceding. She was first married to M. Vipsanius Agrippa, and afterward to M. Julius Antonius. (*Sueton.*, *Vit. Aug.*, 68.)

MARCELLINUS, AMMIANUS, the last Latin writer that merits the title of an historian. He was born at Antioch, and lived under Justinian and his successors down to the reign of Valentinian II. A large portion of his life was spent in military service in the Roman armies. He performed campaigns in Gaul, Germany, and Mesopotamia, and accompanied Julian on his expedition against the Persians. The modesty of Ammianus, which gives us but little information relative to himself, prevents us from determining what rank he held in the army, or what employment he pursued after quitting the profession of arms. It appears that he was invested with the dignity of *Comes rei private*: we find, in fact, in the Theodosian Code (l. xli., *de appellat.*), a rescript of the emperors Gratian, Valentinian, and Theodosius, addressed to a certain Ammianus, who is decorated with this title. He died at Rome subsequent to A.D. 390. It was probably in this city that, at the age of fifty years, he composed his history of the Roman emperors, which he entitled "*Res gestarum libri xxi.*" It commenced with the accession of Nerva, A.D. 96, and consequently at the period where the history of Tacitus terminated. It is not known whether Ammianus pretended to write a continuation of that history, or if any other motive induced him to select the time when this historian brought his work to a close. It is very probable that he had no intention whatever of continuing Tacitus, as he not only does not mention him, although he cites Sallust and other Roman writers, but also as his work shows no imitation whatever of the peculiar manner

of Tacitus. The history of Ammianus proceeds as far as 378 A.D. It embraced, consequently, a period of 362 years; but the first thirteen books, which contained a sketch of the history of 256 years (from 96 to 352), are lost, and we have only the last eighteen. These eighteen, however, form the most important part of the labours of Ammianus. In the first thirteen books he merely arranged materials from writers who had gone before him; although it must be acknowledged, that even this part would have been interesting for us, as many of the works from which he selected are now lost. In the eighteen books, however, that remain to us, and which it is more than probable the copyists transcribed separately from the rest, Ammianus relates the events which occurred during his own time. As he often took an active part in these, or, at least, was an eyewitness of most of them, he relates them in the first person: when he details what did not pass under his immediate inspection, he is careful to obtain the requisite information from those who are acquainted with the subject, and who took part in the matter that is related: he does not pretend, however, to give a complete history of his time, and he passes in silence over events respecting which he has neither accurate information nor positive documents. This part of his work, therefore, is less a history than what we would call at the present day memoirs of his time. Ammianus Marcellinus was a well-informed man, and possessed of great good sense and excellent judgment. No writer was ever more entitled to praise for candour and impartiality. He understood well the art of clearly showing the connexion of events, and of painting in striking colours the characters of those individuals whom he introduces into his narrative. In a word, he would in all probability have been an accomplished historian had his lot been cast in a more favourable age. Had he lived in the golden period of Roman literature, the study of good models and the society of enlightened men would have perfected his historic talent, and have formed his style in a purer mould. The latter would not, as is too often the case in Ammianus, have been destitute of that simplicity which constitutes one of the great beauties of historical narrative, nor over-loaded with ornaments and disfigured by turgid and barbarous forms of expression. These faults, however, in the style of Ammianus, find an excuse in the circumstances of his case. He was a stranger, and wrote in a language not his own; neither did the busy life which he had led in camps permit him to cultivate the talent for writing which nature had bestowed upon him. His good qualities are his own; his defects are those of the times; and, in spite of these defects, his style is conspicuous among all the writers who were contemporary with him for a purity to which they could not attain.—Ammianus Marcellinus is the last pagan historian; for, notwithstanding all that some maintain to the contrary, we have no certain proof of his having been a Christian. A public man, enriched with the experience acquired amid the scenes of an active life, he relates the events connected with the new religion introduced by Constantine with sang-froid and impartiality, and perhaps with the indifference of a man who knew how to raise himself to a point of view where he could perceive naught but masses and results. He blames with equal frankness the anti-Christian mysticism of Julian, and the religious intolerance of Constantine and his bishops. He speaks with respect both of the doctrines of Christianity and the ceremonies of paganism. A remarkable passage occurs in the sixteenth chapter of the twenty-first book. After having painted the bitterness of character and the cruelties of Constantine, the historian adds: "*Christianam religionem absolutam et simplicem anili superstitione confundens; in qua scrutanda perplexius, quam componenda, gravius, exaltanti discordia plurime; qua*

propterea furius aluit concertatione verborum: ut ceteris antistitum jumentis publicis ulro citroque discurrentibus, per synodes, quas appellant, dum ritum omnem ad suum trahere conantur arbitrium, rei vehicularia succideret nervos." On another occasion (22, 11), blaming the conduct of a bishop, he remarks: "*Professionis sua oblitus, qua nihil nisi justum suadet et lenis, ad delatorum ausa feralia descendeat.*"

—The narrative of Ammianus is often interrupted by geographical and physical digressions. The latter show, as might be expected, a very slight acquaintance with principles; but the descriptions of countries which he had himself seen are extremely valuable. He is one of the principal sources that we have for the geography and history of ancient Germany, a country in which he passed a great number of years. We find in him also some excellent observations on the luxury and courts of the Roman emperors, on the vices which prevailed there, and on the manners in general of the great. Gibbon (c. 36) candidly avows his obligations to this writer; and from the period when he can no longer derive materials from Ammianus, the work of the English historian loses a great portion of its previous interest. (Schöll, *Hist. Lit. Rom.*, vol. 3, p. 164, seqq.—*Fuhrman, Handbuch der Class. Lit.*, vol. 2, p. 880, seqq.)—The best edition of Ammianus Marcellinus is that of Gronovius, *Legd. Bat.*, 1693, 4to. The edition of Wagner, completed by Erfurt, *Lips.*, 1808, 3 vols. 8vo, is also valuable.

MARCELLUS, I. MARCUS CLAUDIUS, born of a Roman consular family, after passing through the offices of ædile and quaestor, was made consul B.C. 224. The Transpadane Gauls having declared war against Rome, Marcellus marched against them, defeated them near Acerra, on the Addua, killed their king Viridomarus, and bore off his arms, the "*spolia opima*," which were exhibited in his triumph. At the beginning of the second Punic war, Marcellus was sent into Sicily as prætor, to administer the Roman part of the island, and had also the task of keeping the Syracusans firm in their alliance with Rome. After the battle of Cannæ, he was recalled to Italy to oppose Hannibal. Having taken the command of the relics of the Roman forces in Apulia, he kept Hannibal in check and defended Nela. In the year 214 B.C., being again consul, he took Casilinum by surprise. He was next sent to Sicily, where Syracuse had declared against Rome. After a siege of nearly three years, the city was taken 212 B.C., and Marcellus returned to Rome with the rich spoils. It was on occasion of the taking of Syracuse that the celebrated Archimedes lost his life. Marcellus did not, however, obtain a triumph, but only an ovation, as the war in Sicily was not entirely terminated. In the year 210 he was again chosen consul, and had the direction of the war against Hannibal in Apulia, when he took the town of Salapia, and fought several partial engagements with the Carthaginians, without any definite result. In the following year he continued in command of the army, and fought a battle against Hannibal at Canusium, in which the Romans were defeated and fled. On the following day Marcellus renewed the fight and defeated the Carthaginians, upon which Hannibal withdrew to the mountains of the Bruttii. In the next year, B.C. 208, Marcellus was elected consul for the fifth time with T. Quintus Crispinus. He continued to carry on the war against Hannibal, when, being encamped near Venusia, he rashly ventured out, fell into an ambuscade of advanced posts, and was slain, in the 60th year of his age. Hannibal, according to some authorities, caused his body to be burned with military honours, and sent the ashes in a silver urn to his son. According to others, however, he did not even bestow upon the corpse the ordinary rites of burial. (*Plut., Vit. Marcell.*) Marcellus was one of the most distinguished Roman commanders

during the second Punic war, and was accustomed to be called the sword of the Romans, as Fabius was denominated their shield. We have a life of him by Plutarch.—II. Marcus Claudius, held the consulship with Servius Sulpicius, B.C. 51. He was remarkable for his attachment to republican principles, and his uncompromising hostility towards Caesar; and it was he who proposed to the senate to recall that commander from his province in Gaul. After the battle of Pharsalia, Marcellus went into voluntary exile, and was not pardoned by Caesar until some considerable interval had elapsed, and then only at the earnest intercession of the senate. It was on this occasion that Cicero delivered his speech of thanks to Caesar. Marcellus, however, did not long survive to enjoy the pardon thus obtained, having been assassinated by an adherent of his, P. Magius Cilo. He was then on his return to Italy. The cause that prompted Cilo to the act is not known. Cicero conjectures that the latter, oppressed with debts, and apprehending some trouble on that score in case of his return, had been urging Marcellus, who was surety for some part of them, to furnish him with money to pay the whole, and that, on receiving a denial, he was provoked to the madness of killing his patron. (Cic., *Ep. ad Att.*, 13, 10.—Compare *Ep. ad Fam.*, 4, 12.) According to others, however, he was prompted to the deed by seeing other friends more highly favoured by Marcellus than himself. (Val. Max., 9, 11.) After stabbing his patron, Cilo slew himself.—III. Marcus Claudius, commonly known as the "Young Marcellus," was the son of Octavia the sister of Augustus, and consequently the nephew of the latter. Augustus gave him his daughter Julia in marriage, and intended him for his successor; but he died at the early age of 18, universally regretted on account of the excellence of his private character. Virgil has immortalised his memory by the beautiful lines at the close of the sixth book of the *Æneid*, and which are said to have drawn from Octavia so munificent a recompense. (Vid. Virgilius.) Livia was suspected, though without reason, it would seem, of having made away with Marcellus, who was an obstacle to the advancement of her son Tiberius. The more ostensible cause of his death was the injudicious application of the cold bath by the physician Antonius Musa. (Vid. Musa.)

MARCIANA, a sister of the Emperor Trajan, who, on account of her public and private virtues and her amiable disposition, was declared Augusta and empress by her brother. She died A.D. 113.

MARCIANOPOLIS, a city of Mœsia Inferior, to the west of Odessus, founded by Trajan, and named in honour of his sister Marciana. (Anon. *Marcell.*, 27, 4.—*Journ. de l'Ét.*, c. 16.) It soon became an important place in consequence of its lying on the main road from Constantinople to the East, and of its being the place where preparations were made for all the expeditions against the barbarians in this quarter. When the Bulgarians formed a kingdom out of what was previously Mœsia, Marcianopolis became the capital, under the name of *Prinzhaba* (Πριτζάβα.—*Anna Comn.*, p. 194) or *Preslavo*. It still retains this name, and also that of *Eski Stambul* with the Turks: the modern Greek inhabitants, however, call it *Marcenopolis*. According to the *Itin. Ant.* (p. 228.—Compare *Theophrast.*, 7, 2), Marcianopolis was 18 miles to the west of Odessus. (Mannert, *Geogr.*, vol. 7, p. 138.)

MARCIANUS, I. a native of Thrace, born of obscure parents, towards the end of the fourth century. He entered the army, and rose gradually by his merit to high rank, and was made a senator by Theodosius II. When Theodosius died (A.D. 450), his sister Pulcheria, then 53 years old, offered her hand to Marcianus, who was near 60, because she thought him capable of bearing the crown with dignity, and with

advantage to the state. Marcianus married her, and was proclaimed emperor. His reign, which lasted little more than six years, was peaceful, and his administration was equitable and firm. He refused to pay to Avila the tribute to which Theodosius had submitted. In the year 456, Marcianus acknowledged Avitus as Emperor of the West. Marcianus died in 457; his wife Pulcheria had died before him. He was succeeded by Leo I. (*Encycl. Us. Knowl.*, vol. 14, p. 412.)—II. Capella. (Vid. Capella.)

MARCOMANNI, a nation of Germany, in the south-eastern part of the country. According to some authorities, their original seats were in Moravia, whence, on being hard pressed by the Romans, they retired into what is now Bohemia. (Vell. Patere., 2, 108.—Mannert, *Geogr.*, vol. 3, p. 110.) Other writers, however, such as Cluver, Adeling, Masov, &c., make them to have lived between the Maine and Neckar, previous to their departure for Bohemia.—They were subdued by the emperors Trajan and Antoninus. Their name denotes "border men," i. e., men of the marches. (Mannert, *Geogr.*, vol. 3, p. 382, seqq.)

MARCUS, a phenomenon common to many of the Romans. (Vid. *Æmilias*, *Lepides*, &c.)

MAEDI, I. a people of Asia, near the northern frontiers of Media, or rather of Matisene, which formed part of Media. (Strabo, 524.—Tschucke, ad Strab., l. c., vol. 4, p. 550.—Quint. Curt., 5, 5.)—II. A tribe of the Persians, according to Herodotus (1, 125), but, according to other writers, a distinct race in their immediate neighbourhood. (Arrian, *Hist. Ind.*, 40.) They are represented as a plundering race. (Arrian, l. c.)—III. A nation dwelling to the south of Bactriana, and to the north of the chain of Paropamisus. Pliny (6, 16) says they extended from Caucasus to Bactriana, in which he evidently followed the historians of Alexander, who, out of flattery to that prince, called the Paropamisus by the name of Caucasus. As regards these three nations, consult the remarks of Larcher (*Hist. d'Herod.*—*Table Geogr.*, vol. 8, p. 317, seqq.).

MARDONIUS, a general of Xerxes, who, after the defeat of his master at Thermopylae and Salamis, was left in Greece with an army of 300,000 chosen men, to subdue the country, and reduce it under the power of Persia. His operations were rendered useless by the courage and vigilance of the Greeks; and in a battle at Plataea, Mardonius was defeated and left among the slain, B.C. 479. He had been commander of the armies of Darius in Europe, and it was chiefly by his advice that Xerxes invaded Greece. He was son-in-law of Darius. (Vid. Darius I., where some other particulars are given respecting him.)

MARE MORTUUM, an extensive and most interesting piece of water, in Judæa, about 70 miles long and 20 broad. It was anciently called the "Sea of the Plain" (*Deut.* 3, 17; 4, 19), from its situation in the great hollow or plain of the Jordan; the "Salt Sea" (*Deut.* 3, 17.—*Josh.* 15, 5), from the extreme saltiness of its waters; and the "East Sea" (*Ezek.* 47, 19.—*Joel* 2, 30), from its situation relative to Judæa, and in contradistinction to the West Sea, or Mediterranean. It is likewise called by Josephus, and by the Greek and Latin writers generally, *Lacus Asphaltites*, from the bitumen (ἀσφαλτος) found in it; and the "Dead Sea," its more frequent modern appellation, from the belief that no living creature can exist in its saline and sulphureous waters. It is at present known in Syria by the names of *Almotnah* and *Bahar Loth*; and occupies what may be considered as the southern extremity of the vale of Jordan. This sea, so important and so often mentioned in sacred history, still bears the most unequivocal marks of the catastrophe of which it has been the site. It differs, indeed, so essentially in situation and proper-

ties from every other piece of water in the known world, that it is a wonder it has not been the subject of more frequent and extensive observation. Its depth seems to be altogether unknown; and it is only of late that a boat has navigated its surface. Towards its southern extremity, however, in a contracted part of the lake, is a ford, about six miles over, made use of by the Arabs: in the middle of which they report the water to be warm, indicating the presence of warm springs beneath. In general, towards the shore it is shallow; and it rises and falls with the seasons, and with the quantity of water carried into it by seven streams, which fall into this their common receptacle, the chief of which is the Jordan. It also appears either to be on the increase, or to be lower in some years than in others, whence those travellers are to be credited who assert that they have beheld the ruins of the cities either exposed or ingulfed beneath the waters. Troilo and D'Arvieux attest that they observed fragments of wall, &c. Josephus remarks, that one might still see there "the shadows of the five cities" (*πέντε μὲν πόλιν σκιάς*), leaving it somewhat uncertain what he means by this figurative language. (*Bell. Jud.*, 4, 8, 4.) Strabo gives a circumference of 60 stadia to the ruins of Sodom, according to the traditions of the neighbouring communities (*ὥστε πιστεύειν τοῖς ὀφθαλμοῖς ὑπὸ τῶν ἐγγυρίων, ὡς ἔρα ὑποκύντ' ὅτε τρισκαίδεκα πόλεις ἐνταῦθα, ὧν τῆς μητροπόλεως, Σόδομον, σώζεται κύκλος ἑξήκοντά πον σταδίων.*—*Strab.*, 764.) Two aged and respectable inhabitants of Jerusalem told Maundrell that they had once been able to see some part of these ruins; that they were near the shore, and the water so shallow at the time, that they, together with some Frenchmen, went into it, and found several pillars and other fragments of buildings. These several authorities are too weighty to be despised; and we may collect from them some support to the opinion, that, at the destruction of the guilty cities, they were not entirely overwhelmed with the waters, but remained more or less exposed to view, as monuments of the judgments of God; and that, from the slow increase of the waters through a period of nearly 4000 years, they have gradually receded from our sight, and are now only to be seen through the water, if seen at all, after seasons of long-continued drought. The water now covering these ruins occupies what was formerly the Vale of Siddim; a rich and fruitful valley, in which stood the five cities, called the cities of the plain, namely, Sodom, Gomorrah, Admah, Zeboim, and Bela or Zoar. The first four of these were destroyed, while the latter, being "a little city," was preserved at the intercession of Lot; to which he fled for refuge from the impending catastrophe, and where he remained in safety during its accomplishment. Naturalists have indulged themselves in many speculations as to the manner in which this destruction took place, and the immediate causes engaged in effecting it; as if this were necessary for our faith. It is probable, however, that in this instance, as in most others, the Almighty called in the aid of second causes for the accomplishment of his purpose. The most reasonable explanation of such causes is founded on what is said in *Gen.* 14, 10, of the soil of the Vale of Siddim, that it was "full of slime pits," or, more properly, pits of bitumen, for thus the word is rendered in the Septuagint. Now it is probable that in this instance, as in that of the flood, the inhabitants of the offending cities were involved in destruction, which met them on all sides, from above and below; that the earth opened its fountains of lava or pitch ignited by subterraneous combustion, while a fiery shower from above expedited and ensured their utter destruction. Whatever the means employed might have been, they were evidently confined in a remarkable manner to the devoted district; as Lot found safety in Zoar, although only a few miles distant, and

within the precincts of the plain itself. This circumstance seems to show sufficiently that the country was not destroyed by an earthquake, as supposed by some, which would scarcely have been so partial in its effects. There is also a passage (*Gen.* 19, 28) which favours very much the above opinion respecting the combustion of the soil; where it is said that Abraham got up early in the morning, and "looked towards Sodom and Gomorrah, and towards all the land of the plain, and behold, and lo, the smoke of the country went up as the smoke of a furnace." The character of this catastrophe approaches nearest to that of a volcanic eruption: an opinion which is supported by the physical structure of the soil of the neighbourhood both before and since; the bituminous nature of the soil as described in *Genesis* (14, 10); the occasional eruptions of flame and smoke so late as the first century, as attested by Josephus; and the hot springs and volcanic substances, consisting of lava, sulphur, pumice, and basalt, still found in the vicinity of the lake, as described by Volney, Burckhardt, Buckingham, and other travellers. We know not the character of the soil beneath the surface; the figure, material, and stratification of the mountains: whether a crater or craters are to be found on them, and, if so, whether they have emitted any streams of lava, and what was their direction. All this, and much more in this interesting neighbourhood, remains to be explored by the experienced eye of a geologist. In the absence, however, of such information, it may be surmised that the cities could not have been buried beneath a shower of ashes from a mountain-crater, after the manner of Herculaneum and Pompeii, as this would be incompatible with the testimony of those who have witnessed the exposed remains of the cities, as well as with the account which represents the plain itself as burning, not the neighbouring mountains. Nor could they have been overwhelmed by a torrent of lava: for besides that this mode is liable to the objection already urged of totally obliterating the cities, the ordinary progress of a lava would not have been equal to the design, as it is never so rapid as not to give ample time for escape. The catastrophe might still, however, have been of a volcanic character, but the vale itself, or some part of it, must have been a crater; which, vomiting forth, not a vitreous and sluggish lava, but a far more liquid and diffusive stream from the bituminous stores beneath, involved the miserable inhabitants on all sides, from the earth and from the air, in a deluge of fire. Before this event, the vale of Siddim was a rich and fertile valley; a continuation of that of the Jordan; through which the river took its course southward. Here we are assisted by the investigations of Burckhardt, who, although he had not an opportunity of personally examining the spot, obtained very satisfactory information, that, at the southern extremity of the lake, there is an opening leading into the Valley of *El Ghor*; which, with its southern continuation, termed *El Araba*, both inspected by Burckhardt himself, descends uninterruptedly to the *Ælanitic Gulf of the Red Sea*; which it joins at *Akaba*, the site of the ancient Ezion-geber. This Burckhardt supposes to be the prolongation of the ancient channel of the Jordan, which discharged itself into the sea before its absorption in the expanded Lake of Sodom. This is extremely probable: and there cannot be a more interesting country in the world than this, to be made the subject of an intelligent and accurate geological survey. We may, however, from what we know, infer thus much: that before the face of the country was changed by the judgment which fell upon it, the ground now covered by the waters of the Dead Sea was an extensive valley, called the Vale of Siddim, on which stood the five cities, and through which the Jordan flowed in its course to the sea. That it flowed *through* the vale may be inferred from the great fertility of the latter; that it passed *beyond* it, is

equally to be inferred from the want of space over which the water could expand itself to be exhausted by evaporation. But the discovery of the opening on the southern border of the lake, and the inclined valley leading thence to the sea, have rendered these inferences almost conclusive. We may then, and must in fact, refer the origin of the lake to the epoch in question, when the combustion of the soil, or of its substrata, occasioned a subsidence of the level of the valley, by which the river was arrested in its course, and a basin formed to receive its waters. These gradually spread themselves over its surface, and would no doubt soon have filled it, and resumed the ancient channel to the southward, had not their increase been retarded by the process of evaporation, which advanced in an increasing ratio as the expanse of water grew wider and wider. The newly-formed lake would thus continue to extend itself, until the supply of water from the streams, and the consumption by evaporation, arrived at a balance. When this took place, or whether it has even yet taken place, cannot be known; at least without such observations as have not yet been made. That it has not long been the case may be inferred from the disappearance of the ruins which were visible two centuries ago.—The water of this sea is far more salt than that of the ocean; containing one fourth part of its weight of saline contents in a state of perfect desiccation, and forty-one parts in a hundred in a state of simple crystallization: that is to say, a hundred pounds by weight of water will yield forty-one pounds of salts; while the proportion of saline contents in the water of the Atlantic is not more than 1-27th part in a state of dryness, and about six pounds of salts in a hundred of the water. The specific gravity of the water is 1.211; that of common water being 1000. A vial of it having been brought to England by Mr. Gordon of Clunie, at the request of Sir Joseph Banks, was analyzed by Dr. Marcet, who gives the following results: "This water is perfectly transparent, and does not deposit any crystals on standing in close vessels. Its taste is peculiarly bitter, saline, and pungent. Solutions of silver produce from it a very copious precipitate, showing the presence of marine acid. Oxalic acid instantly discovers lime in the water. The lime being separated, both caustic and carbonated alkalies readily throw down a magnesian precipitate. Solutions of barytes produce a cloud, showing the existence of sulphuric acid. No alumine can be discovered in the water by the delicate test of succinic acid combined with ammonia. A small quantity of pulverized sea salt being added to a few drops of the water, cold and undiluted, the salt was readily dissolved with the assistance of a gentle trituration, showing that the Dead Sea is not saturated with common salt. None of the coloured infusions commonly used to ascertain the prevalence of an acid or an alkali, such as litmus, violet, and turmeric, were in the least altered by the water." The result of Dr. Marcet's analysis gives the following contents in 100 grains of the water:

Muriate of Lime	3.920 grains.
Muriate of Magnesia	10.246 "
Muriate of Soda	10.360 "
Sulphate of Lime	0.054 "
	<hr/>
	24.586

Dr. Madden, a recent traveller, brought home with him a bottle of the same water, which, on being analyzed, was found to contain the following substances:

Chloride of Soda, with a trace of Bromine	9.55
Chloride of Magnesium	8.25
Chloride of Calcium	3.05
Sulphate of Lime	1.94
	<hr/>
	19.25

The traveller last mentioned gives us the following account of a visit which he paid to the Dead Sea.

"About six in the morning I reached the shore, and, much against the advice of my excellent guides, I resolved on having a bathe. I was desirous of ascertaining the truth of the assertion, that 'nothing sinks in the Dead Sea.' I swam a considerable distance from the shore, and about four yards from the beach I was beyond my depth. The water was the coldest I ever felt, and the taste of it the most detestable; it was that of a solution of nitre, mixed with an infusion of quassia. Its buoyancy I found to be far greater than that of any sea I ever swam in, not excepting the Euxine, which is extremely salt. I could lie like a log of wood on the surface, without stirring hand or foot, as long as I chose; but, with a good deal of exertion, I could just dive sufficiently deep to cover all my body, when I was again thrown on the surface, in spite of my endeavours to descend lower. On coming out, the wounds on my feet, which had been previously made, pained me excessively; the poisonous quality of the waters irritated the abraded skin, and ultimately made an ulcer of every wound, which confined me fifteen days in Jerusalem, and became so troublesome in Alexandria, that my medical attendant was apprehensive of gangrene." Dr. Madden is convinced that no living creature can be found in the Dead Sea; and, to try whether there were any fish in it, he spent two hours in fishing. The surface of the sea, according to him, is covered with a thin pellicle of asphaltum, which issues from the fissure of the rock adjoining it. On coming out of the water he found his body covered with it, and likewise with an incrustation of salt, almost the thickness of a sixpence. The rugged aspect of the mountains, the deep ravines, and the jagged rocks, all prove that the surrounding country has once been the scene of some terrible convulsion of nature. "I have no hesitation," says Dr. Madden, "in stating my belief, that the sea which occupies the site of Sodom and Gomorrah, Admah, Zeboim, and Segor, covers the crater of a volcano." We have said that this traveller was convinced that no living creature could be found in the Dead Sea: Chateaubriand, however, states that, hearing a noise on the lake at midnight, he was told by the Bethlehemists that it proceeded from legions of small fish, which come and leap about near the shore. Maundrell also observed, among the pebbles on the bank, shells which had once contained fish. The traveller last mentioned also saw birds flying about and over the sea with impunity, which contradicts the common belief that birds fell dead in flying over it. The Dead Sea is situate between two ridges of mountains; of which those on the eastern or Arabian side are the highest and most rocky, and have much the appearance of a black perpendicular wall, throwing a dark and lengthened shadow over the water of the sea. (*Mansford's Scripture Gazetteer*, p. 123, *seqq.*) We shall close the present article with the following remarks of Dr. Clarke, which have been already in some degree anticipated. "The atmosphere was remarkably clear and serene; but we saw none of those clouds of smoke which, by some writers, are said to exhale from the surface of the lake. Everything about it was in the highest degree grand and awful. Its desolate, although majestic features, are well suited to the tales related concerning it by the inhabitants of the country, who all speak of it with terror, seeming to shrink from the narrative of its deceitful allurements and deadly influence. 'Beautiful fruit,' say they, 'grows upon its shores, which is no sooner touched than it becomes dust and ashes.' In addition to its physical horrors, the region around is said to be more perilous, owing to the ferocious tribes wandering upon the shores of the lake, than any other part of the Holy Land. A passion for the marvellous has thus affixed, for ages, false characteristics to the sublimest associations of natural scenery in the whole

world; for, although it be now known that the waters of this lake, instead of proving destructive of animal life, swarm with myriads of fishes (*Chateaubriand*, vol. 1, p. 411, *Lond.*, 1811); that, instead of falling victims to its exhalations, certain birds make it their peculiar resort (*Mausdrell*, p. 84, *Oxf.*, 1721); that shells abound upon its shores; that the pretended fruit containing ashes is as natural and admirable a production of nature as the rest of the vegetable kingdom, being the fruit of the *Solanum Melangena*, the inside of which, when the fruit is attacked by an insect (*Tenthredo*), turns to dust, while the skin remains entire and of a beautiful colour; notwithstanding all these and other facts are well established, yet even the latest authors by whom it is mentioned continue to fill their descriptions with imaginary horrors.—*Reiland*, in his account of the *Lacus Asphaltites* (*Palast.*, vol. 1, p. 238), after inserting copious extracts from *Galen* concerning the properties and quality of the water, and its natural history, proceeds to account for the strange fables that have prevailed with regard to its deadly influence, by showing that certain of the ancients confounded this lake with another, bearing the same appellation of Asphaltites, near Babylon; and that they attributed to it qualities which properly belonged to the Babylonian waters. An account of the properties of the Babylonian lake occurs in the writings of *Vitruvius* (8, 3), of *Pliny* (35, 15), of *Athenæus* (2, 5), and of *Xiphilinus* (p. 252). From their various testimony it is evident, that all the phenomena supposed to belong to the Lake Asphaltites near Babylon, were, from the similarity of their names, ultimately considered as the natural characteristics of the Jordan lake, the two Asphaltites being confounded." (*Clarke's Travels*, vol. 4, p. 399, *Lond. ed.*)

ΜΑΡΩΤΙΣ, a lake of Egypt, in the immediate vicinity of Alexandria. Its earlier name was *Μάρια* (ἡ *Μαρία λίμνη*); the later Greeks gave it the appellation of *Μαρεωτίς* (*Μαρεωτίς*). The first writer that makes mention of it is *Scylax* (p. 44). "Pharos," says he, "is an uninhabited island, with a good harbour, but destitute of water. This last is obtained from the neighbouring lake *Μαρία* (ἐκ τῆς *Μαρίας λίμνης ὑδαίνονται*)." The same writer informs us, that in very early times canals were cut connecting this lake with the Nile, and thus furnishing it with a constant supply of fresh water. The Lake *Μαρεωτίς* first rose into importance after the founding of Alexandria. From this period it is mentioned by all the geographical writers, but the most particular description is given by *Strabo* (799). "The Lake *Μαρία*," says *Strabo*, "is more than 150 stadia in breadth, and not quite 300 in length. It extends on the west as far as the fortress called *Chersonesus*, which is 70 stadia from Alexandria. It contains eight islands, and all the country around is well inhabited." In another part (p. 793) he informs us, that many canals connected this lake with the Nile, and that thus, in the summer season, when the lake would otherwise have been low, the inundation of the Nile afforded it an abundant supply of water, and rendered the neighbouring country, and Alexandria in particular, extremely healthy; since, otherwise, had the waters of the lake been diminished by the summer heats, the sun would have acted on the mud left uncovered along the banks, and would have produced pestilence. Of these canals he remarks, on another occasion (p. 803), that many of them struck the Nile between *Gynæopolis* and *Momeraphis*. Along the canals connecting the river with the lake was the merchandise transported to Alexandria, to be conveyed thence into the Mediterranean Sea.—The country around the lake was remarkable for its fertility. The principal product was wine. It was a light, sweetish white wine, with a delicate perfume, of easy digestion, and not apt to affect the head; though the allusion in *Hæmæ* (*Od.*, 1, 37, 14) to its

influence on the mind of *Cleopatra*, unless it be mere poetic exaggeration, would seem to imply that it had not always preserved its innocuous quality. It has been suggested by some critics, that the *Μαρεωτίς* wine did not come from the vicinity of the Lake *Μαρεωτίς*, but from a canton of this name in *Epirus*. This opinion rests for support on a passage in *Herodotus* (2, 77), where it is stated that there were no vines in Egypt, and that the people drank a kind of beer in its stead (ὅλον δ' ἐκ κριθῶν πεποιμένον διαχρῶνται: ὃ γὰρ σφί εἰσι ἐν τῇ χώρῃ ἀπαιεῖται). *Maite-Brun* successfully combats this assertion, and shows, by very clear proofs, that, under the Greeks and Romans, Egypt produced various kinds of wine. As regards the culture of the vine previous to the dominion of these foreign powers, it appears very manifest, from the paintings in the tombs throughout the Thebaid, and other parts of the country, that it was far from being unknown. Some of these paintings represent the whole process of the vintage. In the Sacred writings also (*Numb.* 20, 5) there is a very plain allusion to the vines of Egypt. We must either, therefore, consider the remark of *Herodotus* incorrect, or refer it to a part of the country merely. Perhaps, as the vines were planted on the edge of the desert, above the level of the inundation, and not in Egypt properly so called, the veracity of the historian may in this way be saved. Unless this latter mode of explaining the difficulty be adopted, he will be found to contradict himself, since it is stated in the 166th chapter of the same book, that the caste of warriors in Egypt received individually four measures of wine, ὅλον τέσσαρας ἀπορρήσας. (Compare *Bulletin des Sciences Historiques*, &c., vol. 4, p. 77, *seqq.*)—The modern name of Lake *Μαρεωτίς* is *Mairout*. For many ages after the Greek and Roman dominion in Egypt, it was dried up; for, though the bed is lower than the surface of the ocean, there is not sufficient rain to keep up any lake in the country in opposition to the force of perpetual evaporation. But in 1801, the English, in order to circumscribe more effectually the communications which the French army in the city of Alexandria maintained with the surrounding country, cut across the walls of the old canal which had formed a dike, separating this low ground from Lake *Μαρία*, or the Lake of *Aboukir*, on the east. In consequence of this easy operation, the water had a sudden fall of six feet, and the Lake *Μαρεωτίς* which had so long disappeared, and the site of which had been occupied partly by salt marshes, partly by cultivated lands, and even villages, resumed its ancient extent. The inhabitants of the villages were obliged to fly, and bewail from a distance the annihilation of their gardens and dwellings. This modern inundation of the sea is indeed much more extensive than the ancient Lake *Μαρεωτίς*, occupying probably four times its extent. (*Maite-Brun*, *Geogr.*, vol. 4, p. 32, *Am. ed.*)

ΜΑΡΓΙΑΝΑ, a country of Asia, lying along the river *Margus*, from which it derived its name. According to *Ptolemy*, it was bounded on the west by *Parthiæne*, on the north by the *Oxus*, on the east by *Bactriana*, and on the south by Asia and the *Sariphan* mountains. It now answers to the northern part of *Chorasan*. (Compare *Plin.*, 6, 16.—*Strabo*, 515.) *Strabo* speaks in strong terms of the fertility of *Margiana*, and states that it took two men to clasp the lower part of the stem of the vines with their arms. (*Strab.*, 73.)

ΜΑΡΣΙΝΕΣ, the title of one of the minor poems ascribed to *Homer*. (*Vid.* *Homerus*, p. 642, col. 1.)

ΜΑΡΓΟΥΣ, I. a river in *Mæsia Superior*, rising from *Mount Orbelus*, and falling into the *Danube* to the west of *Viminacium*. It is now the *Morava*.—II. A river of *Margiana*, falling into the *Oxus* northwest of *Nisea*. It is now the *Mariab*. (*Plin.*, 6, 16.)

ΜΑΡΙΪΑ, I. a city of the *Calingit*, in the south-eastern part of *Arabia Felix*, 13 miles northeast of

Musa; now *Marcb.*—II. A city of the Sabai, in Asia Felix. (*Plin.*, 6, 28.)

MARIA LEX, I. by C. Marius, when tribune, A.U.C. 634. It ordained that the passages, called *pontes*, by which the people passed to give their votes at the *comitia*, should be narrower, in order that there might be no crowding there, and that no persons might take their stand there to impede or disturb the voters. (*Cic.*, *Leg.*, 3, 17.)—II. Maria Porcia, so called because proposed by two tribunes, Marius and Porcius. It was passed A.U.C. 691, and ordained that those commanders should be punished who, in order to obtain a triumph, wrote to the senate a false account of the number of the enemy slain in battle, or of the citizens that were missing; and that, when commanders returned to the city, they should swear before the city quæstors to the truth of the account which they had sent. (*Val. Max.*, 2, 8, 1.)

MARIANA FOSSA, a canal cut by Marius from the river Rhone, through the Campus Lapidus, into the Lake Mastramela. It was probably near the modern *Martignus*. (*Mela*, 2, 5.—*Plin.*, 3, 4.)

MARIANDYNI, a people of Bithynia, to the east of the river Sangarius. They were of uncertain origin; but, since they differed neither in language nor in customs materially from the Bithynians, they might justly be considered as part of the same great Thracian stock. (*Strab.*, 542.) That they were barbarous is allowed by all; and Theopompus, whose authority is referred to by Strabo, reported, that when the Megarians founded Heraclea in their territory, they easily subjected the Mariandyni, and reduced them to a state of abject slavery, similar to that of the Mnotæ in Crete, and the Penestæ in Thessaly. (*Strab.*, l. c.—*Posidon.*, *ep. Athem.*, 6, p. 263.—*Athen.*, 14, p. 620.)

MARICA, I. a nymph of the river Liris, who had a grove near Minturnæ, into which, if anything was brought, it was not lawful to take it out again. (*Plut.*, *Vit. Marii*, 39.) According to some authorities, she was the same with Circe. (*Lactant.*, *de Fals. Rel.*, 1, 21.) Virgil, however, makes her the wife of Faunus, and mother of Latinus. (*Æn.*, 7, 47.—*Serv.*, *ad loc.*)

MARINUS, a native of Tyre, who flourished in the second century of the Christian era, a short time before Ptolemy. An account of his work on Mathematical Geography will be given under the article Ptolemæus.

MARIUS, a river of Dacia which falls into the Tibiscus; now the *Marosch*. (*Strabo*.—*Jornand.*, *de Reb. Gel.*, p. 102.)

MARIUS, CAIUS, a celebrated Roman, was born of humble parents, at or in the neighbourhood of Arpinum, about B.C. 157. He served at the siege of Numantia, B.C. 134, under Scipio Africanus, together with Jugurtha, where he highly distinguished himself. He received great marks of honour from Scipio, who used frequently to invite him to his table; and when, one evening at supper, Scipio was asked where they should find so great a general when he was gone, he is said to have replied, placing his hand upon the shoulder of Marius, "Here, perhaps." In B.C. 119 he was elected tribune of the commons, through the influence of Cæcilius Metellus, according to Plutarch, but more probably in consequence of the fame he had acquired in the Numantine war. In this office he showed himself, as he did throughout the whole course of his life, a most determined enemy of the patrician order, and one who was not easily to be put down by the threats and opposition of his enemies. Having proposed a law to prevent illegal voting at elections, the senate passed a decree that the law should not be put to the vote in the popular assembly, and summoned Marius before them to answer for his conduct. Marius not only appeared, but threatened to commit the consuls to prison if they did not repeal the de-

crees; and when Metellus continued to support it, he commanded him to be led away to prison. Marius obtained the prætorship with great difficulty, in consequence of the violent opposition of the patrician order, who accused him of having obtained the office by means of bribery. At the expiration of his prætorship the province of Spain was assigned to him, which he cleared of robbers. On his return to Rome he was anxious to obtain the consulship; but he did not venture to become a candidate for many years after. He continued, however, to rise in public opinion, and appears about this time to have married Julia, one of the Julian family, who was aunt to the celebrated Julius Cæsar. In B.C. 109 he accompanied Metellus into Africa, in the capacity of *legatus*; and by his prudence and courage in the war with Jugurtha, he added greatly to his military reputation. His friends took advantage of his increasing popularity at Rome to persuade the people that the war with Jugurtha would never be concluded until the command was given to Marius. This led to an open rupture between him and Metellus; and it was with the greatest difficulty that the latter allowed his lieutenant Marius leave of absence to go to Rome in order to stand for the consulship. Marius was, however, successful; he obtained the consulship B.C. 107, and the command of the Jugurthine war. On his arrival in Africa he prosecuted the war with the greatest vigour; and in the following year (B.C. 106) obtained possession of the person of Jugurtha, who was treacherously given up by Bocchus to his quæstor Sylla. Marius remained in Africa during the next year (B.C. 105), in which the consul Manlius and the proconsul Cæpio were defeated by the Teutones and Cimbri, with the prodigious loss, according to Livy (*Epit.*, 67), of 80,000 soldiers, besides 40,000 camp followers. The news of their defeat caused the greatest consternation at Rome, especially as the Teutones and Cimbri threatened the immediate invasion of Italy; and Marius was accordingly elected consul in his absence, without any opposition even from the patrician party, as the only man in the state who was able to save it from impending ruin. He entered upon his second consulship B.C. 104, and enjoyed a triumph for his victories over Jugurtha; but, in consequence of the threatened invasion of Italy having been deferred by an irruption of the Cimbri into Spain, he was again chosen consul in the two following years (B.C. 103, 102). In the fourth consulship of Marius (B.C. 102), the Cimbri, having been defeated by the Celtiberi in Spain, returned to Gaul, and resolved to invade Italy in two divisions; the one consisting of the Teutones and Ambrones (a Gallic people), through Gallia Narbonensis; and the other, comprising the Cimbri, by way of Noricum. Marius defeated the Teutones and Ambrones near Aquæ Sextiæ (now *Atz*) in Gaul; but Catulus, who was stationed at the foot of the Alps to oppose the passage of the Cimbri, retreated first to the other side of the Athesis (now the *Adige*), and afterward quitted this position also, without waiting for the enemy's attack. In the following year (B.C. 101), Marius, who was again elected consul for the fifth time, joined his forces with those of Catulus, and entirely defeated the Cimbri in the plain of Vercellæ (now *Vercelli*), situate to the north of the Po, near the Sesias. In these two battles the Teutones and Ambrones are said to have lost the incredible number of 290,000 men (200,000 slain, and 90,000 taken prisoners); and the Cimbri 200,000 men (140,000 slain, and 60,000 taken prisoners). (*Liv.*, *Epit.*, 68.) Marius again became candidate for the consulship for the following year; but, now that the fear of the Gallic invasion was removed, he was opposed by the whole strength of the patrician party. He nevertheless obtained the consulship, in great part owing to the exertions of Salu-

MARIUS.

ninus, the tribune, who is described as a man that scrupled at the commission of no crime to accomplish his object. The events of the sixth consulship of Marius, which are some of the most important in this period of Roman history, are imperfectly narrated by historians. It appears that an agrarian law, proposed by Saturninus, and supported by Marius and one of the prætors named Glaucia, was carried, notwithstanding the most violent opposition of the patrician party; and that Metellus Numidicus was driven into exile, in consequence of refusing to take the oath of conforming to the law. When the election of consuls for the ensuing year came on, Memmius, who opposed Glaucia as a candidate for the office, was murdered by order of Saturninus; and the senate, perceiving the city to be in a state of anarchy, passed the usual decree, "that the consuls should take care that the republic received no injury," by which almost absolute power was vested in those magistrates. Marius, unable or unwilling to protect his old friends, besieged Saturninus and Glaucia, who had seized upon the Capitol. They surrendered to Marius on the promise that their lives should be spared, but they were all immediately put to death. It appears probable that Marius, after the blow which had been given to the popular party by the surrender of Saturninus and Glaucia, would not have been able to save their lives, even if he had made the attempt. At the expiration of his consulship, Marius left Rome, to avoid witnessing the triumph of the patrician party in the return of his old enemy Metellus, whose sentence of banishment was repealed after the death of Saturninus. According to Plutarch, he went to Cappadocia and Galatia, under the pretence of offering a sacrifice which he had vowed to Cybele, but with the real object of exciting Mithradates to war, in order that he might be again employed in military affairs, since he did not obtain much distinction in peace. In B.C. 90 the Marsian or Social war broke out, in which both Marius and Sylla were employed as *legati* to the two consuls. Marius gained several victories over the enemy, but he no longer possessed that activity and energy which had distinguished him in his earlier years; and disgusted, it is said, with the increasing reputation of Sylla, he resigned his command before the conclusion of the war. The Marsian war had scarcely been brought to an end, before the civil war broke out between Marius and Sylla. The command of the Mithradatic war had been assigned to the latter, who was now consul (B.C. 88); but Marius used every effort to wrest it from him, and is said by Plutarch to have gone every day to the Campus Martius, and to have performed his exercises with the young men, although he was now in his 70th year, and very corpulent, in order to show that he was not incapacitated by age. He was warmly supported by P. Sulpicius, the tribune, who possessed great property and influence; and a law was eventually passed, that the command should be taken from Sylla and given to Marius. Sylla was with the army at the time, besieging Nola; but, as soon as he heard of the law which had been passed, he marched to Rome, and Marius and his adherents were obliged to flee from the city. After wandering through many parts of Italy, Marius escaped with the greatest difficulty to Africa; but he had no sooner landed at Carthage than Sextilius, the governor of the province, sent word to him, that, unless he quitted Africa, he should treat him as a public enemy. "Go and tell him," replied the wanderer, "that you have seen the exile Marius sitting on the ruins of Carthage." But, in the following year (B.C. 87), during the absence of Sylla, who had gone to Greece to oppose Archelaus, Marius returned to Italy in order to join the consul Cinna, who, in his attempt to abrogate the laws of Sylla, had been driven from Rome by his colleague Octavius, supported by the

MARIUS.

patrician party. Shortly afterward, Marius and Cinna entered the city at the head of a large army, and a general massacre of the opposite party ensued.—Marius always appears to have been of a fierce and unrelenting temper; and the sufferings he had lately undergone, which at his time of life must have greatly impaired his health, tended to exasperate him more than ever against the party which had opposed and thwarted him during the whole of his life. All the leaders of the patrician party who were unable to escape from Rome, were put to death. Lutatius Catulus, who had been the colleague of Marius in the war with the Cimbri, destroyed himself to avoid assassination; and among the numerous illustrious patricians that fell were C. and L. Julius Cæsar, and the celebrated orator M. Antonius, who is so frequently praised by Cicero, and is one of the principal speakers in the dialogue "De Oratore." Marius and Cinna declared themselves consuls for the ensuing year (B.C. 86), without even holding the comitia; but Marius died of a fever in the beginning of the year, on the 17th day of his consulship according to Plutarch (*Vit. Mar.*, c. 46), or the 18th according to Livy (*Epis.* 80).—The character of Marius is chiefly known to us from his life by Plutarch, who appears to have taken his account from the "Memoirs of Sylla," the inveterate enemy of Marius. It cannot be denied, that, after his return from exile, Marius was guilty of the greatest cruelties; but even these were surpassed by the atrocities of Sylla; and we should not be doing justice to Marius if we ascribed to him during the whole of his life the character which he displayed in his seventh consulship. "I have seen," says Plutarch, "the statue of Marius at Ravenna, in Gaul, which expresses in a remarkable manner his sternness and severity. Since he was naturally robust and warlike, and more acquainted with the arts of war than those of peace, he was fierce and haughty when in authority. It is said that he never learned Greek, and that he would not make use of that language on any serious occasion; as if it were ridiculous to learn the language of a people who were subject to others. If he could have been persuaded to pay his court to the Grecian Muses and Graces, he would not, after bearing so many honourable offices, and performing so many glorious exploits, have crowned the whole by a most savage and infamous old age, in consequence of his yielding to anger, ill-timed ambition, and insatiable avarice." (*Plut., Vit. Mar.—Sall., Bell. Jug.—Encycl. Us. Knowl.*, vol. 14, p. 420, seq.)—II. Son of the preceding, resembled his father in private character, and was equally fierce and vindictive. He seized upon the consulship at the age of 27, and put to death numbers of his political opponents. Defeated subsequently by Sylla, he fled to Preneste, where he slew himself. (*Plut., Vit. Mar.*)—III. Mercator, an ecclesiastical writer, the antagonist of Celestius and Nestorius, who flourished between 425 and 450 A.D. His country is not exactly known: some believe him to have been a native of Apulia; others, of some other province of Lower Italy; and others, again, of Africa. It appears that he was not a priest. He has left behind him a number of works, or, rather, translations from the Greek, consisting of pieces relative to the heresies of Pelagius and Nestorius, of extracts from the works of the latter, refutations of his doctrine, errors of Theodorus and Mopsuestus, acts of synods held against heretics, &c. Marius Mercator was the disciple and friend of St. Augustine. His works were edited by Garner, Paris, 1673, 2 vols. fol., and by Baluze, Paris, 1684.—IV. Marcus Aurelius Marius Augustus, was originally an armourer or blacksmith in Gaul. He afterward turned his attention to a military life, and soon raised himself, by his merit, to the highest stations. After the death of Victorinus the younger, the

army elected Marius emperor. It is generally supposed that the Empress Victorina contributed to his elevation, with the hope of preserving her own authority; but this is denied by some modern writers, who maintain that she took part in the conspiracy which deprived Marius of his crown and life. (*De Boze, Dissertation sur un médaillon de Tetricus. — Mem. de l'Acad. des Inscr.*, vol. 26.) He reigned only three days, and was slain by a soldier to whom he had refused some favour, and who, in stabbing him, exclaimed, "Take it—it was thou thyself that forged it." Marius was remarkable for personal strength, of which historians give some accounts that are evidently fabulous. (*Treb. Pollio, Trigint. Tyrann.*—*Vid. Marii.*)

MARMARICA, a country of Africa, to the east of Cyrenaica, lying along the Mediterranean shore. It forms at present a part of the district of *Barca*. The inhabitants were a roving race, and remarkable for their skill in taming serpents. (*Sil. Ital.*, 3, 300.) The ancient Marmarica was a region much less highly favoured by nature than Cyrenaica. According to Della Cella (p. 182, *seqq.*), the general features of the country, however, are similar to those of the region last mentioned. "We wound our way," says this traveller, "among wild and rugged mountains, frequently enlivened by groups of evergreens; among which the cypress, arbutus, Phœnician juniper, gigantic myrtle, carob, and laurel, were most abundant; and as they form no long and uniform woods, but are scattered about in a variety of forms and groups among the rocks, they are very picturesque ornaments of the scenery. The ground is throughout broken and irregular, and does not slope down into pastures, as in Cyrenaica; but the privation of that agreeable feature has its compensation, for the want of grasslands secures this district from the incursions of the vagabond hordes in its neighbourhood. The woody and elevated nature of this country affords frequent and copious springs of clear and most delicious water.—This tract of border country is, as in former times, the resort of all the thieves, miscreants, and malcontents of the two governments of Tripoli and Egypt. Pitching their tents in the neighbourhood of the Bay of Bomba, they make incursions into the adjacent districts, and pillage all who have the misfortune to fall in their way. They are ever on the watch for the caravans and pilgrims who traverse this country on their way to Mecca; and this is the only route used by the people of Morocco, above all others the most fervently devoted to their prophet."—M. Pachó speaks of the general aspect of Marmarica in still less favourable terms. The soil, he says, is rocky, of a yellowish-gray colour, and depends for its fertility solely on the copious rains. The country presents none of those verdant groves of laurel and myrtle which crown the mountains and overshadow the valleys of the Pentapolis. The singing-birds, vainly seeking foliage and shelter, flee from this naked region; only birds of prey, the eagle, the hawk, and the vulture, appear in numerous flights, their sinister screams rendering the solitude more frightful. The jackal, the hyena, the jerboa, the hare, and the gazelle, are the wild animals which chiefly abound; and the existence of man is indicated merely by the bleating of distant flocks, and the dark tent of the Arab. Yet this country also exhibits traces of having once been occupied by a civilized and even numerous population, and there are marks of the extraordinary exertions which were made to supply the deficiency of water. Canals of irrigation cross the plain in every direction, and even wind up the sides of the hills. The ancient cisterns are numerous; they are frequently divided into several chambers, adorned with pillars, and coated with a cement harder than stone. But the monuments of Marmarica possess none of

the elegant and classic character of those of Cyrene, being ruder, and more in the Egyptian style. (*Pachó, Voyage dans la Marmarique*, p. 63, *seqq.*) The inhabitants of this region are entirely Bedouins, chiefly of the great tribe of Welled Ali, and are supposed by M. Pachó not to exceed 38,000. (*Modern Traveller*, pt. 50, p. 182, *seqq.*)

MARMARIDÆ, the inhabitants of Marmarica.

MARMARIUM, a place in the immediate vicinity of Carystus, in Eubœa, which furnished the valuable marble for which Carystus was famed. A temple was erected here to Apollo Marmarus. Marmarium was exactly opposite to Halæ Araphenides in Attica. (*Strabo*, 446.—*Cramer's Anc. Greece*, vol. 2, p. 142.)

MARO. *Vid. Virgilius.*

MARON, I. a priest of Apollo in Thrace, near Maronea. (*Hom.*, *Od.*, 9, 197.)—II. A follower of Osiris, well acquainted with the art of rearing the vine. (*Diod. Sic.*, 1, 18.) Athenæus (1, 25) makes him a follower of Bacchus. He was fabled to have been the founder of Maronea in Thrace. (Consult *Wesseling's note, ad Diod.*, l. c.)

MARONÆA, a town of Thrace, southeast of the Bistonis Palus, on the coast. It was a place of some note, and is mentioned by Herodotus (7, 109), Scylax (p. 27), Strabo (*Epit.*, 7, p. 331), and several other writers. Diodorus Siculus (1, 18) reports that it was founded by Maron, a follower of Osiris (*vid. Maron*), but Scymnus affirms (v. 675) that it was a colony of Chios. Pliny states that the more ancient name was Ortogures (4, 11). The same writer extols the excellence of its wine (14, 4), whence a comic writer, quoted by Athenæus (8, 44), styled it a tavern. Maronea, taken in the first Macedonian war by Philip, king of Macedon (*Liv.*, 81, 16), and his retaining possession of it, was subsequently made a cause of complaint against him at Rome (39, 24). According to Mela, it was situated near a small river named Schœnus. Its ruins are still called *Marogna*. (*Cramer's Anc. Greece*, vol. 1, p. 313.)

MARPESSA, daughter of Evenus, was beloved by Apollo, whose suit was favoured by her father. Idæa, another applicant for her hand, having obtained a winged chariot from Neptune, carried off the apparently not reluctant maid. Her father pursued the fugitives, but, coming to the river Lycornas, and finding his progress stopped by it, he slew his horses and cast himself into the stream, which from him derived its name Evenus. Meantime Apollo met and took the fair prize from Idæa. The matter being referred to Jupiter, he allowed the maiden to choose for herself; whereupon, fearing that when she grew old Apollo would desert her, she wisely chose to match with her equal, and gave her hand to her mortal lover. (*Apollod.*, 1, 1, 7.—*Schol. ad Il.*, 9, 557.—*Keightley's Mythology*, p. 119, *seq.*)

MARPESSUS, I. a town of Troas, to the north of the Scamander, and to the west of Troja Vetua. (*Tibull.*, 2, 5, 67.)—II. or Marpessa (Μάρπησσα), a mountain in the island of Paros, containing the quarries whence the famous Parian marble was obtained. Hence the expression of Virgil, *Marpesia cautes* (*Æn.*, 6, 471.—Compare *Plin.*, 36, 4.—*Jornand., de Reb. Get.*, p. 88). This mountain was situate to the west of the harbour of Marmora. Dr. Clarke gives *Capresso* as the modern name. (*Travels*, vol. 6, p. 134, *Lond. ed.*)

MARRUCINI, a people of Italy, occupying a narrow slip of territory on the right bank of the river Aternus, between the Vestini to the north and the Frentani to the south, and between the Peligni and the sea towards the east and west. Cato derived their origin from the Marsi (*ap. Priscian.*, c. 8). Like that people, they were accounted a hardy and warlike race, and with them they made common cause against the tyranny of Rome. An idea may be formed of the population and force of the several petty nations in this quarter of

Italy, from a statement of Polybius (2, 24), where that historian, in enumerating the different contingents which the allies of the Romans were able to furnish about the time of the second Punic war, estimates that of the Marsi, Marrucini, Vestini, and Frentani, at 20,000 foot and 4000 horses. The only city of note which we find ascribed to the Marrucini, is Teate, now Chieti, on the right bank of the Aterno. (*Cramer's Anc. Italy*, vol. 1, p. 339.)

MARRUVIUM, I. a town of the Sabines, answering to the modern *Morro Vecchio*.—II. The capital of the Marsi, situate on the eastern shore of the Lacus Fucinus, and corresponding to the modern *San Benedetto*. (*Strabo*, 241.—*Plin.*, 3, 12.—*Cramer's Anc. Italy*, vol. 1, p. 328.)

MARS (in Greek 'Αρης), the god of war, about whose parentage different accounts are given. Homer (*Il.*, 5, 892, *seqq.*) and Hesiod (*Theog.*, 932) make him to have been the offspring of Jupiter and Juno. Others say that he was the son of Enyo or Bellona. (*Schol. ad Il.*, l. c.) Ovid, however, gives a different version of the fable. According to this poet, Juno wished to become a mother by herself, just as Jupiter had become a father in the case of Minerva. On applying to Flora for aid in the accomplishment of her design, the latter directed her to pluck a certain flower which grew near the city of Olenus, the touch of which would make her instantly a mother. Juno obeyed, and straightway conceived the god Mars. (*Ovid, Fast.*, 5, 227, *seqq.*)—The delight of Mars was in war and strife; yet his wild fury was always forced to yield to the skill and prudence of Minerva, guided by whom Diomedes, in the *Iliad*, wounds and drives him from the battle (*Il.*, 5, 855); and in the conflict of the gods (*Il.*, 21, 391), this goddess strikes him to the earth with a stone. To give an idea of his huge size and strength, the poet says, in the former case, that he roared as loud as nine or ten thousand men; and in the latter, that he covered seven plethra of ground. Terror and Fear (Δεῦρος and Φόβος), the sons of Mars, and Strife (Ερις), his sister, accompany him to the field when he seeks the battle. (*Il.*, 4, 440.) Another of his companions is Enyo (Ενύω), the daughter of Phorcys and Ceto, according to Hesiod (*Theog.*, 273), a war-goddess answering to the Bellona of the Romans. The name Enyalios, which is frequently given to him in the *Iliad*, corresponds with hers.—The figurative language, which expresses origin and resemblance by terms of paternity, gave a mortal progeny to Mars. As a person who came by sea was figuratively called a son of Neptune, so a valiant warrior was termed a son, or, as it is sometimes expressed by Homer, a branch or shoot of Mars (βκος Ἀρης). But the only tale of his amours related at any length by the poets, is that in the case of Venus. (*Hom.*, *Od.*, 8, 266, *seqq.*—*Ovid, A. A.*, 2, 561.) This tale is an evident interpolation in the *Odyssey*, where it occurs. Its date is uncertain; though the language, the ideas, and the state of society which it supposes, might almost lead us to assign its origin to a comparatively late period. It is generally supposed to be a physical myth, or, rather, a combination of two such myths; for beauty might naturally have been made the spouse of the god, from whose workshop proceeded so many elegant productions of art; and, as we are about to show, another physical view might have led to the union of Mars and Venus. Hesiod, for example, says (*Theog.*, 937) that Harmonia (Order) was the daughter of Mars and Venus. This has evidently all the appearance of a physical myth, for from Love and Strife (i. e., attraction and repulsion), arises the order or harmony of the universe. (*Plut., de Is. et Os.*, 48.—*Aristot., Pol.*, 2, 6.—*Welcker, Kret. Kol.*, 40.) Terror and Fear are also said by Hesiod (*Theog.*, 934) to have been the offspring of Mars and Venus, of whose union with Vulcan (to whom he gives a different

spouse) he seems to have known nothing. In the *Iliad* we may observe that Mars and Venus are spoken of as brother and sister, much in the same manner as Apollo and Diana. (*Il.*, 5, 359, *seq.*—*Il.*, 21, 416, *seqq.*)—The best known of the children of this god by mortal women were Ascalaphus and Ialmenus, Ctenomachus, king of Pisa, Diomedes of Thrace, Cycnus, Phlegyas, Dryas, Parthenopæus, and Tereus. He was also said to be the sire of Meleager and other hero-princes of Ætolia. The temples and images of Mars were not numerous. He was represented as a warrior, of a severe and menacing air, dressed in the heroic style, with a cuirass on, and a round Argive shield on his arm. His arms are sometimes borne by his attendants. (*Keightley's Mythology*, p. 104, *seqq.*)

MARSACI, a people of Gallia Belgica, of German origin, and belonging to the great tribe of the Istævones. According to Wilhelm (*Germanien und seine Bewohner*, Weimar, 1828), they occupied the islands between the mouths of the *Mase* and *Scheld*. Wersebe, however (*über die Völker des Alten Teutischlands*, Harnover, 1826), makes their territory correspond to the modern province of *Utrecht*. They are mentioned by Tacitus (*Hist.*, 4, 56) and Pliny (4, 29).

MARSI, I. a people in the northwestern part of Germany, belonging to the great tribe of the Istævones. They appear to have been originally settled on both banks of the *Lippe*, whence they spread south to the *Tencheri*. Weakened by the Roman arms, they retired into the interior of Germany, and from this period disappeared from history. (*Mannert, Geogr.*, vol. 3, p. 168.)—II. A nation of Italy, whose territory lay to the northeast of Latium, and southeast of the country of the Sabines. Though inconsiderable as a people, they are yet entitled to honourable notice in the page of history, for their hardihood and warlike spirit. Their origin, like that of many other Italian tribes, is enveloped in obscurity and fiction. A certain Phrygian, named Marsyas, is said to have been the founder of their race (*Solin.*, 8); by others Marsus, the son of Circe (*Plin.*, 7, 2), and hence they are represented as enchanters, whose potent spells deprived the viper of its venom, or cured the hurt which it might have caused. (*Virg., Æn.*, 7, 750.—*Sil. Ital.*, 8, 497.)—We do not find the Marsi engaged in war with Rome before A.U.C. 445, when they were defeated and forced to sue for peace. (*Livy*, 9, 41.) Six years after they again assumed a hostile character, but with as little success; they were beaten in the field, and lost several of their fortresses. (*Liv.*, 10, 3.) From that time we find them the firm and staunch allies of Rome, and contributing by their valour to her triumphs, till her haughty and domineering spirit compelled them and most of the other neighbouring people to seek, by force of arms, for that redress of their wrongs, and that concession of privileges and immunities, to which they were justly entitled, but which was not to be granted to their entreaties. In the war which ensued, and which, from that circumstance, is called the *Marsic* as well as *Social War*, the Marsi were the first to take the field under their leader Silus Pompædus, A.U.C. 661. Though often defeated, the perseverance of the allies was at last crowned with success, by the grant of those immunities which they may be said to have extorted from the Roman senate, A.U.C. 665. (*Strabo*, 241.—*Vell. Patere.*, 2, 16.—*Appian, Bell. Civ.*, 1, 39.—*Liv., Epit.*, 72.) The valour of the Marsi is sufficiently indicated by the proverbial saying which Appian records (*Bell. Civ.*, 1, 46), "that there was no triumph to be obtained either over the Marsi or without their aid: οὐκ ἐκείνους, οὐκ ἄνευ Μάρσων, γερτοῦναι θρίαμβον." (*Cramer's Anc. Italy*, vol. 1, p. 325, *seqq.*)

MARSYAS, I. a satyr of Phrygia, son of Olympus, who, having found the pipe which Minerva, for fear of injuring her beauty, had thrown away, contended with

Apollo for the palm in musical skill. The Muses were the umpires, and it was agreed that the victor might do what he pleased with the vanquished. Marsyas lost, and Apollo flayed him alive for his temerity. The tears of the nymphs and rural deities for the fate of their companion gave origin, it was fabled, to the stream which bore his name; and his skin was said to have been hung up in the cave whence the waters of the river flowed. (*Apollod.*, 1, 4, 2.—*Pausan.*, 2, 7, 9.—*Plut.*, *de Fluv.*, 10.—*Hygin.*, *fab.*, 165.—*Ovid.*, *Mét.*, 8, 282, *seqq.*—*Xen.*, *Anab.*, 1, 2, 8.)—It seems, according to the ancient mythological writers, that, in the contest above alluded to, Apollo played at first a simple air on his instrument; but Marsyas, taking up his pipe, struck the audience so much with the novelty of its tone and the art of his performance, that he seemed to be heard with more pleasure than his rival. Having agreed upon a second trial of skill, it is said that the performance of Apollo, by his accompanying the lyre with his voice, was allowed greatly to excel that of Marsyas upon the pipe alone. Marsyas with indignation protested against the decision of his judges, urging that he had not been fairly vanquished according to the rules stipulated, because the dispute was concerning the excellence of their respective instruments, not their voices; and that it was unjust to employ two arts against one. Apollo denied that he had taken any unfair advantage, since Marsyas had used both his mouth and fingers in playing on his instrument, so that if he was denied the use of his voice, he would be still more disqualified for the contention. On a third trial Marsyas was again vanquished, and met with the fate already mentioned. (*Diod. Sic.*, 3, 58.)—The whole fable, however, admits of a very rational explanation. The pipe as cast away by Minerva, and Marsyas as punished by Apollo, are intended merely to denote the preference given, at some particular period, by some particular Grecian race, with whom the myth originated, to the music of the lyre over that of the pipe, or, in other words, to the *Oitharoedic* over the *Auletic* art. The double pipe was a Phrygian or Asiatic invention, and ascribed to a certain Marsyas. (*Diod. Sic.*, 3, 58.) The music of this instrument was generally used in celebrating the wild and enthusiastic rites of Cybele. Hence we may explain the remark of Diodorus, that Marsyas was a companion and follower of Cybele (*ἐκονούσας αὐτῇ παρακολουθεῖν καὶ συμπληροῦσθαι*, 3, 58). Subsequently, the wildness of the Bacchanalian celebrations became intermingled with the phrensied delirium that characterized the procession and the rites of Cybele. The double pipe came now to be employed in the orgies of Bacchus. The worship of this god spread over Greece, and with it was disseminated the knowledge of this instrument. To the new species of music thus introduced was opposed the old and national melody of the lyre; or, in the language of mythology, Apollo, the inventor and improver of the lyre, engaged in a stubborn conflict with Marsyas, the representative of the double pipe. Apollo conquers; that is, the pipe was long regarded by the Greeks as a barbarian instrument, and banished from the hymns and festivals of the gods: it could only find admittance into the festivals of the vintage, in the Bacchanalian orgies, and in the chorus of the drama. (*Wieland.*, *Attisches Museum*, vol. 1, p. 311, *seqq.*)—A statue of Marsyas, representing him in the act of being flayed, stood in the Roman forum, in front of the rostra. The story of Marsyas, understood in its literal sense, presents a remarkable instance of well-merited punishment inflicted on reckless presumption; and as this feeling is nearly allied to, if not actually identified with, that arrogant and ungovernable spirit which formed the besetting sin of the ancient democracies, we need not wonder that, in many of the cities of antiquity, it was customary to erect a group of Apollo and Marsyas, in the vicinity of their courts of

justice, both to indicate the punishment which such conduct merited, and to denote the omnipotence of the law. Servius (*ad Virg.*, *Æn.*, 4, 58) alludes to the custom of which we have just made mention. His explanation, however, shows that he only half understood the nature of the allegory: "*Marsyas per civitates in foro positus libertatis indicium est.*"—II. A river of Phrygia, rising, according to Xenophon, in a cavern under the Acropolis of Celæne, and falling into the Mæander. (*Anab.*, 1, 2, 8.) Here, as the same writer informs us, Apollo contended with Marsyas, and hung up the skin of his vanquished antagonist in the cavern whence the river flowed. The following remarks of Mr. Leake appear worthy of insertion. "According to Xenophon, the Mæander rose in the palace of Cyrus, flowing thence through his park and the city of Celæne: and the sources of the Marsyas were at the palace of the King of Persia, in a lofty situation under the Acropolis of Celæne. From Arrian (1, 29) and Quintus Curtius (3, 1) we learn, that the citadel was upon a high and precipitous hill, and that the Marsyas fell from its fountains over the rocks with a great noise: from Herodotus (7, 26) it appears, that the same river was from this circumstance called Catarrhaetes; and from Strabo (578), that a lake on the mountain above Celæne was the reputed source both of the Marsyas, which rose in the ancient city, and of the Mæander. Comparing these authorities with Livy (88, 38), who probably copied his account from Polybius; with Pliny (5, 29); with Maximus Tyrius (8, 8); and with the existing coins of Apamea, it may be inferred, that a lake or pool on the summit of a mountain which rose above Celæne, and which was called Celæne or Signia, was the reputed source of the Marsyas and Mæander; but that, in fact, the two rivers issued from different parts of the mountain below the lake; that the lake was named Aulocrene, as producing reeds well adapted for flutes, and that it gave the name of Aulocrenis to a valley extending for ten miles from the lake to the eastward; that the source of the Marsyas was in a cavern on the side of a mountain in the ancient agora of Celæne, and that the Marsyas and Mæander, both of which flowed through Celæne, united a little below the ancient site." (*Leake's Journal*, p. 156, *seqq.*)—III. A river of Caria, mentioned by Herodotus (5, 118) as flowing from the country of Idrias into the Mæander. Idrias was one of the earlier names of the city which, under the Macedonians, assumed the name of Stratonice. The Marsyas of Herodotus is supposed, therefore, to be the same with the modern *Tekina*. (*Barbié du Bocage.*—*Voyage de Chandler*, vol. 2, p. 252.—*Leake's Journal*, p. 234.)—IV. A native of Pella, brother of Antigonus. He wrote, in ten books, a *History of the Kings of Macedon*, from the origin of the monarchy to the founding of Alexandria; and also a work on the *Education of Alexander*, with which prince he had been brought up. The loss of both these works, but particularly the latter, is much to be regretted. Marsyas is also named among the grammarians, and Suidas calls him *γροματοδιδάσκαλος*, "a master of a school." (*Schöll*, *Hist. Lit. Gr.*, vol. 3, p. 207.)

MARTIA or MARCIA AQUA, a name given to the water conveyed to the city by one of the Roman aqueducts. This water was considered the most wholesome of any brought to Rome. The history of the Marcian aqueduct is as follows: Previous to its erection, the Romans obtained their supply of water from the Aqua Appia and Anio Vetus. At the end, however, of 127 years after the erection of the two last-mentioned aqueducts, their channels had become decayed, and much of their water was abstracted by the fraud of private individuals. The prætor Quintus Marcius Rex was thereupon appointed by the senate to repair the injuries sustained by the old aqueducts; in addition to which, he also constructed a new one,

which was ever after called from him the Aqua Marcia. Pliny, however, states that the Aqua Marcia was first conveyed to Rome by Ancus Marcius; and that Quintus Marcius Rex merely re-established the conduits. The same writer informs us that the earlier name of the water was Sausoia. (*Plin.*, 31, 24.)—The Marcian water was obtained from the little river Pitonius, now *Giovenco*. This stream entered the Lacus Fucinus on the northeast side, and was said not to mix its waters, the coldest known, with those of the lake. According to the same popular account, it afterward emerged by a subterranean duct near Tibur, and became the Aqua Marcia. (*Cramer's Anc. It.*, vol. 1, p. 327.—*Burgess, Antiq. of Rome*, vol. 2, p. 328.)

MARTIALIS, MARCUS VALERIUS, a Latin epigrammatic poet, born at Bilbilis in Spain, about A.D. 40. Rader fixes his birth at A.D. 43; while Masson (*Vit. Plin.*, p. 112) makes him not to have died before A.D. 101.—Very few particulars of his life are ascertained, and even these are principally collected from his own writings. He was destined originally for the bar, but showed little disposition to apply himself to such a career. In order to complete his education, Martial was sent to Rome. It was at the age of about twenty-two years, and in the sixth year of Nero's reign, that he established himself in the capital. Here he gave himself up entirely to poetry, which he made a means of subsistence, for he was compelled to live by his own exertions. Titus and Domitian both favoured him, and the latter bestowed on him the rank of an *eques* and the office of a tribune, granting to him at the same time all the privileges connected with the *Jus trium liberorum*. After having passed thirty-five years at Rome, he felt desirous of visiting his native country. Pliny the younger supplied him with the necessary means for travelling. Having reached Spain, he there, according to some critics, married a rich female named Marcella, who had possessions on the Bilbilis or *Salon*, and lived many years in the enjoyment of conjugal happiness. The conclusion, however, to be drawn from his writings rather favours the supposition that such an union did not take place. Martial was acquainted with most of his literary contemporaries, Juvenal, Quintilian, Pliny the younger, and others, as appears from his own writings. (*Ep.*, 2, 90; 12, 18, &c.)—We have about 1200 epigrams from the pen of Martial: they form fourteen books, of which the last two are entitled *Xenia* and *Apophoreta* respectively, from the circumstance of their containing mottoes or devices to be affixed to presents offered to his friends, or distributed at the Saturnalia and other festivals. These fourteen books are preceded by one under the title of *Spectacula*, containing epigrams or small pieces on the spectacles given by Titus and Domitian. These are not all productions of Martial; but it is very possible that he may have made and published the collection.—The greater part of Martial's epigrams are of a different kind from those of Catullus. They approach more nearly to the modern idea of epigram, for they terminate with a point for which the author reserves all the edge and bitterness of his satire. Among the numerous epigrams which Martial has left behind him, there are some that are excellent; of the collection as a whole, however, we may say, in the words of the poet himself (1, 17): "*Sunt bona, sunt quedam mediocritas, sunt mala plura.*" Many of these epigrams have lost their point for us, who are ignorant of the circumstances to which they allude. A large portion, moreover, are disgustingly obscene. Besides the epigrams which form the collection here referred to, there are others ascribed to Martial, which Burmann has inserted in his *Anthology*, vol. 1, p. 237, 340, 470, 471.—The best editions of Martial are, that of Rader, *Ingolst.*, 1602, 1611, fol., *et Mogunt.*, 1627; that of Scriverius, *Lugd. Bat.*, 13mo, 1619; that of Smidius, *Amst.*, 8vo, 1701; and that of Lemaire, 2

vols. 8vo, *Paris*. (*Schöll, Hist. Lit. Rom.*, vol. 2, p. 348.)

MARULLUS, a tribune of whom Plutarch makes mention in his life of Julius Cæsar. Marullus and another of his colleagues, named Flavius, when the statues of Cæsar were seen adorned with royal diadems, went and tore them off. They also found out the persons who had saluted Cæsar king, and committed them to prison. The people followed with joyful acclamations, calling the tribunes Brutuses; but Cæsar, highly irritated, deposed them from office. (*Plut., Vit. Cæs.*)

MASÆSYLI or MASÆSYLI, a people in the western part of Numidia, on the coast, between the river Mulucha and the promontory Masylibum or Musulubium. (*Polyb.*, 3, 33.—*Dionys. Perieg.*, 187.—*Sallust, Jugurth.*, c. 92.—*Liv.*, 28, 17.) They were under the dominion of Syphax. The promontory of Tretum, now *Schda-Kuz*, or the *Seven Capes*, separated this nation from the Masæyli, or subjects of Masinissa.

MASCA or MASCAR, a river of Mesopotamia, falling into the Euphrates, and having at its mouth the city Corsote, which it surrounded in a circular course. Mannert, after a review of the several authorities which have a bearing on the subject, charges D'Anville with an error in placing the Masca too far to the west of Anatho, and in fixing this latter place at too great a distance from the Chaboras, since Isidorus makes the intervening space only 29 miles, whereas, on D'Anville's chart, it is 35 geographical miles. D'Anville also is alleged to err in giving the Euphrates too large a bend to the southwest of Anatho. The river Masca is termed by Ptolemy the Saocoras. Mannert thinks that the Masca was nothing more than a canal from the Euphrates. (*Mannert, Anc. Geogr.*, vol. 5, p. 323.)

MASINISSA, king of Numidia, was the son of Gula, who reigned among the Masæyli in the eastern portion of that country. (*Liv.*, 24, 48, *seq.*) Masinissa was educated at Carthage, and became, though still quite young, enamoured of Sophonisba, daughter of Hasdrubal, who promised him her hand. Urged on by his passion, and wishing, moreover, to signalize himself by some deed of renown, the young prince prevailed upon his father to declare against Rome and in favour of Carthage. This was at the commencement of the second Punic war, and Masinissa was only seventeen years of age, but even then gave great promise of future eminence. (*Liv.*, 24, 49.) Having attacked Syphax, another monarch, reigning over the western part of Numidia, and then in alliance with the Romans, he gained over him two great victories, and afterward, passing the straits, united his forces with those of the Carthaginians in Spain. Hannibal was at that time carrying all before him in Italy, while Hasdrubal his brother was defending Spain. Not long after his arrival, Masinissa contributed essentially to the entire defeat of Cneus and Publius Scipio, by charging the Roman army with his Numidian horse, B.C. 212; but, after some other less successful campaigns, both he and his allies were compelled to yield to the superior ability of the young Scipio, afterward surnamed Africanus, and to abandon to him almost the whole of the peninsula. Having retreated towards the frontiers of Bætica, the Carthaginians were reduced to the greatest extremity, when Scipio made prisoner of Masinissa, the nephew of Masinissa, and sent him back to his uncle loaded with presents. The hostility of Masinissa towards the Romans immediately changed into the warmest admiration: he had a secret conference with Scipio near Gades, which was eventually followed by his complete defection from the Carthaginian cause. It is more than probable that the Numidian prince was long before secretly disposed to this step, in consequence of the bad faith of Hasdrubal, who had offered his daughter Sophonisba in

marriage to Syphax. However this might have been, Masinissa, before declaring openly against Carthage, made a secret treaty with the Romans, and advised Scipio, it is said, to carry the war into Africa. Returning to this country himself, he found his kingdom a prey to usurpers, his father and elder brother having both died during his absence. With the aid, however, of Bocchus, king of Mauretania, he obtained possession of his hereditary throne, and would have enjoyed it peaceably, if the Carthaginians, irritated at his now open avowal for the Romans, had not incited Syphax to make war upon him. Defeated and stripped of his dominions, Masinissa was compelled to take refuge near the Syrtis Minor, where he defended himself until the arrival of Scipio. The aspect of affairs immediately changed, and Masinissa, by his valour and skill, contributed greatly to the victory gained by Scipio over Hasdrubal and Syphax. Having been sent with Lælius in pursuit of the vanquished, he penetrated, after a march of fifteen days, to the very heart of his rival's kingdom, gained a battle against him, made himself master of Cirta, the capital of Syphax, and found in it Sophonisba, to whom, as we have said, he had been attached in early youth. The charms of the daughter of Hasdrubal proved too powerful for the Numidian king, and he married her at once, in the hope of rescuing her from slavery, since she belonged to the Romans by the right of conquest. This imprudent union, however, with a captive whose hatred towards Rome was so deep-rooted, could not but prove displeasing to Scipio, and Masinissa was severely reprovved in private by the Roman commander. The Numidian, in his despair, sent a cup of poison to his bride, who drank it off with the utmost heroism. (*Liv.*, 30, 15.) To console him for his loss, Scipio bestowed upon Masinissa the title of king and a crown of gold, and heaped upon him other honours; and these distinctions, together with the hope of soon seeing himself master of all Numidia, caused the ambitious monarch to forget the death of Sophonisba. Constantly attached to the fortunes of Scipio, Masinissa fought on his side at the battle of Zama, defeated the left wing of the enemy, and, though severely wounded, nevertheless went in pursuit of Hannibal himself, in the hope of crowning his exploits by the capture of this celebrated commander. Scipio, before leaving Africa, established Masinissa in his hereditary possessions, and added to these, with the authority of the senate, all that had belonged to Syphax in Numidia. Master now of the whole country from Mauretania to Cyrene, and become the most powerful prince in Africa, Masinissa profited by the leisure which peace afforded him, and exerted himself in introducing among his semi-barbarous subjects the blessings of civilization. Neither age, however, nor the tranquil possession of so extensive a territory, could damp his ardour for conquest. Imboldened by his relations with Rome, he violated the treaties subsisting between himself and the Carthaginians, and, although in his ninetieth year, placed himself at the head of a powerful army and marched into the territories of Carthage. He was preparing for a general action when Scipio Æmilianus arrived at his camp, having come from Spain to visit him. Masinissa received the young Roman with distinguished honours, alluded with tears to his old benefactor Africanus, and afterward caused the élite of his troops to pass in review before the son of Paulus Æmilius. The young Scipio was most struck, however, by the activity and address of the monarch himself, whose physical powers seemed but little impaired by age, who still performed all the exercises of youth, and mounted and rode his steed with all the spirit of earlier years. On the morrow Scipio was the witness of one of the greatest conflicts that had ever taken place in Africa, which, after having been maintained for a long time on both sides with the utmost

obstinacy, was decided at last in favour of Masinissa. A second battle, equally disastrous for Carthage, soon followed, and peace was concluded on such terms as it pleased Masinissa to dictate. Not long after this the third Punic war broke out; but the Numidian monarch did not live to see the downfall of Carthage, having expired a short time before its capture, at the age of ninety-seven, and after a reign of sixty years. Masinissa was remarkable for his abstemious mode of life, which, joined to his habits of constant exercise, enabled him to enjoy so protracted an existence. He left fifty-four sons, only three of whom, Micipsa, Gullussa, and Mastanabal, were legitimate. Scipio, who had been requested to do so by Masinissa, divided the kingdom among these three, and assigned considerable revenues to the others. (*Liv.*, lib. 24, 25, 28, &c. — *Polyb.*, lib. 11, 14, 15, &c. — *Biogr. Univ.*, vol. 27, p. 364, *seqq.*)

MASSAGETÆ, a nation of Scythia, placed by the ancient writers to the east of the river Iaxartes. The Macedonians sought for the Massagetæ in the northern regions of Asia, judging from the history of Cyrus's expedition against these barbarians, by which some definiteness was given to the position which they occupied. They missed, indeed, the true Massagetæ, but the term became a general one for the northern nations of Asia, like that of Scythians. Larcher considers the term Massagetæ equivalent probably to "Eastern Goths." (*Hist. d'Herodote*, vol. 8, p. 323, *Table Géographique*.) According to Herodotus, the Massagetæ occupied a level tract of country to the east of the Caspian. (*Herod.*, 1, 201.) Halling takes the Massagetæ for Alans, and refers to Ammianus Marcellinus (23, 14; 31, 2) in support of his opinion. (*Wien-Jahr.*, 68, p. 131.) Gatterer, on the other hand, thinks that they occupied the present country of the *Kirghiz Tatars*. (*Comment. Soc. Göt.*, 14, p. 9. — *Bähr*, *ad Herod.*, l. c.)

MASSÆTÆ. *Vid.* *Masseylii*.

MASSICUS, **MOWS**, a range of hills in Campania, famous for the wines produced there. Consult remarks under the article *Falerus*, near the beginning (p. 515, col. 2).

MASSILIA, by the Greeks called *Massalia* (*Μασσαλία*), a celebrated colony of the Phocæans, on the Mediterranean coast of Gaul, now *Marseille*. The period of its settlement appears to have been very remote. Scymnus of Chios (v. 210), Livy (5, 34), and Eusebius, agree in placing it in the 45th Olympiad, during the reign of Tarquinius Priscus. Their common authority appears to have been Timæus; at least Scymnus mentions him. — The circumstances connected with the founding of Massilia will be seen under the article *Phocæa*. The natives endeavoured to prevent the establishment of this colony, but, according to Livy (5, 34), the Phocæans were enabled to make an effectual resistance, and to fortify their position, by the aid of a body of Gauls. (Compare the account of *Justin*, 43, 3, 4.) Massilia soon became a powerful and flourishing city, and famed for its extensive commerce. It engaged in frequent contests with Carthage, its maritime rival, and sent out many colonies, from Emporæ in Spain as far as Monæcus in Italy. (*Strabo*, 180.) The most prosperous period in the history of Massilia would seem to have been the interval from the fall of Carthage to the commencement of the contest between Cæsar and Pompey. This city was always the firm ally of Rome. The origin of its friendship with the Romans is not clearly ascertained: Justin, or, rather, Troguus Pompeius (43, 3), dates it from the reign of Tarquinius Priscus, but this appears deserving of no credit. (*Manert*, *Geogr.*, vol. 2, p. 83, *seqq.*) It is more than probable, that the friendship in question began about the end of the first Punic war. Before this war we hear nothing of the Massilians in Roman history, and

previous to the commencement of the second Punic contest we find them the allies of the Romans. (*Liv.*, 21, 20.) The political importance of this city received a severe check in the civil war between Cæsar and Pompey, in consequence of its attachment to the party of the latter. It had to sustain a severe siege, in which its fleet was destroyed, and, after surrendering, to pay a heavy exaction. (*Cæs., Bell. Civ.*, 2, 22.) The conqueror, it is true, left the city the title of freedom, but its power and former importance were gone. The downfall of its political consequence, however, was succeeded by distinguished eminence in another point of view, and already, in the days of Augustus, Massilia began to be famous as a school of the sciences, and the rival of Athens. Even in a much later age, though surrounded by barbarous tribes, she continued to enjoy her literary rank, and was also remarkable for the culture of philosophy and the healing art. Massilia remained a flourishing city until the inroads of the barbarians and the subjugation by them of nearly the whole of southern Gaul. The government of the place was a well-regulated aristocracy. (*Mannert, Geogr.*, vol. 2, p. 81, *seqq.*)

MASSYLII, a people of Numidia, to the east of the Massesyli and Cape Tretum. They were the subjects of Masinissa. (*Liv.*, 24, 48.—*Polyb.*, 3, 33.—*Sil. Ital.*, 16, 170.)

MATINUM, a city of Messapia or Iapygia, southeast of Callipolis. Near it was the Mons Martinus. It was here, according to Horace, that the celebrated philosopher, Archytas of Tarentum, was interred, when cast on shore after shipwreck. (*Od.*, 1, 28.) This region was famed for its bees and honey. The modern *Matinata* seems to mark the site of the ancient city. (*Cramer's Anc. Italy*, vol. 2, p. 277.)

MATRŌNA, a river of Gaul, now the *Marne*, which formed part of the ancient boundary between Gallia Belgica and Gallia Celtica. It takes its rise at *Langres*, runs northwest to *Chalons*, then westward, passes by *Meaux*, becomes navigable at *Vitry*, and at *Charenton*, a little above *Paris*, falls into the *Seine* or *Seine*, after a course of about 92 leagues. (*Cæs., B. C.*, 1, 1.—*Auson., Mosel.*, v. 461.—*Ammian. Marcell.*, 15, 27.—*Sidon., Panegy. Marjorian.*, 208.)

MATRONALIA, a festival celebrated at Rome on the Calends, or first of March, and on this same occasion presents used to be given by husbands to their wives. The day is said to have been kept sacred in remembrance chiefly of the reconciliation between the Romans and the Sabines. On this same day, also, a temple had been dedicated by the Roman ladies to Juno Lucina, on the Esquiline Hill, and here they presented their annual offerings. (*Ovid, Fast.*, 3, 170, *seqq.*) From this last-mentioned circumstance, and particularly from a part of the passage last referred to (v. 235, *seqq.*), the true reason of the celebration may perhaps be inferred. Ovid speaks of offerings of flowers made on this occasion to Juno.

MATTIACI, a nation in the western quarter of Germany; according to Wilhelm (*Germanien und seine Bewohner, Weimar*, 1823), a branch of the Catti, between the *Lahn* and *Maine*, in the country between *Mayence* and *Coblenz*; but, according to Kruse, lying between the *Maine*, the *Taunus*, and the *Rhine* (*Archiv. für alte Geogr.*). The *Aque Mattiacæ* correspond to the modern *Wiesbaden*. (*Ammian. Marcell.*, 29, 20.)

MATRŪTA, a deity among the Romans, the same as the *Leucothoë* of the Greeks. (*Vid. Ino and Lencothoë.*)

MAVORS, a name of Mars. (*Vid. Mars.*)

MAURI, the inhabitants of Mauritania. Bochart derives the name from *Mahur*, or, as an elision of gutturals is very common in the Oriental languages, from *Maur*, i. e., one from the west, or an occidentalist, 804

Mauritania being west of Carthage and Phœnicia. (*Geogr. Sacr.*, 1, 25.—*Op.*, vol. 2, c. 496.)

MAURITANIA, a country of Africa, on the Mediterranean, now the empire of *Fez* and *Morocco*. It was bounded on the north by the Straits of Gibraltar and the Mediterranean, on the east by Numidia, on the south by Gætulia, and on the west by the Atlantic. It was, properly speaking, in the time of Bocchus the betrayer of Jugurtha, bounded by the river Mulucha or Molochath, now *Malva*, and corresponded nearly to the present kingdom of *Fez*; but, in the time of the Emperor Claudius, the western part of Numidia was added to this province under the name of Mauritania Cæsariensis, the ancient kingdom of Mauritania being called Tingitana, from its principal city Tingis, or *Old Tangier*, on the west of the straits. (*Plin.*, 5, 1.—*Cæs., Bell. Civ.*, 1, 6.—*Id., Bell. Afric.*, 23.—*Mela*, 1, 5.—*Id.*, 3, 10.—*Vid. Mauri and Mauræi.*)

MAURVS TERENTIŪS, a Latin grammarian, generally supposed to have been an African by birth. The time when he flourished has been made a matter of dispute. Vossius supposes him to have been the same Terentianus who is addressed by Martial as the prefect of Syene in Egypt. (*Ep.*, 1, 87.) Terentianus declares himself a contemporary of Septimius Serenus, which latter poet Wernsdorff refers to the age of Vespasian. (*Poet. Lat. Min.*, vol. 3, p. 249.) He at all events lived during or before the time of St. Augustine, since he is mentioned by the latter in terms of the highest respect. (*De Civ. Dei*, 6, 2.—*De Util. Cred.*, c. 17.) Terentianus, when advanced in life, wrote a poem on letters, syllables, feet, and metres (*"De Litteris, Syllabis, Pedibus et Metris Carmen"*), in which these dry topics are handled with all the art of which they are susceptible. This poem is extremely useful for a knowledge of Latin Prosody: the author unites in it example and precept, by employing, for the explanation of the various metres, verses written in the very measures of which he treats.—The most recent editions of the poem in question are, that of Santen, completed by Van Lennep, *Traj. ad Rhem.*, 1825, and that of Lachmann, *Lips.*, 1836. It is given also among the Latin grammarians, *ed. Putsch.*, p. 2383, *seqq.*, and in the *Corpus Poetarum* of Maittaire.

MAURVSII, a poetical name for the people of Mauritania.

MAVSŌLVS, a prince of Caria, the brother and husband of Artemisia. His death was deeply lamented by the latter, who caused a splendid monument to be erected to his memory. (*Vid. Artemisia I., Halicarnassus, and Mausoleum.*)

MAVSOLĒVM, I. (*Μαυσωλειον*, scil. *μνηστειον*, "*the tomb of Mausolus*"), a magnificent monumental structure, raised by Artemisia in memory of her husband Mausolus, king of Caria, in the city of Halicarnassus, B.C. 353. Of this monument, once reckoned among the wonders of the world, no remains now exist; but, from Pliny's description (36, 5), it appears to have been nearly square in its plan, measuring 113 feet on its sides, and 93 on each of its ends or fronts, and to have been decorated with a peristyle of 36 columns (supposed by Hardouin to have been 60 feet high or more), above which the structure was carried up in a pyramidal form, and surmounted at its apex by a marble quadriga executed by Pythis, who, according to Vitruvius, was joint architect with Satyrus in the building. It was farther decorated with sculptures and reliefs by Scopas, Bryaxis, Timotheus, and Leochares. The entire height was 140 feet.—II. The Mausoleum erected at Babylon by Alexander the Great, in honour of Hephæstion, appears to have been still more magnificent, and somewhat extravagant in its decorations, as far as can be gathered from the account given of it by Diodorus Siculus (17, 115). It

was adorned below by gilded rostra or beaks of 240 ships, and every successive tier or story was enriched with a profusion of sculpture, representing various animals, fighting centaurs, and other figures, all of which were gilded; and on the summit were statues of sirens, made hollow, in order that the singers who chanted the funeral dirge might be concealed within them.—III. The Mausoleum of Augustus at Rome was a structure of great magnitude and grandeur, and circular in plan. It stood in the Campus Martius, where remains of it yet exist in the two concentric circles forming the first and second stories of the building, and the vaulted chambers between, which supported the first or lowest terrace. Of these terraces there were three; consequently, four stages in the building, gradually decreasing in diameter, the uppermost of which was crowned with a colossal statue of the emperor. The terraces themselves were planted with trees. From traces of something of the kind that yet remain, it is conjectured that there was originally an advanced portico attached to the building, in the same manner as that of the Pantheon, though considerably smaller in proportion to the rest of the plan, as it could not have been carried up higher than the first stage of the building. According to Hirt's representation of it, in his "*Baukunst bei den Alten*," it was a Corinthian hexastyle, advanced one intercolumn before the side-walls connecting it with the circular edifice behind it.—IV. The Mausoleum of Hadrian was also of great magnitude and grandeur, and, like the preceding, circular in plan. It is now converted into the Castle of St. Angelo, in which shape it is familiar to almost every one. This is a work of most massy construction, and originally presented an unbroken circular mass of building, erected upon a larger square basement, lofty in itself, yet of moderate height in proportion to the superstructure, the latter being about twice as high as the former. This nearly solid rotunda, which was originally coated with white marble, had on its summit numerous fine statues, which were broken to pieces and the fragments hurled down by the soldiers of Belisarius upon the Goths, who attempted to take the building by storm. Neither are any remains now left of the uppermost stage of the edifice, which assumed the form of a circular peripteral temple, whose diameter was about one third of the larger circle. According to tradition, its peristyle consisted of the twenty-four beautiful marble Corinthian columns which afterward decorated the Basilica of *San Paolo fuori delle Mura* (partially destroyed some few years ago by fire, but now nearly restored); and its tholos or dome was surmounted by a colossal pine-apple in bronze, now placed in the gardens of the Vatican. (*Encycl. Us. Knowl.*, vol. 16, p. 21.)

MAXENTIUS, **MARCUS AURELIUS VALERIUS**, son of Maximianus, the colleague of Dioclesian in the empire, was living in obscurity, when, after his father's abdication, and the elevation of Constantine to the rank of Cæsar, he became envious of the latter, and dissatisfied with the neglect which he experienced from Galerius. Accordingly, he stirred up a revolt among the prætorian soldiers at Rome, and was proclaimed emperor A.D. 306. Galerius, who was then in the East, sent orders to Severus Cæsar, who had the command of Italy, to march from Mediolanum to Rome with all his forces, and put down the insurrection. In the mean time, Maximianus, who lived in retirement in Campania, came to Rome, and was proclaimed emperor and colleague with his son, A.D. 307. Severus, on arriving with his troops near Rome, was deserted by most of his officers and soldiers, who had formerly served under Maximianus, and were still attached to their old general. Upon this he retired to Ravenna, which he soon after surrendered to Maximianus, on being promised his life and liberty; but

Maximianus put him to death. The latter then proceeded to Gaul, to form an alliance with Constantine, leaving Maxentius at Rome. Galerius soon after arrived in Italy with an army; but, not finding himself strong enough to attack Maxentius in Rome, and fearing the same fate as that of Severus, he made a precipitate retreat. Maximianus, returning to Rome, reigned for some months together with his son, but afterward quarrelled with him, and took refuge with Galerius, who acknowledged him as emperor. There were then no less than six emperors; Galerius, Maximianus, Constantine, Maxentius, Licinius, and Maximinus Daza. In the following year, A.D. 308, Maxentius was proclaimed consul at Rome, together with his son, M. Aurelius Romulus, who, in the ensuing year, was accidentally drowned in the Tiber. Maxentius possessed Italy and Africa; but Africa revolted, and the soldiers proclaimed as emperor an adventurer of the name of Alexander, who reigned at Carthage for three years. In the year 311, Maxentius sent an expedition to Africa, defeated and killed Alexander, and burned Carthage. Proud of his success, for which he enjoyed a triumph, Maxentius made great preparations to attack Constantine, with whom he had till then preserved the appearance of friendship. Constantine moved from Gaul into Italy, advanced to Rome, and defeated Maxentius, who was drowned in attempting to swim his horse across the Tiber, A.D. 312. (*Encycl. Us. Knowledge*, vol. 16, p. 22.)

MAXIMIANUS I., **MARCUS VALERIUS**, a native of Pannonia, born of obscure parents. He served in the Roman armies with distinction, and was named by Dioclesian his colleague in the empire, A.D. 286. The remainder of his life is given under Diocletianus, Constantinus, and Maxentius. He was put to death by Constantine, at Massilia, for having conspired against his life (A.D. 310).—II. **GALERIUS VALERIUS**, was surnamed *Armentarius* on account of his having been a herdsman in his youth. The events of his life are narrated under Diocletianus, Constantius, and Constantinus. According to historians, he died A.D. 311, of a loathsome disease, which was considered by his contemporaries and himself as a punishment from heaven for his persecution of the Christians. (*Encycl. Us. Knowl.*, vol. 15, p. 28.)

MAXIMINUS, I. **CAIUS JULIUS VERUS**, was originally a Thracian shepherd. He was of gigantic size and great bodily strength, and, having entered the Roman army under Septimius Severus, was rapidly advanced for his bravery. Alexander Severus gave him the command of a new legion raised in Pannonia, at the head of which he followed Alexander in his campaign against the Germans, when, the army being encamped on the banks of the Rhine, he conspired against his sovereign, and induced some of his companions to murder him in his tent, as well as his mother Mammea, A.D. 235. Maximinus, being proclaimed emperor, named his son, also called Maximinus, Cæsar and his colleague in the empire. He continued the war against the Germans, and devastated a large tract of country beyond the Rhine; after which he repaired to Illyricum to fight the Dacians and Sarmatians. But his cruelty and rapacity raised enemies against him in various parts of the empire. The province of Africa revolted, and proclaimed Gordianus, who was soon after acknowledged by the senate and people of Rome, A.D. 237. But Capellianus, governor of Mauritania for Maximinus, defeated Gordianus and his son, who both fell in the struggle, after a nominal reign of little more than a month. Rome was in consternation at the news, expecting the vengeance of Maximinus. The senate proclaimed as emperors Clodius Pupienus Maximus and Decimus Cælius Albinus; but the people insisted upon a nephew of the younger Gordianus, a boy twelve years of age, being associated with them.

Maximus marched out of Rome with troops to oppose Maximinus, who had laid siege to Aquileia. The latter, however, experienced a brave resistance from the garrison and people of that city, which excited still more his natural cruelty, and the soldiers, becoming weary of him, mutinied and killed both him and his son, A.D. 238. Maximinus, the father, then 65 years old, was a ferocious soldier and nothing else, and wonderful tales are related of his voracity, and the quantity of food and drink which he swallowed daily. His son is said to have been a handsome but arrogant youth. (*Jul. Capitol., Vit. Maxim. — Encycl. Œs. Knowl.*, vol. 15, p. 23.)—II. DATA or DAZA, an Illyrian peasant, served in the Roman armies, and was raised by Galerius, who was his relative, to the rank of military tribune, and lastly to the dignity of Cæsar, A.D. 303, at the time of the abdication of Dioclesian and Maximian, when he had for his share the government of Syria and Egypt. After the death of Galerius, A.D. 311, Maximian and Licinius divided his dominions between them, and Maximian obtained the whole of the Asiatic provinces. Both he and Licinius behaved ungratefully towards the family of Galerius, their common benefactor. Valeria, the daughter of Dioclesian and widow of Galerius, having escaped from Licinius into the dominions of Maximian, the latter offered to marry her, and, on her refusal, banished her, with her mother, to the deserts of Syria. He persecuted the Christians, and made war against the Armenians. A new war having broken out between Licinius and Maximian, the latter advanced as far as Adrianopolis, but was defeated, fled into Asia, and died of poison at Tarsus, A.D. 313. (*Encycl. Œs. Knowl.*, vol. 15, p. 24.)

MAXIMUS, I. MAGNUS, a native of Spain, who proclaimed himself emperor A.D. 383. The unpopularity of Gratian favoured his usurpation, and he was acknowledged by the troops. Gratian marched against him, but he was defeated, and soon after assassinated. Maximus refused the honours of burial to the remains of Gratian; and, when he had made himself master of Britain, Gaul, and Spain, he sent ambassadors into the East, and demanded of the Emperor Theodosius to acknowledge him as his associate on the throne. Theodosius endeavoured to amuse and delay him, but Maximus resolved to enforce his claim by arms, and, crossing the Alps, made himself master of Italy. Theodosius, however, marched against and besieged him in Aquileia, where he was betrayed by his own soldiers, and put to death, A.D. 383.—II. PETRONIUS, a Roman senator, twice consul, and of patrician origin. He caused the Emperor Valentinian III. to be assassinated, and ascended the throne, but was stoned to death, and his body thrown into the Tiber by his own soldiers, A.D. 455, after a reign of only 77 days. (*Procop., Bell. Vand. — Sidon., Apoll.*, 1, 23.)—III. TYRIUS, a native of Tyre, distinguished for his eloquence, and who obtained some degree of celebrity also as a philosopher of the New-Platonic school. According to Suidas, he lived under Commodus; but, according to Eusebius and Syncellus, under Antoninus Pius. The accounts of these chronologists may be reconciled by supposing that Maximus flourished under Antoninus, and reached the time of Commodus. Joseph Scaliger believed that Maximus was one of the instructors of Marcus Aurelius; and that emperor, in fact, mentions a Maximus among his preceptors; but this individual was Claudius Maximus, as we learn from a passage in Capitolinus. (*Vit. Anton., Phil.*, c. 3.) Although he was frequently at Rome, Maximus Tyrius probably spent the greater part of his time in Greece. We have from him, under the title of *Discourses* (or *Dissertations*), *Λόγοι* (or *Διαλέξεις*), forty-one treatises or essays on various subjects of a philosophical, moral, and literary nature. That he possessed the most captivating powers of elo-

quence, sufficiently appears from these elegant productions; but they are of little merit on the score of ideas. They are, for the most part, written upon Platonic principles, but sometimes lean towards scepticism. The following may serve as a specimen of the topics discussed by this writer. *Of God, according to Plato's idea. — If we must return Injury for Injury. — How we may distinguish a Friend from a Flatterer. — That an Active is better than a Contemplative Life.* (The contrary position is maintained in another discourse.)—*That the Farmer is more useful to a State than the Soldier. — Whether the Liberal Arts contribute to Virtue. — Of the End of Philosophy. — That there is no greater Good than a good Man. — Of the Demon of Socrates. — Of the beneficial Effects of adverse Fortune. — Whether the Maladies of the Body or the Mind be more severe.*—The best edition of Maximus Tyrius is that of Davis, *Lond.*, 1740, 4to, enriched with some excellent observations by Markland. It had been preceded by a smaller edition in 8vo, *Cantab.*, 1703, also by Davis. The larger edition was reprinted at Leipzig in 1774, in 2 vols. 8vo, under the editorial care of Reiske. (*Schöll, Hist. Lit. Gr.*, vol. 4, p. 286, *seqq.*)—IV. A native of Ephesus, and philosopher of the New-Platonic school. According to Eunapius (p. 86, *seqq.*), he was, through the recommendation of his master Ædesius, appointed by Constantine preceptor to Julian. According to the Christian historians, however, he introduced himself to Julian, during his Asiatic expedition, at Nicomedia. By accommodating his predictions to the wishes and hopes of the emperor, and by other parasitical arts, he gained entire possession of his confidence. The courtiers, as usual, followed the example of their master, and Maximus was daily loaded with new honours. He accompanied Julian in his expedition into Persia, and there, by the assistance of divination and flattery, persuaded him that he would rival Alexander in the glory of conquest. The event, however, proved as unfortunate to the philosopher as to the hero; for, Julian being slain by a wound received in battle, after the short reign of Jovian Maximus fell under the displeasure of the emperors Valentinian and Valens, and, for the imaginary crime of magic, underwent a long course of confinement and suffering, which was not the less truly persecution because they were inflicted upon a pagan. At last Maximus was sent into his native country, and there fell a sacrifice to the cruelty of the proconsul Festus. (*Ammian. Marcell.*, 29, 1.—*Socr., Hist. Eccles.*, 3, 1.—*Enfield's History of Philosophy*, vol. 2, p. 70, *seqq.*)—V. An ecclesiastical writer, at first chief secretary to the Emperor Heraclius, and afterward abbot of a monastery at Chrysopolis, near Constantinople. The Greek church has numbered him among the confessors, from his having resisted all the attempts that were made to draw him over to the Monothelites, for which he was banished to Colchis, where he died A.D. 662. Among other works, we have from him a species of Anthology, divided into 71 chapters, and entitled *κεφάλαια θεολογικά, ἢτοι ἐκλογαὶ ἐκ διαφόρων βιβλίων τῶν τε καθ' ἡμῶς καὶ τῶν ὀρθόδοξων*. It differs from the Anthology of Stobæus in containing selections also from the scriptures and from ecclesiastical writers. The works of Maximus were edited by Combefis, *Paris*, 1675, 2 vols. fol.—VI. An ecclesiastical writer, a bishop of Turin (*Augusta Taurinorum*), who died subsequently to 465 A.D. He was one of the most eloquent speakers of the Western Church. Many of his homilies remain.

MAZICA. *Vid.* Cæsarea ad Argæum.

MAZICÆ, a people of Sarmatia, in the vicinity of the Palus Mæotis. (*Plin.*, 6, 7.)

MAZICÆ, a people of Mauritania Cæsariensis, also called, by some writers, Mazææ, and Machmææ. (*Steph. Byz.*, s. v.—*Ammian. Marcell.*, 29, 25.—*Suet., Ner.*, c. 31.)

ΜΕΙΤΑ, a people in the north of Britain, near the Vallum Severi. They are the same with the Μεατα.

ΜΕΔΕΑ, daughter of Αἴetes, king of Colchis, and famed for her skill in sorcery and enchantment. When Jason came to Colchis in quest of the golden fleece, she aided him in obtaining it, and then fled with him in the Argo to Greece. (Vid. Argonauts.) Here she displayed her magic skill in the case of Αἰson, whom she restored from the decrepitude of age to the bloom of early youth. In order to effect this change, she is said by the poets to have drawn off all the blood from his veins, and then to have filled them with the juices of certain herbs. This sudden renovation of the parent of Jason so wrought upon the daughters of Pelias, that they entreated Medea to perform the same act for their aged father. The Colchian princess eagerly availed herself of this opportunity to avenge the wrongs which Pelias had done to Jason, and, in order to pique still more the curiosity of his daughters, she is said to have cut to pieces an old ram, and then, boiling the parts in a caldron, to have caused a young lamb to come forth from it. The daughters of Pelias thereupon slew their father, and boiled his flesh in a caldron; but Medea refused to perform the requisite ceremonies; and, in order to avoid the punishment she had a right to expect for this cruel deed, fled with Jason to Corinth.—According to another account, however, Medea did not restore Αἰson to youth, he having been driven by Pelias, before the return of Jason, to the act of self-destruction. (Vid. Αἰson.)—After residing for some time at Corinth, Medea found herself deserted by Jason, who espoused the daughter of Creon, the Corinthian king. Taking, thereupon, summary vengeance on her rival, and having destroyed her two sons whom she had by Jason (vid. Jason), Medea mounted a chariot drawn by winged serpents and fled to Athens, where she had by King Αἰgeus a son named Medus. Being detected, however, in an attempt to destroy Theseus (vid. Theseus), she fled from Athens with her son. Medus conquered several barbarous tribes, and also, say the poets, the country which he named Media after himself; and he finally fell in battle with the Indians. Medea, returning unknown to Colchis, found that her father Αἴetes had been robbed of his throne by her brother Perses. She restored him, and deprived the usurper of life.—Neither Jason nor Medea can be well regarded as a real historical personage. (Compare remarks at the close of the article Jason.) Whether the former, whose name is nearly identical with Iasion, Iasios, is merely a personification of the Ionian race (Ιῶνες), or, in reference to a myth to be noticed in the sequel, signifies the *healing, atoning* god or hero, may be doubted. Medea, however, seems to be plainly only another form of Juno, and to have been separated from her in a way of which many instances occur in ancient legends. She is the *counselling* (μυθός) goddess; and in the history of Jason we find Juno always acting in this capacity towards him, who, as Homer says, “*was very dear to her*” (Od., 12, 72); an obscure hint, perhaps, of the love of Jason and Medea. Medea, also, always acts a friendly part; and it seems highly probable that the atrocities related of her are pure fictions of the Attic dramatists. (Müller, *Orchom.*, p. 68.) The bringing of Jason and Medea to Corinth seems also to indicate a connexion between the latter and Juno, who was worshipped there under the title of Ακρεα, and the graves of the children of Medea were in the temple of this goddess. It was an annual custom at Corinth, that seven youths and as many maidens, children of the most distinguished citizens, clad in black, with their hair shorn, should go to this temple, and, singing mournful hymns, offer sacrifices to appease the deity. The cause assigned for this rite was as follows. Medea reigned at Corinth; but the people, disdaining to be governed by an enchantress, conspired against her,

and resolved to put her children (seven of each sex) to death. The children fled to the temple of Juno, but were pursued and slain at the altar. The anger of heaven was manifested by a plague, and, by the advice of an oracle, the expiatory rite just mentioned was instituted. (Parmeniscus, *ap. Schol. ad Eurip., Med.*, 9, 275.—Pausan., 2, 2, 7.) It was even said that the Corinthians, by a bribe of five talents, induced Euripides to lay the guilt of the murder of her children on Medea herself. (Schol., l. c.) There was also a tradition that Medea resided at Corinth, and that she caused a famine to cease by sacrificing to Ceres and the Lemnian nymphs, and that Jupiter made love to her, but she would not hearken to his suit, fearing the anger of Juno, who therefore rewarded her by making her children immortal; a thing she had vainly attempted to do herself, by hiding them in the temple of the goddess, whose priestess she probably was in this myth. (Schol. ad Pind., Ol., 13, 74.—Pausan., 2, 3, 11.) It is also remarkable, that the only place besides Corinth in which there were legends of Medea was Coreyra, an island which had been colonized by the Corinthians. Αἴetes himself was, according to Eumelus (*ap. Schol. ad Pind., l. c.*), the son of Helius and Antiope, and born at Ephyra or Corinth, which his sire gave to him; but he committed it to the charge of Bunus, and went to Colchis. It would thus appear, that the whole myth of Αἴetes and Medea is derived from the worship of the Sun and Juno at Corinth. (Keighley's *Mythology*, p. 310, *seqq.*)

ΜΕΔΙΑ, a country of Upper Asia, the boundaries of which are difficult to determine, as they differed at various times. In the time of Strabo, it was divided into Great Media and Atropatene. Great Media, which is a high table-land, is said by all ancient writers to have had a good climate and a fertile soil; an account which is fully confirmed by modern travellers. It was separated on the west and southwest from the low country, watered by the Tigris and Euphrates, by a range of mountains known to the ancients under the name of Zagros and Parachostras. Xenophon, however, appears to include in Media all the country between the Tigris and Mount Zagrus. (Anab., 2, 4, 27.) On the east it was bounded by a desert and the Caspian Mountains (the modern *Elburz* range), and on the north and northwest by the Cadusii, Atropatene, and the Matieni, thus answering, for the most part, to the modern *Irak Ajemi*. Atropatene, on the other hand, which corresponds to the modern *Azerbijan*, extended as far north as the Araxes (now *Aras*). It was much less fertile than Great Media, and does not appear to have been included in the Media of Herodotus. It derived its name from Atropates, who successfully opposed the Macedonians, and established an independent monarchy, which continued till the time of Strabo, notwithstanding its proximity to the Armenian and Parthian dominions. The principal town of Great Media was Agbatana or Ecbatana, the summer residence of the Persian kings. (Vid. Ecbatana.) In Great Media also was the Nissan plain, celebrated for its breed of horses, which were considered in ancient times the best in Asia. Arrian informs us, that there were 50,000 horses reared in this plain in the time of Alexander, and that there were formerly as many as 150,000. (Herod., 3, 106.—Id., 7, 40.—Arrian, *Exp. Al.*, 7, 13.—Strabo, 525.—Ammian. Marcell., 23, 6.) The mountainous country in the southwestern part of Great Media was inhabited by several warlike tribes, who maintained their independence against the Persian monarchy. Strabo mentions four tribes in particular; the Mardi, bordering on the northwest of Persis; the Uxii and Elymsæ, east of Susiana; and the Cosæi, south of Great Media. The King of Persia was obliged to pass through the country of the latter whenever he visited Ecbatana, and could only obtain a free passage by the payment of a considerable sum of

money. The Cosæi were defeated by Alexander, but they never appear to have been completely subdued by the Macedonians. — According to Herodotus (1, 101), the Medes were originally divided into six tribes, the Bussæ, Paretaeni, Struchates, Arizanti, Budii, and Magi. They were originally called Arii (*Herod.*, 7, 63); which word appears to contain the same root as Ar-tai, the ancient name of the Persians. (*Herod.*, 7, 61.) It is not improbable that this name was originally applied to most of the Indo-Germanic nations. Tacitus speaks of the Arii as one of the most powerful of the German tribes (*Germ.*, 43); and India proper is called in the most ancient Sanscrit works, *Arnya-varia*, "holy land." The same name was retained in the province of Ariana, and is still employed in the East as the proper name of Persia, namely, *Iran*. (*Vid. Aria*.)—Media originally formed part of the Assyrian empire, but its history as an independent kingdom is given so differently by Herodotus and Ctesias, as to render it probable that the narrative of Ctesias must refer to a different dynasty in Eastern Asia. Ctesias makes the Median monarchy last 282 years; and, as Media was conquered by Cyrus about B.C. 560, it follows that the Median monarchy would commence, according to his account, about B.C. 842. Herodotus, on the contrary, assigns to the Median monarchy a period of 128 years, which, including the 28 years during which the Scythians had possession of the country, would place the commencement of the Median monarchy B.C. 716. The founder of this monarchy was Arbaces, according to Ctesias, who reckons eight kings from him to Astyages. According to the account of Herodotus, however, there were four kings of Media: 1. Deioces, who reigned B.C. 716–657. —2. Phraortes, B.C. 657–635, greatly extended the Median empire, subdued the Persians and many other nations, but fell in an expedition against the Assyrians of Ninus (Nineveh). —3. Cyaxares, B.C. 635–595, completely organized the military force of the empire, and extended its boundaries as far west as the Halya. In an expedition against Nineveh, he was defeated by the Scythians, who had made an irruption into Southern Asia, and was deprived of his kingdom for 28 years. After the expulsion of the Scythians, he took Nineveh, and subdued the Assyrian empire, with the exception of the Babylonian district (*Babυλωνιης μοιρης*). —4. Astyages, B.C. 595–560, who was dethroned by his grandson Cyrus, and Media reduced to a Persian province. The history of the rise of the Persian monarchy is related differently by Xenophon, who also makes a fifth Median king, Cyaxares II., succeed Astyages.—The Medes revolted during the reign of Darius II., the father of the younger Cyrus, about B.C. 408, but were again subdued. (*Herod.*, 1, 130.—*Xen.*, *Hist. Gr.*, 1, 2, 19.) They do not appear, after this time, to have made any farther attempt at recovering their independence. On the downfall of the Persian empire they formed a part of the kingdom of the Seleucids, and were subsequently subject to the Parthians. (*Encycl. Us. Knowl.*, vol. 15, p. 54.)

MEDIOLANUM, *i.* a city of Cisalpine Gaul, among the Insubres, now *Milan*. According to Livy (5, 34), it was founded by the Insubres, and called by them Mediolanum, from a place of the same name among the Adui in Gaul. (Compare *Pliny*, 3, 17.—*Ptol.*, p. 63.) This city is named for the first time in history by Polybius (2, 34), in his account of the Gallic wars. The capture of it by Cn. Scipio and Marcellus was followed by the submission of the Insubres themselves. (*Oros.*, 4, 13.—*Plut.*, *Vit. Marcell.*) It was situate on a small river, now the *Olna*, in a beautiful plain between the Ticinus or *Tesino*, and the Addua or *Adda*. In the vicinity of this city, to the west, D'Anville and others locate the Raudii Campi, where Marius defeated the Cimbri; but Mannert places them near Verona. In Strabo's time, Mediolanum was con-

sidered a most flourishing city. (*Strabo*, 213.—Compare *Tacit.*, *Hist.*, 1, 70.—*Suet.*, *Aug.*, c. 20.—*Plin.*, *Ep.*, 4, 13.) But its splendour seems to have been greatest in the time of Ausonius, who flourished towards the end of the fourth century, and who assigns it the rank of the sixth city in the Roman empire. Procopius, who wrote a century and a half later, speaks of Mediolanum as one of the first cities of the west, and as inferior only to Rome in population and extent. (*Rer. Got.*, 2, 8.) In it was also established the gold and silver coinage of the north of Italy. At a later period, the frequent inroads of the barbarians of the north compelled the emperors to select, as a place of arms, some city nearer the scene of action than Rome was. The choice fell on Mediolanum. Here, too, Maximian resigned the imperial diadem (*Eutrop.*, 8, 27), and the famous St. Ambrose established the see of a bishopric. Although subsequently plundered by Attila (*Jornandes*, c. 42), it soon revived, and under Odoacer became the imperial residence. In its vicinity was fought the battle which put Theodoric, king of the Ostrogoths, in possession of Italy, and Mediolanum under this prince became second only to Rome. (*Procop.*, *Rer. Got.*, 2, 8.) It met with its downfall, however, when, having sided with Belisarius, and having been besieged by the Goths and Burgundians, it was taken by the latter, and 300,000 of the inhabitants, according to Procopius, were put to the sword (2, 21). It never, after this severe blow, regained its former eminence, although in the middle ages it became a flourishing and opulent place of trade. (*Mannert*, *Geogr.*, vol. 9, pt. 1, p. 167, *seqq.*—*Cramer's Anc. Italy*, vol. 1, p. 51.)—II. A town of the Gugerri in Germania Inferior, corresponding, as is thought by Cluver and Cellarius, to the present village of *Moyland*.—III. A city in Mæsia Superior. (*Cod. Theod.*, l. 8, *de jur. fusc.*)—IV. A town of the Ordovices in Britain, near the present town of *Ellesmere*.

MEDIOMATRICI, a people of Gallia Belgica on the Mosella or *Moselle*. The Treviri were their neighbours on the north. Their chief town was Divodurum, afterward Mediomatrici, now *Metz*. They were a powerful nation previous to their reduction by the Romans, and their territory corresponded to what is now *le pays Messin*. (*Cæs.*, *B. G.*, 4, 10.—*Plin.*, 4, 17.—*Tact.*, *Ann.*, 1, 63.—*Id.*, *Hist.*, 4, 70.)

MEDITERRANEUM MARE (or *Midland Sea*), the Mediterranean, a sea between the Straits of Gibraltar to the west and the Dardanelles and Syria to the east. It was anciently called "The Sea," or "The Great Sea," by the Jews. The Greeks, on the other hand, do not seem to have had any general name for it. Herodotus calls it "this sea" (1, 185); and Strabo, "the sea within the columns," that is, within the Straits of Gibraltar (*Strab.*, 401). Mela calls the whole sea "*mare nostrum*," "our sea," and observes that different parts had their several names. Pliny appears to have no general appellation for it. The term Mediterranean is not applied to this sea by any classical Latin writer, but, instead of *Mediterraneum*, they use *internum*, or else, with Mela, call it *nostrum*. We will return to this subject at the close of the article.—The Mediterranean is comprised between the parallels of 30° 15' and 45° 50', and the meridians of 5° 30' W. and 36° 10' E. The distance from Gibraltar to the farthest shore of Syria is 2000 miles, and the narrowest part from Sicily to Africa is 79 miles across. Including the islands, it occupies an area of 734,000 square miles. On the shores of this sea have been transacted the most important events in the history of mankind, and its character seems to mark it as the theatre best adapted to the complete and rapid civilization of the race. From the great diversity of soil and productions, under a varied and favourable climate, the colonists, from whatever points they first proceeded, would soon acquire those different habits under which their

MEDITERRANEUM MARE.

several energies and capabilities would be developed. The comparative shortness of the distances of the several places, rendering navigation easy and pleasant in small and imperfect vessels, would, by facilitating intercourse from an early period, tend to diffuse and promote civilization; while commerce, by bringing together men of different habits, manners, and languages, and thus circulating practical information, would supply the materials for the perfection of the arts and sciences.—The navigation of the Mediterranean must no doubt be of very early date. The story of Minos destroying pirates (*Thucyd.*, 1, 4) takes for granted the fact, that there must have been merchant vessels carrying something worth plundering from the earliest recorded period. If, with Strabo, we allow the accuracy of Homer's descriptions, it by no means follows that the Greeks knew everything that could have been known to every other nation at that time; and the stories told of the jealousy with which the Phœnicians and Carthaginians guarded their discoveries, prove at least that geographical knowledge was not common property: and with regard to these very nations, the knowledge which the Greeks could have had of them, among other barbarians, must have been inferior to that which we possess in the minute accuracy of the Scriptures alone. The story of Utica having been established 130 years before Carthage, proves a regular communication between this place and Syria, a distance of upward of 1200 miles; and we may conclude that occasional voyages of that enterprising people had already extended the bounds of knowledge far beyond these limits. If the precise time of the discovery of places, lying, as it were, in the thoroughfare of this sea, is so uncertain, the history of the places in the deep bays of the northern shores must be still more obscure: we shall therefore give at once a slight sketch of the geography of this sea from Strabo, who wrote in the first century of our era.—The stadium adopted by Strabo was that of Eratosthenes, 700 stadia making 1° of latitude or longitude on the equator, or 60 nautical miles; hence a stadium is 0.0857 of a nautical mile, the mile being about 6082 feet. The Mediterranean was divided into three basins: the first comprised the sea between the Columns of Hercules and Sicily; the second, between Sicily and Rhodes; the third, between Rhodes and the shores of Syria. Strabo supposed that the parallel of latitude of 36½° passed through the Sacred Promontory (Cape St. Vincent) between the Pillars of Hercules, dividing this part of the Mediterranean in the middle of its breadth, which was believed by navigators to be 5000 stadia, or 429½ nautical miles, from the Gulf of Lyons to the shores of Africa, but which measures only 330. The sea here, however, lies altogether to the north of this parallel; and hence, as the configuration of the European shores seems to have been tolerably good, the coast of Africa must have been proportionably distorted. This parallel was carried through the straits of Sicily, Rhodes, and the Gulf of Issus, now the Gulf of Scanderoon. In consequence of the above supposition, he placed Massilia (*Marseille*) to the southward instead of the northward of Byzantium. He supposed Sardinia and Corsica to lie northwest and southeast instead of north and south, and made the distance of Sardinia from the coast of Africa 2400 stadia, or 206 miles instead of 100, which is the true distance. From the Columns of Hercules to the Straits of Sicily he considers to be 12,000 stadia, or 1028 miles: it is only about 800. From Pachynum (Cape Passaro) to the western extremity of Crete he reckoned 4500 stadia, or 386 miles; it measures 400: and he supposed the length of Crete 2000 stadia, or 171 miles, the true length being 140. He supposed that a line drawn through Byzantium, the middle of the Propontis, the Hellespont, and along the capes of the coast of Asia Minor, would coincide with the meridian: this error

5 K

MEDITERRANEUM MARE.

placed Byzantium too far to the north, and not far enough to the east. From Alexandria to the east end of Crete he considered 3000 stadia, or 257 miles: it measures about 290. From Alexandria to Rhodes he made 3600 stadia, or 306 miles: it measures 320.—Many of the latitudes given by Strabo are very near, that is, within 10'; those of Massilia and Byzantium excepted, the former being 3° 43' too little, and the latter 2° 16' too much. The longitudes, which were all at that time referred to the Sacred Promontory as the first meridian, and the extreme western point; as was believed, of the known world, are without exception too small; that of Carthage, the nearest to the truth, being 1° 9', and Alexandria, the most erroneous, 6° 40' too small. (*Encycl. Useful Knowl.*, vol. 15, p. 59, *seqq.*)—The Mediterranean Sea afforded a very frequent topic of consideration to the ancient writers. Democritus, Diogenes, and others, maintained that its waters kept constantly decreasing, and would eventually all disappear. Aristotle (*Meteor.*, 2, 3) held to the opinion, that the Mediterranean had at one time covered a large part of Africa and Egypt, and had extended inland as far as the temple of Jupiter Ammon. This doctrine was maintained also by Xanthus the Lydian, Strabo, and Eratosthenes. The ancients appear to have been led to this conclusion by observing in various parts of Africa and Egypt manifest traces and indications of the sea. They found here shells, pebbles evidently rounded or worn smooth by the action of water, incrustations of salt, and many salt lakes. Some of these appearances were particularly frequent on the route through the desert to the temple of Ammon. (*Herod.*, 3, 12.—*Plut.*, *de Is. et Os.*—*Strab.*, 909.—*Mela*, 1, 6.—*Solin.*, 26.—*Scidcl.*, *ad Eratosth.*, *fragm.*, p. 23.) The ancient writers maintained, that the temple and oracle of Ammon never could have become so famous if the only approach to them had always been over vast and dangerous deserts. They insisted that the Oases had all originally been islands in the earlier and more widely extended Mediterranean. In this remote period, according to them, there existed as yet no communication between the Pontus Euxinus and Mediterranean Sea (*vid. Lectonia*), nor between the latter and the Atlantic. The isthmus connecting Arabia with Egypt was under water, and Eratosthenes believed that Menelaus had sailed over this narrow passage, which is now the Isthmus of Suez. When the waters of the Euxine forced a passage into the Mediterranean (*vid. Cyaneæ*), the great influx of water opened another outlet for itself through what were called by the ancients the Pillars of Hercules, Spain and Africa having been previously joined. In this tremendous convulsion the ancient land of Lectonia is thought to have been inundated, and to have sunk in the sea, leaving merely the islands of the Archipelago, its mountain-tops, to attest its former existence. According to Diodorus Siculus (5, 47), the inhabitants of Samothrace had a tradition that a great part of their island, as well as of Asia, was ravaged and laid under water by this inundation, and that, in fishing near their island, fragments of temples and other buildings were frequently rescued from the waves. (Compare *Diod. Sic.*, 5, 82.—*Strab.*, 85.—*Plat.*, *de Leg.*, 3, p. 677, *Opp.*, *ed. Bip.*, vol. 8, p. 106.—*Plin.*, 2, 80.—*Philon.*, *de Mund. non corrupt.*, p. 969.—*Lyell's Principles of Geology*, vol. 1, p. 25, *seqq.*)—Before bringing the present article to a close, it may not be amiss to enter more fully into one part of the subject, on which we merely touched at the commencement, the different appellations, namely, which have been given to this sea. Herodotus, as we have already remarked, calls it "this sea" ἡ τοῦ ὀψιανοῦ (4, 39.—Compare *Aristot.*, *Meteor.*, 2, 3.—*Appian.*, *Schœneigh. ad Pref.*, c. 1.—*Wesseling.*, *ad Diod. Sic.*, 4, 18). Polybius, ἡ τοῦ ὀψιανοῦ (3,

609

39.—Compare *Aristot., de Mundo*, c. 3.—*Gellius, N. A.*, 10, 7.) Diodorus Siculus, *ἡ καθ' ἡμᾶς θάλασσα* (4, 18.—Compare *Polyb.*, 3, 37.—*Strab.*, 83.—*Appian, Bell. Mithradat.*, c. 93.—*Maximus Tyrius*, 14, 2). *Maximus Tyrius, ἡ δεῦρο θάλασσα* (41, 1). *Strabo, ἡ ἐντὸς θάλασσα*. (Compare *Marc. Heracl., Periopl.*, p. 65.—*Agathem.*, 2, 4.) *Aristotle, ἡ ἐντὸς Ἡρακλείων σπηλὴν θάλασσα* (*Meteor.*, 2, 1.—Compare *Dion. Hal.*, 1, 3.—*Plut., Vit. Pomp.*, c. 25). The Latin writers in general, as we have already said, give it the appellation of *Nostrum Mare* (*Sallust., Jug.*, c. 17.—*Mela*, 1, 1, 5.—*Liv.*, 26, 4.—*Cas.*, B. G., 5, 1. *Avien., Or. Marit.*, v. 56.—Compare *Duker, ad Flor.*, 3, 6, 9.—*Cort. ad Sallust., B. Jug.*, c. 18). Pliny styles it *Mare internum* (3, *proem.*, c. 5). *Florus, Mare internum* (4, 2). Later writers, not classical, have *Mare Mediterraneum*. (*Solin.*, c. 22.) *Isidorus* gives the following explanation of this name: "*Quia per mediam terram usque ad Orientem perfunditur, Europam et Africam Asiaticamque determinans.*" (*Orig.*, 13, 13.—Compare *Priscian., Perieg.*, 52.) *Orosius* says, "*Mare nostrum quod Magnus generaliter dicimus;*" and *Isidorus* remarks, "*quia cetera maria in comparatione ejus minora sunt.*" (*Oros.*, 1, 2.—*Isid., Orig.*, 13, 16.—Compare *Hardouin, ad Plin.*, 9, 18.—*Burmam, ad Val. Flacc., Arg.*, 1, 60.) According to *Polybius* (3, 42), that part of the Mediterranean which lay between the Pillars of Hercules and the Rhone was called *Σαρδόνιον πέλαγος*, while *Aristotle* calls the part between the Pillars and Sardinia *Σαρδονικός* (*Meteor.*, 2, 1.—*Id., de Mund.*, 3.—*Eratosth., ap. Plin.*, 3, 10). *Strabo* gives the part between the Pillars and the Pyrenees the name of *Ἰβηρικὸν πέλαγος* (123.—Compare *Agathem.*, 1, 3.—*Dionys. Perieg.*, v. 69.—*Niceph. Blem., ed. Spohn.*, p. 3). Pliny remarks, "*Hispanum mare, quatenus Hispanias alluit; ab aliis Ibericum aut Balearicum*" (3, 2.—*Id. ibid.*, 4, 34.—Compare *Solin.*, c. 23.—*Ampel.*, c. 7.—*Ptol.*, 2, 6). According to *Zonaras* (*Annal.*, 8, p. 406), the sea to the east of the Pyrenees was called the *Sea of the Bebrycians*. (Compare *Markland., ad Max. Tyr.*, 32, 3.—*Ukert's Geogr.*, vol. 2, p. 247, *seqq.*, in *notis.*)

MEDITRINA, the goddess of healing, whose festival, called *Meditrinalia*, was celebrated at Rome and throughout Latium on the 5th day before the Ides of October. (Compare the Ancient Calendar given by *Gruter*, p. 133.) On this occasion new and old wine were poured out in libation, and tasted, "*medicamenti causa.*" Compare the explanatory remarks of *Festus*: "*Meditrinalia dicta hac de causa. Mos erat Latinis populis, quo die quis primum gustaret mustum, dicere omnis gratia, 'vetus novum vinum bibo: veteri novo morbo medeor.' A quibus verbis Meditrina dea nomen captum, ejusque sacra Meditrinalia dicta sunt.*" (*Festus*, s. v.—Consult *Dacier, ad loc.*)

ΜΕΔΟΙΟΙ, a people of Venetia, in Cisalpine Gaul, noticed only by *Strabo* (216). From the affinity which their name bears to that of the *Meduacus* or *Brenta*, it seems reasonable to place them near the source of that river, and in the district of *Bassano*. (*Cramer's Anc. Italy*, vol. 1, p. 125.)

ΜΕΔΟΙΧΟΣ or *ΜΕΔΥΧΟΣ*, I. Major, a river of Venetia, now the *Brenta*.—II. Minor, a river of Venetia, now the *Bachiglione*.—Both these rivers rise in the territory of the *Euganei*, and fall into the Adriatic below Venice. Patavium was situate between these two streams, but nearer the *Meduacus* Minor. (*Plin.*, 3, 16.—*Liv.*, 10, 2.)

ΜΕΔΟΝΕΙΑ, a city of Lusitania, southwest of Norba *Cæsarea*; now *Marvão*, on the confines of Portugal. (*Cæs., Bell. Afric.*, c. 48.)

ΜΕΔΩΝ, son of *Codrus*, the 17th and last king of Athens, was the first of the perpetual archons. He held the office for life, and transmitted it to his posterity; but still it would appear that, within the house of the *Medontides*, the succession was determined by

the choice of the nobles. It is added, that the archon at this period, though holding the office for life, was nevertheless deemed a responsible magistrate, which implies that those who elected had the power of deposing him; and, consequently, though the range of his functions may not have been narrower than that of the king's, he was more subject to control in the exercise of them. This indirect kind of sway, however, did not satisfy the more ambitious spirits; and we find them steadily, though gradually, advancing towards the accomplishment of their final object—a complete and equal participation of the sovereignty. After twelve perpetual archonships, ending with that of *Alcmæon*, the duration of the office was limited to ten years; and through the guilt or calamity of *Hippomedon*, the fourth decennial archon, the house of *Medon* was deprived of its privilege, and the supreme magistracy was thrown open to the whole body of the nobles. This change was speedily followed by one much more important: the archonship was reduced to a single year; and, at the same time, its branches were severed, and were distributed among nine new magistrates. (*Vid. Archontes.*—*Thirlwall's History of Greece*, vol. 2, p. 16.—Compare *Clinton, Fast. Hell.*, vol. 1, p. ix., *seqq.*)

ΜΕΔΥΧΟΣ. *Vid. Meduacus.*

ΜΕΔΥΝΑ, a river of Gallia Belgica, flowing into the *Ligeris* or *Loire*. Now the *Mayenne*. (*Lucan.*, 1, 438.—*Theod. Aurel.*, 4, *carm.* 6.)

ΜΕΔΥΣ, I. a river of Persia, falling into the *Rogomanes*; now the *Abi-Kuren*. (*Strabo*, 729.)—By the *Medum flumen* in *Horace* (*Od.*, 2, 9, 21) is meant the *Euphrates*.—II. A son of *Ægeus* and *Medea*, who was fabled to have given name to *Media*, in Upper Asia. (*Vid. Medea.*)

ΜΕΔΥΣΑ, one of the three Gorgons, daughter of *Phorcys* and *Ceto*, and the only one of the number that was not immortal. (*Apollod.*, 2, 4, 2.) According to one legend, *Medusa* was remarkable for personal beauty, and captivated by her charms the monarch of the sea. *Minerva*, however, incensed at their having converted her sanctuary into a place of meeting, changed the beautiful locks of *Medusa* into serpents, and made her in other respects hideous to the view. Some accounts make this punishment to have befallen her because she presumed to vie in personal attractions with *Minerva*, and to consider her tresses as far superior to the locks of the former. (*Serv., ad Virg., Æn.*, 6, 289.) *Apollodorus*, however, gives the Gorgons snaky tresses from their birth. (*Vid. Gorgones.*)—*Medusa* had, in common with her sisters, the power of converting every object into stone on which she fixed her eyes. *Perseus* slew her (*vid. Perseus*), and cut off her head; and the blood that flowed from it produced, say the poets, the serpents of Africa, since *Perseus*, on his return, winged his way over that country with the Gorgon's head. The conqueror gave the head to the goddess *Minerva*, who placed it in the centre of her *egis* or shield. (*Vid. Ægis.*)

ΜΕΓΑΡΑ, one of the Furies. (*Vid. Furie.*)

ΜΕΓΑΛΕΣΙΑ, games in honour of *Cybele*. (*Vid. Ludi Megalenses.*)

ΜΕΓΑΛΙΑ or *ΜΕΓΑΡΙΣ*, a small island in the Bay of Naples, near *Neapolis*, on which the Castle *del Oso* now stands. (*Plin.*, 3, 6.—*Colum.*, R. R., 10.)

ΜΕΓΑΛΟΠΟΛΙΣ, the most recent of all the Arcadian cities, and also the most extensive, situate in the southern part of Arcadia, in a wide and fertile plain watered by the *Helissus*, which flowed from the central parts of Arcadia, and nearly divided the town into two equal parts. *Pausanias* informs us, that the Arcadians, having, by the advice of *Epaminondas*, resolved on laying the foundations of a city, which was to be the capital of their nation, deputed ten commissioners, selected from the principal states, to make the

necessary arrangements for conducting the new colony. (*Pausan.*, 8, 27.) This event took place in the 102d Olympiad, or 370-1 B.C. The territory assigned to Megalopolis was extensive, since it reached as far as the little states of Orchomenus and Caphys on the northeast, while to the south and southwest it adjoined Laconia and Messenia. (*Pausan.*, 8, 25.) Diodorus affirms, that the city contained about 15,000 men capable of bearing arms, according to which calculation we may compute the whole population at 65,000. (*Diod. Sic.*, 18, 70.) The Megalopolitans experienced no molestation from the Lacedæmonians as long as Thebes was able to protect them; but, on the decline of that city, and when it also became engaged in the sacred war against the Phocians, they were assailed by the Spartans, who endeavoured to obtain possession of their town; these attacks, however, were easily repelled by the aid of the Argives and Messenians. (*Pausan.*, 8, 37.) To the Athenians the Megalopolitans were likewise indebted for their protection against the attempts of Sparta, as well as for their assistance in settling some dissensions in their republic, which had led to the secession of several townships that originally contributed to the foundation of the city. (*Demosth.*, *Orat. pro Megalop.*, p. 203.) In order to strengthen themselves still farther against the Lacedæmonians, they formed an alliance with Philip, son of Amyntas, who conciliated the favour of the Arcadians not only towards himself, but towards all his successors. (*Pausan.*, 8, 27.—*Polyb.*, 2, 48.) On the death of Alexander, Megalopolis had to defend itself against the army of Polysperchon, who was engaged in war with Cassander. This general vigorously assaulted the city, but, owing to the bravery of the inhabitants, headed by Damis, who had served under Alexander, his attacks were constantly repulsed. (*Diod. Sic.*, 18, 70.) Subsequently we find Megalopolis governed by tyrants, the first of whom was Aristodemus of Phigalea, whose excellent character obtained for him the surname of *Χρηστός*. Under his reign the Spartans again invaded Megalopolis, but were defeated after an obstinate conflict; Acrotatus, the son of Cleomenes, who commanded the army, being among the slain. (*Pausan.*, 8, 27.) Some time after the death of Aristodemus, the sovereignty was again usurped by Lydiades, a man of ignoble birth, but of worthy character, since he voluntarily abdicated his authority for the benefit of his countrymen, in order that he might unite them with the Achaean confederacy. (*Pausan.*, 8, 27.—*Polyb.*, 2, 44.) At this period Megalopolis was assailed for the third time by the Spartans; who, having defeated the inhabitants, laid siege to the city, of which they would have made themselves masters but for a violent wind, which overthrew and demolished their engines. (*Pausan.*, 8, 27.) Not long, however, after this failure, Cleomenes, the son of Leonidas, in violation of the existing treaty, surprised the Megalopolitans by night, and, putting to the sword all who offered any resistance, destroyed the city. Philopœmen, with a considerable part of the population, escaped into Messenia. (*Polyb.*, 2, 55.—*Pausan.*, 8, 27.) Megalopolis was restored by the Achæans after the battle of Sellasia; but it never again rose to its former flourishing condition. The virtues and talents of its great general Philopœmen added materially to its celebrity and influence in the Achaean councils, and after his death its fame was upheld by the abilities of Lycortas and Polybius, who trod in the steps of their gifted countryman, and were worthy of sharing in the lustre which he had reflected on his native city. (*Pausan.*, 8, 49.—*Polyb.*, 2, 40.—*Id.*, 10, 24.—*Id.*, 24, 9.—*Plut.*, *Vit. Philopam.*) In the time of Polybius, Megalopolis was fifty stadia in circumference, but its population was only equal to half that of Sparta; and when Strabo wrote, it was so reduced that a comic poet was justified in saying,

Ἐρημία μεγάλη ἐστὶν ἡ Μεγαλόπολις. (*Strabo*, 398.)—The village of *Sinano* has been built on the site, and amid the ruins of Megalopolis. (*Dodwell*, *Tour*, vol. 2, p. 375.—*Pouqueville*, *Voyage de la Grèce*, vol. 5, p. 494.) Dodwell says that *Sinano*, which consists of an *aga's pyrgo* and a few cottages, is situated "just without the ancient walls." Pouqueville, however, makes the distance one mile between *Sinano* and the ruins of Megalopolis. The former is undoubtedly the more accurate statement. *Leonidari* has been erroneously regarded by some as occupying the site of this ancient city. (*Cramer's Anc. Greece*, vol. 3, p. 329, *seqq.*)

MEGANIRA, the wife of Celeus, king of Eleusis in Attica. She was mother of Triptolemus, to whom Ceres taught agriculture. Meganira received divine honours after death, and had an altar raised to her near the fountain where Ceres had first been seen when she arrived in Attica. (*Pausan.*, 1, 39.)

MEGARA, a daughter of Creon, king of Thebes, given in marriage to Hercules, because he had delivered the Thebans from the tribute they had bound themselves to pay to the Orchomenians. Subsequently, having been rendered insane by Juno, Hercules threw into the fire the children of whom he had become the father by Megara. (*Apollod.*, 2, 4, 12.) He afterward gave her in marriage to Iolaüs. (*Apollod.*, 2, 6, 1.)

MEGARA (gen. -æ; and also, as a neuter plural, -æ, -orum: in Greek, τὰ Μέγαρα), a city of Greece, the capital of a district called Megaris, about 210 stadia northwest of Athens. It was situated at the foot of two hills, on each of which stood a citadel: these were named Caria and Alcatheüs. It was connected with the port of Nisæa by two walls, the length of which was about eight stadia (*Thucyd.*, 4, 66), or eighteen according to Strabo (391). They were erected by the Athenians, at the time that the Megareans placed themselves under their protection. (*Thucyd.*, 1, 103.) The distance from Athens, as has been already stated, was 210 stadia. (*Procop.*, *Bell. Vand.*, 1, 1.) Dio Chrysostom calls it a day's journey. (*Orat.*, 6.) Modern travellers reckon eight hours. (*Dodwell*, vol. 2, p. 177.) The writer just referred to states that Megara is now but a miserable place; the houses small, and flat roofed. One only of the hills is occupied by the modern town; but on the other, which is the more eastern of the two, are some remains of the ancient walls, which appear to have been massive and of great strength. Not any of the numerous temples described by Pausanias can now be identified with certainty. Altogether, there are few places in Greece where the ancient monuments have so totally disappeared. (*Dodwell*, vol. 2, p. 177.—Compare *Gell's Itin.*, p. 16.)—Tradition, as Pausanias affirms, represented Megara as already existing under that name in the time of Car, the son of Phoroneus; while others have derived it from Megarus, a Boeotian chief, and son of Apollo or Neptune. (*Pausan.*, 1, 39.—*Steph. Byz.*, s. v. Μέγαρα.) Car was succeeded by Lelex, who, as was reported, came from Egypt, and transmitted his name to the ancient race of the Leleges, whom we thus trace from the Achelœus to the shores of the Saronic Gulf. Lelex was followed by Cleon, and Pylas, who abdicated his crown in favour of Pandion, the son of Cecrops, king of Athens, by which event Megaris became annexed to the latter state. (*Pausan.*, 1, 39.) Nisus, the son of Pandion, received Megaris as his share of his father's dominions. (*Strabo*, 392.) The history of this prince and his daughter Scylla, as also the capture of Megara by Minos, are found in all the mythological writers of Greece; but Pausanias observes (1, 39) that these accounts were disowned by the Megareans. Nisus is said to have founded Nisæa, the port of Megara; whence the inhabitants of that city were surnamed Nisæi, to distinguish them from the Megareans of Sicily, their colonists. (*Theocr.*, *Idyll.*, 12,

37.) The walls of Megara, which had been destroyed by Minos, were rebuilt by Alcathous, the son of Pelops, who came from Elis. (*Pausan.*, 1, 41.) In this undertaking, Apollo was said to have assisted him. (*Theogn.*, 771.—*Ovid, Met.*, 8, 14.) Hyperion, the son of Agamemnon, according to Pausanias, was the last sovereign of Megara; after his death, the government, by the advice of an oracle, became democratical. (*Pausan.*, 1, 43.) As a republic, however, it remained still subject to Athens. Strabo indeed affirms, that, till the reign of Codrus, Megaris had always been included within the limits of Attica; and he thus accounts for Homer's making no special mention of its inhabitants, from his comprehending them with the Athenians under the general denomination of Ionians. (*Strab.*, 393.) In the reign of Codrus, Megara was wrested from the Athenians by a Peloponnesian force; and a colony having been established there by the Corinthians and Messenians, it ceased to be considered as of Ionian origin, but thenceforth became a Dorian city, both in its language and political institutions. The pillar, also, which marked the boundaries of Ionia and the Peloponnesus, was on that occasion destroyed. (*Strab.*, 393.—*Pausan.*, 1, 39.—The scholiast on Pindar (*Nem.* 7) informs us, that the Corinthians, at this early period, considering Megara as their colony, exercised a sort of jurisdiction over the city. Not long after, however, Theseus, one of its citizens, usurped the sovereign power, by the same method, apparently, which was afterward adopted by Pisistratus at Athens. (*Aristot., Rhet.*, 1, 2.—*Id., Polit.*, 5, 5.—*Thucyd.*, 1, 126.) He was finally expelled by his countrymen; after which event a moderate republican form of government was established, though afterward it degenerated into a violent democracy. (*Plut., Quest. Gr.*, 18.) This should probably be considered as the period of Megara's greatest prosperity, since it then founded the cities of Selymbria, Mesembria, and Byzantium, on the shores of the Euxine, and Megara Hyblæa in Sicily. (*Strabo*, 319.) It was at this time also that its inhabitants were engaged in war with the Athenians for the possession of Salamis, which, after an obstinate contest, finally remained in the hands of the latter. (*Pausan.*, 1, 40.—*Strabo*, 394.) The Megareans fought at Artemisium with twenty ships, and at Salamis with the same number. (*Herod.*, 8, 1, 45.) They also gained some advantage over the Persians under Mardonius, in an inroad which he made into their territory (*Pausan.*, 1, 40); and, lastly, they sent 3000 soldiers to Plataea, who deserved well of their country in the memorable battle fought in its plains. (*Herod.*, 9, 21.—*Plut., de defect. Orac.*, p. 186.) After the Persian war, we find Megara engaged in hostilities with Corinth, and renouncing the Peloponnesian confederacy to ally itself with Athens. (*Thucyd.*, 1, 103.—*Diod. Sic.*, 2, 60.) This state of things was not, however, of long duration; for the Corinthians, after effecting a reconciliation with the oligarchical party in Megara, persuaded the inhabitants to declare against the Athenians who garrisoned their city. These were presently attacked and put to the sword, with the exception of a small number who escaped to Nisæa. (*Thucyd.*, 1, 114.) The Athenians, justly incensed at this treacherous conduct, renounced all intercourse with the Megareans, and issued a decree excluding them from their ports and markets; a measure which appears to have been severely felt by the latter, and was made a pretence for war on the part of their Peloponnesian allies. (*Thucyd.*, 1, 67, 139.) Megara was, during the Peloponnesian war, exposed, with the other cities of Greece, to the tumults and factions engendered by violent party spirit. The partisans of the democracy favoured, it is true, the Peloponnesian cause; but, dreading the efforts of the adverse faction, which might naturally look for support from the Lacedæmonians in restoring the government

to the form of an oligarchy, they formed a plan of giving up the city to the Athenians in the seventh year of the war. An Athenian force was accordingly despatched, which appeared suddenly before Nisæa, the port of Megara, and, having cut off the Peloponnesian troops which garrisoned the place, compelled them to surrender. Megara itself would also have fallen into their hands, if Brasidas had not at this juncture arrived with a Spartan army before the walls of that city, where he was presently joined by the Boeotians and other allies. On his arrival, the Athenians, not feeling sufficiently strong to hazard an action, withdrew to Nisæa, and, after leaving a garrison in that port, returned to Athens. The leaders of the democratical party in Megara, now fearing that a reaction would ensue, voluntarily quitted the city, which then returned to an oligarchical form of government. (*Thucyd.*, 4, 66, *segg.*) From this period we hear but little of Megara in Grecian history; but we are told that its citizens remained undisturbed by the contest in which their more powerful neighbours were engaged, and in the tranquil enjoyment of their independence. "The Megareans," says Isocrates, "from a small and scanty commencement, having neither harbours nor mines, but cultivating rocks, nevertheless possess the largest houses of any people in Greece; and though they have but a small force, and are placed between the Peloponnesians, the Thebans, and our own city, yet they retain their independence and live in peace" (*de Pace*, p. 183).—Philosophy also flourished in this city, Euclid, a disciple of Socrates, having founded there a school of some celebrity, known by the name of the Megaric sect. (*Strab.*, 393.—*Cic., Orat.*, 8, 17.—*Id., Acad.*, 2, 42.)—Plutarch reports, that the Megareans offered to make Alexander the Great a citizen of their town, an honour which that prince was inclined to ridicule, though they asserted it had never been granted to any foreigner except Hercules. (*Plut., de Monarch.*, p. 238.) After the death of that monarch, Megara fell successively into the hands of Demetrius Poliorcetes, Ptolemy Soter, and Demetrius, son of Antigonus Gonatas, by whom, according to Plutarch, the city was destroyed (*de Instit. Puer.*, p. 3); but, as Pausanias mentions a war waged by the Megareans against Thebes, in which they were assisted by the Achæans, we may infer that it was subsequently restored (8, 50), and we know that it was taken by the Romans under Metellus (*Pausan.*, 7, 15) and Calenus. (*Plut., Vit. Brut.*) Strabo also affirms (393), that Megara still existed in his time, though much reduced, as we are assured by Sulpicius, in the well-known passage of his letter to Cicero (*ad Fam.*, 4, 5). "Post me erat Egina, ante Megara, dextra Piræus, sinistra Corinthus; quæ oppida quodam tempore florentissima fuerunt, nunc prostrata et diruta ante oculos jacent." Pausanias affirms, that Megara was the only city of Greece which was not restored by Hadrian, in consequence of its inhabitants having murdered Anthemocritus, the Athenian herald (1, 36). Alaric completed the destruction of this once flourishing city. (*Procop., Bell. Vand.*, 1, 1.—*Cramer's Anc. Greece*, vol. 2, p. 424, *segg.*)—II. A city of Sicily, founded by a colony from Megara in Greece. (*Vid. Hybla*, III.)

MEGARIS, a small territory of Greece, lying to the west and northwest of Attica. Its capital was Megara. (*Vid. Megara*; under which head an historical sketch is given.) It was separated from Boeotia, on the north, by the range of Mount Cithæron; and from Attica by the high land which descends from the northwest boundary of the latter country, and terminates, on the west side of the bay of Eleusis, in two summits, formerly called Kerata, or the Horns, and now Kendili. Megaris was divided from the Corinthian territory on the west by the Oenean range of mountains, through which there were only two roads from Corinth into Megaris: one of these, called

the Scironian Pass, which is the steep escarpment of the mountains that terminate on the coast of the Saronic Gulf, passed by Crommyon (*Strabo*, 391); and along the side of the escarpment was the direct road from Corinth to Athens. This road was made wide enough, by the Emperor Hadrian, for two vehicles abreast (*Pausan.*, 1, 40, 10), but at present it only admits a single vehicle, except in a few places (*Thiersch, De l'Etat Actuel de la Grece*, 2, p. 32); yet the road, on the whole, is in good condition. The other road, following the coast of the Corinthian Gulf, crossed the Geranean Mountains, which belong to the Oneian range, and led to Pegæ, on the Corinthian Gulf, and thence into Boeotia.—The extreme breadth of Megaris, from Pegæ to Nisea on the Corinthian Gulf, is reckoned by Strabo at 120 stadia; and the area of the country is calculated by Mr. Clinton, from Arrowsmith's map, at 720 square miles. (*Fest. Hell.*, vol. 2, p. 386.) Megaris is a rugged and mountainous territory, and contains only one plain of small extent, in which the capital Megara was situated. The rocks are chiefly, if not entirely, calcareous. The country is very deficient in springs. (*Encycl. Us. Knowl.*, vol. 15, p. 64.)

ΜΕΓΑΣΤΡΗΝΗΣ, a Greek historian and geographical writer in the age of Seleucus Nicator, king of Syria, about 300 years before Christ. He was sent by Seleucus to Palibothra in India, to renew and confirm a previous treaty with Sandrocottus, monarch of the Prasii. He remained there many years, and after his return he wrote, under the title of *Indica* (Ἰνδικά), an account of whatever he had seen or heard during his travels. His work is lost; but Strabo, Arrian, and *Ælian* have preserved some fragments of it. He was the first who made the western nations acquainted with the countries beyond the Ganges, and with the manners of their inhabitants. Strabo has on several occasions expressed an unfavourable opinion of the trustworthiness of Megasthenes; but still it is quite certain, that the work of the latter contained much valuable information, which was then entirely new to the Greeks. Megasthenes gave the first account of Taprobane or Ceylon. (*Schöll, Hist. Lit. Gr.*, vol. 3, p. 383.)

MELA, POMPONIUS, a geographical writer, the first Latin author of a general work on this subject, and who flourished during the reign of the Emperor Claudius. He was born in Spain, of an illustrious Roman family, the Pomponii, who pretended to trace up their lineage to Numa. Some critics have thought that Mela only belonged to this family by adoption, and that he was that third son of the rhetorician Marcus Seneca to whom this writer dedicated his works; while others are inclined to regard him as the grandson of Seneca the philosopher. (Consult *Tzschucke, Diss. de Pomp. Mel.*, c. 1.) In either of these cases, however, the word Annæus would most probably have been added to his name.—There is reason to believe that his true name was not Mela, but Mella. (Compare *Voss., de Hist. Lat.*, 1, 25.—*Fabricius, Bibl. Lat.*, 2, 8, p. 75, seq.—*Saxe, Onomast.*, 1, p. 243.—*Tzschucke, Diss. de Pomp. Mel.*) Pomponius Mela names his native city in one passage of his work (2, 6), but the text unfortunately is so corrupt, that it is uncertain whether we ought to read *Tingentura*, *Mellaria*, *Tartessus*, or *Tingisbera*. He lived, as has been already remarked, under the Emperor Claudius, for the passage (3, 6) in which he speaks of a triumph which the emperor was upon the point of celebrating over the Britons, can only apply to that monarch. Pomponius Mela was the author of a geographical outline or abridgment, entitled "*De Situ Orbis*," or, as some manuscripts read, "*De Choroграфия*." This work is divided into three books. After having spoken of the world in general, and given a sketch of the geography of Asia, Europe, and Africa, the writer

commences his more particular description with this latter country. Mauritania, as being the westernmost quarter, is treated of first; from this he proceeds in an eastern direction, traverses Numidia, Africa Propria, and Cyrenaica, and then describes Egypt, which latter country he regards as forming part of Asia. From Egypt he passes into Arabia, Syria, Phœnicia, Cilicia, and the different provinces of Asia Minor.—The second book opens with European Scythia. Mela then treats of Thrace, Macedonia, and Greece. He next passes into Illyria, and from Illyria into Italy. From Italy he proceeds to Gaul, and from Gaul to Spain. He finally describes the isles of the Mediterranean.—In the third book he returns to Spain, of which he had in the previous book described merely the westernmost part; he then gives an account of the Atlantic coast of Gaul, which conducts him to Germany, and from Germany he passes to Sarmatia and to the extremity of Scythia. Having thus gone round our hemisphere, he next gives an account of the islands in the Northern Ocean, of the Eastern Ocean, of India, and of the Red Sea, including under the last-mentioned appellation the Arabian and Persian Gulfs. He next passes to Ethiopia, and concludes his work by a description of the sea which washes the western shores of Africa.—Mela did not, like Strabo, actually visit a large portion of the countries which he describes: he has followed, however, though often without citing them, the best Greek and Roman authorities, and, above all, the geographical writings of Eratosthenes: he has consulted and followed these authorities with judgment and care, and has admitted into his work only a comparatively small number of fables, which must be set down to the account of the age in which he lived, when great ignorance still prevailed in relation to some of the simplest laws of nature. The style of his narrative is marked by conciseness and precision; he has been successful, at the same time, in avoiding the dryness of a mere nomenclature, by intermingling agreeable descriptions, physical discussions, and notices of remarkable events of which the places that he describes have been the theatre. His work, however, is not exempt from errors: sometimes, from not paying sufficient attention to the periods when the writers whom he follows respectively flourished, he describes things as existing which had ceased to exist; various omissions also occur in the course of his work; no mention, for example, is made of Cannæ, Munda, Pharsalia, Leuctra, and Mantinea, all famous in the annals of warfare; nor of Ecbatana and Persepolis, the capitals of great empires; nor of Jerusalem, to which so high a religious importance is attached; nor of Stagira, the native place of one of the greatest philosophers of antiquity. Like Strabo, he considers the earth as penetrated by four great inlets of the ocean, of which the Mediterranean, the Red Sea, and the Persian Gulf were three; the fourth was the Caspian Sea. This singular error as to the Caspian is the more remarkable, when contrasted with the fact that Herodotus knew the Caspian to be a lake. (*Herod.*, 1, 203.—*Strabo*, 121.—*Mela*, 1, 1.—*Id.*, 3, 6.)—The best editions of Mela are, that of Gronovius, *Lugd. Bat.*, 1685, 8vo, frequently reprinted, and that of Tzschucke, *Lips.*, 1807, 7 vols. 8vo (in 2).

ΜΕΛΑΜΠΡΟΣ, I. a celebrated soothsayer of Argos, son of Amythaon and Idomene, and famed also for skill in the healing art. His father resided at Pylos, but he himself lived in the country near that place. Before his house stood an oak-tree, in a hole of which abode some serpents. His servants finding these animals, killed the old ones, whose bodies Melampus burned, but he saved and reared the young ones. As he was sleeping one day, these serpents, which were now grown to full size, came, and getting each on one of his shoulders, licked his ears with their tongues.

He awoke in some terror; and, to his astonishment, found that he understood the voices of the birds which were flying around him; and, learning from their tongues the future, he was enabled to declare it to mankind. Meeting Apollo on the banks of the Alpheus, he was taught by him the art of reading futurity in the entrails of victims, and he thus became an excellent soothsayer. (*Apollod.*, 1, 9, 11.—*Schol. ad Apoll. Rhod.*, 1, 118.) Meanwhile, his brother Bias fell in love with Pero, the daughter of Neleus. As the hand of this beautiful maiden was sought by most of the neighbouring princes, her father declared that he would give her only to him, who should bring him from Thessaly the cows of his mother Tyro, which Iphiclus of Phylace detained, and which he guarded by means of a dog whom neither man nor beast could venture to approach. Bias, relying on the aid of his brother, undertook the adventure. Melampus, previously declaring that he knew he should be caught and confined for a year, but then get the cattle, set out for Phylace. Every thing fell out as he said.—The herdsman of Iphiclus took him, and he was thrown into prison, where he was attended by a man and a woman. The man served him well, the woman badly. Towards the end of the year he heard the worms in the timber conversing with one another. One asked how much of the beam was now gnawed through; the others replied that there was little remaining. Melampus immediately desired to be removed to some other place; the man took up the bed at the head, the woman at the foot, Melampus himself at the middle. They had not got quite out of the house, when the roof fell in and killed the woman. This coming to the ears of Iphiclus, he inquired, and learned that Melampus was a soothsayer or *Mantis*. He therefore, being childless, consulted him about having offspring. Melampus agreed to tell him on condition of his giving him the cows. The seer, on Iphiclus assenting to his terms, then sacrificed an ox to Jupiter, and, having divided it, called all the birds to the feast. All came but the vulture; but no one of them was able to tell how Iphiclus might have children. They therefore brought the vulture, who gave the requisite information. Iphiclus became the father of a son named Podarces; and Melampus drove the kine to Pylos, whereupon Pero was given to his brother. (*Od.*, 11, 287.—*Schol.*, *ad loc.*—*Od.*, 15, 225.—*Apollod.*, 1, 9, 11.—*Schol. ad Theocr.*, 3, 43.)—Melampus was also famous for the cure of the daughters of Proetus, who were afflicted with insanity. For an account of this legend, consult the article *Proetides*. (*Keighley's Mythology*, p. 436, *seq.*)—II. A writer on divination, who lived in the time of Ptolemy Philadelphus. He was the author of a treatise entitled *Μαντική περί παλμών*, "*Divination from vibrations of the muscles*," and of another styled *Περὶ ἑλαίων τοῦ σώματος*, "*Art of divining from marks on the body*." We have only fragments remaining of these two works. The library at Vienna contains another work of this same writer's, in manuscript, on the *Art of predicting from the phases of the moon*. The fragments of Melampus were edited by Perseus, at the end of his *Ælian*, Rome, 1645, 4to, and subsequently by Sylburgius, who, in his edition of Aristotle, reunited them to the physiognomical works of that philosopher. They are to be found also in the *Scriptores Physiognomiae Veteres* of Franz, Alenb., 1780, 8vo.

MELAMPYGES, an epithet applied to Hercules in the Greek mythology, and connecting him with the legend of the Cercopes. These last, according to Diodorus Siculus (4, 31), dwelt in the vicinity of Ephesus, and ravaged the country far and wide, while Hercules was leading with Omphale a life of voluptuous repose. Their mother had cautioned them against one to whom the name Melampyges should apply, but they

disregarded her warning, and the hero, having at length been roused from his inactivity, proceeded against them by order of Omphale, and, having overcome them, brought them to her in chains.—A different tradition placed the Cercopes in the islands facing the coast of Campania. Jupiter, according to this latter account, being engaged in his war with the Titans, came to these islands to demand succours of the Arimi. The people promised him their aid, but afterward made sport of him, whereupon the irritated deity changed them into apes (*πίθηκοι*), and from that period the islands of Insarime and Prochyta were called *Pithecusæ* (*Πιθηκοῦσαι*, from *πίθηκος*).—*Vid.*, however, another explanation under the article *Pithecusæ*.—The legend of the Cercopes appears to be an astronomical one. The Lydian Hercules is the sun, pale and enfeebled at the winter solstice, and which in some sense may be said to turn its obscurer parts upon the earth; while the Cercopes, as symbols of this period of languor, crowd around and insult him. On the approach, however, of the vernal equinox, the god resumes his former energies and subjugates his foes. In like manner Jupiter, the sun of suns, overcomes and dissipates all things that tend to obscure the light and disturb the repose of the universe. (*Guignaut*, vol. 2, p. 181.)

MELANCHLENTI, a people near the Cimærian Bosporus, so called from their black garments. Mannert conjectures them to have been the progenitors of the modern Russians. By later writers they are called *Rhoxolani*. (*Mannert*, *Geogr.*, vol. 4, p. 134, 167.)

MELANIPPIDES, I. a lyric poet, who flourished about 500 B.C. He was either, as some suppose, a native of the island of Melos, or, as others think, of the city of Miletus.—II. A poet, who lived about 446 B.C., at the court of Perdiccas II., king of Macedonia. He was the grandson of the former. Various poems are ascribed to these two individuals, and it is a difficult matter to make a division between them. They composed dithyrambs, epopees, elegies, and songs. The younger Melanippides is placed by Plutarch in the number of those who corrupted the ancient music by the novelties which they introduced. He also composed some tragedies. (*Schöll*, *Hist. Lit. Gr.*, vol. 1, p. 289.)

MELANIPPUS, a son of Astacus, one of the Theban chiefs who defended the gates of Thebes against the army of Adrastus, king of Argos. He was opposed by Tydeus, whom he wounded mortally. As Tydeus lay expiring, Minerva hastened to him with a remedy which she had obtained from Jupiter, and which would make him immortal; but Amphiarus, who hated Tydeus as the chief cause of the war, perceiving what the goddess was about, cut off the head of Melanippus, whom Tydeus, though wounded, had slain, and brought it to him. The savage warrior opened it and devoured the brain, and Minerva, in disgust, withheld her aid. (*Bacchyl.*, *ap. Schol. ad Aristoph. Av.*, 1536.—*Eurip.*, *Frag. Meleag.*, 18.—*Keighley's Mythology*, p. 479.)

MELANTHIUS, I. an Athenian tragic poet, of inferior reputation, a contemporary of Aristophanes. He was afflicted with the leprosy, to which the comic poet alludes in the *Aves* (v. 151). In the *Pax* (v. 974) he is ridiculed for his gluttony.—II. A painter, whose native country is uncertain. He was a contemporary of Apelles, and received, in connexion with him, the instructions of Pamphilus in the art of painting. (*Plin.*, 35, 10, 36.) Quintilian particularly mentions his skill in the designs of his pictures; and Pliny observes, that he was one of those painters who, with only four colours, produced pieces worthy of immortality. Even Apelles conceded to him the palm in the arrangement or grouping of his figures. (*Plin.*, l. c.) That his pictures were held in high estimation, is evident from

the circumstance that Aratus, no mean judge of works of art, collected from every quarter the productions of Melanthius along with those of Pamphilius, and made a present of them to Ptolemy III., king of Egypt. (*Plut., Vit. Arat.*, c. 21.) He left a treatise on Painting, a fragment of which has been preserved by Diogenes Laertius (4, 18), and of which Pliny availed himself in writing the 30th book of his Natural History. (*Sillig, Dict. Art.*, s. v.)

MELANTHUS, a son of Andropompus, whose ancestors were kings of Pylos, in Messenia. Having been driven by the Heracleidae from his paternal kingdom, he came to Athens, where Thymoetes, monarch of Attica, gave him a friendly reception. Some time after this, the Boeotians, under Xanthus, having invaded Attica, Thymoetes marched forth to meet them. Xanthus thereupon proposed to decide the issue of the war by single combat, but Thymoetes shrunk from the risk, whereupon Melanthus came forward and accepted the challenge. By a stratagem, famous in after ages, he diverted the attention of his adversary, and slew him as he turned to look at the ally whom Melanthus affected to see behind him. The victor was rewarded with the kingdom, which Thymoetes had forfeited by his pusillanimity, and which now passed for ever from the house of Erechtheus. Melanthus transmitted the crown to his son Codrus. (*Pausan.*, 2, 18.—*Thirlwall's Greece*, vol. 1, p. 274.)

MELAS (gen. -a), I. a deep gulf formed by the Thracian coast on the northwest, and the shore of the Chersonese on the southeast; its appellation in modern geography is the Gulf of *Saros*.—II. A river of Thrace, now the *Cavatcha*, emptying into the Sinus Melas at its northeastern extremity. (*Herod.*, 7, 58.—*Liv.*, 38, 40.—*Plin.*, 4, 11.)—III. A river of Thessaly, in the vicinity of the town of Trachis. (*Herod.*, 7, 199.—*Liv.*, 37, 24.)—IV. A small river of Boeotia, near Orchomenus, emptying into the Lake Copais. (*Pausan.*, 9, 39.) Plutarch says that it rose close to the city, and very soon became navigable, but that part of it was lost in the marshes, while the remainder joined the Cephissus. (*Vit. Syll.—Strab.*, 415.) Pliny remarks of its waters, that they had the property of dying the fleeces of sheep black (2, 103). In the marshes formed near the junction of this river with the Cephissus grew the reeds so much esteemed by the ancient Greeks for making pipes and other wind-instruments. (*Pindar, Pyth.*, 12, 42.—*Cramer's Anc. Greece*, vol. 2, p. 249.)—V. A river of Cappadocia, rising near Cæsarea ad Argaum, and falling into the Euphrates near the city of Melitene. Schillinger (*Reise*, p. 68) calls it the *Genrin*; but on D'Anville's map it bears in the beginning of its course the name of *Koremoz*, and near its mouth that of *Kirkhedid*. (*Mannert, Geogr.*, vol. 6, pt. 2, p. 296.)—VI. A river of Pamphylia, rising in the range of Mount Taurus, to the west of Homonada, and running into the sea between Side and Coracesium. (*Strabo*, 667.) It formed originally the boundary between Pamphylia and Cilicia. (*Plin.*, 6, 27.) According to Leake, there can be no doubt that the Melas is the river now called *Menaugüt-su*, for Zosimus (5, 16) and Mela (1, 14) agree in showing its proximity to Side. Strabo, Mela, and the Stadiasmus, all place it to the eastward of Side, and the distance of 50 stadia in the Stadiasmus between the Melas and Side is precisely that which occurs between the ruins of Side and the mouth of the river of Menaugat. (*Leake's Tour*, p. 196.)

MELDÆ or MELDORUM URBS, a city of Gaul, now *Meaux*. (*Cæs.*, B. G., 5, 5.—*Plin.*, 4, 13.)

MELEAGER, I. a celebrated hero of antiquity, son of Ceneus, king of Ætolia, by Althæa, daughter of Thestius. When he was seven days old, the Moiræ or Fates came to the dwelling of his parents, and declared that when the billet which was burning on the

hearth should be consumed, the babe would die. Althæa, on hearing this, snatched the billet from the fire, and laid it carefully away in a coffer. The fame of Meleager increased with his years; he signalized himself in the Argonautic expedition, and subsequently in the Calydonian boar-hunt. Of this latter event there appear to have been two legends, an earlier and a later one. The former appears to have been a tale of great antiquity, and is commemorated in the *Iliad* (9, 527). According to this version of the story, Ceneus, in the celebration of his harvest-home feast (*θάλυσια*), had treated Diana with neglect, and the goddess took vengeance upon him by sending a wild boar of surpassing size and strength to ravage the territory of Calydon. Hunters and dogs were collected from all sides, and the boar was, with the loss of several lives, at length destroyed. A quarrel arose, however, between the Curetes and Ætoliens about the head and hide, and a war was the consequence. As long as Meleager fought, the Curetes had the worst of it, and could not keep the field; but when, enraged at his mother Althæa, he remained with his wife the fair Cleopatra, and abstained from the war, noise and clamour rose about the gates, and the towers of Calydon were shaken by the victorious Curetes: for Althæa, grieved at the fate of her brother, who had fallen in the fight, had with tears invoked Pluto and Proserpina to send death to her son. The elders of the Ætoliens supplicated Meleager: they sent the priests of the gods to entreat him to come forth and defend them; they offered him a piece of land (*τρεμενος*) of his own selection. His aged father Ceneus ascended to his chamber and implored him, his sisters and his mother supplicated him, but in vain. He remained inexorable, till his very chamber was shaken, when the Curetes had mounted the towers and set fire to the town. Then his wife besought him with tears, picturing to him the evils of a captured town, the slaughter of the men, the dragging away into captivity of the women and children. Moved by this last appeal, he arrayed himself in arms, went forth and repelled the enemy; but, not having done it out of regard for them, the Ætoliens did not give him the proffered recompense.—Such is the more ancient form of the legend, in which it would appear that the Ætoliens of Calydon and the Curetes of Pleuron alone took part in the hunt. In after times, when the vanity of the different states of Greece made them send their national heroes to every war and expedition of the mythic ages, it underwent various modifications. Meleager, it is said (*Nicand., ap. Anton. Lib.*, 2.—*Apollod.*, 1, 8, 2.—*Ovid, Met.*, 8, 270, *seqq.*—*Hygin., fab.*, 181, 5), invited all the heroes of Greece to the hunt of the boar, proposing the hide of the animal as the prize of whoever should slay him. Of the Ætoliens there were Meleager, and Dryas son of Mars; of the Curetes, the sons of Thestius; Idas and Lynceus, sons of Aphareus, came from Messene; Castor and Pollux, sons of Jupiter and Leda, from Laconia; Atalanta, daughter of Iasus, and Ancæus and Cepheus, sons of Lycurgus, from Arcadia; Amphiaræus, son of Oicles, from Argos; Telamon, son of Æacus, from Salamis; Theseus, son of Ægeus, from Athens; Iphicles, son of Amphitryon, from Thebes; Peleus, son of Æacus, and Eurytion, son of Actor, from Phthia; Jason, son of Æson, from Iolcos; Admetus, son of Pheres, from Phere; and Pirithoüs, son of Ixion, from Larissa.—These chiefs were entertained during nine days in the house of Ceneus. On the tenth, Cepheus and Ancæus, and some others, refused to hunt in company with a maiden; but Meleager, who was in love with Atalanta, obliged them to give over their opposition. The hunt began; Ancæus and Cepheus speedily met their fate from the tusks of the boar: Peleus accidentally killed Eurytion: Atalanta, with an arrow, gave the monster the first wound; Amphiaræus shot him in the eye; and

Meleager ran him through the flanks and killed him. He presented the skin and head to Atalanta; but the sons of Thestius, his two uncles, offended at this preference of a woman, took the skin from her, saying that it fell to them of right, on account of their family, if Meleager resigned his claim to it. Meleager, in a rage, killed them, and restored the skin to Atalanta. Althæa, on hearing of the death of her brothers, influenced by resentment for their loss, took from its place of concealment the billet, on which depended the existence of Meleager, and cast it into the flames. As it consumed, the vigour of Meleager wasted away; and when it was reduced to ashes, his life terminated. Repenting, when too late, of what she had done, Althæa put an end to her own life. Cleopatra died of grief; and the sisters of Meleager, who would not be comforted in their affliction, were, by the compassion of the gods, all but Gorgo and Deianira, changed into birds called Meleagrides.—There was another tradition, according to which Meleager was slain by Apollo, the protecting deity of the Curetes. (*Pausan.*, 10, 31, 3.—*Keightley's Mythology*, p. 321, *seqq.*)—II. A Greek poet, a native of Gadara in Coele Syria, and either contemporary with Antipater, or a very short time subsequent to him. He composed several works of a satirical character, which we find quoted under the following titles: 1. Σμπόσιον, "*The Banquet*."—2. Λεκιθου καὶ φακῆς σύγκρισις, "*A mixture of yolks of eggs and beans*."—3. Χάριτες, "*The Graces*."—Jacobs, however, thinks that the whole collection of his satires may have been rather entitled *Χάριτες*. (*Animadv. in Anthol.*, 1, 1.—*Prolegom.*, p. xxxviii.)—III. Another poet, who has left about 130 epigrams. They are marked by purity of diction and by feeling, but they betray, at the same time, something of that sophistic subtlety which characterized his age. Occasionally we meet with words rather too boldly compounded. Meleager was the first who made a collection of epigrams, or an anthology. He entitled it *Στέφανος*, "*The Crown*." It contained a selection of the best pieces of forty-six poets, arranged in alphabetical order according to the names of the authors. This compilation is lost. (*Schöll, Hist. Lit. Gr.*, vol. 4, p. 45, 55.)

MELÆAGRĪDES, the sisters of Meleager, daughters of Ceneus and Althæa. They were so disconsolate at the death of their brother Meleager, that they refused all aliment, and were changed into birds called Meleagrides. The youngest of these sisters, Gorgo and Deianira, who had been married, alone escaped this metamorphosis. (*Apollod.*, 1, 8.—*Ovid, Met.*, 8, 540.)

MELES (etis), a river of Asia Minor, near Smyrna. Some of the ancients supposed that Homer was born on the banks of this river, from which circumstance they call him *Melesigenes*. They also showed a cave, where it was said that Homer had composed his verses. (*Pausan.*, 7, 5.) Chandler informs us that he searched for this cavern, and succeeded in discovering it above the aqueduct of the Meles. It is about four feet wide, the roof of a huge rock, cracked and slanting, the sides and bottom sandy. Beyond it is a passage cut, leading into a kind of well. (*Travels in Asia Minor*, p. 91.) According to the same traveller, the Meles, at the present day, is shallow in summer, not covering its rocky bed; but, winding in the deep valley behind the castle of Smyrna, it murmurs among the evergreens, and receives many rills from the slopes; after turning an overshot mill or two, it approaches the gardens without the town, where it branches out into small canals, and is divided and subdivided into still smaller currents, until it is absorbed, or reaches the sea, in ditches, unlike a river. In winter, however, after heavy rains, or the melting of snow on the mountains, it swells into a torrent rapid and deep, often not fordable without danger; and it then finds its

way into the inner bay, where the ancient city stood. (*Chandler's Travels*, p. 76, *seqq.*)

MELÉSIGENES or MELÉSIGENAI, a name given to Homer. (*Vid.* Meles and Homerus.)

MELIBŒA, I. a town of Thessaly, in the district of Estimotie, near Ithome. (*Liv.*, 36, 13.)—II. A city of Thessaly, in the district of Magnesia. According to Livy (44, 13), it stood at the base of Mount Ossa, in that part which stretches towards the plains of Thessaly, above Demetrias. Homer assigns it to the domains of Philoctetes (*Il.*, 2, 716), hence called "*Melibœus dux*" by Virgil. (*Æn.*, 3, 401.) Melibœa was attacked in the Macedonian war by M. Popilius, a Roman commander, at the head of five thousand men; but the garrison being re-enforced by a detachment from the army of Perseus, the enterprise was abandoned. (*Livy*, l. c.) We know from Apollonius (*Arg.*, 1, 592) that it was a maritime town. (*Cramer's Anc. Greece*, vol. 1, p. 423.) According to Pouqueville (*Voyage*, vol. 3, p. 404), the village of *Daouki* indicates the site of the ancient Melibœa. (Compare *Paul Lucas's map*, appended to his *Travels*, 1704.)

MELICERTA or MELICERTES, a son of Athamas and Ino. He was saved by his mother from the fury of his father, who prepared to dash him against a wall as he had done his brother Learchus. The mother was so terrified that she threw herself into the sea, with Melicerta in her arms. Neptune had compassion on Ino and her son, and changed them both into sea-deities. Ino was called Leucothoë or Matuta, and Melicerta was known among the Greeks by the name of Palemon, and among the Latins by that of Portunus. (*Vid.* Leucothoë and Ino. — *Apollod.*, 1, 9; 3, 4.—*Pausan.*, 1, 44.—*Ovid, Met.*, 4, 529.)

MELIŒNIS, one of the earlier names of Lipara. (*Vid.* Lipara.)

MELI. *Vid.* Malii.

MELISSA, I. a daughter of Melissus, king of Crete, who, with her sister Amalthæa, fed Jupiter with the milk of goats. According to the account quoted by Lactantius, she was appointed by her father the first priestess of Cybele. (*Lactant.*, 1, 22.)—II. A nymph, who first discovered the means of obtaining honey through the aid of bees. She was fabled to have been herself changed into one of these little creatures. (*Columell.*, 9, 2.)—III. One of the Oceanides, who married Inachus, by whom she had Phoroneus and Ægialus.—IV. A daughter of Procles, who married Periander, the son of Cypselus, by whom, in her pregnancy, she was killed with a blow of his foot, by the false accusation of his concubines. (*Diog. Laert.*, 1, 100.—*Herod.*, 3, 50.—*Bähr, ad Herod.*, l. c.—*Pausan.*, 1, 28.)

MELISSUS, a philosopher of Samos, of the Eleatic sect, who flourished about 440 B.C. He was a disciple of Parmenides, to whose doctrines he closely adhered. As a public man, he was conversant with affairs of state, and acquired great influence among his countrymen, who had a high veneration for his talents and virtues. Being appointed by them to the command of a fleet, he obtained a great naval victory over the Athenians. As a philosopher, he maintained that the principle of all things is one and immutable, or that whatever exists is one being; that this one being includes all things, and is infinite, without beginning or end; that there is neither vacuum nor motion in the universe, nor any such thing as production or decay; that the changes which it seems to suffer are only illusions of our senses, and that we ought not to lay down anything positive concerning the gods, since our knowledge of them is so uncertain. The mistocles is said to have been one of his pupils. (*Enfield's History of Philosophy*, vol. 1, p. 418, *seqq.*)

MELITA, I. an island in the Mediterranean, sixty miles southeast of Sicily, now *Malta*. It is first mentioned by Scylax (p. 50), but is considered by him as

belonging to Africa, from its having Punic inhabitants, and being no farther from Africa than from Sicily. The earlier Greek historians do not mention it, since it was regarded as a Carthaginian island, and lay without their historical limits. Diodorus Siculus is the first that gives us any account of it. "There are," he says, "over against that part of Sicily which lies to the south, three islands at a distance in the sea, each of which has a town and safe ports for ships overtaken by tempests. The first, called Melita, is about 800 stadia from Syracuse, and has several excellent harbours. The inhabitants are very rich, inasmuch as they exercise many trades, and, in particular, manufacture cloths remarkable for their softness and fineness. Their houses are large, and splendidly ornamented with projections and stucco (*yeλσoσις καὶ κοινίψασι*). The island is a colony of the Phœnicians, who, trading to the Western Ocean, use it as a place of refuge, because it has excellent ports, and lies in the midst of the sea. Next to this island is another named Gaulus (*Gozo*), with convenient harbours, which is also a colony of Phœnicians." (*Diod. Sic.*, 5, 13.) Malta is said to have been subsequently occupied by the Greeks; but, however this may be, the Carthaginians obtained possession of it B.C. 402. In the first Punic war it was plundered by the Roman consul Attilius. (*Oratius*, 4, 8.) In the second Punic war it surrendered to the Romans, and was regarded henceforth as an appendage to the province of Sicily. Its commerce declined under its new masters, and the island became a not unfrequent haunt of pirates. It appears, however, that its temple of Juno was rich enough to be an object of plunder to the rapacious Verres when he was prætor of Sicily. (*Cic. in Verr.*, 4, 46.) The linen cloth of Malta was considered an article of luxury at Rome. After the division of the Roman empire at the death of Constantine, this island was included in the share allotted to Constantius. It fell subsequently into the hands of the Goths, who were expelled by Belisarius, A.D. 533. The Arabs conquered it in 870, and though it was recovered, and held by the Eastern empire for the space of 84 years, it was retaken by the Arabs, and the Greek inhabitants were exterminated. In 1120, Count Roger, the Norman conqueror of Sicily, took possession of Malta and expelled the Arabs. Malta was thus again attached to the island of Sicily, and it became subject to the different dynasties which successively governed that island. In 1516, Sicily, with the Maltese islands, passed to the Emperor Charles V., as heir to the crown of Arragon. On the 4th March, 1530, Charles granted to the Knights of St. John, who had been recently expelled from Rhodes by the Turks, the ownership of all the castles, fortresses, and isles of Tripoli, Malta, and Gozo, with complete jurisdiction. The sovereignty of Malta was by this grant, in effect, surrendered to the knights, though the form of tenure from the crown of Sicily was maintained by the reservation of the annual payment of a falcon by the same to the King of Sicily or his viceroy. It was soon fortified by the knights, and underwent several memorable sieges. In 1798, Bonaparte took possession of it on his expedition to Egypt; and in 1800, the French garrison was obliged by famine to capitulate to a British force. In 1814, the possession of it was confirmed to Great Britain by the treaty of Paris.—The cotton manufactories of Malta have been celebrated for many ages, and would seem to trace their origin to the times of the Phœnicians. The soil consists of a thin covering of earth on a soft, calcareous rock, and is increased by breaking up the surface of the stone into a sort of gravel, and mixing it through the earth. It is no uncommon thing, however, for soil to be transported from Sicily, especially when a proprietor wishes to make a new garden; a fact that could hardly be inferred from the number and excellent flavour of the Maltese oranges, from its beautiful

roses, and the exhalations of a thousand flowers.—The city of Melita, the ancient capital, lay some distance inland, where *Citta Pinto* is at present situated.—Two questions are connected with this island. The first relates to the voyage of St. Paul, which will be considered under Melita II.; the other is of a more trivial nature, namely, which island, this or the Illyrian Melita (now *Meleda*), furnished the *Catuli Melitæi*, so much esteemed by the Roman ladies. Pliny, on the authority of Callimachus and Stephanus of Byzantium, pronounces in favour of *Meleda*, Strabo of *Malta* (280).—II. An island in the Adriatic, northwest of Epidaurus, and lying off the coast of Dalmatia. Its modern name is *Meleda*.—The question has often been agitated, whether it was on this island, or Melita (now *Malta*) below Sicily, that St. Paul was shipwrecked. (*Acts*, 27 and 28.) Upon a fair review of the whole subject, it will be found that the Illyrian island presents the better claim to this distinction. The following reasons may be alleged in favour of this side of the question: 1. The vessel, when lost, was in "Adria," the Adriatic Gulf, which cannot by any geographical contrivance be made to extend, as some would wish to have it, to the coast of Africa.—2. The island on which the Apostle was wrecked was an obscure one in the Adriatic sea, formerly called Melita, and now known by the name of *Meleda*. This island lies confessedly in the Adriatic, off the coast of Illyricum; it lies, too, nearer the mouth of the Adriatic than any other island of that sea, and would, of course, be more likely to receive the wreck of any vessel that would be driven by tempests to that quarter.—3. *Meleda* is situated, moreover, nearly N.W. by N. of the southwest promontory of Crete, and nearly in the direction of a storm from the southeast quarter.—4. The manner likewise in which Melita is described by St. Luke agrees with the idea of an obscure place, but not with the celebrity of Malta at that time. Cicero speaks of Melita (*Malta*) as abounding in curiosities and riches, and possessing a remarkable manufacture of the finest linen. (*Orat. in Verr.*, 4, 18, 46.) Malta, according to Diodorus Siculus (5, 1), was furnished with many and very good harbours, and the inhabitants were very rich; for it was full of all sorts of artificers, among whom were excellent weavers of fine linen. The houses were stately and beautiful, and the inhabitants, a colony of Phœnicians, famous for the extent and lucrative nature of their commerce. It is difficult to suppose that a place of this description could be meant by such an expression as "an island called Melita;" nor could the inhabitants, with any propriety of speech, be understood by the epithet "barbarous." But the Adriatic Melita perfectly corresponds with that description. Though too obscure and insignificant to be particularly noticed by ancient geographers, the opposite and neighbouring coast of Illyricum is represented by Strabo in such a way as perfectly corresponds with the expression of the apostle.—5. Father Giorgi, an ecclesiastic of Melita Adriatica, who has written on this subject, suggests, very properly, that as there are now no serpents in Malta, and as it should seem there were none in the time of Pliny, there never were any there, the country being dry and rocky, and not affording shelter or proper nourishment for animals of this description. But *Meleda* abounds with these reptiles, being woody and damp, and favourable to their way of life and propagation.—6. The disease with which the father of Publius was affected (dysentery combined with fever, probably intermittent) affords a presumptive evidence of the nature of the island. Such a place as Malta, dry, and rocky, and remarkably healthy, was not likely to produce such a disease, which is almost peculiar to moist situations and stagnant waters, but might well suit a country woody and damp, and, probably for want of draining, exposed to the putrid effluvia of confined moisture.—7. It has been alleged, however, in favour

of *Malta's* having been the island in question, that, had *Meleda* been the one, St. Paul would not have called at *Syracuse* in his way to *Rhegium*, "which is so far out of the track," says a writer who advocates this opinion, "that no example can be produced in the history of navigation of any ship going so far out of her course, except it was driven by a violent tempest." This argument tends principally to show that the writer had a very incorrect idea of the relative situations of the places to which he refers. The ship which carried St. Paul from the Adriatic to *Rhegium* would not deviate from its course more than half a day's sail by touching at *Syracuse*; and the delay so occasioned would probably be but a few hours more than it would have been had they proceeded to *Syracuse* in their way to the Straits of *Messina* from *Malta*. Besides, the master of the ship might have, and probably had, some business at *Syracuse*, which had originated at *Alexandria*, from which place it must have been originally intended that the ship should commence her voyage to *Puteoli*; and in this course the calling at *Syracuse* would have been the smallest deviation possible.—8. Again, supposing the ship to have come from *Malta*, it must have been on account of some business, probably commercial, that they touched at *Syracuse* in their way to *Puteoli*, as *Malta* is scarcely more than one day and night's sail from *Syracuse*: whereas there might be some reasons respecting the voyage, had the ship come from *Meleda*, which is more than five times that distance, and probably a more uncertain navigation.—9. As regards the wind *Euroclydon*, it may be observed, that the word evidently implies a southeast wind. It is composed of *Εὐρος*, the southeast wind, and *κλύδων*, a wave, an addition highly expressive of the character and effects of this wind; but probably chiefly applied to it when it became typhonic or tempestuous. Typhon is described by *Pliny* (2, 48) as *præcipuo navigantium pestis, non antennis modo, verum ipsa navigia contorta frangens*. The course of the wind from the southeast would impel the ship towards the island of *Crete*, though not so directly but that they might weather it, as they in fact did, and got clear, though it appears they encountered some risk of being wrecked when running under, or to the south of, the island of *Clauda* or *Gaudos*, which lies opposite to the port of *Phœnice*, the place where they proposed to winter. A circumstance occurs in this part of the narrative which creates some difficulty. They who navigated the ship were apprehensive of falling among the *Syrtes*, which lay on the coast of *Africa*, nearly to the southwest of the western point of *Crete*. But we should consider that this danger lay only in the fears of the mariners, who, knowing the *Syrtes* to be the great terror of those seas, and probably not being able to ascertain from what quarter the wind blew, neither sun nor stars having been visible for several days, and as these violent typhonic Levanters are apt to change their direction, might entertain apprehensions that they might be cast on these dangerous quicksands. The event, however, proved that the place of their danger was mistaken. (*Classical Journal*, vol. 19, p. 212, seqq.—*Hale's Analysis of Chronology*, vol. 1, p. 464, seqq., ed. 2d, 1830.)

MELITENE, a district of *Asia Minor*, in the south-eastern part of *Armenia Minor*, and lying along the right bank of the *Euphrates*. The soil was fertile, and yielded fruits of every kind; in this respect differing from the rest of *Cappadocia*, of which *Armenia Minor* was a part. The chief product was oil, and a wine called *Monarites*, which equalled the best of *Grecian* growth. (*Strab.*, 536.—*Plin.*, 6, 3.) Its capital was *Melitene*, now *Malatya*, on a branch of the river *Melas*. (*Plin.*, 5, 24.—*Steph. Byz.*, s. v.—*Procop.*, de *Ædific.*, 3, 5.)

MELITUS, one of the accusers of *Socrates*. After

he had prevailed, and *Socrates* had been ignominiously put to death, the Athenians repented of their severity to the philosopher. *Melitus* was condemned to death; and *Anytus*, another of the accusers, to escape a similar fate, went into voluntary exile. (*Diog. Laert.*, 2.)

MELIUS or **MÆLIUS**, *Spurius*, a Roman knight, suspected of aiming at kingly power, in consequence of his uncommon liberality in supplying the populace with corn. He was summoned by the dictator *L. Q. Cinncinnatus* to appear before him; and, having refused so to do, was slain on the spot by *Ahala*, the master of the horse. (*Liv.*, 4, 13, seqq.—*Vid. Equimelium*.)

MELLA or **MELA**, a small river of *Cisalpine Gaul*, near *Brixia*. It retains its ancient name. (*Virg.*, *Georg.*, 4, 278.—*Catullus*, 66, 32.)

MELOS, now *Milo*, an island in the *Ægean Sea*, forming one of the group of the *Cyclades*. It was situated, according to *Strabo* (84), about 700 stadia to the southeast of *Cape Scyllæum*, and nearly as many, in a northeastern direction, from the *Dictynnean* promontory in *Crete*. It was first inhabited by *Phœnicians* (*Steph. Byz.*, s. v. *Μήλος*), and afterward colonized by *Lacedæmon*, nearly 700 years, as *Thucydides* relates, before the *Peloponnesian* war. This island adhered to the interest of that state against the Athenians, and successfully resisted at first an attempt made by the latter to reduce it. (*Thucyd.*, 3, 91.) But some years after, the Athenians returned with a greater force; and, on the rejection of all their overtures, in a conference which the historian has preserved to us, they proceeded to besiege the principal town, which they at length captured after a brave and obstinate resistance. Having thus gained possession of the city, they, with a degree of barbarity peculiar to that age, put all the males to death, enslaved the women and children, and sent 500 colonists into the island. (*Cramer's Anc. Greece*, vol. 3, p. 404.)

MELPES, a river of *Lucania*, flowing into the sea to the southeast of the promontory of *Palinurus*. (*Plin.*, 3, 5.) It is now the *Molpa*, and is probably the same stream which *Lycophron* (v. 1083) calls the *Memblæ*.

MELPOMENE, one of the *Muses*, daughter of *Jupiter* and *Mnemosyne*. Her name is derived from *μελπομαι*, "to celebrate in song." She presided over tragedy, of which the poets made her the inventress. Hence the language of *Ansonius*, "*Melpomene tragico proclamat moesta boata*." (*Auson.*, *Idyll.* ult., v. 2.) She was commonly represented as veiled, and holding in her hand a tragic mask. Her instrument was the lyre. *Melpomene* became, by the river-god *Acheloüs*, the mother of the *Sirens*. (*Vid. Muses*.)

MEMMIA (more correctly **REMMIA**) *Lex*, a law, by whom proposed, or in what year, is uncertain. It ordained, that an accusation should not be admitted against those who were absent in the service of the public. (*Val. Max.*, 3, 7, 9.—*Suet.*, *Vit. Jul.*, 23); and if any one was convicted of false accusation, that he should be branded on the forehead with a letter; probably *K*, as anciently the name of this crime was written **KALUMNIA**.—As regards the correct form of the name of this law, consult *Heineccius*, *Ant. Rom.*, p. 731, ed. *Haubold*.

MEMMI, the name of one of the branches of an old plebeian house, who were themselves subdivided into the families of the *Galli* and *Gemelli*. The most remarkable of the *Memmi* were the following.—I. *C. Memmius Gallus*, was prætor B.C. 176 and 170, and afterward ambassador to the *Ætolians*.—II. *C. Memmius Gallus*, son of the preceding, was tribune of the commons, and a bold and popular speaker. It was he who induced the people to summon *Jugurtha*, king of *Numidia*, to Rome, in order to expose, if possible, by his means, the corruption of the Roman nobility. (*Vid. Jugurtha*.) He was afterward elected consul, B.C. 100, but was assassinated by *Glaucia*, a dis

appointed candidate. (*Vid.* Marius.)—III. L. Memninus Gemellus, was tribune of the commons B.C. 64. and prætor B.C. 59, in which latter capacity he had the government of Bithynia. He was distinguished as an orator and poet, and was the friend and patron of Catullus and Lucretius, the latter of whom dedicated his poem to him. Cicero describes him as a man of great literary acquirements, and well acquainted with the Grecian language and literature. (*Brut.*, 70.) The same writer, however, represents him elsewhere as a man of licentious habits. (*Ep. ad Att.*, 1, 18.) He was an opponent of Cæsar's, and was driven into exile by means of the latter, on the charge of bribery in suing for the consulship, and also of extortion in the province of Bithynia. He died in exile. (*Cic., Ep. ad Fam.*, 13, 1.—*Manut.*, ad loc.—*Id.*, *Ep. ad Att.*, 6, 1.—*Ernesti*, *Ind. Hist.*, s. v.)

MEMNON, I. a personage frequently mentioned by the Greek writers. He is first spoken of in the *Odyssey* as the son of Eos, or the morning, as a hero remarkable for his beauty, and as the vanquisher of Antilochus (4, 188; 11, 521). Hesiod calls him the King of the Ethiopians, and represents him as the son of Tithonus. (*Theog.*, 986.) He is supposed to have fought against the Greeks in the Trojan war, and to have been slain by Achilles. In the *Œgyptiaca*, a lost drama of Æschylus, the dead body of Memnon is carried away by his mother Eos. (*Fragm. No.* 281, ed. *Dindorf*.) He is represented by most Greek writers as King of the Ethiopians, but he is also said to have been connected with Persia. According to Diodorus (2, 22), Tithonus, the father of Memnon, governed Persia, at the time of the Trojan war, as the viceroy of Teutamus, the Assyrian king; and Memnon erected at Susa the palace which was afterward known by the name of Memnonium. Diodorus also adds, that the Ethiopians claimed Memnon as a native of their country. Pausanias combines the two accounts: he represents Memnon as king of the Ethiopians, but also says that he came to Troy from Susa, and not from Ethiopia, subduing all the nations in his way. (*Pausan.*, 10, 31, 6.—*Id.*, 1, 42, 2.) Æschylus also, according to Strabo, spoke of the Cissian, that is, Susian, parentage of Memnon (*Strabo*, 720): and Herodotus mentions the palace at Susa, called Memnonia, and also says, that the city itself was sometimes described by the same name. (*Herod.*, 5, 53, seq.—*Id.*, 7, 151.) The great majority of Greek writers agree in tracing the origin of Memnon to Egypt or Ethiopia; and it is not improbable that the name of Memnon was not known in Susa till after the Persian conquest of Egypt, and that the buildings there called Memnonian by the Greeks were, in name, at least, the representative of those in Egypt. The partial deciphering of the Egyptian proper names affords us sufficient reason for believing, with Pausanias (1, 42, 2), that the Memnon of the Greeks may be identified with the Egyptian Phamenoph, Phamenoth, Amenophis, or Amenothph, of which name the Greek one is probably only a corruption. Phamenoph is said to mean "the guardian of the city of Ammon," or "devoted to Ammon," "belonging to Ammon."—Memnon, then, must be regarded as one of the early heroes or kings of Egypt, whose fame reached Greece in very early times. In the eighteenth dynasty of Manetho the name of Amenophis occurs, with this remark: "This is he who is supposed to be the Memnon and the vocal stone." He is Amenophis II., and the son of Thutmosis, who is said to have driven the shepherds out of Egypt.—As regards the vocal statue of Memnon, consult the article Memnonium II. (*Encycl. Us. Knowl.*, vol. 16, p. 88, seq.)—II. A native of Rhodes, the brother of the wife of Artabazus satrap of Lower Phrygia. He was advanced, together with his brother Mentor, to offices of great trust and power by Darius Ochus, king of Persia. We are ignorant of the time of Memnon's birth, but

he is mentioned by Demosthenes as a young man in B.C. 352. (*Aristocrat.*, p. 673.) Memnon possessed great military talents, and was intrusted by Darius Codomannus, the last king of Persia, on the invasion of Asia by Alexander, with an extensive command in Western Asia; but his plans were thwarted and opposed by the satraps, and it was contrary to his advice that the Persians offered battle to the Macedonians at the Granicus. After the defeat of the Persians on this occasion, Memnon was appointed to the chief command in Western Asia, as the only general who was able to oppose the Macedonians. He first retired to Miletus, and afterward withdrew to Halicarnassus in Caria, which he defended against Alexander, and only abandoned it at last when it was no longer possible to hold out. After the fall of Halicarnassus, Memnon entered into negotiations with the Lacedæmonians, with the view of attacking Macedonia. He was now completely master of the sea, and proceeded to subdue the islands in the Ægean. He took Chios, and obtained possession of the whole of Lesbos, with the exception of Mytilene, before which place he died, B.C. 333. The loss of Memnon was fatal to the Persian cause: if he had lived, he would probably have invaded Macedonia, and thus have compelled Alexander to give up his prospects of Asiatic conquest, in order to defend his own dominions. (*Arrian*, *Exp. Al.*, 1, 20, seq.—*Id. ib.*, 2, 1, seq.—*Diod. Sic.*, 16, 52.—*Id.*, 17, 23, seq.—*Encycl. Us. Knowl.*, vol. 15, p. 89.)—III. A native of Heraclea Pontica, in Bithynia, generally regarded as contemporary with Augustus, but who, in the opinion of some critics, ought to be placed in a later period. He wrote a history of his native city, and of the tyrants who had ruled over it, in twenty-four books. Photius has preserved for us an abridgment, or, rather, an extract from the 9th to the 16th book; for already, in his time, the first eight, as also the last eight books, were lost; and it is precisely from this circumstance that we are unable to fix the period when the history terminated, and which would give us some idea of the time when the author flourished. The extracts preserved by Photius are more interesting from the fact of Memnon's speaking, in the course of them, by way of digression, of other nations and communities with whom his townsmen had at any time political intercourse or relations. These extracts extend from the first year of the 104th Olympiad (B.C. 364) to B.C. 46.—The latest and best edition of the fragments of Memnon is that of Orellius, *Lips.*, 1816, 8vo, containing fragments of the works of other writers of Heraclea. (*Schöll*, *Hist. Lit. Gr.*, vol. 4, p. 165.)

MEMNONIUM, I. the citadel of Susa. The city also bore the epithet of "Memnonian." (*Herod.*, 5, 54; 7, 151.—Compare remarks under the article Memnon I.)—II. A splendid structure at Thebes, in Egypt, on the western side of the river. The ruins of the Memnonium are regarded at the present day as perhaps the most ancient in Thebes. This beautiful relic of antiquity looks to the east, and is fronted by a vast propylæon, of which 234 feet in length are still remaining. The main edifice has been about 200 feet wide and 600 feet long, containing six courts and chambers, passing from side to side, with about 160 columns thirty feet high. All the sidewalks have been broken down, and the materials of which they were composed carried away; nothing remaining but a portion of the colonnade and the inner chambers, to testify to the traveller what a noble structure once occupied this interesting spot. Champollion considers the Memnonium to be the same with the tomb of Osymandias, described by Diodorus Siculus (1, 47). In the Memnonium is still to be seen the statue of Osymandias. It is pronounced to be by far the finest relic of art which the place contains, and to have been once its brightest ornament, though at present it is thrown down from its pedestal, laid prostrate on the

ground, and shattered into a thousand pieces. It is about 26 feet broad between the shoulders, 54 feet round the chest, and 13 feet from the shoulder to the elbow. There are on the back and on both arms hieroglyphical tablets, extremely well executed, which identify this enormous statue with the hero whose achievements are sculptured on the walls of the temple. This figure has sometimes been confounded with that which bears the name of Memnon, and which has so long been celebrated for its vocal qualities. The latter, however, is one of the two statues vulgarly called Shama and Dama, which stand a little distance from *Medinet Abou* towards the Nile. These, we are told, are nearly equal in magnitude, being about 52 feet in height. The thrones on which they respectively rest are 30 feet long, 18 broad, and between seven and eight feet high. They are placed about 40 feet asunder; are in a line with each other, and look towards the east, directly opposite to the temple of Luxor. If there be any difference of size, the southern one is the smaller. It appears to be of one entire stone. The face, arms, and front of the body have suffered so much from studied violence, that not a feature of the countenance remains. The head-dress is beautifully wrought, as are also the shoulders, which, with the back, continue quite uninjured. The massy hair projects from behind the ears like that of the sphinx. The sides of the throne are highly ornamented with the elegant device of two bearded figures tying the stem of the flexible lotus round the ligula. The colossus is in a sitting posture, with the hands resting on the knees. The other statue, which stands on the north side, appears to be that of the vocal Memnon. It presents the same attitude as its companion. This famous statue was said to utter, when it was struck by the first beams of the sun, a sound like the snapping asunder of a musical string. (*Pausan.*, 1, 42, 3.) Cambyzes, who spared not the Egyptian god Apis, suspecting some imposture, broke the statue from the head to the middle of the body, but discovered nothing. Strabo (816), who visited the spot in a later age, states that he saw two colossal figures, one of them erect, and the other broken off from above, and the fragments lying on the ground. He adds, however, a tradition, that this had been occasioned by an earthquake. The geographer says that he and *Ælius Gallus*, with many other friends and a large number of soldiers, were standing by these statues early in the morning, when they heard a certain sound, but could not determine whether it came from the colossus, or the base, or from the surrounding multitude. He mentions also that it was a current belief that the sound came from that part of the statue which remained on the base. Pliny and Tacitus mention the sound produced from the statue without having themselves heard it (*Plin.*, 36, 11.—*Tacit.*, *Ann.*, 2, 61.—Compare *Juvenal*, 15, 5), and Lucian informs us that Demetrius went on purpose to Ægypt to see the pyramids and Memnon's statue, from which a voice proceeded at the rising of the sun. (*Toxaris*, 6, 27.) It was a general persuasion, indeed, among the Egyptians as well as others, that before Cambyzes broke this colossus, it uttered the seven mysterious vowels. What characterizes, however, in a particular degree, the statue of vocal celebrity, is the inscriptions, both in Greek and Latin, in verse and prose, with which its legs are covered. Most of these inscriptions belong to the period of the early Roman emperors, and all attest that the writers had heard the heavenly voice of Memnon at the first dawn of day. Translations of two of these inscriptions follow: "I, *Publius Balbinus*, heard the divine voice of Memnon or Phamenoph. I came in company with the Empress Sabina, at the first hour of the men's course, the 15th year of the reign of Hadrian, the 24th day of Athyr, the 25th of the month of November." The other inscrip-

tion is as follows: "I write after having heard Memnon.—Cambyzes hath wounded me, a stone cut into an image of the Sun-king. I had formerly the sweet voice of Memnon, but Cambyzes has deprived me of the accents which express joy and grief.—You relate grievous things. Your voice is now obscure. Oh wretched statue! I deplore your fate." (*American Quarterly Review*, No. 9, p. 32.—Compare Champollion, *Précis du Système Hiéroglyphique*, vol. 1, p. 236.) It will be perceived, from the first of these inscriptions, that Memnon, as we have already remarked in a previous article (Memnon I.), is made identical with the Egyptian Phamenoph; and, in fact, the hieroglyphic legend on the statue, as deciphered by Champollion, shows it to have been the effigy of Amenophis. There is some difficulty, however, notwithstanding these inscriptions, in identifying this statue with the one described by Strabo and Pausanias. These writers say that the upper part had in their time fallen down or been broken off; but at present the upper part exists in its proper position, though not in a single piece, being adapted to the lower portion of the body by courses of the common sandstone used so generally in the buildings of Thebes. Heeren conjectures that the broken statue might have been repaired after the time of Strabo.—Of the fact that the statue of Memnon uttered sounds when the sun shone upon it, there can be no doubt: as to the mode, however, in which this was effected, great diversity of opinion exists. It has been thought by some, that the priests of Thebes might have fabricated, by mechanical art, a kind of speaking head, the springs of which were so arranged that it sent forth sounds at the rising of the sun. Such an explanation, however, is altogether unsatisfactory; the circumstances of the case are directly against it. The more generally received opinion ascribes the sound to some peculiar property in the stone itself, of which the Egyptian priests artfully took advantage, though in what way is quite uncertain. Alexander Humboldt speaks of certain sounds that are heard to proceed from the rocks on the banks of the Oronoko, in South America, at sunrise: these he attributed to *confined air* making its escape from crevices or caverns, where the difference of the internal and external temperature is considerable. The French savans attest to their having heard such sounds at Cernak, on the east bank of the Nile; and hence it has been conjectured that the priests, who had observed this phenomenon, took advantage of their knowledge, and contrived, by what means we know not, to make the credulous believe that a similar sound proceeded from the colossal statue of Phamenoph. (*British Museum, Egypt. Antiq.*, vol. 1, p. 266.) Mr. Wilkinson, however, in his work on the "Topography of Thebes" (*London*, 1835), gives a far more satisfactory solution of the difficulty. "The sound which this statue uttered," observed this writer, "was said to resemble the breaking of a harp-string, or, according to the preferable authority of a witness, a metallic ring (one of the inscriptions says, 'like brass when struck'), and the memory of its daily performance is still retained in the traditional appellation of *Salamat*, 'salutations,' by the modern inhabitants of Thebes. In the lap of the statue is a stone, which, on being struck, emits a metallic sound, that might still be made use of to deceive a visitor who was predisposed to believe in its powers; and from its position, and a square space cut in the block behind, as if to admit a person who might thus lie concealed from the most scrupulous observer in the plain below, it seems to have been used after the restoration of the statue; and another similar recess exists beneath the present site of this stone, which might have been intended for the same purpose when the statue was in its mutilated state. Mr. Burton and I first remarked the metallic sound of this

stone in the lap of the statue in the year 1824, and conjectured that it might have been used to deceive the Roman visitors; but the nature of the sound, which did not agree with the accounts given by ancient authors, seemed to present an insuperable objection. In a subsequent visit to Thebes in 1830, on again examining the statue and its inscriptions, I found that one Ballilla had compared it to the striking of brass; and feeling convinced that this authority was more decisive than the vague accounts of those writers who had never heard it, I determined on posting some peasants below and ascending myself to the lap of the statue, with a view of hearing from them the impression made by the sound. Having struck the sonorous block with a small hammer, I inquired what they heard, and their answer, *Ente detidrob c'nahás*, 'You are striking brass,' convinced me that the sound was the same that deceived the Romans, and led Strabo to observe that it appeared to him as the effect of a slight blow." (*Wilkinson's Topography of Thebes*, p. 36, seq.)—The head of the colossal Memnon in the British Museum has no claim to be considered the vocal Memnon described by Strabo, Tacitus, and Pausanias. The height of the figure to which the head belongs was about 24 feet when entire. There is also an entire colossal Memnon in the British Museum 9 feet 6½ inches high, which is a copy of the great Memnon at Thebes. (*Hamilton's Egyptiaca*.—*Philological Museum*, No. 4, art. *Memnon*.—*Encycl. Us. Knowl.*, vol. 15, p. 88, seqq.)

MEMPHIS, a famous city of Egypt, on the left side of the Nile. Concerning the epoch of its foundation and its precise situation, writers are not agreed. With regard to its position, it would seem, from a review of all the authorities which bear upon the subject, that Memphis stood about 15 miles south of the Apex of the Delta: this, at least, is D'Anville's opinion. Herodotus (2, 99) assigns the founding of Memphis to Menes, and Diodorus (1, 50) to Uchoreus. From the account given by the former of these writers, it would seem that the Nile originally ran nearer the Libyan mountains, and that Menes, having erected a large dam about a hundred stadia south of the spot where Memphis afterward stood, caused the river to pursue a more easterly course. After he had thus diverted the current of the stream, he built Memphis within the ancient bed of the Nile. The great embankment was always an object of attention, and Herodotus states that under the Persian dominion it was annually repaired; for if the river had at any time broken through the bank, the whole city would have been inundated. In Memphis the same Menes erected a magnificent temple to Vulcan or Phtha. (*Herod.*, l. c.) What Herodotus partly saw and partly learned from the tips of the priests relative to this city, Diodorus confirms (1, 50). He, too, speaks of the large embankment, of a vast and deep excavation which received the water of the river, and which, encircling the city, except in the quarter where the mound was constructed, rendered it secure against any hostile attack. He differs from Herodotus, however, in making, as has already been remarked, Uchoreus to have been its founder. On this point, indeed, there appears to have been a great diversity of opinion among the ancient writers, for we find the building of Memphis assigned also to Epaphus (*Schol.*, in *Stat.*, *Theb.*, 4, 737) and to Apis. (*Synceilus*, p. 149.—Compare *Wesseling*, ad *Diod. Sic.*, l. c.) It is more than probable, that the Egyptian priests themselves were possessed of no definite information on this head, and that Memphis was the capital of Lower Egypt, as Thebes was of Upper Egypt, at a very early period, when the land was under the sway of many contemporaneous monarchs. When, however, the whole country was united under one king, the royal residence would seem to have been transferred to Memphis, in

order to enjoy, probably, the cool breezes from the sea, and Thebes would then appear to have declined in importance. The circuit of Memphis is given by Diodorus at 150 stadia, from which it would seem that it was still larger in compass than the city of Thebes. Memphis is supposed to have suffered much in the invasion of Cambyzes. It was adorned and beautified, however, under the Ptolemies; and, about the time of our Saviour, was the second city of Egypt, Alexandria being the capital: but its decay had already begun. Strabo, who visited it about this time, describes the temple of Vulcan, another of Venus, and a third of Osiris, where the Apis, a sacred bull, was worshipped (*vid.* Apis); and also a Serapeum and a large circus. But many of its palaces were in ruins; an immense colossus, formed of a single stone, lay in front of the circus; and among a number of sphinxes near the Serapeum, some were covered with sand to the middle of the body, and others were so nearly buried as to leave only their heads visible—melancholy and certain presages of its future fate. In the seventh century the Saracen or Arabian conquest of Egypt occurred. Memphis was not indeed destroyed by the victors, yet it had to supply abundant materials for the new capital of Cairo, as a view of this latter place even at the present day conclusively proves. From this period Memphis fell gradually to ruin; and though Benjamin of Tudela, in the twelfth century, found it still in part standing, yet the process of dilapidation was actively carried on, and most of the former inhabitants had taken up their residence in the new capital of Cairo. This latter city he calls "New Misraim," and Memphis "Old Misraim" (c. 21). The first modern traveller who seems to have discovered the true site of Memphis is Fourmont (*Description des ruines d'Héliopolis et de Memphis*, Paris, 1755, 8vo). The whole subject is now clearly elucidated by the researches of the French in Egypt. The ruins of the ancient city extend, on the western side of the Nile, for more than one geographical mile in a southern direction from *Old Cairo*. In the vicinity of Saccara is to be seen the spot where once stood the temple of Vulcan. The village which occupies a part of the site of Memphis is called by Fourmont *Manuf*, while more modern authorities name it *Myt-Rahyneh*. Both are, in fact, right: along the side of Memphis many villages rise, but the largest masses of ruins show themselves principally at *Myt-Rahyneh*, on the southern side of the city.—The following description of Memphis, as it appeared in the twelfth century, is from an Oriental writer. (*Abdallatif's Abridgment of Edrisi*, translated by De Sacy.—*Encyclopædia Metropolitana*, art. *Egypt*.) "Among the monuments of the power and genius of the ancients are the remains still extant in old Misr or Memphis. That city, a little above Fostat, in the province of Djizeh, was inhabited by the Pharaohs, and is the ancient capital of the kingdom of Egypt. Such it continued to be until ruined by Bokhtnash (Nebuchadnezzar); but many years afterward, when Alexander had built Iskanderiyeh (Alexandria), this latter place was made the metropolis of Egypt, and retained that pre-eminence till the Moslems conquered the country under Amru-ebn-el-Aasi, who transferred the seat of government to Fostat. At last El Moezz came from the west and built El Cahirah (Cairo), which has ever since been the royal place of residence.—But let us return to the description of Manuf, also called old Misr. Notwithstanding the vast extent of this city, the remote period at which it was built, the change of dynasties to which it has been subjected, the attempts made by various nations to destroy even the vestiges, and to obliterate every trace of it, by removing the stones and materials of which it was formed—ruining its houses and defacing its sculptures—notwithstanding all this, combined with what more than four thou-

and years must have done towards its destruction, there are yet found in it works so wonderful that they confound even a reflecting mind, and are such as the most eloquent would not be able to describe. The more you consider them, the more does your astonishment increase; and the more you look at them, the more pleasure you experience. Every idea which they suggest immediately gives birth to some other still more novel and unexpected; and as soon as you imagine that you have traced out their full scope, you discover that there is something still greater behind." Among the works here alluded to, he specifies a monolithic temple similar to the one mentioned by Herodotus, adorned with curious sculptures. He next expatiates upon the idols found among the ruins, not less remarkable for the beauty of their forms, the exactness of their proportions, and perfect resemblance to nature, than for their truly astonishing dimensions. We measured one of them, he says, which, without including the pedestal, was 45 feet in length, 15 feet from side to side, and from back to front in the same proportion. It was of one block of red granite, covered with a coating of red varnish, the antiquity of which seemed only to increase its lustre. The ruins of Memphis, in his time, extended to the distance of half a day's journey in every direction. But so rapidly has the work of destruction proceeded since the twelfth century, that few points have been more debated by modern travellers than the site of this celebrated metropolis. The investigations of the French, as has already been remarked, appear to have decided the question. "At *Myt-Rahyneh* (Metrahainé), one league from Saccara, we found," says General Dugna, "so many blocks of granite covered with hieroglyphics and sculptures around and within an esplanade three leagues in circumference, enclosed by heaps of rubbish, that we were convinced these must be the ruins of Memphis. The sight of some fragments of one of those colossuses, which Herodotus says were erected by Sesotris at the entrance of the temple of Vulcan, would, indeed, have been sufficient to dispel our doubts had any remained. The wrist of this colossus shows that it must have been 45 feet high." (*Russell's Egypt*, p. 216, *seqq.*)—Memphis is thought by many to have been the Noph of Scripture. (*Isaiah*, 19, 13.—*Jer.*, 2, 16.—*Ezek.*, 30, 13-16.)

MENANDER (Μένανδρος), I. a celebrated comic poet of Athens, born B.C. 342. According to Suidas, he was the son of Diopithes and Hegistratê, was cross-eyed, and yet clear-headed enough (*αἰσάδης τὰς ὀφθαλμοὺς ὁφθαλμοὶ δὲ τὸν νοῦν*). His father was at this time commander of the forces stationed by the Athenians at the Hellespont, and must therefore have been a man of some consequence. Alexis, the comic poet, was his uncle and instructor in the drama. (*Proleg.*, *Aristoph.*, p. 30.) Theophrastus was his tutor in philosophy and literature, and he may have derived from the latter the knowledge of character for which he was so eminent. (*Diog. Laert.*, 5, 36.) The merit of his pieces obtained for him the title of Chief of the New Comedy. His compositions were remarkable for their elegance, refined wit, and knowledge of human nature. In his 21st year he brought out the *Opyôn*, his first drama. (*Proleg.*, *Aristoph.*, p. xxx.) He lived 29 years more, dying B.C. 292, after having composed 105 plays, according to some authorities (*Apollod.*, *ap. Aul. Gell.*, 17, 4), and according to others 108. (*Suidas.*—*ὑπερπεπαι κωμῳδίας πρ.*) He gained the prize, however, only eight times, notwithstanding the number of his productions, and although he was the most admired writer of his time. One hundred and fifteen titles of comedies ascribed to him have come down to us; but it is clear, of course, that all these are not correctly attributed to him. (*Fabric.*, *Biblioth. Gr.*, vol. 2, p. 460, 468, *ed. Harles.*) Menander is said to have been drowned while bathing in the harbour of

Piræus, and a line in the *Ibis* of Ovid is supposed by some to allude to this: "*Comicus ut mediis perit dum nabit in undis.*" (*Ib.*, 591.) According to another account, he drowned himself because his rival Philemon obtained the prize in a dramatic contest.—All antiquity agrees in praise of Menander. We learn from Ovid that all his plots turned on love, and that in his time the plays of Menander were common children's books. (*Ovid, Trist.*, 2, 370.) Julius Cæsar called Terence a "*dimidiatus Menander*," or "halved Menander," having reference to his professed imitation of the Athenian dramatist. Terence, indeed, was but a translator of his dramas. Plutarch preferred Menander to Aristophanes, and Dio Chrysostom ranked him above all the writers of the Old Comedy. Quintilian (10, 1, 69) gives him unqualified praise as a delineator of manners. From these notices, from the plays of Terence, and from an awkward compliment passed upon him by Aristophanes the grammarian, we may infer that Menander was an admirable painter of real life. He was a man, however, of licentious principles; and his effeminate and immoral habits, and that carelessness in his verses which subjected him to the charge of plagiarism, or, at least, of copying, all point to the man of fashion rather than the imaginative poet. It has been observed that there is very little of the humorous in the fragments of Menander which remain; but we cannot judge of a play by fragments. Sheridan's plays, if reduced to the same state, would be open to a similar charge, although he is perhaps the most witty writer of any age or country. The essential aim of the comedy of manners is to excite interest and smiles, not laughter. The plays of Menander were probably very simple in dramatic action. Terence did not keep to this simplicity, but, as he tells us himself, added to the main plot some subordinate one taken from a different piece of Menander; thus making, as he says, one piece out of two. Between the time of Aristophanes and that of Menander, a great change must have taken place in the Athenian character, which, in all probability, was mainly brought about by the change in the political condition of the Athenian state. The spirit of the people had declined from the noble patriotism which characterized the plays of Aristophanes at a time when Athens was struggling for supremacy in Greece; and, in the time of Menander, Macedonian influence had nearly extinguished the spirit that once animated the conquerors of Marathon and Plataea. Manners probably had not changed for the better in Athens; though the obscenity and ribaldry of Aristophanes would no longer have been tolerated. The transition from coarseness of expression to a decent propriety of language marks the history of literature in every country. Thus the personal satire and the coarseness, which characterized the old comedy, were no longer adapted to the age and circumstances in which Menander lived, and there remained nothing for him to attempt as a dramatist but the new species of comedy, in which, by the unanimous judgment of all antiquity, he attained to the highest excellence.—The fragments of Menander are principally preserved in Athenæus, Stobæus, and the Greek lexicographers and grammarians. They were published along with those of Philemon by Le Clerc (Clericus), in 1709, 8vo. This edition, executed with very little care, gave occasion to a very disgraceful literary warfare, in which Bentley, Burmann, Gronovius, De Pauw, and D'Orville took an active part. (*Fabric.*, *Bibl. Gr.*, vol. 2, p. 457, *ed. Harles.*) The best edition is that of Meineke, *Berol.*, 1823, 8vo.—It seems possible that some of the plays of Menander may yet exist; at least there is evidence to the fact of some of the plays having been in existence in the seventeenth century. (*Encyclop. Us. Knowl.*, vol. 15, p. 92.—*Theatre of the Greeks*, 4th ed., p. 122.)—II. A native of Laodicea, who lived

about 270 B.C. He was the author of a treatise *Περὶ Ἐπιδεικτικῶν*, "Concerning discourses delivered for mere display."—III. Surnamed "Protector," a Greek writer, who lived at Constantinople during the latter half of the sixth century. He was one of the emperor's body-guard, whence he derived the name of "Protector." (*Cod. Theodos.*, 6, 24.) He wrote a history of the Eastern empire, from A.D. 559 to A.D. 582, in eight books, of which considerable extracts have been preserved in the "*Eclage Legationum*," attributed to Constantine Porphyrogenitus. The best edition of Menander is by Bekker and Niebuhr, *Bonn*, 1830, together with the fragments of Dexippus, Eupapius, Patricius, &c. (*Encycl. Us. Knowl.*, vol. 15, p. 92.)

MENAPII, I. a powerful tribe of Belgic Gaul, occupying originally all the country between the Rhenus and Mosæ (*Rhine* and *Meuse*) as far nearly as the territory of *Julich*. In Cæsar's time they had even possessions on the eastern side of the Rhine, until driven thence by the German tribes. (*Cæs.*, B. G., 4, 4.) At a later period they removed from the banks of the Rhine, when the Ubii and Sigambri, from Germany, established themselves on the western bank of the river. From a passage in Tacitus (*Hist.*, 4, 28), it appears that the territory of this tribe was subsequently to be found along the lower *Meuse*. They had a fortress on this last-mentioned stream, whose name of Castellum still subsists in *Kessel*. In Cæsar's days the Menapii had no city, but lived after the German fashion, in the woods and among the fens. (*Mannert, Geogr.*, vol. 2, pt. 1, p. 201.)—II. A Gallic tribe who migrated into Hibernia (*Ireland*), and settled in part of the modern province of *Leinster*. (*Mannert, Geogr.*, vol. 2, pt. 2, p. 218.)

MENAS, a freedman of Pompey the Great, noted for frequently changing sides in the war between Sextus Pompeius and the triumvirs. He first deserted the party of Sextus, under whom he held an important naval command, and went over to Augustus: then he returned to his former side; and again abandoned it and joined the forces of the enemy. (Compare *Appian*, B. C., 5, 78, *seqq.*) The historian just quoted applies to him the very appropriate title of *παλμπροδοῦν*. Horace has been thought to allude to him in his 4th Epode; but this opinion, though countenanced by the earlier commentators, has been rejected by more recent scholars. (*Döring, ad Horat.*, Epod., 4, 17g.)

MENDES, a city of Egypt, in the Delta Parvum, northeast of Sebennytus, and near the coast. It was the chief city of, and gave name to, the Mendesian nome. From it also the Mendesian mouth of the Nile (Ostium Mendesium), now the canal of *Achmûn*, derived its appellation. The goat was here an object of adoration, and Herodotus states (2, 46) that both this animal and the god Pan were called in the Egyptian language *Mendes*. Pan was worshipped at this place with the visage and feet of a goat; though what the Greek writers here call Pan answers more correctly to the deity Priapus, or the generative attribute considered abstractedly. At Mendes, female goats were also held sacred. The fable of Jupiter having been suckled by a goat probably arose from some emblematic composition, the true explanation of which was known only to the initiated.—The city of Mendes gradually disappeared from history, and in its immediate vicinity rose the city of Thmuis, where the goat was still worshipped as at Mendes.—Jablonski (*Panthe. Egypt.*, 1, 2, 7) makes *Mendes* signify "fertile" or "prolific," and regards it as expressive of the fertilizing and productive energies of nature, especially of the sun. In like manner, we find it stated that *Thmuis* in the Egyptian tongue also signified "a goat." (*Hieron., ad Jovin.*, 2, 6.) Lacroze, on the contrary, makes *Thmuis* equivalent to "the city of Lions."

Jablonski (*Voc.*, p. 89, *seqq.*) inclines to the former of these explanations; while Champollion, on his side, seeks to overthrow both, by giving Thmuis the meaning of "island." (*L'Egypte sous les Pharaons*, vol. 2, p. 119.—Compare *Cruzer, Symbolik*, vol. 1, p. 476.—*Knight, Inquiry into the Symb. Lang.*, &c., § 191.—*Class. Journ.*, vol. 26, p. 266.)—The ruins of Mendes are in the neighbourhood of the modern town of *Achmûn*. (*Mannert, Geogr.*, vol. 10, pt. 1, p. 579.)

MENECLES, a native of Barce in Cyrenaica, who wrote an historical work on the Athenians. Harpocration and the scholiast on Aristophanes are in doubt whether to assign this production to Menecles, or to a certain Callistratus. The scholiast on Pindar (*Pyth.*, 4, 10) has preserved a fragment from a work of Menecles, which relates to Battus, the founder of Cyrene. It is supposed to be taken from the *Αἰὼνάς* of this writer. (*Schöll, Hist. Lit. Gr.*, vol. 3, p. 225.)

MENECRATES, I. a native of Elæa, in Æolis, contemporary with Hecateus. Strabo cites his work "*On the origin of cities*" (*περὶ κτισέων*), and his "*Description of the Hellespont*" (*Ἑλλησποντιακὴ περιήγησις*).

—II. Tiberius Claudius, a physician in the reign of Tiberius, and a resident at Rome. Galen makes mention of him, and speaks also of several of his preparations. He was the inventor of the diachylon, a species of plaster much used even in modern times (*Galen, de Compos. Medic.*, 5, p. 228), and also of a preparation called *ἐκδύσις*, composed of escharotic substances. (*Id. ib.*) An inscription given by Montfaucon informs us that he was imperial physician, and that he composed 155 works. (*Montfaucon, suppl.*, vol. 3, pt. 4.—*Sprengel, Hist. Med.*, vol. 2, p. 50, *seq.*)—III. A physician, a native of Syracuse, who became extremely vain in consequence of his success in curing epilepsies. He assumed, in consequence, the appellation of Jupiter, as the dispenser of life unto others, while he gave the names of other deities to the individuals whom he had cured, and always had some of them following him as minor gods throughout the cities of Greece. He is said to have stipulated for this service on their part before he undertook to cure them. In a letter which he wrote to Philip of Macedonia, he employed the following language: "*Menecrates, Jupiter (ὁ Ζεὺς) to Philip, the king of the Macedonians, success*" (*εὖ πράττειν*). The reply of the Macedonian monarch was characteristic: "*Philip to Menecrates, a sound mind (ὡφελειν): I advise thee to betake thyself to Anticyra*."—The same king played off, on one occasion, a good practical joke on this crazy disciple of Æsculapius. Having invited him to a splendid banquet, he seated him apart from the other guests, and placed before him a censer containing frankincense. The fumes of this were his only portion of the feast, while the rest of the company banqueted on more substantial food. Menecrates at first was delighted at the compliment; but the cravings of hunger soon convinced him that he was still a mortal, and he abruptly left the apartment, complaining of having been insulted by the king. (*Athenæus*, 7, p. 289.—*Ælian*, V. H., 12, 51.) Plutarch makes Menecrates to have written the letter in question to Agesilaus, king of Sparta (*Apophth. Reg. et Duc.*), but incorrectly according to Perizonius. (*Perizon., ad Æli.*, l. c.)

MENECRATES, I. a Greek philosopher, a native of Eretria, who flourished towards the close of the fourth century before Christ. Though nobly descended, he was obliged, through poverty, to submit to a mechanical employment, either as a tent-maker or mason. He formed an early acquaintance with Æsclepiades, who was a fellow-labourer with him in the same occupation. Having resolved to devote themselves to philosophy, they abandoned their mean employment and went to Athens, where Plato presided in the Academy. It was soon observed that these strangers had no visit-

his means of subsistence, and, according to a law of Solon's, they were cited before the court of Areopagus, to give an account of the manner in which they were supported. The master of one of the public prisons was, at their request, sent for, and attested, that every night these two youths went among the criminals, and, by grinding with them, earned two drachmas, which enabled them to spend the day in the study of philosophy. The magistrates, struck with admiration at such an extraordinary proof of an indefatigable thirst after knowledge, dismissed them with high applause, and presented them with two hundred drachmas. (*Athenaeus*, 4, p. 168.) They met with several other friends, who liberally supplied them with whatever was necessary to enable them to prosecute their studies. By the advice of his friend, and probably in his society, Menedemus went from Athens to Megara, to attend upon the instructions of Stilpo. He expressed his approbation of the manner in which this philosopher taught, by giving him the appellation of "the Liberal." He next visited Elis, where he became a disciple of Phaedo, and afterward his successor. Transferring the Elic school from Elis to his native city, he gave it the name of Eretrian. In his school he neglected those forms which were commonly observed in places of this kind; his hearers were not, as usual, placed on circular benches around him; but every one attended him in whatever posture he pleased, standing, walking, or sitting. At first Menedemus was received by the Eretrians with contempt, and, on account of the vehemence with which he disputed, he was often branded with the appellation of cur and madman. But afterward he rose into high esteem, and was intrusted with a public office, to which was affixed an annual stipend of 200 talents. He discharged the trust with fidelity and reputation, but would only accept a fourth part of the salary. He was afterward sent as ambassador to Ptolemy, Lysander, and Demetrius, and did his countrymen several important services. Antigonus entertained a personal respect for him, and professed himself one of his disciples. His intimacy with this prince made the Eretrians suspect him of a design to betray their city to Antigonus. To save himself, he fled to Antigonus, and soon after died, in the 84th year of his age. It is thought he precipitated his death by abstaining from food, being oppressed with grief at the ingratitude of his countrymen, and on being unable to persuade Antigonus to restore the lost liberties of his country. (*Diog. Laert.*, 2, § 125, *seqq.*—*Enfield's History of Philosophy*, vol. 1, p. 204, *seqq.*)—II. A native of Lampascus, in whom the spirit of the Cynic sect degenerated into downright madness. Dressed in a black cloak, with an Arcadian cap upon his head, on which were drawn the figures of the twelve signs of the zodiac, with tragic buskins on his legs, with a long beard, and with an ashen staff in his hand, he went about like a maniac, saying that he was a spirit, returned from the lower world to admonish the living. He lived in the reign of Antigonus, king of Macedon. (*Diog. Laert.*, 6, § 102.—*Suid.*, s. v. *φῶς*.—*Enfield's History of Philosophy*, vol. 1, p. 314.)

MENELAI PORTUS (*Μενελαῖος λιμὴν*, *Herod.*, 4, 169), a harbour on the Mediterranean coast of Africa, in Cyrenaica, and between the city of Cyrene and Egypt. It was fabled to have derived its name from Menelaus, who, on fleeing from Egypt, landed upon this coast. (*Strab.*, 1195.—*Scylax*, p. 45.—*Corn. Nep.*, *Vit. Ages.*, 17.—*Mannert, Geogr.*, vol. 10, pt. 2, p. 86.)

MENELAIUM (or Menelai Mons), a range of hills on the left bank of the Euphrates, stretching to the south-east of the city, and rising abruptly from the river. Polybius (5, 32) says these hills were remarkably high (*διαφέροντες ὑψηλοί*), but modern travellers assure us that this is not the case, and that they are mere hillocks when compared to Taygetus (*Dodwell*, vol. 2,

p. 409.—*Gell, Bin. of the Marra*, p. 232), so that perhaps we should read, in the text of Polybius, *οὐ διαφέροντες ὑψηλοί*. (*Cramer's Anc. Greece*, vol. 3, p. 210.)

MENELAIUS, king of Sparta, and brother of Agamemnon. He was the son of Plisthenes; but his father dying young, and his mother Aërope having been taken in marriage by Atreus, her father-in-law, both Menelaus and Agamemnon received the common name of Atreids, as if they had been the sons of Atreus. After the murder of Atreus, Thyestes his brother ascended the throne, and compelled Menelaus and Agamemnon to flee from Argolis. They found an asylum, first with Polyphides, king of Sicyon, and then with Ceneus, king of Calydon. From the latter court they proceeded to Sparta, where Menelaus became the successful candidate for the hand of Helen (*Vid. Helena*); and, at the death of his father-in-law, succeeded to the vacant throne. His conjugal felicity, however, was not destined to be of long continuance. Paris, the son of Priam, king of Troy, came on a visit to Sparta, accompanied by Æneas. Here he was hospitably entertained by Menelaus. The Trojan prince, at the banquet, bestowed gifts on his fair hostess Helen, and shortly after Menelaus sailed to Crete, directing his queen to entertain the guests as long as they stayed. Venus, however, inspired Paris and Helen with mutual love, and, filling a vessel with the property of Menelaus, they fled from Sparta during his absence. A tempest sent by Juno drove them to Sidon, which city Paris took and plundered, and, sailing thence to Ilium, he there celebrated his union with Helen. Menelaus, being informed by Iris of what had occurred, returned home and consulted with his brother Agamemnon, king of Mycenæ, about an expedition to Ilium; he then repaired to Nestor at Pylus, and, going through Greece, they assembled the chieftains for the war, all of them having been bound, as is said, by an oath to lend such aid whenever it might be demanded of them.—After the destruction of Troy (*vid. Troja*) and the recovery of Helen (*vid. Helena and Deiphobus*), Menelaus, who had commanded the Spartan forces in that memorable war, kept company with Nestor, on his return to Greece, until they reached the promontory of Sunium in Attica. Apollo here slew Phrontis, the pilot of Menelaus' ship, and the latter was obliged to stay and bury him. Having performed the funeral rites, he again put to sea; but, as he approached Cape Malea, Jupiter sent forth a storm, which drove some of his vessels to Crete, where they went to pieces against the rocks. Five, on board of one of which was Menelaus himself, were carried by the wind and waves to Egypt. (*Od.*, 3, 276, *seqq.*) During the eight years of his absence, Menelaus visited all the adjacent coasts, Cyprus, Phœnicia, Egypt, the Ethiopians, Sidonians, and Erembians, and also Libya (*Od.*, 4, 81, *seqq.*), where the lambs are born horned, and the sheep year three times a year, and milk, cheese, and flesh are in the utmost abundance, for king and shepherd alike. In these various countries he collected much wealth; but, leaving Egypt on his voyage homeward, he neglected offering sacrifices to the gods, and was, in consequence, detained by want of wind at the isle of Pharos. They were here twenty days, and their stock of provisions were nearly exhausted, when Menelaus was informed of what he ought to do by Proteus, whom he had caught for that purpose by the advice of the sea-nymph Idothea. Having offered due sacrifices to the immortal gods, a favourable wind was sent, which speedily carried him homeward; and he arrived in his native country on the very day that Orestes was giving the funeral-feast for his mother and Ægisthus, whom he had slain. (*Od.*, 4, 351, *seqq.*) Such is the narrative of Homer. Helena, according to this same poet, was the companion of all the wanderings of

Menelaus; but the Egyptian priests pretended that Paris was driven by adverse winds to Egypt, where Proteus, who was then king, learning the truth, kept Helena and dismissed Paris; that the Greeks would not believe the Trojans, that she was not in their city, till they had taken it; and that then Menelaus sailed to Egypt, where his wife was restored to him. (*Herod.*, 2, 113, *seqq.*—*Vid.* Helena.—*Keightley's Mythology*, p. 492, *seqq.*)—As regards the reconciliation of Menelaus and Helen, Virgil follows the account which makes the latter to have ingratiated herself into the favour of her first husband by betraying Deiphobus into his hands on the night when Troy was taken. (*Æn.*, 6, 494, *seqq.*—Compare *Quint. Col.*, 13, 354, *seqq.*—*Dicli. Cret.*, 5, 116.)

MENENIUS, I. Agrippa, a celebrated Roman, who obtained the consulship B.C. 501, and who afterward prevailed upon the people, when they had seceded to the Mons Sacer, to return to the city. He related on this occasion the well-known fable of the stomach and the limbs. (*Liv.*, 2, 16.—*Id.*, 2, 32.)—II. Titus, son of the preceding, was chosen consul with C. Horatius, B.C. 475, when he was defeated by the Tusci, and being called to an account by the tribunes for this failure, was sentenced to pay a heavy fine. He died of grief soon after. (*Liv.*, 51, *seqq.*)

MENES, the first king mentioned as having reigned over Egypt, and who is supposed to have lived above 3000 B.C., about the time fixed by biblical chronologists for the foundation of the kingdom of Assyria by Nimrod, and corresponding also with the era of the Chinese emperor Yao, with whom the historical period of China begins. All inquiries concerning the history of nations previous to this epoch are mere speculations unsupported by evidence. The records of the Egyptian priests, as handed down to us by Herodotus, Manetho, Eratosthenes, and others, place the era of Menes several thousand years farther back, reckoning a great number of kings and dynasties after him, with remarks on the gigantic stature of some of the kings, and on their wonderful exploits, and other characteristics of mystical and confused tradition. (Consult *Eusebius, Chron. Canon.*, ed. *Mais et Zohrab.*, *Mediol.*, 1818.) It has been conjectured that several of Manetho's dynasties were not successive, but contemporaneous, reigning over various parts of the country. From the time of Menes, however, something like a chronological series has been made out by Champollion, Wilkinson, and other Egyptian chronologists, partly from the list of Manetho, and partly from the Phonetic inscriptions on the monuments of the country.—Menes, it is said by some (*Herod.*, 2, 99), built the city of Memphis, and, in the prosecution of his work, stopped the course of the Nile near it, by constructing a causeway several miles broad, and caused it to run through the mountains. (*Vid.* Nilus.) Diodorus Siculus, however (1, 50), assigns the foundation of Memphis to Uchoreus. Bishop Clayton contends that Menes was not the first king of Egypt, but that he only transferred the seat of empire from Thebes to Memphis. (*Vid.* remarks under the article Memphis.) Zoega finds an analogy between the names *Menes* and *Mnevis*; to which may be added those of the Indian *Menu* and the Cretan *Minos*, to say nothing of the German *Mannus*. (*Zoega, de Obelisc.*, p. 11.)

MENESTHEÏ PORTUS, a harbour not far from Gades, on the coast of Spain, in the territory of Bætica. An oracle of Menestheus was said to have been in or near the place. The modern *Puerto de Santa Maria* is thought to correspond to the ancient spot. (*Ukert, Geogr.*, vol. 2, p. 342.)

MENESTHEUS or **MNESTHEUS**, a son of Petens, and great-grandson of Erechtheus, who so insinuated himself into the favour of the people of Athens, that, during the long absence of Theseus, who was engaged in per-

forming his various adventures, he was elected king. The lawful monarch, at his return home, was expelled, and Menestheus established his usurpation by his popular manners and great moderation. As he had been one of Helen's suitors, he went to the Trojan war at the head of the people of Athens, and died on his return in the island of Melos. He was succeeded by Demophoon, the son of Theseus. (*Phut.*, *Vit. The.*)

MENINX, or **LOTOPHAGITIS INSULA**, an island off the coast of Africa, in the vicinity of the Syrtis Minor, and forming part of its southern side. Its name of *Lotophagitis* (*Λωτοφαγίτις*) or *Lotophagorum insula* (*Λωτοφάγων νῆσος*) was given it by the Greeks, from the belief that in this quarter was to be placed Homer's land of the Lotophagi; and, in fact, both the island itself, and also the adjacent country along the coast of the Syrtis, produced abundance of this sweet and tempting fruit. (*Herod.*, 2, 92.—*Id.*, 4, 177.—*Polyb.*, 13, 2.—*Eustath. ad Hom.*, *Od.*, 10, 84, p. 1616.) In our editions of Scylax, the island is called Brachion (*Βραχίον*), a manifest interpolation, which has found its way into the text from the note or gloss of some individual, who wished to convey the information that there were many shallows in the neighbourhood. (*Mannert, Geogr.*, vol. 10, pt. 2, p. 144.)—The island fell into the hands of the Romans during the first Punic war, and then, for the first time, we learn that the true name, and the one used among the natives themselves, was *Meninx* (*Μήνιξ*).—*Polyb.*, 1, 39.—Compare *Diogenes. Perieg.*, v. 480). From this time forward, *Meninx* remained the more usual appellation among the geographical writers.—Strabo (834) informs us that the chief city bore the same name with the island. Pliny (5, 4) speaks of the city of *Meninx* towards Africa, and of another named *Thoar*. Ptolemy likewise mentions two cities, *Meninx* and *Gerra*, the former of which he places to the northeast, and the latter to the southwest. It is more than probable, that the chief city of the island was not called *Meninx*, but only received this name from those who traded thither, and that the true appellation was *Girba*, which was given at a later period to the whole island. (*Aurel. Vict.*, *Epit.*, c. 81. "Creati in insula *Meninge*, quæ nunc *Girba* dicitur.") The Arabs still give it the name of *Gerbo* or *Zerbi*.—*Meninx* was famed for its purple dye, obtained from the shellfish along its shores, and Pliny ranks it next in value to the Tyrian.

MENIPPUS, a cynic philosopher, born at Sinope in Asia Minor, but whose family were originally from Gadara, in Palestine. According to an authority cited by Diogenes Laertius, he was at first a slave, but afterward obtained his freedom by purchase, and eventually succeeded, by dint of money, in obtaining citizenship at Thebes. Here he pursued the employment of a money-lender or usurer, and obtained from this circumstance the appellation of *Ἡμεροδωρετής* ("one who lends money at daily interest"). Having been defrauded, and having lost, in consequence, all his property, he hung himself in despair. *Menippus* was the author of several works, and his satiric style was imitated by Varro. (*Vid.* remarks on the *Menippean Satire*, under the article *Varro*.) Among other productions, he wrote a piece entitled *Διούργους πρῶτος*, "*The Sale of Diogenes*," and another called *Νεκρία*, "*Necromancy*." It is thought by some, that this latter performance suggested to some imitator of Lucian the idea of composing the "*Menippus, or Oracle of the Dead*," which is found among the works of the native of Samosata. (*Schöll, Hist. Lit. Gr.*, vol. 2, p. 363.)

MENNIS, a city of Assyria, in the district of Adiabene, to the south of Arbela. The adjacent country abounded with bitumen. Mannert supposes it to have been near the modern *Dus-Charmak*. (*Mannert, Geogr.*, vol. 5, p. 458.) Cartius calls it *Memnium* (5, 1).

MEMNOCERUS, a physician of the empiric school, born

at Nicomedia. He was a disciple of Antiochus of Laodicea in Lycia, and lived during the reigns of Trajan and Hadrian. Sextus Empiricus ranks him among the Sceptics. (*Pyrrhon. hypotyp.*, 1, 232, p. 57.) He banished analogy from the Empiric system, and substituted what was called epilogism. The hatred which he bore towards the dogmatists was so great, that he never designated them by any other but the most derisory epithets, such as *τριβωνικοί*, "*old-routine-men*;" *ὀργυλλέοντες*, "*furious lions*;" *ὀριμυμύροις*, "*contemptible fools*," &c. (*Galen, de subfig. empir.*, c. 9, p. 65.—*Sprengel, Hist. Med.*, vol. 1, p. 494.)

MENŒCEUS (three syllables), the father of Jocasta.

MENŒTES, I. the pilot of the ship *Gyas*, at the naval games exhibited by Æneas at the anniversary of his father's death. He was thrown into the sea by his commander for having so unskillfully steered his vessel as to prevent his obtaining the prize in the contest. He saved himself by swimming to a rock. (*Virg., Æn.*, 5, 161.)—II. An Arcadian, killed by Turnus in the war of Æneas. (*Id.*, 12, 517.)

MENŒTIŒDES. *Vid.* Menœstius.

MENŒTIUS, a son of Actor and Ægina after her amour with Jupiter. He left his mother and went to Opus, where he had, by Sthenelus, Patroclus, often called from him *Menætiades*. Menœtius was one of the Argonauts. (*Apollod.*, 3, 14.—*Hom., Il.*, 1, 307.—*Hygin., fab.*, 97.)

MENON, a Thessalian commander in the expedition of Cyrus the Younger against his brother Artaxerxes. He commanded the left wing in the battle of Cunaxa. He was entrapped along with the other generals after the battle by Tissaphernes, but was not put to death with them. Xenophon states that he lived an entire year after having had some personal punishment inflicted, and then met with an end of his existence. (*Anab.*, 2, 6, 29.) Diodorus states that he was not punished with the other generals, because it was thought that he was inclined to betray the Greeks, and he was therefore allowed to escape unhurt. (*Diod. Sic.*, 14, 27.) Marcellinus, in his life of Thucydides, accuses Xenophon of calumniating Menon, on account of his enmity towards Plato, who was a friend of Menon. (*Vit. Thucyd.*, p. 14, ed. *Bip.*—*Schneider, ad Xen., Anab., loc. cit.*)

MENTOR, I. one of the most faithful friends of Ulysses, and the person to whom, before his departure for Troy, he consigned the charge of his domestic affairs. Minerva assumed his form and voice in her exhortation to Telemachus, not to degenerate from the valour and wisdom of his sire. (*Od.*, 2, 268.) The goddess, under the same form, accompanied him to Pylus. (*Od.*, 3, 21, *seqq.*)—II. A very eminent engraver on silver, whose country is uncertain. He flourished before the burning of the temple at Ephesus, in B.C. 356, as several of his productions were consumed in this conflagration. (*Plin.*, 32, 12, 55.—*Martial, Ep.*, 3, 41.—*Sillig. Dict. Art.*, s. v.)

MERA or MÆRA, a dog of Icarus, who by his cries showed Erigone where her murdered father had been thrown. Immediately after this discovery the daughter hung herself in despair, and the dog pined away, and was made a constellation in the heavens, known by the name of Canis. (*Ovid, Met.*, 7, 363.—*Hygin., fab.*, 180.—*Ælian, H. A.*, 7, 28.)

MÆRKURII PROMONTORIUM, the same with the Hermeum Promontorium. A promontory of Africa, on the coast of Zeugitana, now Cape Bon.

MERCURIUS, I. a celebrated god of antiquity, called Hermes ('*Ἑρμῆς*') by the Greeks. Homer and Hesiod, however, style him *Hermeias* ('*Ἑρμείας*'); and wherever the form '*Ἑρμῆς*' occurs in these poets, the passage may be regarded as an interpolation. Mercury was the messenger of the gods, and of Jupiter in particular; he was the god of speech, of eloquence; the patron of

orators, of merchants, of all dishonest persons, and particularly thieves, of travellers, and of shepherds. He also presided over highways and crossways, and conducted the souls of the dead to the world below. The Greeks ascribed to their Hermes the invention of the lyre, of letters, of commerce, and of gymnastic exercises, and they placed his birth either on Mount Cerycius in Boeotia, or on Mount Cyllene in Arcadia. In the *Iliad* he is called the son of Jupiter (24, 383), but his mother is unnoticed. In the later legends, however, he is styled the offspring of Jupiter and Maia. His infancy was intrusted to the Seasons or Hours; but he had hardly been laid in his cradle, when he gave a proof of his skill in abstracting the property of others, by stealing away the oxen of Admetus, which Apollo was tending on the banks of the Amphyrysus. He displayed his thievish propensities on other occasions also, by depriving Neptune of his trident, Venus of her girdle, Mars of his sword, Jupiter of his sceptre, and Vulcan of many of the implements of his art. It was his dexterity that recommended him to the notice of the gods, and that procured for him the office of cup-bearer to Jupiter, in which station he was succeeded by Hebe. Jupiter presented him with a winged cap (*petasus*), winged sandals (*talaria*), and a short sword (*harpe*) bent like a scythe. This last he lent on one occasion to Perseus, to enable him to destroy the Gorgon Medusa. (*Vid.* Perseus and Gorgonea.) By means of his cap and sandals he was enabled to go into whatever part of the universe he pleased with the greatest celerity, and, besides, he was permitted to make himself invisible, and to assume whatever shape he pleased. He was the ambassador and plenipotentiary of the gods, and was concerned in all alliances and treaties. He was the confidant of Jupiter also in his erotic relations with the fair ones of earth, and was often set to watch and baffle the jealous schemes of Juno. After inventing the lyre, he gave it to Apollo, and received from him in exchange the "golden three-leaved rod," the giver of wealth and riches. (*Vid.* Caduceus.) In the wars of the giants against the gods, Mercury showed himself brave, spirited, and active.—He delivered Mars from the long confinement which he had suffered from the Aloadæ; he tied Ixion to his wheel in the infernal regions; he destroyed the hundred-eyed Argus; he sold Hercules to Omphale, the queen of Lydia; he conducted Priam to the tent of Achilles, to redeem the body of his son Hector; and he carried the infant Bacchus to the nymphs of Nysa. Mercury had many surnames and epithets. He was called Cyllenius, Caduceator, Argiphontes (or the slayer of Argos), Chthonius (or the god who guides the dead to the world below), Agoneus (or the god who presides over gymnastic exercises), &c. He was father of Autolycus, by Chione; Myrtilus, by Cleobula; Libys, by Libya; Echion and Eurytus, by Antianira; Cephalus, by Creüsa; Phryllis, by Issa; Hermaphroditus, by Venus; Eudorus, by Polimela, &c. The Roman merchants yearly celebrated a festival on the 13th of May, in honour of Mercury, in a temple near the Circus Maximus. A pregnant sow was then sacrificed, and sometimes a calf, and particularly the tongues of animals were offered. After the votaries had sprinkled themselves with lustral water, they offered prayers to the divinity, and entreated him to be favourable to them, and to forgive whatever dishonest means they had employed in the acquisition of gain.—Mercury is usually represented with a *chlamys* or cloak neatly arranged on his person, with his *petasus* or winged cap, and the *talaria* or winged sandals. In his hand he bears his *caduceus* or staff, with two serpents twined about it, and which sometimes has wings at its extremity. The more ancient statues of Mercury were nothing more than wooden posts, with a rude head and a pointed beard carved on them. They were set up on the roads and

footpaths, and in the fields and gardens. The Herms were pillars of stone; and the heads of some other deity at times took the place of that of Hermes; such were the Hermathene, Hermeracles, and others. The veneration in which these Herms were held by the Athenians may be inferred from the odium excited against Alcibiades when suspected of having disfigured these images.—Hermes or Mercury may be regarded as in some degree a personification of the Egyptian priesthood. It is in this sense, therefore, that he was regarded as the confidant of the gods, their messenger, the interpreter of their decrees, the genius who presided over science, the conductor of souls; elevated indeed above the human race, but the minister and the agent of celestial natures. He was designated by the name Thot. According to Jablonski (*Panth. Egypt.*, 5, 5, 2), the word *Thot*, *Theyt*, *Thayt*, or *Thoyt*, signified in the Egyptian language an assembly, and more particularly one composed of sages and educated persons, the sacerdotal college of a city or temple. Thus the collective priesthood of Egypt, personified and considered as unity, was represented by an imaginary being, to whom was ascribed the invention of language and writing, which he had brought from the skies and imparted to man, as well as the origin of geometry, arithmetic, astronomy, medicine, music, rhythm: the institution of religion, sacred processions, the introduction of gymnastic exercises, and, finally, the less indispensable, though not less valuable, arts of architecture, sculpture, and painting. So many virtues were attributed to him, that no human being could possibly have composed them. (*Fabric., Biblioth. Græc.*, 1, 12, 85-94.) To him was even accorded the honour of discoveries made long subsequent to his appearance on earth. All the successive improvements in astronomy, and, generally speaking, the labours of every age, became his peculiar property, and added to his glory. In this way, the names of individuals were lost in the numerous order of priests, and the merit which each one had acquired by his observations and labours turned to the advantage of the whole sacerdotal association, in being ascribed to its tutelary genius; a genius who, by his double figure, indicated the necessity of a double doctrine, of which the more important part was to be confined exclusively to the priests. An individual of this order, therefore, found his only recompense in the reputation which he obtained for the entire caste. To these leading attributes of Thoth was joined another, that of protector of commerce; and this, in like manner, was intended to express the influence of the priesthood on commercial enterprises. Our limits will not permit any farther development of the various ideas which, besides those already mentioned, were combined in the imaginary character of Hermes: his identity, namely, with Sirius, the star which served as the precursor of the inundation of the Nile, and the terrestrial symbol of which was the gazelle, that flies to the desert on the rising of the stream; his rank in demonology, as the father of spirits and guide of the dead; his quality of incarnate godhead, subject to death; and his cosmogonical alliance with the generative fire, the light, the source of all knowledge, and with water, the principle of all fecundity. It is surprising, however, to observe how strangely the Grecian spirit modified the Egyptian Hermes, to produce the Hermes or Mercury of Hellenic mythology. The Grecian Hermes is quite a different being from the Egyptian. He neither presides over the sciences, over writing, over medicine, nor over astronomy. He has not composed any divine works containing the germs and elements of these several departments of knowledge. The interpreter of the gods in Egypt, he is in Greece only their messenger; and it is by virtue of this latter title that he preserves his wings, which were among the Egyptians merely an astronomical symbol. For the shackles on

the feet of Saturn serve to explain the wings of Mercury. Saturn is represented in this state, because it requires thirty years nearly to complete its revolution round the sun; while Mercury has wings, because this planet accomplishes the same revolution in little less than three months. Again, if, in memory of the directions given by the priests of Ammon to the caravans that traversed the desert, the Egyptian Hermes becomes the protector of commerce, the Greeks managed to deprive this peculiar attribute of all its gravity. With them Hermes or Mercury, by a ludicrous analogy, is made the god of fraud and falsehood. Is this a reaction of the Grecian spirit against the pretensions of a sacerdotal order, and one which preserves, at the same time, a reminiscence of what the Egyptian Hermes was?—It is worthy of remark, moreover, how, even when all the sacerdotal attributes of this deity have disappeared from the popular belief, they again appear in the mystic portion of the early Greek religion which the Orphic and Homeric hymns have preserved to us. The Hermes of these hymns has nothing in common with the Hermes of the Iliad, or even of the Odyssey. At one time he recalls to our minds all the peculiar qualities of the Egyptian Hermes, at another the strange legends of the Hindoo avatars. The difference between the sacerdotal and the Greek Hermes becomes very perceptible among the Romans. This people first received the sacerdotal Hermes, whose worship had been brought into Etruria by the Pelasgi previous to the time of Homer; and as the earlier Hermes was represented by a column (*Jablonski, Panth. Egypt.*, 5, 5, 15), he became with them the god Terminus. When, however, the Romans were made acquainted with the twelve great deities of the Athenians, they adopted the Grecian Hermes under the name of Mercury, preserving at the same time the remembrance of their previous traditions. (Compare *Constant, de la Religion*, vol. 2, p. 122, in note, *ibid.*, p. 409.—*Creuzer's Symbolik*, par Guignaut, vol. 1, pt. 1, p. 453, *id.*, pt. 2, p. 851.)—II. Trismegistus, a celebrated Egyptian priest and philosopher. Manetho distinguishes him from the first Hermes or Thot, and says of him (*ap. Syncell.*, p. 40), that from engraved tables of stone, which had been buried in the earth, he translated the sacred characters written by the first Mercury, and wrote the explanations in books, which were deposited in the Egyptian temples. He calls him the son of Agathodæmon, and adds, that to him are ascribed the restoration of the wisdom taught by the first Mercury, and the revival of geometry, arithmetic, and the arts among the Egyptians. The written monuments of the first Hermes having been lost or neglected in certain civil revolutions or natural calamities, the second Hermes recovered them, and made use of them as means of establishing his authority. (*Herod.*, 2, 82.—*Marsham, Chron.*, p. 241.—*Clem. Alex., Strom.*, 5, p. 242.) By an ingenious interpretation of the symbols inscribed upon the ancient columns, he impressed the sacred sanction of antiquity upon his own institutions; and, to perpetuate their influence upon the minds of the people, he committed the columns, with his own interpretations, to the care of the priesthood. Hence he obtained a high degree of respect among the people, and was long revered as the restorer of learning. From the tables of the first Hermes he is said to have written, as commentaries and explanations, an incredible number of books. It has been asserted that he was the author of more than 20,000 volumes, which treated of universal principles, of the nature and orders of celestial beings, of astrology, medicine, and other topics. For an account of his pretended works, consult the article Trismegistus.

MEKTONNE, son of Molus, a Cretan prince, and of Melphidis. He had been among the suitors of Helen, and was therefore bound to join in the common cause

against Troy. Meriones assisted Idomeneus in the conduct of the Cretan troops, under the character of charioteer, and not only distinguished himself by his valour, but, at the funeral games in honour of Patroclus, he obtained the prize for archery. (*Il.*, 2, 661; 4, 254; 5, 59, &c.)

MERMNIDÆ, the name of a dynasty of kings in Lydia, of whom Gyges was the first. The line ended with Cræsus. They claimed descent from Hercules. (*Vid.* Lydia.)

MEROË, according to the ancient writers, an island and state of Ethiopia. Herodotus only mentions the city of Meroë. All other writers, however, describe Meroë as an island, with a city of the same name. It was situated between the Astaboras and Astapus. "The Astaboras," says Agatharchides, "which flows through Ethiopia, unites its stream with the greater Nile, and thereby forms the island of Meroë by flowing round it." (*Huds., Geogr. Min.*, 1, p. 37.) Strabo is still more precise. "The Nile," says this geographer, "receives two great rivers, which run from the east out of some lakes, and encompass the great island of Meroë. One is called the Astaboras, which flows on the eastern side; the other the Astapus. Seven hundred stadia above the junction of the Nile and the Astaboras is the city of Meroë, bearing the same name as the island." (*Strab.*, 786.) A glance at the map, remarks Heeren (*Ideen*, vol. 4, p. 397; vol. 1, p. 385, *Oxford transl.*), will immediately show where the ancient Meroë may be found. The Astaboras, which flows round it on the eastern side, is the present *Atbar* or *Tacazze*; the Astapus, which bounds it on the left, and runs parallel with the Nile, is the *Bahr el Abiad*, or *White River*. From these and other statements, Heeren comes to the following conclusions: *First*: that the ancient island of Meroë is the present province of *Atbar*, between the river of the same name, or the *Tacazze*, on the right, and the White stream and the Nile on the left. The point where the island begins is at the junction of the *Tacazze* and the Nile; in the south it is enclosed by a branch of the above-mentioned river, the *Waldubba*, and a branch of the Nile, the *Bahad*, whose sources are nearly in the same district, although they flow in different directions. It lies between 19° and 18° N. lat. In recent times a great part is included in the kingdom of *Sennaar*, while the southern part belongs to Abyssinia. — *Secondly*: Meroë was, therefore, an extensive district, surrounded by rivers; whose superficial contents exceeded those of Sicily rather more than one half. It cannot be called an island in the strictest sense of the word, because, although it is very nearly, it is not completely enclosed by rivers; but it was taken for an island of the Nile, because, as Pliny (5, 9) expressly observes, the various rivers which flow round it were all considered as branches of that stream. It becomes, moreover, as we are told by Bruce, a complete island in the rainy season, in consequence of the overflowing of the river. — *Thirdly*: Upon this island stood the city of the same name. It is impossible, from the statements of Herodotus, to determine precisely its site. Fortunately, other writers give us more assistance. According to Eratosthenes (*ap. Strab.*, l. c.), it lay 700 stadia (about 80 English miles) above the junction of the *Tacazze* or *Astaboras* and the Nile. Pliny (6, 29), following the statements of those whom Nero had sent to explore it, reckons 70 *milliaria* (63 English miles); and adds the important fact, that near it, in the river on the right side going up stream, is the small island *Tadu*, which serves the city as a port. From this it may be concluded with certainty, that the city of Meroë was not on the *Tacazze*, as might otherwise be conjectured from the names of those rivers being so unsettled, but on the proper Nile; and its situation, notwithstanding the little difference between Pliny and

Eratosthenes, may be determined with the nicest accuracy by the small island just mentioned, which Bruce has not omitted to note upon his map. The ancient city of Meroë then stood a little below the present *Shendy*, under 17° N. lat., 54° E. long. Bruce saw its ruins from a distance. What Bruce and Burckhardt, however, only saw at a distance and hastily, has now been carefully examined by later travellers, especially Caillaud, and placed before our eyes by their drawings. But, although it is probable that the true site of Meroë has here been indicated, yet it is proper to remark, that antiquaries have differed on the subject: some considering the ruins of Mount Berkel, considerably farther down the river, to point to the spot. (*Edinb. Review*, vol. 41, p. 181.) Mount Berkel is situated in *Dar Shettya*, near a village called *Meraue*, at about 18° 31' N. lat., and the ruins are nearly of equal extent with those near Shendy. The circumstance of the name *Meraue* has doubtless led partly to this idea, but the argument is rendered null by the fact mentioned by Caillaud, that a place not far from Shendy, covered with remains of ancient buildings, is called *El Merauey*, and similar names are by no means uncommon in many of the provinces of the Nile. The ruins at Mount Berkel, according to Caillaud, are probably those of Napata, originally the second city, and latterly the capital, of Ethiopia. (*Long's Anc. Geogr.*, p. 78.) The site of the ancient city of Meroë is still indicated by the remains of a few temples, and of many other edifices of sandstone. The whole extent, according to Caillaud, amounts to nearly 4000 feet. The plain allowed sufficient room for a much larger city, and that the city itself was larger than what is here stated cannot for a moment be doubted.

1. Religion of Meroë.

From the observations of travellers who have carefully examined the ruins of Meroë, we arrive at the important deduction, that this region was once inhabited by a people equally as far advanced in refinement as the Egyptians, and whose style of architecture and religious ceremonies, as portrayed on the remains of that architecture, bear a close resemblance to those of Egypt. All this becomes extremely interesting when we call to mind what is stated by many of the ancient writers, that Meroë was the cradle of the religious and political institutions of Egypt: that here the arts and sciences arose; that here hieroglyphic writing was discovered; and that temples and pyramids had already sprung up in this quarter, while Egypt still remained ignorant of their existence. It stands as an incontrovertible fact, remarks Heeren (*Ideen*, vol. 4, p. 419; vol. 1, p. 406, *Oxford transl.*), that, besides the pastoral and hunting tribes, which led a nomade life to the west of the Nile, and still more to the east, as far as the Arabian Gulf, there existed a cultivated people near this stream, in the valley through which it flows, who had fixed abodes, built cities, temples, and sepulchres, and whose remains even now, after the lapse of so many centuries, still excite our astonishment. It may farther be stated as a certainty, that the civilization of this people was, in an especial manner, connected with their religion; that is, with the worship of certain deities. The remains of their foundation prove this too clearly for any doubt to be entertained on the subject. This religion, upon the whole, is not uncertain. It was the worship of Ammon and his kindred gods. The circle of these deities was very nearly of the same extent as that of Olympus among the Greeks; it might, possibly, be somewhat larger. It became extended by the appearance of the same deity in different relations, and consequently with changed attributes, especially with different head-ornaments, and also under various forms. Without digressing into a detailed

description of particular deities, we may venture a step farther, adds the same writer, without fear of contradiction, and assert that this worship had its origin in natural religion connected with agriculture. The great works of nature were revered accordingly as they promoted or retarded and hindered this. It seems natural that the sun and moon, so far as they determined the seasons and the year, the Nile and the earth as sources of fruitfulness, the sandy deserts as the opposers of it, should all be personified. One thing is remarkable, namely, that of all the representations of Nubia yet known, there is not one which, according to our notions, is offensive to decency. But this worship had, besides, as we know with certainty, a second element, oracles. Ammon was the original oracle-god of Africa: if afterward, as was the case in Egypt, other deities delivered oracles, yet they were of his race, of his kindred. Even beyond Egypt we hear of the oracles of Ammon. "The only gods worshipped in Meroë," says Herodotus (2, 29), "are Zeus and Dionysos" (which he himself explains to be Ammon and Osiris). "They also have an oracle of Ammon, and undertake their expeditions when and how the god commands." How these oracles were delivered we learn partly from history, partly from representations on monuments. In the sanctuary stands a ship; upon it many holy vessels; but, above all, in the midst a portable tabernacle, surrounded with curtains, which may be drawn back. In this is an image of the god, set, according to Diodorus (2, 199), in precious stones; nevertheless, according to one account, it could have no human shape. (Curtius, 4, 7. "*Umbilico similis*.") This statement of Curtius, however, is incorrect, not only because contradicted by the passage just quoted from Diodorus, but also because we see on one of the common monuments a complete portrait of Ammon.—The ship in the great temples seems to have been very magnificent. Sesostris presented one to the temple of Ammon at Thebes, made of cedar, the inside of cedar and the outside of gold. (Diod., 1, 57.) The same was hung about with silver goblets. When the oracle was to be consulted, it was carried around by a body of priests in procession, and from certain movements, either of the god or of the ship, both of which the priests had well under their command, the omens were gathered, according to which the high-priest then delivered the oracle. This ship is often represented, both upon the Nubian and Egyptian monuments, sometimes standing still, and sometimes carried in procession; but never anywhere except in the innermost sanctuary, which was its resting-place. Upon the Nubian monuments hitherto made known we discover this in two places; at Asseboas and Derar, and on each twice. Those of Asseboas are both standing. In one the tabernacle is veiled, but upon the other it is without a curtain. (Gau, plate xlv., B.) Ammon appears in the same sitting upon a couch; before him an altar with gifts. (Gau, plate xlv., A.) Upon one the king is kneeling before the ship at his devotions; in the other he is coming towards it with an offering of frankincense. In the sanctuary of the rock monument at Derar we also discover it twice. Once in procession, borne by a number of priests (Gau, plate li., C.); the tabernacle is veiled, the king meets it, bringing frankincense: the other time at rest. (Ibid., plate lii.) These processions are not only seen upon the great Egyptian temples at Philæ, Elephantine, and Thebes, but also in the great Oasis. (Description de l'Égypte, pl. xiii., xxxvii., lxi.) These oracles were certainly the main support of this religion; and if we connect with them the local features of the countries, it will at once throw a strong light upon its origin. Fertility is here, as well as in Egypt, confined to the borders of the Nile. At a very short distance from it the desert begins. How could it, then, be

otherwise than that crowds of men should congregate on the borders of the stream where the *dhoura*, almost the only corn here cultivated, would grow! And if they could satisfy their first cravings with the produce of this scanty space, was not the rise of a natural religion, referring to it, just what might be expected? Add to all this, however, another circumstance highly important. Meroë was, besides, the chief mart for the trade of these regions. It was the grand emporium of the caravan trade between Ethiopia, the north of Africa, and Egypt, as well as of Arabia Felix and even India. (Heeren, Ideen, vol. 4, p. 423; vol. 1, p. 411, Oxford transl.)

2. Government and General History of Meroë.

Meroë, according to the accounts of the ancient writers, was a city which had its settled constitution and laws, its ruler and government. But the form of this state was one which we too often find among the kingdoms of these southern regions; it was a hierarchy: the government was in the hands of a race or caste of priests, who chose from among themselves a king. Diodorus's account of them, which is the most extensive and accurate that we have, is here given. "The laws of the Ethiopians," says he, speaking of Meroë (3, 5), "differ in many respects from those of other nations, but in none so much as in the election of their kings, which is thus managed. The priests select the most distinguished of their own order, and upon whichever of these the god (Jupiter Ammon) fixes, as he is carried in procession, he is acknowledged king by the people; who then fall down and adore him as a god, because he is placed over the government by the choice of the gods. The person thus selected immediately enjoys all the prerogatives which are conceded to him by the laws, in respect to his mode of life; but he can neither reward nor punish any one beyond what the usages of their forefathers and the laws allow. It is a custom among them to inflict upon no subject the sentence of death, even though he should be legally condemned to that punishment; but they send to the malefactor one of the servants of justice, who bears the symbol of death. When the criminal sees this, he goes immediately to his own house, and deprives himself of life. The Greek custom of escaping punishment by flight into a neighbouring country is not there permitted. It is said that the mother of one who would have attempted this strangled him with her own girdle, in order to save her family from that greater ignominy. But the most remarkable of all their institutions is that which relates to the death of the king. The priests at Meroë, for example, who attend to the service of the gods, and hold the highest rank, send a messenger to the king with an order to die. They make known to him that the gods command this, and that mortals should not withdraw from their decrees; and perhaps added such reasons as could not be controverted by weak understandings, prejudiced by custom, and unable to oppose anything thereto." Thus far Diodorus. The government continued in this original state till the period of the second Ptolemy, and its catastrophe is not less remarkable than its foundation. By its increased intercourse with Egypt, the light of Grecian philosophy penetrated into the interior of Africa. Ergamenes, at that time king of Meroë, tired of being priest-ridden, fell upon the priests in their sanctuary, put them to death, and became effectually a sovereign. (Diodorus, 3, 6.)—Of the history of this state previous to the revolution just mentioned, but very scanty information has been preserved; but yet enough to show its high antiquity and its early aggrandizement. Pliny tells us (6, 35) that "Ethiopia was ruined by its wars with Egypt, which it sometimes subdued and sometimes served; it was powerful and illustrious even as far back as the Trojan war, when Memnon reigned.

MEROE.

At the time of his sovereignty," he continues, "Meroë is said to have contained 350,000 soldiers and 400,000 artificers. They still reckon there forty-five kings." Though these accounts lose themselves in the darkness of tradition, yet we may, by tracing history upward, discover some certain chronological data. In the Persian period Meroë was certainly free and independent, and an important state; otherwise Cambyes would hardly have made so great preparations for his unfortunate expedition. (*Herod.*, 2, 25.) The statement of Strabo, according to which Cambyes reached Meroë, may perhaps be brought to accord with that of Herodotus, if we understand him to mean northern Meroë, near Mount Berkel.—During the last dynasty of the Pharaohs at Saïs, under Psammetichus and his successors, the kingdom of Meroë not only resisted his yoke, although his son Psammis undertook an expedition against Ethiopia; but we have an important fact, which gives a clew to the extent of the empire at that time towards the south; the emigration of the Egyptian warrior-caste. These migrated towards Meroë, whose ruler assigned them dwellings about the sources of the Nile, in the province of *Goyam*, whose restless inhabitants were expelled their country. (*Herod.*, 2, 30.) The dominions of the ruler of Meroë, therefore, certainly reached so far at that time, though his authority on the borders fluctuated in consequence of the pastoral hordes roving thereabout, and could only be fixed by colonies. Let us go a century farther back, between 800 and 700 B.C., and we shall mount to the flourishing periods of this empire, contemporaneous with the divided kingdoms of Israel and Judah; especially with the reign of Hezekiah, and the time of Isaiah, 750–700, where we shall consequently have a light from the Jewish annals, and the oracles of the prophets, in connexion with Herodotus. This is the period in which the three mighty rulers, Sabaco, Seuechus, and Tarhaco started up as conquerors, and directed their weapons against Egypt, which, at least Upper Egypt, became an easy prey, from the unfortunate troubles preceding the dodecarchy having just taken place. According to Eusebius (*Chron.*, vol. 2, p. 181.—Compare *Marshall*, p. 435), Sabaco reigned twelve, Seuechus also twelve, and Tarhaco twenty years; but by Herodotus, who only mentions Sabaco, to whom he gives a reign of fifty years, this name seems to designate the whole dynasty, which not infrequently follows that of its founder. Herodotus expressly says that he had quitted Egypt at the command of his oracle in Ethiopia (2, 137, *seqq.*). It may therefore be seen, by the example of this conqueror, how great their dependance must have been, in their native country, upon the oracle of Ammon, when even the absent monarch, as ruler of a conquered state, yielded obedience to it. Sabaco, however, is not represented by him as a barbarian or tyrant, but as a benefactor to the community by the construction of dams. The chronology of Seuechus and Tarhaco is determined by the Jewish history. Seuechus was the contemporary of Hosea, king of Israel, whose reign ended in 722, and of Salmanassar (2 *Kings*, 17, 4; 19, 9). Tarhaco was the contemporary of his successor Sennacherib, and deterred him, in the year 714 B.C., from the invasion of Egypt merely by the rumour of his advance against him. (2 *Kings*, 19, 9.) His name, however, does not seem to have been unknown to the Greeks. Eratosthenes (*ap. Strabo*, 680) mentions him as a conqueror who had penetrated into Europe, and as far as the Pillars of Hercules; that is, as a great conqueror. Certainly, therefore, the kingdom of Meroë must have ranked about this time as an important state. And we shall find this to be the case if we go about 200 years farther back, to the time of Asa, the great-grandson of Solomon, but who nevertheless mounted the throne of Judah within twenty years after his grand-sire's death, 955 B.C. Against him, it is said in the

MEROE.

Jewish annals, went out Zerah, the Ethiopian, with a host of a hundred thousand men and three hundred chariots. (3 *Chron.*, 14, 9.) Although this number signifies nothing more than a mighty army, it yet affords a proof of the mightiness of the empire, which at that time probably comprised Arabia Felix; but the chariots of war, which were never in use in Arabia, prove that the passage refers to Ethiopia: Zerah's expedition took place in the early part of Asa's reign; consequently, about 950 B.C.; and as such an empire could not be quite a new one, we are led by undoubted historical statements up to the period of Solomon, about 1000 B.C.; and, as this comes near to the Trojan period, Pliny's statements, though only resting on mythi, obtain historical weight. Farther back than this, the annals of history are silent; but the monuments now begin to speak, and confirm that high antiquity which general opinion and the traditions of Meroë attribute to this state. The name of Rameses or Sesostris has already been found upon many of the Nubian monuments, and that he was the conqueror of Ethiopia is known from history. (*Herod.*, 2, 110.—*Strabo*, 791.) The period in which he flourished cannot be placed later than 1500 years before the Christian era. But the name of Thutmosis, belonging to the preceding dynasty, has also been found in Nubia, and that assuredly upon one of the most ancient monuments of Armada. But in this sculpture, as well as in the procession, representing the victory over Ethiopia in the offering of the booty, there appears a degree of civilization which shows an acquaintance with the peaceful arts; they must consequently be attributed to a nation that had long been formed. We thus approach the Mosaic period, in which the Jewish traditions ascribe the conquest of Meroë to no less a person than Moses himself. (*Joseph.*, *Ant. Jud.*, 2, 10.) The traditions of the Egyptian priesthood also agree in this, that Meroë, in Ethiopia, laid the foundation of the most ancient states. In a state whose government differed so widely from anything that we have been accustomed to, it is reasonable to suppose that the same would happen with regard to the people or subjects. We cannot expect a picture here that will bear any similitude to the civilized nations of Europe. Meroë rather resembled in appearance the larger states of interior Africa at the present day; a number of small nations, of the most opposite habits and manners—some with, and some without settled abodes—form there what is called an empire; although the general political band which holds them together appears loose, and is often scarcely perceptible. In Meroë this band was of a twofold nature; religion, that is, a certain worship, principally resting upon oracles, and commerce; unquestionably the strongest chains by which barbarians could be fettered, except forcible subjugation. The rites of that religion, connected with oracles, satisfied the curious and superstitious, as did trade the cravings of their sensual appetites. Eratosthenes has handed us down an accurate picture of the inhabitants of Meroë in his time (*ap. Strab.*, 821). According to his account, the island comprised a variety of people, of whom some followed agriculture, some a nomade, pastoral life, and others hunting; all of them choosing that which was best adapted to the district in which they lived. (*Heeren*, *Ideen*, vol. 4, p. 433; *Oxford transl.*, vol. 1, p. 420.)

3. Commerce of Meroë.

The ruling priest-caste in Meroë seem to have sent out colonies, who carried along with them the service of their gods, and became the founders of states. One of these colonies, according to the express testimony of Herodotus (2, 42), was Ammonium in the Libyan desert, which had not merely a temple and an oracle, but probably formed a state in which the priest-caste, as in Meroë, continued a ruling race, and chose a king

MEROE.

from their own body. Ammonium served as a resting-place for the caravans passing from northern Africa to Meroë. Another still earlier settlement of this kind was very probably Thebes in Upper Egypt. The circumstance of a town flourishing to such an extent in the midst of a desert, of the same worship of Ammon, of the all-powerful priest-caste, and its permanent connexion with Meroë (united with which it founded Ammonium), conjoined with the express assertion of the Ethiopians that they were the founders (*Diod.*, 3, 3), gives to this idea a degree of probability bordering on certainty. The whole aspect of the circumstances connected with this wide-spread priest-caste gains a clearer light, if we consider Ammonium, Thebes, and Meroë the chief places of the African caravan trade; in this view of the subject, the darkness of Egypto-Ethiopian antiquity is cleared up, as in the hands of this priest-caste the southern caravan trade was placed, and they founded the proud temples and palaces along the banks of the Nile, and the great trading edifices, which served their gods for sanctuaries, themselves for dwellings, and their caravans for places of rest. To this caste, the states of Meroë and Upper Egypt very probably owed their foundation; except, indeed, that Egypt was much more exposed to the crowding in of foreign relations from Asia, than Meroë, separated as this last was from other countries by deserts, seas, and mountains. The close connexion, in high antiquity, between Ethiopia and upper Egypt, is shown, by the circumstance that the oldest Egyptian states derived their origin partly from Abyssinia; that Thebes and Meroë founded, in common, a colony in Libya; that Ethiopian conquerors several times advanced into Egypt, and, on the other hand, that Egyptian kings undertook expeditions to Ethiopia; that in both countries a similar worship, similar manners and customs, and similar symbolical writing were found; and that the discontented soldier-caste, when offended by Psammetichus, emigrated into Ethiopia. By the Ethiopians Egypt was likewise profusely supplied with the productions of the southern countries. Where else, indeed, could it have obtained those aromatics and spices with which so many thousands of its dead were annually embalmed? Whence those perfumes which burned upon its altars? Whence that immense quantity of cotton in which the inhabitants clothed themselves, and which Egypt itself furnished but sparingly? Whence, again, that early report in Egypt of the Ethiopian gold-countries, which Cambyzes sought after, and lost half his army in the fruitless speculation? Whence the quantity of ivory and ebony which adorned the oldest works of art of the Greeks as well as of the Hebrews? Whence, especially, that early extension of the Ethiopian name, which shines in the traditionary history of so many nations, and which the Jewish poets as well as the oldest Greek bards have celebrated? Whence all this, if the deserts which bordered on Ethiopia had always kept the inhabitants isolated from those of more northern countries?—At a later period, in the time of Ptolemy I., it is astonishing how completely that able prince had established the trade between his own country, India, Ethiopia, and Arabia. The series of magnificent and similar monuments, interrupted on the frontiers of Egypt, near Elephantine, and recommencing on the southern side of the African desert, at Mount Berkel, and especially at Meroë, to be continued to Axum and Azab, certainly denote a people of similar civilization and activity. Meroë was the first fertile country after crossing the Libyan desert, and formed a natural resting-place for the northern caravans. It was likewise the natural mart for the productions of inner Africa, which were brought for the use of the northern portion, and was reckoned the outermost of the countries which produced gold, while by the navigable rivers surrounding it on all sides, it

MEROE.

had a ready communication with the more southern countries (*Diod.*, 1, 33). As ready, owing to the moderate distance, was its connexion with Arabia Felix; and so long as Yemen remained in possession of the Arabian and Indian trade, Meroë was the natural market-place for the Arabian and Indian wares in Africa. The route which led in antiquity from Meroë to the Arabian Gulf and Yemen, is not designated by any historian: the commerce between those nations being indicated only by monumental traces which the hand of time has not been able to destroy. Immediately between Meroë and the gulf are situated the ruins of Axum, and at the termination of the route, on the coast opposite to Arabia Felix, are those of Azab or Saba. Heeren, from whom the above ideas are principally borrowed, deduces the following conclusions from a review of the entire subject.—1. That in the earlier ages, a commercial intercourse existed here between the countries of southern Asia and Africa; between India and Arabia, Ethiopia, Libya, and Egypt, which was founded upon their mutual necessities, and became the parent of the civilization of these nations.—2. That the principal seat of this international commerce was Meroë; and its chief route is distinguished by a chain of ruins reaching from the shores of the Indian Ocean to the Mediterranean: Axum and Azab being links in this chain between Arabia Felix and Meroë; Thebes and Ammonium between Meroë, Egypt, and Carthage.—3. That chief places for trade were at the same time settlements of that priest-caste, which, as the ruling tribe, had its chief residence at Meroë, and sent out colonies thence, who became builders of towns and temples, and, at the same time, founders of new states.—The conductors of this caravan trade in Africa, as in Asia, were the Nomadic shepherd-nations. Men accustomed to fixed residences and to dwellings in towns were not adapted for the restless caravan-life, especially on account of the attention necessary for the camels, and for the loading and unloading of wares. It was better suited to Nomadic nations. In the case of the Carthaginian caravans, we know that they were managed by the Nomadic Lotophagi and Nasamones, as the caravans were by the Midianites and Edomites in Arabia: this is historically proved, and it is probable that it was the case on the great commercial road from Ammonium to Azab, as similar Nomadic tribes are still found on the coast of the Arabian Gulf.—Meroë had mines not only of silver and gold, but also of copper and even of iron itself. (*Diod.*, 1, 33.)

4. Influence of Meroë on Egyptian civilization.

Everything seems to favour the supposition that Meroë gave religion and the arts of civilized life to the valley of the Nile. The following are some of the principal arguments in support of this opinion: 1. The concurrent testimony of the ancient writers.—2. The progress of civilization in Egypt from south to north; for the Delta, the part of Egypt contiguous to Arabia, appears to have been originally uninhabitable, except a small space about the extremities of the marsh; and history asserts that the inhabitants of upper Egypt descended and drained the country.—3. The improbability that an Arabian colony would have crossed Syria from Babylon to Suez, and wandered so far south as Thebes to found its first settlement.—4. The radical difference between the Coptic and Arabic languages, which existed even in the days of Abraham. (*Murray, Appendix to Bruce*, book 2, p. 479.)—5. The trade from the straits of Babelmandel by Azab, Axum, Meroë, and Upper Egypt. If this trade be as old as from the remarks previously made it would seem to be, we may consider Ethiopia as one of the first seats of international trade, or, in other words, of civilization; for an exchange of wares would lead to an exchange of ideas, and this recipro-

cal communication would necessarily give rise to moral and intellectual improvement.—6. The curious fact, that the images of some of the Egyptian gods were at certain times conveyed up the Nile, from their temples to others in Ethiopia; and, after the conclusion of a festival, were brought back again into Egypt. (*Eustath., ad Il., 1, 424.*)—7. The very remarkable character of some of the Egyptian paintings, in which black (or, more correctly, dark-coloured) men are represented in the costume of priests, as conferring on certain red figures, similarly habited, the instruments and symbols of the sacerdotal office. "This singular representation," says Mr. Hamilton, "which is often repeated in all the Egyptian temples, but only here at Philæ and at Elephantine with this distinction of colour, may very naturally be supposed to commemorate the transmission of religious fables and the social institutions from the tawny Ethiopians to the comparatively fair Egyptians."—8. Other paintings of nearly the same purport. In the temple of Philæ, the sculptures frequently depict two persons, who equally represent the characters and symbols of Osiris, and two persons equally answering to those of Isis; but in both cases one is invariably much older than the other, and appears to be the superior divinity. Mr. Hamilton conjectures that such figures represent the communication of religious rites from Ethiopia to Egypt, and the inferiority of the Egyptian Osiris. In these delineations there is a very marked and positive distinction between the dark figures and those of fairer complexion; the former are most frequently conferring the symbols of divinity and sovereignty on the other.—9. The very interesting fact recorded by Diodorus, namely, that the knowledge of picture-writing in Ethiopia was not a privilege confined solely to the caste of priests as in Egypt, but that every one might attain it as freely as they might in Egypt the writing in common use. A proof at once of the earlier use of picture-writing, or hieroglyphics, in Meroë than in Egypt, and also of its being applied to the purposes of trade.—10. The more ancient form of the pyramid, approaching that of the primeval mound, occurs more to the south than the rectilinear form. Thus the pyramids of *Saccâra* are older in form than those of *Dyza*, another proof of architecture's having come in from the countries to the south. (*Clarke's Travels*, vol. 5, p. 220, *Lond. ed.*)—From this body of evidence, then, we come to the conclusion, that the same race which ruled in Ethiopia and Meroë spread themselves by colonies, in the first instance, to Upper Egypt; that these latter colonies, in consequence of their great prosperity, became in their turn the parents of others; and as in all this they followed the course of the river, there gradually became founded a succession of colonies in the valley of the Nile, which, according to the usual custom of the ancient world, were probably, at first, independent of each other, and therefore formed just so many little states. Though, with the promulgation of their religion, either that of Ammon himself, or of his kindred deities and temple-companions, after whom even the settlements were named, the extension of trade was the principal motive which tempted colonists from Meroë to the countries beyond the desert; yet there were many other causes, such as the fertility of the land, and the facility of making the rude native tribes subservient to themselves, which, in a period of tranquillity, must have promoted the prosperity and accelerated the gradual progress of this colonization. The advantages which a large stream offers, by facilitating the means of communication, are so great, that it is a common occurrence in the history of the world to see civilization spreading on their banks. The shores of the Euphrates and Tigris, of the Indus and Ganges, of the Kiangh and Hoangho, afford us as plain proofs of this as the banks of the Nile. (*Heeren, Ideen*, vol. 5, p. 109, *segg.*; *Oxford transl.*, vol. 2, p. 110.)

—As to the origin of the civilization of Meroë itself, all is complete uncertainty; though it is generally supposed to have been derived from the plains of India. The reader may consult on this subject the work of *Von Bohlen, Das alte Indien, mit besonderer Rücksicht auf Egypten*, vol. 1, p. 119, *segg.*

MEROPS, I. one of the Pleiades. She married Sisyphus, son of Æolus, before her transformation into a star; and it was fabled that, in the constellation of the Pleiades, Merope appears less luminous than her sister-stars, through shame at having been the only one of the number that had wedded a mortal. Other mythologists relate the same of Electra. Schwenek sees in the union of Merope with Sisyphus a symbolical allusion to Corinthian navigation. (*Schwenek, Skizzen*, p. 19.—Compare *Welcher, Æsch., Tril.*, p. 555.—*Id. ib.*, p. 573.)—II. A daughter of Cypselus, who married Cresphontes, king of Messenia, by whom she had three children. Her husband and two of her children were murdered by Polyphontes. The murderer wished her to marry him, and she would have been obliged to comply had not Epytus or Telephontes, her third son, avenged his father's death by assassinating Polyphontes. (*Apollod.*, 2, 6.—*Pausan.*, 4, 3.)

MEROPS, a king of the island of Cos, who married Clymene, one of the Oceanides. He was changed into an eagle, and placed among the constellations. (*Ovid, Met.*, 1, 783.)

MEROS, a mountain of India sacred to Jupiter. It is said to have been in the neighbourhood of Nysa, and to have been named from the circumstance of Bacchus's being enclosed in the thigh (*μυρὸς*) of Jupiter. This attempt at etymology, however, is characteristic of the Grecian spirit, which found traces of their nation and language in every quarter of the world. The mountain in question is the famous *Meru* of Indian mythology. (*Cruzer's Symbolik*, vol. 1, p. 587.)

MESSEMBRIA, a maritime town of Thrace, east of the mouth of the Nessus, now *Mesevria* or *Mesera*. According to Herodotus (7, 108), it was a settlement of the Samothracians.—Von Humboldt notices the terminations of *magus*, *briga*, and *bria*, appended to the names of towns, as undoubtedly Celtic. He refers to the same source the termination *bria*, which is met with in the geography of Thrace, as, for example, in the cities of Selymbria and Mesembria. He thinks that the Basque *iri* and *uri* are also connected with this; and that we can go no farther than to say that there was an old root *br* or *bro*, expressing land, habitation, settlement, with which the Teutonic *burg* and the Greek *πόρις* may have been originally connected. In the Welsh and Breton languages, *bro* is still, he says, not only a cultivated field, but generally a country or district; and the scholiast on Juvenal (*Sat.*, 8, 234) explains the name of Allobroges as signifying strangers, men from another land, "*quoniam broga Galli agrum dicunt; alla autem aliud.*" (*Vid.*, however, Allobroges.—*Arnold's Rome*, p. xxii.)

MESENE, I. an island in the Tigris, where Apamea was built. It is now *Digel*. (*Strab., in Hud., G. M.*, 2, p. 146.—*Plin.*, 6, 31.—*Steph. Byz.*, p. 91, n. 8.)—II. Another, enclosed between the canal of *Basra* and the *Pasitigrie*, and which is called in the Oriental writers *Perat-Miscan*, or "the Mesene of the Euphrates," to distinguish it from the Mesene of the Tigris. The term *Mesene* is a Greek one, and refers to land enclosed between two streams. (*Philostorgius*, 3, 7.—*Cellarius, Geogr. Antiq.*, vol. 1, p. 641, *ed. Schwartz.*)

MESOMEDES, a poet, a native of Crete. He was a freedman of the Emperor Hadrian's, and one of his favourites, and wrote a eulogium on Antinous. Hadrian's successor, the philosophic Antoninus, made it a duty to restore order and economy into the finances of the empire; and, among other things, he stopped the salaries which had been allowed to the useless

courtiers with whom the palace of Hadrian had swarmed. It was on this occasion that the stipend allowed to Measomedes suffered a reduction. (*Jul. Cap., Vit. Ant. Pii*, c. 7.)—We have two epigrams of this poet's in the Anthology, and also a piece of a higher character, a *Hymn to Nemesis*. Judging from this last specimen, Measomedes must have possessed talents of no mean order. The Hymn to Nemesis was published for the first time, with ancient musical notes, by Fell, at the end of his edition of Aratus, *Oxon.*, 1762, 8vo. It was subsequently given by Burette in the 5th vol. of the *Mém. de l'Acad. des Inscri.*, &c., by Brunck in his *Analecta*, and by Snedorf in his work, "*De Hymnis veterum Græcorum*," *Hafn.*, 1786, 8vo. (*Schöll, Hist. Lit. Gr.*, vol. 4, p. 51.)

MESOPOTAMIA, an extensive province of Asia, the Greek name of which denotes *between the rivers* (from μέσος and ποταμός.) It was situate between the Euphrates and the Tigris. The name itself, however, does not appear to have been given to this tract prior to the Macedonian conquest. The southern part of Mesopotamia Xenophon calls Arabia (*Anab.*, 1, 5, 1); and other writers included this country, especially the northern part, under the general name of Syria. (*Strabo*, 737.) The Romans always regarded Mesopotamia as a mere division of Syria. (*Mela*, 1, 11.—*Plin.*, 5, 13.) It is called by the Arabs at the present day *Al Jezira*, or "the island." In scripture it is styled *Aram* and *Aramæa*; but as *Aram* also signifies Syria, it is denominated, for distinction's sake, *Aram Naharain*, or the "Syria of the rivers." It was first peopled by Aram, the father of the Syrians, though little is known of its history till it became a province of the Persian empire. *Cushan-rishathakam*, who is mentioned in *Judges* (3, 8, 10) as king of Mesopotamia, appears to have been only a petty prince of a district east of the Euphrates. In the time of Hezekiah, the different states of Mesopotamia were subject to the Assyrians (2 *Kings*, 19, 13), and subsequently belonged in succession to the Chaldean, Persian, and Syro-Macedonian monarchies.—Mesopotamia, which inclines from the southeast to the northwest, commenced at lat. 33° 30' N., and terminated near N. lat. 37° 30'. Towards the south it extended as far as the bend formed by the Euphrates at Cunaxa, and to the wall of Semiramis, which separated it from Mesene. Towards the north it was bounded by a part of Mount Taurus. The northern part of Mesopotamia, which extended as far as the Chaboras, a tributary of the Euphrates, is mountainous, and for the most part fruitful. The southern portion consists chiefly of reddish hills, and deserts without any trees, except liquorice-wood; and, like the desert of Arabia, suffers, at a distance from the rivers, a dearth of food and water. Here, on the parched steppes or table-lands, where the simoom often breathes destruction, hordes of Arabs have from the earliest times wandered. When history, therefore, speaks of the Romans and Persians as possessing Mesopotamia, we must understand the northern part, which abounded in all the necessities of life. The inhabitants of this portion, who still speak an Armeno-Syriac dialect, were called among themselves Mygdonians, and their district was known by the name of Mygdonia. (*Polyb.*, 5, 51.—*Steph. Byz.*, s. v.) Subsequently, under the Syro-Macedonian monarchy, it took the name of Antemusia. (*Amm. Marcell.*, 14, 9.—*Eutrop.*, 8, 2.—*Sextus Rufus*, c. 20.) In the time of the Parthian sway, about 120 B.C., an Arab sheik, Orooes, took possession of the northwestern part of the land, wresting a principality in this quarter from the Seleucids of Syria. This district then assumed the name of Osrøene. (*Steph. Byz.*, s. v.—*Procop.*, *Pers.*, 1, 17.—*Amm. Marcell.*, 14, 3.) Mesopotamia was frequently the scene of warlike operations, especially between the Parthians and Romans, who here lost Crassus, and between the latter nation and the new Per-

sians. After remaining for some time a Roman province, it fell under the power of the new Persian kingdom, and then successively under the Saracens and Turks. The oppression of the Turkish government has so altered the appearance of this large tract of country, that these fruitful plains, which once were covered with cities, now scarcely exhibit more than a few miserable villages. The lower part of Mesopotamia is now called *Irak Arabi*, the upper *Diar-Bekr*. (*Laurent's Anc. Geogr.*, p. 268.—*Rennell, Geography of Western Asia*, vol. 1, p. 432.)

MESSALA, I. Marcus Valerius Messala Corvinus, a Roman nobleman of ancient family. In the Eusebian Chronicle he is said to have been born A.U.C. 694; but if that date be correct, he would have been 17 when he joined the republican standard at Philippi. He acted a prominent part in that battle, and, after it was lost, was offered the command of the dispersed forces of the commonwealth. It is not, therefore, likely that he was younger than 21 at this period, and his birth, consequently, ought not to be fixed later than the year 690. In his youth he studied for a short time at Athens, along with the son of Cicero. After his return to Rome, his name having appeared in the roll of the proscribed by the nomination of Antony, he fled from Italy, and sought refuge with the army of Brutus and Cassius. Previous, however, to the battle of Philippi, his name, along with that of Varro, was erased from the fatal list, on the plea that he had not been in Rome at the time of Cæsar's murder. Varro accepted the proffered pardon, and retired to his studies and his books, among which he afterward died in the ninetieth year of his age; but it was indignantly rejected by Messala, who steadily adhered to the cause of the commonwealth. The night before the battle of Philippi he supped in private with Cassius in his tent. That chief had wished to protract the war, and opposed himself to the general desire that prevailed in the army to hazard the fortunes of the republic on one decisive battle. At parting for the night, he grasped Messala by the hand, and, addressing him in Greek, called him to bear witness that he was reduced to the same painful necessity as the great Pompey, who had been reluctantly forced to stake on one throw the safety of his country. On the following day, so fatal to the liberties of Rome, Messala commanded one of the best legions in the army of Brutus. After the second defeat at Philippi he escaped to Thasus, an island in the Ægean Sea. He was there invited to place himself at the head of the remains of the republican party. But he probably considered the cause of the commonwealth as now utterly hopeless, and accordingly listened to the persuasions of Pollio, who undertook to reconcile him to the conquerors, and to preserve the lives of those who should surrender under his command. Antony passed over to Thasus, and, with great appearance of cordiality, received Messala, as well as some of his friends, into favour, and, in return, was put in possession of the stores which had been amassed in that island for the wreck of the republican forces. Having now joined the arms of Antony, Messala accompanied him in the dissolute progress which he made through the Roman dominions in Asia, when he received the homage of the tributary kings and settled their disputes. Messala, from his earliest youth, had been distinguished for his powers in speaking, and he sometimes pleaded before Antony in favour of an accused tetrarch or of an injured people. At length, however, the scandalous and infatuated conduct of Antony, and the comparative moderation of Augustus, induced him to transfer his services to the latter, whom he continued to support during the remainder of his life. In the naval war with Sextus Pompey, he was second in command under Agrippa, and, on one occasion during his absence, had the supreme direction of the

fleet. In the course of this contest he was also for some time stationed with an army on the Neapolitan shore; and Augustus, having been not only defeated, but shipwrecked in one of the many naval engagements which he fought with Pompey, sought shelter in the most wretched condition in the camp of Messala, by whom he was received as a friend and master, and treated with the tenderest care. The death of Sextus Pompey at length opened both sea and land to his successful adversary, and it was quickly followed by the long-expected struggle for superiority between Antony and Augustus.—Messala was consul in A.U.C. 721, the year of the battle of Actium, in which he bore a distinguished part. After that decisive victory and the firm establishment of the throne of Augustus, he lived the general favourite of all parties, and the chief ornament of a court where he still asserted his freedom and dignity. While at Rome he resided in a house on the Palatine Hill, which had formerly belonged to Marc Antony; but he was frequently absent from the capital on the service of the state. War after war was intrusted to his conduct, and province after province was committed to his administration. In some of his foreign expeditions he was accompanied by the poet Tibullus, who has celebrated the military exploits of Messala in his famed panegyric, and his own friendship and attachment to his patron in his elegies. The triumph which Messala obtained in 727, for his victories in a Gallic campaign, completed the measure of his military honours; and he filled in succession all the most important civil offices in the state. Besides holding the consulship in 721, he was elected into the college of Augurs, and was intrusted with the superintendence of the aqueducts, one of those great public works for which Rome has been so justly celebrated. In 736, on account of the absence of Augustus and Mæcenas from the capital, he was nominated prefect of the city; but he resigned that situation a few days after his appointment, regarding it as inconsistent with the ancient constitution of his country. He is also believed to have been the person who, by command of the Conscripser, first saluted Augustus in the senate-house as the "Father of his country;" a distinction which was bestowed in a manner that drew tears from the master of the Roman world (*Suet.*, Aug., 58), and a reply, in which he declared that, having attained the summit of his wishes, he had nothing more to desire from the immortal gods but a continuance of the same attachment till the last moments of his life.—From this period the name of Messala is scarcely once mentioned by any contemporary writer. He survived, however, ten or twelve years longer. Tiberius Cæsar, who was then a youth, fond of the liberal arts, and by no means ignorant of literature, paid Messala, when in his old age, much deference and attention, and attempted to imitate his style of oratory. (*Suet.*, Tib., c. 70.) Towards the close of his life he was dreadfully afflicted with ulcers in the *sacra spina*; and it is said that, two years before his death, he was deprived of both sense and memory. He at length forgot his own name (*Plin.*, 7, 24), and became incapable of putting two words together with meaning. It is mentioned in the Eusebian Chronicle that he perished by abstaining from food when he had reached the age of seventy-two; but if he were born in 690, as is supposed, this computation would extend his existence till the close of the reign of Augustus, which is inconsistent with a passage of the dialogue "*De causis corruptæ eloquentiæ*," where it is said, "*Corvinus in medium usque Augusti principatum, Arminius pæne ad extremum duravit.*" Now the middle of the reign of Augustus cannot be fixed later than the year 746, when Messala could only have attained the age of fifty-six.—His death was deeply lamented, and his funeral elegy was written by Ovid. (*Ep.*, ex. Pont.,

1, 7.)—Though Messala had attained the highest point of exaltation, in an age of the most violent political factions and the most flagrant moral corruption, he left behind him a spotless character; being chiefly known as a disinterested patron of learning, and a steady supporter, so far as was then possible, of the principles of the ancient constitution. "Messala," says Berwick, "had the singular merit of supporting an unblemished character in a most despotic court, without making a sacrifice of those principles for which he had fought in the fields of Philippi; and the genuine integrity of his character was so deeply impressed on all parties, that it attracted a general admiration in a most corrupt age. He was brave, eloquent, and virtuous; he was liberal, attached to letters, and his patronage was considered as the surest passport to the gates of fame, and extended to every man who was at all conversant with letters. This character is supported by history, is not contradicted by contemporary writers, and is sealed by the impartial judgment of posterity. No writer, either ancient or modern, has ever named Messala without some tribute of praise. Cicero soon perceived that he possessed an assemblage of excellent qualities, which he would have more admired had he lived to see them expanded and matured to perfection. Messala was his disciple, and rivalled his master in eloquence. In the opinion of the judicious Quintilian, his style was neat and elegant, and in all his speeches he displayed a superior nobility. In the Dialogue of Orators, he is said to have excelled Cicero in the sweetness and correctness of his style. His taste for poetry and polite literature will admit of little doubt, when we call to mind that he was protected by Cæsar, favoured by Mæcenas, esteemed by Horace, and loved by Tibullus. Horace, in one of his beautiful odes, praises Messala in the happiest strains of poetry, calls the day he intended to pass with him propitious, and promises to treat him with some of his most excellent wine. 'For,' says the poet, 'though Messala is conversant with all the philosophy of Socrates and the Academy, he will not decline such entertainment as my humble board can supply.' (*Od.*, 3, 21.) The modest Tibullus flattered himself with the pleasing hope of Messala's paying him a visit in the country, 'where,' says he, 'my beloved Delia shall assist in doing the honours for so noble a guest' (1, 5). The rising genius of Ovid was admired and encouraged by Messala; and this condescension the exiled bard has acknowledged in an epistle to his son Messalinus, dated from the cold shores of the Euxine. In this letter Ovid calls Messala his friend, the light and director of all his literary pursuits. It is natural to suppose that an intimacy subsisted between Messala and Virgil, and yet no historical circumstance has come to our knowledge sufficient to evince it. The poem called *Ciris*, which is dedicated to Messala, and has been ascribed to Virgil by some grave authorities, grows more suspicious every day. Tacitus, whose judgment of mankind is indisputable, and whose decision is not always in the most favourable point of view, seems fond of praising Messala; and in a speech given to Silius, the consul-elect, he considers him among the few great characters who have risen to the highest honours by their integrity and eloquence. (*Ann.*, 11, 6.) Even Tiberius himself, when a youth, took him for his master and pattern in speaking; and happy would it have been for the Roman people had he also taken him for his guide and pattern in virtue." (*Berwick's Lives*, p. 59, seqq.)—Messala was united to Terentia, who had been first married to Cicero, and subsequently to Sallust, the historian. After the death of Messala, she entered, in extreme old age, into a fourth marriage, with a Roman senator, who used to say that he possessed the two greatest curiosities in Rome, the widow of Cicero, and the chair

in which Julius Cæsar had been assassinated. Messala left by Terentia two sons, Marcus and Lucius. The elder of these, who was consul in 751, took the name of Messalinus; he greatly distinguished himself under Tiberius, when that prince commanded, before his accession to the empire, in the war of Pannonia. (*Vell. Paterc.*, 2, 112.) Messalinus inherited his father's eloquence, and also followed the example he had set in devoted attachment to Augustus, and the patronage he extended to literature. But, during the reign of Tiberius, he was chiefly noted as one of the most servile flatterers of that tyrant. (*Tacit., Ann.*, 3, 18.) The younger son of Messala assumed the name of Cotta, from his maternal family, and acted a conspicuous, though by no means reputable part in the first years of Tiberius. Both brothers were friends and protectors of Ovid, who addressed to Messalinus two of his epistles from Pontus, which are full of respect for the memory of his illustrious father. (*Dunlop's Roman Lit.*, vol. 3, p. 53, *seqq.*, *Lond. ed.*)

MESSALINA, I. Valeria, the first wife of the Emperor Claudius, dishonoured his throne by her unbridled and disgusting incontinence. Her cruelty equalled her licentiousness. After a long career of guilt, she openly married a young patrician named Silius, during the absence of the emperor, who had gone on a visit to Oetia. Narcissus, the freedman of Claudius, was the only one who dared to inform Claudius of the fact, and, when he had roused the sluggish resentment of his imperial master, he brought him to Rome. The arrival of Claudius dispersed in an instant all who had thronged around Messalina; but still, though thus deserted, she resolved to brave the storm, and sent to the emperor demanding to be heard. Narcissus, however, fearing the effect of her presence on the feeble spirit of her husband, despatched an order, as if coming from him, for her immediate punishment. The order found her in the gardens of Lucullus. She endeavoured to destroy herself, but her courage failing, she was put to death by a tribune who had been sent for that purpose, A.D. 48. (*Tacit., Ann.*, 11 et 12. — *Suetonius, Vit. Claud.*)—II. Called also Stitalia, the grand-daughter of Statilius Taurus, who had been consul, and had enjoyed a triumph during the reign of Augustus. She was married four times before she came to the imperial throne. The last of her four husbands was Atticus Vestinus, a man of consular rank, who had ventured to aspire to her hand, although he was not ignorant that he had Nero for a rival. The tyrant, who had long favoured Vestinus as one of the companions of his debaucheries, now resolved to destroy him, and accordingly compelled him to open his veins. Messalina was transferred to the imperial bed. After the death of Nero she endeavoured to regain her former rank, as empress, by means of Otho, whom she had captivated by her beauty, and hoped to espouse. But Otho's fall having destroyed all these expectations, she turned her attention to literary subjects, and obtained applause by some public discourses which she delivered. (*Biogr. Univ.*, vol. 28, p. 431.)

MESSALINUS, M. Valerius, son of Valerius Messala Corvinus. (Consult remarks at the close of the article *Messala*.)

MESSANA, an ancient and celebrated city of Sicily, situate on the straits which separate Italy from that island. The first settlers in this quarter would seem to have been a body of wandering Siculi, who gave the place, from the *scythelike* form of its harbour, the name of Zancle (*Ζάγκλη*, "a scythe"). The Siculi were not a commercial race, and therefore could not avail themselves of the superior advantages for trade which the spot afforded; they, in consequence, finally left it. To them succeeded a band of pirates from Cumæ in Campania. (*Thucyd.*, 6, 4.) These settled in the place, and, to give the new colony more stability,

formed a union with the parent city of Chalcis in Eubœa, in consequence of which a considerable body of colonists, coming from Chalcis and the rest of Eubœa, participated in the distribution of the lands. (*Thucyd.*, l. c.) Chalcis had previously founded the city of Naxos on the eastern coast below; and it is probable that a part of the new population came from this latter place. On this supposition, at least, we can reconcile with the statement of Thucydides the account of Strabo, who informs us that Zancle was a settlement of the Naxians who dwelt near Catana (*Ναξίων κτίσις τῶν πρὸς Κατάνην*. — *Strabo*, 268). Zancle went on silently increasing in strength, and was soon powerful enough to found the city of Himera (*Thucyd.*, 6, 5), and to carry on a successful warfare against the neighbouring Siculi in the interior. As it was, however, the only Grecian city in this corner of the island, it sought to strengthen itself by new accessions from abroad; and, accordingly, the Ionians of Asia Minor were invited to send a colony to the "Beautiful Shore" (*Καλὴ Ἀκρὴ*), which lay along the coast of Sicily on the Tyrrhene Sea. (*Herod.*, 6, 22.) This happened about the period when Miletus was destroyed by the Persians, and when the other Greek cities of Lower Asia had either to submit to the yoke of Darius, or imitate the example which the Phœcians had set in the time of Cyrus. The Samians, therefore, and a body of Milesians who had escaped being led into captivity, embraced the offer of the people of Zancle. They landed at Locri, on the Italian coast; but Scythes, the king or tyrant of Zancle, would seem to have made no preparations whatever for receiving them, being engaged at the time in besieging one of the cities of the Siculi. Anaxilas, tyrant of Rhegium, who was on no friendly footing with his neighbours in Zancle, took advantage of this circumstance. He proceeded to Locri, told the newcomers to give up all thought of a settlement in that quarter, that Zancle was undefended and might easily be taken, and that he would aid them in the attempt. The enterprise succeeded, Zancle was taken, and the inhabitants became united as one common people with their new invaders. The Samians, however, were not long after driven out by the same Anaxilas who had aided in their attempt on Zancle. He established here, according to Thucydides (6, 5), "a mixed race," and called the city by a new name, "Messana" (*Μεσάνα*), as well from the country (Messenia) whence he was anciently descended, as from a body of Messenian exiles whom he settled here. Messana (or, as the Attic writers call it, *Μεσσηνή*), soon became a very flourishing city, both by reason of its very fruitful territory and its advantageous situation for commerce. It was also a place of some strength, and the citadel of Messana is often mentioned in history. (*Diod.*, 14, 87. — *Polyb.*, 1, 10.) Messana was regarded also by the Greeks as the key of Sicily (*Thucyd.*, 4, 1), as being the place, namely, to which vessels cruising from Greece to Sicily directed their course on leaving the Iapygian promontory. (*Bloomfield, ad Thucyd.*, l. c.) And yet, notwithstanding all these advantages, it was never other than an unlucky place, always undergoing changes, and unable at any time to play an important part in the affairs of Sicily; for its wealth, and its advantageous situation as regarded the passage from Italy into the island, always made it a tempting prize to the ambitious and powerful princes around. No Greek city, therefore, experienced more frequent changes of rulers than this, and none contained within its walls a more mixed population. — At a later period (*Ol.* 96, 1), Messana fell into the hands of the Carthaginians, who destroyed it (*Diod.*, 14, 56, *seqq.*), being aware of their inability at that time to retain a place so far distant from their other strongholds, and not wishing it to come again into the possession of their opponents. Dionysius of Syracuse, however, began to rebuild it in the same year, and,

besides establishing in it the remnant of the former inhabitants, added a considerable number of Locrians, Methymneans, and Messenian exiles. The latter, however, through fear of offending the Lacedæmonians, were afterward transferred to the district of Abacene, and there founded Tyndaris. Messana thus came to contain as mixed a population as before. (*Diod.*, 14, 78.) It remained under the sway of Dionysius and his son; and subsequently, after enjoying a short period of freedom, it passed into the hands of Agathocles. (*Diod.*, 19, 102.) The following year the inhabitants revolted from his sway, and put themselves under the protection of the Carthaginians. (*Diod.*, 19, 110.) Soon, however, a new misfortune befell the unlucky city. It was seized by the Mamertini (*vid.* Mamertini), its male inhabitants were either slaughtered or driven out, and their wives and children became the property of the conquerors. Messana now took the name of Mamertina, though in process of time the other appellation once more gained the ascendancy. (*Polyb.*, 1, 7.—*Diod.*, 21, 13.—*Plin.*, 3, 7.) This act of perfidy and cruelty passed unpunished. Syracuse was too much occupied with intestine commotions to attend to it, and the Carthaginians gladly made a league with the Mamertini, since by them Pyrrhus would be prevented from crossing over into Sicily and seizing on a post so important to his future operations. (*Diod.*, 22, 8.) The Mamertini, however, could not lay aside their old habits of robbery. They harassed all their neighbours, and even became troublesome to Syracuse, where King Hiero had at last succeeded in establishing order and tranquillity. This monarch defeated the lawless banditti, and would have taken their city, had not the Carthaginians interposed to defend it. A body of these, with the approbation of part of the inhabitants, took possession of the citadel; while another portion of the inhabitants called in the assistance of the Romans, and thus the first of the *Punic wars* had its origin. (*Vid.* *Punicum Bellum*, and compare *Polyb.*, 1, 9, *seqq.*—*Diod.*, 23, 15.—*Id.*, 23, 2, *seqq.*) Messana and the Mamertines remained from henceforth under the Roman power; but the city, as before, could never enjoy any long period of repose. It suffered in the early civil wars between Marius and Sylla, in the war of the slaves in Sicily, and more particularly, in the contest between Sextus Pompey and the triumvir Octavianus. Messana formed during this war the chief station of Pompey's fleet, and his principal place of supply, and the city was plundered at its close. (*Appian*, *B. Civ.*, 5, 123.) A Roman colony was afterward planted here. (*Mannert*, *Geogr.*, vol. 9, pt. 2, p. 267, *seqq.*)—The modern *Messina* corresponds to the ancient city. Even in later times, the fates seem to have conspired against this unfortunate place. A plague swept away a great part of the inhabitants; then rebellion spread its ravages; and finally, the dreadful earthquake in 1783 completed the downfall of a city which rivalled, if it did not surpass, Palermo. (*Hoare's Classical Tour*, vol. 2, p. 203.) Although the town has since been rebuilt according to a regular plan and although it has been declared a free port, Messina is not so important as it once was. It contained before the last catastrophe a hundred thousand inhabitants: the present population does not amount to seventy thousand. (*Mallet Brown*, *Geogr.*, vol. 7, p. 732, *Am. ed.*)

MESSAPIA, a country of Italy in Magna Græcia, commonly supposed to have been the same with Iapygia, but forming, in strictness, the interior of that part of Italy. The town of Messapia, mentioned by Pliny (3, 11), is thought to have communicated its name to the Messapian nation. The generality of Italian topographers identify the site of this ancient town with that of *Messagna*, between *Oria* and *Brindisi*. (*Prætili*, *Via Appia*, 4, 8.—*Romanelli*, vol. 2, p. 127.—*Cramer's Anc. Italy*, vol. 2, p. 312.)

Messēna, a daughter of Triopas, king of Argos, who married Polycaon, son of Lelex, king of Laconia. She encouraged her husband to levy troops, and to seize a part of the Peloponnesus, which, after it had been conquered, received her name. (*Pausan.*, 4, 1.)

Messēnz (or, in the Doric dialect of the country, *Messāna*, *Μεσάνα*), the chief city of Messenia, in the Peloponnesus: situate at the foot of Mount Ithome, and founded by Epaminondas. It is said to have been completed and fortified in eighty-five days, so great was the zeal and activity displayed by the Thebans and their allies in this undertaking. (*Diod. Sic.*, 15, 66.) Pausanias informs us, that the walls of this city were the strongest he had ever seen, being entirely of stone, and well supplied with towers and buttresses. The citadel was situated on Mount Ithome, celebrated in history for the long and obstinate defence which the Messenians there made against the Spartans in their last revolt. The history of this city is identified with that of Messenia, which latter article may hence be consulted.—The ruins of Messene are visible, as we learn from Sir W. Gell, at *Maurommatii*, a small village, with a beautiful source, under Ithome, in the centre of the ancient city. (*Itin.*, p. 59.—*Cramer's Anc. Greece*, vol. 3, p. 150.—*Gell's Itin. of the Morea*, p. 60.—*Dodwell*, vol. 2, p. 365.)

MESSENIA, a country of the Peloponnesus, between Laconia, Elis, Arcadia, and the Ionian Sea. The river Neda formed the boundary towards Elis and Arcadia. From the latter country it was farther divided by an irregular line of mountains, extending in a southeasterly direction to the chain of Taygetus on the Laconian border. This celebrated range marked the limits of the province to the east, as far as the source of the little river Pamisus, which completed the line of separation from the Spartan territory to the south. (*Strabo*, 361.—*Cramer's Anc. Greece*, vol. 3, p. 130.) Its area is calculated by Clinton at 1162 square miles. (*Fest. Hell.*, vol. 2, p. 385.) Messenia is described by Pausanias as the most fertile province of Peloponnesus (4, 15, 3), and Euripides, in a passage quoted by Strabo (366), speaks of it as a land well watered, very fertile, with beautiful pastures for cattle, and possessing a climate neither too cold in winter nor too hot in summer. The western part of the country is drained by the river Pamisus, which rises in the mountains between Arcadia and Messenia, and flows southward into the Messenian Gulf. The basin of the Pamisus is divided into two distinct parts, which are separated from each other on the east by some high land that stretches from the Taygetus to the Pamisus, and on the western side of the river by Mount Ithome. The upper part, usually called the plain of Stenyclerus, is of small extent and moderate fertility; but the lower part, south of Ithome, is an extensive plain, celebrated in ancient times for its great fertility, whence it was frequently called *Macaria*, or "the blessed." Leake describes it as covered at the present day with plantations of the vine, the fig, and the mulberry, and "as rich in cultivation as can well be imagined." (*Travels in the Morea*, vol. 1, p. 352.) The western part of Messana is diversified by hills and valleys, but contains no high mountains. (*Encycl. Us. Knowl.*, vol. 15, p. 126.)—We learn from Pausanias (4, 1, 2), that Messenia derived its appellation from Messene, wife of Polycaon, one of the earliest sovereigns of the country. He also observes, that whenever this name occurs in Homer, it denotes the province rather than the city of Messene, which he conceives did not exist till the time of Epaminondas. (Compare *Strabo*, 358.) At the period of the Trojan war, it appears from the poet that Messenia was partly under the dominion of Menelaus, and partly under that of Nestor. This is evident from the towns which he has assigned to these respective leaders, and is farther confirmed by the testimony of Strabo and Pausanias.

MESSENIA.

(*Strab.*, 350.—*Pausan.*, 4, 2.) In the division of the Peloponnese, made after the return of the Heraclidae, Messenia fell to the share of Cresphontes, son of Aristodemus, with whom commenced the Dorian line, which continued without interruption for many generations. In the middle of the eighth century before the Christian era, a series of disputes and skirmishes arose on the borders of Messenia and Laconia, which gave rise to a confirmed hatred between the two nations. Prompted by this feeling, the Spartans are said to have bound themselves by an oath never to return home till Messenia was subdued; and they commenced the contest by a midnight attack on Amphieia, a frontier town, which they took, and put the inhabitants to the sword. This was the commencement of what was called the *First Messenian War*, the date of which is usually given, though it cannot be believed with certainty, as B.C. 743. Euphaes, the Messenian king, had wisdom, however, and courage sufficient for the crisis. Aware of the Lacedæmonian superiority in the field, he protracted the war, avoiding battles and defending the towns. In the fourth year, however, a battle was fought with great slaughter and doubtful success. But the Messenians were suffering from garrison-confinement and the constant plundering of their lands. New measures were taken. The people were collected from the inland posts at Ithome, a place of great natural strength, and open to supplies by sea, the Lacedæmonians having no fleet. Meanwhile they asked advice of the Delphic oracle, which bade them sacrifice to the infernal deities a virgin of the blood of Ægyptus, son of the Heracleid Cresphontes. Impelled by patriotism or ambition, Aristodemus offered his own daughter; and, when it was intended to save her by falsely denying her virginity, in his rage he slew her with his own hand. The fame of the obedience paid to the oracle so far disheartened the enemy, that the war languished for five years; in the sixth an invasion took place, and a battle, bloody and indecisive like the former. Euphaes was killed, and left no issue, and Aristodemus was elected to succeed him. The new prince was brave and able, and the Lacedæmonians, weakened by the battle, confined themselves for four years to predatory incursions. At last they again invaded Messenia, and were defeated; but, in the midst of his success, Aristodemus was so possessed with remorse for his daughter's death, that he slew himself on her tomb, and deprived his country of the only leader able to defend her. Ithome was besieged. The famished inhabitants found means to pass the Lacedæmonian lines, and fled for shelter and subsistence, some to neighbouring states where they had claims of hospitality, others to their ruined homes and about their desolated country. Ithome was dismantled; and those who remained of the Messenians were allowed to occupy most of the lands, paying half the produce to Sparta.—The absence from home to which the Lacedæmonians had bound themselves, became, by the protraction of the war, an evil threatening the existence of the state, no children being born to supply the waste of war and natural decay. The remedy said to have been adopted was a strange one, highly characteristic of Lacedæmon, and such as no other people would have used. The young men who had come to maturity since the beginning of the war were free from the oath, and they were sent home to cohabit promiscuously with the marriageable virgins. But even at Sparta this expedient, in some degree, ran counter to the popular feelings. When the war was ended, and the children of this irregular intercourse were grown to manhood, though bred in all the discipline of *Lycurgus*, they found themselves generally slighted. Their spirit was high, their discontent dangerous; and it was thought prudent to offer them the means of settling out of Peloponnese. They

MESSENIA.

willingly emigrated, and, under Phalanthus, one of their own number, they founded the city of Tarentum in Italy. (*Vid.* *Parthenii*).—During forty years Messenia bore the yoke. But the oppression of the inhabitants was grievous, and imbittered with every circumstance of insult, and the Grecian spirit of independence was yet strong in them; they only wanted a leader, and a leader was found in Aristomenes, a youth of the royal line. Support being promised from Argos and Arcadia, allies of his country in a former war, Aristomenes attacked a body of Lacedæmonians, and, though not completely successful, did such feats of valour that the Messenians would have chosen him king; but he declined it, and was made general-in-chief. His next adventure was an attempt to practise on the superstitious fears of the enemy. Sparta having neither walls nor watch, he easily entered it alone by night, and hung against the Brazen House (a singularly venerated temple of Minerva) a shield, with an inscription declaring that Aristomenes, from the spoils of the Spartans, dedicated that shield to the goddess. Alarmed lest their protecting goddess should be won from them, the Lacedæmonians sent to consult the Delphian oracle, and were directed to take an Athenian adviser. The Athenians, though far from wishing the subjugation of Messenia, yet feared to offend the god if they refused compliance; but, in granting what was asked, they hoped to make it useless, and sent *Tyrtæus*, a poet, and supposed to be of no ability. The choice proved better than they intended, since the poetry of *Tyrtæus* being very popular, kept up the spirit of the people in all reverses.—The Messenian army had now been re-enforced from Argos, Elis, Arcadia, and Sicyon, and Messenian refugees came in daily: the Lacedæmonians had been joined by the Corinthians alone. They met at Caprusæ, where, by the desperate courage of the Messenians, and the conduct and extraordinary personal exertions of their leader, the Lacedæmonians were routed with such slaughter that they were on the point of suing for peace. *Tyrtæus* diverted them from this submission, and persuaded them to recruit their numbers by associating some Helots, a measure very gallant to Spartan pride. Meanwhile Aristomenes was ever harassing them with incursions. In one of these he carried off from Caryæ a number of Spartan virgins assembled to celebrate the festival of Diana. He had formed a body-guard of young and noble Messenians, who always fought by his side, and to their charge he gave the captives. Heated with wine, the young men attempted to violate their chastity, and Aristomenes, after vainly remonstrating, killed the most refractory with his own hand, and, on receiving their ransom, restored the girls uninjured to their parents. Another time, in an assault on Ægila, he is said to have been made prisoner by some Spartan women there assembled, who repelled the assault with a vigour equal to that of the men; but one of them who had previously loved him favoured his escape.—In the third year of the war, another battle took place at Megalæphrus, the Messenians being joined by the Arcadians alone. Through the treachery of Aristocrates, prince of Orchomenus, the Arcadian leader, the Messenians were surrounded and cut to pieces, and Aristomenes, escaping with a scanty remnant, was obliged to give up the defence of his country, and collect his forces at Ira, a stronghold near the sea. Here he supplied the garrison by plundering excursions, so ably conducted as to foil every precaution of the besiegers, inasmuch that they forbade all culture of the conquered territory, and even of part of Laconia. At last, falling in with a large body of Lacedæmonians under both their kings, after an obstinate defence he was struck down and taken, with about fifty of his band. The prisoners were thrown as rebels into a deep cavern, and all were killed by the fall except

Aristomenes, who was wonderfully preserved and enabled to escape, and, returning to Ira, soon gave proof to the enemy of his presence by fresh exploits equally daring and judicious. The siege was protracted till the eleventh year, when the Lacedæmonian commander, one stormy night, learning that a post in the fort had been quitted by its guard, silently occupied it with his troops. Aristomenes flew to the spot and commenced a vigorous defence, the women assisting by throwing tiles from the house-tops, and many, when driven thence by the storm, even taking arms and mixing in the fight. But the superior numbers of the Lacedæmonians enabled them constantly to bring up fresh troops, while the Messenians were fighting without rest or pause, with the tempest driving in their faces. Cold, wet, sleepless, jaded, and hungry, they kept up the struggle for three nights and two days; at length, when all was vain, they formed their column, placing in the middle their women and children and most portable effects, and resolved to make their way out of the place. Aristomenes demanded a passage, which was granted by the enemy, unwilling to risk the effects of their despair. Their march was towards Arcadia, where they were most kindly received, and allotments were offered them of land. Even yet Aristomenes hoped to strike a blow for the deliverance of his country. He selected 500 Messenians, who were joined by 300 Arcadian volunteers, and resolved to attempt the surprise of Sparta while the army was in the farthest part of Messenia, where Pylos and Methone still held out. But the enterprise was frustrated by Aristocrates, who sent word of it to Sparta. The messenger was seized on his return, and the letters found on him discovering both the present and former treachery of his master, the indignant people stoned the traitor to death, and erected a pillar to commemorate his infamy.—The Messenians, who fell under the power of Lacedæmon, were made Helots. The Pylians and Methonians, and others on the coast, now giving up all hope of farther resistance, proposed to their countrymen in Arcadia to join them in seeking some fit place for a colony, and requested Aristomenes to be their leader. He sent his son. For himself, he said, he would never cease to war with Lacedæmon, and he well knew that, while he lived, some ill would ever be happening to it. After the former war, the town of Rhegium in Italy had been partly peopled by expelled Messenians. The exiles were now invited by the Rhegians to assist them against Zancle, a hostile Grecian town on the opposite coast of Sicily, and in case of victory the town was offered them as a settlement. Zancle was besieged, and the Messenians having mastered the walls, the inhabitants were at their mercy. In the common course of Grecian warfare, they would all have been either slaughtered or sold for slaves, and such was the wish of the Rhegian prince. But Aristomenes had taught his followers a nobler lesson. They refused to inflict on other Greeks what they had suffered from the Lacedæmonians, and made a convention with the Zancleans, by which each nation was to live on equal terms in the city. The name of the town was changed to Messana. (*Vid. Messana*).—Aristomenes vainly sought the means of farther hostilities against Sparta, but his remaining days were passed in tranquillity with Damagetus, prince of Ialysus in Rhodes, who had married his daughter. His actions dwelt in the memories of his countrymen, and cheered them in their wanderings and sufferings: and from their legendary songs, together with those of the Lacedæmonians, and with the poems of Tyrtæus, the story of the two Messenian wars has been chiefly gathered by the learned and careful antiquary Pausanias, from whose work it is here taken. The character of Aristomenes, as thus represented, combines all the elements of goodness and greatness; in a degree almost

unparalleled among Grecian heroes. Inexhaustible in resources, unconquerable in spirit, and resolutely persevering through every extremity of hopeless disaster, an ardent patriot and a formidable warrior, he yet was formed to find his happiness in peace; and after passing his youth under oppression, and his manhood in war against a cruel enemy, wherein he is said to have slain more than 300 men with his own hand, he yet retained a singular gentleness of nature, inasmuch that he is related to have wept at the fate of the traitor Aristocrates. The original injustice and subsequent tyranny of the Lacedæmonians, with the crowning outrage in the condemnation as rebels of himself and his companions, might have driven a meaner spirit to acts of like barbarity: but, deep as was his hatred to Sparta, he conducted the struggle with uniform obedience to the laws of war, and sometimes, as in the case of the virgins taken at Caryæ, with more than usual generosity and strictness of morals.—The Messenians who remained in their country were treated with the greatest severity by the Spartans, and reduced to the condition of Helots or slaves. This cruel oppression induced them once more to take up arms, in the 79th Olympiad, and to fortify Mount Ithome, where they defended themselves for ten years: the Lacedæmonians being at this time so greatly reduced in numbers by an earthquake, which destroyed several of their towns, that they were compelled to have recourse to their allies for assistance. (*Thucyd.*, 1, 101.—*Pausan.*, 4, 24.) At length the Messenians, worn out by this protracted siege, agreed to surrender the place on condition that they should be allowed to retire from the Peloponnese. The Athenians were at this time on no friendly terms with the Spartans, and gladly received the refugees of Ithome, allowing them to settle at Naupactus, which they had taken from the Locri Ozols. (*Thucyd.*, 1, 103.—*Pausan.*, l. c.) Grateful for the protection thus afforded them, the Messenians displayed great zeal in the cause of Athens during the Peloponnesian war. Thucydides has recorded several instances in which they rendered important services to that power, not only at Naupactus, but in Ætolia and Amphiloehia, at Pylos, and in the island of Sphacteria, as well as in the Sicilian expedition. When, however, the disaster of Egospotamos placed Athens at the mercy of her rival, the Spartans obtained possession of Naupactus, and compelled the Messenians to quit a town which had so long afforded them refuge. Many of these, on this occasion, crossed over into Sicily, to join their countrymen who were established there, and others sailed to Africa, where they procured settlements among the Evesperits, a Libyan people. (*Pausan.*, 4, 26.) After the battle of Leuctra, however, which humbled the pride of Sparta, and paved the way for the ascendancy of Thebes, Epaminondas, who directed the counsels of the latter republic, with masterly policy determined to restore the Messenian nation, by collecting the remnants of this brave and warlike people. He accordingly despatched agents to Sicily, Italy, and Africa, whither the Messenians had emigrated, to recall them to their ancient homes, there to enjoy the blessings of peace and liberty, under the powerful protection of Thebes, Argos, and Arcadia. Gladly did they obey the summons of the Theban general, and hastened to return to that country, the recollection of which they had ever fondly cherished. Epaminondas, meanwhile, had made every preparation for the erection of a city under Ithome, which was to be the metropolis of Messenia; and such was the zeal and activity displayed by the Thebans and their allies in this great undertaking, that the city, which they named Messene, was completed in eighty-five days. (*Diod. Sic.*, 15, 66.) The entrance of the Messenians, which took place in the fourth year of the 102d Olympiad, was attended with great pomp, and the celebra-

tion of solemn sacrifices, and devout invocations to their gods and heroes. The lapse of 287 years from the capture of Ira, and the termination of the second war, had, as Pausanias affirmed, made no change in their religion, their national customs, or their language, which, according to that historian, they spoke even more correctly than the rest of the Peloponnesians. (*Pausan.*, 4, 27.) Other towns being soon after rebuilt, the Messenians were presently in a condition to make head against Sparta, even after the death of Epaminondas and the decline of Thebes. That great general strenuously exhorted them, as the surest means of preserving their country, to enter into the closest alliance with the Arcadians, which salutary counsel they carefully adhered to. (*Polyb.*, 4, 32, 10.) They likewise conciliated the favour of Philip of Macedon, whose power rendered him formidable to all the states of Greece, and his influence now procured for them the restoration of some towns which the Lacedæmonians still retained in their possession. (*Polyb.*, 9, 28, 7.—*Pausan.*, 4, 28.—*Strabo*, 361.) During the wars and revolutions which agitated Greece upon the death of Alexander, they still preserved their independence, and having, not long after that event, joined the Achæan confederacy, they were present at the battle of Sellasia and the capture of Sparta by Antigonus Doseon. (*Pausan.*, 4, 29.) In the reign of Philip, son of Demetrius, an unsuccessful attack was made on their city by Demetrius of Pharos, then in the Macedonian service. The inhabitants, though taken by surprise, defended themselves on this occasion with such intrepidity, that nearly the whole of the enemy's detachment was cut to pieces, and their general, Demetrius, slain. (*Strabo*, 361.—*Polyb.*, 3, 19, 2.—*Pausan.*, 4, 29.) Nabia, tyrant of Lacedæmon, made another attack on this city by night some years afterward, and had already penetrated within the walls, when succours arriving from Megalopolis under the command of Philopœmen, he was forced to evacuate the place. Subsequently to this event, dissensions appear to have arisen, which ultimately led to a rupture between the Achæans and Messenians. Pausanias was not able to ascertain the immediate provocation which induced the Achæans to declare war against the Messenians. But Polybius does not scruple to blame his countrymen, and more especially Philopœmen, for their conduct to a people with whom they were united by federal ties. (*Polyb.*, 33, 10, 5.) Hostilities commenced unfavourably for the Achæans, as their advanced guard fell into an ambuscade of the enemy, and was defeated with great loss, Philopœmen himself remaining in the hands of the victors. So exasperated were the Messenians at the conduct of this celebrated general, that he was thrown into a dungeon, and soon after put to death by poison. His destroyers, however, did not escape the vengeance of the Achæans; for Lycortas, who succeeded to the command, having defeated the Messenians, captured their city, and caused all those who had been concerned in the death of Philopœmen to be immediately executed. Peace was then restored, and Messenia once more joined the Achæan confederacy, and remained attached to that republic till the period of its dissolution. (*Liv.*, 39, 49.—*Polyb.*, 24, 9.—*Pausan.*, 4, 29.—*Cramer's Anc. Greece*, vol. 3, p. 123, *seqq.*)

METÆUS, a tyrant of Privernum. He was father of Camilla, whom he had consecrated to the service of Diana, when he had been banished from his kingdom by his subjects. (*Virg.*, *Æn.*, 11, 540.)

METAPONTUM, a city of Lucania in Italy, on the coast of the Sinus Tarentinus, and a short distance to the south of the river Bradanus. It was one of the most distinguished of the Greek colonies. The original name of the place appears to have been Metabum, which it is said was derived from Metabus, a hero to whom divine honours were paid. Some reports ascribed its foundation to a party of Pylians on their re-

turn from Troy; and, as a proof of this fact, it was remarked that the Metapontini, in more ancient times, made an annual sacrifice to the Neleids. The prosperity of this ancient colony, the result of its attention to agriculture, was evinced by the offering of a harvest of gold to the oracle of Delphi. The Greek words are *θῆρος χρυσόν*, which commentators suppose to mean some golden sheaves. (*Strabo*, 284.) It may be remarked, also, that the scholiasts on Homer identify Metapontum with the city which that poet calls Alyba in the *Odyssey* (24, 303). Other traditions are recorded, relative to the foundation of Metapontum, by *Strabo*, which confirm, at least, its great antiquity. But his account of the destruction of the first town by the Samnites is obscure, and not to be clearly understood. It appears, however, that Metabum, if such was its name, was in a deserted state, when a number of Achæans, invited for that purpose by the Sybarites, landed on the coast and took possession of the place, which thenceforth was called Metapontum. (*Strabo*, 285.—Compare *Steph. Byz.*, s. v. Μεταπόντιον.—*Eustath.* ad *Dionys. Perieg.*, v. 368.) The Achæans, soon after their arrival, seemed to have been engaged in a war with the Tarentini, and this led to a treaty, by which the Bradanus was recognised as forming the separation of the two territories.—Pythagoras was held in particular estimation by the Metapontini, in whose city he is reported to have lived for many years. After his death, the house which he had inhabited was converted into a temple of Ceres. (*Jambli.*, *Vit. Pythag.*, 1, 30.—*Cic.*, *de Fin.*, 5, 2.—*Liv.*, 1, 18.) We find this town incidentally mentioned by Herodotus (4, 15) with reference to Aristæus of Proconnesus, who was said to have been seen here 340 years after disappearing from Ozyzius. Its inhabitants, after consulting the oracle upon this supernatural event, erected a statue to the poet in the Forum, and surrounded it with laurel. This city still retained its independence when Alexander of Epirus passed over into Italy. *Livy*, who notices that fact, states that the remains of this unfortunate prince were conveyed hither previous to their being carried over into Greece (8, 24). It fell, however, ultimately into the hands of the Romans, together with the other colonies of Magna Græcia, on the retreat of Pyrrhus, and with them revolted in favour of Hannibal, after his victory at Cannæ. (*Liv.*, 22, 15.) It does not appear on what occasion the Romans recovered possession of Metapontum, but it must have been shortly after, as they sent a force thence to the succour of the citadel of Taruntum, which was the means of preserving that fortress. (*Livy*, 25, 11.—*Polybius*, 8, 36.) It would seem, however, to have been again in the hands of the Carthaginians. (*Polyb.*, 8, 36.) In the time of Pausanias, this city was a heap of ruins (6, 19). Considerable vestiges, situated near the station called *Torre di Mare*, on the coast, indicate its ancient position. (*Swinburne's Travels*, p. 273.—*Romanelli*, vol. 1, p. 275.—*Cramer's Anc. Italy*, vol. 2, p. 347, *seqq.*)

METAURUM, a town in the territory of the Bruttii, in Italy, not far from Medura, and below Vibo Valentia. Its site is generally supposed to accord with that of the modern *Gioja*. According to Stephanus, this ancient place was a colony of the Locri; and the same writer farther states, that, according to some accounts, it gave birth to the poet Stesichorus, though that honour was also claimed by Himera in Sicily. Solinus, on the other hand (c. 8), asserts, that Metaurum was founded by the Zancleians. (Compare *Mela*, 2, 4.—*Cramer's Anc. Italy*, vol. 2, p. 423.)

METAURUS, I. a river in the territory of the Bruttii, running into the Tyrrhene or Lower sea. The town of Metaurum is supposed to have stood at or near its mouth. It is now called the *Merro*, and sometimes the *Petrace*. (*Cluver.*, *It. Ant.*, vol. 3, p. 1293.) It appears to have been noted for the excellence of the

churny fish caught at its mouth. (*Athen.*, 7, 62.) Strabo speaks of a port of the same name, which may have been the town of Metaurum. (*Strab.*, 256.—*Cramer's Anc. Italy*, vol. 2, p. 423.)—II. A river of Umbria, in Italy, flowing into the Adriatic. It was rendered memorable by the defeat of Hasdrubal, the brother of Hannibal. The Roman forces were commanded by the consuls Livius Salinator and Claudius Nero, A.U.C. 545. It is now the *Metre*. The battle must have taken place near the modern *Fossombrone*, and on the left bank of the Metaurus. Though Livy has given no precise description of the spot, it may be collected that it was in that part of the course of the river where it begins to be enclosed between high and steep rocks (37, 47). Tradition has preserved a record of the event in the name of a hill between *Fossombrone* and the pass of *Furba*, called *Monte d'Asdrubale*. (*Cramer's Anc. Italy*, vol. 1, p. 361.)

METELLI, a distinguished family of the Cæcilian gens in Rome. Those most worthy of notice are: I. Q. Cæcilius Metellus Macedonicus, was sent, when prætor (B.C. 148), into Macedonia, against Andriacus, who pretended to be a son of Perseus, the last king of Macedonia, and who had excited a revolt against the Romans. In this war Andriacus was defeated and taken prisoner by Metellus, who obtained, in consequence, a triumph, and the surname of Macedonicus. (*Livy, Epit.*, 50.—*Pausanias*, 7, 13, 1.—*Eutrop.*, 4, 13.) In his consulship, B.C. 143, Metellus was sent into Spain to oppose Viriathus, who had obtained possession of the whole of Lusitania, and had defeated successively the prætors Vetilius and Plautius. Metellus remained in Spain two years, and obtained several victories; but was superseded in the command, before the conclusion of the war, by Pompey. (*Livy, Epit.*, 52, 53.—*Val. Max.*, 3, 2, 21.—*Id.*, 7, 4, 5.—*Id.*, 9, 3, 7.—*Appian, Iber.*, 76.) During the censorship of Metellus and Pompey, B.C. 131, it was decreed that all citizens should be obliged to marry. The oration which Metellus delivered on this subject was extant in the time of Livy, and is referred to by Suetonius. (*Livy, Epit.*, 59.—*Suet., Vit. Aug.*, 89.) We are told by Livy and Pliny, that, when Metellus was returning one day from the Campus Martius, he was seized by command of C. Attinius Labeo, a tribune of the commons, whom he had in his censorship expelled from the senate, and was dragged to the Tarpeian rock; and that it was with the greatest difficulty that his friends were enabled to preserve his life by obtaining another tribune to put his veto upon the order of Attinius. (*Livy, Epit.*, 59.—*Plin.*, 7, 45.) Pliny refers to Metellus as an extraordinary example of human happiness: "For, besides the possession of the highest dignities," says the Roman writer, "and having obtained a surname from the conquest of Macedonia, he was carried to the funeral pile by four sons, of whom one had been prætor, three had been consuls, two had enjoyed a triumph, and one had been censor." (*Plin.*, 7, 45.)—II. Q. Cæcilius Metellus Numidicus, derived his surname from his victories in Numidia, whither he was sent in his consulship, B.C. 109, in order to oppose Jugurtha. He remained in Numidia, B.C. 108, as præconsul; but, in the beginning of the following year, he was superseded in the command by Marius, who had previously been his *legatus* or lieutenant-general. On his return to Rome Metellus obtained the honours of a triumph. (*Sallust, Bell. Jug.*—*Valerius Patere.*, 2, 11.—*Eutropius*, 4, 27.—*Livy, Epit.*, 65.) Metellus was censor B.C. 103. He took an active part in the civil commotions of his time, and was one of the most powerful supporters of the aristocratical party. In B.C. 100 he was obliged to go into exile, in consequence of opposing the measures of the tribune Saturninus; but, on the execution of the latter, Metellus was recalled from exile in the following year. (*Vid. Marius*.)—III. Q. Cæcilius Metellus Pius, son of

the preceding, belonged to the same political party as his father, and supported Sylla in his contest with Marius. Metellus received especial marks of favour from Sylla, and was consul with him B.C. 80. He was sent, in B.C. 78, against Sertorius in Spain, where he appears to have remained till the conclusion of the war, in B.C. 72. From the year 76 B.C., Pompey was his colleague in command, and they triumphed together at the end of the war. (*Vell. Patere.*, 2, 30.—*Eutrop.*, 6, 5.—*Plut., Vit. Pomp.*) Metellus was Pontifex Maximus; and on his death, B.C. 68, in the consulship of Cicero, he was succeeded in that dignity by Julius Cæsar. (*Encycl. Us. Knowl.*, vol. 15, p. 137.)

METHONIUS, I. surnamed Eubulius, a father of the church, and a martyr, flourished at the beginning of the fourth century. He was at first bishop of Olympus or Patara in Lycia, but was afterward translated to the see of Tyre. This latter station, however, he occupied only a short time. His zeal for the purity of the Christian faith exposed him to the resentment of the Arians; he was exiled to Chalcidice in Syria, and there received the crown of martyrdom, A.D. 312. He was the author of a long poem against Porphyry; a treatise on the Resurrection, against Origen; another on the Pythoness; another on Free Will; a dialogue entitled "The Banquet of the Virgins," &c. Several fragments of this author have been collected. The "Banquet of the Virgins" has reached us entire. It was first published at Rome, 1656, 8vo, with a Latin version and a Dissertation by Leo Allatius. It is a dialogue on the excellence of chastity, modelled after the Banquet of Plato. The best edition is that of Fabricius, appended to the second volume of the works of St. Hippolytus, *Hamh.*, 1718.—II. A patriarch of Constantinople, born at Syracuse about the commencement of the ninth century. After various difficulties, into which he was plunged by his attachment to the worship of images, and the opposition of the Iconoclasts, he obtained the see of Constantinople, A.D. 843. His first act after his accession to the episcopal office was to assemble a council and re-establish the worship of images. He died A.D. 846. He was the author of several works, which are given by Combefis in his *Bibliotheca Patrum*.—III. A monk and painter, born at Thessalonica, and who flourished about the middle of the 9th century. He is celebrated for having converted to Christianity Bogoris, king of the Bulgarians, by means of a picture representing the scenes of the last judgment. (*Biogr. Univ.*, vol. 28, p. 465.)

METHONE, I. a city of Macedonia, about forty stadia north of Pydna, according to the epitomist of Strabo (830). It was celebrated in history from the circumstance of Philip's having lost an eye in besieging the place. (*Strab.*, l. c.—*Demosth., Olynth.*, 1, 9.) That it was a Greek colony we learn from Scylax (*Periplus*, p. 26), and also Plutarch, who reports that a party of Eretrians settled there, naming the place Methone, from Methon, an ancestor of Orpheus. He adds, that these Greek colonists were termed Apopsephodoni by the natives. (*Quest. Græc.*) It appears from Athenæus that Aristotle wrote an account of the Methonæan commonwealth (6, 27). This town was occupied by the Athenians towards the close of the Peloponnesian war, with a view of annoying Perdiccas by ravaging his territory and affording a refuge to his discontented subjects. When Philip, the son of Amyntas, succeeded to the crown, the Athenians, who still held Methone, landed three thousand men, in order to establish Argæus on the throne of Macedon; they were, however, defeated by the young prince, and driven back to Methone. Several years after, Philip laid siege to this place, which at the end of twelve months capitulated. The inhabitants having evacuated the town, the walls were razed to the ground. (*Diod.*, 16, 34.) Dr. Clarke and Dr. Holland concur in supposing that the site of Methone answers to that

of *Loutrocheri*. (*Cramer's Anc. Greece*, vol. 1, p. 216.)—M. A city of Thessaly, noticed by Homer (*Il.*, 2, 716), and situate, like the preceding, on the seacoast. It must not, however, be confounded with the Macedonian one, an error into which Stephanus seems to have fallen (*s. v.* Μεθώνη).—III. A city of Messenia, on the western coast, below Pylus Messeniæ. According to Pausanias, the name was Methone. Tradition reported, that it was so called from Methone, the daughter of Æneæ; but it more probably derived its name from the rock Methon, which formed the breakwater of its harbour. (*Pausan.*, 4, 35.) Strabo informs us, that, in the opinion of many writers, Methone should be identified with Pedasus, ranked by Homer among the seven towns which Agamemnon offered to Achilles. (*Il.*, 9, 1394.—*Strab.*, 359.) Pausanias makes the same observation. In the Peloponnesian war Methone was attacked by some Athenian troops, who were conveyed thither in a fleet sent to ravage the coast of the Peloponnesus; but Brasidas, who was quartered in the neighbourhood, having forced his way through the enemy's line, threw himself into the town with 100 men, which timely succour obliged the Athenians to re-embark their troops. (*Thucyd.*, 2, 25.) Methone subsequently received a colony of Nauplians: these, being expelled their native city by the Argives, were established here by the Lacedæmonians. (*Pausan.*, 4, 35.) Many years after, it sustained great loss from the sudden attack of some Illyrian pirates, who carried off a number of inhabitants, both men and women. Methone was afterward besieged and taken by Agrippa, who had the command of a Roman fleet: that general having found here Bocchus (*Βόγος*), king of Mauritania, caused him to be put to death as a partisan of Marc Antony. (*Strab.*, 359.) We learn from Pausanias that Trajan especially favoured this city, and bestowed several privileges on its inhabitants. Sir W. Gell states, that at about 2700 paces to the east of *Modon* is a place called *Palæio Methone*, where are vestiges of a city. *Modon* is a Greek town of some size, with a fortress built by the Venetians. (*Cramer's Anc. Greece*, vol. 3, p. 137.)—IV. or Methana, a peninsula of Argolis, within the district of Træzene, formed by the harbour or bay of Pogon on one side, and the curvature of the Epidaurian Gulf on the other, and connected with the mainland by a narrow isthmus, which the Athenians occupied and fortified in the seventh year of the Peloponnesian war. (*Thucyd.*, 4, 45.) Diodorus Siculus says it was taken by the same people under Tolmidea, in the interval between the Persian and Peloponnesian wars: and this is perhaps the meaning of Thucydides, when he says that, on peace being made, or, rather, a truce for thirty years, Træzene, among other towns, was restored to the Peloponnesians. (*Thucyd.*, 1, 115.) Within the peninsula was a small town, also called Methone, which possessed a temple of Isis. About thirty stadia from the town were to be seen some hot springs, produced by the eruption of a volcano in the reign of Antigonus Gonatas. (*Pausan.*, 2, 34.) Dodwell says, that "the mountainous promontory of Methana consists chiefly of a volcanic rock of a dark colour. The outline is grand and picturesque, and the principal mountain which was thrown up by the volcano is of a conical form. Its apparent height is about equal to that of Vesuvius." The ancient city of Methone, according to the same intelligent traveller, "was situated in the plain, at the foot of its acropolis, near which are a few remains of two edifices." (*Dodwell*, vol. 2, p. 281.—*Cramer's Anc. Greece*, vol. 3, p. 369, *seqq.*)

ΜΕΤΗΥΜΝΑ, a city of Lesbos, lying opposite to Asus in Troas, and situate, according to Ptolemy, near the northernmost point of the island. It was, next to Mytilene, the most important city of Lesbos. The territory of the place was contiguous to that of Myti-

lenæ, a circumstance which appears to have created considerable rivalry between them, and probably induced the Methymneans to adhere to the Athenians, while their neighbours were bent on detaching themselves from that power. (*Thucyd.*, 3, 2, 18.) As a reward for their fidelity, the Methymneans were exempted from contributions in money. (*Thucyd.*, 6, 85.) Towards the close of the Peloponnesian war, Methymna fell into the power of the Spartan commander Callicratidas, who, though urged to treat the citizens with severity, and to sell them as slaves, refused to comply with the advice, declaring that, as long as he was admiral, no Greek, as far as lay in his power, should be enslaved. (*Xen., Hist. Gr.*, 1, 6, 8.) The best Lesbian wine was obtained from an adjacent territory belonging to this city (*Ovid, A. A.*, 1, 57), and hence Bacchus was frequently called the god of Methymna. (*Athenæus*, 8, p. 363, *b.*—*Pausan.*, 10, 19.) According to Strabo, this city was the native place of the historian Hellenicus. (*Strab.*, 616.) It was also the birthplace of Arion, whose adventure with the dolphin is related by Herodotus (1, 23).—The modern name, according to D'Anville, is *Porto Petra*; but Olivier (vol. 2, p. 87) makes *Motivo*, which others write *Motiva*, correspond to the site of the ancient city. (Compare *De Sinner, ad Bondelmont, Ins. Archipel.*, p. 219.—*Cramer's Asia Minor*, vol. 1, p. 160.)

METIS (*Prudence*), daughter of Oceanus, was the first wife of Jupiter, and exceeded gods and men in knowledge. Heaven and Earth, however, having told Jupiter that the first child of Metis, a maid, would equal him in strength and counsel; and that her second, a son, would be king of gods and men, he deceived her when she was pregnant, and swallowed her; and, after a time, the goddess Minerva sprang from his head. (*Apollod.*, 1, 3, 6.) Metis is said to have given a potion to Saturn, which compelled him to vomit up the offspring whom he had swallowed.—(*Apollod.*, 1, 2, 1.)

METRUS, or METRIVS FUFFETIVS, I. dictator of Alba. He fought against the Romans in the reign of Tullus Hostilius, and agreed at length with the foe to leave the issue of the war to a combat between the three Horatii and three Curiatii. Beholding with pain his country subdued by the defeat of the latter, he imagined that he should be able to recover her freedom for her by joining with the Fidenates, who had attempted, during the late war, to shake off the Roman yoke. Secretly encouraged by him, they took the field, and advanced to the neighbourhood of Rome, in conjunction with the Veientes, their allies. Fuffetius had promised to abandon the Romans, and go over to the Fidenates and Veientes in the middle of the engagement. He had not courage enough to keep his word, but proved a traitor alike to the Romans and to his new allies, by drawing off his troops from the line of battle, and yet not marching over to the foe, but waiting to see which side would conquer. The Romans gained the victory, and Fuffetius was torn asunder by being attached to two four-horse chariots, that were driven in different directions. (*Liv.*, 1, 23, *seqq.*)—The common form of the name is *Metivus* Fuffetius, but the more correct one is *Mettivus*, as is shown by Niebuhr (*Rom. Hist.*, vol. 1, p. 299, *Eng. transl.*)—II. Tarpa, a critic. (*Vid.* Tarpa.)

METON, a celebrated astronomer, who lived at Athens in the fifth century B.C. He was, according to some, a Lacedæmonian (*Ἀλακω*), but the best authorities call him a Leuconian (*Λευκονιεύς*). He is said to have pretended insanity in order not to go with the Athenian expedition against Syracuse, the disastrous termination of which he plainly foresaw.—The solstices which Meton observed with Ecetemon are preserved by Ptolemy. He is best known, however, as the founder of the celebrated lunar cycle,

called "the Metonic" after his name, and which is still preserved by the Western churches in their computation of Easter. This cycle takes its rise as follows: 235 revolutions of the moon are very nearly 19 revolutions of the sun, and one complete revolution of the moon's node. If these approximations were exact, all the relative phenomena of the sun and moon, particularly those of eclipses, would recommence in the same order, at the end of every 19 years. There is, however, an error of some hours in every cycle. The first year of the first Metonic period commenced with the summer solstice of the year 433 B.C.; and if the reckoning had been continuous, what is now called the *golden number* of any year would have denoted the year of the Metonic cycle, if the summer solstice had continued to be the commencement of the year. On reckoning, however, it will be found that A.D. 1, which is made the first year of a period of 19 years, would have been part of the fourteenth and part of the fifteenth of a Metonic cycle. (*Ideler, über den Cyclus des Meton*.—*Abhand. Acad., Berlin*, 1814-1815, *Hist. Philol. Cl.*, p. 230.—*Encycl. Us. Knowl.*, vol. 15, p. 144.) "It has been suspected," observes Dr. Hale, "and not without foundation, that the celebrated lunar cycle of 19 years, which Meton introduced into Greece for the adjustment of their lunar year with the solar, was borrowed from the ancient Jewish tables. This was the opinion of the learned Anatolius, bishop of Laodicea, about A.D. 270." (*Hale's Chronology*, vol. 1, p. 66.)

ΜΕΤΑΒΟΛΕΣ, a disciple of Crates. He had previously been a follower of Theophrastus and Xenocrates; but when he commenced cynic, he committed their works to the flames, as the useless dreams of idle speculation. In his old age he became so dissatisfied with the world that he strangled himself. (*Enfield, Hist. Philos.*, vol. 1, p. 314.)

ΜΕΤΡΟΔΩΡΟΣ, I. an intimate friend of Epicurus. He first attached himself to that philosopher at Lampascus, and continued with him till his death. He maintained the cause of his friend and master with great intrepidity, both by his discourses and his writings, against the Sophists and Dialectics, and consequently partook largely of the obloquy which fell upon his sect. (*Cic., Tusc. Quæst.*, 2, 3.—*Id., de Fin.*, 2, 3.) Plutarch charges him with having reproached the folly of his brother Timocrates in aspiring to the honours of wisdom, while nothing was of any value but eating and drinking, and indulging the animal appetites. (*Adv. Colot.*—*Op. ed. Reiske*, vol. 10, p. 624, *segg.*) But it is probable that this calumny originated with Timocrates himself, who, from a personal quarrel with Metrodorus, deserted the sect, and therefore can deserve little credit. (*Enfield, Hist. Phil.*, vol. 1, p. 456.—*Justinus, Hist. Phil.*, 1, 2, 6.—*Menage ad Diog. Laert.*, 10, 23.)—II. A painter and philosopher of Stratonicea, B.C. 171. He was sent to Paulus Æmilius, who, after his victory over Perseus, king of Macedonia, B.C. 168, requested of the Athenians a philosopher and a painter, the former to instruct his children, and the latter to make a painting of his triumphs. Metrodorus was sent, as uniting in himself both characters: and he gave satisfaction in both to the Roman general. (*Plin.*, 35, 11.—*Cic., de Fin.*, 5, 1, *de Orat.*, 4.)

MEVANIA, a city of Umbria, on the river Tina, in the southwestern angle of the country, and to the northwest of Spolegium. It was famous for its wide-extended plains and rich pastures. (*Colum.*, 3, 8.) Strabo mentions Mevania as one of the most considerable cities of Umbria. (*Strab.*, 227.—*Compare Liv.*, 9, 41.) Here Vitellius took post, as if determined to make a last stand for the empire against Vespasian, but soon after withdrew his forces. (*Tacit., Hist.*, 3, 55.) If its walls, as Pliny says, were of brick, it could not be capable of much resistance (35, 14).

This city is farther memorable as the birthplace of Propertius, a fact of which he himself informs us (4, 1, 21). It is now an obscure village, which still, however, retains some traces of the original name in that of *Bevagna*. (*Cramer's Anc. Italy*, vol. 1, p. 269.)

ΜΕΖΕΝΤΙΟΣ, king of Cære, at the time that Æneas was fabled to have landed in Italy. He is represented by Virgil as a monster of ferocity, wantonly murdering many of his subjects, and causing others, fastened face to face unto dead bodies, to expire amid loathsomeness and famine. His subjects, exasperated by his tyranny, expelled him from the throne. He and his son Lausus took refuge in the court of Turnus, whom they assisted in his war against Æneas. They both fell by the hand of the Trojan prince. The narrative of the combat in which they were slain is justly esteemed one of the most brilliant passages in the whole Æneid. Virgil has described Lausus as eminent for beauty of person, bravery, and filial piety; a pleasing contrast to his ferocious parent. The epithet *contemptor divum* was applied to Mezentius by Virgil, because he demanded of his subjects the first fruits of their lands and their flocks, instead of appropriating them in sacrifice to the gods. (*Cato, ap. Macrob., Sat.*, 3, 5.—*Virg., Æn.*, 8, 478.—*Id. ib.*, 10, 762, *segg.*)

ΜΙCIPΕΑ, king of Numidia, eldest son of Masinissa, shared with his brothers Gulussa and Mastanabal the kingdom of their father, which had been divided among them by Scipio Æmilianus. (*Vid. Masinissa*.) On the death of his brothers he became monarch of the whole country, about 146 B.C. Of a pacific disposition, Micipsa enjoyed a quiet reign, and proved the mildest of all the Numidian kings. Animated by the same enlightened policy as his father, he exerted himself strenuously for the civilization of his subjects, established a colony of Greeks in his capital, and assembled there a large number of learned and enlightened men. Although he had many children by numerous concubines, still Hiempsal and Adherbal were his favourite sons. Unhappily, however, he adopted his nephew, the famous Jugurtha, and declared him, by his will, joint heir to the kingdom along with his two sons just mentioned. This arrangement brought with it the ruin of his family and kingdom. (*Vid. Jugurtha*.)

ΜΙCΩΝ, I. a painter and statuary, contemporary with Polygnotus, who flourished about Olymp. 80. This artist has been noticed at great length by Böttiger (*Archæol. Pict.*, 1, p. 254, *segg.*). In ancient MSS. his name is sometimes written Μίκων, sometimes Μήκων or Νίκων, but the more correct form is probably Μίκων (Micon). Varro mentions him among the more ancient painters, whose errors were avoided by Apelles, Protogenes, and others. (*L. L.*, 8, p. 129, *ed. Bip.*) Pliny states, that, in connexion with Polygnotus, he either invented some new colours, or employed those in use in his paintings on a better plan than that previously adopted. (*Plin.*, 33, 13, 56.—*Id.*, 35, 6, 25.) A list of some of his productions is given by Sillig (*Dict. Art.*, s. v.).—II. Another painter, distinguished from the former by the epithet of "the Younger." His age and country are uncertain. (*Plin.*, 35, 9, 35.) Böttiger confounds him with Micon I. (*Sillig, Dict. Art.*, s. v.).—III. A statuary of Syracuse. At the request of the children of Hiero II., king of Syracuse, he made two statues of this monarch, which were placed at Olympia, the one representing him on horseback, the other on foot. The death of Hiero took place B.C. 215; and as the statues in question were made soon after this event, we can decide with certainty on the age of Micon. (*Sillig, Dict. Art.*, s. v.)

MIDAS, an ancient king of the Brygians in Thrace, son of Gordius, and whose name is connected with some of the earliest mythological legends of the Greeks. According to one account, he possessed, at the foot of

Mount Bermion, a garden, in which grew spontaneously roses with sixty petals, and of extraordinary fragrance. (*Herod.*, 8, 138.—Compare *Wesseling, ad loc.*) To this garden Silenus was in the habit of repairing; and Midas (*Pausan.*, 1, 4, 5) or his people, by pouring wine into the fount from which he was wont to drink, intoxicated him, and he was thus captured. (*Herod.*, l. c.) Midas put various questions to him respecting the origin of things and the events of past times. (*Serv. ad Virg., Eclog.*, 6, 13.) One was, What is best for men? Silenus was long silent; at length, when he was constrained to answer, he said: "Life is most free from pain when one is ignorant of future evils. It is best of all for man not to be born: the second is, for those who are born to die as soon as possible." (*Aristot., de An.—Plut., Consol. ad Apoll. Op.*, 7, p. 352, ed. *Hutten.*) He also, it is said, gave the king a long account of an immense country which lay without the ocean-stream, the people of which once invaded the land of the Hyperboreans. (*Theopomp., ap. Ælian, V. H.*, 3, 18.)—The name of Midas is also connected with the migration of the Brygians from Thrace into Asia Minor, where they are said to have changed their name to Phrygians (*Strab.*, 295.—*Plin.*, 5, 32.—*Steph. Byz.*, s. v. *Βρύγες*), and it has been supposed that the Brygians passed over under the same Midas of whom the above legend is related. (*Höck, Kreta*, vol. 1, p. 129.) At all events, we find the name Midas reappearing in the legends of Asia Minor. Thus, mention is made of a King Midas who reigned at Possinus, where he built a splendid temple to Cybele, and established her sacred rites. (*Diod. Sic.*, 3, 5.) So also Xenophon places near Thymbrium the fountain where Midas was said to have caught the satyr. (*Anab.*, 1, 2, 13.) We have likewise another legend relative to Midas and Silenus, the scene of which is laid, not in Europe, but in Lower Asia. According to this account, as Bacchus was in Lydia, on his return from the conquest of the East, some of the country people met Silenus staggering about, and, binding him with his own garlands, led him to their king. Midas entertained him for ten days, and then conducted him to his foster-son, who, in his gratitude, desired the king to ask whatever gift he would. Midas craved that all he touched might turn to gold. His wish was granted; but when he found his very food converted to precious metal, and himself on the point of starving in the midst of wealth, he prayed the god to resume his fatal gift. Bacchus directed him to bathe in the Pactolus, and hence that river obtained golden sands. (*Ovid, Met.*, 11, 85, seqq.—*Hygin., fab.*, 191.—*Serv., ad Æn.*, 10, 142.—*Max. Tyr.*, 30.) There is a third legend relative to Midas. Pan, the god of shepherds, venturing to set his reed-music in opposition to the lyre of Apollo, was pronounced overcome by Mount Tmolus; and all present approved the decision except King Midas, whose ears were, for their obtuseness, lengthened by the victor to those of an ass. The monarch endeavoured to conceal this degradation from his subjects; but it was perceived by one of his attendants, who, finding it difficult to keep the secret, yet afraid to reveal it, dug a hole in the ground, and whispered therein what he had perceived. His words were echoed by the reeds which afterward grew on the spot, and which are said to have repeated, when agitated by the wind, "King Midas has asses' ears." (*Ovid, Met.*, 11, 153, seqq.)—The legend respecting the wealth of Midas would seem to have an historical basis, and to point to some monarch of Phrygia who had become greatly enriched by mines and commercial operations. Hence the Phrygian tradition, that when Midas was an infant, some ants crept into his mouth as he lay asleep, and deposited in it grains of wheat. This was regarded as an omen of future opulence. (*Ælian, V. H.*, 12, 45.—*Cic., Div.*, 1, 36.—*Val. Max.*, 1, 6.)

The same monarch, in all probability, gave a favourable reception to the rites of Bacchus, then for the first time introduced into his dominions, and hence his success in the accumulation of riches may have been ascribed to the favour of the god. The later cycle of fable, however, appears to have changed the receiver and protector of the rites of Bacchus into a companion or follower of Bacchus himself. Hence we find Midas numbered among the Sileni and Satyrs, and, as such, having the usual accompaniment of goat's ears. (Compare the language of Philostratus: *μετεῖχε πὺν γὰρ τοῦ τῶν Σατύρων γένους ὁ Μίδας, ὡς ἐόηλον τὰ ὄρα.*—*Vit. Apoll. Tyan.*, 6, 13, p. 303, ed. *Morell.*) Now it would seem that the Attic poets, in their satyric dramas, made the story of Midas a frequent theme of travesty, and in this way we have the wealthy monarch converting everything into gold by his mere touch, even his food undergoing this strange metamorphosis; and again, the pricked-up ears of the goat-footed Satyr become changed by Attic wit into the ears of an ass. It may be, too, that the first satyric composer, who introduced these appendages into his piece, discharged, in this way, a shaft at some theatrical judges who had rejected one of his own productions. (Consult the remarks of *Wieland, Attisches Museum*, vol. 1, p. 354, seqq., and compare *Welcker, Nachtrag*, p. 301.) Schwenck, however, takes a very different view of the subject. He makes Midas to have been an old Thracian or Phrygian deity, referring to Hesychius (*Μίδας θεός*) as an authority for this, and identifies him with the moon-god, or *Deus Lunus*. He compares the name *Μίδας* with *μείς*, *μηνός*, as the Cretan *Ιττρον* was related to *εἰς*, *ἐνός*. Now *μείς* indicates unity, being merely *εἰς* with a prefix, as in *μία* for *la*; and *ἐνός* (*annus*), "the year," has also relation to unity. Thus, according to Schwenck, Midas indicated the lunar year as a unit of time. The long ears of Midas he also makes a lunar symbol, as in the case of the Scandinavian goddess Mani, or the Moon. (*Etymologisch-Mythol. Andeut.*, p. 66, seq.) This explanation is very far-fetched.—It is more than probable that the name Midas was common to the Lydians as well as Phrygians, since Midas, according to some accounts, was the husband of Omphale. (*Clearch., ap. Athen.*, 12, p. 516.)—Mr. Leake gives an account of a very ancient monument at *Doganlır*, in what was originally a part of Phrygia, which appeared to him to have been erected in honour of one of the kings of Phrygia, of the Midaian family. (*Journal of a Tour in Asia Minor*, p. 31.) It is very probable, indeed, that many monarchs of the Phrygian dynasty bore the name of Midas. (*Leake, l. c.*)

ΜΙΔΕΑ, I. an ancient city of Boeotia, near the lake Copais, and, according to tradition, swallowed up, along with Arne, by the waters of that lake. (*Hom., Il.*, 2, 507.—*Strab.*, 413.)—II. A town of Argolis, in the Tyrrhinian territory, named, as was said, after the wife of Electryon (*Pind., Olymp.*, 7, 49.—*Schol., ad loc.*); but Apollodorus affirms that it already existed in the time of Perseus (2, 4)—It was afterward destroyed by the Argives. (*Strab.*, 373.) The vestiges of this place are near the monastery of *Agios Adrianos*, where there is a *Palæo Castro* in a bold rock; the walls are of ancient masonry. (*Gell, Itin. of the Morea*, p. 185.—*Cramer's Anc. Greece*, vol. 3, p. 250.)

ΜΙΛΕΤΤΙ, the inhabitants of Miletus. (*Vid. Miletus.*) *ΜΙΛΗΣΙΩΡΩΝ Μῦθος* (*Μιλησίων τεῖχος*), a place in Lower Egypt, to the west of the Sebennytic mouth of the Nile, and which owed its foundation to the Milesians, or people of Miletus. (*Eustath. ad Dionys.—Huds., Geogr. Min.*, vol. 4, p. 146.)

ΜΙΛΗΤΡΟΠΟΛΙΣ, a city of Mysia, northeast of Adramyttium, and situate on a branch of the river Rhyn-dacus. It coincides, according to D'Anville, with the modern *Beli Kessik*. (*Plin.*, 5, 32.—*Steph. Byz.*, p. 467.)

MILETUS, I. a son of Apollo, who fled from Crete to avoid falling into the hands of Minos. (*Apollod.*, 3, 1, 2.) He came to Caria, and was said to have been the founder of the city of Miletus. (*Apollod.*, l. c.—Compare *Heyne, ad loc.*)—II. The most celebrated of the cities of Ionia, situate on the southern shore of the bay into which the river Latmus emptied, and, according to Strabo, eighty stadia south of the embouchure of the Mæander. (*Strab.*, 634.) The origin of this city falls in the period of the first Greek emigrations from home; but the circumstances connected with its founding are involved in great uncertainty. As far as any opinion can be formed from various accounts that are given of this event, it would appear that the place was first settled by natives of the country; that to these came Sarpedon from Miletus in Crete, and after him Neleus from Attica, together with other settlers in process of time. (*Strab.*, l. c.—*Pausan.*, 7, 2.—*Apollod.*, 3, 1.—*Eustath. ad Dionys.*, v. 825.) Miletus was already large and flourishing when the cities of the parent country were but just beginning to emerge from obscurity. The admirable situation of the place, and the convenience of having four harbours, one of which was capable of containing a large fleet, gave it an early and great preponderance in maritime affairs. It carried on an active and extensive commerce with the shores of the Euxine on the one hand, and the distant coast of Spain on the other, to say nothing of the principal ports of the Mediterranean, which were likewise frequented by the Milesian vessels. Its most important trade, however, was with the shores of the Euxine. Almost all the Greek cities along the coast of this inland sea, which were found there at the period of the Persian power, were of Milesian origin. As, however, many of those cities were themselves conspicuous for size and population, one can hardly comprehend how Miletus, in the midst of so active a traffic, which of itself must have required the attention of considerable numbers, could command a superfluous population, sufficiently extensive for the establishment of so many colonies, which Pliny makes to have been eighty in number, and Seneca seventy-five. (*Plin.*, 29.—*Senec.*, *Consol. ad Helv.*, c. 6.—Consult *Rambach, de Miletis ejusque Colonis, Hal. Sax.*, 1790.—*Larcher, Hist. d'Hérod.*, vol. 8, p. 344, 359.) It is more than probable, that, in sending out these colonies, the natives of the country, the Lydians, Carians, and Leleges, were invited to join, and did so.—Miletus was already a powerful city when the Lydian monarchy rose into consequence. The kings of Lydia, possessors of all the surrounding territory, could not brook the independence of the Ionian city; they accordingly carried on war against it for many years, and were at times powerful enough to advance even to the city walls, and to destroy or carry off the produce of the neighbouring country; but they were unable to mar the prosperity of a city which had the control of the sea, and consequently bade defiance to their power. The Milesians appear subsequently to have made a treaty with Cræsus, in which they probably acknowledged that sovereign as their liege lord, and consented to pay him tribute. The same treaty was also agreed upon between them and Cyrus, when the latter had conquered Lydia; and this saved Miletus from the disasters which befell at that time the other Ionian states. (*Herod.*, 1, 141, 143.) But it was not always equally fortunate. In the reign of Darius, the whole of Ionia was excited to revolt by the intrigues and ambitious schemes of Histæus, who had been raised to the sovereignty of Miletus, his native city, by the Persian monarch, in recompense for the services he had rendered in the Scythian expedition. Aristagoras, his deputy and kineman, also greatly contributed to inflame the minds of his countrymen. At his instigation, the Athenians sent a force to Asia Minor, which surprised and burned Sardis; but this insult was speedily avenged by the

Persian satraps, and, after repeated defeats, Miletus was besieged by land and sea, and finally taken by storm. This beautiful and opulent city, the pride and ornament of Asia, was thus plunged into the greatest calamity; the surviving inhabitants were carried to Susa, and settled, by order of Darius, at Ampe, near the mouth of the Tigris. The town itself was given up by the Persian commanders to the Carians. The Athenians are said to have been so much affected by this event, that when Phrynichus, the tragic writer, introduced on the stage his play of "the Capture of Miletus," the whole house burst into tears, and the people fined the poet 1000 drachmas, and forbade the performance for the future. (*Herod.*, 6, 8, *seqq.*—*Calisth.*, ap. *Strab.*, 635.)—When Alexander, after the battle of the Granicus, appeared before Miletus, the inhabitants, encouraged by the presence of a Persian army and fleet stationed at Mycale, refused to submit to that prince, and open their gates to his forces; upon which he immediately commenced a most vigorous attack on their walls, and finally took the city by assault. He however forgave the surviving inhabitants, and granted them their liberty. (*Arrian, Exp. Al.*, 1, 18, *seqq.*) The Milesians sided with the Romans during the war with Antiochus. (*Liv.*, 37, 16.—*Id.*, 43, 6.) This city was yet flourishing when Strabo wrote (*Strabo*, l. c.—Compare *Tacit.*, *Ann.*, 4, 55 et 63), and still later, in the time of Pliny (5, 29) and Pausanias (7, 3). It appears from the Acts of the Apostles, that St. Paul sojourned here a few days on his return from Macedonia and Troas, and summoned hither the elders of the Ephesian Church, to whom he delivered an affectionate farewell address. (*Acts*, 20, 17, *seqq.*) The Milesian Church was under the direction of bishops, who sat in several councils, and ranked as metropolitans of Caria. (*Hierocl., Synecd.*, p. 687.) This continued as late as the decline of the Byzantine empire (*Mich. Duc.*, p. 41); at which time, however, the town itself was nearly in ruins, from the ravages of the Turks and other barbarians, and the alluvial deposits caused by the Mæander. Miletus deserves farther mention as the birthplace of Thales, the celebrated mathematician and philosopher; and his successors Anaximander and Anaximenes; also of Cadmus and Hecateus, two of the earliest historians of Greece. (*Strab.*, 635.—*Plin.*, 5, 39.—*Suid.*, s. v. Κάδμος.) The Milesians were in repute for their manufactures of couches and other furniture; and their woollen cloths and carpets were especially esteemed. (*Athenæus*, 1, p. 28.—*Id.*, 11, p. 428.—*Id.*, 12, p. 540, &c.) The modern village of *Palatscha* occupies part of the site of the ancient city. The coast, however, has undergone great changes, for some remarks on which consult the article Mæander. (*Cramer's Asia Minor*, vol. 1, p. 385, *seqq.*)

MILÓ, I. a celebrated athlete of Crotona in Italy. He accustomed himself from early life to bear burdens, the weight of which he successively augmented, and at last became so conspicuous for strength as to carry the most surprising loads with the utmost ease. Many curious stories are related by the ancients concerning his wonderful strength. He could hold a pomegranate in his hand, with his fingers closed over it, and yet, without either crushing or even pressing on the fruit, could keep his fingers so firmly bent as to render it impossible for any one to take the fruit from him. He could place himself on a discus, some say a shield, covered over with oil or other unctuous substances, and rendered, of course, very slippery, and yet he could retain so firm a foothold that no one was able to dislodge him. He could encircle his brow with a cord, and break this asunder by holding his breath and causing the veins of the head to distend. He could hold his right arm behind his back, with the hand open and the thumb raised, and a man could not then separate his little finger from the rest. The account that is

given of his voracity is almost incredible. He ate, it is said, every day, twenty pounds of animal food, twenty pounds of bread, and drank fifteen pints of wine. Athenæus relates, that on one occasion he carried a steer four years old the whole length of the stadium at Olympia (606 feet), and then, having cut it up and cooked it, ate it all up himself in one day. (*Athen.*, 10, p. 412, c.) Some authorities add, that he killed it with a single blow of his fist. He had an opportunity, however, at last, of exerting his prodigious strength in a more useful manner. One day, while attending the lectures of Pythagoras, of whom he was a disciple and constant hearer, the column which supported the ceiling of the hall where they were assembled was observed to totter, whereupon Milo, upholding the entire superstructure by his own strength, allowed all present an opportunity of escaping, and then saved himself. Milo was crowned seven times as victor at the Pythian games, and six times at the Olympic, and he only ceased to present himself at these contests when he found no one willing to be his opponent. In B.C. 509 he had the command of the army sent by the people of Crotona against Sybaris, and gained a signal victory.—His death was a melancholy one. He was already advanced in years, when, traversing a forest, he found a trunk of a tree partly cleft by wedges. Wishing to sever it entirely, he introduced his hands into the opening, and succeeded so far as to cause the wedges to fall out; but his strength here failing him, the separated parts on a sudden reunited, and his hands remained imprisoned in the cleft. In this situation he was devoured by wild beasts. (*Aul. Gell.*, 15. 16.—*Val. Max.*, 9, 12, 17.)—II. Titus Annius, was a native of Lanuvium in Latium, and was born about 95 B.C. His family appears to have been a distinguished one, since we find him espousing the daughter of Sylla. Having been chosen tribune of the commons B.C. 57, he zealously exerted himself for the recall of Cicero, but the violent proceedings of Clodius paralyzed all his efforts. Determined to put an end to this, he summoned Clodius to trial as a disturber of the public peace; but the consul Metellus dismissed the prosecution, and thus enabled Clodius to resume with impunity his unprincipled and daring career. Milo thereupon found himself compelled, for the sake of his own personal safety, to keep around him a band of armed followers. His private resources having suffered greatly by the magnificent games which he had exhibited, Milo, in order to repair his shattered fortunes, married Fausta, the daughter of Sylla; but the union was an unhappy one; Fausta was discovered to be unfaithful to his bed, and her paramour, the historian Sallust, was only allowed to escape after receiving severe personal chastisement, and paying a large sum of money to the injured husband. Clodius meanwhile, having obtained the office of ædile, had the assurance to accuse Milo in his turn of being a disturber of the public tranquillity, and of violating the laws by keeping a body of armed men in his service. Pompey defended the latter; Clodius spoke in reply; and the whole affair was carried on amid the most violent clamours from their respective partisans. No decision, however, was made; the matter was protracted, and at last allowed to drop. Some years after this (B.C. 51) Milo offered himself as a candidate for the consulship against two other competitors. Clodius, of course, opposed him; but the powerful exertions of his friends would have carried him through, had not an unfortunate occurrence frustrated all his hopes. Clodius, it seems, had openly declared, that if Milo did not abandon all pretensions to the consulship, in three days he would be no more. This threat fell upon the head of its own author. On the 20th of January, Milo set out from Rome to go to Lanuvium, of which he was the chief magistrate or dictator, and where, by

virtue of his office, he was on the following day to appoint a flamen for the performance of some of the religious ceremonies of the municipality. He travelled in a carriage, accompanied by his wife and one of his friends, and attended by a strong body of slaves, and also by some of the armed followers, whose services he had occasionally employed in his contests with Clodius. While prosecuting his route, he fell in with the latter, who was returning to Rome, followed by about thirty of his slaves. Clodius and Milo passed one another without disturbance; but the armed men, who were among the last of Milo's party, provoked a quarrel with the slaves of Clodius; and Clodius turning back, and interposing in an authoritative manner, Birria, one of Milo's followers, ran him through the shoulder with a sword. Upon this the fray became general. Milo's slaves hastened back in great numbers to take part in it, while Clodius was carried into an inn at Bovillæ. Meanwhile, Milo himself was informed of what had passed, and, resolving to avail himself of the opportunity which was offered, he ordered his slaves to attack the inn and destroy his enemy. Clodius was dragged out into the road and there murdered; his slaves shared his fate, or saved their lives by flying to places of concealment; and his body, covered with wounds, was left in the middle of the highway. (*Ascon.*, *Arg. in Cic.*, *Orat. pro Mil.*) When the corpse of Clodius was brought to Rome, a violent popular commotion ensued. The body was carried into the Forum and exhibited on the rostra; and at last the mob, having conveyed it from the rostra into the senate-house, set fire to a funeral pile made for it at the moment out of the benches, tables, and other furniture which they found at hand. The consequence was, as might be expected, that the senate-house itself was involved in the conflagration and burned to the ground. These, and several other disorders committed by the multitude, somewhat turned the tide of public opinion in favour of Milo. He was now encouraged to return to Rome and renew his canvass for the consulship. He did so, but the whole city became eventually a scene of the greatest confusion; and, in order to restore public tranquillity, Pompey was declared sole consul, and armed with full powers to put a stop to farther disturbances. Milo was thereupon brought to trial for the murder of Clodius, and was defended by Cicero; but the clamours and outcries of the populace devoted to the party of Clodius, and the array of armed men that encompassed the tribunal, to prevent any outbreak of popular violence, prevented the orator from displaying his usual force and eloquence, and Milo was condemned. When the event of the trial was known, he went into exile, and fixed his abode at Massilia in Gaul. Milo was also tried after his departure for three other distinct offences; for bribery, for illegal caballing and combinations, and for acts of violence, and was successively found guilty on all.—It is said that, soon after Milo's condemnation, and when he was residing at Massilia, Cicero sent him a copy of his speech in the form in which we now have it, and that Milo, having read it over, wrote a letter to the orator, in which he stated that it was a fortunate thing for himself that Cicero had not pronounced the oration which he sent, since otherwise he (Milo) would not then have been eating such fine mullets at Massilia. It has been sometimes stated, that Milo was subsequently restored to his country. This, however, is altogether erroneous. Velleius Paterculus and Dio Cassius both contradict the fact of his recall, by what we find in their respective histories. According to Dio Cassius, Milo was the only one of the exiles whom Cæsar refused to recall, because, as is supposed, he had been active in exciting the people of Massilia to resist Cæsar. Velleius Paterculus states that Milo returned without permission to Italy, and there busily employed himself

in raising opposition to Caesar during that commander's absence in Thessaly against Pompey. He adds that Milo was killed by the blow of a stone while laying siege to Compsa, a town of the Hirpini. (*Cic., Or. pro Mil.*—*Vell. Pat.*, 2, 47, 68.—*Encyclop. Metropol.*, div. 3, vol. 2, p. 218, *seq.*—*Biogr. Univ.*, vol. 29, p. 57.)

MILTIADES, I. an Athenian, son of Cypselus, who obtained a victory in a chariot-race at the Olympic games, and led a colony of his countrymen to the Chersonesus. The cause of this step on his part was a singular one. It seems that the Thracian Dolonci, harassed by a long war with the Absinthians, were directed by the oracle of Delphi to take for their king the first man they met in their return home, who invited them to come under his roof and partake of his entertainments. The Dolonci, after receiving the oracle, returned by the sacred way, passed through Phocis and Boeotia, and, not being invited by either of these people, turned aside to Athens. Miltiades, as he sat in this city before the door of his house, observed the Dolonci passing by, and as by their dress and armour he perceived they were strangers, he called to them, and offered them the rites of hospitality. They accepted his kindness, and, being hospitably treated, revealed to him all the will of the oracle, with which they entreated his compliance. Miltiades, disposed to listen to them because weary of the tyranny of Pisistratus, first consulted the oracle of Delphi, and the answer being favourable, he went with the Dolonci. He was invested by the inhabitants of the Chersonese with sovereign power. The first measure he took was to stop the farther incursions of the Absinthians, by building a wall across the isthmus. When he had established himself at home, and fortified his dominions against foreign invasion, he turned his arms against Lampacus. His expedition was unsuccessful; he was taken in an ambuscade, and made prisoner. His friend Croesus, king of Lydia, however, was informed of his captivity, and procured his release by threatening the people of Lampacus with his severest displeasure. He lived a few years after he had recovered his liberty. As he had no issue, he left his kingdom and possessions to Stesagoras, the son of Cimon, who was his brother by the same mother. The memory of Miltiades was greatly honoured by the Dolonci, and they regularly celebrated festivals and exhibited shows in commemoration of a man to whom they owed their preservation and greatness. (*Herod.*, 6, 38.—*Id.*, 6, 103.)—II. A nephew of the former, and brother of Stesagoras. His brother, who had been adopted by Miltiades the elder, having died without issue, Miltiades the younger, though he had not, like Stesagoras, an interest established during the life of his predecessor, and though the Chersonese was not by law an hereditary principality, was still sent by the Pisistratids thither with a galley. By a mixture of fraud and force he succeeded in securing the tyranny. On his arrival at the Chersonese, he appeared mournful, as if lamenting the recent death of his brother. The principal inhabitants of the country visited the new governor to condole with him, but their confidence in his sincerity proved fatal to them. Miltiades seized their persons, and made himself absolute in Chersonesus; and, to strengthen himself, he married Hegesippa, the daughter of Olorus, king of the Thracians. When Darius marched against the Scythians, Miltiades submitted to him and followed in his train, and was left with the other Grecian chiefs of the army to guard the bridge of boats by which the Persians crossed the Danube. He then proposed to break up the bridge, and, suffering the king and army to perish by the Scythians, to secure Greece and deliver Ionia from the Persian yoke. His suggestion was rejected, not for its treachery, but because Persia was to each of the tyrants his surest support against the spirit of

freedom in the people. Miltiades, soon after, was driven out by the Scythians, but recovered his possessions on their departure. Knowing himself, however, to be obnoxious to the Persians, he fled to Athens, when their fleet, after the re-conquest of Ionia, was approaching the coast of Thrace. The Athenian laws were severe against tyrants, and Miltiades, on arriving, was tried for his life. He was acquitted, however, more perhaps owing to the politic way in which he had used his power in the Chersonesus, than to the real merit of his conduct. Nay, he even so far won the favour of the people as to be appointed, not long after, one of the ten generals of Athens. It was at this same period that the Persian armament, under Datis and Artaphernes, bore down upon the shores of Attica; and, guided by Hippias, who knew the capabilities of every spot of ground in his country, the invading force landed at Marathon. According to custom, the Athenian army was under the command of its ten generals. The opinions of the ten were equally divided as to the propriety of engaging, when Miltiades, going privately to the polemarch Callimachus, who, by virtue of his office, commanded the right wing, and had an equal vote with the ten generals, prevailed upon him to come over to his way of thinking, and vote in favour of a battle. The vote of the polemarch decided the question; and when the day of command came round to Miltiades, the battle took place. The details of this conflict are given elsewhere. (*Vid.* Marathon.)—Perhaps no battle ever reflected more lustre on the successful commander than that of Marathon on Miltiades; though it should be observed, that he whom all ages have regarded as the defender of liberty, began his career as an arbitrary ruler, and on only one occasion in his whole life was engaged on the side of freedom; but for the same man to be the liberator of his own country and a despot in another, is no inconsistency, as the course of human events has often shown.—The reward bestowed upon Miltiades after this memorable conflict was strikingly characteristic. He and the polemarch Callimachus were alone distinguished from the other combatants in the painted porch, and stood apart with the tutelary gods and heroes.—Miltiades now rose to the utmost height of popularity and influence, inasmuch that when he requested a fleet of seventy ships, without declaring how he meant to employ them, but merely promising that he would bring great riches to Athens, the people readily agreed. He led them to the Isle of Paros, under the pretence of punishing its people for their compelled service in the Persian fleet, but really to avenge a personal injury of his own. He demanded one hundred talents as the price of his departure; but the Parians refused, and resisted him bravely; and in an attempt to enter the town, he received a wound, and was obliged to withdraw his army. On his return he was brought to trial for his life by Xanthippus, a man of high consideration, on account of the failure of his promises made to the people. His wound disabled him from defending himself, but he was brought into the assembly on a couch, while his brother Stesagoras defended him, principally by recalling his former services. The memory of these, with pity for his present condition, prevailed on the people to absolve him from the capital charge; but they fined him fifty talents, nearly \$53,000. As he could not immediately raise this sum, he was cast into prison, where he soon after died of his wound, which had gangrened.—The character of Miltiades is one on which, with the few materials that history has left, we should not judge too exactly. The outline which remains is one that, if filled up, would seem fittest to contain the very model of a successful statesman in an age when the prime minister of Athens was likewise the leader of her armies. Heeren has briefly noticed the transition which took place in the character of Athenian states-

men, from the warrior-like Miltiades and Themistocles, to the warlike rhetorician Pericles, and thence to the orator, who to his rhetorical skill united no military prowess. Miltiades, with great generalship, showed great power as a statesman, and some, but not much, as an orator. This is agreeable to his age. Whether he was a true patriot, governed by high principle, it is now impossible to determine. He achieved one great action, which for his country produced a most decisive result. The unfortunate close of his career may be regarded by some as showing the ingratitude of democracies; but perhaps a judicious historian will draw no conclusion of the kind, especially with so imperfect materials before him as we possess of the life of this illustrious Athenian. If the Athenians conceived that nothing he had done for them ought to raise him above the laws; if they even thought that his services had been sufficiently rewarded by the station which enabled him to perform them, and by the glory he reaped from them, they were not ungrateful or unjust; and if Miltiades thought otherwise, he had not learned to live in a free state. (*Herod.*, lib. 5 et 6.—*Corn. Nep.*, *Vit. Milt.*—*Encycl. Us. Knowl.*, vol. 15, p. 227.—*Thirlwall's Greece*, vol. 2, p. 246.)

MILTO. *Vid.* Aspesia II.

MILVIUS PONS, a bridge about two miles from Rome, over the Tiber, in a northerly direction. It was also called Mulvius. Its construction is ascribed to M. Æmilius Scaurus, who was censor A.U.C. 644, and its ancient appellation is probably a corruption of his *nomen*. The modern name is *Ponte Molle*. If it be true that the bridge owed its erection to Æmilius, Livy, when he speaks of it (27, 51), must be supposed to mention it by anticipation. We learn from Cicero that the Pons Mulvius existed at the time of Catiline's conspiracy, since the deputies of the Allobroges were here seized by his orders. In later times, it witnessed the defeat of Maxentius by Constantine. (*Zosim.*, 2, 16.—*Cramer's Anc. Italy*, vol. 1, p. 239.)

MILYAS. *Vid.* Lycia.

MIMALLONES, a name given to the priestesses of Bacchus among the Thracians, according to Hesychius and Suidas, or, more correctly, to the female Bacchantes in general. Suidas deduces the term from the Greek *μιμνήσκω*, "imitation," because the Bacchantes, under the influence of the god, imitated in their wild fury the actions of men. Others, however, derive it from Mimas, a mountain of Thrace. Nonnus enumerates the Mimallones among the companions of Bacchus in his Indian expedition. (Compare *Persius*, *Sat.*, 1, 99.—*Ovid*, *A. A.*, 1, 541.—*Sidon.*, *Præf. Paneg. Anthem.*) Bochart gives as the etymology of the word the Hebrew *Memallelan* ("garrulous," "loquacious"); or else *Mamal*, "a wine-press." (*Rolle, Recherches sur le culte de Bacchus*, vol. 1, p. 136.)

MIMAS, I. one of the giants that warred against the gods. (Compare *Eurip.*, *Ion*, 215.—*Senec.*, *Herc. Fur.*, 981.—*Apoll. Rhod.*, 3, 1227.)—II. A mountain range of Ionia, terminating in the promontory Argennum, opposite the lower extremity of Chios. (*Thucyd.*, 8, 34.—*Plin.*, 5, 29.—*Amm. Marc.*, 31, 42.)

MINNERNUS, an elegiac poet, a native of Colophon in Ionia, and contemporary with Solon. Müller, quoting a fragment of Minnernus' elegy entitled "Nanno," says that he was one of the colonists of Smyrna from Colophon, and whose ancestors, at a still earlier period, came from Neleus Pylus. (*Hist. Lit. Gr.*, p. 115.) Müller also ascribes the melancholy character of his poems to the reduction of Smyrna by Alyattes. From Horace and Propertius we gather, that his poems had reference, for the most part, to those appetites which, in poetical language, are expressed by the name of love. (*Horat.*, *Epist.*, 1, 6, 65.—*Propert.*, 1, 9, 11.) His mind, however, was of a melancholy turn, which gave to his writings a pen-

sive cast, not traceable in the productions of others who belonged to the same school. In the few fragments which we have remaining of Minnernus, he complains of the briefness of human enjoyment, the shortness of the season of youth, and of the many miseries to which man is exposed. Minnernus was the first who adapted the elegiac verse to those subjects which, from this adaptation, are now usually considered as proper for it; Callinus, its inventor, having used it as a vehicle for warlike strains. The ancient writers speak with great admiration of his poem on Nanno, a young female musician of whom he was deeply enamoured, and who preferred him to younger and handsomer rivals. The sweetness of his verses obtained for him also from the ancients the appellation of *Ligystrades* (*Λιγυστράδης*, from *λύγος*, "melodious.")—The fragments of Minnernus have been several times edited, in the collections of Stephens, Brunck, Gaisford, and Boissonade; to which may be added Bäch's separate edition, published at Leipzig in 1826. (*Wieland, Attisches Museum*, vol. 1, p. 338.—*Schöll, Hist. Lit. Gr.*, vol. 1, p. 191.—*Encycl. Us. Knowl.*, vol. 15, p. 230.—*Müller, Hist. Lit. Gr.*, p. 115, *seqq.*)

MINA (*Μνᾶ*), a name given by the Athenians, not to a particular coin, as is commonly but erroneously imagined, but merely to a certain sum, or, in other words, to so much money of account. The mina was equivalent, as a sum, to 100 drachmæ, which would make, in our currency, a little more than \$17 59 cts. The term was also employed as a weight, and was then equivalent to a little over 15 oz. avoirdupois weight.—This appears to be the proper place for a few remarks relative to Athenian coinage. No gold coins appear to have been minted at Athens, although the gold coinage of other places circulated there freely. (Consult *Cardwell's Lectures on the Coinage of the Greeks and Romans*, p. 112, *seqq.*) But the metal of the greatest importance to Athens was silver. It had been employed by them for their coinage from the earliest periods of their history; it was obtained in considerable quantity from their own neighbourhood (*vid.* Laurium); and it formed an important item in their national revenue. The high commendation given to this coinage by Aristophanes, refers, not to any delicacy of workmanship, but to the extreme purity of the metal; and the same cause seems to have deterred the Athenians from excelling in the execution of their coins, which induced them to preserve the greatest purity in the standard. The specimens, accordingly, of Athenian silver are very numerous, and, though evidently minted at periods very different from each other, retain so great a degree of correspondence, as implies either much political wisdom on the part of Athens, or, at least, a willing acquiescence in the authority of public opinion. The most important property, in fact, of the Athenian coinage was its purity, carried to so great an extent that no baser metal appears to have been united with it as an alloy. It may readily be supposed that the lead, which was found, together with the silver, in the mines of Laurium, was not always perfectly separated from it by the ancient process of refining: but the quantity of that metal which has hitherto been discovered in the silver coins of Athens is not likely to have been added designedly; and copper, which would have been more suitable for the purpose, does not appear to have been used at any period as an alloy, much less in the way of adulteration. Connected with this superiority, and with the rude method of minting which prevailed in former times, was the farther advantage possessed by the Athenian coin of being less exposed to wear from constant use than is the case with the thinner lamina and the larger surface of a modern coin; whether it were owing to the smaller degree of hardness in the metal they employ-

ed, or to their want of mechanical contrivances, or to their knowledge that a compact and globular body is least liable to loss from friction, the Athenian coin was minted in a form more massive than our own, and much less convenient for tale or transfer, but better calculated to maintain its value unimpaired by the wear of constant circulation.—The only question that remains to be considered here is this: to what cause was it owing that the coins of Athens should have been executed throughout in a style of inelegance and coarseness; at a time, too, when the coins of other districts, far inferior in science and reputation to Athens, were finished in the most perfect workmanship? The fact is certainly remarkable; and the only explanation that has hitherto been given of it, may tend to illustrate still farther the beneficial effects of commerce in its influence on the Athenian mint. The ancient coinage, says Eckhel, had recommended itself so strongly by its purity, and had become so universally known among Greeks and barbarians by its primitive emblems, that it would have been impossible to have made any considerable change in the form or workmanship of the coin, without creating a degree of suspicion against it, and eventually contracting its circulation. (*Walpole's Collection*, vol. 1, p. 438.—*Cardwell's Lectures*, p. 9, *seqq.*)

MINOÏUS, now *Mincio*, a river of Gallia Cisalpina, flowing from the Lake Benacus, and falling into the Po. (*Virg., Eclog.*, 7, 13.—*Id., Georg.*, 3, 15.—*Id., Æn.*, 10, 206.)

MINIÏDES or MINYÏDES, the daughters of Minyas, king of Orchomenus, in Boeotia. They were three in number, Leucippe, Aristippe, and Alcaethœ. These females derided the rites of Bacchus, and continued plying their looms, while the other women ran through the mountains. Bacchus came as a maiden and remonstrated, but in vain; he then assumed the form of various wild beasts; serpents filled their baskets; vines and ivy twined round their looms, while wine and milk distilled from the roof; but their obstinacy was unsubdued. He finally drove them mad; they tore to pieces the son of Leucippe, and then went roaming through the mountains, till Mercury touched them with his wand, and turned them into a bat, an owl, and a crow. (*Corinna et Nicand., ap. Anton. Lib.*, 10.—*Ælian*, V. H., 3, 42.—*Ovid, Met.*, 4, 1, *seqq.*—*Keightley's Mythology*, p. 213.)

MINERVA, an ancient Italian divinity, the same in general with the Pallas-Athene (Παλλὰς Ἀθήνη) of the Greeks, and to be considered, therefore, in common with her, in one and the same article.—Minerva or Athene was regarded in the popular mythology as the goddess of wisdom and skill, and, in a word, of all the liberal arts and sciences. In both the Homeric poems she is spoken of as the daughter of Jupiter, and in one place it seems to be intimated that she had no other parent. (*Il.*, 5, 875, *seqq.*) In later writers, however, the legend assumes a more extended form. It is said that Jupiter, after his union with Metis, was informed by Heaven and Earth that the first child born from this marriage, a maiden, would equal him in strength and counsel; and that the second, a son, would be king of gods and men. Alarmed at this prediction, the monarch of Olympus swallowed his spouse, who was then pregnant; but being seized, after a time, with racking pains in the head, the god summoned Vulcan to his aid, who, in obedience to the commands of Jupiter, cleft the head of the latter with a blow of his brazen hatchet, and Minerva immediately leaped forth, in panoply, from the brain of her sire. (*Theog.*, 886, *seqq.*—*Id.*, 924.—*Schol. ad Theog.*, 890.—*Pind.*, *Ol.*, 7, 63.—*Schol. ad loc.*—*Schol. ad Apoll. Rhod.*, 4, 1310.) Still later authorities assign the task of opening the head of Jove to Prometheus (*Euripides, Ion*, 462.—*Apollod.*, 1, 3), or to Hermes (*Schol. ad Pind.*, *Ol.*, 7, 66).—Minerva is in Homer,

as in the general popular system, the goddess of wisdom and skill. She is in war opposed to Mars, the wild war-god, as the patroness and teacher of just and scientific warfare. She is therefore on the side of the Greeks, as he on that of the Trojans. But on the shield of Achilles, where the people of the besieged town are represented as going forth to lie in ambush, they are led by Mars and Minerva together (*Il.*, 18, 516), possibly to denote the union of skill and courage required for that service. (*Il.*, 13, 277.) Every prudent chief was esteemed to be under the patronage of Minerva, and Ulysses was therefore her especial favourite, whom she relieved from all his perils, and whose son Telemachus she also took under her protection, assuming a human form to be his guide and director. In like manner, Cadmus, Hercules, Perseus, and other heroes were favoured and aided by this goddess. As the patroness of arts and industry in general, Minerva was regarded as the inspirer and teacher of able artists. Thus she taught Epheus to frame the wooden horse, by means of which Troy was taken; and she also superintended the building of the Argo. She was likewise expert in female accomplishments; she wove her own robe and that of Juno, which last she is said to have embroidered very richly. (*Il.*, 6, 735.—*Id.*, 14, 178.) When the hero Jason was setting out in quest of the golden fleece, Minerva gave him a cloak wrought by herself. (*Apoll. Rhod.*, 1, 721.) She taught this art also to mortal females who had won her affection. (*Od.*, 20, 72.) When Pandora was formed by Vulcan for the ruin of man, she was attired by Minerva. (*Theog.*, 573.) In the Homeric hymn to Vulcan (*H.*, 20), this deity and Minerva are mentioned as the joint benefactors and civilizers of mankind by means of the arts which they taught them, and we shall find them in intimate union also in the mythic system of Attica.—The invention of the pipe (αὐλός) is also ascribed to this goddess. When Perseus, says Pindar (*Pyth.*, 12, 15, *seqq.*—*Schol. ad loc.*), had slain Medusa, her two remaining sisters bitterly lamented her death. The snakes which formed their ringlets mourned in concert with them, and Minerva, hearing the sound, was pleased with it, and resolved to imitate it: she in consequence invented the pipe, whose music was named *many-headed* (πολυκέφαλος), on account of the number of serpents whose mournful hissings had given origin to the instrument. Others (*Hygin., fab.*, 165) say that the goddess formed the pipe from the bone of a stag, and, bringing it with her to the banquet of the gods, began to play upon it. Being laughed at by Juno and Venus, on account of her green eyes and swollen cheeks, she went to a fountain on Mount Ida, and played before the liquid mirror. Satisfied that the goddesses had had reason for their mirth, she threw the pipe away. Marsyas unfortunately found it, and, learning to play on it, ventured to become the rival of Apollo. His fate is related elsewhere (*vid. Marsyas*).—The favourite plant of Minerva was the olive, to which she had given origin in her well-known contest with Neptune (*vid. Cecrops*), and the animals consecrated to her were the owl and the serpent. Minerva was most honoured at Athens, the city to which she gave name (Ἀθῆναι, from Ἀθήνη), where the splendid festival of the Panathenæa was celebrated in her honour. This goddess is represented with a serious and thoughtful countenance, her eyes are large and steady, her hair hangs in ringlets over her shoulders, a helmet covers her head; she wears a long tunic and mantle, she bears the ægis on her breast or on her arm, and the head of the Gorgon is in its centre.—According to the explanation of Müller, the name *Pallas-Athene* appears to mean “the Athenian maid” (Παλλὰς being the same as πᾶλλας, which originally meant “maid”); and she thus forms a parallel to “the Eleusinian maid” (Κόρα) or Proserpina. As this is her constant title in Homer, it is manifest that

she had long been regarded as the tutelary deity of Athens. We may therefore safely reject the legends of her being the same with the Neith (*Hesych.*, Νῆιθ) of Saïs in Egypt, or a war-goddess imported from the banks of the Lake Tritonis in Libya, and view in her one of the deities worshipped by the agricultural Pelasgians, and therefore probably one of the powers engaged in causing the productiveness of the earth. Her being represented, in the poetic creed, as the goddess of arts and war alone, is merely a transition from physical to moral agents, that will presently be explained. (*Müller, Proleg.*, p. 244.—*Schwenck, Andeut.*, p. 230.—*Welcker, Trilog.*, p. 282.)—The etymology of the Latin name *Minerva* is doubtful. The first part probably contains the same root (*min, men, or man*) that we have in the Latin *me-min-i, men-s, &c.*, and also in the Greek *μιν-ος, μιν-ος, &c.*, and the Sanscrit *man-as*. Cicero (*N. D.*, 3, 24) gives a very curious etymology, "*Minerva, quia minuit, aut quia minatur*;" but some of the ancient grammarians appear to have been more rational in considering it a shortened form of *Meminerva*, since she was also the goddess of memory. Festus connects it with the verb *monere*. Müller supposes that the word, like the worship of the goddess herself, came to the Romans from Etruria, and he makes the Etrurian original to have been *Menerfa* or *Menrfa*. (*Etrusk.*, vol. 2, p. 48.)—There were some peculiarities in the worship of Minerva by the Romans that deserve to be mentioned. Her statue was usually placed in schools; and the pupils were accustomed every year to present their masters with a gift called *Minerval*. (*Varro, R. R.*, 3, 2.—Compare *Tertull., de Idol.*, c. 10.) Minerva also presided over olive-grounds (*Varro, R. R.*, 1, 1); and goats were not sacrificed to her, according to Varro, because that animal was thought to do peculiar injury to the olive. (*R. R.*, 1, 2.) There was an annual festival of Minerva, celebrated at Rome in the month of March, which was called *Quinquatrus*, because it lasted five days. (*Varro, L. L.*, 5, 3.—*Ovid, Fast.*, 3, 809.—*Aul. Gell.*, 2, 21.) On the first day sacrifices were offered to the goddess, and on the other four there were gladiatorial combats, &c. There was also another festival of Minerva, celebrated in June, which was called *Quinquatrus Minores*. (*Ovid, Fast.*, 6, 661.)—There were several temples in Rome sacred to Minerva. Ovid mentions one on the Cælian Hill, in which she was worshipped under the name of *Minerva Capta*, but the origin of the appellation is unknown. (*Fast.*, 3, 835, *seqq.*) It also appears from several inscriptions, in which she is called *Minerva Medica*, that this goddess was thought to preside over the healing art. (*Encycl. Us. Knowl.*, vol. 15, p. 232.)—The most probable theory relative to Pallas-Athene, or Minerva, is that of Müller, which sees in her the temperate celestial heat, and its principal agent on vegetation, the moon. (*Müller, Minerva Polias*, p. 5.) This idea was not unknown to the ancients themselves. Athene is by Aristotle expressly called "the moon" (*ap. Arnob., adv. Gent.*, 3, p. 69.—Compare *Istr. ap. Harpocr.*, Τριταυγίς.—*Crenzer, Symbolik*, vol. 4, p. 237.) On the coins of Attica, anterior to the time of Pericles, there was a moon along with the owl and olive-branch. (*Eckhel, D. N.*, vol. 2, p. 183, 209.) There was a torch-race (*λαμπάδοφορία*) at the Panathenæa, a contest with which none but light-bearing deities were honoured, such as Vulcan, Prometheus, Pan (whom the ancients thence denominated *Phanetes*), &c. At the festival of the Skirophoria, the priest of the sun and the priestess of Athene went together in procession. (*Aristoph., Eccles.*, 18.) A title of Athene was "*All-Deu*" (*Pandrosos*). In the ancient legends of Athens, mention was made of a sacred marriage (*ἱερός γάμος*) between Athene and Vulcan ("*cur postea Attici, ne virginis dea intermeretur, commentorum spurcitiem obduserunt.*"—*Müller*, 6 P

ler). This goddess is also said to have given fire to the Athenians (*Plut., Vit. Cim.*, 10), and perpetual flame was maintained in her temples at Athens and Alalcomenæ. (*Pausan.*, 1, 26, 7.—*Id.*, 9, 34, 1.) It could hardly have been from any other cause than that of her being regarded as the moon, that the nocturnal owl, whose broad, full eyes shine so brightly in the dark, was consecrated to her; although some indeed maintain that this bird was sacred to her as the goddess of wisdom, since the peculiar formation of its head gives it a particular air of intelligence. (*Lawrence's Lectures*, p. 147, *Am. ed.*) The shield or corselet, moreover, with the Gorgon's head on it, seems to represent the full-orbed moon; and finally, the epithet *Glaucopsis*, which is, as it were, appropriated to Athene, is also given to Selene, or the Moon. (*Empedocles, ap. Plut., de Fac.*, in *Orb. Lun.*, 16, 21.—*Eurip., Fr. incert.*, 209.) In accordance with this theory, the epithet *Trilogenia* (Τριτογένεια), so often applied to Minerva, has been ingeniously explained by considering it indicative of the three phases of the moon, just as the term *Τριταυγίς* is applied to Hebe. (*Welcker, Trilogie*, p. 283.) There are two other interpretations of this epithet, which have had general currency, both of which, however, are inferior to the one just mentioned. The first of these supposes it to signify *Head-sprung*, as the word *τρωίς* is said to have signified *head* in some of the obscurer dialects of Greece (that of the Athamans, according to Nicander of Colophon, *Hesych.*, s. v.: *Etym. Mag.*, and *Photius*, s. v.: that of the Cretans, *Eustath.*, ad *Il.*, 4, p. 524; 8, p. 696: *Od.*, 3, p. 1473: that of the Boeotians, *Tzetts. ad Lyc.*, 519). But accounts like this are very suspicious, and the later Greeks would have made little scruple about coining a term, if they wanted it to suit any purpose. The other interpretation, which makes the banks of the river or lake Triton the birthplace of Minerva, has found a great number of supporters; but, as so many countries sought to appropriate this Triton to themselves, the choice among them might seem difficult. The contest, however, has lain between the river or lake Triton in Libya, and a small stream of the same name in Boeotia. The ancients in general were in favour of the former; but, as there is no reason to suppose that the Greeks knew anything of the Libyan Triton in the days of Homer, or probably till after the colony had been settled at Cyrene, this theory seems to have little in its favour. Müller, therefore, at once rejects it, and fixes on the banks of the Boeotian brook as the natal spot of the goddess. (*Orchom.*, p. 355.) Here, however, Homer again presents a difficulty, for the practice of assigning birthplaces on earth to the gods does not seem to have prevailed in his age.—The moon-goddess of the Athenians probably came by her moral and political character in the following manner. It was the practice of the different classes and orders in a state to appropriate the general tutelary deity to themselves by some suitable appellation. The Attic peasantry, therefore, named Athene the *Ox-yoker* (*Bovdeia*), the citizens called her the *Worker* (*Εργάτις*), while the military men styled her *Front-fighter* (*Πρόμαχος*). As these last were the ruling order, their view of the character of the goddess became the prevalent one; yet even in the epic poetry we find the idea of the goddess presiding over the arts still retained. (*Müller, Minerva Polias*, p. 1.—*Keightley's Mythology*, p. 153, *seqq.*)

MINERVÆ PROMONTORIUM, a promontory of Campania, closing the Bay of Naples to the southwest. It was sometimes called *Surrentinum Promontorium*, from the town of Surrentum in its vicinity; and also not unfrequently the Sirene's Cape. (*Strab.*, 247.) It is now *Punto della Campanella*. The name of *Minervæ Promontorium* was given it from a temple of that goddess which stood here, and which was said to

have been raised by Ulysses. (*Strab.*, l. c.—*Cramer's Anc. Italy*, vol. 2, p. 185.)

MINERVIA, festivals at Rome in honour of Minerva. (*Vid.* Minerva, page 849, col. 1, line 37, *seqq.*)

MINIO, a small river of Etruria, falling into the Mare Tyrrhenum or Lower sea, a short distance above Centum Cellæ. It is now the *Mignone*. (*Virg.*, *Æn.*, 10, 183.—*Rutil.*, *Ilm.*, 1, 277.)

MINNÆI or MINCÆI, a people in the southern extremity of Arabia Felix. Their country was called Minnæa, and their capital Carana. The name of the latter is preserved in *Almakarana*, which is a strong fortress. (*Diod.*, 3, 42.—*Agatharch.*, in *Hudson's Geogr. Min.*, vol. 1, p. 57.—*Plin.*, 6, 28.)

MINŌIS, a patronymic of Ariadne, as daughter of Minos. (*Ovid.*, *Met.*, 8, 157.)

MINOS, an ancient king, who in history appears as the lawgiver of Crete. Those critics who consider all the personages of mythological history as little more than names to which is attached the history of social development, would view Minos simply as the concentration of that spirit of order, which about his time began to exhibit in the island of Crete forms of a regular polity. But we are not to consider, because there is much undoubtedly mythological about the history of Minos, that therefore he never existed. The concurrent testimony of Thucydides and Aristotle shows it to have been the general belief in their times, that Minos was the first among the Greeks who possessed any amount of naval power. According to the latter author, he conquered and colonized several islands, and at last perished in an expedition against Sicily, to which island he was fabled to have pursued Dædalus after the affair of Pasiphaë, and where the daughters of Cocalus suffocated him in a warm bath. (*Vid.* Cocalus.) In the second book of the "Politics," Aristotle draws a parallel between the Cretan and Spartan institutions, and he there ascribes the establishment of the Cretan laws to Minos. This comparison, aided probably by the connexion which existed between Crete and Sparta, owing to colonies, as early as the time of Homer, has no doubt suggested the theory invented and supported by Müller, that Minos was a Doric prince; a theory, as Mr. Thirlwall asserts, utterly unknown to the ancients. The subject is ably discussed by him in his "History of Greece" (vol. 1, p. 135). Some post-Homeric authorities make Minos a judge in Hades in company with Æacus, Rhadamanthus being chief judge. In this character he appears in a short Platonic dialogue called "Minos," or "On law," which, however, some critics consider spurious. Minos, according to the legend, was a son of Jupiter; this being the usual method taken by mythographers to express a person so ancient that they could put him on a level with no mere mortal; and from Jupiter as his father he is said to have learned those laws which he afterward delivered unto men. For this purpose, he is related to have retired to a cave in Crete, where he feigned that Jupiter his father dictated them unto him, and every time he returned from the cave he announced some new law.—Minos is chiefly remarkable as belonging to a period when history and mythology interlace, and as uniting in his own person the chief characteristics of both. He is the son of Jupiter, and yet the first possessor of a navy; a judge in Hades, but not the less for that a king of Crete. It is very curious that Crete, so famous at this age both for its naval power and for being the birthplace of the Olympian gods, should never afterward have attained anything like that celebrity which its position seemed to promise. Its office seems to have been that of leading the way in naval supremacy. Too insulated for power of a durable nature, it was lost in the confederate or opposing glories of Athens and Sparta; but while they were yet in their infancy, its insular form (together, perhaps, with some Asiatic refinement) gave it that concentrated energy which in

an early age is irresistible. (*Hom.*, *Il.*, 2, 65.—*Id.* *ib.*, 13, 450.—*Id.* *ib.*, 14, 321.—*Id.*, *Od.*, 19, 175.—*Thucyd.*, 1, 3.—*Plat.*, *Leg.*, lib. 1 et 2.—*Id.*, *Min.*—*Aristot.*, *Polit.*, lib. 2 et 7.—*Encycl. Us. Knowl.*, vol. 15, p. 248.)

MINOTAURUS, a celebrated monster, half man and half bull, the offspring of Pasiphaë, wife of Minos, by a bull. According to the legend, the Cretans had hesitated to give Minos the royal dignity after the death of Asterion, whereupon, to prove his claim to it, he asserted that he could obtain whatever he prayed for. Then, sacrificing to Neptune, he besought him to send him a bull from the bottom of the sea, promising to offer up whatever should appear. Neptune sent the bull, and Minos received the kingdom. The bull, however, being of a large size and of a brilliant white hue, appeared to Minos too beautiful an animal to be slain, and he put him in his herd, and substituted an ordinary bull. Neptune, offended at this act, made the bull run wild, and inspired Pasiphaë with a strange passion for him, which she was enabled to gratify by the contrivance of Dædalus. Her offspring was the Minotaur. Minos, in compliance with an oracle, made Dædalus build for him the labyrinth. In this he placed the Minotaur, where he fed him on human flesh, and afterward on the youths and maidens sent from Athens. (*Vid.* Androgeus.) Theseus, by the aid of Ariadne, killed the monster (*vid.* Theseus and Labyrinthus), thereby delivering the Athenians from the cruel obligation of sending their children to be devoured.—Such is the mythological story. Its meaning is uncertain. It very likely belongs to that class of mythological tales which express a political fact, and the connexion in which Theseus stands with the Minotaur adds probability to this theory; for the exploits of Theseus are generally such effects as would be produced in historical times by the course of events in the formation of a polity. Such, at least, are his exploits in and about Attica, and there appears no sound reason to exclude this from the number. It may then, perhaps, be assumed, that, under the slaying of the Minotaur, is shadowed forth the abolition of certain obstacles existing in the way of free intercourse between Athens and Crete. But the descent of the Minotaur from Pasiphaë (*Πασίφαϊς*), probably a name of the moon, and from the Bull, one of the zodiacal signs, may perhaps imply some astronomical fact connected with the recurrence of the tribute paid to Crete. The affection of Ariadne for Theseus, in mythological language, may be taken to mean a union of Cretan and Attic tribes. It should be observed that Schwenck, in his very fanciful but ingenious treatise on mythology, considers the first two syllables of the word Minotaur to be identical with *μήτις* or *μῆτις*, *μῆτις* (*the moon*), as also with the root of the German *mond* and the English *moon*, so that we get the two parents of the Minotaur in the two parts of its name. This might lead us to believe that the name suggested the genealogy, and that the latter part referred, not to a bull's being the father of the Minotaur, but to the fact that horns were a symbol of the moon-goddess. In this case, the slaying of the Minotaur by Theseus might mean the introduction of the Attic worship in place of the previously prevalent Doric form. (*Höck, Kreta*, vol. 2, p. 63.—*Schwenck, Andeut.*, p. 65.—*Encycl. Useful Knowl.*, vol. 15, p. 248.)

MINTHE, a daughter of Cocytus, loved by Pluto. Proserpina discovered her husband's amour, and changed his mistress into an herb, called by the same name, and still, at the present day, denominated *mint*. (*Ovid.*, *Met.*, 10, 729.)

MINTURUM, a town of Latium, on the river Liris, and only three or four miles from its mouth: its extensive ruins sufficiently mark the place which it occupied: out of these the neighbouring town of *Trajetta* was built. (*Strabo*, 233.—*Plin.*, p. 66.—*Plin.*, 3, 5.) We are informed by Livy (3, 25) that this town

belonged to the Ausones; but when that nation ceased to exist, Minturnæ fell into the hands of the Romans, by whom it was colonized, A.U.C. 456. (*Liv.*, 10, 21.—*Vell. Pat.*, 1, 14.—*Dion. Hal.*, 1, 9.)—It was one of those maritime towns which were required to furnish sailors and naval stores for the Roman fleets. (*Liv.*, 27, 38.—*Id.*, 26, 3.) According to Frontinus, another colony was afterward sent thither under the direction of Julius Cæsar. Minturnæ, however, is chiefly known in history from the events by which it was connected with the fallen fortunes of Marius. This general, in endeavouring to effect his escape into Africa from the pursuit of the victorious Sylla, was forced to put in at the mouth of the Liris; when, after being put on shore and abandoned by the crew of the vessel, he sought shelter in the cottage of an old peasant. But this retreat not affording the concealment requisite to screen him from the pursuit which was now set on foot, Marius had no other resource left but to plunge into the marshes, with which the neighbourhood of Minturnæ abounds. Here, though almost buried in the mud, he could not escape from his vigilant pursuers, but was dragged out and thrown into a dungeon at Minturnæ. A public slave was shortly after sent to despatch him; but this man, a Cimbrian by birth, could not, as the historians relate, face the destroyer of his nation, though unarmed, in chains, and in his seventieth year; such was still the glare of his eye and terror of his voice. Struck with this circumstance, the magistrates of Minturnæ determined to set Marius at liberty, since such seemed to be the will of heaven. They farther equipped a vessel which was destined to convey him to Africa. (*Plut.*, *Vit. Mar.*—*Juv.*, *Sat.*, 10, 276.—Compare *Liv.*, *Epit.*, 77.—*Appian.*, *Bell. Civ.*, 1, 61.—*Vell. Pat.*, 2, 19.—*Val. Max.*, 1, 5.) The grove and temple of the nymph Marcia, supposed by some to have been the mother of Latinus, and by others thought to be Circe (*Virg.*, *Æn.*, 7, 47.—*Lactant.*, *de fals. Rel.*, 1, 21), were close to Minturnæ, and held in the highest veneration. (*Cramer's Anc. Italy*, vol. 2, p. 131.)

MINUTIA VIA, a Roman road, leading from the *Porta Minutia* or *Trigemina*, through the country of the Sabines, as far as Brundisium. (*Schol. ad Horat.*, *Epist.*, 1, 18, 20.)

MINUTIUS, I. Augurinus, a Roman consul B.C. 458. He was defeated by the Æqui, and would have lost his whole army had not the dictator Cincinnatus come to his aid. He was degraded by the latter to the rank of lieutenant or *legatus*, and at the same time deprived by him of his consular authority. (*Liv.*, 3, 29.)—II. Rufus, a master of horse to the dictator Fabius Maximus. His disobedience to the commands of the dictator, who was unwilling to hazard an action, was productive of an extension of his prerogative, and the master of the horse was declared equal in power to the dictator. Minutius, soon after this, fought with ill success against Hannibal, and was only saved by the interference of Fabius; which circumstance had such an effect upon him, that he laid down his power at the feet of his deliverer, and swore that he would never act but by his directions. He was killed at the battle of Cannæ. (*Liv.*, 23, 21.—*Nep.*, *Vit. Hannib.*, 6.)—III. Felix, a native of Africa, who is generally supposed to have flourished a short time after Tertullian, though some have undertaken to prove that he was contemporary with Marcus Aurelius. (*Van Hooker, Epist. Crit. de vera aetate, &c.* *M. Minutii Felicis, Campis*, 1762, 4to.) Lactantius (*Inst. Div.*, 5, 1) and St. Jerome (*Catal.*, *S. S. Eccles.*, c. 58) state that he followed with reputation the employment of an advocate at Rome. We have only one work of his remaining, a dialogue entitled *Octavius*, and containing a demonstration of the truth of Christianity. It is an interesting production for those who wish to

become acquainted with the charges the pagans were accustomed to make against the new religion, and which Minutius Felix gives in a fairer manner than any other. It is apparent that he has availed himself of the apology of Tertullian; but he has a mode of viewing his subject which is peculiarly his own, and his style is much purer and more elegant than that of his model. He may be regarded, in general, as one of the most elegant of the Latin ecclesiastical writers. The dialogue is between a heathen and a Christian, in which Minutius himself sits as a judge and moderator. By this contrivance he replies to the objections and arguments brought forward by the adversary, and refutes the calumny cast upon Christianity by the heathen philosophers, and at the same time, exposes the absurdities of their creed and worship, powerfully demonstrating the reasonableness and excellence of the Christian religion. Minutius Felix is said to have been originally a pagan.—Erasmus thought his work was lost. This mistake arose from the copyists of the middle ages having joined the production of Felix to the treatise of Arnobius against the Gentiles, of which it was regarded as the eighth book. Adrian Junius (de Jonghe), a celebrated critic of Holland, was the first to detect this false arrangement. Balduinus then printed the work of Felix separately. The honour of this discovery, however, on the part of Junius, has been contested by some. The best editions of his work are, that of Gronovius, *Lugd. Bat.*, 1709, 8vo, and that of Davis, *Cent.*, 1712, 8vo.)

MINYÆ, a race of great celebrity in the most ancient epic poetry of Greece, but whose name seems to have been almost forgotten before the beginning of the period when fable gives place to history. The adventurers who embarked in the Argonautic expedition were all called Minyans, though they were mostly Æolian chieftains, and the same name recurs in the principal settlements which referred their origin to the line of Æolus. Iolcos itself, though founded by Cretheus, is said to have been inhabited by Minyans; and a still closer affinity is indicated by a legend, which describes Minyas, the fabulous progenitor of the race, as a descendant of Æolus. (*Apoll. Rhod.*, 3, 1094.—*Schol.*, *ad loc.*) There are two ways in which this connexion may be explained, between which it is not easy to decide. The Minyans may have been a Pelægic tribe, originally distinct from the Hellenes: and this may seem to be confirmed by the tradition, that Cretheus, when he founded Iolcos, drove out the Pelægiæans who were previously in possession of the land. (*Pausan.*, 4, 36, 1.—*Schol.*, *ad Il.*, 2.) But in this case we are led to conclude, from the celebrity to which the Minyans attained in the Greek legends, that they were not a rude and feeble horde, which the Æolians reduced to subjection, but were already so far advanced in civilization and power, that the invaders were not ashamed of adopting their name and traditions, and of treating them as a kindred people. It may, however, also be conceived, and perhaps accords better with all that we hear of them, that the appellation of Minyans was not originally a national name, peculiar to a single tribe, but a title of honour, equivalent to that of "heroes" or "warriors," which was finally appropriated to the adventurous Æolians, who established themselves at Iolcos and on the adjacent coast. If we take this view of it, all the indications we find of the wealth and prosperity of the Minyans will serve to mark the progress of the Æolian states in which the name occurs; and it will only remain doubtful, whether the Æolians or Hellenes were not more closely connected with other tribes in the north of Thessaly, among which the name of the Minyans likewise appears, than the common tradition would lead us to suppose. We hear of a town called Minya on the borders of Thessaly and Macedonia (compare *Steph. Byz.*, s. v. *Μινύα*, and *Ἀλμυρία*),

and of a Thessalian Orchomenus Minysus. (*Phny*, 4, 8.) In considering the elements of which the Hellenic race was composed, it must not be overlooked that the Dolopes, who were seated on the western confines of Phthia, and are described in the *Iliad* (9, 484) as originally subject to its king, retained their name and an independent existence, as members of the great Hellenic confederacy, to a very late period. (*Pausan.*, 10, 8, 2, *seq.*) If, according to either of the views just suggested, we consider Minyans and Æolians as the same people, we find the most flourishing of the Æolian settlements in the north of Boeotia. Here the city of Orchomenus rose to great power and opulence in the earliest period of which any recollection was preserved. Homer compares the treasures which flowed into it to those of the Egyptian Thebes. The traveller Pausanias, who was familiar with all the wonders of art in Greece and Asia, speaks with admiration of its most ancient monument, as not inferior to any which he had seen elsewhere. This was the treasury of Minyas, from whom the ancient Orchomenians were fabled to have been called Minyans; and the city continued always to be distinguished from others of the same name, as the Minyean Orchomenus. Minyas, according to the legend, was the first of men who raised a building for such a purpose. His genealogy glitters with names which express the traditional opinion of his unbounded wealth. Thus he is the son of Chryseus, whose mother is Chrysogonea, &c. (*Pausan.*, 9, 36, 4.—*Thirlwall's Hist. Gr.*, vol. 1, p. 91.—Compare *Müller, Orchomenus und die Minyer*, p. 139, *seq.*)

MINYAS, a king of Orchomenus in Boeotia, son of Chryseus, and grandson of Neptune. He was famed for his opulence, and for the treasury or structure which he built to contain his riches. (Consult remarks towards the end of the article Minyas.)

MISENUM, I. PROMONTORIUM, a promontory of Campania, forming the upper extremity of the Bay of Naples, now Cape Miseno. It was so named, according to Virgil (*Æn.*, 6, 234), from Misenus, the trumpeter of Æneas, who was drowned and interred here. (Compare *Propert.*, 3, 18.—*Stat. Silv.*, 3, 1.) Other accounts speak of Misenus as a companion of Ulysses. (*Strabo*, 245.)—II. A town and harbour on the promontory of the same name. Misenum was probably first used by the Cumæans as a harbour (*Dion. Hal.*, 7, 5). In the reign of Augustus it became one of the first naval stations of the Roman empire, being destined to guard the coast of the Tuscan Sea. (*Suet. Aug.*, 48.—*Florus*, 1, 10.) In process of time, a town grew up around the harbour, the inhabitants of which were called Misenenses. (*Veget.*, 5, 1.) The neighbourhood of this place abounded with marine villas, among which may be mentioned that of C. Marius, too luxurious, as Plutarch observes, for such a soldier. (Compare *Plin.*, 18, 6.) It was purchased afterward by Lucullus for 500,200 denarii. According to Seneca (*Ep.*, 51), it stood on the brow of the hill overlooking the sea. Some years after it came into the possession of Tiberius, as we learn from Phædrus (2, 36), who has made it the scene of one of his fables. It was here that emperor ended his days. (*Suet. Tib.*, 74.)—Pliny the elder was stationed at Misenum, as commander of the fleet, at the time of the great eruption of Vesuvius, in which he perished. (*Cramer's Anc. Italy*, vol. 2, p. 154, *seq.*)

MISENUS, a Trojan, conspicuous for both his prowess in arms and his skill on the clarion or *lituus*. He often signalized himself by the side of Hector in the fight; and, after the fall of Troy, accompanied Æneas to Italy, on the shores of which country, near the city of Cumæ, he lost his life, having been drowned amid the breakers by a Triton who was envious of his musical skill. (*Virg., Æn.*, 6, 164.) Virgil calls him *Æolides*, not as indicating any divine descent from

Æolus, the god of the winds, but merely as a patronymic denoting his origin from a mortal father named Æolus. The same poet is guilty of an anachronism in making Misenus acquainted with the *lituus*, since both the *lituus* and *tuba* were unknown in Homeric times. He has merely, however, followed in this the custom of the tragic writers. (Consult *Heyne, Excurs.* vii., ad *Æn.*, 6.)—The ashes of Misenus were interred on the promontory, fabled to have been called Misenum after his name, and which is now still denominated *Miseno*. (*Virg., Æn.*, 6, 232, *seq.*)

MISTHREUS, father-in-law of Gordian III. (*Vid. Gordianus III.*)

MITHRA or MITRA, a deity of Persia, generally supposed to have been the Sun. His worship was, in process of time, introduced at Rome, and altars were there erected to him, with the inscription, "*Deo Soli Mithra*," or "*Deo Invicto Mithra*." He is generally represented in sculpture as a young man, his head surmounted with a Phrygian bonnet, and in the attitude of supporting his knee upon a bull that lies on the ground. He holds with one hand a horn of the animal, while with the other he plunges a dagger into its neck. Mithras here represents the generative Sun, in the full bloom of youth and power, while the bull indicates the earth, containing in its bosom the seeds or germs of things, which the sun-god causes to come forth in an abundant flood from the wound inflicted by his dagger of gold. (*Creuzer, Symbolik, par Guigniaut*, vol. 1, p. 356.)—The mysteries of Mithras were celebrated with much pomp and splendour on the revival of the Persian religion under the Sassanids, but we do not read of the worship of the sun under this name in the earlier Greek writers. (*Hyde, Hist. Rel. Vet. Pers.*, c. 4, p. 109.) The word is evidently the same as *mitra*, one of the names of the sun in Sanscrit. It also appears in many ancient Persian names, as *Mithradates* or *Mithradates* (*Herod.*, 1, 110); *Mithradates* (*Herod.*, 3, 120); *Ἰθακίτης* (*Herod.*, 9, 102); *Σιπολίτης* (*Herod.*, 7, 68); and in *Μιτράιος*, *Μιθρίνης*, or *Μιθρίνης* (*Xen., Hist. Gr.*, 2, 6.—*Arrian, Exp. Al.*, 1, 17.—*Id. ib.*, 3, 16), which appear to be derivatives. (*Pott, Etymol. Forsch.*, vol. 1, p. xlvii., *seq.*—*Rosen, in Journal of Education*, No. 9, p. 334, *seq.*—*Encycl. Us. Knowl.*, vol. 15, p. 289.)

MITHRADATES or MITHRIDATES, a common name among the Medes and Persians, which appears to have been formed from *Mithra* or *Mitra*, the Persian name for the sun, and the root *da*, signifying "to give," which occurs in most of the Indo-Germanic languages. The name, however, was written in several ways. In Herodotus (1, 110) we find *Μιτράδης*; in Xenophon (*Anab.*, 7, 8, 25), *Μιθρίδης*; in the Septuagint (*Ezra*, 1, 8.—*Id.*, 4, 7), *Μιθράδης*; and in Tacitus (*Ann.*, 12, 10), *Mithradates*. On the Greek coins it is written *Mithradates*. A large class of names in different dialects of the Indo-Germanic languages have the same termination as Mithradates. Thus, in Sanscrit, we find the names *Devadatta*, *Haradatta*, *Indradatta*, *Somadatta*, that is, "given by the gods," "given by Hara or Siva," "by Indra," "by Soma, or the moon;" and in Greek, such names as *Theodotus*, *Diodotus*, *Zenedotus*, and *Herodotus*. In Persian names the same termination occurs, as in the *Hormisdates* of Agathias; the *Pharandates* and *Pherendates* of Herodotus (7, 67; 9, 76); and the *Madates* of Curtius (5, 3).—The most celebrated race of princes of the name of Mithradates were the kings of Pontus, who were descended from Artabazes, one of the seven Persian nobles who overthrew the magi, B.C. 521. (*Florus*, 3, 5.—*Diod. Sic.*, 19, 40.—*Polyb.*, 5, 43.) The following is a list of these kings.—I. MITHRADATES I., of whom little is known. (*Aristot., de Rep.*, 5, 10.)—II. MITHRADATES II., succeeded Ariobarzanes II., B.C. 363. He took an active part in the various wars which were carried on

MITHRADATES.

by the successors of Alexander the Great; and, being an active and enterprising prince, he greatly extended his paternal dominions, whence he is frequently surnamed the founder (*κτιστής*) of the kingdom of Pontus. He also ruled over Cappadocia and Phrygia. He was put to death by Antigonus, B.C. 302, at Cius in Mysia, at the age of 84, according to Lucian (*Macrob.*, c. 13), because he was suspected of favouring the interests of Cassander.—III. MITHRADATES III., son of the preceding, ruled from B.C. 302 to 266.—IV. MITHRADATES IV., the son of Ariobarzanes III., was left a minor by his father. He attacked Sinope, which was taken by his successor Pharnaces, and carried on war against Eumenes II. He was in close alliance with the Rhodians; and joined with some princes of Asia Minor in making valuable presents to that people, to repair their losses after an earthquake. (*Polyb.*, 5, 89, *seq.*) He married the sister of Seleucus Callinicus, by which alliance he obtained Phrygia. His own daughter was married to Antiochus the Great.—V. MITHRADATES V., surnamed Euergetes, reigned from about 156 to 120 B.C. He was an ally of the Romans, and assisted them in the third Punic war with a considerable fleet. He was assassinated at Sinope, and succeeded by his son, the famous Mithradates.—VI. MITHRADATES VI., surnamed Eupator, and called the Great, was one of the most formidable enemies that the Romans ever encountered. He was only eleven years old at the death of his father, and, during his minority, his life was frequently in danger from the numerous conspiracies formed against him. He is said to have been in the habit of taking an antidote discovered by himself, which was sufficient to counteract the effect of the most violent poisons. (*Plin.*, 23, 77.—*Id.*, 25, 3.—*Id.*, 29, 8.) Mithradates possessed a strong mind and vigorous body; he excelled in all athletic sports, and was distinguished in his early years by his bodily strength and his daring spirit. He had also paid great attention to the study of philosophy and polite literature; and, according to Pliny, was able to converse in twenty-two different languages (20, 3). As soon as Mithradates was old enough to take the government into his own hands, he attacked the Colchians and the barbarous nations who dwelt on the eastern shores of the Black Sea, whom he reduced to subjection. The next acquisition which he made was Paphlagonia, which was said to have been left to the kings of Pontus by Pylæmenes II., king of Paphlagonia, who died about B.C. 121. Part of Paphlagonia he gave to Nicomedes II., king of Bithynia, who was, next to Mithradates, the most powerful monarch in Asia Minor. Nicomedes, however, was jealous of the increasing power of Mithradates; and on the death of Ariarathes VII., king of Paphlagonia, who had married a sister of Mithradates, Nicomedes married his widow, and seized the kingdom of Cappadocia, to the exclusion of the son of Ariarathes. Mithradates immediately took up arms in favour of his nephew, defeated Nicomedes, and placed his nephew on the throne, under the title of Ariarathes VIII. In a few months afterward this prince was murdered by his uncle at a private conference, who placed a son of his own on the vacant throne, and defeated successively the brother of the late king, and a pretender to the throne, whom Nicomedes represented as a son of Ariarathes. Unable to cope with his formidable enemy, Nicomedes applied to Rome; and the Romans, who had long been anxious to weaken the power of Mithradates, declared both Cappadocia and Paphlagonia to be free states, but allowed the Cappadocians, at their own request, to elect Ariobarzanes as their king. Mithradates, however, did not tamely submit to the loss of his dominions. He entered into an alliance with Tigranes, king of Armenia, to whom he gave his daughter in marriage; and with his assistance he expelled Ariobarzanes from his kingdom, and also deprived Ni-

MITHRADATES.

comedes III., who had lately succeeded his father, of Bithynia. The two expelled kings applied to the Romans for assistance, and the latter sent an army under Aquilius to reinstate them in their kingdoms. A war with the Romans was now inevitable, and Mithradates conducted it with the utmost vigour. The Roman armies were defeated one after another; Aquilius was taken prisoner, and put to death by having melted gold poured down his throat; and in B.C. 88 the whole of Asia Minor was in the hands of Mithradates. In the same year he commanded all Romans to leave the country; but, before they could do so, they were massacred by the inhabitants of the different provinces of Asia Minor, to the number, it is said, of 80,000. Whether this massacre took place by the command of Mithradates, or was occasioned by the hatred which the Asiatics bore to the Romans, is doubtful. The islands in the *Egean* followed the example of the countries of the mainland. Athens also submitted to the power of Mithradates, together with several other places in Greece. The Rhodians, the only people who offered him any vigorous resistance, were attacked, but without any success. In B.C. 87, Sylla arrived in Greece, and immediately commenced the siege of Athens, which was taken on the 1st of March in the following year. Sylla followed up his success by the defeat of Archelaus, the general of Mithradates, near Cheronæa, and shortly afterward by another victory at Orchomenus. During the successes of Sylla in Greece, the party of Marius had obtained the ascendancy at Rome; and Flaccus, who had been consul with Cinna, was sent to succeed Sylla in the command. Flaccus, however, was put to death by Fimbria, an unprincipled man, but who possessed considerable military talents and prosecuted the war against Mithradates in Asia with great success. The victories of Fimbria and the state of parties at Rome made Sylla anxious for peace, which was at length agreed upon (B.C. 84), on condition that Mithradates should abandon all his conquests in Asia, and restore Bithynia to Nicomedes, and Cappadocia to Ariobarzanes. But this war was scarcely ended before Mithradates was again involved in hostilities with the Romans. He had collected a large army to carry on war against the Colchians. Murena, who commanded in Asia, perceiving or pretending to perceive a disposition in Mithradates to renew the war, seized the opportunity of enriching himself, and, without any authority from the senate or Sylla, invaded the dominions of Mithradates, and collected much plunder. Mithradates, having in vain complained to the senate, collected an army to defend his dominions, and completely defeated Murena on the banks of the Halys. But, as Sylla was displeased with Murena for having attacked Mithradates, the peace was renewed, and thus an open rupture was avoided for the present. During the next eight years Mithradates employed himself in making preparations for a renewal of the war; and in B.C. 75 he broke the treaty which existed between him and the Romans by the invasion of Bithynia. Lucullus was appointed to the command B.C. 74, and commenced the campaign by besieging Cyzicus, a city on the Propontis, which had been supplied by Mithradates with every description of military stores. In the following year Mithradates made an effort to relieve the place, but was defeated by Lucullus and obliged to retire to Pontus. He was soon after followed by the Roman general, and, having lost another battle at Cabiri, on the borders of Pontus and Bithynia, he fled into Armenia, to his son-in-law Tigranes. His own son Machares, who had been appointed king of the wild-tribes on the eastern shores of the Euxine, refused to assist his father, and provided for his own safety by making peace with Lucullus. In B.C. 69 Tigranes was completely defeated by Lucullus, during the absence of Mithradates, near his capital Tigranocerta, which was soon after ta-

ken by the conqueror. In the following year Tigranes was again defeated, together with Mithradates, near Artaxata; but Lucullus was not able to derive all the advantages he might have done from his victories in consequence of the mutinous disposition of his troops. (*Vid. Lucullus.*) Mithradates was thus enabled to collect another army without opposition; and, having returned to Pontus, he defeated the Roman general Triarius, with the loss of 7000 men, before Lucullus could march to his assistance. This victory was followed by others; various parts of Asia Minor again submitted to his authority; and the Romans appeared to be on the point of losing all the acquisitions they had made during the war. But the power of Mithradates had been shaken to its foundation; and, on the appointment of Pompey to the command, B.C. 66, the war was soon brought to an end. Mithradates was defeated on the banks of the Euphrates; and, in consequence of Tigranes having submitted to Pompey, fled to the barbarous tribes dwelling to the north of Caucasus, who received him with hospitality and promised him support. The spirit of Mithradates had not yet been broken by adversity; and he purposed, with the assistance of the Colchians and Scythians, to carry into execution a plan which he is said to have formed in his earlier years, namely, of marching through Thrace and Macedonia, and invading Italy from the north. But these plans were frustrated by the plots of his eldest son Pharnaces, who gained over the army to his side, and deprived his father of the throne. Unwilling to fall into the hands of the Romans, Mithradates put an end to his own life, B.C. 63, at the age of 68 or 69, after a reign of 57 years. (*Appian, Bell. Mithrad.—Plut., Vit. Lucull.—Id., Vit. Syll.—Clinton, Fast. Hell., vol. 3, Appendix, 8.—Encycl. Us. Knowl., vol. 16, p. 289, seq.*)

MYTILENE, or, more correctly (if we follow the language of coins), MYTILENE, the capital of Lesbos, in the southeastern quarter of the island, facing the coast of Mysia. It was first built on a small island, connected by means of some low rocks with Lesbos itself. In process of time, the population increased so much as to require an enlargement of the ancient limits. The space between Lesbos and the small island was filled up, and the city was extended to the main island of Lesbos. In this way the place became possessed of two harbours, which the small island and the causeway connecting it with Lesbos separated from each other. The larger harbour was the northern one, and was also protected by works from the violence of the wind. (*Strabo, 617.—Diod. Sic., 13, 79.*) The city is said to have been named from the elder daughter of Macareus. (*Steph. Byz., s. v. Μυτιλήνη.—Diod. Sic., 5, 80.*) The fortunes of this place were always intimately connected with those of Lesbos itself. In the beginning of the Peloponnesian war, the people of Mytilene being accused of a secret negotiation with the Lacedæmonians, Athens sent a fleet against them. The other cities in the island, except Methymna, made common cause with Mytilene. After some resistance, however, the Athenians gained a complete victory, when the walls of Mytilene were razed, and many of its wealthier inhabitants put to death. The Athenians even sent an order to their commander to put to death all the males who had attained the age of puberty, but they became ashamed of their own barbarity, and despatched messengers to revoke the order. The countermand arrived just one day previous to that appointed for the slaughter. (*Thucyd., 3, 38-49.*) The whole island, except the territory of Methymna, which was spared, being divided into 3000 parts, 300 of these parts were devoted to sacred purposes, and the rest distributed among the Athenians, by whom they were rented to the former proprietors. Mytilene, however, soon recovered from the effects of this blow, but always after this adhered

to the side of the Athenians. It became a large and strong city, and the strength of its fortifications was tested by the siege it underwent from Memnon, the general of Darius, during Alexander's expedition into Asia. (*Arrian, 2, 1.*) It suffered at a subsequent period from the Romans on account of its adherence to the side of Mithradates. (*Epit., Liv., 89.—Compare Vell. Paterc., 2, 18.*) It again, however, recovered from this misfortune, and was restored by Pompey to its former privileges, through favour to Theophanes. These privileges were confirmed by the Roman emperors, so that Mytilene now held a distinguished rank among the first cities of the empire. Pliny styles it "*libera Mytilene, annis MD. potens*" (6, 39.—Compare *Strab., 617.—Vell. Paterc., 2, 18.*) Athenæus praises its shellfish and wine (3, p. 86, *c.*; *ib.*, p. 92, *d.*; 1, p. 80, *b.*). Mytilene could boast of having given birth to Sappho and Alcæus, and to the historians Myrsilus and Hellanicus. Pittacus, too, one of the seven wise men of Greece, long presided over her councils. The modern *Mitylen* occupies the site of the ancient city. The following description of it is given by a recent traveller. "The town of *Mitylen* is built on a small peninsula, and has two ports, one on the north, and one on the south of it, both too shallow for anything but boats: the port on the north is protected by a Genoese mole, now in ruins; the extremity of the peninsula is covered by a very large Genoese castle, and the remainder of it, and some of the continent, by the town. The town contains about 700 Greek houses, and 400 Turkish; its streets are narrow and filthy." (*Turner, Tour in the Levant, vol. 3, p. 299.*)

ΜΝΕΜΟΝ (*Μνήμων*), a surname given to Artaxerxes on account of his retentive memory. (*Vid. Artaxerxes II.*)

ΜΝΕΜΟΣΥΝΗ, a daughter of Cælus and Terra, mother of the nine Muses by Jupiter, and goddess of Memory. The meaning of the myth becomes very apparent when we regard the Muses as symbolical of the inventive powers of the mind as displayed in the various arts. The power of remembering, gained by practice, at a time when books were rare, may well be assigned to the Muses as a parent. (*Æsch., P. V., 461.*)

ΜΝΗΣΑΓΟΡΗΣ, I. an engraver on precious stones, born in Etruria, and father of Pythagoras the philosopher. Hence he probably flourished about Olymp. 89. (*Sillig, Dict. Art., s. v.*)—II. A son of Pythagoras, who succeeded Aristæus of Crotona, the immediate successor of Pythagoras himself. (*Tennesson, Hist. Phil., § 96.*)

ΜΝΗΣΙΚΛΕΣ, a celebrated architect, born a slave in the house of Pericles. By the command of this distinguished statesman, he built the magnificent vestibule of the Athenian citadel, the erection of which occupied five successive years (B.C. 437-433.—*Plut., Vit. Pericl., 13.*) While engaged in this undertaking he fell from an eminence, but was healed by Pericles by the application of the herb *pellitory*, which it was fabled Minerva had pointed out to the latter in a dream. (*Plut., l. c.—Plin., 22, 17, 20.*) A brazen statue of him was cast by Stipax, and this statue was designated "*Splanchnoptes*." (*Plin., l. c.—Id., 34, 8, 19.—Sillig, Dict. Art., s. v.*)

ΜΝΗΣΤΡΕΥΣ. *Vid. Menestheus.*

ΜΝΕΥΣ, the name of a sacred bull, consecrated to the sun, and worshipped by the Egyptians at Heliopolis. According to Jablonski (*Voc. Egypt., p. 146, 184*), his name signified "the bull of light" or "of the sun." (Compare *Strabo, 803.—Diod. Sic., 1, 21.—Plut., de Is. et Os., p. 492, ed. Wytt.*) The colour of Mnevis had to be black, and his skin must be rough and bristly. His worship, however, gradually disappeared when Apis became the general deity of the country, and we may date its downfall from the

time when Cambyses overthrew the magnificent temple of Heliopolis. Mnevis was worshipped with the same superstitious ceremonies as Apis, and at his death he received the same magnificent funeral. (Consult *Creuzer, Symbolik, par Guignaut*, vol. 1, p. 498.)

MORSTUS, a Latin military writer, whose history is unknown. He wrote a work "*De vocabulis rei militaris*," by order of the Emperor Tacitus, A.D. 275 or 276. The first edition was published in 1474, 4to, *Venet.*, edited by J. Aloysius; and is a book of extreme rarity. There is also another edition, supposed to have been printed at Rome by Laver, about 1475, 4to. An edition was also published in 1679, 2 vols. 4to, *Vesalia*.

MÆNUS, a river of Germany. (*Vid. Mænus*.)

MÆRIS, I. a king of Egypt, who occupied the throne, according to chronologists, for the space of 68 years, and was succeeded by Sesostrius. (*Larcher, Tabl. Chronol.*, p. 572.—*Id.*, *Chronol. d'Herod.*, p. 86, seq.—*Bähr, ad Herod.*, 2, 100.)—II. A lake of Egypt, supposed to have been the work of a king of the same name, concerning the situation and extent, and even the existence of which, authors have differed. It has been represented as the boldest and most wonderful of all the works of the kings of Egypt, and, accordingly, Herodotus considers it superior even to the pyramids and labyrinth. (*Herod.*, 2, 149.) As to its situation, Herodotus and Strabo (810) mark it out by placing the labyrinth on its borders, and by fixing the towns which were around it, such as Acanthus to the south, Aphroditopolis towards the east, and Arsinoë to the north. Diodorus (1, 52) and Pliny (5, 9) confirm this statement, by placing it at 24 leagues from Memphis, between the province of that name and Arsinoë. The position thus indicated is supposed to answer to the modern *Birket-Caroun*, a lake nearly 50 leagues in circumference. Herodotus makes the Lake Mæris 3600 stadia in circumference, and its greatest depth 200 cubits. Boesuet has vindicated the statement of its large extent against the raillery of Voltaire. Rollin, however, deeming it to be incredible, adopts the opinion of Pomponius Mela (1, 9), and makes it 20,000 paces. D'Anville, with a view of reconciling the contending parties, has marked on his map of Egypt two lakes of this name, one of which is in fact a canal running parallel with the Nile; this he makes the Mæris of Herodotus and Diodorus, while the other is situate to the northwest, and corresponds, according to him, with the Mæris of Strabo and Ptolemy. This last is the *Birket-Caroun* mentioned above; the former, which still subsists, is known by the name of *Bahr Jouseph*, or Joseph's river. It opens near Tarout Eccheriff, and ends near *Birket-Caroun*. The explanation given by Malte-Brun is, however, the simplest. He supposes that the canal dignified with the name of Joseph, like many other remarkable works, was executed by order of King Mæris. The waters then filled the basin of the lake *Birket-Caroun*, which received the name of the prince who effected this great change. Thus a reason is given why the ancients say that the lake was of artificial formation, while the *Birket-Caroun* gives no evidence of any such operation. (*Malte-Brun, Geogr.*, vol. 2, p. 447, *Brussels ed.*) If we listen, however, merely to the relation of Herodotus, the Lake Mæris was entirely the work of human art; and, to show this, two pyramids were to be seen in its centre, each of which was 200 cubits above, and as many below the water, while on the summit of each was a colossus in a sitting posture. The object of the excavation was to regulate the inundations of the Nile. When the waters of the river were high, a large portion was carried off by the canal to the lake, in order that it might not remain too long on the soil of Egypt (lower at that time than in our days), and occasion sterility; when the inundation had declined, a second

one was produced by the waters in Lake Mæris. The lapse of nearly 1200 years has made a great change in this as in the other Egyptian works of art. Mæris is now nearly 50 leagues in circumference. It might still, however, be made to answer its ancient purposes, if the canal of Joseph were cleared of the immense quantity of mud collected in it, and the dikes restored. The pyramids in this lake were no longer visible in the time of Strabo. The lake itself is said to have afforded a most abundant supply of fish. The profits of this fishery were appropriated to find the queen with clothes and perfumes. (Compare *Martin, Descript. Hydrogr.—Descript. de l'Égypte, Etat. Mod., livraison 3*, p. 195, seq.—*Ibid.*, *Antiq. Mem. sur le Lac de Mæris, par Jormand*, vol. 1, p. 79, seq.—*Letronne sur Rollin*, vol. 1, p. 22, seq.)

MÆSIA, the name of a province of the Roman empire, extending north of the range of Mount Hæmus, the modern *Balkan*, as far as the Danube, and eastward to the Euxine, and corresponding to the present provinces of *Servia* and *Bulgaria*. Its boundaries to the west were the rivers Drinus and Savus, which divided it from Pannonia and Illyricum. Strabo (295) says, that the old inhabitants of the country were called Mysi (*Μῃσοί*), and were a tribe of Thracians, like their eastern neighbours the Getæ, and that they were the ancestors of the Mysians in Asia Minor. The Romans first invaded their country under the reign of Augustus, and it was afterward made into a Roman province, and divided into Mæsia Superior, to the west, between the Drinus and the Cæsus (or modern *Ister*), and Mæsia Inferior, extending from the Cæsus to the Euxine. Being a frontier province of the empire, it was strengthened by a line of stations and fortresses along the southern bank of the Danube, of which the most important were Axiopolis, Durosteron, Nicopolis ad Istrum, Viminacium, and Singidunum. A Roman wall was built from the Danube to the Euxine, from Axiopolis to Tomi, as a security against the incursions of the Scythians and Sarmatians, who inhabited the delta of the Danube. The conquest of Dacia by Trajan removed the frontiers of the empire farther north, beyond Mæsia; but after the loss of the province of Dacia, about A.D. 250, Mæsia became again a border country, and, as such, exposed to the irruption of the Goths, who, after several attempts, crossed the Danube, and occupied Mæsia in the reign of the Emperor Valens. The Mæso-Goths, for whom Ulphilas translated the Scriptures, were a branch of Goths settled in Mæsia. Some centuries later, the Bulgarians and Slavonians occupied the country of Mæsia, and formed the kingdoms of *Bulgaria* and *Servia*.—The Greek writers called this country *Μῃσία*. (*Dio Cass.*, 38, 10.—*Amm. Marcell.*, 27, 9.—*Plin.*, 3, 26.—*Id.*, 4, 1.—*Tac.*, *Ann.*, 15, 6.—*Herodian*, 2, 10.—*Encycl. Us. Knowl.*, vol. 15, p. 297.)

MOGONTIACUM or **MAGONTIACUM**, afterward *Moguntia* or *Magontia*, a city of the Vangiones, lying opposite to the mouth of the Mænus or *Mayn*. It was founded, or, at least, considerably embellished by Drusus, brother of Tiberius, B.C. 10, and became subsequently the metropolis of Germania Prima, and the residence of the governor or prefect of Gaul. It often suffered from the Batavi in the earlier periods of the empire, and at a later day from the barbarians. The modern name is *Mainz*, or, as we commonly write it, *Mayence*. (*Tacit., Hist.*, 4, 15, 37, 61, 70, et 71.—*Ptol.*, 3, 9.)

MOLIONÆ, the wife of Actor, son of Phorbas. She became mother of Cteatus and Eurytus, who from her are called *Molionides*. (*Pausan.*, 8, 14.—*Apolod.*, 2, 7.)

MOLIONIDES, the two sons of Actor and Molionæ, called *Actorides* from their father, and *Molionides* from their mother. (*Heyne, ad Il.*, 2, 708.) Their names were Eurytus and Cteatus. Homer describes

them, according to the common interpretation, as twins (*δίδυμοι*), and one as managing the chariot, while the other held the lash. Aristarchus, however, explained *δίδυμοι* by *διψεύς*, on the authority of Hesiod (*κατὰ τὸν Ἡσίοδον μῦθον*), and saw in the Molionides a double body with two heads and four arms, like the double men of whom Hesiod speaks. This explanation has been rejected by many as too artificial for the age of Homer; and in the same way has the tradition mentioned by the poet Ibycus been treated, which makes the Molionides both to have come from a silver egg (*ap. Athen.*, 2, p. 57, f.). If we examine attentively the genealogy assigned to these heroes, new light will be found to break in upon this singular fable. Actor, the father, is "the man of the shore," against which the waves of the sea break; he is also "the man of grinding," of the grain crushed and broken by the mill. (*Ἄκτωρ*, from *ἀκτῆ*.—*Δημήτριος ἀκτῆ*.—*Hes., Op. et D.*, 32.) On the other hand, Molione is "the female of combat." *Μόλιος* is the name of her father (compare *μῦλος*), according to Pherecydes, and Apollodorus (1, 7) mentions two individuals of this name, one the son of Mars, the other of Deucalion. Without war we can neither conquer nor defend the soil destined for culture. Hence one of these warriors is named Eurytus, or "the good defender," the guardian, like the two Anaces or Dioscuri, whom the Spartan tradition made to have issued from the same egg. Thus Eurytus is from *εὖ* and *τέρας*, with an active signification. (Compare *Buttman, Lexilogus*, vol. 1, p. 146.) The other, Cteatus (*Κτεατός*.—*κτεάω*, *res Mancipii*), is "the possessor" or "proprietor." When the sea has entered within its proper limits, and the shore now contains it, then appear the cultivators of the soil. The man who would remain master of his paternal soil must in some sort be double. He must have two arms for the sword and buckler, two for the lash and the reins with which he guides his coursers. A single body ought to carry a double array of members, a single will to actuate two souls. These are the double men of Hesiod (*διψεύς*).—Such is the explanation of Creuzer as regards the fable of the Molionides. (*Symbolik*, vol. 2, p. 387.—*Symbolik, par Guigniaut*, vol. 2, pt. 1, p. 334, seq.) In place of this very poetical version of the legend, Hermann gives one altogether different, and singularly prosaic. He sees in the whole story a general reference to traders coming by sea, disposing of their merchandise to advantage, and becoming possessed of riches. (*Ueber das Wesen und die Behandlung der Mythologie*, p. 55.)—The Molionides are also mentioned as having come to the aid of Augeas against Hercules. (*Heyne, ad Il.*, 11, 708.) The Cyclic poets, from whom Pherecydes and Pindar (*Ol.*, 10, 32) drew, in this instance, their materials, make them to have been slain by Hercules, whereas Homer speaks of them as surviving Hercules, as being still young (*παῖδες ἐπ' ἐόντες*), and contemporary with Nestor.

MOLIO, a philosopher of Rhodes, called also Apollonius. (*Vid.* Apollonius V.)

MOLORCHUS, an old labouring-man near Cleonæ, who hospitably entertained Hercules when the latter was on his way against the Nemean lion. Molorchus wishing to offer a sacrifice, in order to propitiate the gods and obtain for Hercules a successful accomplishment of his enterprise, the hero begged him to reserve it till the thirtieth day, saying that if he should then return victorious, he might offer it to Jupiter the preserver; but if he fell in the conflict, to make it a funeral offering unto him as a hero. After having destroyed the lion, Hercules came to the abode of Molorchus on the last day of the appointed period, and found him just on the point of offering the victim for him as being dead. Hence we have in Tibullus the expression "*Molorchis tecti*" (4, 1, 13), and in Vir-

gil, "*lucos Molorchis*" (*Georg.*, 3, 19.—*Apollod.*, 2, 5, 1.—*Heyne, ad loc.*).

MOLOSSI, a people of Epirus, occupying the north-eastern portion of the country; that is, from the head of the Aôus, and the mountainous district which connects Macedonia, Thessaly, and Epirus to the Ambracian Gulf, a small portion of the shores of which was considered to belong to them. (*Scylax*, p. 12.) Molossis must therefore have comprehended the territory of *Janina*, the present capital of Albania, together with its lakes and mountains, including the country of the Tymphaei, which bordered on that part of Thessaly near the source of the Peneus. Its limits to the west cannot precisely be determined, as we are equally ignorant of those of Thesprotia. The principal town of the Molossi was Ambracia. Under their king Alexander, about 320 B.C., they gained the preponderance over the rest of Epirus, which they maintained under his successors, of whom Pyrrhus was the most celebrated. After the defeat of Perseus, Paulus Æmilius, the Roman general, ravaged the country of the Molossi, as well as the rest of Epirus, and destroyed their towns. The effects of the devastation which he caused were still visible in the time of Strabo. This country was famed for its dogs; they were of a robust make, and very useful in defending the flocks. (*Aristot., Hist. An.*, 9, 1.—*Cramer's Anc. Greece*, vol. 1, p. 131.)

MOLOSSIA OR MOLOSSIA, the country of the Molossi in Epirus. (*Vid.* Molossi.)

MOLOSSUS, a son of Pyrrhus and Andromache. He reigned in Epirus after the death of Helenus. (*Pausan.*, 1, 11.)

MOLYCRION OR MOLYCRÆIA, a town of Ætolia, on the borders of the Locri, and in the immediate vicinity of Antirrhium. According to Thucydides, it was situate close to the sea. This place had been colonized by the Corinthians, who were expelled by the Athenians, and it was afterward taken by the Ætolians and Peloponnesians under Eurylochus. (*Thucyd.*, 2, 8.—*Id.*, 3, 102.) It is also alluded to by Pausanias (5, 34), who elsewhere writes it Molycria (9, 31), while other Greek writers give Molycreia, as for example Strabo (451). The spot on which it stood is now called *Carrolimne*, where its remains are yet perceptible. (*Cramer's Anc. Greece*, vol. 2, p. 81.)

MOMUS, the god of railery and ridicule, was the son of Night, without a sire. (*Hesiod, Theog.*, 211.) He does not appear to have been known to Homer, but is alluded to by Plato and Aristotle, and, as might well be expected, by Lucian. (*Hermot.*, 20.—*Ver. Hist.*, 2, 3.—*Nigr.*, 32.) Nothing was perfect or found favour in his sight; and the gods themselves were the objects of his perpetual and unlimited satire. He blamed Vulcan, because in the human form which he had made of clay, he had not placed a window in the breast, by which whatever was done or thought there might easily be brought to light. He censured the house which Minerva had constructed, because the goddess had not made it moveable, by which means a bad neighbourhood might be avoided. In the case of the bull which Neptune had produced, he observed that his blows might have been surer if his eyes were placed nearer the horns. Venus herself was exposed to his satire; and when he could find no fault with her person, he censured the noise made by her golden sandals. He was eventually driven from Olympus.—MOMUS reminds us of the Gigon (*Γίγυν*) in the Cabiric mysteries. (*Creuzer, Symbolik*, vol. 2, p. 423.)

MONA, I. an island between Britain and Hibernia, now the *Isle of Man*. Cæsar gives it the name of *Mona* (*B. G.*, 5, 13). Ptolemy calls it *Μονάσιδα* (*ed. Erasm.*, where some MSS. give *Μοναπίδα*). He removes it, however, too far to the north. Orosius (1, 11) styles it *Menavia*, which closely resembles the *Monapia* of Pliny (4, 10), especially if, with Camden, we read *Ma-*

nabis for the latter. (*Cellarius, Geogr. Ant.*, vol. 2, p. 355.)—II. An island off the coast of Britain, and facing the territory of the Ordovices, of which, in strictness, it formed part. It was situate to the southeast of the former, and is now the *Isle of Anglesey*. Tacitus gives it the name of *Mona* (*Ann.*, 14, 29.—*Vit. Agric.*, 14), and Ptolemy styles it *Mónva*, while Dio Cassius (62, 7) names it *Mónva*. It was remarkable as having been one of the principal seats of the Druids. Suetonius Paulinus had conquered Anglesey; but the insurrection of the Britons under Boadicea did not leave him time to secure its possession. Agricola, at a subsequent period, having subdued the Ordovices, undertook the reduction of the island and succeeded. The invasion by Paulinus was seventeen years previous to the conquest of Agricola. (*Tacit., Vit. Agric.*, 18.) Pennant mentions a pass in Wales, into the valley of Clwyd, in the parish of Llanarmon, which, he says, is still called *Bwlch Agrikle*, probably from having been occupied by Agricola on his way to the isle of Mona. Tacitus (*Ann.*, 14, 29, *seqq.*) gives an interesting account of the first conquest by Paulinus. The sacred groves, stained with the blood of human sacrifices, were destroyed by the Roman general. (Consult, in relation to the Druidical sacrifices, *Higgins' Celtic Druids*, p. 291, *seqq.*)

MONASAS, I. a Parthian commander, the same with the Surena that defeated Crassus. The appellation Surena, by which he is more commonly known, was merely a Parthian term denoting his high rank.—II. A Parthian officer in the time of Corbulo. (*Dio Cass.*, 62, 19.—*Tacit., Ann.*, 15, 2.)

MONDA, a river on the western coast of Lusitania, between the Durius and Tagus. Conimbriga (the modern Coimbra) was situate on its banks. It is now the *Mondego*. (*Mele*, 3, 1.—*Moravian, Peripl.*, in *Huds. Gr. M.*, vol. 1, p. 43.) Pliny calls it the *Munda* (4, 22).

MONĒTA, a surname of Juno among the Romans. She received it, according to one account, because she advised them (*monui*) to sacrifice a pregnant sow to Cybele, to avert an earthquake. (*Cic., de Div.*, 1, 15.) Livy says, that a temple was vowed to Juno under this name by the dictator L. Furius Camillus, when the Romans waged war against the Aurunci, and that the temple was raised to the goddess by the senate on the spot where the house of Manlius Capitolinus had formerly stood. (*Livy*, 7, 28.—Compare *Ovid, Fast.*, 6, 183.) Suidas, however, states that Juno was surnamed *Moneta* from her assuring the Romans, when, in the war against Pyrrhus, their pecuniary resources had failed them, and they had addressed her in prayer, that, as long as they prosecuted the war with justice, the means for carrying it on would be supplied to them. After their arms were crowned with success, they rendered divine honours to Juno, styling her "*Moneta*," or the "adviser," and resolved, for the time to come, to coin money in her temple. (*Suid.*, s. v. *Μονήτρα*).—Many etymologists derive the English word "money" from the Latin *moneta*; and this last, according to Vossius, comes from *moneo*; "*quod ideo moneta vocatur; quia nota inscripta monet nos auctoritas et valoris*." The true root, however, is most probably contained in the Anglo-Saxon *myne-g-ian*, "to mark" or *myne-th-ian*, "to stamp," (*Richardson, Eng. Dict.*, s. v. "mint," "money."—Compare *Tooke, Diversions of Parley*, vol. 2, p. 210, *ed.* 1829.)

MONŌDUS, a son of Prusias. He had one continued bone instead of a row of teeth, whence his name (*μόνος ὀδούς*).—*Plin.*, 7, 16.—Consult *G. Cuvier, ad loc.*

MONŌCROS. *Vid.* Herculis II.—(Herculis Monæci Portus.)

MONS SACER, a low range of sandstone hills, extending along the right bank of the Anio, and about three miles from Rome. It is celebrated in history by the secession of the Roman people. (*Liv.*, 2, 32.—

Ovid, Fast., 3, 663.)—It was called *Mons Sacer*, because, says Festus, the people, after their secession, consecrated it to Jupiter. (*Gell, Topography of Rome*, vol. 2, p. 107.)

MONŪCHEUS, a powerful giant, who could root up trees and hurl them like a javelin. (*Juv.*, 1, 11.—*Ovid, Met.*, 12, 499, *seqq.*—*Lucan*, 6, 388.—*Val. Flacc.*, 1, 146, *et. Burn.*, *ad loc.*)

MORSŌRA, an eminence between Larissa and Tempe, on the southern bank of the Peneus. A severe skirmish took place in its vicinity between the troops of Perseus and the Romans. (*Livy*, 42, 61, *et.* 67.) There appears to have been a fortress on it; and Sir W. Gell observed some vestiges on a hill near the village of *Erema*, which were probably the remains of this ancient post. (*Itin.*, p. 262.—*Cramer's Anc. Greece*, vol. 1, p. 384.)

MORSŌRIA, an ancient appellation for Attica, supposed to be derived from the hero Mopsopus or Mopsops. (*Strab.*, 397.—Compare *Lycophr.*, v. 1339.)

MOPSEUHĒSTIA, a town of Cilicia, near the sea, on the banks of the Pyramus. Strabo (675) informs us, that Mopsus and Amphilocheus settled in this neighbourhood after the Trojan war, and founded the city of Mallus, and that subsequently they quarrelled about the place. This legend, no doubt, induced the Greeks of a later age to search in this quarter for a city of Mopsus, and hence arose the name *Mopseuhestia* (*Μοψευστία*, "*the retreat of Mopsus*"), given to the place in question; whether correctly or otherwise, it is difficult to say, most probably, however, the latter. This appellation continued for a long period. Cicero (*Ep. ad Fam.*, 3, 8) speaks of *Mopseuhestia*. Pliny, however (5, 27), calls it merely *Mopsus*. Under the Byzantine empire its name was corrupted to *Mampyssta*, or *Mamista*, or *Manista*. (*Cod. Theodos.*, *de consat. donator.*, l. 1.—*Glycas, Ann.*, pt. 4, p. 306.—*Itin., Hierosol.*, p. 580.) The modern *Mensis* appears to be a farther corruption of these names. (*Leake, Journal*, p. 217.) It would seem that the early origin of Mopseuhestia is contradicted by the silence of Xenophon, and also of the historians of Alexander. Strabo is the first who makes mention of the place. (*Mannert, Geogr.*, vol. 6, pt. 2, p. 101, *seqq.*)

MORSUS, I. a celebrated prophet, son of Manto and Apollo. He officiated at the altars of Apollo at Claros; and from his unerring wisdom and discernment gave rise to the proverb, "more certain than Mopsus." He distinguished himself at the siege of Thebes; but he was held in particular veneration at the court of Amphilocheus, at Colophon in Ionia. Having been consulted, on one occasion, by Amphilocheus, who wished to know what success would attend his arms in a war which he was going to undertake, he predicted the greatest calamities; but Calchas, who had been the soothsayer of the Greeks during the Trojan war, promised the greatest successes. Amphilocheus followed the opinion of Calchas, but the prediction of Mopsus was fully verified. This had such an effect upon Calchas that he died soon after. His death is attributed by some to another mortification of the same nature. The two soothsayers, jealous of each other's fame, came to a trial of their skill in divination. Calchas first asked his antagonist how many figs a neighbouring tree bore; ten thousand and one, replied Mopsus. The figs were gathered, and his answer was found to be true. Mopsus now, to try his adversary, asked him how many young ones a certain pregnant sow would bring forth, and at what time. Calchas confessed his inability to answer, whereupon Mopsus declared that she would be delivered on the morrow, and would bring forth ten young ones, of which only one would be a male. The morrow proved the veracity of his prediction, and Calchas died through the grief which his defeat produced. (*Tzetzes, ad Lycophr.*, 427.) Amphilocheus subsequently, having occasion to

visit Argos, intrusted the sovereign power to Mopsus, to keep it for him during the space of a year. On his return, however, Mopsus refused to restore to him the kingdom, whereupon, having quarrelled, they engaged and slew each other. (*Tzet. ad Lycophr.*, 440.) According to another legend, he was slain by Hercules. (*Tzet. ad Lycophr.*, 980.)—II. A son of Ampyx and Chloris, born at Titaresia in Thessaly. He was the prophet and soothsayer of the Argonauts, and died at his return from Colchis by the bite of a serpent in Libya. (*Hygin., fab.*, 14, 128, 172.—*Tzet. ad Lycophr.*, 980.)

MORGANTIUM (or *IA*), a town of Sicily, southeast of Agrigum, and nearly due west from Catana. It lay in the neighbourhood of the river Symethus. The village of *Mandri Bianchi* at present occupies a part of its site. (*Mannert*, vol. 9, pt. 2, p. 430.)

MORIMARŪSA, a name applied by the Cimbri to the Northern Ocean (*Plin.*, 4, 27), and which means "the Dead Sea." In the Welsh tongue, *Mor* is the "sea," and *Marr* "dead." In the Irish, *maur-croinn* denotes a thick, coagulated, frozen sea. (*Class. Journ.*, vol. 6, p. 296, *seqq.*)

MORINI, a people of Belgic Gaul, on the shores of the British Ocean, and occupying what would correspond to *le Boulonnais*, part of the *Département du Nord*, and of *Flanders* along the sea. Their name is derived from the Celtic *Mor*, which signifies "the sea," and denoted a people dwelling along the seacoast. (Compare *Thierry, Hist. des Gaulois*, vol. 2, p. 40.) The *Portus Itius* or *Ictius* lay within their territories, and the passage hence to Britain was considered as the shortest. Virgil (*Æn.*, 8, 737) calls them "*extremi hominum*," with reference to their remote situation on the coast of Belgic Gaul. (*Heyne, ad loc.*—Compare *Plin.*, 19, 1.) Their cities were, *Civitas Morinorum*, now *Terouenne*; and *Castellum Morinorum*, now *Montcaisel*. (*Cæs.*, B. G., 4, 21.)

MORPHEUS (two syllables), the God of Sleep, and also of dreams, and hence his name from the various forms (*μορφή*, "form," "figure") to which he gives being in the imagination of the dreamer. Thus Ovid (*Mét.*, 11, 634) styles him "*artificem, simulatoremque figuræ*." (Compare *Gierig, ad loc.*) Morpheus is sometimes represented as a man advanced in years, with two large wings on his shoulders, and two smaller ones attached to his head. This is the more common way of representing him. (*Winckelmann, Werke*, vol. 2, p. 555.) In the *Museum Pio-Clementinum*, he is sculptured in relief on a cippus, as a boy, treading lightly on tiptoe: on his head he has two wings; in his right hand a horn, from which he appears to be pouring something; in his left a poppy-stalk with three poppy-heads. On a relief in the *Villa Borghese*, the god of dreams is again represented as a boy with wings, and holding the poppy-stalk, but without any horn. (*Winckelmann*, vol. 2, p. 713.)

MORS, one of the deities of the lower world, born of Night without a sire. Nothing is particularly known relative to the manner in which she was worshipped. "The figures of Mors or Death," says Spence, "are very uncommon, as indeed those of the evil and hurtful beings generally are. They were banished from all medals; on seals and rings they were probably considered as bad omens, and were, perhaps, never used.—Among the very few figures of Mors I have ever met with, that in the Florentine gallery is, I think, the most remarkable: it is a little figure in brass, of a skeleton, sitting on the ground, and resting one of its hands on a long urn. I fancy Mors was common enough in the paintings of old, because she is so frequently mentioned in a descriptive manner by the Roman poets. The face of Mors, when they gave her any face, seems to have been of a pale, wan, dead colour. The poets describe her as ravenous, treacherous, and furious. They speak of her roving about

open-mouthed, and seem to give her black robes and dark wings. As the ancients had more horrid and gloomy notions of death than we have at present, so the greater part of their descriptions are of a most frightful and dismal turn."—Compare with this the language of Niebuhr (*Roman Hist.*, vol. 1, p. 110, *Cambridge transl.*), who speaks of the genius of death, represented on Etrurian bas-reliefs, as a perfect cherub. (*Micali*, pl. 44.)

MORTUUM MARE. *Vid.* Mare Mortuum.

MOSEA, a river of Gallia Belgica, on the confines of Germania Cisrhenana. It rose in Mount Vogeus, among the Lingones, and emptied into the Vahalis. It is now the *Maas* or *Meuse*. (*Cæs.*, B. G., 4, 10.—*Tacitus, Ann.*, 2, 6.—*Plin.*, 4, 14, *seqq.*—*Amm. Marcell.*, 17, 2, 9.) In the Peutinger Table it is called the *Mosaha*.—*Mosse Pons*, otherwise called *Trajectus Mosæ* (*Itin. Ant.*, 461), is the modern *Maastricht*.

MOSCHA, a harbour of Arabia Felix, at the mouth of the *Sinus Persicus*. (*Ptol.*, in *Huds. G. M.*, 3, 13.—*Arrian, Periplus*, in *Huds. G. M.*, 1, 18.) It was much frequented, according to Arrian, on account of the *Sachalitic* incense obtained there. Much doubt has arisen relative to the precise situation of this port. The opinion which makes it correspond to the modern *Mascate*, though plausible on account of the similarity of names, cannot be supported. Moscha more probably answers to the modern *Sadschar*, which D'Anville calls *Sege*, and Vincent *Schoehr*. (*Mannert, Geogr.*, vol. 6, pt. 1, p. 102, *ed.* 1831.—*Vincent's Periplus*, p. 344, *seqq.*)

MOSCHI, a people of Asia, dwelling, according to Mela (1, 2; 3, 5), in the vicinity of the Hyrcanian Sea; but according to Pliny (6, 4), around the sources of the *Phasis*, between the *Euxine* and *Caspian Seas*. *Stephanus* of *Byzantium* calls them *Μόσχαιοι*, and *Procopius* *Μέσχοι*. (*Rer. Got.*, 4, 2.)

MOSCHION, I. a physician, whose era is not ascertained. A treatise on "Female Complaints" (*Περὶ τῶν γυναικείων παθῶν*) is commonly ascribed to him. The best edition is that of Dewez, *Vindob.*, 1793, 8vo. The text is here given after a very good MS. in the Imperial Library at Vienna.—"It is to be regretted," says Mr. Adams, "that this author's work on 'Female Complaints' has descended to us in so imperfect a state; for it appears to have contained very original and ingenious views of practice. His directions relative to the umbilical cord after delivery are more judicious than those laid down by any other ancient author. He disapproves of all the superstitious and ignorant modes of procedure formerly resorted to in such cases, and recommends to tie the cord in two places, and to divide it in the middle with a scalpel or sharp knife. He reprobates the ancient practice of using instruments of wood, glass, reed, or hard crusts of bread. In cases of retention of the placenta, he disapproves of sternutatories, fumigations, suspending weights from the cord, and the like, because such means are apt to occasion hemorrhage; and he directs the midwife in other particulars with great judgment."

MOSCHUS, I. or MOSCHUS, a philosopher of Sidon, and the most ancient name remaining on the list of Phœnician philosophers. If we are to credit Iamblichus (*Vit. Pythag.*, 3, 14), he lived before the time of Pythagoras. After Posidonius, many writers ascribe to him a system of philosophy, which subsequently rose into great celebrity under the Grecian philosophers Leucippus and Epicurus, called the *Atomic*. It is urged, in defence of this opinion, that the *Monads* of Pythagoras were the same with the *Atoms* of Moschus, with which Pythagoras became acquainted during his residence in Phœnicia; and that from Pythagoras this doctrine passed to Empedocles and Anaxagoras, and afterward to Leucippus and Epicurus. (*Stob., Ecl. Phys.*, 1, 13.—*Arist., Metaph.*, 12, 6.) To this may be replied, that

the single evidence of Posidonius the Stoic, who lived so many ages after the time of Moschus, to whom also Cicero allows little credit, and of whose authority even Suidas and Sextus Empiricus, who refer to him, intimate some suspicion, is too feeble to support the whole weight of this opinion. But the circumstance which most of all invalidates it is, that the method of philosophizing by hypothesis or system, which was followed by the Greek philosophers, was inconsistent with the genius and character of the Barbaric philosophy, which consisted in simple assertion, and relied entirely upon traditional authority. The argument drawn from the history and doctrines of Pythagoras is fully refuted, by showing that this part of the history of Pythagoras has been involved in obscurity by the later Platonists, and that neither the doctrine of Monads, nor any of those systems which are said to have been derived from Moschus, are the same with the Atomic doctrine of Epicurus. We may therefore safely conclude, that, whatever credit the corpuscular system may derive from other sources, it has no claims to be considered as the ancient doctrine of the Phœnicians. (*Enfield's History of Philosophy*, vol. 1, p. 75.)—II. A Greek pastoral poet, whose era is not clearly ascertained. Suidas (s. v. Μόσχος) states positively that Moschus was the friend or disciple of Aristarchus (for the word γράμμα, which he employs, may have either signification). If this be correct, the poet ought to have flourished about the 156th Olympiad (B.C. 156). This position, however, is very probably erroneous, since Suidas is here in contradiction with a passage of Moschus himself (*Epitaph. Bion.*, v. 102), in which the poet speaks of Theocritus as a contemporary. Now Theocritus flourished B.C. 270.—Moschus is said to have been a native of Syracuse, though he spent the greater part of his days at Alexandria. He was the friend, and, according to some, the disciple of Bion. We have four idylls from him, and some other smaller pieces. 1. Ἐρως ὀρατέρης ("Cupid, a run-away"), a poem of twenty-nine verses. Venus offers a reward to any one who will bring him back to her; and draws a picture of the young deity, so that no one may mistake him.—2. Ἐυρώπη ("Europa"). The subject of this poem, which consists of 161 verses, is the carrying off of Europa from Phœnicia to Crete. It is a very graceful and charming piece, and would be worthy of the best age of Grecian literature, were not the introduction rather too long.—Ἐπιτάφιος Βίωνος ("Elegy on Bion"), a piece of 133 verses. The poet represents all nature as mourning the death of Bion. It is a very elegant production; but overloaded with imagery, and open to the charge of what Valckenauer calls "*elegantissimam luxuriam*."—4. Μεγάρα, γυνὴ Ἡρακλέους ("Megara, spouse of Hercules"), a fragment, containing 125 verses. It is this fragment which some critics have sought to assign to Pisander, and others to Panyasis. We have in it a dialogue between the mother and the wife of Hercules. The scene is laid at Thyrsus, and the hero is supposed to be absent at the time, accomplishing one of the labours imposed upon him by Eurystheus. The two females deplore their own hard lot and that of Hercules. This piece contains less imagery and ornament than the other remains which we possess of Moschus. It is marked by a simplicity of manner which recalls to mind the ancient epopœe, and is distinguished by traits of genuine feeling.—"Moschus," observes Elton, "seems to have taken Bion for his model, and resembles him in his turn for apologies, his delicate amenity of style, his luxuriance of poetic imagery, and his graceful and, as it were, feminine softness. The 'Elegy on Bion' may at first view appear forced and affected, from its exuberance of conceit; and Dr. Johnson, in his opinion that, where there is real sorrow, there can be nothing of mere poetry. I am satisfied that the

inference is unphilosophical. What is the reason that 'Lycidas,' and that the 'Monody on Lucy,' by Lord Lyttleton, continue to be popular in defiance of criticism? It is that the criticism is hypercritical, and that the popular feeling is right. Shakspeare, who had from nature the deepest intuition into the complicated science of mental philosophy, saw that the human mind perpetually fouls the calculations of previous reasoning. We are often struck with the language and deportment of his characters, as contrary to what might have been expected under such circumstances; and yet we shall, I believe, invariably find that Shakspeare, in disappointing the vulgar notions of probability or consistency, has taken his instructions from practical human life. Among various instances, that of a seemingly affected and overstrained mode of diction, and far-fetched train of sentiment, may be adduced as one of the most prominent, and as that which is most frequently condemned, with a positive confidence, as a glaring violation of a universally acknowledged rule. But it will be found that the human mind, when acted upon by any extraordinary excitement, does in fact fly to remote associations, and vent its superfluous energy in violent combinations, and in a wild sportiveness of imagery. The 'Elegy' of Moschus, like the 'Lycidas' of Milton, is no impeachment of the poet's accurate taste or genuine simplicity of feeling: it is, in either instance, the luxury of sorrow which pleases itself with grotesque and romantic creations of an excited fancy: it is the reverie of a poet; accompanied with that natural irregularity of mind, that unseating of the judgment by an overbalance of the imagination, which marks the delirious excess of melancholy in the man." (*Specimens of the Classic Poets*, vol. 1, p. 269, seqq.)—The remains of Moschus are given in the collections of Brunck, Gaisford, and Boissonade. One of the best separate editions is that of Manao, Gotha, 1784 and 1807, 8vo. (Schöll, *Hist. Lit. Gr.*, vol. 3, p. 165.)

MOSCHYLUS. *Vid.* MOSCHYLUS.

MOSELLA, a river of Belgic Gaul, rising in the range of Mount Vogesus, and flowing through the territories of the Leuci, Mediomatrici, and Treveri, into the Rhine at Confluentes (*Coblenz*). It is now the Moselle. (*Tac., Ann.*, 13, 53.—*Ann. Marcell.*, 16, 3.—*Flor.*, 3, 10.)

MOESTYLUS or MOSCHYLUS, a mountain in Lemnos, and the earliest volcano known to the Greeks. (*Ukert, über Lemnos und den Mosychlos.*—*Allg. Geogr. Ephem.*, 1802, p. 12.) Hence Lemnos is mentioned by Homer (*Od.*, 8, 283) as the favourite abode of Vulcan; and this island received him when hurled from the skies. (*Il.*, 1, 592.) Mosychlus is mentioned as a volcanic mountain by many of the later writers, and was situate on the eastern side of the island. (*Antim., ap. Schol. ad Nicand., Theriac.*, 474.—*Schol. ad Lycophr.*, 227.—*Nicand., Theriac.*, 458.—*Hesych.*, s. v. Μόσχυλος.—*Steph. Byz.*, s. v. Αἰθάλη.—*Varro, L. L.*, 7, 19, &c.) It is thought to have sunk in the sea a short time after the age of Alexander, together with the island Chrysa.—When the western parts of Europe became better known to the Greeks, and Ætna, with the Æolian isles, attracted their attention, they seem to have transferred the forges of Vulcan to this latter quarter. (Compare the authorities cited by Cluver, *Sic. Ant.*, l. 2, p. 407.) According to other mythological fables, Typhon or Typhœus lay buried beneath Ætna (*Æschyl., Prom. Vinc.*, 372, seqq.—*Pind., Pyth.*, 1, 29, seqq.—*Cluv., Sic. Ant.*, l. 1, p. 106), or, as others relate, Enceladus (*Oppian., Cyneg.*, 1, 273, seqq.—*Creuzer, ad Xanth., fragm.*, p. 163, seqq.); and the battle-ground between the gods and giants was placed by some in Sicily, by others near Cumæ in Italy. (*Apollod.*, 1, 6, 3.—*Strab.*, 243.—*Id.*, 261.—*Plin.*, 3, 9.—*Id.*, 18, 29.—*Polyb.*, 850

2, 91.—*Diod. Sic.*, 4, 21.—*Id.*, 5, 71.) Almost every volcanic situation, however, in the ancient world, seems to have had this honour in succession conferred upon it. (Compare *Berkel, ad Steph. Byz.*, s. v. Πάλληνη.)

ΜΟΥΣΝΑΕΙ, a people of Pontus in Asia Minor, on the coast near Cerasus. (*Xen., Anab.*, 5, 4, 2.) The 10,000 Greeks passed through their country in their retreat. The name is one given them by the Greeks, from the circumstance of their dwelling in wooden towers or forts (μόσσυ, a wooden tower, and οίκω, "to dwell."—*Sturz, Lex. Xen.*, vol. 3, p. 175.—Compare *Apoll. Rhod.*, 2, 1018.—*Schneider, ad Xen.*, l. c.)

ΜΥΛΟΚΙΣΣΗ, a surname of Vulcan, from the verb *mulco*, "to soften," and alluding to the softening influence of fire upon metals. (*Aul. Gell.*, 13, 22.—*Macrob.*, Sat., 1, 12.—*Ovid, Met.*, 2, 5.)

ΜΥΛΟΧΑ, a river of Africa, the same, according to the common account, with the Molochath and Malva, and which separated Mauritania from Numidia in the time of Bocchus, king of the former country. Hamaker, however (*Miscellanea Phœnicia*, p. 240, *segg.*), disputes the correctness of this, and makes distinct rivers of the Molochath, Malva, and Mulucha. According to this writer, the Molochath was the boundary between the two countries above mentioned in the time of Bocchus (*Liv.*, 29, 30); at a subsequent period, Mauritania was extended to the river Mulucha, in the days of Bocchus: under Bogud, the son of Bocchus, it was farther extended to the Ampagas; but afterward, under Juba, was circumscribed by the Nasava: and finally, under the Emperor Claudius, the Ampagas was again made the eastern limit, and Mauritania, thus enlarged, was divided by that emperor into two provinces, which the third river, the Malva, separated. (*Hamaker, l. c.*) According to the same Oriental scholar, the names Mulucha and Molochath both signify "salt;" while Malva has the meaning of "full," and indicates a large and copious stream. (*Hamaker, p. 245.*—Compare *Gesenius, Phœn. Monument.*, p. 425.)

MULVIUS PONS. *Vid.* MILVIUS PONS.

MUMMIUS, I. LUCIUS, a Roman of plebeian origin. Having been sent (B.C. 153) into Farther Spain as prætor, he experienced at first a considerable check; but not long after retrieved his credit, and gained several advantages, which, though not very decisive, yet obtained for him the honours of a triumph. (*Appian, Bell. Hisp.*, 56.—*Schweigh.*, *ad loc.*) Having been elected consul B.C. 146, and charged with the continuance of the war against the Achaean league, he received the command of the forces from Metellus, encamped under the walls of Corinth, and defeated the enemy in a pitched battle. This victory put him in possession of the city, which was plundered and burned by his troops. The finest works of art became the prey of the conquerors, and were either destroyed in the conflagration or sent off to Rome. It is said that Mummius, in the true spirit of a rude and unlettered soldier, made it an express condition with those who had contracted to convey, on this occasion, some of the choicest works of art to Rome, that if they lost any they must replace them by new ones! ("si eas perdidissent, novas esse reddituros."—*Vell. Paterc.*, 1, 13). On his return, Mummius was honoured with another triumph, and obtained the surname of *Achaicus*. He was elected consul a second time, B.C. 141, during which year the Capitol was gilded. (*Plin.*, 33, 3.) Mummius died so poor as not to leave sufficient for a dowry for his daughter, who accordingly received a portion from the senate. He left some orations behind him, which Cicero characterizes as plain and old-fashioned in their style ("simplex quidem L. Mummius et antiquus."—*Brut.*, 25.) But the same writer does justice elsewhere to his great probity and disinterestedness, in bringing back from

Corinth nothing wherewith to make himself a richer man. (*De Officiis*, 2, 23.) Appian states that Mummius was condemned under the Varian law, and punished with exile, and that he ended his days at Delos. (*Bell. Civ.*, 1, 37.) This, however, is very probably an error on the part of the historian, who seems to have confounded him with L. Memmius, mentioned by Cicero in his *Brutus* (c. 89.—Consult *Schweigh.*, *Ind. ad App.*, s. v. *Mummius*.—*Freinshem.*, 71, 41).—II. Spurius, brother of the preceding. He is mentioned by Cicero, with more praise as a public speaker than his brother; and is also said to have been attached to the Stoic philosophy. (*Cic., Brut.*, 25.)

MUNATIUS, PLANCUS, a Roman whose name frequently occurs in the history of the civil wars. He was one of Caesar's warmest partisans, and was sent by him into Gaul to found colonies there. He was also intended by him for the consulship. After the battle of Mutina, he joined his forces to those of Antony and Lepidus, and became consul with the former, A.U.C. 712. He afterward accompanied Antony into Egypt, where he performed the part of a vile courtier, and even of a buffoon, around the person of Cleopatra. When fortune deserted his protector, he turned his back upon him and embraced the party of Octavianus. In 732 he was chosen censor. We have several letters of his among the correspondence of Cicero. They betray the equivocal character of the man. (*Schöll, Hist. Lit. Rom.*, vol. 2, p. 149.)

MUNDA, a strongly fortified and large city of Hispania Bætica, on the coast, southwest of Malaca. (*Strabo*, 141, 160.) In its vicinity was fought the famous battle between Caesar and the sons of Pompey, which put an end to the war. (*Hirt., Bell. Hisp.*, c. 31.) It was a most desperate action, and even the veterans of Caesar, who for upward of fourteen years had signalized their valour, were compelled to give way. It was only by the most vigorous exertions that the sons of Pompey were at last defeated. Caesar is said to have given up all for lost at one period of the fight, and to have been on the point of destroying himself. As he retired after the battle, he told his friends that he had often fought for victory, but that this was the first time he had fought for his life. Caesar is said to have lost 1000 of his best soldiers: the enemy had 30,000 slain. The battle was fought the 17th March, B.C. 45. After the battle, the siege of Munda ensued, and the assailants are said actually to have made use of the dead bodies of the enemy in elevating their mound to a sufficient height. The little village of *Monda* in Grenada is supposed to lie near the ancient city. (*Plin.*, 3, 3.—*Liv.*, 24, 42.—*Sil. Ital.*, 3, 400.—*Florus*, 4, 2.—*Dio Cass.*, 43, 39.—*Val. Max.*, 7, 6.)

MUNYCHIA (and $\alpha\varsigma$), one of the ports of Athens, so called, it is said, from Munychus, an Orchomenian, who, having been expelled from Bæotia by the Thracians, settled at Athens. (*Diod. Sic., fragm.*, 7.) Strabo describes it as a peninsular hill, connected with the continent by a narrow neck of land, and abounding with hollows, partly natural and partly the work of art. When it had been enclosed by fortified lines, connecting it with the other ports, Munychia became a most important position, from the security it afforded to these maritime dependencies of Athens, and, accordingly, we find it always mentioned as the point which was most particularly guarded when any attack was apprehended on the side of the sea. (*Thucyd.*, 8, 92.—*Xen., Hist. Gr.*, 2, 4.—*Plut., Vit. Phoc.*—*Cramer's Anc. Greece*, vol. 2, p. 351.) Hobhouse, in speaking of the Munychian harbour, observes, "the old harbour of Munychia is of a circular form: there are several remains of wall running into the water, and a piece of pier is to be seen at each side of the mouth of it; so that the entrance, as well as the

whole port, is smaller than that of the Piræus. The direction of the port is from south to north. If the harbour once contained four hundred ships, each vessel must have been a wherry." (Vol. 1, p. 301, *Am. ed.*) See more on this subject in the remarks on the articles Phalerus and Piræus.

MURÆNA, I. L. Licinius, a Roman commander. He had charge of Sylla's left wing in the battle with Archelaus, near Cheronea, and contributed powerfully to the victory which Sylla gained on that occasion. After the latter had concluded a treaty of peace with Mithradates, he left MURÆNA in command of the Roman forces in Asia, who, not long after, broke the treaty and invaded Cappadocia, plundering the treasures of the temple at Comana. Mithradates, however, met and defeated him on the banks of the Halys. (*Vid.* Mithradates VI.)—II. The son of the preceding, a consul, and colleague of D. Silanus, was accused by Servius Sulpicius and Cato of having been guilty of bribery in suing for the consulship, and was ably defended by Cicero. The oration delivered on this occasion is still extant. MURÆNA was acquitted.

MURSA, a city of Pannonia Inferior, on the Dravus, a short distance to the west of its junction with the Danube. It was founded by Hadrian, and in its vicinity Magnentius was defeated by Constantius. It corresponds to the modern *Essek*, the capital of Slavonia. (*Steph. Byz.*, p. 472.—*Ptol.*)

MURRIA or MURCIA, a surname given to Venus by the Romans. The more popular orthography with the ancient writers was *Myrtia*, from *myrtus*, "the myrtle," and various reasons are assigned for this etymology. (*Serv. ad Eclog.*, 7, 62.—*Ovid, Fast.*, 4, 141.—*Serv. ad Georg.*, 2, 64.) The other form of the name, *Murcia*, is explained as follows by St. Augustine (*de Civ. Dei*, 4, 16): "*Dea Murcia, quæ præter modum non moveretur, ac faceret hominem, ut ait Pomponius, murcidum, id est, nimis desidiosum et inactuosum.*" (Compare *Arnobius*, l. 4, p. 132.) She had a temple at the foot of the Aventine Hill, and hence this hill was anciently called *Murcius*. (*Festus*.—*Liv.*, 1, 33.)

MUSA, Antonius, a celebrated physician at Rome, in the age of Augustus. He is commonly supposed to have been a freedman of that emperor's. Some, however, make him to have been of Greek origin, and the son of a parent named Iasus. Pliny speaks of a brother of Musa's, named Euphorbus, who was physician to Juba II., king of Mauritania; and he adds, that a certain plant, the virtues of which were discovered by him, received from this prince the complimentary name of Euphorbia. (*Plin.*, 25, 7.) Musa had received an excellent education. It appears that he took up the study of medicine merely with the view of relieving his own father, who was weighed down with infirmities, and his filial piety was richly rewarded by the distinguished proficiency to which he attained in the healing art. His reputation became established by a successful cure which he performed in the case of the emperor. Augustus had been suffering for a long time under a complaint about which the ancient writers give us no exact information, but which the imperial physicians appear only to have aggravated by the use of warm remedies. Musa was at length called in, and the emperor placed himself in his hands. Discarding all fomentations and heating remedies, Musa prescribed the cold bath and refreshing drinks, and Augustus soon recovered the health to which he had long been a stranger. (*Sueton.*, *Vit. Aug.*, 81.—*Dio Cass.*, 53, 30.—*Plin.*, 29, 1.) Augustus and the senate not only presented Musa with a considerable sum of money, but also bestowed upon him the rank of an *eques* or knight, and caused a brazen statue to be erected to him in the temple of Æsculapius. (*Ackermann, Prolus. de Ant. Mus.*, § 6, p. 15.) It is also said, that, out of consideration for Musa, the whole medical profession were to be exempted

from taxes for the time to come. Indeed, from this period, instruction in the healing art became more highly esteemed at Rome, and was placed on a level with the teaching of Philology, Rhetoric, and Philosophy. (Consult *Gaupp, de prof. et med. eorumque privileg.*, p. 29, *Vratislav.*, 1827.) Musa was not always, however, so successful in his practice; and the use of the cold bath, which had saved Augustus, hastened, or, at least, could not prevent, the death of the young Marcellus. This, at least, is the account given by Dio Cassius (53, 30). It must be observed, however, in justice to Musa, that Suetonius, Velleius Paterculus, Pliny, and Tacitus, are silent on this head. Dio Cassius, in another passage (53, 33), states, that Livia was suspected by some of having caused poison to be administered to young Marcellus, which baffled all the skill of his physicians; but he adds, that the prevalence of a severe epidemic during that and the following year, by which great numbers perished, rendered this suspicion somewhat improbable. Velleius Paterculus, Pliny, and Tacitus make no such reproach to the memory of Musa; and Servius, in a note to Virgil (*Æn.*, 6, 862), attributes the death of Marcellus to a different cause. (Compare *Bianconi, Lettres sur Celse*, p. 59.—*Rose, Diss. de Aug. contr. med. curato, Hal.*, 1741.) The cold bath, after this, was for a long time discontinued, until Charmis of Massilia brought it again into use at Rome, with great emolument to himself and advantage to invalids. (*Plin.*, l. c.—*Essai Hist. sur le Med. en France*, p. 20, *Paris*, 1762.)—The talents of Musa do not appear to have been confined to the medical art. Virgil praises his spirit and taste in an epigram contained in the *Catalecta* (13), in which he says that Phœbus and the Muses had bestowed upon him their choicest gifts. He appears, in fact, to have been on intimate terms with both Virgil and Horace, the latter of whom he advised to leave off bathing at Baiæ. (*Epist.*, 1, 15.) Musa is said to have been the first that made use of the flesh of vipers in curing ulcers, and employed, as simples, lettuce, succory, and endives. He was the inventor of many remedies, which all bore his name. (*Galen, de Comp. Med.*, sec. loc., lib. 8, p. 287, &c.—*Plin.*, 29, 6.)—Two works are erroneously ascribed to Musa; one a treatise "*De Herba Betonica*," published by Humelberg with notes, *Tigur.*, 1537, 4to; and the other a poetical fragment, "*De tuenda valetudine*," addressed to Mæcenæus, which appeared at Nuremberg, 1538, 8vo, under the editorial care of Troppau. The genuine fragments of Musa were collected by Caldani: "*Antoniæ Musæ fragmenta quæ extant*," *Basano*, 1800, 8vo.—There is a curious dissertation of Bishop Atterbury's (*Lond.*, 1740, 8vo), in which he undertakes to prove that Virgil has commemorated Musa in the twelfth book of the *Æneid*, under the character of Iaspis. (*Biogr. Univ.*, vol. 30, p. 465, seq.—*Sprengel, Hist. Med.*, vol. 2, p. 23, seq.—*Bähr, Gesch. Röm. Lit.*, vol. 1, p. 691.)

MUSÆ, certain goddesses who presided over poetry, music, and all the liberal arts and sciences, and who were the daughters of Jupiter by the nymph Mnemosyne. No definite number of the Muses is given by Homer; for the verse in which they are said to be nine is now regarded as spurious. (*Od.*, 24, 60.) Perhaps originally, as in the case of the Erinyes and so many other deities, there was no precise number. Pausanias (9, 29, 1) gives an old tradition, according to which there were only three Muses: Melete (*Practice*), Mneme (*Memory*), and Aoede (*Song*). Aratus said there were four, the daughters of Jupiter and the nymph Plusia (*Wealthy*), and that their names were Thelixoës (*Mind-soother*), Aoede, Melete, and Arche (*Beginning*.—*Cic.*, *N. D.*, 3, 21.—*Eudocia*, 294). Alcman and some other poets made the Muses the daughters of Heaven and Earth. (*Diod. Sic.*, 47.—*Pausan.*, 9, 29, 4.) The more received opinion makes them nine in number, and, as we have already remark-

ed, the daughters of Jupiter and of Mnemosyne, the goddess of Memory. (*Hes., Theog.*, 53, *seqq.*—*Id. ib.*, 76.)—The names of the Muses were Calliope, Clio, Melpomene, Euterpe, Erato, Terpsichore, Urania, Thalia, and Polymnia, an account of each of whom will be found under their respective names, as well as of the particular departments which later ages assigned to each.—Pieria in Macedonia is said by Hesiod (*Theog.*, 53) to have been the birthplace of the Muses; and everything relating to them proves the antiquity of the tradition, that the knowledge and worship of these goddesses came from the North into Hellas. (*Buttmann, Mythol.*, vol. 1, p. 293.—*Voss, Mythol. Briefe*, vol. 4, p. 3.—*Müller, Orchom.*, p. 381.—*Id., Prolegom.*, p. 219.) Almost all the mountains, grottoes, and springs from which they have derived their appellations, or which were sacred to them, were in Macedonia, Thessaly, Phocia, or Boeotia. Such are the mountains Pimpla, Pindus, Parnassus, Helicon; the fountains Hippocrene, Aganippe, Castalia; and also the Corycian Cave.—The Muses, as Homer informs us (*Il.*, 2, 594), met the Thracian Thamyris in Dorion (in the Peloponnesus) as he was returning from Cechalia. He had boasted that he could excel them in singing; and, enraged at his presumption, they struck him blind and deprived him of his knowledge of music. Shortly after the birth of these goddesses, the nine daughters of Pierus, king of Æmathia, are said to have challenged them to a contest of singing. The place of trial was Mount Helicon. At the song of the daughters of Pierus, the sky became dark, and all nature was put out of harmony; but at that of the Muses, the heavens themselves, the stars, the sea, and the rivers, stood motionless, and Helicon swelled up with delight, so that his summit would have reached the sky had not Neptune directed Pegasus to strike it with his hoof. The Muses then turned the presumptuous maidens into nine different kinds of birds. (*Nicander, ap. Anton. Lib.*, 9.) Ovid, who relates the same legend (*Mét.*, 5, 300, *seqq.*), says they were turned into magpies, and he is followed by Statius. (*Silv.*, 2, 4, 19.)—The most probable derivation of the name *Muse* (*Μοῦσα*) seems to be that which deduces it from the obsolete verb *μῦναι*, "to inquire" or "invent;" so that the Muses are nothing more than personifications of the inventive powers of the mind as displayed in the several arts. (*Keightley's Mythology*, p. 185, *seqq.*)

MUSÆUS, I. an early Greek bard, of whom little more is known than of Orpheus, the history of his life being enveloped in mystery and encumbered with fables. Plato calls him the son of Selene, and, as if to leave no doubt about the meaning of this latter name, Hermesianax, in a passage of his *Leontion*, preserved by Athenæus, says that Mene, that is, the Moon, was the mother of this poet, whom he styles the favourite of the Graces. (*Athen.*, 13, p. 597, c.—Compare *Schol. ad Aristoph., Ran.*, 1065.) Others merely make a nymph to have been his parent. Musæus was born either at Athens or at Eleusis, for the ancient writers are not agreed upon this point: he was originally, however, from Thrace, and descended from the illustrious family of the Eumolpidae, which owed its origin to the Thracian Eumolpus. This family was in possession of certain mysteries and peculiar rites of initiation, and claimed from father to son the gift of prophecy. Musæus was the fourth or fifth in descent from Eumolpus: tradition named Antiphones for his father. He is placed in the Arundelian marbles at 1426 B.C., when his hymns are said to have been received into the celebration of the Eleusinian mysteries. He passed the greater part of his life at Athens, and in the time of Pausanias, the quarter of the city where he had resided, and where he was also interred, still bore the name of Museum (*Μουσῆον*).—*Pausan.*, 1, 25.) He was married to Deiope, by whom he had Eumolpus the younger, who presided at the expiation of

Hercules. Some traditions made Musæus the disciple of Orpheus; others, on the contrary, call him the preceptor of the latter; and Suidas states expressly, that, although a disciple of Orpheus, he was more advanced in years than the latter, who bequeathed to him his lyre. According to another tradition, this instrument was intrusted to Musæus by the Muses, who had found it on the seashore after the death of Orpheus.—The poems of Musæus, neglected very probably at a later period, when the poetry of Ionia, more consonant with the genius of the Greek nation, became widely diffused, were interpolated to such a degree, that, when in a subsequent age they became the subject of critical investigation, it was no longer possible to distinguish between what was original and what had been added. Pausanias (1, 22) regarded the hymn in honour of Ceres as the only genuine one: all the rest appeared to him the work of Onomacritus, who was contemporary with the Pisistratids; for the poem of *Hero and Leander*, which we have remaining, is by another Musæus, surnamed the grammarian.—We will now proceed to enumerate the titles of the works ascribed to the ancient bard.—*Ὀρακτοὶ* ("Oracles"). Musæus, according to Herodotus (8, 96), had predicted the happy issue of the battle of Salamis; that is, some one had applied to this event, so glorious for the Greeks, one of the old prophecies preserved among the people; just as was afterward done with regard to the three verses preserved for us by Pausanias (10, 9), and in which the Athenians saw, with the more willingness, a prediction relative to the battle of Ægos Potamos, because it confirmed the suspicions they had before entertained of the treachery of Adimantus. This last-mentioned oracle of Musæus, and also another, likewise in three verses, preserved by Clemens Alexandrinus (*Stromata*, 8, p. 738), are the two chief fragments that remain to us of the poetry of Musæus. His oracles were collected by Onomacritus, in obedience to the orders of Hipparchus; but the poet Lasus, of Hermione, having detected the fraud practised by Onomacritus, who had intermingled his own productions with these ancient prophecies, Hipparchus drove the impostor into exile. (*Herodotus*, 7, 6.) It appears, that after this it was impossible to distinguish what belonged to Musæus from what had been interpolated by Onomacritus.—2. *Τελεταὶ* ("Initiations"). A passage in the Republic of Plato (vol. 6, p. 221, *ed. Bipont.*) explains the object of this species of poetry: by these initiatory forms the acts of sacrilege committed either by individuals or entire communities were expiated. They were also cited under the title of *Καθαρμοὶ* ("Purifications"), or *Παραλύσεις* ("Absolutions").—3. *Ἀντίοις νόσων* ("Charms against maladies"). Cited by Aristophanes (*Ran.*, 1033) and Eustathius (*ad. Il.*, *introd.*).—4. *Σφαῖρα* ("The Sphere"). An astrological poem. Diogenes Laertius, in speaking of Musæus, says, *ποιῆσαι δὲ Θεογονίαν καὶ Σφαῖραν πρῶτον*: the meaning of this is, that he was the first who versified such subjects as a Theogony and the Sphere. Sir Isaac Newton incorrectly gives this a literal translation, that Musæus was the first who constructed a sphere, and on this error is founded the calculation of that celebrated mathematician, according to which the Argonautic expedition took place 936 B.C. (Consult *Clavier, Hist. des premiers temps de la Grèce*, 2d ed., vol. 3, p. 24.)—5. *Θεογονία* ("A Theogony").—6. *Τιτανογραφία*, a description of the war of the Titans.—7. *Ἐπιόχαι* ("Precepts"). Addressed to his son Eumolpus. Also cited under the title of *Εὐμολπία ποίησις*. It is supposed by some to have been a code of instructions for the celebration of the mysteries. According to Suidas, it contained 4000 verses.—8. *Κρατὴρ*. Servius (*ad Æn.*, 6, 667) is the only one that cites this poem. He says it was the first production of Musæus, and was dedicated to Orpheus. The title would seem to in-

dicate a work of a mixed character, as the term *κρατήρ* denotes a vessel in which wine and water were mixed.

—9. *A Hymn to Ceres*. Cited by Pausanias as the only authentic production of Musæus. It was composed for the family of the Lycornedæ, who appear to have cherished a particular veneration for Ceres; for they possessed a temple of this goddess, which was destroyed by the Persians, and which Themistocles, who belonged to this same family, rebuilt. (*Plut., Vit. Them.*)—10. *A Hymn in honour of Bacchus*. Cited by Ælius Aristides in his Eulogium on this divinity.—11. *Ἐπὶ Θεσπρωτῶν* ("Of the Thesprotians"). Clemens Alexandrinus states, that Eugammon of Cyrene, a poet who flourished about the 53d Olympiad, claimed this as his own production, and published it under his own name. To render such an act of plagiarism at all possible, the poem of Musæus must have previously fallen into complete oblivion. It contained a description of the remarkable things in Thesprotia.—12. *Isthmian Songs*. Cited by the scholiasts on Euripides and on Apollonius Rhodius. These cannot, however, have been productions of Musæus, as he lived before the establishment of the Isthmian games.—The few scattered remains that we possess of Musæus have been reunited by H. Stephens, in his collection of the philosophic poets, and, among others, by Passow, in his "*Musæus, Urchrift, Uebersetzung, Einleitung, und Kritische Anmerkungen*," Leipzig, 1810, 8vo.—II. A native of Ephesus, who resided at Pergamus. He was the author of an epic poem in ten books, entitled *Perseis*, and also of other effusions in honour of Eumenes and Attalus. Moreri thinks that he wrote the *Isthmian Songs*, which the scholiasts on Euripides and on Apollonius Rhodius cite under the name of Musæus. He does not appear to have been the writer of whom Martial speaks (12, 97).—III. A grammarian, the author of a poem founded on the story of Hero and Leander. Opinions have greatly varied relative to the age of this production. Julius Cæsar Scaliger believed that it was the composition of the elder Musæus, the Athenian, and anterior, consequently, to the *Iliad* and *Odyssey*. (*Ars Poet.*, 5, 2, 214.) The poem in question is undoubtedly, as far as regards the story itself and the diction in which it is arrayed, worthy of a place among the earlier poems of the Greeks; and yet, at the same time, it bears evident marks of a much more recent origin, as well in the colouring of sentiment with which the author has softened down the plainer and less delicate handling of such subjects as this, which marked the earlier writers, as in some of the images which are occasionally introduced. For example, no poet of the Homeric age would have indulged in such a sentiment as the following: "The ancients falsely asserted that there were only three Graces: every laughing glance of Hero's blooms with a hundred." The opinion, therefore, of the elder Scaliger has been rejected by Joseph his son, and by all subsequent critics. Some have placed this poem in the 13th or 13th century, because the first and only mention of it is made by Tzetzes, who speaks of it in his *Chiliads* (2, 435; 10, 520; 13, 943). The purity of language, however, and the taste which distinguish this production of Musæus, do not warrant the opinion of its having been so modern a work. Hence some critics have endeavoured to show that Achilles Tatius and Aristænetus had it under their eyes when they wrote. Now Achilles Tatius is supposed by the best philologists to have written about the middle of the fifth century, and Aristænetus about the close of the same century. Again, Hermann, in his remarks on the changes experienced by the Greek hexameter, has shown that the poem of Hero and Leander is later than the *Dionysiaca* of Nonnus. From all these approximations, therefore, we may fix the era of the poem in question between 430

and 480 A.D. A circumstance, moreover, unimportant in itself, comes in support of this calculation. All the manuscripts give to the author of the poem the title of grammarian: now, among the letters of Procopius of Gaza, there is one addressed to a certain Musæus: and though he is not styled, in the address, a grammarian, yet the letter evidently is intended for a person of this description. The period when Procopius flourished is fixed at about 520 A.D. If we suppose, then, that the poem of Hero and Leander was a production of Musæus's youth, and that he had attained an advanced age when Procopius addressed to him the letter in question, perhaps between 480 and 500 A.D., nothing will prevent our regarding the correspondent of Procopius as the author of this poem, which thus might have been composed before 450 A.D.—The poem in question bears the following title, *Τὰ κατ' Ἡρώ καὶ Λέανδρον*. It consists of 340 hexameters. The story on which it is founded is an old one; Virgil and Ovid were both acquainted with it, and it bears on its very front the stamp of antiquity: the merit of the composition, however, does not the less belong to the poet. "The Hero and Leander," observes Elton, "exhibits that refinement of sentiment, and that sparkling antithetical ornament which are the indications of modern composition. It is a beautiful and impetioned production; combining in its love-details the warmth and luxuriance of Ovid, with the delicate and graceful nature of Apollonius Rhodius; and, in the peril and tumult of the catastrophe, rising to the gloomy grandeur of Homeric description." (*Specimens of the Classic Poets*, vol. 3, p. 330.—Schöll, *Hist. Lit. Gr.*, vol. 1, p. 46, seqq.—*Id.*, vol. 3, p. 123, seqq.—*Id.*, vol. 6, p. 85, seqq.) The best editions of Musæus are, that of Schrader, *Leopold.*, 1742, 8vo, and *Magd.*, 1775, 8vo, improved by Schäffer, *Lips.*, 1825, 8vo; that of Passow, *Lips.*, 1810, 8vo; and that of Möbius, *Hal.*, 1814, 8vo.

MUTIA or MUCIA, a daughter of Q. Mutius Scaevola, and sister of Metellus Celer. She was Pompey's third wife. Her infidelity induced her husband to divorce her, on his return from the Mithradatic war, although she had borne him three children. Cæsar was the seducer; and hence, when Pompey married Cæsar's daughter, all blamed him for turning off a wife who had been the mother of three children, to espouse the daughter of a man whom he had often, with a sigh, called "his *Ægisthus*." Mucia's disloyalty must have been very public, since Cicero, in one of his letters to Atticus, says, "*Divortium Mucia vehementer probatur.*" (*Ep. ad Att.*, 1, 12.)

MUTINA, a city of Cisalpine Gaul, now *Modena*, situate on the *Æmilian Way*, in a southeast direction from Placentia and Parma. It is often mentioned in history, and more particularly during the stormy period which intervened between the death of Cæsar and the reign of Augustus. Livy asserts (39, 56) that Mutina was colonized the same year with Parma, that is, 569 U.C.; but Polybius speaks of it as a Roman colony thirty-four years prior to that date (3, 40). Cicero styles it (*Phil.*, 5, 9) "*firmissimam et splendidissimam Populi Romani Coloniam.*" It sustained a severe siege against the troops of Antony, A.U.C. 709. D. Brutus, who defended the place, being apprized of the approach of the consuls Hirtius and Pansa by means of carrier-pigeons, made an obstinate defence. Antony, being finally defeated by those generals and Octavius, was forced to raise the siege. (*Liv., Epit.*, 118 et 119.—*Cic., Ep. ad Fam.*, 10, 14.—*Vell. Pat.*, 2, 61.—*Florus*, 4, 4.—*Suet., Aug.*, 10.) Mutina was also famous for its wool. From Tacitus (*Hist.*, 2, 52) we learn that it was a municipium. (*Cramer's Anc. Italy*, vol. 1, p. 56.)

MUTINUS. *Vid.* MUTUNUS.

MUTUS or MUCIUS. *Vid.* SCAEVOLA.

MUTRUS or MUTINUS, a deity among the Romans,

much the same as the Priapus of the Greeks. His temple was at first in the city, but was afterward, in the time of Augustus, removed to the twenty-sixth milestone. Festus calls him *Mutinus Titinus*. (Consult *Lactant.*, 1, 30.—*Arnob.*, 1, 4, p. 131.—*August.*, *de Civ. Dei*, 4, 11.—*Id. ib.*, 6, 9.—*Tertull.*, *Apol.*, c. 25.—*Dulaure*, *Hist. des Cultes*, vol. 2, p. 160, *seqq.*)

MUZĒRIS, a harbour of India intra Gangem, on the western coast, below the Sinus Barygazenus. It was much frequented in the first century of our era, though somewhat dangerous to visit on account of the pirates in its vicinity. (*Plin.*, 6, 23.) It appears to correspond to the modern *Mirano* or *Mirdachno*. (*Mannert*, *Geogr.*, vol. 6, pt. 1, p. 199, *seqq.*)

MYCALE, I. a promontory of Ionia, in Asia Minor, opposite the island of Samos. It is a continuation of Mount Messogis, which chain ran along the upper side of the Mæander for the greater part of its course. Mycale was known to Homer (*Il.*, 2, 869), and, at a later day, the Panionium, or solemn assembly of the Ionian states, was held in a temple situate at its foot. (*Herod.*, 1, 148.) Its principal celebrity, however, arose from the battle that was fought here between the Greeks and Persians on the 23d of September, 479 B.C., the same day that Mardonius was defeated at Platæa. The battle of Mycale took place in the morning, that of Platæa in the evening. The Samians, without the knowledge of their tyrant or the Persians, had sent messengers to invite the Grecian fleet at Delos to pass over to Ionia, assuring the commanders of their superiority to the Persian force in those seas, and of the disposition of the Ionians to revolt. The Greeks complied; and on their approach, the Persian leaders, feeling themselves too weak for a sea-fight, sent away the Phœnician ships, and, bringing the others to the promontory of Mycale, near Miletus, where the land-army was encamped, drew them upon the beach, an easy thing with the light vessels used in ancient war, and surrounded them with a rampart. The Persian land-army was under the command of Tigranes, and amounted to 60,000 men. It had been left by Xerxes, when he began his expedition, for the security of Ionia: he himself was still at Sardis. The army was posted in front of the ships. The chief commander of the Greeks was Leotychides, a Spartan of one of the royal houses. On arriving, he repeated, with the same double purpose, the stratagem of Themistocles at Artemesium. Sailing along the shore, he made proclamation by a herald to the Ionians, bidding them remember that the Greeks were fighting for their liberty. The Persians were already jealous of the Samians, because they had ransomed and sent home some Athenian prisoners; and their suspicions being strengthened and made more general by the proclamation, they disarmed the Samians, and sent the Milesians to guard the passes, under pretence of profiting by their knowledge of the country, but really to remove them from the camp. The Athenians, advancing along the beach, commenced the action, followed by the Corinthians, Troezenians, and Sicyonians. After some hard fighting they drove the enemy to his intrenchments, and then forced the enclosure, on which the mass of the army fled, the Persians only still resisting. It was not till now that the Lacedæmonians came up, having been impeded by steep and broken ground. On seeing the Greeks prevailing, the Samians, though unarmed, did what they could in their favour, and the other Ionians followed their example, and sided with the Greeks. The Milesians, who had been sent to guard the passes by the Persians, turned against them, and slaughtered the fugitives. All Ionia now revolted. The fleet proceeded to Samos, where a consultation was held on the fate of that country. It could not protect itself unassisted, and its defence was a burden the Greeks were loath to support. The Peloponnesians proposed to remove the inhabitants, and settle

them on the lands of those states that had joined the common enemy: but the Athenians were averse to the desolation of Ionia, and jealous of the interference of others with their colonies; and when they urged the reception of the Ionians into the confederacy, the Peloponnesians gave way, and the Samians, Chians, and other islanders who had joined the fleet were admitted.—Herodotus states, that, after the disembarkation of the Greeks, and previous to the battle, a herald's wand was discovered by them on the beach as they were advancing towards the enemy, and that a rumour, in consequence, circulated among the Greeks that a victory had been obtained by their countrymen over the forces of Mardonius. Nothing, indeed, could be more natural than such a rumour, whether it be considered as the effect of accident or design: that it should afterward have been found to coincide with the truth, is one of those marvels which would be intolerable in a fictitious narrative, and yet now and then occur in the real course of events. Being believed, however, without any reason, it was much more efficacious in raising the confidence and courage of the Greeks than if it had been transmitted through any ordinary channel on the strongest evidence. For now the favour of the gods seemed visible, not only in the substance, but in the manner of the tidings. (*Thirlwall's Greece*, vol. 2, p. 358.—*Herod.*, 9, 98, *seqq.*)—Mount Mycale, according to Strabo, was well wooded, and abounded with game; a character which, as Chandler reports, it still retains. This traveller describes it as a high ridge, with a beautifully-cultivated plain at its foot, and several villages on its side. (*Travels*, p. 179, *seq.*)—It has been a subject of considerable discussion among commentators, to ascertain the meaning of Cornelius Nepos, in his Life of Cimon (2, 2), where he makes this commander to have gained a victory at Mycale over the combined fleets of the Cyprians and Phœnicians. The battle is described by Diodorus Siculus (2, 61), and by Plutarch in his Life of Cimon. It is mentioned also by Thucydides (1, 100), by Plato (*Menez.—Op.*, ed. Bek., pt. 2, vol. 3, p. 391), by Polyænus (1, 34), by Frontinus (4, 7, 45), and by Mela (1, 14). But all these authorities uniformly make the battle to have been fought at the river Eurymedon, not far from Cyprus. In order to free Cornelius Nepos from the charge of a gross error, it is best to adopt the opinion of Tzschucke, who thinks that there must have been a second and obscurer Mycale, near the Eurymedon in Pamphylia, where the battle above referred to was fought. (Compare Fischer, *ad Corn. Nep.*, l. c.)

MYCALESSUS, a city of Boeotia, northeast of Thebes, and a short distance to the west of Aulis. It was an ancient place, and known to Homer. (*Il.*, 2, 498.—*Hymn. in Apoll.*, 224.) We learn from Thucydides, that, in the Peloponnesian war, Mycalessus sustained a most afflicting disaster, owing to an attack made upon it by some Thracian troops in the pay of Athens. These barbarians, having surprised the town, put all the inhabitants to the sword, sparing neither women nor children, since they savagely butchered a number of boys who were assembled in the public school belonging to the place. The historian affirms, that this was one of the greatest calamities which ever befell a city. (*Thucyd.*, 7, 30.—*Pausan.*, 1, 23.—*Strabo*, 404.) The only remarkable building which it possessed was a temple of Ceres. Sir W. Gell has the following note on the ruins of this ancient town. "Blocks, and foundations of a temple, and tombs; possibly the temple of Ceres Mycalessia. The wall of a city on the left, about three hundred yards. Many traces, probably, of Mycalessus." (*Itin.*, p. 130.—*Cramer's Anc. Greece*, vol. 2, p. 161, *seqq.*)

MYCENÆ, I. an ancient city of Argolia, in a north-eastern direction from Argos. It was said to have been founded by Perseus, after the death of his grand-

father Acrisius. (*Pausanias*, 2, 18.—*Strabo*, 377.) The name was supposed by some to be derived from Mycene, daughter of Inachus; but others assigned a different origin to the word, as may be seen from Pausanias (2, 16). Perseus was succeeded by Sthenelus, married to a daughter of Pelope named Astydania; after whom followed Eurystheus, Atreus, and Agamemnon. Under the last named monarch, the empire of Mycenæ reached its highest degree of opulence and power, since his authority was acknowledged by the whole of Greece. (*Thucyd.*, 1, 9.—*Diod. Sic.*, 11, 65.)—Mycenæ, which had been superior even to Argos in the Trojan war, declined after the return of the Heracleids; and in the 78th Olympiad, or 468 B.C., the Argives, having attacked and captured the city, levelled it to the ground and enslaved its inhabitants. (*Diod. Sic.*, 11, 65.—*Strabo*, 373.) Pausanias attributes the destruction of Mycenæ to the envy which the glory acquired by the troops of that city at Thermopylæ and Plataea had excited in the minds of the Argives (2, 16.—Compare *Herod.*, 7, 202). But Diodorus affirms, that the war arose from a dispute relative to the temple of Juno, which was common to the two republics. Strabo states, that so complete was the destruction of this celebrated capital, that not a vestige remained of its existence. This assertion, however, is not correct, since Pausanias informs us that several parts of the walls were yet standing, as also one of the gates, surmounted by lions, when he visited the ruins. Modern travellers have given us a full and interesting account of these vestiges. The most remarkable among the remains of antiquity is what is termed the Treasury of Atreus. It is a hollow cone of 50 feet in diameter, and as many in height. It is composed of enormous masses of a very hard breccia, or sort of pudding-stone. This extraordinary edifice has obviously been raised by the projection of one stone above another, and they nearly meet at the top. The central stone at the top has been removed, along with two or three others, and yet the building remains as durable as ever, and will probably last to the end of time. Sir W. Gell discovered brass nails placed at regular distances throughout the interior, which he thinks must have served to fasten plates of brass to the wall. (*Gell's Argolis*, p. 29, seq.) These nails consist of 88 parts of copper and 12 of tin. Dr. Clarke opposes the opinion of this being the Treasury of Atreus, principally on the ground that it was without the walls of the city, deeming it far more probable, and more in conformity with what we find in ancient writers, that the Treasury was within the walls, in the very citadel. He considers it to be the Heroium of Perseus. (*Travels*, vol. 6, p. 493, *Lond. ed.*) Whatever may have been its use, it is worthy of notice, that cells of bronze or brass, i. e., covered within with plates of brass, were very common in ancient Argolis. Such, no doubt, were the brazen place of confinement of Danaë, and the lurking-place of Eurystheus when in fear of Hercules. The remains of the ancient walls are also very curious, being evidently of that style of building called Cyclopean. Among other things, the Gate of the Lions, mentioned by Pausanias, still remains. The modern village of Krabata stands near the ruins of Mycenæ.—The name of Mycenæ was probably derived from its situation in a recess (*μυκή*) formed by two mountains, and not, as Pausanias imagines, from a mushroom, or the pommel of a sword.

MYCERINUS, a king of Egypt, son of Cheops according to Herodotus (2, 129), but of Chemmis according to Diodorus (1, 64). The last-mentioned writer calls him Mecherinus (*Μεχερίνους*), a name which Zoega, by the aid of the Coptic, makes equivalent to "peaceful," and which agrees, therefore, very well with the epithet *ἡσυχος* ("mild" or "gentle"), applied to him by Herodotus (*l. c.*—*Zoega, de Obelisc.*, p. 415.) Mycerinus was remarkable for the justice and moder-

tion of his reign. Larcher makes him to have ruled over Egypt for the space of 30 years, he having ascended the throne, according to this critic, in B.C. 1073, and having been succeeded by Asychis B.C. 1053.—Mycerinus built one of the pyramids, which travellers usually call the third one. It is smaller in size than the others, but, was equally as expensive as the rest, being cased, according to Diodorus Siculus, half way up with Ethiopian marble. Herodotus informs us (2, 133) that this monarch, after having reigned for no great length of time, was informed by the oracle of Latona, at Butoe, that he was destined to live only six years longer; and that, on complaining that he, a pious prince, was not allowed a long reign, while his father and grandfather, who had been injurious to mankind and impious to the gods, had enjoyed each a long life, he was told that his short life was the direct consequence of his piety, for the fates had decreed that for the space of 150 years Egypt should be oppressed, of which determination the two preceding monarchs had been aware. (*Herod.*, *l. c.*—*Bähr*, *ad loc.*)

MYCŌNOS, one of the Cyclades, lying a little to the east of Delos. It is described by Athenæus (1, 14) as a poor and barren island, the inhabitants of which were consequently rapacious and fond of money. Strabo reports that they lost their hair at an early age, whence the name of Myconian was proverbially used to designate a bald person. (*Strabo*, 487.—Compare the words of Donatus, *ad Ter.*, *Hec.*, 3, 4: "*Myconi calce omnis juvenis*.") It was also said, that the giants whom Hercules had conquered lay in a heap under the island; a fable which gave rise to another saying (*πῶς Μύκωνος*), applied to those authors who confusedly mixed together things which ought to have been treated of separately. (*Plut.*, *Symp.*, 1, 2.—*Zenob.*, *Cent.*, 6, 17.—*Apollod.*, 1, 6, 2.) This island is mentioned by Thucydides (3, 29) and Herodotus (6, 118). Pliny assigns to it a mountain named Dimastus (4, 12). Scylax states that it had two towns (p. 22). The modern name of the island is *Myconi*. (*Cramer's Anc. Greece*, vol. 3, p. 409, *seqq.*)

MYGŌNIA, I. a province of Macedonia, which appears to have extended from the river Axios to the lake Bolbe, and at one period even to the Strymon. (*Herod.*, 7, 123.—*Thucyd.*, 1, 58.) It originally belonged to the Edones, a people of Thrace; but these were expelled by the Temenides. (*Thucyd.*, 2, 99.) Under the division of Mygdonia we must include several minor districts, enumerated by different historians and geographers. These are, Amphaxitis and Paraxia, Anthemus and Grestonia or Crestonia. (*Cramer's Anc. Greece*, vol. 1, p. 233.)—II. A district of Mesopotamia. The later geographical writers affix this name merely to the northeastern section of the land, especially to the country around Nimbia; Strabo, however, expressly includes the western part also. He farther mentions, that the name of the region, as well as that of the inhabitants (Mygdones), were first given by the Macedonians. (*Strab.*, 747.) In this latter particular he is wrong; for we find that the ten thousand, in their retreat, met with Mygdonians (*Xen.*, *Anab.*, 3, 3), united with the Armenians, who disputed with them the passage of the river Centries. Under the Macedonian sway, the name of Mygdonia began to be disused, and that of Anthemusia (*Ἀνθεμουσία*, "the blooming."—*Procop.*, *Pers.*, 1, 17) was employed in its stead, more especially with reference to the tract of country enclosed between Mons Masius, the Euphrates, and the Chaboras. (*Mannert, Geogr.*, vol. 5, pt. 2, p. 260, *seqq.*)

MYGŌNĪUS, I. a river of Mesopotamia, called also the Saocoras, rising in the district of Mygdonia, and falling into the Chaboras. It is now the *Hermas*, or, according to others, the *Sindechar*.—II. The epithet "Mygdonian" is applied by Horace (*Od.*, 2, 12, 22) to

Phrygia, either from a branch of the Mygdones having settled there at a very early period, while they were still regarded as a Thracian tribe, or else from one of the ancient monarchs of the land. In favour of the first of these opinions we have the authority of Strabo (575), who speaks of the Mygdones as occupying the northern parts of Phrygia. On the other hand, Pausanias makes the Phrygians to have received the appellation of Mygdonians from Mygdon, one of their early kings (10, 27). With Pausanias coincide Stephanus of Byzantium, and the scholiast on Apollonius Rhodius (2, 787). In Homer, moreover, the Phrygians are styled *λαοὶ Ὀρῆος καὶ Μύγδονος ἀντιθέοιο*. The first of these two opinions, however, is evidently the more correct one. It is more consistent with reason that a country should give an appellation to its ruler than receive one from him.

MYGDONUS or MYGDON, I. an ancient monarch of the Mygdones. (*Pausan.*, 10, 27.—*Vid.* Mygdonus II.)—II. A brother of Hecuba, Priam's wife, who reigned in part of Thrace. His son Corcebus was called *Mygdonides* from him. (*Virg.*, *Æneid*, 2, 341.)

MYLASA (*orum*), a city of Caria, situate to the southwest of Stratonicea, and a short distance to the north of the harbour Phycus. It was of Grecian origin, and was founded at a very early period, but by whom is uncertain. Here, at one time, resided Hecatomnus, the progenitor of Mausolus. (*Strabo*, 659.) Mylasa, as Strabo reports, was situate in a fertile plain, and at the foot of a mountain containing veins of a beautiful white marble. This was of great advantage to the city for the construction of public and other buildings; and the inhabitants were not slow in availing themselves of it; few cities, as Strabo remarks, being so sumptuously embellished with handsome porticoes and stately temples. (*Strabo*, 659.) It was particularly famous, however, for a very ancient temple of the Carian Jove, and for another, of nearly equal antiquity, sacred to Jupiter Osogus. In after times a very beautiful temple was erected here, dedicated to Augustus and to Rome. Mylasa suffered severely in the inroad of Labienus, during the contest between Antony and Augustus, but was subsequently restored. (*Dio Cass.*, 48, 26.) Pococke saw the temple to Augustus nearly entire, but it has since been destroyed, and the materials have been used for building a mosque. (*Pococke*, vol. 2, pt. 2, c. 6.—Compare *Chandler*, *Asia Minor*, c. 56.) Mylasa is now *Melasso*, and is at the present day remarkable for producing the best tobacco in Turkey. Mannert, however, thinks that Mylasa must be sought for in the vicinity of the modern *Mulla*, while Reichard (*Thes. Top. Novemb.*, 1824) is in favour of *Myllesch*.—As regards the ancient name of this city, it may be remarked that the older Greek writers, with the exception, perhaps, of Polybius (*de Virt.*, &c., l. 16, *ad fin.*), give *Μύλασσα* (*Mylassa*); while Pliny, Pausanias, Stephanus of Byzantium, Hierocles, and others, have *Mylasa* (*Μύλασα*), and with this latter form the coins that have been discovered appear to agree. (*Mannert*, *Geogr.*, vol. 6, pt. 3, p. 281.)

MYLE or MYLÆ, now *Milazzo*, was situate on a tongue of land southwest of Pelorum, on the northern coast of Sicily. Between this place and a station called Naulochus, the fleet of Sextus Pompeius was defeated by that of the triumvir Octavius, under the command of Agrippa. (*Thucyd.*, 3, 90.—*Plin.*, 3, 8.—*Vell. Patern.*, 2, 79.) Reichard makes Myle answer to the modern *Melilli*. (*Thes.*; *tab. Sic.*)

MYLITTA, a surname of Venus among the Assyrians. (*Herod.*, 1, 131, 199.—Consult the remarks of *Rhode*, *Heilige Sage der alten Baktrer*, *Moder*, und *Paser*, p. 279, *seqq.*—*Dulaure*, *Hist. des Cultes*, vol. 2, p. 190, *seqq.*)

MYNDUS, a maritime town of Caria, northwest of Halicarnassus, on the northern shore of the peninsula

below the Sinus Iassius. It was founded by a colony from Trozene (*Pausan.*, 2, 30), and appears to have been at no great distance from Halicarnassus, since Alexander marched over the intervening space in one night with a part of his troops. (*Arrian*, 1, 24.) The city was a strong one, and Alexander would not stop to besiege it, though he attempted, but without success, to take it by surprise. Hierocles gives it, probably by corruption, the name of Amyndus. Pliny, besides Myndus, speaks of Palamyndus (5, 29); and perhaps his Neapolis is no other than the new town. (Compare *Mela*, 1, 16.)—"We can hardly doubt," remarks Leake, "that Myndus stood in the small sheltered port of *Gemishli*, where Captain Beaufort saw the remains of an ancient pier at the entrance of the port, and some ruins at the head of the bay." (*Journal*, p. 228.) Palamyndus may have been situate, as Mannert supposes, near the Cape Astypalæa of Strabo, which derived its name probably from that circumstance, and which Cramer takes to be the peninsula of *Pasha Liman*; but Myndus itself must be *Mentesha*. (*Cramer's Asia Minor*, vol. 2, p. 176.)

MYONNESSUS, I. a town of Asia Minor, between Teos and Lebedus, and situated on a high peninsula. (*Strab.*, 643.—*Liv.*, 37, 27.) The hill of Myonessus is now called *Hypirli-bounus*, and is described by modern travellers as commanding a most extensive view of a picturesque country, of the seacoast and island. (*Chandler's Travels*, p. 124.)—II. A small island off the coast of Phthiotis, in Thessaly, and between the Artemisian shore of Eubœa and the main land. It was near Apheta.—III. One of the small islands near Ephesus, which Pliny calls the *Pisistrati* (5, 31).

MYOS HORMOES or "Mouse's Harbour," a seaport of Egypt, on the coast of the Red Sea. Arrian says that it was one of the most celebrated ports on this sea. It was chosen by Ptolemy Philadelphus for the convenience of commerce, in preference to *Aminœ* (or *Suez*), on account of the difficulty of navigating the western extremity of the gulf. It was called also *Aphrodites portus*, or the port of Venus. It is full of little isles, and its modern name of *Suffange-el-Bakri*, or "the sponge of the sea," has an evident analogy to the etymology of the second of the Greek names given above, from the vulgar error of sponge being the foam of the sea; and Venus (Aphrodite) having been fabled to have sprung from the foam of the ocean. (From *suffange* our English term is *s'fange*, *s'phunge*, *spunge*.) The situation of Myos Hormos is determined by three islands, which Agatharchides mentions, known to modern navigators by the name of the *Jaffeteens*, and its latitude is fixed, with little fluctuation, in 27° 0' 0", by D'Anville, Bruce, and De la Rochette. (*Vincent*, *Periplus*, p. 78.) The entrance is said to be very crooked and winding, on account of the islands lying in front; and hence, perhaps, may have arisen the ancient appellation, the harbour being compared to a mouse's hole. (*Bruce*, vol. 7, p. 314, 3vo ed.)

MYRA (*orum* or *æ*), a town of Lycia, near the southern coast, southwest of Limyra and west of the Sacrum Promontorium. It was situate on the brow of a lofty hill, at the distance of twenty stadia from the shore. (*Strabo*, 664.) According to Artemidorus (*ap. Strab.*, l. c.), it was one of the six most important cities of the country. The Emperor Theodosius II. made it finally the capital of the province of Lycia (*Malala*, 14.—*Hierocles*, p. 684), as it was about this period the most distinguished city in the land. (*Basili. Seleuc.*, *Vit. S. Thecla*, l. 1, p. 272.) Myra, according to Leake, still preserves its ancient name. The distance of the ruins from the sea is said to correspond very accurately with the measurement of Strabo. (*Journal*, p. 183, 321.)

MYRIANDROS, a city of Asia Minor, on the Bay of Issus, below Alexandria (κατὰ Ἰσσοῦν), which Xenophon (*Anab.*, 1, 4) places in Syria beyond the Pyles Cilicis; but Scylax includes it within the limits of Cilicia (p. 40), as well as Strabo, who says that Seleucia of Pieria, near the mouth of the Orentes, was the first Syrian town beyond the Gulf of Issus. It was a place of considerable trade in the time of the Persian dominion. Xenophon speaks of the number of merchant vessels here. It declined at a later period, in consequence of its vicinity to the more flourishing city of Alexandria. It appears to have been originally a Phœnician settlement. (*Xen.*, l. c.—*Scylax*, l. c.) The modern name is not given by any traveller.

MYRINA, I. a city and harbour of Æolis, in Asia Minor, forty stadia to the north of Cyma. (*Strabo*, 631.) According to Mela (1, 18), it was the oldest of the Æolian cities, and received its name from Myrinus its founder. Pliny (5, 30) states that it afterward assumed the name of Sebastopolis, of which, however, no trace appears on its coins. Philip, king of Macedonia (son of Demetrius), held possession of it for some time, with a view to future operations in Asia Minor; but, being vanquished by the Romans, he was compelled by that people to evacuate the place. (*Polyb.*, 18, 27.—*Leo*, 33, 30.) Hierocles makes mention of this city at a later period (p. 661), after which we lose sight of it. It was the native place of Agathias. Choiseul Gouffier gives the modern name as *Sandarlik*.—II. A city on the north-western coast of Lemnos, and one of the principal places in the island. It was situated on the side looking towards Mount Athos, since Pliny reports (4, 12) that the shadow of the mountains was visible in the forum of this city at the time of the summer solstice.—Myrina alone offered resistance to Miltiades when that general went against Lemnos. It was taken, however, by his forces. (*Herod.*, 6, 140.—*Steph. Byz.*, s. v. *Μύρινα*.) The ruins of this town are still to be seen. On its site stands the modern Castro. (*Walpole's Collection*, vol. 1, p. 54.)—III. A town of Crete, north of Lyctus. (*Pliny*, 4, 12.) It still retains its ancient name. (*Cramer's Anc. Greece*, vol. 3, p. 393.)

MYRINUS, a surname of Apollo, from Myrina in Æolia, where he was worshipped.

MYRMECIDES, an artist of Miletus, mentioned as making chariots so small that they were covered by the wing of a fly. He also inscribed an elegiac distich on a grain of sesamum. (*Cic.*, *Acad.*, 4.—*Ælian*, *V. H.*, 1, 17.—*Perizon*, *ad loc.*—*Sillig*, *Dict. Art.*, s. v.)

MYRMIDONES, a people on the southern borders of Thessaly, who accompanied Achilles to the Trojan war. They received their name, according to one account, from Myrmidon, a son of Jupiter and Eury-medusa, who married one of the daughters of Æolus, and whose son Actor married Ægina, the daughter of the Ææopis. According to some, the Myrmidons were so called from their having been originally ants, *μύρμηκες*. (*Vid. Æacus*.) This change from ants to men is founded merely upon the equivocation of their name, which resembles that of the ant (*μύρμηξ*). (*Ovid*, *Met.*, 7, 654.—*Strab.*—*Hygin.*, *fab.*, 52.)

MYRON, a celebrated statuary and engraver on silver, who lived in Olymp. 87. Pausanias styles him an Athenian (6, 2, 1). The reason of this is satisfactorily explained by Thiersch. (*Epoch. Art. Gr.*, 2, *Adnot.*, 64.) Myron rendered himself particularly famous by his statue of a cow, so true to nature that bulls approached her as if she were alive. This is frequently alluded to among the epigrams in the Anthology. (*Sonnensag*, *Unterhalt.*, vol. 1, p. 100.—*Böttiger*, *Andeutung.*, p. 144.—*Goethe*, *über Kunst und Alterthum.*, 2, p. 1.—*Vid. Lemnos* and *Athos*.)—A

list of Myron's productions may be seen in *Sillig* (*Dict. Art.*, s. v.).

MYRRHA, a daughter of Cinyras, king of Cyprus. She had a son by her own father, called Adonis. When Cinyras was apprized of the crime he had unknowingly committed, he attempted to stab his daughter, but Myrrha fled into Arabia, where she was changed into a tree called myrrh. (*Hygin.*, *fab.*, 56, 275.—*Ovid*, *Met.*, 10, 298.)

MYRTILUS, a son of Mercury and Phœthusa, charioteer to CEnomaus. (*Vid. Hippodamia*, CEnomaus, and Pelops.)

MYRTIS, a Grecian female of distinguished poetical abilities, who flourished about 500 B.C. She was born at Anthedon, in Bœotia. Pindar is said to have received his first instructions in the poetic art from her, and it was during the period of his attendance upon her that he became acquainted with Corinna, who was also a pupil of Myrtis. Several of her productions were still remaining in the age of Plutarch, though none exist now. The story of her having given instruction in the poetic art to Corinna and Pindar does not seem consistent with the reproach which the former addresses to her for having ventured to contend with the latter. (*Voss*, *Excerpt. ex Apoll. Dyscol.*—*Maittaire*, *Dial.*, ed. *Sturz.*, p. 546.) A statue of bronze was raised in honour of her.

MYRTËUM MARE, that part of the Ægean which lay between the coast of Argolis and Attica. (*Strabo*, 238.—*Id.*, 375.) Pausanias states that it was so called from a woman named Myrto (8, 14.—*Cramer's Anc. Greece*, vol. 1, p. 7).

MYRTUNTIUM, I. an inland lake of Acarnania, below Anactorium; the water of which, however, is salt, as it communicates with the sea. It is now called *Murtari*. (*Strabo*, 459.)—II. A town of Elis, originally named Myrionus, and classed by Homer, under this latter appellation, among the Epean towns. It was about seventy stadia from the city of Elis, on the road from thence to Dyme, and near the sea. (*Strabo*, 341.) The ruins of this ancient place probably correspond with the vestiges of high antiquity observed by Sir W. Gell near the village of *Kaloteichos*, on the road from *Kapeletti* to *Palaïopolis*. (*Itin. of the Morea*, p. 31.—*Cramer's Anc. Greece*, vol. 3, p. 82, *seqq.*)

MYS, I. a celebrated engraver on silver, whose country is uncertain. According to the statement of Pausanias (1, 28, 2), he must have been contemporary with Phidias. Mys carved the battle between the Centaurs and Lapithæ on the shield held by the Minerva of Phidias. (*Pausan.*, l. c.) As regards the anachronism committed by Pausanias in the passage just referred to, and which makes Parrhasius to have assisted Phidias about Olymp. 84, consult the remarks of Sillig (*Dict. Art.*, s. v.).—II. A slave and follower of Epicurus. The philosopher manumitted him by his will. (*Diog. Laert.*, 10, 3.—*Menag.*, *ad loc.*)

MYRIA, a country of Asia Minor, lying to the north of Lydia and west of Bithynia. It is extremely difficult, as Strabo had already observed, to assign to the Mysians their precise limits, since these appear to have varied continually from the time of Homer, and are very loosely marked by all the ancient geographers from Scylax to Ptolemy. Strabo conceives, that the Homeric boundaries of the lesser Mysia were the Ææopis to the west and Bithynia to the east (*Strab.*, 664); but Scylax removes them considerably to the east of this position by placing the Mysians on the Gulf of Cius. (*Peripl.*, p. 35.) Ptolemy, on the other hand, has extended the Mysian territory to the west as far as Lampœus, while to the east he separates it from Bithynia by the river Rhyndacus. It was the prevailing opinion, of antiquity, that the Mysians were not an indigenous people of Asia, but that they had been transplanted to its shores from the banks of the Dan-

ube, where the original race maintained itself under the name of Mœsi, by which they were known to the Romans for several centuries after the Christian era. (*Strab.*, 303.—*Artem.*, *ap. euseb.*, 571.) Nor is that opinion at variance with the tradition which looked upon this people as of a kindred race with the Carians and Lydians, since these two nations were likewise supposed to have come from Thrace (*Herod.*, 1, 173.—*Strab.*, 659); nor with another, which regarded them in particular as descended from the Lydians, in whose language the word *mysos* signified "a beech," which tree, it was farther observed, abounded in the woods of the Mysian Olympus. Strabo, who has copied these particulars from Xanthus the Lydian, and Me-necrates of Elaea, states also, on their authority, that the Mysian dialect was a mixture of those of Phrygia and Lydia. (*Strab.*, 572.)—We may collect from Herodotus that the Mysians were already a numerous and powerful people before the Trojan war, since he speaks of a vast expedition having been undertaken by them, in conjunction with the Teucri, into Europe, in the course of which they subjugated the whole of Thrace and Macedonia, as far as the Peneus and the Ionian Sea. (*Herod.*, 7, 20, 75.) Subsequently, however, to this period, the date of which is very remote and uncertain, it appears that the Mysi were confined in Asia Minor within limits which correspond but little with such extensive conquests. Strabo is inclined to suppose that their primary seat in that country was the district which surrounds Mount Olympus, whence he thinks they were afterward driven by the Phrygians, and forced to retire to the banks of the Caicus, where the Arcadian Telephus became their king. (*Eurip.*, *ap. Aristot.*, *Rhet.*, 3, 2.—*Strab.*, 572.—*Hygin.*, *fab.*, 101.) But it appears from Herodotus that they still occupied the Olympian district in the time of Croesus, whose subjects they had become, and whose aid they requested to destroy the wild boar which ravaged their country (1, 86). Strabo himself also recognises the division of this people into the Mysians of Mount Olympus and those of the Caicus (571). These two districts answer respectively to the Mysia Minor and Major of Ptolemy. Homer enumerates the Mysi among the allies of Priam in several passages, but he nowhere defines their territory, or even names their towns; in one place, indeed, he evidently assigns to them a situation among the Thracians of Europe. (*Il.*, 13, 5.)—The Mysians of Asia had become subject to the Lydian monarchs in the reign of Alyattes, father to Croesus, and perhaps earlier, as appears from a passage of Nicolaus Damascenus, who reports that Croesus had been appointed to the government of the territory of Adramyttium and the Theban plain during the reign of his father. (*Crexer.*, *Hist. Frag.*, p. 203.) Strabo even affirms that Troas was already subjected in the reign of Gyges. (*Strab.*, 590.) On the dissolution of the Lydian empire, they passed, together with the other nations of Asia, under the Persian dominion, and formed part of the third satrapy in the division made by Darius. (*Herod.*, 3, 90.—*Id.*, 7, 74.) After the death of Alexander they were annexed to the Syrian empire; but, on the defeat of Antiochus, the Romans rewarded the services of Eumenes, king of Pergamus, with the grant of a district so conveniently situated with regard to his own dominions, and which he had already occupied with his forces. (*Polyb.*, 23, 27.—*Liv.*, 38, 39.) At a later period, Mysia was annexed to the Roman proconsular province (*Cic.*, *Ep. ad Quint. Fr.*, 1, 8); but under the emperors it formed a separate district, and was governed by a procurator. (*Athenaeus*, 9, p. 398, c.) It is to be observed, also, that St. Luke, in the Acts, distinguishes Mysia from the neighbouring provinces of Bithynia and Troas (16, 7, *seq.*).—The Greeks have stigmatised the Mysians as a cowardly and imbecile race, who would suffer themselves to be injured and

plundered by their neighbours in the most passive manner. Hence the proverbial expression *Mœciōi laia*, used by Demosthenes (*De Cor.*, p. 248, 28) and Aristotle (*Rhet.*, 1, 13, 20), to which Cicero also alludes when he says, "*Quid porro in Graeco sermone tam tritum atque celebratum est, quam, si quis despicitui ducitur, ut Mysorum ultimus esse dicatur?*" (*Pro Flacc.*, c. 37.) Elsewhere the same writer describes them as a tribe of barbarians, without taste for literature and the arts of civilized life. (*Orat.*, c. 8.—*Orator's Asia Minor*, vol. 1, p. 36, *seqq.*)

MYRSUS, a river of Mysia, which falls into the Cal-cus near the source of the latter river. Mannert takes it for the true Caicus in the early part of its course. (*Geogr.*, vol. 6, pt. 3, p. 397.)

MYRUS, a son of the poet Valgius, whose early death was so deeply lamented by the father that Horace wrote an ode to allay the grief of his friend. (*Horat.*, *Od.*, 2, 9.)

MYTILÆNE. *Vid.* Mytilene.

MYUS (gen. *Myusatis*), the smallest of all the Ionian cities, as appears from its only contributing three vessels to the united fleet of 350 sail. (*Herod.*, 6, 8.) It was situate, according to Strabo, on the southern bank of the Mæander, thirty stadia from its mouth. (*Strab.*, 636.) The Mæander was not navigable for large vessels, and to this circumstance may principally be ascribed the inferior rank of Myus among her Ionian sisters in point of opulence and power. The inundations of the river, too, must have been very injurious. Myus was founded by the Ionians about the same time with Priene (*Pausan.*, 7, 2), and was subsequently under the immediate sway of the Persians, since it was one of the cities given by Artaxerxes to Themistocles. (*Diod. Sic.*, 11, 57.) The city afterward sank greatly in importance. It became subjected also to a very annoying kind of visitation. The sea would seem to have formed originally a small bay as far as Myus. This bay, in process of time, became converted by the depositions of the Mæander into a fresh-water lake, and so great a number of gnats was in consequence produced, that the inhabitants of the city determined to migrate. The Ionian confederacy, upon this, transferred the vote and the population of Myus to the city of Miletus. (*Pausan.*, 7, 2.)—The ruins of Myus are called at the present day *Palatsha* (the Palace), from the remains of an ancient theatre, mistaken by the present inhabitants around for the ruins of a palace. (*Mannert*, *Geogr.*, vol. 6, pt. 3, p. 393, *seqq.*)

N.

NABATHÆA, a country of Arabia Petraea. It extended from the Euphrates to the Sinus Arabicus. The Nabathæans are scarcely known in Scripture until the time of the Maccabees. Their name is supposed to be derived from that of Nebaioth, son of Ismael. (*Genesis*, 25, 13.—*Ibid.*, 28, 9.—*Isaiah*, 70, 7.)—In the time of Augustus they were a powerful people; but their kingdom, of which Petra was the capital, ended about the reign of Trajan. At a still later period their territory belonged to Palestina Tertia. Nabathæa appears to correspond to the modern *Hed-schas*. (*Mannert*, *Geogr.*, vol. 6, pt. 1, p. 165, *seqq.*)

NABIS, a tyrant of Lacedæmon, who usurped the supreme power after the death of Machanidas, B.C. 206. He appears to have been a man surpassing all former tyrants in the monstrous and unheard-of wickedness that characterized his rule. From the very first he deliberately grounded his power on a regular system of rapine and bloodshed; he slew or banished all in Sparta who were distinguished either for birth or fortune, and distributed their wives and their estates among his own mercenaries, to whom he entirely trusted for support. His extortions were boundless, and death with torture was the penalty of refusal. No source of gain was

too mean for him or too iniquitous. He partook in the piracies of the Cretans, who were infamous for that practice; and he maintained a sort of alliance with the most noted thieves and assassins in the Peloponnesus, on the condition that they should admit him to a share in their gains, while he should give them refuge and protection in Sparta whenever they needed it. It is said that he invented a species of automaton, made to resemble his wife, and that he availed himself of this as an instrument of torture to wrest their wealth from his victims. Whenever he had summoned any opulent citizen to his palace, in order to procure from him a sum of money for the pretended exigencies of the state, if the latter was unwilling to loan, "Perhaps," Nebis would say, "I do not myself possess the talent requisite for persuading you, but I hope that Apega (this was the name of his wife) will prove more successful." He then caused the horrid machine to be brought in, which, catching the unfortunate victim in its embrace, pierced him with sharp iron points concealed beneath its splendid vestments, and tortured him into compliance by the most excruciating sufferings.—Philip, king of Macedon, being at war with the Romans, made an alliance with Nebis, and resigned into his hands the city of Argos as a species of deposit. Introduced into this place during the night, the tyrant plundered the wealthy citizens, and sought to seduce the lower orders by proposing a general abolition of debts and a distribution of lands. Foreseeing, however, not long after this, that the issue of the war would prove unfavourable for Philip, he entered into secret negotiations with the Romans in order to assure himself of the possession of Argos. This perfidy, however, was unsuccessful; and Flamininus the Roman commander, after having concluded a peace with the King of Macedon, advanced to lay siege to Sparta. The army which Nebis sent against him having been defeated, and the Romans and their allies having entered Laconia and made themselves masters of Gythium, Nebis was forced to submit, and, besides surrendering Argos, had to accept such terms as the Roman commander was pleased to impose. Humiliated by these reverses, he thought of nothing but regaining his former power, and the Roman army had hardly retired from Laconia before his emissaries were actively employed in inducing the maritime cities to revolt. At last he took up arms and laid siege to Gythium. The Achæans sent a fleet to the succour of the place, under the command of Philopomen; but the latter was defeated by Nebis in a naval engagement, who thereupon pressed the siege of Gythium with redoubled vigour, and finally made himself master of the place. The tyrant, however, not long after this, experienced a total defeat near Sparta from the land forces of Philopomen, and was compelled to shut himself up in his capital, while the Achæan commander ravaged Laconia for thirty days, and then led home his army. Meanwhile Nebis was continually urging the Ætolians, whom he regarded as his allies, to come to his aid, and this latter people finally sent a body of troops, under the command of Alexamenus; but they sent also secret orders along with this leader to despatch Nebis himself on the first opportunity. Taking advantage of a review-day, on which occasions Nebis was wont to ride about the field attended by only a few followers, Alexamenus executed his instructions, and slew Nebis, with the aid of some chosen Ætolian horsemen, who had been directed by the council at home to obey any orders which Alexamenus might give them. The Ætolian commander, however, did not reap the advantage which he expected from this treachery; for, while he himself was searching the treasury of the tyrant, and his followers were pillaging the city, the inhabitants fell upon them and cut them to pieces. Sparta thereupon joined the Achæan league. (*Plut., Vit. Philop.—Pausan., 7, 2.—Biogr. Univ., v. 30, p. 517.*)

NABONASSAR, a king of Babylon, who lived about the middle of the 8th century before the Christian era, and who gave name to what is called the *Nabonassarian era*. The origin of this era is thus represented by Syncellus from the accounts of Polyhistor and Berosus, the earliest writers extant in Chaldean history and antiquities. "Nabonassar, having collected the acts of his predecessors, destroyed them, in order that the computation of the reigns of the Chaldean kings might be made from himself." (*Syncell., Chronograph., p. 207.*) It began, therefore, with the reign of Nabonassar (Febr. 26, B.C. 747). The form of year employed in it is the moveable year of 365 days, consisting of 12 equal months of 30 days, and five supernumerary days: which was the year in common use among the Chaldeans, Egyptians, Armenians, Persians, and the principal Oriental nations from the earliest times. This year ran through all the seasons in the course of 1461 years. The freedom of the Nabonassar year from intercalation rendered it peculiarly convenient for astronomical calculation. Hence it was adopted by the early Greek astronomers Timochares and Hipparchus; and by those of the Alexandrian school, Ptolemy, &c. In consequence of this, the whole historical catalogue of reigns has been commonly, though improperly, called Ptolemy's canon; because he probably continued the original table of Chaldean and Persian kings, and added thereto the Egyptian and Roman down to his own time. (*Hale's Analysis of Chronology, vol. 1, p. 155, seqq. 8vo ed.*) —Foster, in his epistle concerning the Chaldeans, as given by Michaelis (*Spicilegium Geographiæ Hebræorum, vol. 2, p. 102*), seeks to explain the name *Nabonassar* on the supposition of an affinity between the ancient Chaldean language and the Sclavonic tongue. According to him, it is equivalent to *Nebu-nash-tsar*, which means, *Our Lord in Heaven*. This etymology has been impugned by some, on the ground that the Russian term for emperor or king is written *Cæsar*, and is nothing more than a corruption for *Cæsar*. Unfortunately, however for this very plausible objection, the Russian term in question is written with an initial *Tsar* or *Ts* (*Tsar*), and cannot, therefore, by any possibility, come from *Cæsar*. (Consult *Schmidt's Russian and German Dict., s. v.*)

NABOPOLASSAR, a king of Babylon, who united with Astyages against Assyria, which country they conquered, and, having divided it between them, founded two kingdoms, that of the Medes under Astyages, and that of the Chaldeans under Nabopolassar, B.C. 626. Necho, king of Egypt, jealous of the power of the latter, declared war against and defeated him. Nabopolassar died after a reign of 21 years. The name, according to Foster, is equivalent to *Nebu-polezi-tsar*, which means, *Our Lord dwells in Heaven*. (Consult remarks near the close of the article Nabonassar.)

NÆNIA or NENIA, a goddess among the Romans who presided over funerals. She had a chapel without the Porta Viminalis. (*Festus, s. v.*—Compare *Arnob., 4, p. 131.*—*Augustin., de Civ. Dei, 6, 9.*)—The term is more commonly employed to denote a funeral-dirge. (*Festus, s. v.*)

NÆVIUS, I. CNEUS, a native of Campania, was the first imitator of the regular dramatic works which had been produced by Livius Andronicus. He served in the first Punic war, and his earliest plays were represented at Rome in A.U.C. 519, B.C. 236. (*Aul. Gell., 17, 21.*) The names of his tragedies (of which as few fragments remain as of those of Livius) are still preserved: *Alcestis*, from which there is yet extant a description of old age in rugged and barbarous verse, *Desiæ*, *Dulorestes*, *Hesione*, *Hector*, *Iphigenia*, *Lycurgus*, *Phanissa*, *Proteriasus*, and *Telephus*. All these were translated or closely imitated from the works of Euripides, Anaxandrides, and other Greek dramatists. Nævius, however, was accounted a bet-

ter come than tragic poet. Cicero has given us some specimens of his jests, with which he appears to have been greatly amused; but they consist rather in unexpected turns of expression, or a play of words, than in genuine humour. Nevius, in some of his comedies, indulged too much in personal invective and satire, especially against the elder Scipio. Encouraged by the silence of this illustrious individual, he next attacked the patrician family of the Metelli. The poet was thrown into prison for this last offence, where he wrote his comedies, the *Haridolus* and *Leontes*. These being in some measure intended as a recantation of his former invectives, he was liberated by the tribunes of the commons. Relapsing soon after, however, into his former courses, and continuing to satirize the nobility, he was driven from Rome by their influence, and retired to Carthage, where he died, according to Cicero, A.U.C. 550, B.C. 204; but Varro fixes his death somewhat later.—Besides his comedies, Nevius was also author of the Cyprian Iliad, a translation from a Greek poem called the *Cyprian Epic*. Whoever may have written this Cyprian Epic, it contained 12 books, and was probably a work of amorous and romantic fiction. It commenced with the nuptials of Thetis and Peleus; it related the contention of the three goddesses on Mount Ida; the fables concerning Palamedes; the story of the daughters of Anius; and the love adventures of the Phrygian fair during the early period of the siege of Troy; and it terminated with the council of the gods, at which it was resolved that Achilles should be withdrawn from the war, by sowing dissensions between him and Atreides.—Some modern critics think that the Cyprian Iliad was rather the work of Lævius, a poet who lived some time after Nevius, since the lines preserved from the Cyprian Iliad are hexameters; a measure not elsewhere used by Nevius, nor introduced into Italy, according to their supposition, before the time of Ennius. (*Osann., Analect. Crit.*, p. 36.—*Hermann, Elem. Doctr. Metr.*, p. 210, ed. *Glasg.*)—A metrical chronicle, which chiefly related the events of the first Punic war, was another, and probably the last work of Nevius, since Cicero says (*De Senect.*, c. 14) that in writing it he filled up the leisure of his latter days with wonderful complacency and satisfaction. It was originally undivided; but, after his death, was separated into seven books. (*Suet., de Illust. Gramm.*)—Although the first Punic war was the principal subject, as appears from its announcement,

“*Qui terræ Latias herones tulerunt
Viras fraudesque Pœnices labor,*”

yet it also afforded a rapid sketch of the preceding incidents of Roman history.—Cicero mentions (*Brutus*, c. 19) that Ennius, though he classes Nevius among the fauns and rustic bards, had borrowed, or, if he refused to acknowledge his obligations, had pilfered many ornaments from his predecessor. In the same passage, Cicero, while he admits that Ennius was the more finished and elegant writer, bears testimony to the merit of the elder bard, and declares that the Punic war of this antiquated poet afforded him a pleasure as exquisite as the finest statue that was ever formed by Myron. To judge, however, from the lines that remain, though in general too much broken to enable us even to divine their meaning, the style and language of Nevius in this work were more rugged and remote from modern Latin than his plays or satires, and infinitely more so than the dramas of Livius Andronicus. The whole, too, is written in the rough Saturnian verse. (*Dunlop, Roman Literature*, vol. 1, p. 74, seqq.)—II. An augur in the reign of Tarquin, more correctly Navius. (*Vid. Attus Navius.*)

NAMARVILI, a people of Germany, ranked by Tacitus under the Lygii (*Germ.*, 43). According to Kruse (*Archiv für alte Geographie*) and Wessels (*über die*

Völker des Alten Deutschlands), they dwell in what is now Upper Lusatia and Silesia. Wilhelm, however (*Germanien und Seine Bewohner*), places them in Poland on the Vistula, and Reichard between the Wartha and Vistula.

NAIADES, certain inferior deities who presided over rivers, brooks, springs, and fountains. Their name is derived from *naio*, “to flow,” as indicative of the gentle motion of water. The Naiades are generally represented as young and beautiful virgins, leaning upon an urn, from which flows a stream of water. They were held in great veneration among the ancients, and sacrifices of goats and lambs were offered them, with libations of wine, honey, and oil. Sometimes they received only offerings of milk, fruit, and flowers. (*Vid. Nymphæ.*)

NAISSUS, a city of Dacia Mediterranea, southwest of Ratiaria. It was the birthplace of Constantine the Great. Reichard identifies it with the modern *Nezza* or *Nissa*, in the southern part of *Servia*. The name is sometimes written *Naisus* and *Næsus*. (*Const. Porphy., de Them.*, 2, 9.—*Zosim.*, 3, 11.—*Anton. Itin.*, p. 134.—*Amm. Marcell.*, 21, 10.)

NAMNĒTES or NAMNĒTES (*Strab. Nannetral*).—*Ptol. Nannetral*, a people of Gallia Celtica, on the north bank of the Liger or *Loire*, near its mouth. Their capital was *Condivicnum*, afterward *Nannetes*, now *Nantes* (*Nantz*). Their city is sometimes (as in *Greg. Tur.*, 6, 15) called *Civitas Namnetica*.

NANTUATÆ, a people of Gallia Narbonensis, on the south of the *Lacus Lemanus* or *Lake of Geneva*. (*Cæs.*, *B. G.*, 4, 10.)

NAPÆÆ, certain divinities among the ancients who presided over the forests and groves. Their name is derived from *νάπη*, “a grove.” (*Virgil, Georg.*, 4, 535.)

NAR, a river of Italy, rising at the foot of Mount Fiesellus, in that part of the chain of the Apennines which separates the Sabines from Picenum (*Plin.*, 3, 12), and, after receiving the Velinus and several other smaller rivers, falling into the Tiber near *Oriculum*. (*Virg., Æn.*, 7, 516.—*Sil. Ital.*, 8, 453.) The modern name is the *Nera*. It was noted for its sulphurous stream and the whitish colour of its waters. (*Virg., l. c.*—*Sil. Ital.*, l. c.—*Plin.*, 3, 5, 12.) “The *Nera*,” says *Eustace*, “forms the southern boundary of Umbria, and traverses, in its way to *Narzi*, about nine miles distant, a vale of most delightful appearance. The Apennine, in its mildest form, “*coruscis illicibus fremens*,” bounds this plain; the milky *Nar* intersects it; and fertility, equal to that of the neighbouring vale of *Clitumnus*, adorns it on all sides with vegetation and beauty.” (*Classical Tour*, vol. 1, p. 334.)

NARBO MARTIUS, a city of Gaul, in the southern section of the country, and southwest of the mouths of the Rhone. It was situated on the river *Atax* (or *Aude*), and became, by means of this stream, a seaport and a place of great trade. Narbo was one of the oldest cities of the land, and had a very extensive commerce long before the Romans established themselves in this quarter. *Avienus* (*Or. Marit.*, v. 585) makes it the capital of the unknown tribe of the *Elesyes*. The situation of this place appeared so favourable to the Romans, that they sent a colony to it before they had even firmly established themselves in the surrounding country, A.U.C. 636. (*Vell. Patenc.*, 1, 15.—*Ætropol.*, 4, 3.) The immediate cause of this settlement was the want of a good harbour on this coast, and of a place also that might afford the necessary supplies to their armies when marching along the Gallic shore into Spain. (*Polyb.*, 3, 39.) At a later period, after the time of *Cæsar*, Narbo became the capital of the entire province, which took from it the appellation of *Narbonensis*. This distinction probably would not have been obtained by it had not *Massilia* (*Marseille*) been declared a free and independent community by

the Romana.—As a Roman colony, this place took the name of *Narbo Martius*. In the time of Cæsar it was called also *Decumanorum Colonia*, from that commander's having sent thither as colonists, at the close of the civil contest, the remnant of his favourite tenth legion. (*Sueton., Tib., 4.*) It continued a flourishing commercial city until a late period, as it is praised by writers who lived when the power of the Roman capital itself had become greatly diminished. (*Ausonius, de Clar. Urb., 13.—Sidonius, carm., 23.*) The remains of the canal constructed by the Romans for connecting the waters of the Atax with the sea by means of the lake Rubresus, clearly prove the ancient power and opulence of Narbo. This city owed its downfall, along with so many others, to the inroads of the barbarous nations. It is now *Narbonne*. (*Man-nert, Geogr., vol. 2, p. 63, seqq.*)

NARBONENSIS GALLIA, one of the great divisions of Gaul under the Romans, deriving its name from the city of Narbo, its capital. It was situate in the southern and southeastern quarter of the country, and was bounded on the east by Gallia Cisalpina, being separated from it by the Varus or Var (*Plin., 3, 4*); on the north by the Lacus Lemanus or Lake of Geneva, the Rhone, and Gallia Lugdunensis; on the west by Aquitania; and on the south by the Mediterranean and Pyrenees. It embraced what was afterward the northwestern part of Savoy, Dauphine, Provence; the western part of Languedoc, together with the country along the Rhone, and the eastern part of Gascony. (*Vid. Gallia.*)

NARCISSUS, I. a beautiful youth, son of the river-god Cephissus and the nymph Liriope, was born at Theopis in Boeotia. He saw his image reflected in a fountain, and, becoming enamoured of it, pined away till he was changed into the flower that bears his name. This was regarded in poetic legends as a just punishment upon him for his hard-heartedness towards Echo and other nymphs and maidens. (*Ovid, Met., 3, 341, seqq.—Hygin., fab., 271.*) According to the version of this fable given by Eudocia (p. 304), Narcissus threw himself into the fountain and was drowned (*ἐβύτην ἑαυτὸν ἐκεί, καὶ ἐπεπνίγη τῷ πόντῳ ὄδῳ*). Pausanias, after ridiculing the common legend, mentions another, which, according to him, was less known than the one we have just given. This latter version of the story made Narcissus to have had a twin-sister of remarkable beauty, to whom he was tenderly attached. She resembled him very closely in features, wore similar attire, and used to accompany him on the hunt. This sister died young; and Narcissus, deeply lamenting her death, used to go to a neighbouring fountain and gaze upon his own image in its waters, the strong resemblance he bore to his deceased sister making this image appear to him, as it were, the form of her whom he had lost. (*Pausan., 9, 31, 6.*)—The flower alluded to in the story of Narcissus is what botanists term the "*Narcissus poeticus*" (*Linn., gen., 550*). It loves the borders of streams, and is admirably personified in the touching legends of poetry; since, bending on its fragile stem, it seems to seek its own image in the waters that run murmuring by, and soon fades away and dies. (*Flæ, Flores de Virgile, p. cxviii.*)—II. A freedman of the Emperor Claudius. He afterward became his private secretary, and in the exercise of this office acquired immense riches by the most odious means. Messalina, jealous of his power, endeavoured to remove him, but her own vices made her fall an easy victim to this unprincipled man. (*Vid. Messalina.*) Agrippina, however, was more successful. She was irritated at his having endeavoured to prevent her ascending the imperial throne; while Narcissus, on his side, espoused the interests of the young Britannicus, and urged Claudius to name him as his successor. Apprized of these plans, Agrippina drove Narcissus into a kind of temporary exile, by

compelling him to go to the baths of Campania for his health; and, having taken advantage of his absence from Rome to poison the emperor, she next compelled Narcissus to put himself to death. (*Tacit., Ann., 11, 29.—Id. ib., 11, 37.—Id. ib., 12, 57.—Id. ib., 13, 1.—Sueton., Vit. Claud.*)

NARISOL, a nation of Germany, occupying what now corresponds to the northern part of Upper Pfalz in the Palatinate. (*Tacit., Germ., 42.*)

NARNIA, a town of Umbria, on the river Nar, a short distance above its junction with the Tiber. The more ancient name was Nequinum, which it exchanged for Narnia when a Roman colony was sent thither, A.U.C. 458. (*Liv., 10, 9, seqq.*) The story of the name Nequinum having been given to it in sport by the Romans, on account of the roguery of its inhabitants (*nequem, "a rogue"*), is a mere fiction.—Narnia was colonized with the view of serving as a point of defence against the Umbri. Many years after, we find it incurring the censure of the senate for its want of zeal during the emergencies of the second Punic war. (*Livy, 29, 15.*) The situation of the place on a lofty hill, at the foot of which flows the Nar, has been described by several poets. (*Claud., 6.—Cons., Hon., 515.—Sil. Ital., 8, 458.—Martial, 7, 92.*) In the passage of Martial just referred to, the poet alludes to the noble bridge raised over the Nar by Augustus, the arch of which was said to be the highest known. (*Procop., Rer. Got., 1.*) The modern *Narni* occupies the site of the ancient town. Travellers speak in high terms of the beautiful situation of the place. (*Cramer's Anc. Italy, vol. 1, p. 277, seqq.*)

NARO, now *Narenta*, a river of Dalmatia, rising in the mountains of Bosnia, and falling into the Adriatic opposite the island of Lesina. (*Plin., 3, 22.*) On its banks lay the city of Naron, a Roman colony of some note. (*Scylax, p. 9.—Mela, 2, 3.*) Its ruins should be sought for in the vicinity of Castel Norin. (*Man-nert, Geogr., vol. 7, p. 347.*)

NARSES, a eunuch of the court of the Emperor Justinian I. at Constantinople. The place of his birth is unknown. He so ingratiated himself with the emperor, that he appointed him his chamberlain and private treasurer. In A.D. 538 he was placed at the head of an army destined to support Belisarius in the expulsion of the Ostrogoths from Italy; but the dissensions which soon arose between him and Belisarius occasioned his recall. Nevertheless, in 552 he was again sent to Italy, to check the progress of Totila the Goth, and, after vanquishing Totila, he captured Rome. He also conquered Tejas, whom the Goths had chosen king in the place of Totila, and, in the spring of 554, Buccellinus, the leader of the Alemanni. After Narses had cleared nearly all Italy of the Ostrogoths and other barbarians, he was appointed governor of the country, and ruled it fifteen years. During this time he endeavoured to enrich the treasury by all the means in his power, and excited the discontent of the provinces subject to him, who laid their complaints before the Emperor Justinian II. Narses was deposed in disgrace, and sought revenge by inviting the Lombards to invade Italy, which they did in 568, under Alboin their king. Muratori and others have doubted whether Narses was concerned in the invasion of the Lombards. After his deposition he lived at Naples, and died at an advanced age, at Rome, in 567. (*Encyclop. Am., vol. 9, p. 136.*)

NARYCIUM or NARYX, a city of the Locri Opuntii, rendered celebrated by the birth of Ajax, son of Oileus. (*Strabo, 425.*) From Diodorus we learn that Ismenias, a Boeotian commander, having collected a force of Ænians and Athamans, whom he had seduced from the Lacedæmonian service, invaded Phocia, and defeated its inhabitants near Naryx (14, 82). The same historian afterward relates, that Phaylus, the Phocian, having entered the Locrian territory, surprised the town of Naryx, which he razed to the ground.—Virgil

applies the epithet "Naryetan" to the Locri who settled in Italy, as having been of the Opuntian stock. (*En.*, 3, 396.)

ΝΑΣΑΜΩΝΑ, a people of Africa, to the southeast of Cyrenaica, and extending along the coast as far as the middle of the Syrtis Major. (Compare *Herod.*, 4, 173.) They were a roving race, uncivilized in their habits, and noted for their robberies in the case of all vessels thrown on the quicksands. They plundered the cargoes and sold the crews as slaves, and hence Lucan (9, 444) remarks of them, that, without a single vessel ever seeking their shores, they yet carried on a traffic with all the world. Augustus ordered an expedition to be sent against them, both in consequence of their numerous robberies, and because they had put to death a Roman prefect. They were soon conquered; and Dionysius Periegetes (v. 208) speaks of the "deserted dwellings of the destroyed Nasamones" (ἐρημωθέντα μέλαρα ἐποφθιμένων Νασαμώνων). They were not, however, completely destroyed, for we find the race again appearing in their former places of abode, and resuming their former habits of plunder, until in the reign of Domitian they were completely chased away from the coast into the desert. (*Euseb.*, *Chron.*, *Ol.*, 216, 2.—*Josephus*, *Bell.*, 3, 16.)—Some mention has been made, in another part of this work (*vid.* Africa, page 81, col. 1), of a journey performed through part of the interior of Africa by certain young men of the Nasamones; and the opinions of some able writers have been given on this subject. The following remarks, however, of a late critic may be compared with what is stated under the article Niger. "Herodotus says that the Nasamones went through the deserts of Libya; and that he may not be misunderstood as to what he means by Libya, which is sometimes put for Africa; he states distinctly that it extends from Egypt to the promontory of Soloeis, where it terminates; that it is inhabited by various nations besides the Grecians and Phœnicians; that, next to this, the country is abandoned to beasts of prey, and that all beyond is desert; that the young Nasamones, having passed the desert of Libya (not Sahara), came to a region with trees, on which were perched men of little stature; that they were conducted by them over morasses to a city on a great river, running from the west towards the rising sun; that the people were black, and enchanters, &c. Now it is perfectly clear to us that the country alluded to by Herodotus was no other than Mauritania, and that the notion of their having crossed the great desert, and reached the Niger about Timbuctoo, is founded entirely on a misrepresentation of his quotes and editors, some of whom make the course of the young men to have been *south-west*, contrary to what Herodotus says, and for no other reason that we can devise but that such a course was required to bring them to a predetermined city and river, known to the moderns, but not to Herodotus. Herodotus, however, sanctions no such notion; he distinctly states, on the contrary, that they proceeded to the west, πρὸς Ζέφυρον ἀνέμων, words that are never applied to any portion of the compass lying between west and south, the word *Zephyrus*, in Latin as well as in Greek, being used exclusively for west, and *Αἶψ* generally for *south-west*. If we will only let Herodotus tell his own story, we shall find in those parts of the Emperor of Morocco's dominions, situated between the Great Atlas and the Sahara, plenty of rivers, two of them, the *Taflet* and the *Ad-judi*, both running to the east, and both great rivers in the eyes of men who had never witnessed a running stream; we shall also find cities and towns, intervening deserts, morasses, sands, and black men of small stature, the modern Berbers, the ancient Melanogæti, *omnes colore nigri*, to answer the description of Herodotus; who says, moreover, that his river, which he calls the Nile, not only descends from Libya, but traverses all Libya, dividing that country in

the midst. Pliny's information is still more explicit, and tends to corroborate our suggestion. He tells us that Suetonius Paulinus, the Roman general, after crossing the western Atlas, and a black, dirty plain beyond it (dry morass or peat-moss, of which we understand there is plenty), fell in with a river running to the eastward, which he (Pliny) calls the Niger, probably from the black people or the black soil, and which is stated to lose itself in the sands; and which, according to Pliny, emerging again, flows on to the eastward, divides the Libyans from the Ethiopians, and finally falls into the Nile. Now the *Taflet*, which flows from the southern side of the snowy Atlas, crossed by the Roman general, runs in an eastern course, and loses itself in the sands; and the *Ad-judi*, which rises from the same side, or the Central Atlas (in Mauritania Cæsariensis), and runs easterly into the lake Meligig, might very well be considered by Pliny as the continuation of the *Taflet* or his Niger; and it is sufficiently remarkable that this river, or some other of the numerous streams in the neighbourhood, should, according to Leo Africanus, be called the Ghir, which, it seems, is a native name. Here, then, we have at once the foundation for the Geir and Nigeir of Ptolemy, supplied to him by Pliny." (*Quarterly Review*, No. 82, p. 233, *seqq.*)

ΝΑΣΙΟΛ, I. a surname of one of the Scipios. (*vid.* Scipio V.)—II. A character delineated by Horace in one of his satires. Nasica, a mean and avaricious man, marries his daughter to Coranus, who was a creditor of his, in the hope that his new son-in-law will either forgive him the debt at once, or else will leave him a legacy to that amount in his will, which would, of course, be a virtual release. He is disappointed in both these expectations. Coranus makes his will and hands it to his father-in-law, with a request that he will read it: the latter, after repeatedly declining so to do, at last consents, and finds, to his surprise and mortification, no mention made in the instrument of any bequest to him or his. (*Horat.*, *Sat.*, 2, 5, 65.)

ΝΑΣΙΔΙΩΝΟΣ (by synæresis Nasid-yonus, a quadrisyllable), a character satirized by Horace. Under this feigned name the poet describes an entertainer of bad taste and mean habits affecting the manners of the higher classes. (*Sat.*, 2, 8.)

ΝΑΣΟ. *vid.* Ovidius.

ΝΑΣΟΣ or ΝΕΣΟΣ, a town or fortress near Cēniads in Acarnania. The name evidently implies an insular situation. Livy (25, 24; 36, 11) writes it *Naxos*; but that is probably a false reading. From the accounts of ancient writers, Nasos seems always to have been included with Cēniads in the cessions of the latter place, made by the Romans first to the Ætolians, and afterward to the Acarnanians. (*Polyb.*, 9, 2.) If *Trigardos* be not Cēniads, it may represent Nasos, which was probably the port and arsenal of Cēniads; and, though now joined to the continent, might very well have been an island in ancient times. (*Cramer's Anc. Greece*, vol. 2, p. 28.)

ΝΑΥΣΟ, a river of Venetia, in Cisalpine Gaul, rising in the Alps, and falling into the Adriatic near Aquileia. It is now the *Natisone*. Modern critics, however, are divided in opinion as to the identity of the *Natisone* with the *Nasos*, which Strabo and other ancient writers place close to Aquileia; as the *Natisone* is now some miles distant from the ruins of that city. The most probable supposition is, that some change has taken place in the bed of the river. (*Cramer's Anc. Italy*, vol. 2, p. 129.)

ΝΑΥΟΛΙΤΙΣ, a city of Egypt, in the Delta, and belonging to the Saitic nome. It was situate on the Canopic arm of the Nile, to the south of Metetis and northwest of Saïs. Strabo informs us (803) that, in the time of Psammithichus, a body of Milesians landed at the Bolbitine mouth of the river, and built there a

stronghold, which he calls "the fortress of the Milesians" (τὸ Μιλήσιον τειχεῖον). The geographer evidently refers here to the arrival on the coast of Egypt of some Carians and Ionians, by whose aid, according to Herodotus (2, 152), Psammetichus was enabled to subdue his colleagues in the kingdom. When, however, Strabo adds, that these Milesians, in process of time, sailed into the Saitic nome, and, after having conquered Inarus in a naval conflict, founded the city of Naucratis, it would seem that he mixes up with his account of this place the circumstance of the succours that were given by the Athenians to Inarus, king of Egypt, and by means of which he gained a victory over the Persians. Inarus, it is true, was afterward defeated, but no author mentions that the Milesians had any share in his overthrow. Naucratis appears, in fact, to have been founded long before any Greek set foot in Egypt. It was given by Amasis to the Ionians as an entrepôt for their commerce, and was not founded by them. This favour, however, on the part of the Egyptian monarch, was granted under such restrictions as prudence seemed to require. The Greek vessels were only allowed to enter the Canopic arm, and were obliged to stop at Naucratis. If a ship happened to enter another mouth of the river, it was detained; and the captain was not set at liberty unless he could swear that he was compelled to do so by necessity. He was then obliged to sail to Naucratis; or, if continual north winds made this impossible, he had to send his freight in small Egyptian vessels round the Delta to Naucratis. (Herod., 2, 179.) But, how rigidly soever these restrictions were originally enforced, they must soon have fallen into disuse, as the mouths of the Nile were open to any one after the conquest by the Persians.—Naucratis, from its situation, became the connecting link in the chain of communication between the coast and the interior of the country, and continued for a long period an important city. It is mentioned by numerous writers as low down as the sixth century.—The ruins which Niebuhr found near a place called *Salkadejer* seem to indicate the site of the ancient city.—Naucratis was the native place of Athenæus. Like every commercial city, it contained among its population a large number of dissolute persons of both sexes. (Larcher, *Geogr. d'Herodote*, p. 359, seqq.—Mannert, *Geogr.*, vol. 10, pt. 1, p. 563, seqq.)

NAULŌCHUS, I. a naval station on the northeastern coast of Sicily. Between this place and Myla, which lay to the west of it, the fleet of Sextus Pompeius was defeated by that of Octavius (A.U.C. 718, B.C. 36).—II. An island off the coast of Crete, near the promontory of Sammonium. (Plin., 4, 12).—III. The port of the town of Bulis in Phocia, near the confines of Boeotia. (Plin., 4, 3.) It is supposed to have been the same with the Mychos of Strabo.

NAUPACTUS, a city of Locria, at the western extremity of the territory of the Ozolæ, and close to Rhium of Ætolia. It was said to have derived its name from the circumstance of the Heraclidæ having there constructed the fleet in which they crossed over into the Peloponnesus (ναῦς, a ship, and πᾶννυμι, to construct.—Strabo, 426.—Apollod., 2, 7, 2).—After the Persian war, this city was occupied by the Athenians, who there established the Messenian Helots after they had evacuated Ithome. (Thucyd., 1, 103.—Id., 2, 90.—Pausan., 4, 24, seqq.) The acquisition of Naupactus was of great importance to the Athenians during the Peloponnesian war, as it was an excellent station for their fleet in the Corinthian Gulf, and not only afforded them the means of keeping up a communication with Corcyra and Acarnania, but enabled them also to watch the motions of the enemy on the opposite coast, and to guard against any designs they might form against their allies. Some important naval operations which took place off this city in the

third year of the war, will be found detailed in Thucydides (3, 83, seqq.).—After the failure of the expedition undertaken by Demosthenes, the Athenian general, against the Ætolians, the latter, supported by a Peloponnesian force, endeavoured to seize Naupactus by a coup de main; but such were the able arrangements made by Demosthenes, who threw himself into the place with a re-enforcement of Acarnanian auxiliaries, that the enemy did not think proper to prosecute the attempt. (Thucyd., 3, 102.) On the termination of the Peloponnesian war, however, Naupactus surrendered to the Spartans, who expelled the Messenians from the place. (Pausan., 4, 26.) Demosthenes informs us, that it had afterward been occupied by the Achæans, but was ceded by Philip of Macedon to the Ætolians (Phil., 3, p. 120.—Strabo, 426), in whose possession it remained till they were engaged in a war with the Romans. The latter, after having defeated Antiochus at Thermopylæ, suddenly crossed over from the Malian Gulf to that of Corinth, and invested Naupactus, which would probably have been taken, notwithstanding the obstinate defence made by the Ætolians, had they not obtained a truce by the intervention of T. Flamininus. (Liv., 36, 30, seqq.—Polyb., 5, 102.) Naupactus was still a city of some importance in the time of Hierocles (p. 643), but it was nearly destroyed by an earthquake in the reign of Justinian. (Procop., Bell. Got., 3.)—The modern town is called *Enebechi* by the Turks, *Nepacto* by the Greeks, and *Lepanto* by the Franks, with a strong accent on the last syllable. (Keppell's *Journey*, vol. 1, p. 8.) "Nepacto," says Sir W. Gell, "is a miserable pashalia, and a ruinous town; but it is worth visiting, because it gives a very exact idea of the ancient Greek city, with its citadel on Mount *Rhagani*, whence two walls, coming down to the coast and the plain, form a triangle. The port absolutely runs into the city, and is shut within the walls, which are erected on the ancient foundations." (Itin., p. 293.—Cramer's *Anc. Greece*, vol. 2, p. 105, seqq.)

NAUPLIA, a maritime town of Argolis, the port of Argos, situate on a point of land at the head of the Sinus Argolicus. It was said to have derived its name from Nauplius, the son of Neptune and Amymonæ. (Strabo, 368.—Herod., 6, 76.—Xen., *Hist. Gr.*, 4, 7, 6.) Nauplia was deserted and in ruins when visited by Pausanias. The inhabitants had been expelled several centuries before by the Argives, upon suspicion of their favouring the Spartans. The latter people, in consequence, received them into their territory, and established them at Methone of Messenia. (Pausan., 4, 35.) Nauplia has been succeeded by the modern town of *Napoli di Romania*, as it is called by the Greeks, which possesses a fortress of some strength. Sir W. Gell remarks, that "Nauplia is the best built city of the Morea. It is situated on a rocky point, on which are many remains of the ancient wall. The port is excellent and very defensible." (Itin., p. 181.—Cramer's *Anc. Greece*, vol. 3, p. 239, seqq.)

NAUPLIDÆS, a patronymic of Palamedes, son of Nauplius. (Ovid, *Met.*, 13, 39.)

NAUPLIUS, I. a son of Neptune and Amymonæ, and the founder of Nauplia. (Pausanias, 2, 38.—Id., 4, 35.) He was the one that sold Auge, daughter of Aleus, to King Teuthras. (Vid. Auge.) This Nauplius must not be confounded with the second of the name, who was, in fact, one of his descendants. (Heyne, ad Apollod., 2, 1, 5.—Compare Burmann, *Catal. Argonaut.*, ad Val. Flacc., s. v.)—II. A descendant of the preceding, and one of the Argonauts. (Heyne, ad Apollod., 2, 1, 5.—Burmann, *Catal. Argonaut.*, s. v.)—III. A son of Neptune, the father of Palamedes by Clymene, and king of Eubœa. He was so indignant at the treatment which his son had experienced from the Greeks, that, to avenge his death, he set up a burning torch on the promontory of Ca-

phaeus, in order to deceive the Grecian vessels that were sailing by in the night on their return from Troy; and he thus caused their shipwreck on the coast. The torch, it seems, had been placed on the most dangerous part of the shore; but the Greeks mistook it for a friendly signal, inviting them to land here as the safest part of the island. Those of the shipwrecked crews that came safe to the land were slain by Nauplius, who is said, however, to have thrown himself into the sea when he saw his plan of vengeance in a great measure frustrated by the escape of Ulysses, whom the winds bore away in safety from the dangerous coast. (*Hygin., fab., 116.*)—The obscure and curious legend related by Apollodorus (2, 1, 5) is thought by many to have reference to this Nauplius. It assigns him a different end. According to this version of the story, Nauplius attained a great age, and passed his time on the sea, lamenting the fate of those who were lost on it. At length, through the anger of the gods, he himself met with the same fate which he deplored in others. (*Heyne, ad Apollod., l. c.*)

NAUPORTUS, a town of Pannonia, on a river of the same name, now Ober (Upper) Laybach. (*Vell. Pat., 2, 110.—Plin., 3, 18.—Tacit., Ann., 1, 20.*)

NAUSICA, daughter of Alcinoüs, king of the Phæaciæ. She met Ulysses shipwrecked on her father's coast, and gave him a kind reception. (*Od., 6, 17, seqq.*)

NAUSTATHMUS, I. a port and harbour in Sicily, at the mouth of the river Cacyparis, below Syracuse; now Asparanetto. (*Clus., Sic. Ant., p. 97.—Reichard, Thes. Topogr.*)—II. A village and anchoring-place of Cyrenaica, between Erythron and Apollonia. (*Mela, 1, 8.*)—III. An anchoring-place on the coast of the Euxine, in Asia Minor, about 90 stadia from the mouth of the Halys: it is supposed by some to have been identical with the Ibyra or Ihora of Hierocles (p. 701). D'Anville gives *Balirek* as the modern name; but Reichard, *Kupri Agkzi*. (*Arrian, Peripl. Huds., G. M., 1, p. 16.*)

Naxos, I. a town of Crete, celebrated for producing excellent whetstones. (*Pind., Isthm., 6, 107.—Schol. ad Pind., l. c.*)—II. The largest of the Cyclades, lying to the east of Paros, in the Ægean Sea. It is said by Pliny (4, 12) to have borne the several names of Strongyle, Dia, Dionysias, Sicilia Minor, and Callipolis. The same writer states that it was 75 miles in circuit, and twice the size of Paros. It was first peopled by the Carians (*Steph. Byz., s. v. Νάξος*), but afterward received a colony of Ionians from Athens. (*Herod., 8, 46.*) The failure of the expedition undertaken by the Persians against this island, at the suggestion of Aristagoras, led to the revolt of the Ionian states. (*Herod., 5, 38.*) At this period Naxos was the most flourishing of the Cyclades; but, not long after, it was conquered by the Persian armament under Datis and Artaphernes, who destroyed the city and temples, and enslaved the inhabitants. (*Herod., 6, 96.*) Notwithstanding this calamity, the Naxians, with four ships, joined the Greek fleet assembled at Salamis (*Herod., 8, 46*), and yet they were the first of the confederates whom the Athenians deprived of their independence. (*Thucyd., 1, 98, 137.*) It appears from Herodotus (1, 64) that they had already been subject to that people in the time of Pisistratus. Naxos was farther celebrated for the worship of Bacchus, who is said to have been born there. (*Virg., Æn., 3, 125.—Hom., Hymn in Apoll., 44.—Pind., Pyth., 4, 156.—Apollod., 1, 7, 4.*) The principal town was also called Naxos.—The modern name of the island is Naxia. (*Cramer's Anc. Greece, vol. 3, p. 408.*) Mr. Hawkins gives the longest diameter of the island, according to the Russian chart, as about eighteen miles, and its breadth about twelve. (*Clarke's Travels, vol. 6, p. 112, London ed.*) Dr. Clarke observes of Naxos, that its inhabitants are

still great votaries of Bacchus. Olivier speaks in inferior terms of the present Naxian wine, adding that the inhabitants know neither how to make nor preserve it. Dr. Clarke, on the contrary, observes that the wine of Naxos maintains its pristine celebrity, and that he thought it excellent. Naxos is said to have no ports for the reception of large-sized vessels, and has therefore been less subject to the visits of the Turks. Dr. Clarke states that, when he visited the island, he was told that there was not a single Mohammedan in it, and that many of the inhabitants of the interior had never seen a Turk. The produce of the island consists at present of wines, wheat, barley, oil, oranges, lemons, peaches, figs, cheese, which is exported to Constantinople, cotton, honey, and wax. The vintage was one year so abundant, that the people were obliged to pour their wines into the cisterns of the Capuchins. (*Malte-Brun, Geogr., vol. 6, p. 168, Am. ed.*)—III. A city on the eastern side of Sicily, situate on the southern side of Mount Taurus, and looking towards Catana and Syracuse. It was founded by a colony from the island of Olos, one year before the settlement of Syracuse (*Ol. 17, 3*), and at the same time, consequently, with Crotona in Italy. (*Thucyd., 6, 3.—Scymnus, v. 276.*) The colony was a powerful one, and the rapid growth of the new state is clearly shown by the early founding of Zancle or Messina. Naxos, however, not long after this, fell under the sway of Hippocrates, tyrant of Gela. (*Herod., 7, 154.*) But it soon recovered its freedom, waged a successful contest with Messina, and appeared subsequently as the ally of the Athenians against Syracuse, the rapid increase of this city having filled it with apprehensions for its own safety. At a still later period, Dionysius, tyrant of Syracuse, destroyed the city (*Diod., 14, 15.—Ol. 94, 2*), but the old inhabitants, together with some new-comers, afterward settled in the immediate vicinity, and founded Tauromenium. (*Vid. Tauromenium.*)

NAZIANZUS, a city of Cappadocia, in the southwestern angle of the country, and to the southeast of Archelaïs. This place derives all its celebrity from Gregory, the distinguished theologian, who was born at Arianzus, a small village in the immediate neighbourhood, but who was promoted to the bishopric of Nazianzus. (*Niceph., Call., 14, 39.—Philostorg., ap. Suid., s. v. Γρηγόριος.*) Nazianzus is assigned by Hierocles to Cappadocia Secunda. The Itineraries remove it 24 miles from Archelaïs. (*Cramer's Asia Minor, vol. 2, p. 114.*)

NEATHUS, a river of Bruttium, rising to the northeast of Consentia, and falling into the Sinus Tarentinus above Crotona. It is now the *Nicta*. This stream was said to have derived its name from the circumstance of the captive Trojan women having there set fire to the Grecian fleet (*ναῦς, αἰὼς*); a circumstance alluded to by many of the ancients, but with great diversity of opinion as regards the scene of the event. The use which Virgil has made of this tradition is well known. (*Strabo, 262.—Cramer's Anc. Italy, vol. 2, p. 391.*)

NEAPOLIS, a celebrated city of Campania, on the Sinus Crater, now Naples, or, in Italian, *Napoli*. Innumerable accounts exist relative to the foundation of this celebrated place; but the fiction most prevalent seems to be that which attributed it to the Siren Parthenope, who was cast upon its shores, and from whom it derived the name (Parthenope) by which it is usually designated in the poets of antiquity. (*Lycophr., 717.—Dionysius Periegetes, 357.—Sil. Ital., 12, 33.*) According to Strabo, the tomb of this pretended foundress was shown there in his time. (*Strab., 246.*)—Hercules is also mentioned as founder of Neapolis by Oppian and Diodorus Siculus (*ap. Tzetx. ad Lycophr., l. c.*)—We find also considerable variations in what may be regarded as the historical

account of the origin of Neapolis. Scymnus of Chios mentions both the Phocæans and Cumæans as its founders, while Stephanus of Byzantium names the Rhodians. But by far the most numerous and respectable authorities attribute its foundation to the Cumæans, a circumstance which their proximity renders highly probable. (*Strabo*, 246.—*Livy*, 8, 23.—*Vell. Pat.*, 1, 4.) Hence the connexion of this city with Eubœa, so frequently alluded to by the poets, and especially by Statius, who was born here. (*Silv.*, 1, 2; 8, 5; 2, 2, &c.) A Greek inscription mentions a hero of the name of Eumelus as having had divine honours paid to him, probably as founder of the city. (*Capezio, Hist. Nap.*, p. 105.) This fact serves to illustrate another passage of Statius. (*Silv.*, 4, 8, 45.)—The date of the foundation of this colony is not recorded. Velleius Paterculus observes only that it was much posterior to that of the parent city. Strabo seems to recognise another colony subsequent to that of the Cumæans, composed of Chalcidians, Pithecusans, and Athenians. (*Strab.*, 246.) The latter were probably the same who are mentioned in a fragment of Timæus, quoted by Tzetzes (*ad Lycophr.*, v. 732–37), as having migrated to Italy under the command of Diotimus, who also instituted a *λαυραδοποία*, still observed at Neapolis in the time of Statius (*Silv.*, 4, 8, 50). The passage of Strabo above cited will account also for the important change in the condition of the city now under consideration, which is marked by the terms Palæopolis and Neapolis, both of which are applied to it by the ancient writers. It is to be noticed, that Palæopolis is the name under which Livy mentions it when describing the first transactions which connect its history with that of Rome, A.U.C. 429 (*Livy*, 8, 23); while Polybius, speaking of events which occurred in the beginning of the first Punic war, that is, about sixty years afterward, employs only that of Neapolis (1, 51).—Livy, however, clearly alludes to the two cities as existing at the same time; but we hear no more of Palæopolis after it had undergone a siege and surrendered to the Roman arms. According to the same historian, this town stood at no great distance from the site of Neapolis; certainly nearer to Vesuvius, and in the plain. (*Romanelli*, vol. 3, p. 530.) It was betrayed by two of its chief citizens to the Roman consul, A.U.C. 439. (*Liv.*, 8, 25.) Respecting the position of Neapolis, it may be seen from Pliny, that it was placed between the river Sebethus, now *il Fiume Madalona*, and the small island Megaris, or Megalia, as Statius calls it (*Silv.*, 2, 2, 80), on which the *Castel del Ovo* now stands. (*Plin.*, 3, 6.—*Columella*, R. R., 10.)—It is probable that Neapolis sought the alliance of the Romans not long after the fall of the neighbouring city; for we find that they were supplied with ships by that town in the first Punic war, for the purpose of crossing over into Sicily. (*Polyb.*, 1, 51.) At that time we may suppose the inhabitants of Neapolis, like those of Cumæ, to have lost much of their Greek character, from being compelled to admit the Campanians into their commonwealth; a circumstance that has been noticed by Strabo (246). In that geographer's time, however, there still remained abundant traces of their first origin. Their gymnasia, clubs, and societies were formed after the Greek manner. Public games were celebrated every five years, which might rival in celebrity the most famous institutions of that nature in Greece; while the indolence and luxury of Grecian manners were also very prevalent, and allured to Neapolis many a Roman, whose age and temperament inclined him to a life of ease. (*Ovid, Met.*, 15, 711.—*Hor.*, *Epod.*, 5, 24, 3.—*Sil. Ital.*, 12, 31.—*Stat.*, *Silv.*, 3, 5, 85.) Claudius and Nero seem to have shown a like predilection for Neapolis as a residence. (*Tacit.*, *Ann.*, 15, 53.—*Id.*, 16, 10.) The epithet of *docta*, applied to this city by Martial (5, 79), proves

that literature continued to flourish here in his time.—Among other superstitions, we learn from Macrobius (*Sat.*, 1, 18), that the people of Neapolis worshipped the sun, under the image of a bull with a human face, which they called Hebôn. This fact is confirmed by numerous coins, and also by an inscription which has come down to us. (*Cramer's Anc. Italy*, vol. 2, p. 168, *seqq.*)

NEARCHUS, a celebrated naval commander in the time of Alexander the Great. He was a native of Crete, and one of the friends of Alexander in early life, sharing with the young prince the dangers incurred during the reign of Philip. When Alexander had subdued the empire of Darius, he sent Nearchus on a voyage of discovery, from the mouth of the Hydaspes down the Indus, and from the embouchure of the Indus to the Euphrates, along the coast of Gedrosia, Carmania, and Persia. The narrative of this voyage has been preserved to us by Arrian, who professes to give an extract from the journal of Nearchus. It is contained in his *Indica*. The authenticity of the account has been questioned by Hardouin and Dodwell, but is fully established by Sainte-Croix (*Examen Critique des Historiens d'Alexandre*), Gosselin (*Recherches sur la Géographie Ancienne*), and Vincent (*Voyage of Nearchus*, Lond., 1807.—*Commerce and Navigation of the Ancients in the Indian Ocean*, vol. 1). It must be confessed, however, that the three writers just mentioned differ in other respects as regards this celebrated voyage. Gosselin thinks, for example, that all the statements made by Nearchus can be rigorously confirmed by modern geography. Vincent, on the other hand, supposes that the defective system of the ancients must necessarily have introduced into the narrative of the Greek commander many errors and contradictions. Sainte-Croix, again, is deserted by his usual good sense and judgment when he assigns to the expedition of Nearchus no other motive but the foolish ambition of Alexander. If this had been the case, why would Nearchus have kept a journal so full of nautical and geographical observations?—Nearchus was recompensed by Alexander with a golden crown, which the monarch placed upon his head. A new route was marked out. Alexander was to undertake an expedition against Arabia, and Nearchus and his fleet were to accompany him, and to coast the Arabian shore; but the death of the monarch put an end to the design. After the decease of Alexander, Nearchus, who had obtained the prefecture or satrapy of Pamphylia and Lycia, exerted himself, but to no purpose, to secure the throne of Alexander to Hercules, son of Barsine.—He also wrote a history, or historical memoirs of the reign of Alexander; but of this work the title alone remains. The voyage of Nearchus, besides being contained in the common text of Arrian, may be found in Hudson's *Geographi Minores Græci*, vol. 1. It appeared also in 1806, from the Vienna press, under the title of *Νεάρχου περιπλοῦς ἐκ τοῦ Ἀββαίου*. (*Hofmann, Lex. Bibliogr.*, vol. 3, p. 114.)

NEBO, a mountain situate east of the river Jordan, and forming part of the chain of Abarim, north of the Dead Sea. The Israelites encamped at the foot of this mountain in the 46th year of their Exodus, and Moses, having executed the commission with which he was intrusted, and having pronounced his blessing on the twelve tribes assembled to receive his last charge, ascended this mountain, from the summit of which, called Pisgah, he had a view of the Promised Land, into which he was not permitted to enter: on this mountain he soon afterward died. Burekhardt supposes the *Djebel Attarous*, about 15 miles north of the Arnon, and a little to the right of the route from Madeba to Arayr or Aroer, and which is the highest point in the neighbourhood, to be Nebo. (*Manford's Scripture Gazetteer*, p. 335.)

NEBRISA, or **COLONIA VENEREA NEBRISA**, a town of the Turdetani, in Hispania Bética, northeast of Gades, and southwest of Hispalis. It is now *Lebrija* or *Lebrija*. (*Strabo*, 143.—*Plin.*, 3, 3.)

NEBRŌDES, a general name for the chain of mountains running through the northern part of Sicily. The Greek name is *Νεβρόνη ὄρη*. (*Strabo*, 374.—*Sil. Ital.*, 14, 234.)

NECHO, a king of Egypt who endeavoured to open a communication, by means of a canal, between the Red Sea and the Mediterranean. The attempt was abandoned, after the loss of 120,000 men, by order of an oracle, which warned the monarch "that he was working for the barbarian" (*τῷ βαρβάρῳ αὐτὸν προεργάζεσθαι*).—*Herod.*, 2, 158). The true cause, however, of the enterprise having been abandoned would seem to have been the discovery, that the water of the Arabian Sea stood higher than the sandy plains through which the canal would have to run. (Compare *Aristot.*, *Meteorol.*, 1, 14.—*Strabo*, 804.)—A similar attempt was made, but with no better success, by Darius Hystaspis. (*Herod.*, 1, c.) Ptolemy Philadelphus at last accomplished this important work. An account of it is given by *Strabo* (804) from *Artemidorus*. (Compare *Mannert's* remarks on *Strabo's* statement, *Geogr.*, vol. 10, pt. 1, p. 507, *seqq.*)—This same Necho is also famous in the annals of geographical discovery for a voyage which, according to *Herodotus* (4, 42), he caused to be performed around Africa, for the solution of the grand mystery which involved the form and termination of that continent. He was obliged to employ, not native, but Phœnician navigators, of whose proceedings *Herodotus* received an account from the Egyptian priests. They were ordered to sail down the Red Sea, pass through the Columns of Hercules (Straits of Gibraltar), and so up the Mediterranean to Egypt; in other words, to circumnavigate Africa. The Phœnicians related, that, passing down the Red Sea, they entered the Southern Ocean; on the approach of autumn, they landed on the coast and planted corn; when this was ripe, they cut it down and again departed. Having thus consumed two years, they, in the third, doubled the Columns of Hercules and returned to Egypt. They added, that, in passing the most southern coast of Africa, they were surprised to observe the sun on their right hand; a statement which *Herodotus* himself rejects as impossible. Such is all the account transmitted to us of this extraordinary voyage, which has given rise to a learned and voluminous controversy. *Rennell*, in his *Geography of Herodotus*; *Vincent*, in his *Periplus of the Erythraean Sea*; and *Gossellin*, in his *Geography of the Ancients*, have exhausted almost every possible argument; the first in its favour, the two latter to prove that it never did or could take place. To these last it appears impossible that ancient mariners, with their slender resources, creeping in little row-galleys along the coast, steering without the aid of a compass, and unable to venture to any distance from land, could have performed so immense a circuit. All antiquity, they observe, continued to grope in doubt and darkness respecting the form of Africa, which was only fully established several thousand years afterward by the expedition of *Gama*. On the other side, *Rennell* urges that, immense as this voyage was, it was entirely along a coast of which the navigators never required to lose sight even for a day; that their small barks were well equipped, and better fitted than ours for coasting navigation; and that these, drawing very little water, could be kept quite close to the shore, and even be drawn on land whenever an emergency made this step indispensable. The statement that, at the extremity of Africa, they saw the sun on the right, that is, to the north of them (a fact which causes *Herodotus* peremptorily to reject their report), affords the strongest confirmation of it to us, who know that

to the south of the equator this must have really taken place, and that the historian's unbelief arose entirely from his ignorance of the real figure of the earth. (*Vid. Africa*, p. 73, col. 1.)

NECKROPOLIS (from *νεκρός*, "dead," and *πόλις*, "city"), the city of the dead; a name beautifully applied to the cemeteries in the neighbourhood of many of the ancient cities, such as Thebes in Egypt, Cyrene, Alexandria, &c.

NECTANĒBIS, a king of Egypt, cousin to Tachos, and proclaimed king during the absence of the latter, with the Egyptian forces, in Phœnicia. He was supported by *Agessilaus*, whom Tachos had offended by rejecting his advice. Aided by the Spartan king, Nectanebis defeated a competitor for the crown from Mendes, and was at last firmly established in his kingdom. Being subsequently attacked by *Artaxerxes Ochus*, who wished to reduce Egypt once more under the Persian sway, he met with adverse fortune, and fled into *Æthiopia*, whence he never returned. Nectanebis was the last king of Egypt of the Egyptian race. (*Plut.*, *Vit. Ages.*—*Diod. Sic.*, 15, 92.—*Id.*, 16, 48, *seqq.*)—As regards the variations in the orthography of the name, consult *Wesseling*, *ad Diod. Sic.*, 15, 92.

NELEUS (two syllables), I. a son of Neptune and Tyro. He was brother to Pelias, with whom he was exposed by his mother, who wished to conceal her frailty from her father. They were preserved and brought to Tyro, who had then married Cretheus, king of Iolchos. After the death of Cretheus, Pelias and Neleus contended for the kingdom, which belonged of right to *Æson*, the son of the deceased monarch and Tyro. Pelias proved successful, and Neleus departed with a body of followers into the Peloponnesus. (*Diod. Sic.*, 4, 68.) Here he founded Pylos in Messenia, and, marrying Chloris, daughter of Amphiion, became the father of twelve sons, the oldest of whom was Periclymenus, the youngest Nestor, and of one daughter, named Pero. (*Diod.*, 1, c.) When Hercules attacked Pylos, he killed Neleus and all his sons but Nestor, who was then a child, and reared among the Gerenians. (*Hom.*, *Il.*, 11, 690.—*Hes.*, *ap. Schol. ad Apoll. Rhod.*, 1, 156.—*Apollod.*, 1, 9, 8, *seqq.*) Neleus had promised his daughter in marriage to him who should bring to Pylos the cows of Tyro, detained by Iphiclus. Bias was the successful suitor; for an account of which legend, consult the article *Melampus*.—II. A disciple of Theophrastus, to whom that philosopher bequeathed the writings of Aristotle. (*Vid. Apellion*.)

NEMAVUS, an important city of Gallia Narbonensis, next in rank to Narbo. It was situate on the main route from Spain to Italy, and was the capital of the *Arecomici*. It is now *Nîmes*, and is famed for its remains of antiquity. (*Mela*, 3, 5.—*Plin.*, 3, 4.)

NEMŒA (*Nemæa*), a city of Argolis, to the northwest of Mycenæ, celebrated as the haunt of the lion slain by Hercules, and the spot where triennial games were held in honour of *Archemorus*, or *Opheltes*, son of *Lycurgus*, king of Nemæa. (*Apollod.*, 3, 6, 3.—*Hygin.*, *fab.*, 74.—*Id.*, *fab.*, 273.) The games were solemnized in the grove of *Molorchus*, who was said to have entertained Hercules when he came to Nemæa in pursuit of the lion. (*Apollod.*, 2, 7.)—We know from *Polybius* and *Livy*, that the Nemæan games continued to flourish in the reign of Philip, son of *Demetrius* (*Polyb.*, 2, 7, 4.—*Id.*, 5, 101, 6.—*Livy*, 27, 30.—*Strabo*, 377); but we may infer, that in the time of *Pausanias* they had fallen into great neglect, from the slight mention he has made of their solemnization (2, 15). The ruins of Nemæa are to be seen near the modern village of *Kutchumadi*. (*Cramer's Ancient Greece*, vol. 3, p. 264, *seqq.*)—The Nemæan games, though, like the Olympic and Isthmian, originally antedoric, became subsequently Doric in their charac-

ter. They were celebrated under the presidency of the Corinthians, Argives, and inhabitants of Cleonæ (*Arg. ad Pind., Nem.*, 3.—Compare *Pausan.*, 2, 14, 2); but in later times they appear to have been entirely under the management of the Argives. (*Livy*, 34, 41.) They are said to have been celebrated every third year; and sometimes, as we learn from Pausanias, in the winter. (*Pausan.*, 2, 16, 2.—*Id.*, 6, 16, 4.) The crowns bestowed on the victors were of parsley, since these games were originally funeral ones, and since it was customary to lay chaplets of parsley on the tombs of the dead. (*Wachsmuth, Gr. Antiq.*, vol. 1, p. 163, *Eng. transl.*)

NEMESIUS (Marcus Aurelius Olympius), a Latin poet, a native of Carthage, who flourished about 280 A.D. Few particulars of his life are known. His true family name was Olympius; that of Nemesianus, by which he is commonly cited, indicates probably that his ancestors were residents of Nemesium, a city of Marmarica. Vopiscus, in his life of Numerian (who was clothed with the imperial purple A.D. 282), informs us that Nemesianus had a poetical contest with this prince, but was defeated. It is possible that Nemesianus may have been a kinsman of his; at least, the Emperor Carus, and his two sons, Carinus and Numerianus, bear, like our poet, the prænomen of Marcus Aurelius. Vopiscus also states that Nemesianus composed *Haliectica*, *Cynegetica*, and *Nautica*, and gained all sorts of crowns ("omnibus coronis illustratus emicuit," according to the felicitous emendation of Casaubon). So that, whatever opinion may be formed of his merits by modern critics, it is certain that the emperor's triumph over him was by no means lightly esteemed by his contemporaries. We have only one of the three poems, of which the historian speaks, remaining, namely, that entitled *Cynegetica*, the subject of which is the chase, together with some fragments of the two others. The *Cynegetica*, or poem on hunting, consists of 325 verses; but the work is incomplete, either from having been left in that state by the poet himself, or from a portion of it having been lost. The plan of the piece is entirely different from that of Gratius Faliscus. This latter treats in a single strain of all the species of hunting, and in a very succinct way; Nemesianus, on the contrary, appears to have treated of each kind of hunting separately, and in a detailed manner. In the first book, which is all that we possess, the poet speaks of the preparations for the hunt, of the rearing of dogs and horses, and of the various implements and aids which must be provided by the hunter. In this portion of his work, Nemesianus often gives spirited imitations of Virgil and Oppian. Though the poem is not free from the faults of the age in which it was written, yet in point of correctness and elegance it is far before most contemporaneous productions.—Besides the *Cynegetica*, and the fragments of the other two poems that have been mentioned (which some, however, assign to a different source), we have a small poem in honour of Hercules, and two fragments of another poem on fowling, "*De Auspicio*." The best edition of the remains of Nemesianus is that given by Wernsdorff in the first volume of his *Poeta Latini Minores*. (*Schöll, Hist. Lit. Rom.*, vol. 3, p. 33, *seqq.*—*Bähr, Gesch. Röm. Lit.*, vol. 1, p. 211.)

NEMESIS, a female Greek divinity, who appears to have been regarded as the personification of the righteous anger of the gods. She is represented as inflexibly severe to the proud and insolent. (*Pausan.*, 1, 33, 2.) According to Hesiod, she was the daughter of Night. (*Theog.*, 223.—Compare *Pausanias*, 7, 6, 1.) There was a celebrated temple sacred to her at Rhamnus, one of the boroughs of Attica, about sixty stadia distant from Marathon. In this temple there was a statue of the goddess, made from a block of Persian marble, which the Persians had brought thither to erect as a trophy of their expected victory at Marathon.

Pausanias says, that this statue was the work of Phidias (1, 33, 2, *seq.*); but Pliny ascribes it to Agoracritus: and adds, that it was preferred by M. Varro to all other statues which existed. (*Plin.*, 36, 4, 3.) A fragment, supposed by some to be the head of this statue, was found in the temple of Rhamnus, and was presented to the British Museum in 1820. (*Elgin and Phigalician Marbles*, vol. 1, p. 120; vol. 2, p. 123.) The inhabitants of Rhamnus considered Nemesis to be the daughter of Oceanus. (*Pausan.*, 7, 5, 1.) The practice of representing the statues of Nemesis with wings was first introduced after the time of Alexander the Great by the inhabitants of Smyrna, who worshipped several goddesses under this name. (*Pausan.*, 7, 5, 1.—*Id.*, 9, 35, 2.) According to a myth preserved by Pausanias, Nemesis was the mother of Helen by Jupiter; and Leda, the reputed mother of Helen, was only, in fact, her nurse (1, 33, 7); but this myth seems to have been invented in later times, to represent the divine vengeance which was inflicted on the Greeks and Trojans through the instrumentality of Helen. There was a statue of Nemesis in the Capitol at Rome; though we learn from Pliny that this goddess had no name in Latin. (*Pliny*, 28, 5.—*Id.*, 11, 108.—*Encycl. Us. Knowl.*, vol. 16, p. 141.)

NEMESIUS, a native of Emesa in Syria, and one of the ablest of the ancient Christian philosophers. Of his life very few particulars are known; and even the time when he lived is uncertain, though this is generally supposed to have been during the reign of Theodosius the Great, towards the end of the fourth century. He became, in time, bishop of his native city. Nemesius has been accused of holding some of Origen's erroneous opinions, but has been defended by Bishop Fell (*Annot.*, p. 20, *ed. Oxon.*, 1871), who however confesses, with regard to the pre-existence of souls, that "he differed from the commonly-received opinion of the church." But it is as a philosopher and physiologist that Nemesius is best known, and his work *Περὶ φύσεως ἀνθρώπου*, "*On the Nature of Man*," is one of the most accurate treatises of antiquity. Some writers (among whom we may mention Bishop Fell, Fabricius, and Brucker) have even supposed that he was acquainted with the circulation of the blood; but in the opinion of Freind (*Hist. of Physic*), Haller (*Biblioth. Anat.*), and Sprengel (*Hist. de la Méd.*), he has no right whatever to be considered as the author of this discovery. The passage which has now given rise to the discussion is certainly remarkable: "The motion of the pulse," says he, "takes its rise from the heart, and chiefly from the left ventricle of it: the artery is with great vehemence dilated and contracted, by a sort of constant harmony and order. While it is dilated, it draws with force the thinner part of the blood from the next veins, the exhalation or vapour of which blood is made the aliment for the vital spirit; but while it is contracted, it exhales whatever fumes it has through the whole body and by secret passages, as the heart throws out whatever is fuliginous through the mouth and nose by expiration" (cap. 24, p. 242, *ed. Matth.*). There is another passage equally curious respecting the bile (cap. 28, p. 280, *ed. Matth.*), from which Nemesius is supposed to have known all that Sylvius afterward discovered with respect to the functions of the bile; but his claim in this case is no better than the former, and, indeed, Haller and Sprengel both say that his physiology is not at all more perfect than that of Galen. But even if we cannot allow Nemesius all the credit that has been claimed for him, still, from his general knowledge of anatomy and physiology (which is quite equal to that of the professional men of his time), his acuteness in exposing the errors of the Stoics and the Manichees, the purity and elegance of his style compared with that of his contemporaries, and the genuine piety which shows itself throughout his work, he has always ranked very high

in the list of ancient Christian philosophers. The best and most complete edition of Nemesius is that of Matthæi, *Hal. Magd.*, 1802, 8vo. Before the appearance of this, the edition of Fell, *Ozon.*, 1871, 8vo, was most esteemed. (*Encycl. Us. Knowl.*, vol. 18, p. 141, *seqq.*)

NEWETACUM, a town of the Atrebatæ in Gaul, now *Arras*. (*Vid.* Atrebatæ.)

NEWETES, a nation of northern Gaul, in the division called Germania Prima, lying along the banks of the Rhine, and between the Vangiones and Tribocci. Their chief city was Noviomagus, now *Spire*. According to some, they occupied both banks of the Rhine, and their transrhene territory corresponded in part to the *Grand Duchy of Baden*. (*Tacit., Germ.*, 28.—*Cæs.*, B. G., 1, 31.—*Lemaire, Ind. Geogr. ad Cæs.*, s. v.)

NEMOSSUS, the same with Augustonemetum and Claromontium, the capital of the Avernî in Gaul, now *Clermont*. Strabo, from whom we obtain the name Nemoessus, is thought by some to mean a different place from Augustonemetum. (*Mannert, Geogr.*, vol. 2, pt. 1, p. 117.)

NEOBULE, I. a daughter of Lycambes, satirized by Archilochus, to whom she had been betrothed. (*Vid.* Lycambes).—II. A young female to whom Horace addressed one of his odes. The bard laments the unhappy lot of the girl, whose affection for the youthful Hebrus had exposed her to the angry chidings of an offended relative. (*Horat., Od.*, 3, 12.)

NEOCÆSARÆA, a city of Pontus, on the river Lycus, northwest of Comana. Its previous name appears to have been America, and it would seem to have received the appellation of Neocæsarea in the reign of Tiberius. In the time of Gregory Thaumaturgus, who was a native of this place, it is stated to have been the most considerable town of Pontus. (*Greg. Neoc.*, *Vit.*, p. 577.) It appears also, from the life of the same saint, to have been the principal seat of pagan idolatry and superstitions, which affords another presumption for the opinion that it had risen on the foundation of America and the worship of Men-Pharnaces. *Nikaar*, the modern representative of Neocæsarea, is a town of some size, and the capital of a district of the same name, in the pachalic of *Sivas* or *Roum*. (*Cramer's Asia Minor*, vol. 1, p. 815, *seq.*)—II. A city on the Euphrates, in the Syrian district of Chalybonitis; now, according to Reichard, *Kalat el Nedsjur*.

NEON, the same with Tithorea in Phocis. (*Vid.* Tithorea.)

NEONTICHOS, a town of Æolis, in Asia Minor, founded by the Æolians, as a temporary fortress, on their first arrival in the country, and thirty stadia distant from Larissa. Pliny leads us to suppose that it was not on the coast, but somewhat removed from it; and we collect from a passage in the *Life of Homer* (§ 11, *seq.*), that it was situate between Larissa and the Hermus. The ruins of this place should be sought for on the right bank of the Hermus, and above *Giuzel-kissar*, on the road from *Smyrna* to *Bergamah*. (*Cramer's Asia Minor*, vol. 1, p. 151.)

NEOPTOLEMUS, I. son of Achilles and Deidamia. (*Vid.* Pyrrhus I.).—II. A king of the Molossi, father of Olympias, the mother of Alexander. (*Justin*, 17, 3).—III. An uncle of Pyrrhus, king of Epirus, raised to the throne during the absence of the latter in Italy. Pyrrhus, on his return home, associated Neoptolemus with him in the government; but afterward put him to death on a charge of attempting to poison. (*Plut., Vit. Pyrrh.*)—IV. A captain of Alexander's life-guards. After the death of that monarch he took part in the collisions of the generals, and was defeated, along with Craterus, and slain by Eumenes. (*Plut., Vit. Eum.*)—V. A poet, a native of Naupactus, who wrote a poem on the heroines and other females celebrated in mythology, which he entitled *Navraktika*, in honour

of his native city. (*Schol. ad Apoll. Rhod.*, 2, 299, &c.) Others, however, make Carcinus to have been the author of this poem.—VI. A native of Paros, who composed a work on Inscriptions (*Περὶ Ἐπιγραφῶν*), of which Athenæus makes mention (10, p. 454).

NEPA, according to Festus, an African word, and equivalent to the Latin "*sidus*." Cicero often employs it in his translation of Aratus, and it occurs in Manilius (3, 32) and elsewhere. Plautus uses it (*Cæs.*, 2, 8, 7) for Cancer, and Cicero (*de Fin.*, 5, 15) for Scorpio. This latter writer, moreover, who, in his translation of Aratus, commonly employs *Nepa* in the sense of *Scorpio*, in one passage (v. 460) uses it in the sense of *Cancer*. In Columella, also (11, 2, 30), *Nepa* occurs for *Cancer*, according to some, but perhaps with more correctness for *Scorpio*. (Compare *Ideler, Sternnamen*, p. 169.)

NEPE or NAFERA, a town of Etruria, southwest of Falerii. Pliny (3, 5) calls it Nepet, and Sigonius contends for this being the true reading: but in all the ancient inscriptions which have been found here, it is written Nepete. In Strabo it is named Nepita. (*Strab.*, 226.) The modern name is *Nepi*. (*Cramer's Anc. Italy*, vol. 1, p. 233.)

NEPHELE, the first wife of Athamas king of Thebes, and mother of Phryxus and Helle. (*Vid.* Athamas.)

NEPOS, CORNELIUS, a biographical writer, who lived towards the end of the republic, and during the earlier part of the reign of Augustus. He is generally believed to have been born at Hostilia (now *Ostiglia*), a small town situate on the banks of the Po, near the confines of the Veronese and Mantuan territories. The year of his birth is uncertain, but he first came to Rome during the dictatorship of Julius Cæsar. He does not appear to have filled any public office in the state; but his merit soon procured him the friendship of the most eminent men who at that time adorned the capital of the world. Catullus dedicated to him the volume of poems which he had privately read and approved of before their publication. Nepos addressed one of his own works to Pomponius Atticus, with whom also he was on terms of intimacy. (*Vit. Attici*, 13.) He likewise obtained the esteem and affection of Cicero (*Aul. Gell.*, 15, 28), who speaks of his writings with high approbation in one of his letters, and in another alludes with much sympathy to the loss which Nepos had sustained by the death of a favourite son. (*Ep. ad Att.*, 16, 5 et 14.) It farther appears that Cicero had frequently corresponded with him, for Macrobius quotes the second book of that orator's epistles to Cornelius Nepos. (*Sat.*, 2, 1.)—It is thus probable that some of our author's works had been prepared, or were in the course of composition, previous to the death of Cicero; but they were not given to the public till early in the reign of Augustus, since Eusebius considers him as flourishing in the fourth year of that emperor (*ap. Voss, de Hist. Lat.*, 1, 14). The precise period of his death is unknown, and it can only be ascertained that he survived Atticus, whose biography he writes, and who died in the 722d year of the city. Some chronological accounts extend his life till the commencement of the Christian era, but it is scarcely possible that one who was a distinguished literary character in the time of Catullus could have existed till that epoch. Fabricius makes a curious mistake concerning the death of Cornelius Nepos, in saying that he was poisoned in 724 by his freedman Callisthenes, and in citing Plutarch's *Life of Lucullus* as his authority for the fact. (*Bibl. Lat.*, 1, 6.) The passage in Plutarch only bears, that C. Nepos had somewhere said that the mind of Lucretius had become impaired in his old age, in consequence of a potion administered to him by his freedman Callisthenes.—Whether the Cornelius Nepos concerning whose life these circumstances have been gleaned was the author of the well-known book entitled *Vita Excellentium Imperatorum*,

has been a subject, ever since the work was first printed, of much debate and controversy among critics and commentators. The dissension originated in the following circumstances: A person of the name of Æmilius Probus, who lived in the fourth century, during the reign of Theodosius the Great, presented to his sovereign a copy of the *Vita Imperatorum*, and prefixed to it some barbarous verses, which left it doubtful whether he meant to announce himself as the author, or merely as the transcriber, of the work. These lines, being prefixed to the most ancient MSS. of the *Vita Excellentium Imperatorum*, induced a general belief during the middle ages that Æmilius Probus was himself the author of the biographies. The *Editio Princeps*, which was printed by Janson in 1471, was entitled "*Probi Æmilii Liber de Virorum Excellentium Vita*." All subsequent editions were inscribed with the name of Æmilius Probus, till the appearance of that of Lambinus in 1568, in which the opinion that Probus was the author was first called in question, and the honour of the work restored to Cornelius Nepos. Since that time the *Vita Excellentium Imperatorum* have been usually published with his name; but various suppositions and conjectures still continued to be formed with regard to the share that Æmilius Probus might have had in the MS. which he presented to Theodosius. Barthius was of opinion, that in this MS. Probus had abridged the original work of Nepos in the same manner as Justin had epitomized the history of Trogus Pompeius; and in this way he accounts for some solecisms and barbarous forms of expression, which would not have occurred in the genuine and uncorrupted work of an Augustan writer. (*Adversaria*, 24, 18; 25, 15.) Since the time of Barthius, however, this hypothesis, which divides the credit of the work between Cornelius Nepos and Probus, has been generally rejected, and most commentators have adopted the opinion that Probus was merely the transcriber of the work of Nepos, and that he did not mean to signify more in the lines which he prefixed to his MS. They argue that it is clear, from a passage in the commencement of the Life of Pelopidas, that the work had not been reduced, as Barthius supposes, to a compendium, but had originally been written in a brief style and abridged form: "*Veretur, si res explicare incipiam, non vitam ejus enarrare, sed historiam videar scribere: si tantum modo summas attigero, ne rudibus literarum Græcorum minus lucide appareat, quantus fuerit ille vir. Itaque utrique rei occurrant, quantum potero; et medebor cum satietati, tum ignorantia lectorum.*" It is worthy of remark, that in some of the old MSS. of the "*Vita Imperatorum*," which furnished the text of the earlier editions, there is written at the end, "*Completum est opus Æmilii Probi, Cornelii Nepotis*," as if the copyist had been in doubt as to the real author. —So far from admitting those solecisms of expression for which Barthius thinks it necessary to account, Vossius chiefly founds his argument in favour of the classical authenticity of the work on that Augustan style, which neither Æmilius Probus nor any other writer of the time of Theodosius could have attained. A very recent attempt, however, has been made again to vindicate for Æmilius Probus the honour of the composition, in Rinck's "*Saggio per restituire a Æmilio Probo il libro di Cornelio Nepote*." —After allowing for the superior dignity of the office of transcriber in the age of Theodosius, compared with its diminished importance at the present day, it would seem that there is something more implied in the verses of Probus than that he was merely a copyist; and he must either have had a part in the composition, or, having discovered the MS., was not unwilling that he should have some share of the credit due to the author. —The *Vita Imperatorum*, properly so called, contain the lives of nineteen Greek, one Persian, and two Carthaginian generals. It has been conjectured that

there was also a series of lives of Roman commanders, but that these had perished before Æmilius Probus commenced his transcription. That Nepos at least intended to write these biographies, appears from a passage at the end of the life of Hannibal, in which he says, "It is now time to conclude this book, and proceed to the lives of the Roman generals, that, their exploits being compared with those of the Greeks, it may be determined which are to be preferred" (c. 13). That he actually accomplished this task is rendered at least probable from the circumstance of Plutarch's quoting the authority of Nepos for facts concerning the lives of Marcellus and Lucullus; and it seems not unlikely that the sentence at the close of *Hannibal* may have suggested to that biographer the idea of his parallel lives. —The principles which Nepos displays in that part of the work which still remains are those of an admirer of virtue, a foe to vice, and a supporter of the cause of freedom. He wrote in the crisis of his country's fate, and during her last struggle for freedom, when despotism was impending, but when the hope of freedom was not yet extinguished in the breasts of the last of the Romans. The work, it has been conjectured (*Harles, Introduct. in Lit. Rom.*, vol. 1, p. 367), was undertaken to fan the expiring flame, by exhibiting the example of such men as Dion and Timoleon, and by inserting sentiments which were appropriate to the times. In choosing the subjects of his biographies, the author chiefly selects those heroes who had maintained or recovered the liberties of their country, and he passes over all that bears no reference to this favourite theme. It must be confessed, however, that he does not display in a very enviable view the fate of those popular chiefs who defended or liberated their native land. The "*Invidia, gloria comes*," lighted on almost every Grecian hero; and Miltiades and Themistocles ultimately received no better reward from the free Athenian citizens than Datames obtained from the Persian despot. —With regard to the authenticity of his facts, Nepos has given us no information in his preface concerning the sources to which he resorted; but in the course of his biographies he cites Thucydides, Xenophon, Theopompus, and Philistus, and also Dinon, to whose authority he chiefly trusted with regard to Persian affairs. (*Vit. Conon*, c. 5.) That he compared the different opinions of these historians on the same subject is evinced by a passage in his *Alcibiades* (c. 11); and it appears from another passage, in his life of Themistocles, that when they differed in their statement of facts, he had the good sense and judgment to prefer the authority of Thucydides (c. 9). Aulus Gellius rather commends his diligence in the investigation of facts (15, 28). But Pliny (5, 1), on the other hand, censures both his credulity and haste. The investigations, moreover, of modern commentators have discovered many mistakes and inconsistencies in almost every one of his biographies. For example: 1. It was not the great Miltiades, son of Cimon, as Nepos erroneously relates, who founded a petty sovereignty in the Thracian Chersonese, but Miltiades the son of Cypselus, as the Latin biographer might have learned from Herodotus (8, 34), an author whom he never quotes, and scarcely appears to have consulted. —2. In the life of Phocion he has mistaken the Greek words *ἐμφυλὸς τις* ("a certain person of the same tribe") for a proper name, *Emphyletus*. It is believed, however, by Tzachucke, that Phocion may have had a friend of this name, since the same appellation occurs in Andocides. Without some excuse of this kind, Nepos's knowledge of Greek becomes very suspicious. —3. In the life of Pausanias (c. 1) he confounds together Darius and Xerxes; Mardonius was the son-in-law of the former, and the brother-in-law of the latter. —4. He confounds the victory of Mycale, gained by Xantippus and Leotychides, with the naval battle gained by Cimon, nine years after, near the river

Eurymedon. (*Við. Mycale.*)—5. In comparing the end of the second chapter and the commencement of the third of the life of Pausanias, with the clear and circumstantial narrative of Thucydides (1, 130-134), we shall perceive that Nepos has violated the order of time, and confounded the events.—6. There is no less disorder in the third chapter of the life of Lysander. Nepos confounds two expeditions of this general into Asia, between which there elapsed an interval of seven years. (Compare *Xen., Hist. Gr.*, 3, 4, 10.—*Diod. Sic.*, 14, 13.)—7. In the second chapter of the life of Dion, Nepos confounds the order of events. Plato made three voyages to Sicily; the first in the time of Dionysius the Elder, who had him sold as a slave; Dion was then only fourteen years old. At the time of his second voyage, Dionysius the Elder was no longer alive. It was during his third visit to the island that the philosopher reconciled Dion and Dionysius the Younger. Finally, it was not Dionysius the Elder, but the son, who invited Plato "*magna ambitione.*"—8. In the second chapter of the life of Chabrias, utter confusion prevails. At the period when Nepos makes Agesilaus to have gone on his expedition into Egypt, this monarch was busily occupied in Boeotia; and Nepos himself, in his life of Agesilaus, makes no mention of this expedition. The king of Egypt who was assisted by Chabrias was Tachos, and not Nectanebis.—9. Hannibal did not immediately march to Rome after the victory at Cannæ, as Nepos in his life of Hannibal (c. 5) states, but after having permitted the spirit of his army to become corrupted in Campania.—10. In the life of Conon (c. 1), he says that this general had no share in the battle of Egospotamos; the contrary is proved by Xenophon. (*Hist. Gr.*, 2, 1, 28.)—11. In the life of Agesilaus (c. 6) he attributes to this king the victory at Corinth, which was due to Aristodemus, as Xenophon informs us (*Hist. Gr.*, 4, 2, 9).—Nepos is also charged with being too much of a panegyrist, and with having given to his Lives the air rather of a series of professed eulogies than of discriminating and impartial biographies. In fact, however, he selected the lives of those whom he considered as most worthy of admiration; and he has not failed to bestow due reprobation on the few who, like Pausanias and Lysander, degenerated from the virtues of their countrymen. Nepos appears to have been fully aware of the difference between history and biography; remembering that the latter was more simple than the former, that it did not require to be so full with regard to public events, and admitted more details of private life and manners. To this distinction he alludes in his preface; and we accordingly find that the life of Epaminondas, for example, is occupied with the private character and memorable sayings, more than with the patriotic exploits, of that renowned hero. He has thus recorded a great many curious particulars which are not elsewhere to be found; and he excels in that art (the difficulty of which renders good abridgments so rare) of perceiving the features which are most characteristic, and painting vividly with a few touches. "The character of Alcibiades," says Gibbon, "is such that Livy need not have been ashamed of it." (*Misc. Works*, vol. 4, p. 417.)—The MS. of Æmilius Probus, the copies taken from it, and the *Editio Princeps* published by Janson in 1471, all terminated with the life of Hannibal. The fragment of the life of Cato the Censor, and the life of Pomponius Atticus, now generally appended to the *Vita Excellentium Imperatorum*, were discovered by Cornerus in an old MS. containing the letters of Cicero to Atticus, and were published by him along with the *Vita Imperatorum*, in an edition which is without date, but is generally accounted the second of that production of Nepos. It is evident that the life of Atticus was a separate work, or an extract of a work, which was altogether different from the *Vita*

Imperatorum; for, in the first place, Atticus was not a military commander; and, secondly, Nepos dedicates the *Vita Imperatorum* to Atticus, while, in the last chapters of the life of Atticus, he minutely relates the circumstances of his death. The old scholiasts are of opinion, that, along with the fragment on the life of Cato the Censor, it had originally formed part of a treatise by Cornelius Nepos which is now lost, and which was entitled "*De Historicis Latinis.*"—The life of Atticus is much more curious and valuable than the biographies of the Greek generals. It is fuller, and it is not drawn, as they are, from secondary sources. Nepos was the intimate friend of Atticus, and was himself an eye-witness of all that he relates concerning the daily occurrences of his life, and with regard to the most minute particulars of his domestic arrangements, even down to his household expenses. As exhibiting the fullest details of the private life of a Roman (though a specimen, no doubt, highly favourable and ornamental), it is perhaps the most interesting piece of biography which has descended to us from antiquity.—Nepos appears to have been a very fertile writer. Besides the lives of commanders and that of Pomponius Atticus, he was the author of several works, chiefly of an historical description, which are now almost entirely lost. He wrote, in three books, an abridgment of the history of the world; and he had the merit of being the first author among the Romans who completed a task of this laborious and useful description. Aulus Gellius mentions his life of Cicero (15, 38), and quotes the fifth book of his work entitled *Exemplorum libri* (7, 18). He also composed a treatise on the difference of the terms *litteratus* and *eruditus*; and, finally, a passage in the life of Dion informs us of a work which Nepos wrote, *De Historicis Græcis*.—While so many of his productions have been lost, and while it has been denied that he was the author of some which he actually composed, others, by a strange caprice, have been attributed to him which he certainly did not write. One of these is the work *De Viris Illustribus*, now generally assigned to Aurelius Victor. Another is the book *De Excidio Troje*, which professes to be a Latin translation, by Cornelius Nepos, from a Greek work by Dares Phrygius, though, in fact, it was written by an obscure author, after the age of Constantine. Along with the book which passed under the name of Dictys Cretensis, it became the origin of those folios of romance and chivalry, in which the heroes of Greece were marshalled with Arthur's Round-Table Knights, and with the Paladins of Charlemagne.—The best editions of Nepos are, that of Longolius, *Colon.*, 1543; Lambinus, *Lutet.*, 1569, 4to; et *Francof.*, 1608, fol.; Bosius, *Lips.*, 1657, 1675, 8vo; Van Staveren, *Lugd. Bat.*, 1773, 8vo; Tzschütcke, *Götting.*, 1804, 8vo; Harles, *Lips.*, 1806, 8vo; Fischer, *Lips.*, 1806, 8vo; Dähne, *Lips.*, 1827, 8vo; and Bremi, *Lips.*, 1827, 8vo. (*Dunlop's Roman Literature*, vol. 3, p. 513, seq.)

NEPOTIANUS, FLAVIUS POPILIUS, a son of Eutropia, the sister of the Emperor Constantine. He proclaimed himself emperor after the death of his cousin Constantine, marched to Rome with a body of gladiators and other worthless followers, defeated Anicetus the prætorian prefect, and pillaged the city. He enjoyed his usurped power only twenty-eight days, at the end of which period he was defeated and slain by Marcellinus, one of the lieutenants of Magnentius. (*Le Bossu, Hist. du Bas-Empire*, vol. 1, p. 358.)

NEPTUNIUM, a promontory of Bithynia, on the Propontis, at the mouth of the Cissus Sinus. It is more usually known by its Greek name Posidium. Mannert gives the modern appellation as *Bos Burun*. (*Geogr.*, vol. 6, pt. 3, p. 578.)

NEPTUNUS DUX, an expression applied by Horace (*Epod.*, 9, 7) to Sextus Pompeius, who boastingly styled himself the son of Neptune, because his father

had once held the command of the sea. (*Die Cass.*, 48, 18.) Coins still exist of this Roman leader, bearing the effigy of Neptune, with the inscription *Magnus Pius Imperator iterum*; or this, *Præfectus classis et ora maritima ex s. c.* (Consult *Rasche, Lex Rei Num.*, vol. 6, col. 1676, *seqq.*)

NEPTUNUS or NEPTUNUS, the god of the sea, a Roman divinity, whose attributes are nearly the same as those of the Greek Poseidon (Ποσειδών). They will both, therefore, be considered in one and the same article. Neptune or Poseidon, the son of Saturn and Rhea, and the brother of Jupiter and Juno, appears to have been one of the most ancient divinities of Greece; although, according to Herodotus (2, 50), he was not originally a Greek deity, but his worship was imported from Libya. This statement, however, on the part of the historian, cannot be correct. Neptune was the god of water in general, of the sea, the rivers, and the fountains, but he was more particularly regarded as the god of the sea, which he acquired in his share of the dominions of his father Saturn. His wife was Amphitrite, and their children were Triton and Rhodæ, or Rhodes, which last became the bride of Helios, or the Sun-god. A late legend said that Amphitrite fled the love of the god, but that he came riding on a dolphin, and thus won her affection; and for this service he placed the dolphin among the stars. (*Eratosth., Catast.*, 31.—*Hygin., Poet. Astron.*, 1, 17.) Neptune, like his brother Jupiter, had a numerous progeny by both goddesses and mortals. The fleet steed Arion was the offspring of the sea-god and Ceres, both having assumed the equine form. According to one account, the nymph Rhodæ was his daughter by Venus. (*Heroph., ap. Schol. ad Pind., Ol.*, 7, 24.)—Neptune is said to have produced the horse in his well-known contest with Minerva for the right of naming the city of Athens. (*Vid. Cecrops.*) According to some, we are to understand by this myth that the horse was imported into Greece by sea. But this explanation is far from satisfactory. It is difficult to give a reason for the connexion of Neptune with the horse; but it is evident, from several passages in the Greek writers, that he was regarded as a kind of equestrian deity as well as the god of the sea. In the absence of a better explanation, we will give the one suggested by Knight. "The horse," says this writer, "was sacred to Neptune and the rivers, and was employed as a general symbol of the waters. Hence also it may have been assumed as one of the types of fertility, and may furnish a clew to the fable of Neptune and Ceres. It may also throw some light on the narrative of Pausanias, where he states (8, 24) that the Phigalenses dedicated a statue to Ceres, having the figure of a woman in every other part except the head, which was that of a horse; and that she held in one hand a dolphin, and in the other a dove." (*Knight, Enquiry, &c.*, § 111, *seqq.*—*Class. Journ.*, vol. 25, p. 34, *seqq.*)—Besides his residence on Olympus, Neptune had a splendid palace beneath the sea at Ægæa. (*Il.*, 13, 21.—*Od.*, 5, 381.) Homer gives a noble description of his passage from it on his way to Troy, his chariot-wheels but touching the watery plain, and the monsters of the deep gambolling around their king. His most celebrated temples were at the Corinthian Isthmus, at Onchestus, Helice, Træzene, and the promontories of Tenarum and Geræstus.—Neptune is represented, like Jupiter, of a serene and majestic aspect; his form is exceedingly strong and muscular; and hence "the chest of Neptune" (στῆθος Ποσειδάωνος, *Il.*, 5, 479) is the poetic expression for this characteristic of the deity, which is illustrated by the noble fragment from the pediment of the Parthenon in the British Museum. He usually bears in his hand the trident, the three-pronged symbol of his power; the dolphin and other marine objects accompany his images. The animals offered to him in sacrifice were

usually black bulls, rams, and bear-pigs.—Neptune was not originally a god of the Doric race. He was principally worshipped by the Ionians, who were in most places a maritime people. In those Doric cities, however, which acquired a love for foreign commerce, we find that the worship of Neptune extensively prevailed. (*Müller's Dorians*, vol. 1, p. 417, *seqq.*, *Eng. transl.*)—The etymology of the names Poseidon and Neptunus is doubtful. *Poseidon* is written in Doric Greek *Poteidan* (Ποτειδάν), of which we have another example in the name of *Potidaea*, written *Poteidaia* (Ποτειδαία) in the inscription, now in the British Museum, on those Athenians who fell before this city. The name, according to some writers, contains the same root in the first syllable as we find in *πότης* and *ποταμός*; and has the same reference, in all likelihood, to water and fluidity. (*Müller, Proleg.*, p. 289.)—*Neptunus*, on the other hand, is derived by the Stoic Balbus, in Cicero, from *nando* (*N. D.*, 2, 26), an etymology which Cotta subsequently ridicules. (*N. D.*, 3, 24.) Varro deduces it from *nuptus*, because this god "covers" (*obnubiat*) the earth with the sea. (*L. L.*, 4, 10.) This latter derivation, though approved of by Vossius (*Etymol.*, s. v. *nuptus*), is no better than the former. We may compare the form of the word *Neptunus* or *Neptumnus* with *Portumnus*, *Vertumnus*, and the word *alumnus*; but the meaning or origin of the root *Nept* or *Nep* seems uncertain. It may, perhaps, be connected with the same root that is contained in the Greek *νιπν-ω*, "to wet." (*Keightley's Mythology*, p. 85, *seqq.*—*Encycl. Us. Knowl.*, vol. 16, p. 146.)

ΝΗΡΕΪΔΕΣ (*Nēphēides*), nymphs of the sea, daughters of Nereus and Doris. They are said by most ancient writers to have been fifty in number, but Propertius makes them a hundred (3, 5, 33). The most celebrated of them were Amphitrite, the wife of Neptune; Thetis, the mother of Achilles; Galatæa, Doto, &c. The worship of the Nereids was generally connected, as might be supposed, with that of Neptune. Thus, they were worshipped in Corinth, where Neptune was held in especial honour, as well as in other parts of Greece. (*Pausan.*, 2, 1, 7, *seq.*—*Id.*, 3, 26, 5.—*Id.*, 5, 19, 2.) The Nereids were originally represented as beautiful nymphs; but they were afterward described as beings with green hair, and with the lower part of their body like that of a fish. (*Phin.*, 9, 4.)

ΝΗΡΕΥΣ (two syllables), a sea-deity, the eldest son of Pontus and Earth. (*Hesiod, Theog.*, 233.) Though not mentioned by name in Homer, he is frequently alluded to under the title of the *Sea-elder* (ἄλιος γέρον), and his daughters are called Nereids. According to Hesiod, he was distinguished for his knowledge and his love of truth and justice, whence he was termed an *elder*: the gift of prophecy was also assigned to him. When Hercules was in quest of the apples of the Hesperides, he was directed by the nymphs to Nereus. He found the god asleep and seized him. Nereus, on awaking, changed himself into a variety of forms, but in vain: he was obliged to instruct him how to proceed before the hero would release him. (*Apollodorus*, 2, 5.) He also foretold to Paris, when carrying away Helen, the evils he would bring on his country and family. (*Horat., Od.*, 1, 15.) Nereus was married to Doris, one of the ocean-nymphs, by whom he became the father of the Nereids, already mentioned. (*Keightley's Mythology*, p. 244.)—Hermann makes *Nēphēis* equivalent to *Nēfusus* (νήφειν), and understands by the term the bottom of the sea. Hence, according to the same authority, Nereus is called "the aged one," because he is ever unchangeable; he is called true, because the bottom of the ocean never gapes in fissures, so as to allow the waters to escape; and he is termed mild and peaceful, because the depths of ocean are ever tranquil and at rest. (*Hermann's Opuscula*, vol. 2, p. 881)

178.) Schwenck, on the other hand, derives the name Nereus from *váu*, "to flow." (*Andeut.*, p. 180.) The best etymology, however, is undoubtedly that which traces the form *Νηρεός* to the old Greek term *νῆρον*, "water," which last may itself be compared with the Hebrew *nahar*. The modern Greek *νερόν*, "water," is therefore a word of great antiquity. (Compare *Lobeck, ad Phryn.*, p. 42.)

NĒAFROS, the highest and most remarkable mountain in the island of Ithaca. (*Hom., Od.*, 1, 21. — *Il.*, 2, 632. — *Virg., Æn.*, 3, 270.) According to Dodwell, the modern name is *Anoi*, which means "lofty:" he observes, also, that the forests spoken of by Homer have disappeared: it is at present bare and barren, producing nothing but stunted evergreens and aromatic plants. (*Cramer's Anc. Greece*, vol. 2, p. 45.)

NĒRĪTRUM, a town of Calabria, about five miles to the north of Callipolis. (*Plin.*, 3, 11. — *Ptol.*, p. 62.) It is now *Nardo*. From an ancient inscription, cited by Muratori, it appears to have been a municipium. (*Cramer's Anc. Italy*, vol. 2, p. 317.)

NĒRĪUM, a promontory of Spain, the same with *Ar-tabrum*; now *Cape Finisterre*.

NERO, CLAUDIUS CÆSAR, the sixth of the Roman emperors, was born at Antium, in Latium, A.D. 37, nine months after the death of Tiberius. (*Sueton., Vit. Ner.*, c. 6.) He was the son of Domitius Ahenobarbus and Agrippina the daughter of Germanicus, and was originally named Lucius Domitius. After the death of Ahenobarbus, and a second husband, Crispus Passienus, Agrippina married her uncle, the Emperor Claudius, who gave his daughter Octavia in marriage to her son Lucius, and subsequently adopted him with the formal sanction of a *Lex Curiate*. (*Tacit., Ann.*, 12, 26.) The education of Nero was carefully attended to in his youth. He was placed under the care of the philosopher Seneca, and he appears to have applied himself with considerable perseverance to study. He is said to have made great progress in the Greek language, of which he exhibited a specimen in his sixteenth year, by pleading in that tongue the rights or privileges of the Rhodians, and of the inhabitants of Ilium. (*Sueton., Vit. Ner.*, c. 7. — *Tacit., Ann.*, 12, 58.) At the death of Claudius (A.D. 54), while Agrippina, by soothing, flatteries, and affected lamentations, detained Britannicus, the son of Claudius and Messalina, within the chambers of the palace, Nero, presenting himself before the gates, was lifted by the guard in waiting into the covered coach used for the purpose of carrying in procession an elected emperor, and was followed by a multitude of the people, under the illusion that it was Britannicus. He entered the camp, promised a donative to the cohorts, was saluted emperor, and pronounced before the senate, in honour of Claudius, an oration of fulsome panegyric composed by his preceptor Seneca. Agrippina soon endeavoured to obtain the chief management of public affairs; and her vindictive and cruel temper would have hurried Nero, at the commencement of his reign, into acts of violence and bloodshed, if her influence had not been counteracted by Seneca and Burrus, to whom Nero had intrusted the government of the state. Through their counsels the first five years of Nero's reign were distinguished by justice and clemency; and an anecdote is related of him, that, having on one occasion to sign an order for the execution of a malefactor, he exclaimed, "*Would that I could not write!*" (*Sueton., Vit. Ner.*, 10.) He discouraged public informers, refused the statues of gold and silver which were offered him by the senate and people, and used every art to ingratiate himself with the latter. But his mother was enraged to find that her power over him became weaker every day, and that he constantly disregarded her advice and refused her requests. His neglect of his wife Octavia, and his criminal love of Acte,

a woman of low birth, still farther widened the breach between him and his parent. She frequently addressed him in the most contemptuous language; reminded him that he owed his elevation solely to her, and threatened that she would inform the soldiers of the manner in which Claudius had met his end, and would call upon them to support the claims of Britannicus, the son of the late emperor. The threats of his mother only served to hasten the death of Britannicus, whose murder forms the commencement of that long catalogue of crimes which afterward disgraced the reign of Nero. But while the management of public affairs appears, from the testimony of most historians, to have been wisely conducted by Burrus and Seneca, Nero indulged in private in the most shameless dissipation and prodigality. He was accustomed, in company with other young men of his own age, to saunter into the streets of Rome at night, in order to rob and maltreat passengers, and even to break into private houses and take away the property of their owners. But these extravagances were comparatively harmless; his love for Poppæa, whom he had seduced from Otho, led him into more serious crimes. Poppæa, who was ambitious of sharing the imperial throne, perceived that she could not hope to attain her object while Agrippina was alive, and, accordingly, induced Nero to consent to the murder of his mother. The entreaties of Poppæa appear to have been supported by the advice of Burrus and Seneca; and the philosopher did not hesitate to palliate or justify the murder of a mother by her son. (*Tacit., Ann.*, 14, 11. — *Quintil.*, 8, 5.)—In the eighth year of his reign, Nero lost his best counsellor, Burrus; and Seneca had the wisdom to withdraw from the court, where his presence had become disliked, and where his enormous wealth was calculated to excite the envy even of the emperor. About the same time Nero divorced Octavia and married Poppæa, and soon after put to death the former on a false accusation of adultery and treason. In the tenth year of his reign, A.D. 64, Rome was almost destroyed by fire. Of the fourteen districts into which the city was divided, four only remained entire. The fire originated at that part of the Circus which was contiguous to the Palatine and Colian Hills, and raged with the greatest fury for six days and seven nights; and, after it was thought to have been extinguished, it burst forth again, and continued for two days longer. Nero appears to have acted on this occasion with the greatest liberality and kindness; the city was supplied with provisions at a very moderate price; and the imperial gardens were thrown open to the sufferers, and buildings erected for their accommodation. But these acts of humanity and benevolence were insufficient to screen him from the popular suspicion. It was generally believed that he had set fire to the city himself, and some even reported that he had ascended the top of a high tower in order to witness the conflagration, where he amused himself with singing the Destruction of Troy. From many circumstances, however, it appears improbable that Nero was guilty of this crime. His guilt, indeed, is expressly asserted by Suetonius and Dio Cassius, but Tacitus admits that he was not able to determine the truth of the accusation. In order, however, to remove the suspicions of the people, Nero spread a report that the Christians were the authors of the fire, and numbers of them, accordingly, were seized and put to death. Their execution served as an amusement to the people. Some were covered with skins of wild beasts, and were torn to pieces by dogs; others were crucified; and several were smeared with pitch and other combustible materials, and burned in the imperial gardens in the night: "Whence," says the historian, "pity arose for the guilty (though they deserved the severest punishments), since they were put to death, not for the pub-

lic good, but to gratify the cruelty of a single man." (*Tacit., Ann.*, 15, 44.)—In the following year, A.D. 66, a powerful conspiracy was formed for the purpose of placing Piso upon the throne, but it was discovered by Nero, and the principal conspirators were put to death. Among others who suffered on this occasion were Lucan and Seneca; but the guilt of the latter is doubtful. In the same year Poppæa died, in consequence of a kick which she received from her husband while she was in an advanced state of pregnancy.—During the latter part of his reign, Nero was principally engaged in theatrical performances, and in contending for the prizes at the public games. He had previously appeared as an actor on the Roman stage; and he now visited in succession the chief cities of Greece, and received no less than 1800 crowns for his victories in the public Grecian games. On his return to Italy he entered Naples and Rome as a conqueror, and was received with triumphal honours. But while he was engaged in these extravagances, Vindex, who commanded the legions in Gaul, declared against his authority; and his example was speedily followed by Galba, who commanded in Spain. The prætorian cohorts espoused the cause of Galba, and the senate pronounced sentence of death against Nero, who had fled from Rome as soon as he heard of the revolt of the prætorian guards. Nero, however, anticipated the execution of the sentence which had been passed against him, by requesting one of his attendants to put him to death, after making an ineffectual attempt to do so with his own hands. He died A.D. 68, in the 32d year of his age, and the 14th of his reign.—It is difficult to form a correct estimate of the character of this emperor. That he was a licentious voluptuary, and that he scrupled at committing no crimes in order to gratify his lust or strengthen his power, is sufficiently proved; but that he was such a monster as Suetonius and Dio have described him, may reasonably admit of a doubt. The possession of absolute power at so early an age tended to call forth all the worst passions of human nature, while the example and counsels of his mother Agrippina must have still farther tended to deprave his mind. Though he put to death his adoptive brother, his wife, and his mother, his character appears to have been far from sanguinary; his general administration was wise and equitable, and he never equalled, in his worst actions, either the capricious cruelty of Caligula, or the sullen ferocity of Domitian. Nero was a lover of the arts, and appears to have possessed more taste than many of the emperors, who only resembled him in their profuse expenditure. The Apollo Belvidere is supposed by Thiersch (*Epochen*, &c., p. 312) and some other writers to have been made for this emperor. His government seems to have been far from unpopular. He was anxious to relieve the people from oppressive taxes, and to protect the provinces from the rapacity of the governors; and it may be mentioned as an instance of his popularity, that there were persons who for many years decked his tomb with spring and summer flowers, and that, in consequence of a prevalent rumour that he had escaped from death, several impostors at various times assumed the name of Nero, and gave no small trouble to the reigning emperors. (*Tacit., Hist.*, 1, 2.—*Id.*, *ib.*, 2, 8.—*Sueton., Vit. Ner.*, 57.—*Cusaubon, ad Sueton., l. c.*) During the reign of Nero the Roman empire enjoyed, in general, a profound state of peace. In the East the Parthians were defeated by Corbulo; and in the West, the Britons, who had risen in arms under Boadicea, were again reduced to subjection under Suetonius Paulinus. (*Encycl. Us. Knowl.*, vol. 16, p. 147, *seq.*)—It may not be amiss, before concluding this article, to make some mention of Nero's celebrated "Golden House" (*Aurea Domus*). The only description on record of this costly struc-

ture is that of Suetonius: "In nothing," says this writer, "was Nero so ruinous as in building. He erected a mansion extending from the Palatine as far as the Esquilum. At first he called it his 'House of Passage,' but afterward, when it had been destroyed by fire and restored again, he gave it the name of his 'Golden House.' To form an idea of its extent and magnificence, it may suffice to state the following particulars. The vestibule admitted his colossal statue, which was 120 feet high: the building was on so large a scale, that it had a triple portico a mile long; also, an immense pool like a sea, enclosed by buildings presenting the appearance of towns. There were, moreover, grounds laid out for tillage and for vineyards, and for pasturage and woods, stocked with a vast number of every description of cattle and wild animals. In other respects, everything was overlaid with gold, embellished with gems and with mother-of-pearl. The ceilings of the banqueting-rooms were fretted into ivory coffers made to turn, that flowers might be showered down upon the guests, and also furnished with pipes for discharging perfumes. The principal banqueting-room was round, and by a perpetual motion, day and night, was made to revolve after the manner of the universe." (*Sueton., Vit. Ner.*, c. 31.) When the structure was completed, Nero is said to have declared "that he at length had a house fit for a human being to live in" (*se quasi hominem tandem habitare cepisse.*—*Sueton., l. c.*) Various explanations have been given of the way in which the contrivance was effected in the case of the principal banqueting-room. Donatus makes it a hollow globe, fixed inside a square room, and turning on its own axis; and he introduces the guests by a door near the axis, "where there is the least motion" (*Donat., de Urb. Vet.*, lib. 3.—*ap. Græv. Thea.*, vol. 3, p. 680.) Dr. Adam (*Rom. Ant.*, p. 491) thinks that the ceiling was made "to shift and exhibit new appearances as the different courses or dishes were removed;" but this does not explain "the perpetual motion, day and night, after the manner of the universe." Nero's architects, Severus and Celer, certainly deserve the mention of their names. (*Tacit., Ann.*, 15, 42.) Tacitus remarks, that "the gems and the gold which this house contained were not so much a matter of wonder (being quite common at that period) as the fields and pools; the woods, too, in one direction, forming a kind of solitude; while here, again, were open spaces with commanding views." (*Tacit., l. c.*)—The house of Nero and the palace of the Cæsars must not, however, be confounded. They were evidently two distinct things. (*Tacit., Ann.*, 15, 39.—*Burgess, Antiquities of Rome*, vol. 2, p. 172, *seq.*)—II. A Roman consul. (*Vid. Claudius III.*)—III. Cæsar, son of Germanicus and Agrippina. He married Julia, daughter of Drusus, the son of Tiberius. By the wicked arts of Sejanus he was banished to the isle of Pontia, and there put to death. (*Tacit., Ann.*, 4, 59, *seq.*—*Sueton., Vit. Tib.*, 54.)

NERONIA, a name given to Ariaxata by Tiridates, who had been restored to his kingdom by Nero. (*Vid. Artaxata.*)

NEROTONIA, I. a city of Hispania Bætica, some distance to the west of Corduba. It was also called Concordia Julia, and is now *Valera la Vieja*. (*Polyb.*, 35, 2.—*Ukert, Geogr.*, vol. 2, p. 381.) In Polybius it is written *Ἐπρόδρινα* by a mistake of the copyists, the N being omitted probably on account of the preceding *ῥην*. (Compare *Schweigh. ad Appian.*, 6, 48, p. 260.) On D'Anville's map this place is set down within the limits of Lusitania.—II. A city of Hispania Tarraconensis, in the territory of the Celtiberi, between Bilbilis and Cæsaraugusta. It is now *Almonia*. (*Florez.*, 2, 17.—*Appian.*, 6, 50.—*Itin. Ant.*, p. 437, 438.—*Ukert, Geogr.*, vol. 2, p. 400.) Cusaubon (*ad Polyb., fragm.*, 35, 2) alters *Ἐπρόδρινα* into *Νεπρόδρινα*.

Ἰφρυά, but incorrectly, since the place meant is probably the *Areobriga* of the Itinerary. As regards the termination of the name *Nertobriga*, consult remarks under the article *Mesembria*. (*Ukert, l. c.*)

NERVA, *MAÏCUS COCCÆIUS*, the thirteenth Roman emperor, was born at Narnia, in Umbria, A.D. 27 according to Eutropius (8, 1), or A.D. 32 according to Dio Cassius (68, 4). His family originally came from Crete; but several of his ancestors rose to the highest honours in the Roman state. His grandfather Coccæius Nerva, who was consul A.D. 22, and was a great favourite of the Emperor Tiberius, was one of the most celebrated jurists of his age. We learn from Tacitus that this individual put an end to his own life. (*Ann.*, 6, 28.)—Nerva, the subject of the present sketch, is first mentioned in history as a favourite of Nero, who bestowed upon him triumphal honours, A.D. 66, when he was prætor elect. The poetry of Nerva, which is mentioned with praise by Pliny and Martial, appears to have recommended him to the favour of Nero. Nerva was employed in offices of trust and honour during the reigns of Vespasian and Titus, but he incurred the suspicion of Domitian, and was banished by him to Tarentum. On the assassination of Domitian, A.D. 96, Nerva succeeded to the sovereign power, through the influence of Petronius Secundus, commander of the Prætorian cohorts, and of Parthenius, the chamberlain of the palace. The mild and equitable administration of Nerva is acknowledged and praised by all ancient writers, and forms a striking contrast to the sanguinary rule of his predecessor. He discouraged all informers, recalled the exiles from banishment, relieved the people from some oppressive taxes, and granted toleration to the Christians. Many instances of his liberality and clemency are recorded by his contemporary, the younger Pliny; he allowed no senator to be put to death during his reign; and he practised the greatest economy, in order to relieve the wants of the poorer citizens. But his impartial administration of justice met with little favour from the Prætorian cohorts, who had been allowed by Domitian to indulge in excesses of every kind. Enraged at the loss of their benefactor and favourite, they compelled Nerva to deliver into their hands Parthenius and their own commander Petronius, both of whom they put to death. The excesses of his own guards convinced Nerva that the government of the Roman empire required greater energy both of body and mind than he possessed, and he accordingly adopted Trajan as his successor, and associated him with himself in the sovereignty. Nerva died A.D. 98, after a reign of sixteen months and nine days. (*Dio Cass.*, 68, 1, *seqq.*—*Pliny, Paneg.*, c. 11.—*Id. ib.*, c. 89.—*Aurel. Vict.*, c. 12.—*Encycl. Us. Knowl.*, vol. 16, p. 149.)

NERVÏ, a warlike people of Belgic Gaul, whose country lay on both sides of the *Scaldis* or *Scheldt*, near the sources of that river; afterward *Hainault* and *Nord*. Their original capital was *Bagacum*, now *Bavaria*; but afterward *Cambracum* (*Cambray*) and *Turnacum* (*Tournay*) became their chief cities towards the end of the fourth century. (*Cæs.*, *B. G.*, 5, 39.—*Plin.*, 4, 17.)

NESIS (*is* or *idis*), now *Nisida*, an island on the coast of Campania, between Puteoli and Neapolis, and within a short distance of the shore. Cicero mentions it as a favourite residence of his friend Brutus. (*Ep. ad Att.*, 16, 1.)

Nessus, I. a centaur, who attempted the honour of *Deianira*. (*Vid. Deianira*).—II. A river of Thrace, more correctly the *Nestus*. (*Vid. Nestus*.)

NESTOR, son of *Nelus* and *Chloris*, nephew of *Pelias* and grandson of *Neptune*. He was the youngest of twelve brothers, all of whom, with the single exception of himself, were slain by *Hercules*, for having taken part against him with *Augeas*, king of *Elis*. The tender years of Nestor saved him from sharing

their fate. (*Vid. Nelus*.) Nestor succeeded his father on the throne of *Pylos*, and subsequently, though at a very advanced age, led his forces to the Trojan war, in which he particularly distinguished himself among the Grecian chiefs by his eloquence and wisdom. Indeed, by the picture drawn of him in the *Iliad*, as well as by the description contained in the *Odyssey*, of his tranquil, virtuous, and useful life, it would appear that Homer meant to display in his character the greatest perfection of which human nature is susceptible. The most conspicuous enterprises in which Nestor bore a part prior to the Trojan war, were, the war of the *Pylans* against the *Elians*, and the affair of the *Lapiths* and *Centaurs*. Some have also placed him among the *Argonauts*. Nestor married *Eurydice*, the daughter of *Clymenus* (according to others, *Anaxibia*, the sister of *Agamemnon*), and had seven sons and two daughters. He returned in safety from the Trojan war, and ended his days in his native land.—Nestor is sometimes called the "*Pylion sage*," from his native city *Pylos*. He is also styled by Homer "*the Gerenian*," an epithet commonly supposed to have been derived from the Messenian town of *Gerenia*, in which he is said to have been educated (*Heyne, ad Il.*, 2, 336), although others refer it to his advanced age (*ἡλικας*).—Compare *Schwenck, Andeut.*, p. 181). Homer makes Nestor, at the time of the Trojan war, to have survived two generations of men, and to be then living among a third. This would give his age at about seventy years and upward. (*Heyne, ad Il.*, 1, 250.)

NESTORIUS, a Syrian by birth, who became patriarch of Constantinople A.D. 428, under the reign of *Theodosius II.* He showed himself very zealous against the *Arians* and other sects; but, after some time, a priest of Antioch named *Anastasius*, who had followed Nestorius to Constantinople, began to preach that there were two persons in Jesus Christ, and that the Word or divinity had not become man, but had descended on the man Jesus, born of the Virgin Mary; and that the two natures became morally united, as it were, but not hypostatically joined in one person; and that, when Jesus died, it was the human person, and not the divinity, that suffered. This doctrine being not only not discountenanced, but actually supported by Nestorius, was the origin of what is termed the Nestorian schism. Nestorius refused to allow to the Virgin Mary the title of *Theotokos* (*Θεοτόκος*), or Mother of God, but allowed her that of *Christotokos* (*Χριστοτόκος*), or Mother of Christ. He met, of course, with numerous opponents, and the controversy occasioned great disturbances in Constantinople. *Cyrill*, bishop of *Alexandria* in Egypt, with his characteristic violence, anathematized Nestorius, who, in his turn, anathematized *Cyrill*, whom he accused of degrading the divine nature, and making it subject to the infirmities of the human nature. The Emperor *Theodosius* convoked a general council at *Ephesus* to decide upon the question, A.D. 431. This council, which was attended by 210 bishops, condemned the doctrine of Nestorius, who refused to appear before it, as many Eastern bishops, and *John of Antioch* among the rest, had not yet arrived. Upon this the council deposed Nestorius. Soon after, *John of Antioch* and his friends came, and condemned *Cyrill* as being guilty of the *Apollinarian* heresy. The emperor, being appealed to by both parties, after some hesitation sent for Nestorius and *Cyrill*; but it appears that he was displeased with what he considered pride and obstinacy in Nestorius, and he confined him in a monastery. But, as his name was still a rallying word for faction, *Theodosius* banished him to the deserts of *Thebais* in Egypt, where he died. His partisans, however, spread over the East, and have continued to this day to form a separate church, which is rather numerous, especially in *Mesopotamia*, where their patriarch resides at *Diarbekr*. The Nestorians, at one time, spread into *Per-*

sin, and thence to the coast of *Coromandel*, where the Portuguese found a community of them at *St. Thomé*, whom they persecuted and compelled to turn Roman Catholics. (*Doucet, Histoire du Nestorianisme*, 1698.—*Assemani, Biblioth. Orient.*, vol. 4.—*Encycl. Us. Knowl.*, vol. 16, p. 155.)

Nessus (less correctly Nessus), a river of Thrace, forming the boundary between that country and Macedonia in the time of Philip and Alexander. This arrangement subsequently remained unchanged by the Romans on their conquest of the latter empire. (*Strabo*, 331.—*Liv.*, 45, 29.) Thucydides states that the river descended from Mount Iconius, whence the Helorus also derived its source (2, 96), and Herodotus informs us that it fell into the *Egean Sea* near *Abdera* (7, 109).—Compare *Theophrast.*, *Hist. Pl.*, 3, 2). The same writer elsewhere remarks, that lions were to be found in Europe only between the Nessus and the Achelous of Acarnania (7, 126.—*Pliny*, 4, 11.—*Mela*, 2, 3). In the middle ages, the name of this river was corrupted into Meestus; and it is still called *Mesto*, or *Carasou* (Black River), by the Turks. (*Cramer's Anc. Greece*, vol. 1, p. 308.)

Nesuri, a Scythian race, who appear to have been originally established towards the head waters of the rivers Tyras and Hypanis (*Dacister* and *Bog*). They appear also to have touched on the Bastarnian Alps, which would separate them from the Agathyrsi. (*Herod.*, 4, 105.—*Mela*, 2, 1.—*Plin.*, 4, 12.—*Rennell, Geogr. of Herodotus*, vol. 1, p. 112.)

NICÆA, I. a city of India, founded by Alexander in commemoration of his victory over Porus. It was situate on the left bank of the Hydaspes, on the road from the modern *Attock* to *Lahore*, and just below the southern point of the island of *Jamad*. (*Arrian*, 5, 9, 6.—*Justin*, 12, 8.—*Curtius*, 9, 4.—*Vincent's Periplus*, p. 110.)—II. The capital of Bithynia, situate at the extremity of the lake *Ascanius*. *Stephanus* of Byzantium informs us, that it was first colonized by the Bottiæi, and was called *Anchore* (*Ἀγκύρα*). *Strabo*, however, mentions neither of these circumstances, but states that it was founded by Antigonius, son of Philip, who called it Antigonæa. It subsequently received the name of Nicæa from Lysimachus, in honour of his wife, the daughter of Antipater. (*Strab.*, 565.) Nicæa was built in the form of a square, and the streets were drawn at right angles to each other, so that from a monument which stood near the gymnasium, it was possible to see the four gates of the city. (*Strab.*, l. c.) At a subsequent period, it became the royal residence of the kings of Bithynia, having superseded Nicomedeia as the capital of the country. *Pliny* the younger makes frequent mention, in his Letters, of the city of Nicæa and its public buildings, which he had undertaken to restore, being at that time governor of Bithynia. (*Ep.*, 10, 40.—*Id.*, 10, 48, *seqq.*) In the time of the Emperor Valens, however, the latter city was declared the metropolis. (*Dio Chrysost.*, *Orat.*, 38.) Still Nicæa remained, as a place of trade, of the greatest importance; and from this city, too, all the great roads diverged into the eastern and southern parts of Asia Minor. (*Mannert, Geogr.*, vol. 6, pt. 3, p. 569, *seqq.*) Nicæa was the birthplace of Hipparchus the astronomer (*Suidas*, s. v. Ἰππάρχος), and also of Dio Cassius.—The present town of *Isnik*, as it is called by the Turks, has taken the place of the Bithynian city; but, according to Leake, the ancient walls, towers, and gates are in tolerably good preservation. In most places they are formed of alternate courses of Roman tiles and large square stones, joined by a cement of great thickness. The Turkish town, however, was never so large as the Grecian Nicæa, and it seems to have been almost entirely constructed of the remains of that city. (*Leake's Journal*, p. 10, *seq.*—*Cramer's Asia Minor*, vol. 1, p. 181.)—Nicæa is famous

in ecclesiastical history as the seat of the first and most important oecumenical council held in the Christian church. It was convened by the Emperor Constantine for the purpose of settling the Arian controversy, after he had in vain attempted to reconcile Arius and Alexander, the leaders of the two opposing parties in that dispute. The council met in the year 325 A.D., and sat probably about two months. It was attended by bishops from nearly every part of the East; few, however, came from Europe, and scarcely any from Africa, exclusive of Egypt. According to Eusebius, there were more than 250 bishops present, besides presbyters, deacons, and others. Some writers give a larger number. The account generally followed is that of Socrates, Theodoret, and Epiphanius, who state that 318 bishops attended the council. It is uncertain who presided, but it is generally supposed that the president was Hosius, bishop of Corduba (*Cordova*) in Spain. Constantine himself was present at its meetings. The chief question debated in the council of Nicæa was the Arian heresy. Eusebius of Cæsarea proposed a creed which the Arian party would have been willing to sign, but it was rejected by the council, and another creed was adopted as embodying the orthodox faith. The most important feature in this creed is the application of the word *consubstantial* (*ὁμοούσιος*) to the Son, to indicate the nature of his union with the Father; this word had been purposely omitted in the creed proposed by Eusebius. The creed agreed upon by the council was signed by all the bishops present except two, Secundus, bishop of Ptolemais, and Theonas, bishop of Marmarica. Three others hesitated for some time, but signed at last, namely, Eusebius of Nicomedeia, Theognis of Nicæa, and Maris of Chalcedon. The council excommunicated Arius, who was immediately afterward banished by the emperor. The decision of this council had not the effect of restoring tranquillity to the Eastern church, for the Arian controversy was still warmly carried on; but it has supplied that mode of stating the doctrine of the Trinity (as far as relates to the Father and the Son) in which it has ever since been received by the orthodox. The time for the celebration of Easter was also fixed by this council in favour of the practice of the Western church. It also decided against the schism of Meletius. The only documents which have been handed down to us from this council are, its creed, its synodical epistle, and its twenty canons.—The second council of Nicæa, held in the year 786, declared the worship of images to be lawful. (*Lardner's Credibility*, pt. 2, c. 71.—*Encycl. Us. Knowl.*, vol. 16, p. 207.)—III. A city of Liguria, on the coast, one geographical mile to the east of the mouth of the Varus. It was situate on the river Paulon, now *Paglione*. Nicæa was of Milesian origin, and was established in this quarter as a trading-place with the Ligurians. The Romans had no such inducement to establish themselves in these parts, and therefore, under the Roman sway, the city of Nicæa is seldom spoken of. The modern name is *Nizza*, or, as we term it, *Nice*. (*Plin.*, 3, 5.—*Mela*, 2, 5.)

NICANDER, a physician, poet, and grammarian, of whose life very few particulars are found in ancient authors, and even those few are doubtful and contradictory. Upon the whole, it seems most probable that he lived about 135 B.C. in the reign of Attalus III., the last king of Pergamus, to whom he dedicated one of his poems which is no longer extant. (*Suidas*.—*Eudoc.*, *op. Villosis*, vol. 1, p. 308.—*Anon. Script.*, *Vit. Nicand.*) His native place, as he himself informs us, was Claros, a town of Ionia, near Colophon, whence he is commonly called *Colophonius* (*Cic.*, *de Orat.*, 1, 16), and he succeeded his father as hereditary priest of Apollo Clarius. (*Eudoc.*, l. c.—*Anon. Vit.*)—He appears to have been rather a voluminous writer, as the titles of more than twenty of his works

have been preserved; but of all these we possess at present only two in a perfect state, with a few fragments of some of the others. Both are poems. One is entitled *Θηριακά* (*Theriaca*), the other *Ἀλεξίφάρμακα* (*Alexipharmaca*).—The *Theriaca* consists of nearly 1000 lines in hexameter verse, and treats of the wounds caused by different venomous animals, and the proper treatment of each. It is characterized by Haller (*Biblioth. Botan.*) as “*longa, incondita, et nullius fidei farrago*,” but still we occasionally find some curious passages relating to natural history. We have in it, for example, an exact, but rather long description of the combat between the ichneumon and serpents, whose flesh this quadruped eats with impunity. He speaks of scorpions, which he divides into nine species, an arrangement adopted by some modern naturalists. Then come some curious observations on the effect of the venom of various kinds of serpents, each differing in the appearances and symptoms to which it gives rise. Nicander thought he had discovered that the poison of serpents is concealed in a membrane surrounding the teeth; which is, after all, not very far removed from the true state of the case. He describes a species of serpents, named *σφίς*, which always assumes the colour of the ground over which it moves. (Compare *Pliny*, 8, 35; *Aristotle*, *Mirab. Auscult.*, c. 178; and *Ælian*, *N. A.*, 16, 40.) Nicander is the first who distinguishes between the moth or night-butterfly, and that which flies by day, and he gives to the former the name of *φάλαα*. He is one of the earliest writers also who mentions the salamander. This poem contains, too, a great number of popular fables, which were credited, however, at the time that Nicander wrote; as, for example, that wasps are produced from horse-flesh in a putrid state, and bees from that of an ox. He likewise states that the bite of the field-mouse is poisonous, and also that the animal dies if it should fall into a wheel rut, both which circumstances are repeated by *Pliny* (8, 83) and *Ælian* (*H. A.*, 2, 37).—The *Alexipharmaca* is rather a shorter poem, written in the same metre, and may be considered as a sort of continuation of the *Theriaca*. Haller's judgment on this work is as severe as that on the preceding. He says of it, “*Descriptio vix ulla, symptomata fuscè recensentur, et magna farrago et incondita plantarum potissimum alexipharmacarum subiicitur*.” Among the poisons of the animal kingdom he mentions the cantharis of the Greeks, which is not the *Lytta Vesicatoria*, but *Meloe Chichorii*. He speaks also of the buprestis (*Carabus Bucidon*); of the blood of a bull; of coagulated milk in the stomach of mammiferous animals; of the leech (*hirudo venenata*); and of a species of gecko (*σαλαμάνδρα*). Among the vegetable poisons we find the aconite, coriander (which has sometimes been fatal in Egypt), the hemlock, colchicum, henbane, and the different species of fungi, the growth of which Nicander attributes to fermentation. Of mineral poisons he mentions only white lead, a carbonate of lead and litharge, or protoxide of lead.—To counterbalance, in some degree, Haller's unfavourable opinion of Nicander's extant works, it ought in justice to be stated, that his knowledge of natural history appears to be at least equal to that of other writers of his own or even a later age, while on the subject of poisons he was long considered a great authority. Galen several times quotes him; and Dioscorides, Aëtius, and Johannes Actuarius have borrowed from him largely.—“Nicander's general treatment of cases,” observes Dr. Adams, “in as far as my knowledge and experience enable me to form a judgment, is founded upon very rational principles; and, in some instances, the correctness of his physiological views is such as cannot but command our admiration, considering the age in which he lived. Thus, he states that poison is most fatal to a person when fasting, which clearly implies

his acquaintance with the fact that the vessels absorb most readily when in an empty state. This doctrine, which has been revived of late years by a celebrated French experimentalist as a new discovery, is alluded to not only by our author, but more fully by Celsus, Dioscorides, Paulus Ægineta, Avicenna, Avensoar, and Averrhoes. It was, no doubt, from his knowledge of this principle, that Nicander has nowhere recommended general bleeding, lest, by emptying the vessels, the absorption and its distribution over the system should be promoted. Hence subsequent writers on Toxicology, such, for example, as Paulus Ægineta and Avicenna, only approve of bleeding when the poison is diffused over the body; and a very late authority, Dr. Paris, is at great pains to enforce the impropriety of venesection in the early stages before absorption has taken place.—Nicander recommends cupping and the actual cautery as preservatives from absorption in cases of poisoned wounds, and both these modes of practice have been revived of late years with great encomiums. The application of leeches to the vicinity of the wound, though not generally had recourse to now, seems a remedial measure deserving of trial.—In a word, the great merit of his practice is, that his remedies appear to have been administered upon general principles, and that he did not put much trust in specifics. Of many of his medicines, indeed, no one nowadays can speak from personal experience, and it seems but reasonable to judge of them in the indulgent manner that Socrates did respecting the obscurer part of the philosophical system of Heraclitus: ‘What I do understand of it,’ said he, with becoming modesty, ‘I find to be admirable, and therefore I take it for granted that what I do not understand is equally so.’”—With respect to Nicander's merits as a poet, the most opposite opinions are to be found in both ancient and modern writers. In the Greek Anthology, Colophon is congratulated for being the birthplace of Homer and Nicander (vol. 3, p. 270, ep. 567, ed. Brunck.). Cicero, in alluding to his “*Georgica*,” a poem not now extant, praises the poetical manner in which he treats a subject of which he was entirely ignorant (*de Orat.*, 1, 16); while Plutarch, on the other hand, says that the *Theriaca* only escapes being prose because it is put into metre, and will not allow it to be called a poem because there is nothing in it “of fable or falsehood.” (*De Aud. Poët.*, c. 2.) This very point, however, Julius Cæsar Scaliger thinks worthy of especial commendation, and says, “*Magna ei laus quod ne quid ineptum aut ineptè dicat*.” (*Poët.*, lib. 5, c. 15.) He goes on to praise the accuracy of his expressions and versification, and declares that among all the Greek authors a more polished poet is hardly to be found. M. Merian, on the other hand, in an essay “*Comment les Sciences influent dans la Poësie*” (*Mem. de l'Acad. Royal de Berlin*, 1776, p. 423), mentions Nicander, to show the antipathy that exists between the language of poetry and the subjects of which he treated. He calls him “a grinder of antidotes, who sang of scorpions, toads, and spiders,” and considers his poem as fit only for the apothecaries.—Nicander's poetical genius, in all probability, was a good deal cramped by the prosaic nature of the subjects which he chose for his theme; and we may fairly say, that his writings contain quite as much poetry as could be expected from such unpromising materials. As for his style and language, probably every one who has ever read half a dozen lines of either of his poems will agree with Bentley, who says that he studiously affected obsolete and antiquated words, and must have been an obscure writer even to his contemporaries. (*Museum Criticum*, vol. 1, p. 371.)—The best edition of the *Alexipharmaca* is that of Schneider, *Hala*, 1792, 8vo. The *Theriaca*, by the same editor, and equally valuable, appeared in 1816, *Lipsæ*, 8vo. The *Theriaca* was also published the same year in the

Museum Criticum, with Bentley's emendations (vol. 1, p. 370, *seqq.*). There is extant a Greek paraphrase, in prose, of both poems (printed in Schneider's editions), by Eutecnus the sophist, of whom nothing is known except that he has done the same to Oppian's *Cynegetica* and *Halieutica*. (*Encyclop. Us. Knowl.*, vol. 16, p. 203, *seq.*)

NICĀTOR (Νικάτωρ, i. e., "Victor") a surname assumed by Seleucus I. (*Vid.* Seleucus.)

NICEPHORIUM (Νικηφόριον), a strongly-fortified city of Mesopotamia, south of Charra, and at the confluence of the Billichia and Euphrates. Alexander is said to have selected the site, which was an extremely advantageous one. (*Plin.*, 6, 26.—*Isidor.*, *Charac.*, p. 3.) The name remained until the fourth century, when it disappeared from history, and, in the account of Julian's expedition, a city named Callinicum (Καλλινίκιον) is mentioned, which occupies the same place where Nicephorium had previously stood. This conformity of position, and sudden change of name, lead directly to the supposition that Nicephorium and Callinicum were one and the same place, and that the earlier appellation ("Victory-bringing," νίκη and φέρω) had merely been exchanged for one of the same general import ("Pair-conquering," καλός and νίκη). Hence we may reject the statement sometimes made, that the city received its later name from Seleucus Callinicus as its founder (*Chron. Alexandr.*, Olymp. 134, 1), as well as what Valesius (*ad Ann. Marcell.*, 23, 6) cites from Libanius (*Ep. ad Aristanet.*), that Nicephorium changed its name in honour of the sophist Callinicus, who died there.—Marcellinus describes Callinicus as a strong place, and carrying on a great trade ("munificentum robustum, et commercandi opimitate gratissimum"). Justinian repaired and strengthened the fortifications. (Compare *Theodoret.*, *Hist. Relig.*, c. 26.) At a subsequent period, the name of the city again underwent a change. The Emperor Leo, who about 466 A.D. had contributed to adorn the place, ordered it to be called *Leontopolis*, and under this title Hierocles enumerates it among the cities of Osrœne. (*Syneccem.*, ed. *Wesseling*, p. 715.) Stephanus of Byzantium asserts that Nicephorium, at a later period, changed its name to Constantin; but this is impossible, as the city of Constantina belongs to quite a different part of the country. D'Anville fixes the site of Nicephorium near the modern *Racca*, in which he is followed by subsequent writers. (*Mannert*, vol. 5, pt. 2, p. 286, *seqq.*)

NICEPHORIUS, a river of Armenia Major, the same with the Centritis. (*Vid.* Centritis.)

NICEPHŌRUS, I. an emperor of the East, was originally *Logotheta*, or intendant of the finances, during the reign of the Empress Irene and her son Constantine VI., in the latter part of the eighth century. Irene, having deprived her son of sight, usurped the throne, and reigned alone for six years, when a conspiracy broke out against her, headed by Nicephorus, who was proclaimed emperor, and crowned in the church of St. Sophia, A.D. 802. He banished Irene to the island of Lesbos, where she lived and died in a state of great destitution. The troops in Asia revolted against Nicephorus, who showed himself avaricious and cruel, and they proclaimed the patrician Bardanes emperor; but Nicephorus defeated and seized Bardanes, confined him in a monastery, and deprived him of sight. The Empress Irene had consented to pay an annual tribute to the Saracens, in order to stop their incursions into the territories of the empire. Nicephorus refused to continue this payment, and wrote a message of defiance to the Caliph Haroun al Raschid. The caliph collected a vast army, which devastated Asia Minor, and destroyed the city of Heraclea on the coast of the Euxine, and Nicephorus was obliged to sue for peace, and pay tribute as Irene had done. In an attack which he subsequently made on the Bulgarians, he was utterly

defeated by them, and lost his life A.D. 811. His son Stauracius succeeded him, but reigned only six months, and was succeeded by Michael Rhangabe, master of the palace.—II. The second emperor of the name, surnamed Phocas (but who must not be confounded with the usurper Phocas, who reigned in the beginning of the seventh century), was descended of a noble Byzantine family, and distinguished himself as a commander in the field. After the death of Romanus II., A.D. 950, his widow Theophano, who was accused of having poisoned him, reigned as guardian to her infant son; but, finding herself insecure on the throne, she invited Nicephorus to come to Constantinople, and promised him her hand. Nicephorus came, married Theophano, and assumed the title of Augustus, A.D. 963. He repeatedly attacked the Saracens, and drove them out of Cilicia and part of Syria. In 968, Otto I., emperor of Germany, sent an embassy to Nicephorus, who received it in an uncivil manner. His avarice made him unpopular, and his wife, the unprincipled Theophano, having formed an intrigue with John Zimisceas, an Armenian officer, conspired with him against her husband. Zimisceas, with his confederates, was introduced at night into the bedchamber of the emperor, and murdered him, A.D. 969.—We have remaining, at the present day, a portion of a military work under the name of this emperor. It is entitled *Περὶ παραδρομῆς πολέμου*, "Of war with light troops," making known the mode of carrying on war in mountainous countries, as practised in the tenth century. Hase has given the first 25 chapters of this work, at the end of his edition of Leo Diaconus, these being the only ones contained in three MSS. of the Royal Library at Paris. A MS. at Heidelberg has 30 chapters more; but Hase believes that they do not belong to this work, or, rather, that they form part of a second work on the same subject. It is thought, however, that the production first mentioned appeared after the death of Phocas, and that the compiler, or perhaps author of it, lived in the time of Basilus II. and Constantine VIII. (*Schöll.*, *Gesch. Gr. Lit.*, vol. 3, p. 350.)—III. The third emperor of the name, surnamed Botoniatas, was an old officer of some military reputation in the Byzantine army in Asia, and revolted against the Emperor Michael Ducas, A.D. 1078. With a body of troops, chiefly composed of Turkish mercenaries, he marched to Chalcedon; upon which Michael resigned the purple, and Nicephorus was proclaimed emperor at Constantinople. Michael was sent to a monastery with the title of Archbishop of Ephesus. Another aspirant to the throne, Nicephorus Bryennius, was defeated, taken prisoner, and deprived of sight. A fresh insurrection, led by Basilacius, was likewise put down by the troops of Nicephorus, under the command of Alexius Comnenus. Alexius himself, who had an hereditary claim to the throne, was soon after proclaimed emperor by the soldiers. Having entered Constantinople by surprise, he seized Nicephorus, and banished him to a monastery, where he died a short time after, A.D. 1081. (*Encyclop. Us. Knowl.*, vol. 16, p. 207.)—IV. Basilaces, a teacher of rhetoric at Constantinople during the latter half of the eleventh century. He has left some fables, tales, and epopees; for example, Joseph accused by Potiphar's wife; David in the cave with Saul; David pursued by Absalom, &c. These productions are contained in the collection of Leo Allatius.—V. Bryennius, a native of Orestias, in Macedonia, and son-in-law to the Emperor Alexius I. (Comnenus), who conferred upon him the title of *Παννερπείδαστος*, equivalent to that of *Cæsar*. In 1096 A.D., his father-in-law intrusted to him the defence of Constantinople against Godfrey of Bouillon. In 1108 he negotiated the peace with Boemond, prince of Antioch. At the death of Alexius in 1118, Irene, widow of the deceased, and Anna Comnena, wife of Bryennius, wished him to ascend

the throne; but his own indifference on this point, and the measures taken by John, the son of Alexius, defeated their plans. It was on this occasion that Anna Comnena passionately exclaimed, that nature had mistaken the two sexes, and had endowed Bryennius with the soul of a woman. He died in 1137. At the order of the Empress Irene, Bryennius undertook, during the life of Alexius, a history of the house of Comnenus, which he entitled *Ἱστορία τῆς βασιλείας τῶν Κομνηνῶν*, "Materials for History," and which he distributed into four books. He commenced with Isaac Comnenus, the first prince of this line, who reigned from 1057 to 1059 A.D., without being able to transmit the sceptre to his family, into whose hands it did not pass until 1081, when Alexius I. ascended the throne. Nicephorus stops at the period of his father-in-law's accession to the throne, after having given his history while a private individual. He had at his disposal excellent materials; but his impartiality as an historian is not very highly esteemed. In point of diction, his work holds a very favourable rank among the productions of the Lower Empire. It was continued by Anna Comnena. (Schöll, *Hist. Lit. Gr.*, vol. 6, p. 388.)—VI. Blemmida, a monk of the 13th century. He has left three works: "a Geographical Abridgment" (*Γεωγραφία συνοπτική*), which is nothing but a prose metaphrase of the Periegesis of Dionysius the Geographer: a work entitled "A Second History (or Description) of the Earth" (*Ἑτέρα ἱστορία περὶ τῆς γῆς*), in which he gives an account of the form, and size of the earth, and of the different lengths of the day: and a third, "*On the Heavens and Earth, the Sun, Moon, Stars, Time, and Days*" (*Περὶ Οὐρανοῦ καὶ γῆς, ἡλίου, σελήνης, ἀστέρων, χρόνου, καὶ ἡμερῶν*). In this last the author develops a system, according to which the earth is a plane. The first two were published by Spohn, at Leipzig, 1818, in 4to, and by Manz, from a MS. in the Barberini Library, Rom., 1819, 4to. Bernhardt has given the Metaphrase in his edition of Dionysius, *Lips.*, 1828; the third is unedited. It is mentioned by Bredow in his *Epistolæ Parisienses*.—VII. Surnamed Xanthopulus, lived about the middle of the 14th century. He wrote an Ecclesiastical History in 18 books, which, along with many useful extracts from writers whose productions are now lost, contains a great number of fables. This history extends from the birth of our Saviour to A.D. 610. The arguments of five other books, which would carry it down to A.D. 911, are by a different writer. In preparing his work, Nicephorus availed himself of the library attached to the church of St. Sophia, and here he passed the greater part of his life. He has left also Catalogues, in Iambic verse, of the Greek emperors, the patriarchs of Constantinople, and the fathers of the church, besides other minor works. To this same writer is likewise ascribed a work containing an account of the church of the Virgin, situate at certain mineral waters in Constantinople, and of the miraculous cures wrought by these.—The Ecclesiastical History was edited by Ducæus (Fronton du Duc), Paris, 1690, 2 vols. fol. The metrical Catalogues are to be found in the edition of the Epigrams of Theodorus Prodrômus, published at Bâle, 1536, 8vo. The account of the mineral waters, &c., appeared for the first time at Vienna in 1802, 8vo, edited by Pamperius.—VIII. Surnamed Chummus, was *Præfectus Caniculi* (*Ὁ ἐπὶ τοῦ κανικελίου*) under Andronicus II., surnamed Palæologus. The *caniculus* (*κανικέλιος*) was a small vessel filled with the red liquid with which the emperors used to sign their names to documents. His daughter Irene was married in 1304 to John Palæologus, the eldest son of Andronicus, who, together with his younger brother Michael, had been associated with him in the empire by their father, A.D. 1295, and who died A.D. 1308, without issue. Nicephorus composed a number of works, which still remain unedited. They treat of rhetorical, philosophical, and

physical subjects. He wrote also two discourses, one addressed to Andronicus II., the other to Irene, to console them for the loss of a son and husband. His letters are also preserved. Disgusted with active life, Nicephorus became a monk, and took the name of Nathaniel. Creuzer (*ad Plotin. de Pulcr.*, p. 400) makes him a native of Philippopolis; but in this there is a double error: first, in ascribing to the father a letter written by his son Johannes; and, secondly, in reading *τῷ Φιλιπποπόλει* instead of *τῷ Φιλιπποπόλει*, "to the Bishop of Philippopolis." (Schöll, *Hist. Lit. Gr.*, vol. 3, p. 147.)—IX. Gregoras, a native of Heraclea, who wrote on grammatical, historical, and astronomical subjects. Andronicus II. appointed him chartophylax of the church, and in 1325 sent him on an embassy to the King of Servia. Gregoras did not abandon his royal patron when dethroned by Andronicus III., and it was he who, four years after this event, assisted at the deathbed of the fallen monarch. He showed himself a zealous opponent of the Palamites, a sect of fanatics who were throwing the church into confusion, but was condemned for this by the synod of Constantinople, A.D. 1351, at the instance of the patriarch Callistus, and confined in a convent, where he ended his days.—His grammatical works are in part unedited. He wrote also a *Byzantine*, or, as he calls it, *Roman* (*Ῥωμαϊκή*) History, in thirty-eight books, of which the first twenty-four alone, extending from 1204 to 1331 A.D., have been published: the other books, which terminate at A.D. 1359, remain still unedited. Gregoras is vain, passionate, and partial: his style is affected, and overloaded with figures, especially hyperboles, and full of repetitions. The latest edition of the history which had been published, was, until very recently, that of Boivin, Paris, 1702, 2 vols. fol. It contained the first eleven books, with the Latin version of Wolff, and the succeeding thirteen, with a translation by the editor himself. It was to have been completed in two additional volumes, containing the last fourteen books, but these have never appeared. A new edition, however, of Gregoras, forms part of the Byzantine Historians at present in a course of publication at Bonn. (Schöll, *Hist. Lit. Gr.*, vol. 6, p. 362, *seqq.*) There are also several works of Gregoras treating of Astronomy, but they are all unedited, except a treatise on the astrolabe, which appeared in a Latin translation at Paris in 1557, 12mo, edited by Vallæ. (Schöll, vol. 7, p. 65.)—X. A native of Constantinople, commonly surnamed the Patriarch, for distinction's sake. He was at first a notary, and afterward imperial secretary, which latter station he quitted for a convent, but was subsequently elevated to the see of Byzantium, A.D. 806. As one of the defenders of the worship of images, he was, in 815, compelled to take refuge in a monastery, where he ended his days, A.D. 828. He has left behind him two works: 1. A Chronicle or Chronographical Abridgment (*Χρονογραφία*), commencing with Adam and carried down to the period of the author's own death, or, rather, somewhat farther, since it was continued by an anonymous writer: 2. An Historical Compend, *Ἱστορία σύντομος*, embracing the events that occurred from A.D. 602 to 770. The latest edition of the Greek text of the Chronicle is that of Credner, Giesse, 1832, 4to. It was also given in Dindorf's edition of Syncellus, Bonn., 1829. The latest edition of the Compend is that of Petavius (Petav), Paris, 1648. (Schöll, *Hist. Lit. Gr.*, vol. 6, p. 370, *seqq.*)

NICER or NICAR, now the Necker, a river of Germany, falling into the Rhine at the modern town of Mannheim. (*Ann. Marcell.*, 28, 2.—*Cluv.*, Germ., 3, 225.—*Pertz*, Mon. Germ. Hist., 1, 381.)

NICERÆTUS, a physician mentioned by Dioscorides (*Præf.*, lib. 1, p. 2, ed. Spreng.) as one of the followers of Asclepiades, and who attended particularly to *matæria medica*. None of his writings remain, but his pre-

scriptions are several times mentioned by Galen (*Op. ed. Kuhn*, vol. 12, p. 634; vol. 13, p. 96, 98, 110, 180, &c.; vol. 14, p. 197), and once by Pliny (32, 31). We learn from Caelius Aurelianus (*Morb. Chron.*, l. 2, c. 5) that he wrote also on cataplexy. He flourished about 40 B.C. (*Encycl. Us. Knowl.*, vol. 16, p. 207.)

NICETAS, I. Eugenianus, author of one of the poorest of the Greek romances that have come down to us. He appears to have lived not long after Theodore Prodromus, whom, according to the title of his work as given in a Paris manuscript, he selected for his model. He wrote of the Loves of Drosilla and Chariclea. Boissonade gave to the world an edition of this romance in 1819, *Paris*, 2 vols. 12mo, respecting the merits of which, consult Hoffmann, *Lex. Bibliogr.*, vol. 3, p. 137.—II. Acominatus, surnamed Choniates, from his having been born at Chonos, or Colossæ, in Phrygia. He filled many posts of distinction at Constantinople, under the Emperor Isaac II. (Angelus). About A.D. 1189, he was appointed by the same monarch governor of Philippopolis, an office of which Alexius V. deprived him. He died A.D. 1216, at Nicæa, in Bithynia, to which city he had fled after the taking of Constantinople by the Latins. He wrote a History of the Byzantine Emperors, in twenty-one books, commencing A.D. 1119 and ending A.D. 1206. It forms, in fact, ten different works of various sizes, all imbedded under one general head.—Nicetas possessed talent, judgment, and an enlightened taste for the arts, and would be read with pleasure if he did not occasionally indulge too much in a satirical vein, and if his style were not so declamatory and poetical. The sufferings of Constantinople, which passed under his own eyes, appear to have embittered his spirit, and he is accused of being one of the writers who contributed most to kindle a feeling of hatred between the Greeks and the nations of the West.—We have a life of Nicetas by his brother Michael Acominatus, metropolitan of Athens. It is entitled *Monodia*, and has never yet been published in the original Greek; a Latin translation of it is given in the *Biblioth. Patrum Maxim.* Lugd., vol. 22.—The latest edition of Nicetas was that of *Paris*, 1647, fol. A new edition, however, has lately appeared from the scholars of Germany, as forming part of the Byzantine collection, now in a course of publication at Bonn.—III. An ecclesiastical writer, who flourished during the latter half of the eleventh century. He was at first bishop of Serræ in Macedonia (whence he is sometimes surnamed *Serrariensis*), and afterward metropolitan of Heraclea in Thrace. He is known by his commentary on sixteen discourses of St. Gregory Nazianzen, and by other works connected with theology and sacred criticism. He was the author, likewise, of some grammatical productions, of which, however, only a small remnant has come down to us, in the shape of a treatise "on the Names of the Gods" (*Εἰς τὰ ὀνόματα τῶν θεῶν*), an edition of which was given by Creuzer, in 1187, from the Leipzig press.—IV. David, a philosopher, historian, and rhetorician, sometimes confounded with the preceding, but who flourished two centuries earlier. He was bishop of Dadybra in Paphlagonia, and wrote, among other things, an explanatory work on the poems of St. Gregory Nazianzen, and a paraphrase of the epigrams of St. Basil. An edition of these works appeared at Venice in 1563, 4to.

NIOA, a small river of Cisalpine Gaul, rising in the territory of the Ligures Apuani, and falling into the Po at Brixellum. The Æmilian Way crossed it a little before Tanetum. It is now the *Lezza*. Mannert, however, gives the modern name as *Crosetolo*; and Reichard, *Ongino*.

NICIAS, I. son of Niceratus. He was a man of birth and fortune; but in whom a generous temper, popular manners, and considerable political and military talent, were marred by unreasonable diffidence and excessive

dread of responsibility. Nicias, however, signalized himself on several occasions. He took the island of Cythera from the Lacedæmonians, subjugated many cities of Thrace which had revolted from the Athenian sway, shut up the Megarians within their city-walls, cutting off all communication from without, and taking their harbour Nisæa. When the unfortunate expedition against Syracuse was undertaken by Athens, Nicias was one of the three commanders who were sent at its head, the other two being Alcibiades and Lamachus. He had previously, however, used every effort to prevent his countrymen from engaging in this affair, on the ground that they were only wasting their resources in distant warfare, and multiplying their enemies. After the recall of Alcibiades, the natural indecision of Nicias, increased by ill-health and dislike of his command, proved a principal cause of the failure of the enterprise. In endeavouring to retreat by land from before Syracuse, the Athenian commanders, Nicias and Demosthenes (the latter had come with re-enforcements), were pursued, defeated, and compelled to surrender. The generals were put to death; their soldiers were confined at first in the quarry of Epipolæ, and afterward sold as slaves. We have a life of Nicias by Plutarch (*Thucyd.*, lib. 3, 4, 5, *seqq.*—*Plut.*, *Vit. Nic.*)—II. An Athenian artist, who flourished with Praxiteles, Ol. 104, and assisted him in the decoration of some of his productions. (*Plin.*, 35, 11.—Consult *Sillig, Dict. Art.*, s. v.)—III. The younger, an Athenian painter, son of Nicomedes, and pupil of Euphranor. He began to practice his art Ol. 112. (*Sillig, Dict. Art.*, s. v.) Nicias is said to have been the first artist who used burned ochre in his paintings. (*Plin.*, 35, 6, 20.)

NICO, an architect and geometrician, father of Galen, who lived in the beginning of the second century of our era. (*Suid.*, s. v. *Νικόλαος*.)

NICOCLÆS, I. king of Paphos, in the island of Cyprus. He owed his throne to the kindness of Ptolemy I., king of Egypt, who continued thereafter to bestow upon him many marks of favour. Having learned, however, at last, that Nicocles, forgetful of past benefits, had formed an alliance with Antigonus, Ptolemy sent two of his confidential emissaries to Cyprus, with orders to despatch Nicocles in case his traitorous conduct should be clearly ascertained by them. These two individuals, having taken with them a party of soldiers, surrounded the palace of the King of Paphos, and making known to him the orders of Ptolemy, compelled him to destroy himself, although he protested his innocence. His wife Axiotes, when she heard of her husband's death, killed her maiden daughters with her own hand, and then slew herself. The other female relatives followed her example. The brothers of Nicocles, also, having shut themselves up in the palace, set fire to it, and then fell by their own hands. (*Diad. Sic.*, 20, 31.—*Wesseling, ad loc.*—*Polyæn.*, 8, 48.)—II. King of Cyprus, succeeded his father Evagoras B.C. 374. He celebrated the funeral obsequies of his parent with great splendour, and engaged Isocrates to write his eulogium. Nicocles had been a pupil of the Athenian rhetorician, and recompensed his services with the greatest liberality. (*Vid. Isocrates.*)

NICOORCHON, a tyrant of Salamis in the age of Alexander the Great. A fabulous story is related of his having caused the philosopher Anaxarchus to be pounded alive in a mortar. (*Vid. Anaxarchus.*)

NICOLÆUS, I. a comic poet whose era is unknown. He belonged to the New Comedy according to some. Stobæus has a fragment of his in 44 verses, which he ascribes, however, to Nicolaus Damascenus.—II. Surnamed Damascenus (*Νικόλαος ὁ Λαμασκηνός*), a native of Damascus of good family. He was the friend of Herod the Great, king of the Jews, and in the year 6 B.C. was sent by that monarch on an embassy to Augustus, who had taken offence at Herod because

he had led an army into Arabia to enforce certain claims which he had upon Syllæus, the prime-minister of the King of Arabia, and the real governor of the country. (*Joseph., Ant. Jud.*, 16, 9.) Nicolaus, having obtained an audience of the emperor, accused Syllæus, and defended Herod in a skilful speech, which is given by Josephus (*Ant. Jud.*, 16, 10). Syllæus was sentenced to be put to death as soon as he should have given satisfaction to Herod for the claims which the latter had upon him. This is the account of Josephus, taken probably from the history of Nicolaus himself, who appears to have exaggerated the success of his embassy; for Syllæus neither gave any satisfaction to Herod, nor was the sentence of death executed upon him. (*Joseph., Ant. Jud.*, 17, 3, 2.) We find Nicolaus afterward acting as the accuser of Herod's son Antipater, when he was tried before Varus for plotting against his father's life, B.C. 4 (*Joseph., Ant. Jud.*, 16, 5, 4, *seqq.*—*Id.*, *Bell. Jud.*, 1, 32, 4); and again as the advocate of Archelaus before Augustus, in the dispute for the succession to Herod's kingdom. (*Joseph., Ant. Jud.*, 17, 9, 6.—*Id.* *ib.*, 11, 3.—*Id.*, *Bell. Jud.*, 2, 2, 6.)—As a writer, Nicolaus is known in several departments of literature. He composed tragedies, and, among others, one entitled *Σωσάννης* ("Susanna"). Of these nothing remains. He also wrote comedies, and Stobæus has preserved for us what he considers to be a fragment of one of these, but what belongs, in fact, to a different writer. (*Vid.* Nicolaus I.) He was the author, also, of a work on the *Remarkable Customs* of various nations (*Συναγωγή παραδόξων ἥθῶν*); of another on *Distinguished Actions* (*Περὶ τῶν ἐν τοῖς πρακτικοῖς καλῶν*); and also of several historical works. Among the last-mentioned class of productions was a *Universal History* (*Ἱστορία καθολική*), in 144 books (hence called by Athenæus *πολυβιβλος*, 8, p. 249, a.), a compilation for which he borrowed passages from various historians, which he united together by oratorical flourishes. As he has drawn his materials in part from sources which no longer exist for us, the fragments of his history which remain make us acquainted with several facts of which we should otherwise have had no knowledge. This history included the reign of Herod; and Josephus gives the following character of the 123d and 124th books: "For, living in his kingdom and with him (Herod), he composed his history in such a way as to gratify and serve him, touching upon those things only which made for his glory, and glossing over many of his actions which were plainly unjust, and concealing them with all zeal. And wishing to make a specious excuse for the murder of Mariamne and her children, so cruelly perpetrated by the king, he tells falsehoods respecting her incontinence, and the plots of the young men. And throughout his whole history he eulogizes extravagantly all the king's just actions, while he zealously apologizes for his crimes." (*Ant. Jud.*, 16, 7, 1.) Nicolaus wrote also a life of Augustus, of which a fragment, marked too strongly with flattery, still remains. He was the author, too, of some metaphysical productions on the writings of Aristotle. As regards his own Biography, which has likewise come down to us, we may be allowed to doubt whether he ever wrote it.—The latest and most complete edition of the remains of Nicolaus Damascenus is that of Orellius, *Lips.*, 1804, with a supplement published in 1811, and containing the result of the labours of Bremi, Ochsner, and others, in collecting the scattered fragments of this writer. (*Schöll, Hist. Lit. Gr.*, vol. 4, p. 101.)—III. surnamed the Sophist, a disciple of Proclus and a New-Platonist, lived during the latter half of the fifth century. Suidas makes him to have been the author of *Progymnasmatas* and *Declamations*. One MS. assigns to Nicolaus the Sophist a portion of the *Progymnasmatas*, which have been published under the name of Libanius. (*Schöll, Hist. Lit. Gr.*, vol. 6,

p. 210.)—IV. (or Laonicus) Chalcondylas, a native of Athens, and one of the Byzantine historians. He wrote a history of the Turks, and of the fall of the Eastern empire, from A.D. 1297 down to 1462, in ten books. It was continued by an anonymous writer to A.D. 1565. The narrative of Chalcondylas is rich in facts, but the author sometimes displays great credulity. The first edition of the text is that of Fabrot, *Paris*, 1650, fol., which was reprinted in 1760 at Venice, fol.—V. Bishop of Methone, about A.D. 1190, author of a commentary on the *Στοιχείωσις θεολογική* of Proclus. It remains unedited.—VI. Cabasila, was bishop of Thessalonica about 1350 A.D. He was a learned man, and famed for his eloquence. We have a commentary by him on the third book of the *Almagest*, printed at the end of the Basle edition of *Ptolemai Syntaxis*, 1538, fol.

NICOMACHUS, the father of the philosopher Aristotle. (*Vid.* Aristoteles.)

NICOMEDES, I. king of Bithynia, succeeded his father Zibphetes, B.C. 278. His succession was disputed by his brother, and he called in the Gauls to support his claims, B.C. 277. With their assistance he was successful: but his allies became his masters, and the whole of Asia Minor was for a long time overrun by these barbarians. He probably died about B.C. 250, and was succeeded by his eldest son Zitiela.—II. The second of the name, surnamed Epiphanes, succeeded his father Prusias II., B.C. 149. He accompanied his parent to Rome, B.C. 167, where he appears to have been brought up under the care of the senate. (*Liv.*, 45, 44.) Prusias, becoming jealous of the popularity of his son, and anxious to secure the succession of his younger children, formed a plan for his assassination; but Nicomedes, having gained intelligence of his purpose, deprived his father of the throne, and subsequently put him to death. Nicomedes remained during the whole of his long reign a faithful ally, or, rather, obedient subject, of the Romans. He assisted them in their war with Aristonicus, brother of Attalus, king of Pergamus, B.C. 131; and he was applied to by Marius for assistance during the Cimbrian war, about B.C. 103. During the latter part of his reign he was involved in a war with Mithradates, of which an account is given in the life of that monarch. (*Vid.* Mithradates VI.)—III. The third of the name, surnamed Philopator, succeeded his father Nicomedes II., B.C. 91. During the first year of his reign, he was expelled from his kingdom by Mithradates, who placed upon the throne Socrates, the younger brother of Nicomedes. He was restored, however, to his kingdom in the following year by the Romans, who sent an army under Aquilius to support him. At the breaking out of the Mithradatic war, B.C. 88, Nicomedes took part with the Romans; but his army was completely defeated by the generals of Mithradates, near the river Amnias, in Paphlagonia (*Strabo*, 562), and he himself was again expelled from his kingdom, and obliged to take refuge in Italy. At the conclusion of the Mithradatic war, B.C. 84, Bithynia was restored to Nicomedes. He died B.C. 74, without children, and left his kingdom to the Romans. (*Memnon.*, *ap. Phot.*—*Appian, Bell. Mithrad.*—*Clinton, Fast. Hell.*, vol. 3, *Append.*, 7.—*Encycl. Us. Knowl.*, vol. 16, p. 213.)—IV. A celebrated geometrician. He is famous for being the inventor of the curve called the conchoid, which has been made to serve equally for the solution of the two problems relating to the duplication of the cube, and the trisection of an angle. It was much used by the ancients in the construction of solid problems. It is not certain at what period Nicomedes flourished, but it was probably at no great distance from the time of Eratosthenes.

NICOMEDĒA (*Νικομήδεια*), a city of Bithynia, situate at the northeastern extremity of the Sinus Astacenus. It was founded by Nicomedes I. (B.C. 264), who

transferred to it the inhabitants of the neighbouring city of Astacus. (*Memnon, ep. Phot.*, c. 21, p. 722.) This city was much frequented by the Romans, and by Europeans generally, as it lay directly on the route from Constantinople to the more eastern provinces, and contained, in its fine position, its handsome buildings, and its numerous warm baths and mineral waters, very strong attractions for travellers. Under the Romans, Nicomedia became one of the chief cities of the empire. Pausanias speaks of it as the principal city in Bithynia (6, 12, 5); but under Dioclesian, who chiefly resided here, it increased greatly in extent and populousness, and became inferior only to Rome, Alexandria, and Antioch. (*Liban., Orat.*, 8, p. 203.—*Lactant., de morte persec.*, c. 17.) Nicomedia, however, suffered severely from earthquakes. Five of these dreadful visitations fell to its lot, and it was almost destroyed by one in particular in the reign of Julian; but it was again rebuilt with great splendour and magnificence, and recovered nearly its former greatness. (*Amm. Marcell.*, 17, 6.—*Id.*, 22, 13.—*Malala*, l. 13.)—The modern *Is-Mid* occupies the site of the ancient city, and is still a place of considerable importance and much trade. The modern name is given by D'Anville and others as *Is-Nikmid*. (*Mannert, Geogr.*, vol. 6, pt. 3, p. 582.)

NICOROLIS ("City of Victory," *νίκη* and *πόλις*), I. a city of Palestine, to the northwest of Jerusalem, the same with Emmaus. It received the name of Nicopolis in the third century from the Emperor Heliogabalus, who restored and beautified the place. (*Chron. Pasch. Ann.*, 223.) Josephus often calls the city Ammaus. (*Bell. Jud.*, 1, 9.—*Ibid.*, 2, 3.) It must not be confounded with the Emmaus of the New Testament (*Luc.*, 24, 13), which was only eight miles from Jerusalem. (*Mannert, Geogr.*, vol. 6, pt. 1, p. 283.)—II. A city of Cilicia, placed by Ptolemy in the northeastern corner of Cilicia, where the range of Taurus joins that of Amanus. D'Anville puts it too low down on his map.—III. A city of Armenia Minor, on the river Lycus, near the borders of Pontus. It was built by Pompey in commemoration of a victory gained here over Mithradates. (*Appian, Bell. Mithrad.*, 101, 105.—*Strabo*, 555.—*Pliny*, 6, 9.) The modern *Derrigni* is supposed to occupy its site, the Tephrike of the Byzantine historians probably. (*Mannert, Geogr.*, vol. 6, pt. 2, p. 318.)—IV. A city in Mæsia Inferior, on the river Istrus, one of the tributaries of the Danube. It was founded by Trajan in commemoration of a victory over the Dacians, and was generally called, for distinction' sake, *Nicopolis ad Istrum* or *ad Danubium*. The modern name is given as *Nicopoli*. (*Amm. Marcell.*, 24, 4.—*Id.*, 31, 5.)—V. A city of Mæsia Inferior, southeast of the preceding, at the foot of Mount Hæmus, and near the sources of the Istrus. It was called, for distinction' sake, *Nicopolis ad Hæmum*, and is now *Nikub*.—VI. A city of Egypt, to the northeast, and in the immediate vicinity, of Alexandria. Strabo gives the intervening space as 30 stadia. (*Strab.*, 794.) It was founded by Augustus in commemoration of a victory gained here over Antony, and is now *Kars* or *Kiasse-ra*. (*Dio Cass.*, 51, 18.—*Joseph.*, *Bell. Jud.*, 4, 14.)—VII. A city of Thrace, on the river Nessus, not far from its mouth, founded by Trajan. It is now *Nicopoli*. The later name was Christopolis. (*Ptol.*—*Hierocl.*, p. 635.—*Wesseling, ad Hierocl.*, l. c.)—VIII. A city of Epirus, on the upper coast of the Ambracian Gulf, and near its mouth. It was founded by Augustus, in honour of the victory at Actium, which place lay on the opposite or lower shore. Nicopolis may be said to have risen out of all the surrounding cities of Epirus and Acarnania, and even as far as Ætolia, which were compelled to contribute to its prosperity. (*Strab.*, 325.—*Pausan.*, 8, 23.—*Id.*, 7, 18.) So anxious was Augustus to raise his new col-

ony to the highest rank among the cities of Greece, that he caused it to be admitted among those states which sent deputies to the Amphictyonic assembly. (*Pausan.*, 10, 8.) He also ordered games to be celebrated with great pomp every five years, which had been previously triennial. Suetonius states that he enlarged a temple of Apollo, and consecrated to Mars and Neptune the site on which his army had encamped before the battle of Actium, adorning it with naval trophies. (*Aug.*, 18.—*Strab.*, l. c.) Having afterward fallen to decay, it was restored by the Emperor Julian. (*Mamert., Paneg.*—*Nicéph.*, 14, 39.) Hierocles terms it the metropolis of Old Epirus (p. 651). St. Paul, in his Epistle to Titus (3, 12), speaks of his intention of wintering at Nicopolis: it is probable he there alludes to this city, though that is not quite certain.—Modern travellers describe the remains of Nicopolis as very extensive: the site which they occupy is now known by the name of *Proessa Vecchia*. (*Hughes's Travels*, vol. 2, p. 412.—*Holland's Travels*, vol. 1, p. 103.—*Cramer's Anc. Greece*, vol. 2, p. 135, *seqq.*)

NICOSTRATUS, one of the sons of Aristophanes, and ranked among the poets of the Middle Comedy. The titles of some of his own and his brothers' comedies are preserved in Athenæus. The names of his brothers were Araros and Philippos. None of the three appear to have inherited any considerable portion of their father's abilities. (*Theatre of the Greeks*, p. 115, 4th ed.)

NIGER, CAIUS PESCENNIVS, appears to have been of humble origin, but his great military talents recommended him successively to the notice of Marcus Aurelius, Commodus, and Pertinax, by whom he was employed in offices of trust and honour. He was consul together with Septimius Severus, and obtained the government of Syria. On the murder of Pertinax, A.D. 193, the empire was exposed for sale by the pretorian guards, and was purchased by Didius Julianus, whom the senate was compelled to acknowledge as emperor. The people, however, did not tamely submit to this indignity, and three generals, at the head of their respective legions, Septimius Severus, who commanded in Pannonia, Clodius Albinus in Britain, and Pescennius Niger in Syria, refused to acknowledge the nomination of the pretorians, and claimed each the empire. Of these Niger was the most popular, and his cause was warmly espoused by all the provinces of the East. But he did not possess the energy and activity of his rival Severus. Instead of hastening to Italy, where his presence was indispensable, he quietly remained at Antioch, while Severus marched to Rome, dethroned Didius, and made active preparations for prosecuting the war against Niger in Asia. Roused at length from his inactivity, Niger crossed over to Europe, and established his headquarters at Byzantium; but he had scarcely arrived at this place, before his troops in Asia were defeated near Cyzicus by the generals of Severus. He was soon, however, able to collect another army, which he commanded in person; but, being defeated successively near Nicæa and at Issus, he abandoned his troops, and fled towards the Euphrates, with the intention of seeking refuge among the Parthians. But before he could reach the Euphrates, he was overtaken by a detachment of the enemy, and put to death on the spot. (*Spartian., Vit. Nig.*—*Aurel. Vict.*, c. 20.—*Eutrop.*, 8, 10.—*Encycl. Us. Knowl.*, vol. 16, p. 223.)

NIGRE, or rather NIGRE, a name which has been given till lately to a large river, mentioned by ancient as well as modern geographers as flowing through the interior of Libya or Central Africa. Herodotus (2, 32) gives an interesting account of five young men of the Libyan nation of the Nasamones, which dwell on the coast of the greater Syrtis, who proceeded on a journey of discovery into the interior. After trav-

NIGER.

sing in a southern direction the inhabited region, and next to it the country of the wild beasts, they crossed the great sandy desert in a western direction for many days, until they arrived at a country inhabited by men of low stature, who conducted them through extensive marshes to a city built on a great river, which contained crocodiles, and flowed towards the rising sun. This information Herodotus derived from the Greeks of Cyrene, who had it from Etearchus, king of the Ammonii, who said that the river in question was a branch of the Egyptian Nile, an opinion in which the historian acquiesced. (*Vid. Nasamones, and Africa.*)—Strabo seems to have known little of the interior of Africa and its rivers: he cites the opposite testimonies of Posidonius and Artemidorus, the former of whom said that the rivers of Libya were few and small, while the latter stated that they were large and numerous.—Pliny (5, 1) gives an account of the expedition into Mauritania of the Roman commander Suetonius Paulinus, who (A.D. 41) led a Roman army across the Atlas, and, after passing a desert of black sand and burned rocks, arrived at a river called Ger, in some MSS. Niger, near which lived the Canarii, next to whom were the Perorai, an Ethiopian tribe; and farther inland were the Pharusi, as Pliny states above in the same chapter. The Canarii inhabited the country now called *Sus*, in the southern part of the empire of Morocco, near Cape *Nun*, and opposite to the Fortunate or *Canary Islands*; and the Perorai dwelt to the south of them along the seacoast. The Ger or Niger of Suetonius Paulinus, which he met after crossing the Atlas, must have been one of the streams which flow from the southern side of the great Atlas, through the country of *Taflelt*, and which lose themselves in the southern desert. One of these streams is still called *Ghir*, and runs through *Segelmessa*; and this, in all probability, is the Ger or Niger of the Roman commander. *Ger* or *Gir* seems, in fact, to be an old generic African appellation for "river." As for the desert which Suetonius crossed before he arrived at the Ger, it could evidently not be the great desert, which spread far to the south of the Canarii, but one of the desert tracts which lay immediately south of the Atlas. Caillié describes the inhabited parts of *Draha*, *Taflelt*, and *Segelmessa* as consisting of valleys and small plains, enclosed by steril and rocky tracts of desert country.—But, besides the Ger or Niger of Suetonius, Pliny in several places (5, 8, *seq.*; 8, 21) speaks of another apparently distinct river, the Nigris of Æthiopia, which he compares with the Nile, "swelling at the same seasons, having similar animals living in its waters, and, like the Nile, producing the calamus and papyrus." In his extremely confused account, which he derived from the authority of Juba II., king of Mauritania, he mixes up the Nigris and the Nile together with other rivers, as if all the waters of Central Africa formed but one water-course, which seems to have been a very prevalent notion of old. He says (5, 9) that the Nile had its origin in a mountain of Lower Mauritania, not far from the ocean; that it flowed through sandy deserts, in which it was concealed for several days; that it reappeared in a great lake in Mauritania Cæsariensis, was again hidden for twenty days in deserts, and then rose again in the sources of the Nigris, which river, separating Africa (meaning Northern Africa) from Æthiopia, flowed through the middle of Æthiopia, and became the branch of the Nile called *Astapus*. The same story, though without any mention of the Nigris, is alluded to by Vitruvius, Strabo, and others; and Mela (3, 9) adds, that the river at its source was called *Daræ*, which is still the name of a river that flows along the eastern side of the southern chain of the Atlas of Morocco, and through the province of the same name which lies west of *Taflelt*, and is nominally subject to Morocco. The *Dara* or *Draha* has a southern course towards the desert, but its termination

NIGER.

is unknown. There is another river, the *Akassa*, called also *Wadi Nun*, on the west side of the *Adrar* ridge, or Southern Atlas, which flows through the country of *Sus* in a western direction, enters the sea to the south of Cape *Nun*, and seems to correspond to the *Daras* or *Daratus* of Ptolemy.—Throughout all these confused notions of the hydrography of interior Africa entertained by the ancients, one constant report or tradition is apparent, namely, that of the existence of a large river south of the great desert, and flowing towards the east. It is true that Herodotus, Strabo, Pliny, and their respective authorities, thought that this river flowed into the Nile, but Mela seems to have doubted this, for he says that when the river reached the middle of the continent, it was not known what became of it.—Ptolemy, who wrote later than the preceding geographers, and seems to have had better information concerning the interior of Africa, after stating that "Libya Interior is bounded on the north by the two Mauritanias, and by Africa and Cyrenaica; on the east by Marmarica, and by the Æthiopia which lies south of Egypt; on the south by Interior Æthiopia, in which is the country of Agisymba; and on the west by the Western Ocean, from the Hezperian Gulf to the frontier of Mauritania Tingitana," proceeds to enumerate various positions on the coast of the ocean; after which he mentions the chief mountains of Libya, and the streams that flow from them to the sea. He then adds, "In the interior, the two greatest rivers are the Geir and the Nigeir: the Geir unites Mount Usargula (which he places in 20° 20' N. lat. and 50° E. long.) with the Garamantic pharax (the name of a mountain which he had previously stated to be in 10° N. lat. and 33° E. long.). A river diverges from it at 42° E. long. and 16° N. lat., and makes the lake Chelonides, of which the middle is in 49° E. long. and 20° N. lat. This river is said to be lost under ground, and to reappear, forming another river, of which the western end is at 46° E. long. and 16° N. lat. The eastern part of the river forms the Lake Nuba, the site of which is 50° E. long. and 15° N. lat." The positions here assigned to the Geir, and the direction of its main stream, from the Garamantic mountain to Mount Usargula, being southeast and northwest, seem to point out for its representative either the *Shary* of *Bornou*, and its supposed affluent, the *Bahr Kulla* of Browne, or perhaps the *Bahr Misselad* of the same traveller, called *Om Teymam* by Burckhardt, who says that its indigenous appellation is *Gir*, a large stream coming from about 10° N. lat., and flowing northwest through *Wadai*, west of the borders of *Dar-fur*. The *Miselad* is supposed to flow into Lake *Fittre*: we do not know whether any communication exists between Lake *Fittre* and the *Tschadd*. In fact, it appears that several streams, besides the *Bahr Kulla* and the *Bahr Misselad*, all coming from the great southern range, or Mountains of the Moon, flow in a northwest direction through the countries lying between *Bornou* and *Dar-fur*, and the Geir of Ptolemy may have been the representative of any or all of them.—We now come to Ptolemy's Nigeir, a name which, having been mistaken for the Latin word *Niger*, has added to the confusion on the subject. Nigeir is a compound of the general appellative *Geir* or *Gir*, which is found applied to various rivers in different parts of Africa, and the prefix *Ni* or *N'*, which is found in several names of the same region reported by Denham and Caillié. Ptolemy makes the Nigeir quite a distinct river from the Geir, and places it to the westward. He says that it joins the mountain *Mandrus*, 19° N. lat. and 14° E. long., with the mountain *Thala*, 10° N. lat. and 38° E. long. Its course is thereby defined as much longer and in a less oblique line to the equator than that of the Geir. In fact, it would correspond tolerably well (allowing for the imperfection of the means of observation in an-

cient times) with the actual direction of the course of the *Joliba* and that of the river of *Sakkatoo*, supposing that river to form a communication with Lake *Tschadda*, as Ptolemy says that the Nigeir has a divergent to the lake Libye, which he places in $16^{\circ} 30'$ N. lat. and 35° E. long., and the words of the text seem to express that the water ran into the lake; so that the course of the Nigeir, according to Ptolemy, as well as his predecessors, was easterly, as the *Joliba* or *Quorra* actually runs for a great part of its course. "The lake Libye," observes a distinguished geographer, "to which there was an easterly divergent, I strongly suspect to have been the lake *Tschadda*, notwithstanding that the position of Libye falls 300 geographical miles northwestward of this lake; for the name of Libye favours the presumption that it was the principal lake in the interior of Libye; it was very natural that Ptolemy, like many of the moderns, should have been misinformed as to the communication of the river with that lake, and that he should have mistaken two rivers flowing from the same ridge in opposite directions, one to the *Quorra* and the other to the *Tschadda* (I allude to the *Sakkatoo* and the *Yeu* rivers), for a single communication from the *Quorra* to the lake." (Leake's paper "On the *Quorra* and *Niger*," in the second volume of the *Journal of the Royal Geographical Society of London*, 1832.)—But Ptolemy, after all, may not have been so much misinformed with respect to a communication existing between the lake and his Nigeir, if, as is now strongly suspected, the communication really exists, though in an inverse direction from that which Ptolemy appears to have understood. It is surmised that the river *Tschadda*, which, at its junction with the *Quorra*, just above the beginning of the delta, is larger than the *Quorra* itself, receives an outlet from the lake somewhere about the town of *Jacobah*. (Captain W. Allen, R. N., *On a new construction of a Map of a Portion of Western Africa*, &c.—*Journal of the Royal Geogr. Soc. of London*, vol. 8, 1838.) If this surmise prove true, it would explain the statement of the Arabian geographers of the middle ages, Edrisi, Abulfeda, and Leo Africanus, who state that the *Nil-el-Abid*, or river of the negroes, flowed from east to west. The *Tschadda* then would be the river of the Arabian, and the *Joliba* or Upper *Quorra* that of the Greek and Roman geographers. Both were ignorant of the real termination of their respective streams. "It is nevertheless remarkable, that the distance laid by Ptolemy between his source of the river and the western coast is the same as that given by modern observations; that *Thamondocana*, one of the towns on the Nigeir, is exactly coincident with *Tombuctoo*, as recently laid down by M. Jomard from the itinerary of M. Caillie; that the length of the course resulting from Ptolemy's positions is nearly equal to that of the *Quorra*, as far as the mountains of *Kong*, with the addition of the *Tschadda* or *Shary* of *Funda*; and that his position of Mount *Thala*, at the southeastern extremity of the Nigeir, is very near that in which we may suppose the *Tschadda* to have its origin; so that it would seem as if Ptolemy, like Sultan Bello and other modern Africans, had considered the *Tschadda* as a continuation of the main river, though he knew the Egyptian Nile too well to fall into the modern error of supposing the Nigeir to be a branch of the Nile. The mountains of *Kong*, and the passage of the river through them at right angles to their direction, formed a natural termination to the extent of the geographer's knowledge; in like manner, as among ourselves, the presumed, and at length the ascertained, existence of those mountains, has been the chief obstacle to a belief that the river terminated in the Atlantic." (Leake's Paper "On the *Quorra* and *Niger*," already quoted.)—The opinions established by the Arabian geographers of the middle ages, that the Niger flow-

ed westward, led Europeans to look for its estuary in the *Senegal*, *Gambia*, and *Rio Grande*; but, upon examination of those rivers, the mistake was ascertained; and D'Anville and other geographers separated the course of the *Senegal* from that of the *Niger*, and of the latter from that of the Nile. Mungo Park was the first European who saw the great internal river of *Soudan* flowing towards the east, and called *Joliba*. He traced it in two different journeys, from *Bammakoo*, about ten days from its source, to *Boussa*, where he was unfortunately killed in 1806. Clapperton crossed the river at *Boussa* on his second journey to *Sakkatoo*, in 1826; and, after his death, his faithful servant, Richard Lander, undertook to navigate the river from *Boussa* to its mouth. In 1827 he proceeded from *Badagry*, on the coast, to *Boussa*, and there embarked on the river. He found that it flowed in a southern direction, receiving several large rivers from the east; among others, the noble *Tschadda*, after which the united stream passed through an opening in the *Kong* chain, and that, after issuing from the mountains, it sent off several branches both east and west towards the coast, while he himself reached the sea by the branch known till then by the name of *Rio Nwa*.—From all, then, that has been stated, it will satisfactorily appear, that the great river of the Libya of Herodotus, the *Nigris* of Pliny, the Nigeir of Ptolemy, and the Niger of modern geography, are one and the same river with the *Quorra*. M. Walckenaer (*Recherches Géographiques sur l'Intérieur de l'Afrique Septentrionale*) has maintained the negative side of the question, asserting that the ancients had no knowledge of *Soudan*, and that the Nigeir of Ptolemy was one of the rivers flowing from the Atlas; but Col. Leake has ably answered him, and supported the affirmative in the paper already quoted. (*Encycl. Us. Knowl.*, vol. 10, p. 231, seq.)—The singular theory of Sir Rufane Donkin, that the Niger once flowed into the Mediterranean where the Syrtis now are, but that it has been choked up and obliterated, in this part of its course, by the sands of the desert, is very ably refuted in the *Quarterly Review* (vol. 41, p. 226, seq.).

NIGIDIUS FIDELIUS, P., a celebrated astrologer, and yet a man of excellent judgment. He was the friend of Cicero, and consulted by him on all important occasions. Nigidius was a senator at the time of Catiline's conspiracy, and lent his best endeavours in aid of Cicero. Five years after this he attained to the prætorship, and displayed great firmness in discharging the duties of that office. He was, at a subsequent period, allowed a free legation for visiting Asia; and, returning from this country, met Cicero at Mytilene, when the latter was going to take charge of his government of Cilicia. The peripatetic Cratippus assisted at the conference which the two friends held here, and in which Nigidius, without doubt, maintained the tenets of Pythagoras, to whose school he belonged. In the civil wars Nigidius followed the party of Pompey. Cæsar, who pardoned so easily, would not, however, become reconciled to him: he drove him into exile, notwithstanding all the efforts of Cicero in his behalf. Nigidius died in exile a year before the assassination of the dictator.—We have said that he was a celebrated astrologer. He was strongly attached, indeed, to this pretended science, and devoted much of his time to it. The ancient writers have recorded several of his predictions, and, in particular, a very remarkable one relative to Octavius (Augustus), and his becoming the master of the world. (*Sueton., Aug.*, c. 94.—*Dio Cass.*, 45, 1.) Cicero speaks on many occasions of his great erudition, and he was regarded as the most learned of the Romans after Varro. He wrote a great number of works: one on grammar, under the title of *Commentarii Grammatici*, in thirty books; a *Treatise on Animals*, in four

books; another *On Wind*; a very large work *On the Gods*; but, above all, a *System of Astrology*, or a theory of the art of divination. Macrobius and Aulus Gellius, in citing these works, have preserved for us some few fragments of them. An extract *On Thunder*, from one of his productions, exists in Greek, having been translated into that tongue by Lydus, and inserted in his treatise on Prodigies. (*Schöll, Hist. Lit. Rom.*, vol. 2, p. 187.)

NILUS, the name of the great river of Eastern Africa, the various branches of which have their rise in the high lands north of the equator, and, flowing through Abyssinia and other regions to the westward of it, meet in the country of Sennaar. The united stream flows northward through Nubia and Egypt, and, after a course of more than 1800 miles from the farthest explored point of its principal branch, enters the Mediterranean by several mouths, which form the delta of Egypt. The word *Nil* seems to be an old indigenous appellation, meaning "river," like that of *Gir* in Soudan and other countries south of the Atlas. (*Vid. Nig.*) The modern Egyptians call the river *Bahr-Nil*, or simply *Bahr*; in Nubia it is known by various names; in Sennaar the central branch, or Blue River, is called *Adi*; and in Abyssinia, *Abazi*. The three principal branches of the Nile are: 1. The *Bahr el Abiad*, or *White River*, to the west, which is now ascertained to be the largest and longest. 2. The *Bahr el Azrek*, or Blue River, in the centre. 3. The *Tacazze*, or *Athara*, which is the eastern branch. These three branches were known to Ptolemy, who seems to have considered the western as the true Nile, and to have called the *Bahr el Azrek* by the name of Astapus, and the *Tacazze* by the appellation of Astaboras. He fixed the sources of the western river in numerous lakes at the foot of the Mountains of the Moon, which he placed in 10° S. lat. Strabo (821) speaks of the island of Meröë as bounded on the south by the confluence of the Astaboras, Astapus, and Astasobas. In another place (786) he says, that the Nile receives the Astaboras and Astapus; which latter "some call the Astasobas, and say that the Astapus is another river, which flows from some lakes in the south, and makes pretty nearly the direct course of the Nile, and is swollen by summer-rains." While these passages certainly prove that the ancient geographers knew there were three main streams, they also prove that their notions about them were extremely confused.—The Nile, as if it were doomed for ever to share the obscurity which covers the ancient history of the land to which it ministers, still conceals its true sources from the eager curiosity of modern science. The question which was agitated in the age of the Ptolemies has not yet been solved; and, although 2000 years have elapsed since Eratosthenes published his conjectures as to the origin of the principal branch, we possess not more satisfactory knowledge on that particular point than was enjoyed in his days by the philosophers of Alexandria. The repeated failures which had already attended the various attempts to discover its fountains, convinced the geographers of Greece and Rome that success was impossible, and that it was the will of the gods to conceal from all generations this great secret of nature. Homer, in language sufficiently ambiguous, describes it as a stream descending from heaven. Herodotus made inquiry in regard to its commencement, but soon saw reason to relinquish the attempt as altogether fruitless. Alexander the Great, and Ptolemy Philadelphus, engaged in the same undertaking, and despatched persons well qualified by their knowledge for the arduous task; but who, nevertheless, like the great father of history himself, travelled and inquired in vain. Pomponius Mela was doubtful whether it did not rise in the country of the Antipodes. Pliny traced it in imagination to a mountain in the Lower Mauritania,

while Euthemenes was of opinion that it proceeded from the borders of the Atlantic, and penetrated through the heart of Africa, dividing it into two continents. Virgil (*Georg.*, 4, 290) appears to have favoured a conjecture, which also found supporters at a later period, that the Nile proceeded from the east, and might be identified with one of the great rivers of Asia. (*Russell's Egypt*, p. 32, *seqq.*)—The numerous reports of the natives, who call the Mountains of the Moon by the Arabic version of the same name *Ibalu 'l Kamari*, though generally pronounced *Ibali 'l Kumri*, which would mean "blue mountains," seem to agree in placing the sources of the *Abiad* several degrees north of the equator, at nearly an equal distance between the eastern and western coasts of Africa. But we have no positive information either as to the true position of the sources or of the mountains themselves. The *Bahr el Azrek*, or Blue River, which was long supposed to be the main branch of the Nile, and which Bruce also took for such, has three sources in the high land of *Gojam*, near the village of *Geesh*, southwest of Lake *Dembea*, in 10° 59' 25" N. lat., and 36° 55' 30" E. long., according to Bruce's observations. The sources of the *Azrek* appear to have been visited by Father Paez, and perhaps by other missionaries, long before Bruce. The vast importance attached to that discovery has become much diminished since the information which we have acquired of the *Abiad*, whose sources are still unexplored, and still involved in that mystery which the ancients represent as hovering about the fountains of the Nile. The *Tacazze* rises in the high mountains of *Lasta*, in about 11° 40' N. lat., and 39° 40' E. long. Its sources were known to the Jesuit missionaries in Abyssinia, and have been visited of late years by Pearce.—The Nile, from the confluence of the *Tacazze* down to its entrance into the Mediterranean, a distance of 1200 geographical miles measured along the course of the river, receives no permanent streams; but in the season of rains it has wadya or torrents flowing into it from the mountains that lie between it and the Red Sea. North of *Argo*, in 19° 40' N. lat., the Nile enters the province of *Dar Mahass*, in Lower Nubia, where it forms a cataract or rapid, commonly called the third cataract by those who ascend the river. After several windings, the river inclines to the northeast; and near 22° N. lat. forms the second cataract, called *Wady Halfa*, after which it passes the splendid temple of Ipsambul. Continuing its northeast course, the Nile, at about 24° N. lat., forms the last cataract, between granite rocks which cross the river near *Assuan*, the ancient Syene. After entering the boundaries of Egypt, the Nile flows through the whole length of that country, which it waters and fertilizes, especially the Delta. Egypt, in fact, owes to the Nile its very existence as a productive and habitable region, and accordingly, in olden times, the people worshipped the beneficent river as their tutelary god.

1. The Delta.

The Nile, issuing from the valley a few miles north of Cairo, enters the wide low plain which, from its triangular form and its resemblance to the letter Δ, received from the Greeks the name of the Delta. The river, at a place called *Batu el Bahara*, near the ancient Cercasorus, divides into two branches, the one of which, flowing to *Rosetta*, and the other to *Damielta*, enclose between them the present Delta. These two arms or branches were anciently called the Canopic and Phatnitic. The figure of the Delta is now determined by these two branches, although the cultivated plain known by that name extends considerably beyond to the east and west, as far as the sandy desert on either side. In ancient times, however, the triangle of the Delta was much more obtuse at its apex, as its right side was formed by the Pelusiac

branch, which, detaching itself from the Nile higher up than the Damietta branch, flowed to Pelusium, at the eastern extremity of Lake *Menzaleh*. This branch is now in a great measure choked up, though it still serves partly for the purpose of irrigation. During our winter months, which are the spring of Egypt, the Delta, as well as the valley of the Nile, looks like a delightful garden, smiling with verdure, and enamelled with the blossoms of trees and plants. Later in the year the soil becomes parched and dusty; and in May the suffocating khamseen begins to blow frequently from the south, sweeping along the fine sand, and causing various diseases, until the rising of the beneficent river comes again to refresh the land.—For some remarks on the fertility of Egypt, and of the Delta in particular, consult the article *Egypt*, § 1, page 35, col. 1.

2. Mouths of the Nile, and Inundation of the River.

The ancients were acquainted with, and mention, seven mouths of the Nile, with respect to the changes in which, the following are the most established results. 1. The Canopic mouth, now partly confounded with the canal of Alexandria, and partly lost in Lake *Etko*. 2. The Bolbitine mouth at *Rosetta*. 3. The Sebennytic mouth, probably the opening into the present Lake *Burlos*. 4. The Phatnitic or Bucolic at *Damietta*. 5. The Mendesian, which is lost in the Lake *Menzaleh*, the mouth of which is represented by that of *Dibek*. 6. The Tanitic or Saitic, which corresponds to the *Moss* canal. 7. The Pelusiac mouth seems to be represented by what is now the most easterly mouth of Lake *Menzaleh*, where the ruins of Pelusium are still visible.—The rise of the Nile, in common with that of all the rivers of the torrid zone, is caused by the heavy periodical rains which drench the table-land of Abyssinia and the mountainous country that stretches from it towards the south and west. This phenomenon is well explained by Bruce. "The air," he observes, "is so much rarefied by the sun during the time he remains almost stationary over the tropic of Capricorn, that the winds, loaded with vapours, rush in upon the land from the Atlantic on the west, the Indian Ocean on the east, and the cold Southern Ocean beyond the Cape. Thus a great quantity of vapour is gathered, as it were, into a focus; and, as the same causes continue to operate during the progress of the sun northward, a vast train of clouds proceed from south to north, which are sometimes extended much farther than at other periods. In April all the rivers in the south of Abyssinia begin to swell; in the beginning of June they are all full, and continue so while the sun remains stationary in the tropic of Cancer."—The rise of the Nile begins in June, about the summer solstice, and it continues to increase till September, overflowing the lowlands along its course. The Delta then looks like an immense marsh, interspersed with numerous islands, with villages, towns, and plantations of trees, just above the water. Should the Nile rise a few feet above its ordinary elevation, the inundation sweeps away the mud-built cottages of the Arabs, drowns their cattle, and involves the whole population in ruin. Again, should it fall short of the customary height, bad crops and dearth are the consequences. The inundation, after having remained stationary for a few days, begins to subside, and about the end of November most of the fields are left dry, and covered with a fresh layer of rich brown slime: this is the time when the lands are put under culture. It would seem that the river cuts a passage through a considerable extent of rich soil before it approaches the granite range which bounds the western extremity of Nubia. The tropical rains collect on the table-lands of the interior, where they form immense sheets of water, or temporary lakes. When these have reached a level

high enough to overflow the boundaries of their basins, they suddenly send down into the rivers an enormous volume of fluid impregnated with the soft earth over which it has for some time stagnated. Hence the momentary pauses and sudden renewals in the rise of the Nile; hence, too, the abundance of fertilizing slime, which is never found so copious in the waters of rivers that owe their increase solely to the direct influence of the rains. The mud of the Nile, upon analysis, gives nearly one half of argillaceous earth, with about one fourth of carbonate of lime; the remainder consisting of water, oxyde of iron, and carbonate of magnesia. On the very banks the slime is mixed with much sand, which it loses in proportion as it is carried farther from the river, so that, at a certain distance, it consists almost entirely of pure argil. This mud is employed in several arts among the Egyptians. It is formed into excellent bricks, as well as into a variety of vessels for domestic uses. It enters, also, into the manufacture of tobacco-pipes. Glass-makers employ it in the construction of their furnaces, and the country people cover their houses with it.—We have already remarked, that Egypt is indebted for her rich harvests to the mould or soil which is deposited by the river during the annual flood. As soon as the waters retire, the cultivation of the ground commences. If it has imbibed the requisite degree of moisture, the process of agriculture is neither difficult nor tedious. The seed is scattered over the soft surface, and vegetation, which almost immediately succeeds, goes on with great rapidity. Where the land has been only partially inundated, recourse is had to irrigation, by means of which many species of vegetables are raised, even during the dry season. Harvest follows at the distance of about six or eight weeks, according to the different kinds of grain, leaving time, in most cases, for a succession of crops wherever there is a full command of water.—The swellings of the Nile, in Upper Egypt, are from 30 to 35 feet; at Cairo they are 23 feet, according to Humboldt, but, according to Girard, 7.419 metres, nearly 24½ feet; in the northern part of the Delta, owing to the breadth of the inundation and the artificial channels, only 4 feet.—The common Egyptian mode of clarifying the water of the Nile is by means of pounded almonds. It holds a number of substances in a state of imperfect solution, which are in this way precipitated. Its water is then one of the purest known, remarkable for its being easily digested by the stomach, for its salutary qualities, and for all the purposes to which it is applied. Europeans, as well as natives, are loud in their eulogies on the agreeable and salubrious qualities of the water of the Nile. Giovanni Finati, for example, who was no stranger to the limpid streams of other lands, sighed for the opportunity of returning to Cairo, that he might once more drink its delicious water, and breathe its mild atmosphere. Maillet, too, a writer of good credit, remarks, that it is among waters what Champagne is among wines. The Musulmans themselves acknowledge, that if their prophet Mohammed had tasted it, he would have supplicated heaven for a terrestrial immortality, that he might enjoy it for ever. (*Russell's Egypt*, p. 48, 52, seqq.)

3. Deposites of the Nile, and increase of the Delta.

We have here a very interesting topic of inquiry. It is an observation as old as the days of Herodotus, that Egypt is the gift of the Nile. This historian imagined that all the lower division of the country was formerly a deep bay or arm of the sea, and that it had been gradually filled up by depositions from the river. He illustrates his reasoning on this subject by supposing, that the present appearance of the Red Sea resembles exactly the aspect which Egypt must have exhibited in its original state; and that if the Nile by any

means were admitted to flow into the Arabian Gulf, it would, in the course of 20,000 years, convey into it such a quantity of earth as would raise its bed to the level of the surrounding coast. I am of opinion, he subjoins, that this might take place even within 10,000 years; why then might not a bay still more spacious than this be choked up with mud, in the time which passed before our age, by a stream so great and powerful as the Nile? (2, 11.)—The men of science who accompanied the French expedition into Egypt undertook to measure the depth of alluvial matter which has been actually deposited by the river. By sinking pits at different intervals, both on the banks of the current and on the outer edge of the stratum, they ascertained satisfactorily, first, that the surface of the soil declines from the margin of the stream towards the foot of the hills; secondly, that the thickness of the deposit is generally about ten feet near the river, and decreases gradually as it recedes from it; and, thirdly, that beneath the mud there is a bed of sand analogous to the substance which has at all times been brought down by the flood of the Nile. This convex form assumed by the surface of the valley is not peculiar to Egypt, being common to the banks of all great rivers, where the quantity of soil transported by the current is greater than that which is washed down by rain from the neighbouring mountains. The plains which skirt the Mississippi and the Ganges present in many parts an example of the same phenomenon.—An attempt has likewise been made to ascertain the rate of the annual deposition of alluvial substance, and thereby to measure the elevation which has been conferred upon the valley of Egypt by the action of its river. But on no point are travellers less agreed than in regard to the change of level and the increase of land on the seacoast. Dr. Shaw and M. Savary take their stand on the one side, and are resolutely opposed by Bruce and Volney on the other. Herodotus informs us, that in the reign of Moeris, if the Nile rose to the height of eight cubits, all the lands of Egypt were sufficiently watered; but that in his own time—not quite 900 years afterward—the country was not covered with less than fifteen or sixteen cubits of water. The addition of soil, therefore, was equal to seven cubits at the least, or 126 inches in the course of 900 years. “But at present,” says Dr. Shaw, “the river must rise to the height of twenty cubits—and it usually rises to 24 cubits—before the whole country is overflowed. Since the time, therefore, of Herodotus, Egypt has gained new soil to the depth of 230 inches. And if we look back from the reign of Moeris to the time of the Deluge, and reckon that interval by the same proportion, we shall find that the whole perpendicular accession of the soil, from the Deluge to A.D. 1721, must be 500 inches; that is, the land of Egypt has gained 41 feet 8 inches of soil in 4072 years. Thus, in process of time, the country may be raised to such a height that the river will not be able to overflow its banks; and Egypt, consequently, from being the most fertile, will, for want of the annual inundation, become one of the most barren parts of the universe.” (*Shaw's Travels*, vol. 2, p. 235.)—We shall see presently that this fear on the part of the learned traveller is entirely without foundation. Were it possible to determine the mean rate of accumulation, a species of chronometer would be thereby obtained for measuring the lapse of time which has passed since any monument, or other work of art in the neighbourhood of the river, was originally founded. In applying the principle now stated, it is not necessary to assume anything more than that the building in question was not placed by its architect under the level of the river at its ordinary inundations, a postulatam which, in regard to palaces, temples, and statues, will be most readily granted. Proceeding on this ground, the French philosophers hazarded a conjecture respecting a number of dates,

of which the following are some of the most remarkable: 1. The depth of the soil round the colossal statue of Memnon, at Thebes, gives only 0.106 of a metre (less than four inches) as the rate of accumulation in a century, while the mean of several observations made in the valley of Lower Egypt gives 0.126 of a metre, or rather more than four inches. But the basis of the statue of Memnon was certainly raised above the level of the inundation by being placed on an artificial mound; and excavations made near it show that the original height of that was six metres (19.686 feet) above the level of the soil. A similar result is obtained from examining the foundations of the palace at Luxor. Taking, therefore, 0.126 of a metre, the mean secular augmentation of the soil, as a divisor, the quotient, 4760, gives the number of years which have elapsed since the foundation of Thebes was laid. This date, which, of course, can only be considered as a very imperfect approximation to the truth, carries the origin of that celebrated metropolis as far back as 2960 years before Christ, and, consequently, 612 years before the Deluge, according to the reckoning of the modern Jews. But the numbers given there differ materially from those of the Samaritan text and the Septuagint version; which, carrying the Deluge back to the year 3716 before Christ, make an interval of seven centuries and a half between the flood and the building of Thebes. Though no distinct account of the age of that city is to be found in the Greek historians, it is clear from Diodorus that they believed it to have been begun in a very remote period of antiquity. (*Diad. Sic.*, 1, 15.)—2. The rubbish collected at the foot of the obelisk of Luxor indicates that it was erected fourteen hundred years before the Christian era.—3. The causeway which crosses the plain of Siout furnishes a similar ground for supposing that it must have been founded twelve hundred years anterior to the same epoch.—4. The pillar at Heliopolis, six miles from Cairo, appears, from evidence strictly analogous, to have been raised about the period just specified; but, as the waters drain off more slowly in the Delta than in Upper Egypt, the accumulation of alluvial soil is more rapid there than higher up the stream; the foundations, therefore, of ancient buildings in the former district will be at as great a depth below the surface as those of much greater antiquity are in the middle and upper provinces. But it is obvious that to form these calculations with such accuracy as would render them less liable to dispute, more time and observation would be requisite than could be given by the French in the short period during which they continued in undisturbed possession of Egypt. One general and important consequence, however, arising from their inquiries, can hardly be overlooked or denied; namely, that the dates thus obtained are as remote from the extravagant chronology of the ancient Egyptians, as they are consistent with the testimony of both sacred and profane history, with regard to the early civilization of that interesting country.—But, little or no reliance can be placed on such conclusions, because it is now manifestly impossible to ascertain, in the first instance, whether the measures referred to by the ancient historians were in all cases of the same standard; and, secondly, whether the deposition of soil in the Egyptian valley did not proceed more rapidly in early times than it does in our days, or even than it has done ever since its effects first became an object of philosophical curiosity. That the level of the land has been raised, and its extent towards the sea greatly increased since the age of Herodotus, we might safely infer, as well from the great infusion of earthy matter which is held in suspension by the Nile when in a state of flood, as from the analogous operation of all large rivers, both in the old continents and in the new. There is, in truth, no good reason for questioning the fact mentioned by Dr. Shaw,

that the mud of Ethiopia has been detected by soundings at the distance of not less than twenty leagues from the coast of the Delta. Nor yet is there any substantial ground for apprehending, with the author just named, that, in process of time, the whole country may be raised to such a height that the river will not be able to overflow its banks; and, consequently, that Egypt, from being the most fertile, will, for want of the annual inundation, become one of the most barren parts of the universe. "According to an approximate calculation," observes Wilkinson, "the land about the first or lowest cataract has been raised nine feet in 1700 years, at Thebes about seven feet, and at Cairo about five feet ten inches; while at Rosetta and the mouths of the Nile, where the perpendicular thickness of the deposit is much less than in the valley of Central and Upper Egypt, owing to the great extent, east and west, over which the inundation spreads, the rise of the soil has been comparatively imperceptible." As the bed of the Nile always keeps pace with the elevation of the soil, and the proportion of water brought down by the river continues to be the same, it follows that the Nile now overflows a greater extent of land, both east and west, than in former times; and that the superficies of cultivable land in the plains of Thebes and of Central Egypt continues to increase. All fears, therefore, about the stoppage of the overflowing of the Nile are unfounded. (*Russell's Egypt*, p. 37, *seqq.*—*Encycl. Us. Knowl.*, vol. 16, p. 234.)

4. Change in the course of the Nile.

The Nile is said by Herodotus (2, 99) to have flowed, previously to the time of Menes, on the side of Libya. This prince, by constructing a mound at the distance of 100 stadia from Memphis, towards the south, diverted its course. The ancient course is not unknown at present, and may be traced across the desert, passing west of the Natron Lakes. It is called by the Arabs *Bahr-bela-Maish*, "The river without water," and presents itself to the view in a valley which runs parallel to that containing the lakes just mentioned. In the sand with which its channel is everywhere covered, trunks of trees have been found in a state of complete petrification, and also the vertebral bone of a large fish. Jasper, quartz, and petrosilex have likewise been observed scattered over the surface. "That the Nile originally flowed through the valley of the Dry River," observes Russell (*Egypt*, p. 102, *seqq.*), "is admitted by the most intelligent among modern travellers. M. Denon, for example, regards as proofs of this fact the physical conformation of the adjoining country; the existence of the bed of a river extending to the sea, but now dry; its depositions and incrustations; its extent; its bearing towards the north on a chain of hills which run east and west, and turn off towards the northwest, sloping down to follow the course of the valley of the dry channel, and likewise the Natron Lakes. And, more than all the other proofs, the form of the chain of mountains at the north of the Pyramid, which shuts the entrance of the valley, and appears to be cut perpendicularly, like almost all the mountains at the foot of which the Nile flows at the present day; all these offer to the view a channel left dry, and its several remains. (*Denon*, vol. 1, p. 163.) The opinion that the river of Egypt penetrated into the Libyan desert, even to the westward of Fayoum, is rendered probable by some observations recorded in the second volume of Belzoni's Researches. In his journey to the Oasis of Ammon, he reached, one evening, the *Bahr-bela-Maish*. 'This place,' he remarks, 'is singular, and deserves the attention of the geographer, as it is a dry river, and has all the appearance of water having been in it, the bank and bottom being quite full of stones and sand. There are several islands in the centre; but the most remarkable circumstance is, that at a certain height upon the bank there

is a mark evidently as if the water had reached so high: the colour of the materials, also, above that mark, is much lighter than that of those below. And what would almost determine that there has been water here is, that the island has the same mark, and on the same level with that on the banks of the supposed river. I am at a loss to conjecture how the course of this river is so little known, as I only found it marked near the Natron Lakes, taking a direction of northwest and southeast, which does not agree with its course here, which is from north to south, as far as I could see from the summit of a high rock on the west side of it. The Arabs assured me that it ran a great way in both directions, and that it is the same which passes near the Natron Lakes. If this be the case, it must pass right before the extremity of the lake Meris, at the distance of two or three days' journey in a western direction. This is the place where several petrified stumps of trees are found, and many pebbles, with moving or quick water inside.'" (*Belzoni*, vol. 2, p. 183.)

NINUS, I. son of Belus, and king of Assyria. His history is known to us merely through Ctesias, from whom Diodorus Siculus and Justin have copied. (*Heyne, de Fontibus, Diod. Sic.*, p. liii., *seqq.*, vol. 1, ed. Bip.) Ctesias and Julius Africanus make him to have ascended the throne 2048 B.C., and from the narrative of Diodorus he would appear to have been a warlike prince, who signalized himself by extensive conquests, reducing under his sway the Babylonians, Armenians, Medes, Bactrians, Indi, and, in a word, the whole of Upper and Lower Asia. Even Egypt felt his sway. In his expedition against the Bactrians he met with the famous Semiramis, with whom he united himself in marriage. After completing his conquests, Ninus, according to the Greek writers, erected for his capital the celebrated city of Nineveh (*vid. Ninus II.*—Compare, however, remarks under the article *Assyria*), and on his death was succeeded by Semiramis, who reared a tomb of vast dimensions over his grave.—Much of what is stated respecting this monarch is either purely fabulous, or else various legends respecting different conquerors are made to unite in one. He occupies the boundary between fable and history. (*Ctes.*, *ap. Diod. Sic.*, 2, 1, *seqq.*—*Ctes.*, *Fragm.*, ed. Bähr, p. 389, *seqq.*)—II. The capital of the Assyrian Empire, called by the Greeks and Romans Ninus (*Nīvos*), but in Scripture Nineveh, and in the Septuagint version, *Nīvūt* or *Nīvevī*. It was situate in the plain of Aſuria, on the Tigris (*Strabo*, 737. —*Herod.*, 1, 193.—*Id.*, 2, 160.—*Ptol.*, 6, 1), and not on the Euphrates, as Diodorus states on the authority of Ctesias. (*Diod. Sic.*, 2, 3.) The Hebrew and Greek writers concur in describing Nineveh as a very large and populous city. Jonah speaks of it as "an exceeding great city, of three days' journey" (*Jon.*, 3, 3), and states that there were more than 120,000 persons in it that knew not their right hand from their left (4, 11). Rosenmüller and other commentators suppose this to be a proverbial expression to denote children under the age of three or five years, and accordingly estimate the entire population at two millions; but the expression in Jonah is too vague to warrant us in making any such conclusion. Strabo says that it was larger than Babylon (*Strab.*, 737); but if any dependance is to be placed on the account of Diodorus (2, 3), who states that it was 480 stadia in circumference, it must have been about the same size as Babylon. (*Herod.*, 1, 178.) The walls of Nineveh are described by Diodorus as 100 feet high, and so broad that three chariots might be driven on them abreast. Upon the walls stood 1500 towers, each 200 feet in height, and the whole was so strong as to be deemed impregnable. (*Diod. Sic.*, 2, 3.—*Nakum*, c. 2.) According to the Greek writers, Ninus was founded by a king of the same name (*vid. Ninus I.*); but in the book of Genesis it is stated to have been built

by Assur, or, if we adopt the marginal translation, by Nimrod. (*Vid. Assyria.*) Possibly Nimrod and Ninus were the same.—Nineveh was the residence of the Assyrian monarchs (2 *Kings*, 19, 36.—*Isaiah*, 37, 37.—Compare *Strabo*, 84, 737), and it is mentioned as a place of great commercial importance; whence Nahum speaks of its merchants as more than the stars of heaven (3, 16). But, as in the case of most large and wealthy cities, the greatest corruption and licentiousness prevailed, on account of which Nahum and Zephaniah foretold its destruction.—Nineveh, which for 1450 years had been mistress of the East, to whom even Babylon itself was subject, was first taken in the reign of Sardanapalus, B.C. 747, by the Medes and Babylonians, who had revolted under their governors Arbaces and Belesis. This event put an end to the first Assyrian empire, and divided its immense territory into two lesser kingdoms, those of Assyria and Babylon. But Nineveh itself suffered little change from this event; it was still a great city; and, soon after, in the reign of Esarhaddon, who took Babylon, it became again the capital of both empires, which continued 54 years; when Nabopolassar, a general in the Assyrian army, and father of the famous Nebuchadnezzar, seized on Babylon and proclaimed himself king: after which Nineveh was no more the seat of government of both kingdoms. It was, in fact, now on the decline, and was soon to yield to the rising power of its great rival. The Medes had again revolted, and in the year 633 B.C., their king Cyaxares, having defeated the Assyrians in a great battle, laid siege to Nineveh; but its time was not yet come, and it was delivered on this occasion by an invasion of Media by the Scythians, which obliged Cyaxares to withdraw his army to repel them. But in the year 612, having formed an alliance with Nabopolassar, king of Babylon, he returned, accompanied by that monarch, to the siege of Nineveh, and finally took the city. The prophecy made by Zephaniah, of its utter destruction, must refer to this latter event. *Strabo* says that it fell into decay immediately after the dissolution of the Assyrian monarchy; and this account is confirmed by the fact, that, in the history of Alexander the Great, the place is not mentioned, although in his march along the Tigris, previous to the battle of Arbela, he must have been very near the spot where it is supposed to have stood. Under the Roman emperors, however, we read of a city named Ninus (*Tacit.*, *Ann.*, 12, 13) or Ninive (*Amm. Marcell.*, 18, 7); and Abulpharagi, in the 13th century, mentions a castle called *Ninini*.—Little doubt can arise that Nineveh was situate near the Tigris, and yet the exact site of that once mighty city has never been clearly ascertained. On the eastern bank of the Tigris, opposite the town of Mosul, and partly on the site of the modern village of *Nunia* or *Nebbi Yunus*, are some considerable ruins, which have been described at different periods by Benjamin of Tudela, Thevenot, Tavernier, &c., as those of ancient Nineveh. But it is thought by others, from the dimensions of the ruins, that these travellers must have been mistaken; and that the remains described by them were those of some city of much smaller extent and more recent date than the Scripture Nineveh. Mr. Kinneir, who visited this spot in the year 1808, says, that "On the opposite bank of the Tigris (that is, over against Mosul), and about three quarters of a mile from that stream, the village of Nunia and sepulchre of the prophet Jonas seem to point out the position of Nineveh."—"A city being afterwards erected near this spot, bore the name of Ninus; and, in my opinion, it is the ruins of the latter, and not of the old Nineveh, that are now visible. I examined these ruins in November, 1810, and found them to consist of a rampart and a fosse, forming an oblong square not exceeding four miles in compass, if so much. I saw neither stones nor rubbish of any kind. The wall

is, on an average, 20 feet in height; and, as it is covered with grass, the whole has a striking resemblance to some of the Roman intrenchments which are extant in England." Mr. Kinneir's opinions are in everything worthy of respect, and with regard to these ruins, the traces of the wall point them out very evidently as belonging to some city or building of much less dimensions than ancient Nineveh; while these traces being visible at all would seem to place their date long subsequent to that of the structure of the Scripture Nineveh. It cannot be supposed, that while the walls of Babylon, which were at least as high and as thick, according to the concurrent testimony of historians, as those of Nineveh, and were entire long after the destruction of that city, are utterly effaced, those of Nineveh should still be visible. Mr. Rich, indeed, supposes that he has discovered in these intrenchments the ruins of the palace of Nineveh; which he describes as an enclosure of a rectangular form, corresponding with the cardinal points of the compass; the area of which is not larger than that of the town of Mosul. The boundary of this enclosure may, he says, be perfectly traced all around; and looks like an embankment of earth or rubbish of small elevation, and has attached to it, and in its line at several places, mounds of greater size and solidity. The first of these forms the southwest angle; and on it is built the village of *Nebbi Yunus*, where they show the tomb of the prophet Jonas. The next, and largest of all, which Mr. Rich supposes to be the monument of Ninus, is situate near the centre of the western face of the enclosure, and is joined, like the others, by the boundary wall; the natives call it *Koyunjuk Tepe*. Its form is that of a truncated pyramid, with regular steep sides and a flat top, and composed of stones and earth; there being sufficient of the latter to admit of cultivation by the inhabitants of *Koyunjuk*, which is built at the northeast extremity. This mound, according to measurements taken by Mr. Rich, is 178 feet high, 1850 long from east to west, and 1147 broad from north to south. The other mounds on the boundary wall offer nothing worthy of remark; but out of one of these, a short time since, an immense block of stone was dug, on which were sculptured the figures of men and animals; cylinders, like those of Babylon, with some other antiques, and stones of very large dimensions, are also occasionally dug up. Whether these ruins be really what Mr. Rich supposes them to be, or a part only of the more recent city referred to by Mr. Kinneir, cannot be decided. It is quite clear, however, that of whatever structure these mounds may be the remains, their dimensions will not allow us to consider them as those of the walls of Nineveh: they must either be those of a palace, as supposed by Mr. Rich, or of some other stupendous building of that city, or of a more modern one erected on this spot; and the uncertainty which exists on this point is alone sufficient to testify the fulfilment of the prophecies. In fact, these prophecies respecting Nineveh have long since received their entire completion; "an utter end is made of the place," and the true site may for ever be sought in vain. (*Mansford's Scripture Gazetteer*, p. 389, *seqq.*—*Drummond's Origines*, p. 172, *seqq.*)

NINĪAS, a son of Ninus and Semiramis, king of Assyria, who succeeded his mother on her voluntarily abdicating the crown. (*Vid. Semiramis.*) Altogether unlike his parents, he gave himself up to a life of seclusion and pleasure, in which he was imitated by his successors. (*Diod. Sic.*, 2, 21.)

NIÖBE, daughter of Tantalus, king of Lydia, was married to Amphion, by whom she had, according to Ovid and other ancient writers, seven sons and seven daughters. This is the most commonly received opinion, though Homer (*Il.*, 24, 603) and others give the number variously. The pride of Niobe at having this

numerous offspring was so great, that she is said to have insulted Latona, the mother of Apollo and Diana, by refusing to offer at the altars raised in her honour, declaring that she herself had a better claim to worship and sacrifices than one who was the mother of only two children. Latona, indignant at this insolence and presumption, called upon her children for revenge. Apollo and Diana heard her prayer, and obeyed the entreaty of their outraged parent. All the sons of Niobe fell by the arrows of Apollo, while the daughters, in like manner, met their death from the hands of Diana. Chloris alone escaped the common fate. She was the wife of Nereus, king of Pylos. This terrible judgment of the gods so affected the now heart-stricken and humiliated Niobe, that she was changed by her excessive grief into a stone on Mount Sipylus, in Lydia. Amphion also, in attempting, in retaliation, to destroy the temple of Apollo, perished by the shafts of that deity. (*Ovid, Met.*, 6, 146, *seqq.*—*Hygin.*, *fab.*, 9.—*Apollod.*, 3, 5, 6.—*Soph.*, *Antig.*, 823, *seqq.*) Pausanias says, that the rock on Sipylus, which went by the name of Niobe, and which he had visited, "was merely a rock and precipice when one came close up to it, and bore no resemblance at all to a woman; but at a distance you might imagine it to be a woman weeping with downcast countenance." (*Pausan.*, 1, 21, 3.)—The myth of Niobe has been explained by Völkner and others in a physical sense. According to these writers, the name *Niobe* (*Niōbē*, i. e., *Neōbē*) denotes *Youth* or *Newness*. She is the daughter of the *Flourishing-one* (Tantalus), and the mother of the *Green-one* (Chloris). In her, then, we may view the young, verdant, fruitful earth, the bride of the sun (Amphion), beneath the influence of whose fecundating beams she pours forth vegetation with lavish profusion. The revolution of the year, however, denoted by Apollo and Diana (other forms of the sun and moon), withers up and destroys her progeny; she weeps and stiffens to stone (the torrents and frosts of winter); but Chloris, the *Green-one*, remains, and spring clothes the earth anew with its smiling verdure. (*Völkner, Myth. der Jap.*, p. 359.—*Keightley's Mythology*, p. 338.)—The legend of Niobe and her children has afforded a subject for art, which has been finely treated by one of the greatest ancient masters of sculpture. It consists of a series, rather than a group, of figures of both sexes, in all the disorder and agony of expected or present suffering; while one, the mother, the hapless Niobe, in the most affecting attitude of supplication, and with an expression of deep grief, her eyes turned upward, implores the justly-offended gods to moderate their anger and spare her offspring, one of whom, the youngest girl, she strains fondly to her bosom. It is difficult, however, by description, to do justice to the various excellence exhibited in this admirable work. The arrangement of the composition is supposed to have been adapted to a tympanum or pediment. The figure of Niobe, of colossal dimensions compared with the other figures, forms, with her youngest daughter pressed to her, the centre. The execution of this interesting monument of Greek art is attributed by some to Scopas, while others think it the production of Praxiteles. Pliny says it was a question which of the two was the author of it. The group was in the temple of Apollo Sosianus at Rome. (*Plin.*, 36, 10.—*Sillig, Dict. Art.*, s. v.) This beautiful piece of sculpture is now in the gallery of the Grand-duke of Tuscany at Florence, though some regard it merely as a copy.—The subject of Niobe and her children was a favourite one also with the poets of antiquity. Besides the beautiful allusion to it in the *Antigone* of Sophocles (*v.* 823, *seqq.*), and the equally beautiful story in *Ovid* (*Met.*, 6, 146, *seqq.*), there are numerous epigrams in the Greek Anthology, several of which have great merit, and appear to be descriptive either of the group of figures which still exists, or of

some similar group. (*Encycl. Us. Knowl.*, vol. 16, p. 238.)

NIPHATAS, a range of mountains in Armenia, forming part of the great chain of Taurus, and lying to the southeast of the Arsissa Palus, or Lake Van. Their summits were covered with snow during the whole year, and to this circumstance the name Niphates is supposed to allude (*Niphátēs*, *quasi niveatōēs*, "snowy"). There was also a river of the same name rising in this mountain chain. (*Virg. Georg.*, 3, 30.—*Horat.*, *Od.*, 2, 9.—*Mela*, 1, 15.—*Pliny*, 5, 27.—*Amm. Marcell.*, 23, 6.—*Cellarius, Geogr.*, vol. 2, p. 321.)

NIREUS, a king of Naxos, son of Charops and Aglaia. He was one of the Grecian chiefs during the Trojan war, and was celebrated for his beauty. (*Hom.*, *Il.*, 2, 671.—*Horat.*, *Od.*, 3, 20, 15.)

NISMA, I. a city and district of Upper Asia, near the sources of the river Ochus, now the *Margab*. According to Strabo, it would appear to have been situated between Parthiene and Hyrcania. (*Strab.*, 511.—Compare *Mannert, Geogr.*, vol. 5, pt. 1, p. 100.) The same writer states elsewhere (p. 508) that it belonged in part to Hyrcania, and was in part an independent district. The city of Nisma, however, is generally considered to have been the chief city of Parthiene, becoming such, no doubt, on the first spread of the Parthian power. Mannert, in consequence, seeks to identify it with the Asaak (probably Arsaak) of Isidorus of Charax (p. 7).—The famous Nisæan horses are thought to have come from this quarter. D'Anville gives *Nesæ* as the modern name of the city of Nisma, and remarks that it "has before it vast plains, proper for the Parthian Nomades, or shepherds, as they were characterized. And it was thence that the Turkish sultan, ancestor of the Ottoman family, departed for the banks of the Euphrates" (vol. 2, p. 69, *Am. ed.*). Mannert merely places Nisma near the modern *Herat*.—II. The harbour of Megara, situated on the Saronic Gulf, and connected with the main city by long walls. The citadel was also called by the same name, and stood on the road between Megara and the port. It was a place of considerable strength. Thucydides states (4, 66) that the citadel might be cut off from the city by effecting a breach in the long wall. (*Cramer's Anc. Greece*, vol. 2, p. 433.)

NISIBIS, a large and populous city of Mesopotamia, about two days journey from the Tigris, in the midst of a pleasant and fertile plain at the foot of Mons Masius, and on the river Mygdonius. The name was changed by the Macedonians into Antiochia Mygdonica (*Ἀντιόχεια Μυγδονική*), but this new appellation only lasted as long as their power. When the Macedonian sway ceased, the old name of Nisibis was resumed. The Romans became acquainted with it for the first time during the war carried on by Lucullus against the King of Armenia (*Plut.*, *Vit. Lucull.*), and it was then represented as a large and populous city, situated in the midst of a fruitful territory. It was taken and plundered by Lucullus. (*Dio Cass.*, 35, 7.) The Parthians subsequently became masters of the place, and held it until the time of Trajan, who took it from them. (*Dio Cass.*, 68, 23.) Hadrian gave back to the Parthians the provinces conquered from them, and yet Nisibis appears as a Roman city in the expedition of Severus. It had very probably, therefore, been taken by the generals of Lucius Verus. Severus declared it a Roman colony, and the capital of the province: he also adorned and strengthened it. (*Dio Cass.*, 75, 3.—*Id.*, 30, 6.—*Spanheim, de usu. N.*, p. 606.) From this period it remained, for the space of two centuries, a strong bulwark of the Roman empire in this quarter, against which all the attacks of the Persian power were directed in vain, with the exception of two instances, when it was taken and held by this nation, though only for a short time. (*Capitol.*,

Vit. Gordian. tert., c. 26.—*Trebellii, Vit. Odenat.*, c. 15.) After the death of Julian, Nisibis was ceded to Sapor, king of Persia, by Jovian, and remained henceforth for the Persians, what it had thus far been to the Romans, a strong frontier town. The latter could never regain possession of it.—The modern *Nisibin* or *Niasabin*, which occupies the site of the ancient city, is represented as being little better than a mere village. (*Mannert, Geogr.*, vol. 5, pt. 2, p. 297, *seqq.*)

NISUS, I. a son of Hyrtacus, born on Mount Ida, near Troy. He came to Italy with Æneas, and was united by ties of the closest attachment to Euryalus, son of Opheltes. During the prosecution of the war with Turnus, Nisus, to whom the defence of one of the entrances of the camp was intrusted, determined to sally forth in search of tidings of Æneas. Euryalus accompanied him in this perilous undertaking. Fortune at first seconded their efforts, but they were at length surprised by a Latin detachment. Euryalus was cut down by Volscens; the latter was as immediately despatched by the avenging hand of Nisus; who, however, overpowered by numbers, soon shared the fate of his friend. (*Virg., Æn.*, 9, 176, *seqq.*—Compare *Æn.*, 5, 334, *seqq.*)—II. A king of Megara. In the war waged by Minos, king of Crete, against the Athenians, on account of the death of Androgeus (*vid.* Androgeus), Megara was besieged, and it was taken through the treachery of Scylla, the daughter of Nisus. This prince had a golden or purple lock of hair growing on his head; and as long as it remained uncut, so long was his life to last. Scylla, having seen Minos, fell in love with him, and resolved to give him the victory. She cut off her father's precious lock as he slept, and he immediately died: the town was then taken by the Cretans. But Minos, instead of rewarding the maiden, disgusted with her unnatural treachery, tied her by the feet to the stern of his vessel, and thus dragged her along until she was drowned. (*Apollod.*, 3, 15, 1.—*Schol. ad Eurip. Hippol.*, 1195.) Another legend adds, that Nisus was changed into the bird called the *Sea-eagle* (*δαλμας*), and Scylla into that named *Ciris* (*κείρις*), and that the father continually pursues the daughter to punish her for her crime. (*Ovid, Met.*, 8, 145.—*Virg., Cir.—Id., Georg.*, 1, 403.) According to Æschylus (*Choeph.*, 609, *seqq.*), Minos bribed Scylla with a golden collar. (*Keightley's Mythology*, p. 385.)

NISYROS, I. an island in the Ægean, one of the Sporades, about sixty stadia north of Telos. Strabo describes it as a lofty and rocky isle, with a town of the same name. Mythologists pretended, that this island had been separated from Cos by Neptune, in order that he might hurl it against the giant Polybotes. (*Strabo*, 448.—*Apollod.*, I., 6, 2.—*Pausan.*, 1, 2.—*Steph. Byz.*, s. v.) Herodotus informs us that the Nisyrians were subject at one time to Artemisia, queen of Caria (7, 99). The modern name is *Nisari*. From this island is procured a large number of good millstones. (*Cramer's Anc. Greece*, vol. 3, p. 418.)—II. The chief town in the island of Carpathus. (*Strabo*, 469.)

NITETIS, a daughter of Apries, king of Egypt, married by his successor Amasis to Cambyses. Herodotus states (3, 1), that Cambyses was instigated to ask in marriage the daughter of Amasis, by a certain physician, whom Amasis had compelled to go to Persia when Cyrus, the father of Cambyses, was suffering from weak eyes, and requested the Egyptian king to send him a man skilled in medicine. The physician did this, either that Amasis might experience affliction at the loss of his daughter, or provoke Cambyses by a refusal. Amasis, however, did not send his own daughter, but Nitetis, who discovered the deception to Cambyses, which so exasperated that monarch that he determined to make war on Amasis. Prideaux denies the truth of this account, on the ground that

Apries having been dead above 40 years, no daughter of his could have been young enough to be acceptable to Cambyses. Larcher, however, endeavours to reconcile the apparent improbability, by saying, that there is great reason to suppose that Apries lived a prisoner many years after Amasis had dethroned him, and that, therefore, Nitetis might have been no more than 20 or 22 years of age when she was sent to Cambyses. (*Larcher, ad Herod.*, l. c.)

NITIOBRIGES, a people of Gaul, of Celtic origin, but who settled among the Aquitani. Their chief city was Nitiobrigum or Agennum, on the Garumna, now Agen, and their territory answers to *l'Agemois*, in the *Département de Lot et Garonne*. (*Cæs.*, B. G., 7, 7.—*Lemaire, Ind. Geogr.*, ad *Cæs.*, l. c.)

NITOCRIS, I. a queen of Babylon, generally supposed to have been the wife of Nebuchodonosor or Nebuchadnezzar, and grandmother, consequently, to Labynetos or Nabonedus, who is called in Daniel Belshazzar or Belshazzar. (*Heeren, Ideen*, vol. 1, pt. 2, p. 154.—*Larcher, ad Herod.*, 1, 184.) Wesseling, however, and others, make her the queen of Evilmerodach, son of Nebuchadnezzar. (*Wesseling, ad Herod.*, l. c.)—Herodotus informs us, that Nitocris, in order to render her territories more secure from the Medes, altered the course of the Euphrates, and made it so very winding that it came in its course three times to Ardericca. (*vid.* Ardericca.) She also faced the banks of the Euphrates, where it passed through Babylon, with burned bricks, and connected the two divisions of the city by a bridge of stone. (*Herod.*, 1, 186.) The historian likewise informs us, that she prepared a sepulchre for herself over the most frequented gate of the city, with an inscription to this effect, that if any of her successors should find himself in want of money, he should open this sepulchre and take as much as he might think fit; but that, if he were not reduced to real want, he ought to forbear: otherwise he would have cause to repent. This monument remained untouched till the reign of Darius; who, judging it unreasonable that the gate should remain useless to the inhabitants (for no man would pass under a dead body), and that an inviting treasure, moreover, should be rendered unserviceable, broke open the sepulchre: but, instead of money, he found only the remains of Nitocris, and the following inscription: "*Hadst thou not been insatiably covetous, and greedy after the most sordid gain, thou wouldst not have violated the sepulchres of the dead.*" (*Herod.*, 1, 187.) Plutarch tells the same story of Semiramis. (*Apophk., Reg. et Duc.*—vol. 6, p. 661, *ed. Reiske.*) The custom, however, of depositing treasures in the tombs of deceased monarchs was very common with the ancients. Solomon did this in the case of David's sepulchre; and Hyrcanus, and after him Herod, both opened the tomb and obtained large amounts of treasure from it. (*Joseph., Ant. Jud.*, 7, 15.—*Id. ib.*, 13, 8.)—II. A queen of Egypt, who succeeded her brother. The Egyptians, having dethroned and put to death the latter, set her over them. She took a singular revenge, however, for the death of her brother; for, having constructed a large subterranean apartment, and having invited to an entertainment in it those individuals who had been most concerned in her brother's murder, she let in the river by a secret passage, and drowned them all. She then destroyed herself. (*Herod.*, 2, 100.) Heeren takes this Nitocris for a queen of Æthiopian origin; no instance of a reigning queen being found among the pure Egyptian dynasties. (*Ideen*, vol. 2, pt. 1, p. 412.) Jablonski approves of the interpretation which Eratosthenes gives to the name *Nitocris*, according to whom it is equivalent to *Ἀθηνᾶ νικηφόρος*. (*Jablonsk., Voc. Egypt.*, p. 162.)

NITRIA, a city of Egypt, to the west of the Canopic branch of the Nile, in the desert near the lakes which afforded nitre. It gave name to the Nitrotic nome,

receiving its own from the adjacent Natron lakes. Many Christians were accustomed to flee hither for refuge during the early persecutions of the church. (*Socron.*, 6, 31.—*Socrat.*, *Eccles.*, 4, 23.—*Plin.*, 5, 9.—*Id.*, 31, 10.)

NIVARIA, I. one of the Fortunatæ Insulæ, off the western coast of Mauritania Tingitana. It is now the island of *Teneriffe*. The name Nivaria has reference to the snows which cover the summits of the island for a great part of the year. It was also called *Convallis*. (*Plin.*, 4, 32.)—II. A city of Hispania Tarraconensis, in the territory of the Vaccæi, and to the north of Cauca. (*Itin. Ant.*, 435.)

NOCTILŪCA, a surname of Diana, as indicating the goddess that shines during the night season. The epithet would also appear to have reference to her temple's being adorned with lights during the same period. This temple was on the Palatine Hill. Compare the remark of Varro: "*Luna, quod sola lucet noctu: itaque ea dicta Noctiluca in Palatio, nam ibi noctu lucet templum*" (*L. L.*, 4, 10).

NOLA, one of the most ancient and important cities of Campania, situate to the northeast of Neapolis. The earliest record we have of it is from Hecateus, who is cited by Stephanus of Byzantium (*s. v. Νόλα*). That ancient historian, in one of his works, described it as a city of the Ausones. According to some accounts, Nola was said to have been founded by the Etrurians. (*Vell. Paterc.*, 1, 6.—*Polyb.*, 2, 17.) Others, again, represented it as a colony of the Chalcidians. (*Justin.*, 20, 1, 13.) If this latter account be correct, the Chalcidians of Cumæ and Neapolis are doubtless meant. All these conflicting statements, however, may be reconciled by admitting that it successively fell into the hands of these different people. Nola afterward appears to have been occupied by the Samnites, together with other Campanian towns, until they were expelled by the Romans. (*Liv.*, 9, 28.—*Strab.*, 249.) Though situated in an open plain, it was capable of being easily defended, from the strength of its walls and towers; and we know it resisted all the efforts of Hannibal after the battle of Cannæ, under the able direction of Marcellus. (*Liv.*, 23, 14, *seqq.*—*Cic.*, *Brut.*, 3.) In the Social war this city fell into the hands of the confederates, and remained in their possession nearly to the conclusion of the war. It was then retaken by Sylla, and, having been set on fire by the Samnite garrison, was burned to the ground. (*Liv.*, *Epit.*, 89.—*Appian.*, *Bell. Civ.*, 1, 42.—*Vell. Paterc.*, 2, 18.) It must have risen, however, from its ruins, since subsequent writers reckon it among the cities of Campania, and Frontinus reports that it was colonized by Vespasian. (*Plin.*, 3, 5.—*Front.*, *de Col.*) Here Augustus breathed his last, as Tacitus and Suetonius remark, in the same house and chamber in which his father Octavius had ended his days. (*Tacit.*, *Ann.*, 1, 5, *et* 9.—*Suet.*, *Aug.*, 99.) The modern name of the place is the same as the ancient, *Nola*. (*Cramer's Anc. Italy*, vol. 2, p. 210.) Aulus Gellius relates a foolish story, that Virgil had introduced the name of Nola into his *Georgics* (2, 225), but that, when he was refused permission by the inhabitants to lead off a stream of water into his grounds adjacent to the place (*aquam uti duceret in propinquum rus*), he obliterated the name of the city from his poem, and substituted the word *ora*. (*Aul. Gell.*, 7, 20.—Compare *Serv.*, *ad Æn.*, 7, 740.—*Philarg.*, *ad Georg.*, l. c.) Ambrose Leo, a native of Nola, has taken the trouble of refuting the idle charge (*de Nola*, 1, 2.—*Schott.*, *Script. Hist. Ital.*—Consult *Heyne*, *ad Georg.*, l. c.—*Var.*, *Lect.*—*Voss*, *ad Georg.*, l. c.). The only particular of any value to be obtained from the story would seem to be the locality of Virgil's farm in the neighbourhood of Nola, in what were called the *Campi Phlegræi*. (*Voss*, l. c.)

NUMIDES (Νομάδες), a general name among the

Greeks for the pastoral nations of antiquity, which lived in wandering tribes, as the Scythians, Arabs, &c. Sallust makes the Numidians to have obtained their name in this way (*Bell. Jug.*, 18), but without the least propriety. The term *Numida* is evidently of Phœnician origin. Le Clerc explains *Numida* by *Nemoudim*, "wanderers" (*Cleric.*, *ad Gen.*, 10, 6).

NOMENTUM, a city of Italy, in the territory of the Sabines, and to the northeast of Rome. It was a colony of Alba (*Dion. Hal.*, 2, 63), and therefore originally, perhaps, a Latin city (*Liv.*, 1, 38), but from its position it is generally attributed to the Sabines. Nomentum was finally conquered, with several other towns, A.U.C. 417, and admitted to the participation of the privileges granted to Latin municipal cities. (*Liv.*, 8, 14.) It was, however, but an insignificant place in the time of Propertius (4, 10). Its territory was nevertheless long celebrated for the produce of its vineyards; and hence, in the time of Seneca and Pliny, we find that land in this district was sold for enormous sums. The former had an estate in the vicinity of this town, which was his favourite retreat. (*Epist.*, 104.—*Plin.*, 14, 4.—*Columella*, *R. R.*, 3, 3.) The wine of Nomentum is commended by Athenæus (1, 48) and Martial (1, 85). The poet had a farm near this spot, to which he makes frequent allusions. (*Cramer's Anc. Italy*, vol. 1, p. 305.)

NONACRIS, a town of Arcadia, to the northwest of Pheneus, and on the confines of Achaia. It was surrounded by lofty mountains and perpendicular rocks, over which the celebrated torrent Styx precipitated itself to join the river Crathis; the waters were said to be poisonous, and to possess the property of dissolving metals and other hard substances exposed to their action. (*Pausan.*, 8, 18.—*Plin.*, 2, 104.—*Vitruv.*, 8, 3.) Herodotus describes the Nonacrian Styx as a scanty rill, distilling from the rock, and falling into a hollow basin surrounded by a wall (6, 76).—Pausanias only saw the ruins of Nonacris. (Compare *Stephan. Byz.*, *s. v. Νόνακρίς*.) Pouqueville informs us, that the fall of the Styx, which is now called *Mauronero*, or the "Black Water," is to be seen near the village of *Younari*, and somewhat to the south of *Calasirita*. He describes it as streaming in a sheet of foam from one of the loftiest precipices of Mount *Chelmos*, and afterward uniting with the Crathis in the Valley of *Kloukinaia*. (*Voyage*, vol. 5, p. 459.) The rocks above Nonacris are called *Aronii Montes* by Pausanias. (*Cramer's Ancient Greece*, vol. 3, p. 314.) The epithet *Nonacris* is sometimes used by the poets in the sense of "Arcadian." Thus, Ovid employs it in speaking of Evander, as being an Arcadian by birth (*Fast.*, 5, 97), and also of Atalanta. (*Met.*, 8, 426.)

NONIUS MARCELLUS, a Latin grammarian. The period when he flourished is not exactly known. It has been supposed, however, from his citing no writer later than Apuleius, that he lived towards the end of the second century. Hamberger believes him to have been contemporary with Constantine (*Zuwerl. Nachr. von den vorn. Schriftst.*, vol. 5, p. 783), while Funceius, relying on a passage of Ausonius (*Profess. Burdeg.*, c. 18), where mention is made of a Marcellus, a grammarian of Narbo, thinks that our author could not have lived earlier than the beginning of the 5th century. (*Funcc.*, *de inerti ac decrep. ling. Lat. senect.*, p. 302.) Nonius Marcellus is surnamed, in some manuscripts, *Peripateticus Tiburiensis*, because perhaps he had studied the philosophy of Aristotle in the library appended to Hadrian's Tiburtine villa. He has left behind him a work entitled "*De proprietate sermonum*," divided into nineteen chapters. It is occupied with grammatical topics, except the last six chapters, which treat of matters connected principally with the subject of archæology. (*Gothofred.*, *Auct. Lat. ling.*, p. 482.) In the extracts from the ancient grammari-

ans, who had written on the difference between words, extracts published by Gothofredus (Godefroi), among others, we find fragments of the writings of Marcellus (p. 1335). Some modern critics have formed rather an unfavourable opinion of Nonnus Marcellus. G. J. Vossius says that he is deficient in learning and judgment; and Justus Lipsius treats him as a man of very weak mind. (*Voss, de Philolol.*, 5, 13. — *Lips., Antiq. Lect.*, 2, 4.) On the other hand, Isaac Vossius laments the hard fate of this grammarian, whom, according to him, modern scholars have been accustomed to insult because unable to understand his writings (*ad Catull.*, p. 212). It is certain, that no ancient grammarian is so rich in his citations from previous writers, which he often gives without passing any opinion upon them. It is sufficient, however, for modern scholars to obtain these citations; nor need they, in fact, regret that the compiler has not appended to them his individual sentiments. (*Schöll, Hist. Lit. Rom.*, vol. 3, p. 310, *seqq.*)

NONNUS, I. a native of Panopolis in Egypt, and distinguished for his poetical abilities. The precise period when he flourished is involved in great uncertainty, nor is anything known with accuracy respecting the circumstances of his life. Conjecture has been called in to supply the place of positive information. Nonnus was, as appears from his productions, a man of great erudition, and we cannot doubt that he was either educated at Alexandria, or had lived in that city, where all the Greek erudition centred during the first ages of the Christian era. — Was he born a Christian, or did he embrace Christianity after he had reached a certain age? We have here a question about which the ancients have left us in complete uncertainty. The author of the *Dionysiaca* must have been a pagan; for it is difficult to believe that any Christian, even supposing that he had made the Greek mythology a subject of deep study, would have felt inclined to turn his attention to a theme, in treating of which he must inevitably shock the feelings and incur the censure of his fellow-Christians. And yet Nonnus composed also a Christian poem. — It is probable, then, that he was at first a pagan, and embraced the new religion at a subsequent period of his life. But here a new difficulty presents itself. How comes it that no Christian writer of the time makes mention of the conversion of a man who must have acquired a high reputation for learning? To explain this silence, it has been supposed that Nonnus was one of those pagan philosophers and sophists, who were a party in the tumult at Alexandria, which had been excited by the intolerance of the bishop Theophilus. To escape the vengeance of their opponents, some of these philosophers expatriated themselves, others submitted to baptism. If Nonnus was in the number of the latter, it may easily be conceived that the ecclesiastical writers of the day could derive no advantage to their cause from his conversion. (*Weichert, de Nonno Panopolitano, Viteb.*, 1810.) This hypothesis fixes the period when Nonnus flourished at the end of the fourth, and the commencement of the fifth century. He was then contemporary with Synesius. Now, among the letters of this philosopher, there is one (*Ep. 43, ad Anastas.*) in which he recommends a certain Sosena, son of Nonnus, a young man who, he says, has received a very careful education. He speaks, on this same occasion, of the misfortune into which Sosena's father had fallen, of losing all his property, and this very circumstance suits perfectly well the case of one who had been involved in the troubles at Alexandria, which had for their result the pillaging of the dwellings of the pagans. — We have already remarked that there exist two poems composed by Nonnus: one of these, the fruit, probably, of his old age, is a stranger to profane literature; it is a paraphrase on the gospel of St. John. The other is entitled *Διονυσιακά* or

Βασσαρία. It is in 48 books or cantos, and gives an account of the adventures of Dionysus or Bacchus, from the time of his birth to his return from his expedition into India; and the early books also contain, by way of introduction, the history of Europa and Cadmus, the battle of the giants, and numerous other mythological stories. There are few works about the merits of which the opinions of the learned have been more divided than this last-mentioned production of Nonnus. He who would be a competent judge in this matter, must possess as much taste as erudition, and, unfortunately, these two qualities are not often found united in the same individual. The first editor of Nonnus, Falckenberg, a philologist of the 16th century, carried his admiration so far as to place the poet on a level with Homer. Julius Cæsar Scaliger even preferred him to Homer; while Politian and Muretus, without carrying their enthusiasm to such an extreme, held him, however, in the highest estimation. On the other hand, Nicholas Heinsius, Peter Cunæus, Joseph Scaliger, and Rapin, allowed Nonnus no merit whatever. The truth probably lies between these two extremes. — In order to judge fairly of Nonnus, we must be careful to put away from our minds every idea of a regular epic poem, and must consider the *Διονυσιακά* merely as a species of exercise or declamation (*μελετή*) in verse, which has served the author for a groundwork on which to display the fruits of vast reading and research. If we view the poem in this light, we shall find that it is not even wanting in a regular plan, and that there reigns throughout it all that order and method which suffice for such a production. A man of taste very probably would never have selected such a theme, yet Nonnus has displayed great spirit in the management of its details. His work is distinguished by a great variety of fables, by the beauty of the images employed, and by the correctness of the sentiments which it contains; yet his style is unequal, sometimes bordering on simplicity, often emphatic; sometimes easy and graceful, but much more frequently languid, prolix, and trivial. (Consult *Oswaroff, Nonnus von Panopolis, der Dichter, &c.*, Petersb., 1817, 4to.) — But, whatever may be the rank which is to be assigned to Nonnus in the list of poets, his *Διονυσιακά* certainly possesses a strong interest for us as a rich storehouse of mythological traditions. It is sufficient, in order to appreciate the importance of the work, when considered in this light, to recollect the great number of poems of every kind of which Bacchus and his mysterious rites were the subject, and of which nothing now remains to us but the mere titles and a few fragments preserved by the erudition of Nonnus. Among these works that have thus perished may be enumerated five tragedies, bearing each the title of "*The Bacchantes*," and having for their authors Æschylus, Cleophon, Iophon, Xenocles, and Epigenes; two other tragedies of Æschylus, namely, "*The Bassarides*" and "*Semele*;" a piece by Carcinus; three pieces of Æschylus, Euripides, and Iophon, each entitled "*Pentheus*;" two of Sophocles, each entitled "*Aithamas*;" a satyric drama under the same name by Xenocles; various comedies entitled the "*Bacchantes*," by Epicharmus, Antiphanes, Diocles, and Lysippus; together with a host of dithyrambs, and other works both in prose and verse. — Hermann remarks, that Nonnus ought to be regarded as the restorer of the hexameter. After the example of Homer, the poets anterior to Nonnus placed the cæsural pause on the first syllable of the third foot (called the penthemimeral pause in the language of the grammarians); they did not, however, at the same time, consider that the verses of the Iliad and Odyssey are rich in dactyls, and that their own hexameters were rendered harsh by reason of the many spondee they contained. What also interfered with the harmony of their lines was the practice of regarding as short

a vowel placed before a mute followed by a liquid, in which they directly departed from Homeric usage. Nonnus, on his part, replaced a portion of the spondee by dactyle, introduced the trochaic caesura in the third foot, banished the trochees from the fourth, made long the vowels followed by a mute with a liquid, excluded the hiatus excepting in phrases borrowed from Homer, and which had received the sanction of ages, and interdicted himself the license of making the caesura fall upon a short syllable. If by these changes the hexameter lost somewhat of its stateliness and gravity, it gained, at the same time, in point of fulness and elegance. In fine, versification, which had become too easy, now resumed the rank of an art. (*Hermann, Orphica*, p. 60.—*Id.*, *Elem. Doctr. Metr.*, p. 333, ed. *Lips.*, 1816.) A good edition of Nonnus is still a desideratum. The first edition of the *Διονυσιακά* was given by Falckenberg, from a manuscript which is now at Vienna, from the Plantin press, Antwerp, 1569, in 4to. It contained merely the Greek text. This edition was reprinted by Wechel, with a poor translation by Lubin, at Hanover, in 1605, in 8vo. Cuneus published in 1610, at Leyden, *Animadversiones in Nonnum*, with a dissertation on the poet by Daniel Heinsius, and conjectures by Scaliger, which Wechel afterward joined to his edition of 1605, prefixing, at the same time, a new title-page. Few of the learned, after this, occupied themselves with Nonnus. In 1733, Villoison published in his *Epistole Vinarienses* (Turin, 4to), some good corrections made by an anonymous scholar on the margin of a copy of the edition of 1605. In 1819, Moser gave an edition of six books of the *Διονυσιακά* (namely, from the 8th to the 13th inclusive) at Heidelberg. The part here edited contains the exploits of Bacchus previously to his Indian expedition. It is accompanied with notes, and with arguments for the entire poem. The latest and best edition, however, of the *Διονυσιακά* is that of Græfe, *Lips.*, 1819–1826, 2 vols. 8vo. The notes to this are merely critical. The editor has promised an explanatory and copious commentary; but this has not yet appeared. (*Schöll, Hist. Lit. Gr.*, vol. 6, p. 79, *seqq.*)—The other work of Nonnus, the paraphrase of St. John's Gospel, was published for the first time by Aldus Manutius at Venice, about 1501. (Compare, in relation to this rare edition, *Annal. des Aldes*, vol. 1, p. 438.) The best edition, however, is that of Passow, *Lips.*, 1834. The Paraphrase was translated into Latin by several scholars, and has been very frequently reprinted. (Consult *Fabricius, Bibl. Gr.*, vol. 7, p. 697, *seqq.*) Daniel Heinsius has criticized this production too severely in his *Aristarchus Sacer* (*Lugd. Bat.*, 1827, 8vo). The style is clear and easy, though not very remarkable for poetry: the reproach, however, which some make against it, that the work contains expressions which cause his orthodoxy to be suspected, is not well grounded. The work is, in fact, of some value, as it contains a few important readings, which have been of considerable use to the editors of the Greek Testament. It omits the woman taken in adultery which we have at the beginning of the eighth chapter of St. John's Gospel, and which is considered by Griesbach and many other critics to be an interpolation. In chapter 19, verse 14, Nonnus appears to have read "about the third hour" instead of "the sixth." (Consult *Griesbach, ad loc.*)—There is also extant "A Collection of Histories or Fables," which is cited by Gregory Nazianzen in his work against Julian, and which is ascribed by some critics to the author of the "Dionysiaca." But Bentley has given good reasons for believing that the collection was composed by another individual of the same name. (*Bentley, Diss. on Phalaris*, p. 80, ed. 1816.)—II. An ecclesiastical writer, whose era is not ascertained. He is supposed, however, to have flourished subsequently to the fourth or fifth century, and before the eleventh.

This Nonnus must not be confounded with the preceding. (*Bentley on Phalaris*, p. 80, ed. 1816.) He was the author of a commentary on Gregory Nazianzen's invectives against Julian, and of another on the funeral discourse pronounced by the same father in memory of St. Basil. The first of these commentaries, if they strictly deserve this name, contains a collection of all the mythological notices and legends to which Gregory makes allusion in the course of his two works against Julian: the second contains all the notices of Greek history introduced into the funeral discourse on St. Basil. An edition of the former was given by Montague, *Elton*, 1810, 4to, and of the latter in Creuzer's *Opuscula Mythologica, etc.*, *Lips.*, 1817, 8vo. Bentley gives some amusing examples of the mistakes committed by this Nonnus. (*Diss. on Phal.*, l. c.)—III. (sometimes called Nonnus) A Greek physician, and author of a medical work still extant, entitled *Ἐπιτομή τῆς λαμπρῆς ἀνθρώπων τέχνης*, "*An epitome of the whole Medical Art.*" Nothing is known of his life, except that he composed his work at the command of the Emperor Constantine Porphyrogenitus (to whom also it is dedicated), who was most probably the seventh of that name, and who died A.D. 959. The real name of Nonnus is supposed by Freind, Sprengel, and Bernard to have been Theophanes, as he is called so in one MS., and as a physician of that name is found to have lived in the 10th century. In three MSS. the work is anonymous, and there is only one which mentions the name of Nonnus. This epitome is divided into 397 chapters, and contains a short account of most diseases and their treatment. It contains very little that is original, and is almost entirely compiled from Aëtius, Alexander Trallianus, and Paulus Ægineta, from whom whole sentences are transcribed with hardly any variation.—There are only two editions of this work. The first is by Martius (who writes the author's name *Nonus*), *Argent.*, 1568, 8vo. The last and best is by Bernard, and was published after his death in two vols. 8vo, *Gothæ et Amst.*, 1794, 1795, with copious and learned notes by the editor.

NORBA, I. a town of Latium, northeast of Antium, the position of which will nearly agree with the little place now called *Norma*. It is mentioned among the early Latin cities by Pliny (3, 5); and Dionysius of Halicarnassus speaks of it as no obscure city of that nation (7, 13). It was early colonized by the Romans as an advantageous station to check the inroads of the Volsci. (*Liv.*, 3, 34.) The zeal which it displayed, at a later day, in the cause of Marius, drew upon it the vengeance of the adverse faction. Besieged by Lepidus, one of Sylla's generals, it was opened to him by treachery; but the undaunted inhabitants chose rather to perish by their own hands than become the victims of a bloody conqueror. (*Appian, Bell. Civ.*, 1, 94.) The name of C. Norbanus, who was descended from a distinguished family of this city, occurs frequently in the history of those disastrous times as a conspicuous leader on the side of Marius. (*Cramer's Anc. Italy*, vol. 2, p. 106.)—II. A town of Apulia, northwest of Egnatia. The intervening distance is given on the Tabula Theodosiana at 16 miles. This ancient site is supposed to answer nearly to that of *Conversano*. (*Romanelli*, vol. 2, p. 179.—*Cramer's Anc. Italy*, vol. 2, p. 300.)—III. Caesarea, a city in the northwestern part of Lusitania. It was also called *Colonia Norbensis* or *Cæsariensis*. (*Plin.*, 4, 22.—*Id.*, 4, 35.) The ruins of this place are in the vicinity of the modern *Alcantara*. (*Ukert, Geogr.*, v. 2, p. 396.)

NORBANUS, C., a native of Norba, of a distinguished family, and a conspicuous leader on the side of Marius. (*Vid. Norba I.*)

NOXIUM, a province of the Roman empire, was bounded on the north by the Danube, on the west by Vindelicia and Rætia, on the east by Pannonia, and

on the south by Illyricum and Gallia Cisalpina. It was separated from Vindelicia by the *Œnus* or *Ison*, and from Gallia Cisalpina by the Alpes Carnice or Julius; but it is difficult to determine the limits between Noricum and Pannonia, as they differed at various times. During the later periods of the Roman empire, Mount Cetius and part of the river Murus (*Mur*) appear to have formed the boundaries, and Noricum would thus correspond to the modern *Styria*, *Carinthia*, and *Salzburg*, and to part of *Austria* and *Bavaria*. A geographer who wrote in the reign of Constantius, the son of Constantine the Great, includes Germania, Rætia, and the Ager Noricus in one province. (*Bede, Mythographi Vaticani*, vol. 2.) Noricum is not mentioned by name in the division of the Roman empire made by Augustus, but it may be included among the Eparchies of the Cæsar. (*Strabo*, 840.)—Noricum was divided into two nearly equal parts by a branch of the Alps, called the Alpes Noricæ. These mountains appear to have been inhabited from the earliest times by various tribes of Celtic origin, of whom the most celebrated were the Norici (whence the country obtained its name), a remnant of the Taurisci. Noricum was conquered by Augustus; but it is uncertain whether he reduced it into the form of a province. It appears, however, to have been a province in the time of Claudius, who founded the colony Sabaria, which was afterward included in Pannonia. (*Plin.*, 3, 27.) It was under the government of a procurator. (*Tacit., Hist.*, 1, 11.) From the "*Notitia Imperii*" we learn, that Noricum was subsequently divided into two provinces, *Noricum Ripense* and *Noricum Mediterraneum*, which were separated from each other by the Alpes Noricæ. In the former of these, which lay along the Danube, a strong military force was always stationed, under the command of a *Dux*.—In addition to the Norici, Noricum was inhabited in the west by the Seveas, Alauni, and Ambisontii, and the east by the Ambidraui or Ambidrani: but of these tribes we know scarcely anything except the names. Of the towns of Noricum the best known was Noreia, the capital of the Taurisci or Norici, which was besieged in the time of Cæsar by the powerful nation of the Boii. (*Cæs., B. G.*, 1, 5.) It was subsequently destroyed by the Romans. (*Plin.*, 2, 29.) The only other towns worthy of mention were, Juvanum (*Salzburg*), in the western part of the province; Boiodurum (*Innsbruck*), at the junction of the *Inn* and Danube; and Ovilava, or Ovilaba, or Ovilava (*Wels*), southeast of Boiodurum, a Roman colony founded by Marcus Aurelius.—The iron of Noricum was in much request among the Romans (*Plin.*, 24, 41), and, according to Polybius, gold was once found in this province in great abundance. (*Polyb., ap. Strab.*, 208.—*Encycl. Œs. Knowl.*, vol. 16, p. 274.)

NOTIA, a name given to the goddess of Fortune among the Vulsinii. (*Livy*, 7, 3.) Tertullian calls her Nereia. (*Apolog.*, c. 24.)

NOTUS, the surname of Darius Ochus among the Greeks. (*Vid. Ochus*.)

NORIUM, the harbour of Colophon, in Asia Minor. After the destruction of Colophon by Lysimachus, and the death of that prince, Notium became a flourishing city, and would seem from some authorities to have assumed the name of Colophon instead of its own. New Colophon certainly occupied a different site from the ancient city. (*Plin.*, 5, 29.—*Liv.*, 37, 36.)

NORUS, the south wind (from the Greek *Nóros*), and corresponding to the Latin *Auster*. The term *vóros* itself is supposed to be derived from the same root with *voris*, "*dampness*" or "*humidity*," with reference to the damp and humid character of the south wind in both Greece and Italy. (*Aul. Gall.*, 2, 22.) It is also spoken of by the ancients as a stormy wind. (*Horat., Epod.*, 10, 19.—*Virg., Æn.*, 6, 355.—*Ovid, Her.*, 2, 12.)

NOVARIA, a town of Cisalpine Gaul, about ten miles northeast of Vercellæ, and to the west of Mediolanum. The modern name is *Novara*. It was situate on a river of the same name, now *la Gogna*. (*Tacit., Hist.*, 1, 70.—*Plin.*, 17, 22.)

NOVESIUM, a town of the Ubii, on the west of the Rhine, now called *Neuss*, and situate near *Cologne*. (*Tacit., Hist.*, 4, 26.) Ptolemy calls it *Novæciom*, and Gregory of Tours *Nivisium*. The name *Novesium* occurs among the writers of the middle ages. (*Pertz., Mon. Germ. Hist.*, vol. 1, p. 218, 459.)

NOVIODUNUM, I. a city of the Bituriges Cubi, in Gallia Aquitania. (*Cæs., B. G.*, 7, 12.) D'Anville and Mannert agree in placing its site near the modern *Nouan*. The more correct location, however, would be *Nouan-le-Fuzelier*. (*Lemaire, Ind. Geogr.*, ad *Cæs.*, s. v.)—II. A city of Gallia Lugdunensis, on the river Liger or *Loire*. It corresponds to the modern *Nevers*. (*Cæs., B. G.*, 7, 55.) In the *Ilin. Ant.*, p. 367, it is called *Nivirum*.—III. A city of the Suevones, in Gallia Belgica, now *Soissons*. It was more commonly called *Augusta Suevorum* or *Suessionum*. (*Cæs., B. G.*, 2, 12.—*Bischoff und Müller, Wörterb. der Geogr.*, p. 133.)

NOVIOMAGUS, or *Neomagus*, I. or *NOVIOMAGUM*, a city of the Batavi, now *Nimuegen*. In the *Peutinger Table* it is called *Nimaga*.—II. The capital of the *Lexubii* or *Lixovii*, in Gallia Lugdunensis. According to Mannert, it corresponds to the modern *Caen*; others, however, are in favour of the modern *Lisieux*.—III. or *Augusta Nemeturum*, the capital of the *Nemetes*, now *Spire*.—IV. A city of the Bituriges Vivisci, in Gallia Aquitania. According to Mannert, it is now *Castillon*, not far from the mouth of the *Gironde*. Reichard, however, decides in favour of *Castelnau de Medoc*.—V. A city of Britain, the capital of *Regni*, the remains of which may be traced at *Woodcote*, near *Croydon*. (*Mannert, Geogr.*, vol. 2, pt. 2, p. 159.)—VI. A city of the Treveri, on the *Mosella*, now *Numagen* or *Neumagen*.—VII. A city of the *Vermundui*, in Belgica Secunda, now *Noyon*. It is also called *Novionum* or *Noviomum*. (*Pertz., Mon. Germ. Hist.*, vol. 1, p. 30, 63, 148, &c.)

NOX, one of the most ancient deities, daughter of *Chaos*. From her union with her brother *Erebus*, she gave birth to the *Day* and the *Light*. She was also the mother of the *Parcs*, *Hesperides*, *Dreams*, of *Discord*, *Death*, *Momus*, *Fraud*, &c. She is called by some of the poets the mother of all things, of gods as well as of men, and was worshipped with great solemnity. A black sheep and a cock, the latter as announcing the approach of day, were sacrificed to her.—Night was represented under various forms: as riding in a chariot preceded by the constellations, with wings, to denote the rapidity of her course; as traversing the firmament seated in her car, and covered with a black veil studded with stars. Sometimes her veil seems to be floating on the wind, while she approaches the earth to extinguish a flaming torch which she carries in her hand. She has often been confounded with *Diana*, or the moon: and her statue was placed in the temple of that goddess at *Ephesus*. (*Hygin., Pref.—Serv., ad Virg., Æn.*, 6, 350.—*Tibull.*, 3, 4, 17.—*Virg., Æn.*, 5, 721, &c.)

NUCERIA, I. a town of Cisalpine Gaul, north of *Brixellum*, now *Luzzara*. (*Ptol.*, p. 64.)—II. A city of *Umbria*, some distance to the north of *Spoletium*, and situate on the *Flaminian Way*. It is now *Nocera*. It is noticed by *Strabo* for its manufacture of wooden vessels. (*Strab.*, 227.)—III. A town of *Campania*, about twelve miles south of *Nola*, now *Nocera de Pagani*. The appellation of *Alfaterna* was commonly attached to it, to distinguish it from the other places of the same name. (*Liv.*, 10, 41.—*Plin.*, 3, 5.) It was said to have been founded by the *Pelasgi Sanastes*. (*Conon., ap. Serv. ad Æn.*, 7, 738.) *Nuceria* was

besieged by Hannibal after his unsuccessful attack on Nola, and, on its being deserted by the inhabitants, he caused it to be sacked and burned. (*Liv.*, 23, 15.) We learn from Tacitus (*Ann.*, 13, 31), that, under the reign of Nero, Nuceria was restored and colonized. (*Cramer's Anc. Italy*, vol. 2, p. 212.)

NUMIDONES, a people of Germany, whose territory appears to have corresponded to the southeastern part of Mecklenburg. (*Tacit.*, *Germ.*, 40.)

NUMA POMPILIUS, the second king of Rome, was, according to tradition, a native of the Sabine town of Cures. On the death of Romulus, the senate at first chose no king, and took upon itself the government of the state; but, as the people were more oppressively treated than before, they insisted that a king should be appointed. A contest, however, arose, respecting the choice of a monarch, between the Romans and Sabines, and it was at length agreed that the former should select a king out of the latter. Their choice fell upon Numa Pompilius, who was revered by all for his wisdom, which, according to a popular tradition, he had derived from Pythagoras. Numa would not, however, accept the sovereignty till he was assured by the auspices that the gods approved of his election. Instructed by the Camena or Nymph Egeria, he founded the whole system of the Roman religion; he increased the number of Augurs, regulated the duties of the Pontifices, and appointed the Flamines, the Vestal Virgins, and the Salii. He forbade all costly sacrifices, and allowed no blood to be shed upon the altars, nor any images of the gods to be made. In order to afford a proof that all his institutions were sanctioned by divine authority, he is said to have given a plain entertainment, in earthenware dishes, to the noblest among his subjects, during which, upon the appearance of Egeria, all the dishes were changed into golden vessels, and the food into viands fit for the gods. Numa also divided among his subjects the lands which Romulus had conquered in war; and he secured their inviolability by ordering landmarks to be set on every portion, which were consecrated to Terminus, the god of boundaries. He divided the artisans, according to their trades, into nine companies or corporations. During his reign, which is said to have lasted thirty-nine years, no war was carried on; the gates of Janus were shut, and a temple was built to Faith. He died of gradual decay, in a good old age, and was buried under the hill Janiculum; and near him, in a separate tomb, were buried the books of his laws and ordinances.—Such was the traditional account of the reign of Numa Pompilius, who belongs to a period in which it is impossible to separate truth from fiction. According to Niebuhr, and the writers who adopt his views of Roman history, the reign of Numa is considered, in its political aspect, only as a representation of the union between the Sabines and the original inhabitants of Rome, or, in other words, between the tribes of the Titianses and the Ramnes. (*Liv.*, 1, 18, *seqq.*—*Dion. Hal.*, 2, 58, *seqq.*—*Cic.*, *de Repub.*, 2, 12, *seqq.*—*Plut.*, *Vit. Num.*—*Histories of Rome*, by Niebuhr, Arnold, and Malden.—*Encycl. Us. Knowl.*, vol. 16, p. 363.)

NUMANTIA, a celebrated town of the Celtiberi in Spain, on the river Durus (now the Douro), at no great distance from its source. (*Strabo*, 162.—*Appian*, *Rom. Hist.*, 6, 91.) It appears to have been the capital of the Arevaci (*Appian*, 6, c. 46, 66, 76.—*Plut.*, 2, 6), but Pliny states that it was a town of the Pelendones, a people who lived a little to the north of the Arevaci. Numantia was situated on a steep hill of moderate size. According to Florus (2, 18), it possessed no walls, but was surrounded on three sides by very thick woods, and could only be approached on one side, which was defended by ditches and palisades. (*Appian*, 6, c. 76, 91.) It was twenty-four stadia in circumference. The site of this place has been a sub-

ject of considerable dispute; but it appears most probable that its ruins are those near the modern *Puentes de Don Garray*. (*Ukert, Geogr.*, vol. 2, p. 455.)—Numantia is memorable in history for the war which it carried on against the Romans for the space of fourteen years. (*Flor.*, 2, 18.) Strabo states that the war lasted twenty years; but he appears, as Casaubon has remarked, to include in this period the contest which was carried on by Viriathus. (*Strab.*, 162.—*Casaub.*, *ad loc.*) The Numantines were originally induced to engage in this war through the influence of Viriathus. They were first opposed by Quintus Pompeius, the consul, B.C. 141, who was defeated with great slaughter (*Oros.*, 5, 4), and who afterward offered to make peace with them, on condition of their paying thirty talents of silver. This negotiation was broken off by M. Popilius, who succeeded Pompeius, B.C. 139. Popilius, however, did not meet with any better success than his predecessor; he was ignominiously defeated, and obliged to retire from the country. His successors, Mancinus, Æmilius, Lepidus, and Piso, met with similar disasters; till at length the Roman people, alarmed at the long continuance of the war, appointed the younger Scipio Africanus consul, B.C. 134 (twelve years after the destruction of Carthage), for the express purpose of conquering the Numantines. After levying a large army, he invested the place; and having in vain endeavoured to take it by storm, he turned the siege into a blockade, and obtained possession of the place, B.C. 133, at the end of a year and three months from the time of his first attack. The Numantines displayed the greatest courage and heroism during the whole of the siege; and, when their provisions had entirely failed, they set fire to the city, and perished amid the flames. (*Appian*, lib. 6.—*Flor.*, 2, 17, *seq.*—*Liv.*, *Epit.*, 57.—*Vell. Patere.*, 2, 4.—*Encycl. Us. Knowl.*, vol. 16, p. 363.)

NUMENIUS, I. a Greek philosopher of the Platonic school, who is supposed to have flourished about the beginning of the third century of our era. He was born at Apamea in Syria, and was regarded as an oracle of wisdom. Both Origen and Plotinus mention him with respect. He was the author of a treatise entitled *Περὶ τῆς τῶν Ἀκαδημαϊκῶν περὶ Πλάτωνα διαστροφῆς*, "Of the disagreement among the Academic philosophers respecting Plato." Eusebius has preserved a few fragments of this work. (*Schöll, Hist. Lit. Gr.*, vol. 5, p. 107.)—II. A Greek rhetorician, who flourished in the time of the Antonines. He wrote two works, which have been printed in the Aldine Rhetorical Collection. (*Schöll, Hist. Lit. Gr.*, vol. 4, p. 328.)—III. An epigrammatic poet, a native of Tarsus. (*Jacobs, Catal. Poet. Epigr.*, p. 926.)

NUMERIANUS, MARCUS AURELIUS, succeeded to the throne conjointly with his elder brother Carinus, after the death of their father Carus, at the beginning of A.D. 284. Numerianus was with the army in Mesopotamia at the death of Probus; but, instead of following up the advantage which his father had gained over the Persians, he was compelled by the army to abandon the conquests which had been already made, and to retreat to Syria. During the retreat, a weakness of the eyes obliged him to confine himself to the darkness of a litter, which was strictly guarded by the pretorians. The administration of all affairs, civil as well as military, devolved on Arrius Aper, the pretorian prefect, his father-in-law. The army was eight months on its march from the banks of the Tigris to the Thracian Bosphorus, and during all that time the imperial authority was exercised in the name of the emperor, who never appeared to his soldiers. Reports at length spread among them that their emperor was no longer living; and when they had reached the city of Chalcedon, they could not be prevented from breaking into the imperial tent, where they found only his corpse. Suspicion naturally fell upon Arrius; and

an assembly of the army was accordingly held, for the purpose of avenging the death of Numerianus, and electing a new emperor. Their choice fell upon Dioclesian, who, immediately after his election, put Arrius to death with his own hands, without giving him an opportunity of justifying himself, which might, perhaps, have proved dangerous to the new emperor. The virtues of Numerianus are mentioned by most of his biographers. His manners were mild and affable; and he was celebrated among his contemporaries for eloquence and poetic talent. He successfully contended with Nemesianus for the prize of poetry; and the senate voted to him a statue, with the inscription, "To Numerianus Cæsar, the most powerful orator of his times." (*Vopisc., Vit. Numerian.*—*Aurel. Victor, de Cæs.*, c. 38.—*Eutrop.*, 9, 12.—*Zonaras*, lib. 12.)

NUMICIA VIA, a Roman road, traversing the northern part of Samnium. It communicated with the Valerian, Latin, and Appian Ways, and, after crossing through part of Apulia, fell into the Via Aquilia in Lucania. (*Cramer's Anc. Italy*, vol. 2, p. 260.)

NUMICIUS, a small river of Latium near Lavinium, in which, according to some authorities, Æneas was drowned. (*Ovid, Fast.*, 3, 647.—*Virg., Æn.*, 7, 150, *seqq.*—*Ovid, Met.*, 14, 358, *seqq.*) It is now the *Rio Torto*. (*Nibby, Viaggio Antiquario*, vol. 2, p. 266.)

NUMIDA, Plotius, a friend of Horace, who had returned, after a long absence, from Spain, where he had been serving under Augustus in the Cantabrian war. The poet addresses one of his odes to him, and bids his friends celebrate in due form so joyous an event. (*Horat., Od.*, 1, 36.)

NUMIDIA, a country of Africa, bounded on the east by Africa Propria, on the north by the Mediterranean, on the south by Gætulia, and on the west by Mauritania. The Roman province of Numidia was, however, of much smaller extent, being bounded on the west by the Ampsagas, and on the east by the Tusca (or Zain), and thus corresponded to the eastern part of *Algiers*. The Numidians were originally a nomadic people; and hence some think they were called by the Greeks *Nomades* (*Nouides*), and their country *Nomadia* (*Nouadia*), whence came by corruption *Numida* and *Numidia*. (Compare *Polyb.*, 37, 3.—*Sall., Bell. Jug.*, 18.—*Plin.*, 5, 2.) Others, however, are in favour of a Phœnician etymology. (*Vid. Nomades*.)—When the Greek and Roman writers speak of the Numidians, the term is usually limited to the two great tribes of the Massæyli and Massyli, the former of which extended along the northern part of Africa, from the Mulucha on the west to the Ampsagas on the east; and the latter from the Ampsagas to the territories of Carthage. When the Romans first became acquainted with the Numidians, which was during the second Punic war, Syphax was king of the Massæyli, and Gala of the Massyli. Masinissa, son of Gala, succeeded to the throne after various turns of fortune, and, siding with the Romans during the latter part of the second Punic war, yielded them very important assistance, which they requited by bestowing upon him all the dominions of his rival Syphax, and a considerable part of the Carthaginian territory, so that his kingdom extended from the Mulucha on the west to Cyrenaica on the east, and completely surrounded the small district which was left to the Carthaginians on the coast. (*Appian*, 8, 106.) Masinissa laid the foundation of a great and powerful state in Numidia. He introduced the arts of agriculture and civilized life, amassed considerable wealth, and supported a well-appointed army. (*Vid. Masinissa*.)—Masinissa left three sons, Micipsa, Mastanabal, and Gulussa. The two latter died soon after their father, but Micipsa lived to B.C. 118, and bequeathed the kingdom to his two sons Adherbal and Hiempsal, and to his nephew Jugurtha. The two former soon fell victims to the ambitious schemes of the last-mentioned individual; but

he himself, no long time thereafter, paid the penalty of his crimes with his own life. (*Vid. Jugurtha*.)—After the capture and death of Jugurtha (B.C. 106), the kingdom of Numidia appears to have been given by the Romans to Hiempsal II. (*Hirtius, Bell. Afr.*, 56), who was probably the nephew of Hiempsal the son of Micipsa. Hiempsal was succeeded, about B.C. 50, by his son Juba I., who took an active part in the civil contest between Pompey and Cæsar, and had the misfortune to espouse the party of the former. After the victory of Thapsus, therefore, Cæsar declared the whole kingdom of Numidia to be Roman territory, and Salust the historian was sent thither as its governor. (*Appian, Bell. Civ.*, 2, 100.) The western district, around the city of Cirta, was bestowed on Sittius, in recompense for his services to Cæsar. (*Vid. Cirta*.) The country, however, still remained in an unsettled state, a prey to intestine commotions, until it fell into the hands of the triumvir Lepidus, and after him into those of Augustus, under the latter of whom the aspect of affairs was completely changed, and a more regular administration introduced into Numidia. Juba, son of the first Juba, an intelligent prince, who had been educated at Rome, and had gained the friendship of Augustus, received back from that emperor his father's former kingdom, but with very important alterations. The western part of Numidia, included between the rivers Mulucha and Ampsagas, which had formed the old territory of the Massæyli and Syphax, together with all Mauritania, were assigned him for his kingdom, which now assumed the general name of Mauritania. At a later period, in the reign of Claudius, the western portion of Numidia, from the river Ampsagas, together with the eastern part of Mauritania as far as the Malva, were formed into a Roman province under the name of *Mauritania Cæsariensis*, from Cæsarea, its capital; the remainder of Mauritania received the epithet of *Tingitana*. In the eighth century Numidia fell into the hands of the Saracens, and is now nominally under the Ottoman porte.—The Numidians were a brave and hardy race, and remarkable for their skill in horsemanship. Hence the epithet of *infrens* applied to them by Virgil, and poetically denoting a nation who could dispense with the use of bridles. (*Mela*, 1, 6.—*Plin.*, 5, 3.—*Virg., Æn.*, 4, 41.—*Encycl. Us. Knowl.*, vol. 16, p. 369.—*Mannert, Geogr.*, vol. 10, pt. 2, p. 192, *seqq.*)

NUMITOR, I. a son of Procas, king of Alba, and brother of Amulius. (*Vid. Amulius*.)—II. A son of Phorcus, who fought with Turnus against Æneas. (*Virg., Æn.*, 10, 342.)

NUNDINA, a goddess whom the Romans invoked when they named and purified their children. This happened the ninth day after their birth, whence the name of the goddess, *Nona dies*. (*Macrob., Sat.*, 1, 16.)

NURSA, a town of the Sabines, or more correctly, perhaps, in the territory of the Æqui, and near the banks of the Anio. Its particular site is unknown. (*Virg., Æn.*, 7, 744.)

NURCIA, a city of the Sabines, at the foot of the central chain of the Apennines, and near the sources of the river Var. It was noted for the coldness of its atmosphere. (*Virg., Æn.*, 7, 715.—*Sil. Ital.*, 8, 418.) The modern *Norcia* corresponds to the ancient site. Polla Vespasia, the mother of Vespasian, was born here. (*Cramer's Anc. Italy*, vol. 1, p. 320.)

NYCTEIS, I. a daughter of Nycteus, who was mother of Labdacus.—II. A patronymic of Antiope, the daughter of Nycteus, mother of Amphion and Zethus by Jupiter. (*Ovid, Met.*, 6, 110.)

NYCTELUS, a surname of Bacchus, because his orgies were celebrated in the night (*νύξ*, night, and *ἔλω*, to perform). The words *latex Nyctelius* thence signify wine. (*Senec., CEd.*, v. 492.—*Pausan.*, 1, 40.—*Ovid, Met.*, 4, 15.—Compare *Serv. ad. Virg., Æn.*, 4, 303.—*Liv.*, 39, 8.)

NYCTEUS, father of Antiope. (*Vid.* Antiope I.)

NYMPHÆ, certain female deities among the ancients.

The imagination of the Greeks peopled all the regions of earth and water with beautiful female forms called Nymphs, divided into various orders, according to the place of their abode. Thus, 1. the Mountain-Nymphs, or *Oreades* ('*Opeïades*'), haunted the mountains; 2. the Dale-Nymphs, or *Napeæ* ('*Napaïai*'), the valleys; 3. the Mead-Nymphs, or *Leimoniades* ('*Λειμωνιάδες*'), the meadows; 4. the Water-Nymphs, or *Naiades* ('*Ναϊάδες*'), the rivers, brooks, and springs; 5. the Lake-Nymphs, or *Lemniades* ('*Λημνιάδες*'), the lakes and pools. There were also, 6. the Tree-Nymphs, or *Hamadryades* ('*Ἀμαδρυάδες*'), who were born and died with the trees; 7. the Wood-Nymphs, or *Dryades* ('*Δρυάδες*'), who presided over the forests generally; and, 8. the Fruit-tree-Nymphs, or Flock-Nymphs (*Me-liades*, '*Μηλιάδες*'), who watched over gardens or flocks of sheep.—The Nymphs occur in various relations to gods and men. The charge of rearing various deities and heroes was committed to them: they were, for instance, the nurses of Bacchus, Pan, and even Jupiter himself, and they also brought up Aristæus and Æneas. They were, moreover, the attendants of the goddesses; they waited on Juno and Venus, and in huntress attire they pursued the deer over the mountains in company with Diana. The Sea-Nymphs also formed a numerous class, under the appellation of Oceanides and Nereides.—The word Nymph (*νύμφη*) seems to have originally signified "*bride*," and was probably derived from a verb *νύω*, "*to cover*" or "*veil*," and which was akin to the Latin *nubo* and *nudes*. It was gradually applied to married or marriageable young women, for the idea of youth was always included. It is in this last sense that the goddesses of whom we have been treating were called Nymphs. (*Keightley's Mythology*, p. 237, *seqq.*)

ΝΥΜΦÆΙΟΝ, I. a place in the territory of Apollo-nia, in Illyricum, remarkable for a mine of asphaltus, of which several ancient writers have given a description. Near this spot was some rising ground, whence fire was constantly seen to issue, without, however, injuring either the grass or trees that grew there. (*Aristot., Mirand. Auscult.*—*Ælian, Var. Hist.*, 13, 16.—*Plin.*, 24, 7.) Strabo supposes it to have arisen from a mine of bitumen liquefied, there being a hill in the vicinity whence this substance was dug out, the earth which was removed being in process of time converted into pitch, as it had been stated by Posidonius. (*Strabo*, 316.) Pliny says this spot was considered as oracular, which is confirmed by Dio Cassius, who describes at length the mode of consulting the oracle (41, 45). The phenomenon noticed by the writers here mentioned has been verified by modern travellers as existing near the village of *Selenitza*, on the left bank of the Aous, and near the junction of that river with the *Stitchitza*. (*Jones's Journal, cited by Hughes*, vol. 2, p. 262.) From Livy (42, 36 *et* 49) it appears that there was a Roman encampment here for some time during the Macedonian war. (*Cramer's Anc. Greece*, vol. 1, p. 61.) Plutarch (*Vit. Syll.*) tells an amusing story of a satyr having been caught asleep in this vicinity and brought to Sylla, the Roman commander, who was then on the spot!—II. A promontory of Athos, on the Singitic Gulf, now Cape *S. Georgio*. (*Ptol.*, p. 82.)—III. A city in the Tauric Chersonese, on the route from Theodosia to Panticapæum, and having a good port on the Euxine. In Pliny's time it no longer existed (4, 12). The ruins, however, may still be traced in the vicinity of the modern *Vosfar*. (*Mela*, 2, 130.—*Steph. Byz.*, p. 500.)

ΝΥΜΦΛΕΥΣ, a river of Armenia Major, which, according to Procopius, formed a separation between the Roman and Persian empires. It ran from north to south, entered the town of Martyropolis, and dis-

charged itself into the Tigris southeast of Amida. (*Amm. Marcell.*, 18, 9.)

ΝΥΜΦΟΝΟΤΟΣ, a native of Syracuse, whose era is uncertain. He wrote a work on the "Navigation along the coasts of Asia," and another on the "Wonders in Sicily and Sardinia." (*Schöll, Hist. Lit. Gr.*, vol. 2, p. 184.)

ΝΥΣΑ, I. according to the Greek writers, a city of India, on a mountain named Meros, whose inhabitants were said to be descended from a colony planted there by Bacchus in his Indian expedition. Arrian (5, 1) places it between the Cophenes and Indus. (Compare *Plin.*, 6, 21.—*Diod. Sic.*, 2, 38.—*Theophrast.*, *Hist. Pl.*, 4, 4.—*Polyan.*, 1, 1, 2.) D'Anville is inclined to give a real existence to Nysa, apart, however, from the story of its origin, and seeks to identify its site with that of the ancient *Nagger*. (*Geogr. Ancienne*, vol. 2, p. 339.—*Eclairc. sur la Carte de l'Inde*, p. 21.) Rennell also, and Barbier du Bocage, are in favour of the existence of such a place as Nysa, and strive to identify it with the modern *Nugaz*, making the river Cophenes the same with the *Coro*. (*Rennell, Description of India*, vol. 2, p. 219.—*Barbier du Bocage*, p. 831.) Sainte-Croix, on the other hand, denies that there ever was such a place as Nysa, or such a mountain as Meros. (*Examen des Hist. d'Alex.*, p. 241.) It is pretty evident that this last is the most correct opinion, and that the story was invented by the Greeks to flatter the vanity of Alexander, who was thus treading the same ground that Bacchus had. Hence the etymology given by them to the name Διόνυσος (the Greek appellation of Bacchus), namely, the god (Δίς), from *Nysa* (*Æt. Grundriss der Philologie*, p. 44); and hence, too, the analogy that was found between the name of the mountain (Μηρός) and the Greek term for a thigh (μηρός), which was supposed to be connected with the legend of Bacchus's concealment in the thigh of Jove, and his double birth.—II. According to Diodorus Siculus (1, 15), a city of Arabia Felix, where Osiris was nurtured. The same writer elsewhere states (4, 2) that it was situate between Phœnicia and the Nile (μεταφ' Φοινίκης καὶ Νεῖλου), leaving its precise situation altogether unknown.—III. A city of Cappadocia, on the Halys, between Parnassus and Osianus, now *Nous Shehr*. (*Lin. Anton.*, p. 200.—*Hierocles, Synecdem.*, p. 699.)—IV. A city of Caria, called also Pythopolis (*Steph. Byz.*, p. 567), on the slope of Mount Messogis, in the valley of the Mæander. Strabo studied here under Aristodemus. It is now *Nasli* or *Noali*. (*Strabo*, 650.—*Plin.*, 5, 29.—*Pococke*, vol. 3, b. 2, c. 10.—*Chandler*, c. 63.)—V. A place in Eubœa, where the vine was said to put forth leaves and bear fruit the same day. (*Steph. Byz.*, s. v. Νύσαι.)—VI. A small town on Mount Helicon, in Bœotia. (*Strabo*, 403.—*Steph. Byz.*, s. v. Νύσαι.)—VII. A town in the island of Naxos. (*Steph. Byz.*)

ΝΥΣΣΟΣ, a surname of Bacchus, as the god of Nysa. (*Vid.* Nysa.)

ΝΥΣΙΔΗΣ, a name given to the nymphs of Nysa, to whose care Jupiter intrusted the education of his son Bacchus. (*Ovid, Met.*, 3, 314, &c.)

O.

Οἶκτος, a river of Sarmatia, falling into the *Patus Mæotis*. De Guignes conjectures it to be the modern *Wardan*. (*Mém. de l'Acad. des Insér.*, &c., vol. 35, p. 546.) Mannert, on the other hand, is in favour of the *Uzen*. (*Geogr.*, vol. 4, p. 79.) The river in question is mentioned by Herodotus, who gives, however, no particular information respecting it. (*Herod.*, 4, 123.—*Bähr, ad loc.*)

Οἶσις (in Greek 'Οασίς, and sometimes Αἰασίς), the appellation given to those fertile spots, watered by springs and covered with verdure, which are scat-

tered about the great sandy deserts of Africa. In Arabic they are called *Wahys*. The Arabic and the Greek names seem to contain the same root with the Coptic *Ouahc*, and possibly the word may be originally a native African term.—The Oases appear to be depressions in the table-land of Libya. On going from the Nile westward, the traveller gradually ascends till he arrives at the summit of an elevated plain, which continues nearly level, or with slight undulations, for a considerable distance, and rises higher on advancing towards the south. The Oases are valleys sunk in this plain; and, when you descend to one of them, you find the level space or plain of the Oasis similar to a portion of the valley of Egypt, surrounded by steep hills of limestone at some distance from the cultivated land. The low plain of the Oasis is sandstone or clay, and from this last the water rises to the surface and fertilizes the country; and, as the table-land is higher in the latitude of Thebes than in that of Lower Egypt, we may readily imagine that the water of the Oases is conveyed from some elevated point to the south, and, being retained by the bed of clay, rises to the surface wherever the limestone superstratum is removed. (Wilkinson, "On the Nile, and the present and former levels of Egypt."—*Journal of the London Geographical Society*, 1839.) The principal Oases are four in number: 1. *The Great Oasis* ('*Oasis Meyakh*, Ptol.), which Strabo calls "the First Oasis" (*ἡ πρώτη Ὀάσις*, 791). 2. *The Little Oasis* ('*Oasis Mikrá*, Ptolemy), called by Strabo the *Second Oasis* ('*Oasis deutéra*). 3. *The Oasis of Ammon*. 4. *The Western Oasis*, which does not appear to have been mentioned by any ancient geographer except Olympiodorus, and was never seen by any Europeans until Sir Archibald Edmonstone visited it about 20 years ago.—These four constitute, as has been said, the principal Oases. The writers of the middle ages enlarge the number materially, from Arabic sources, and modern writers increase it still more, making upward of thirty Oases. (Bischoff und Möller, *Wörterb. der Geogr.*, p. 795.)—The Great Oasis is the most southern of the whole, and is placed by Strabo and Ptolemy to the west of Abydos. It is the only one, with the exception of that of Ammon, with which Herodotus seems to have been acquainted (3, 26). He translates the term Oasis into Greek by *Μακάριον νῆσος*, "*Island of the blessed*," and without doubt this, or any other of these fertile spots, must have appeared to the traveller of former days well worthy of such an appellation, after he had suffered, during many painful weeks, the privations and fatigue of the desert. To the Greeks and Romans, however, of a later age, they generally presented themselves in a less favourable aspect, and were not unfrequently assigned as places of banishment, where the state-malefactor and the ministers of the Christian church, who were sometimes comprehended in the same class, were, in the second and third centuries, condemned to waste their days in the remote solitude of the desert.—The Great Oasis consists of a number of insulated spots, which extend in a line parallel to the course of the Nile, separated from one another by considerable intervals of sandy waste, and stretching not less than a hundred miles in latitude. Its Arabic name is *El-Wah*, a general term in that language for *Oasis*. M. Poncet, who examined it in 1698, says that it contains many gardens watered with rivulets, and that its palm-groves exhibit a perpetual verdure. It is the first stage of the Darfûr caravan, which assembles at *Siout*, being about four days' journey from that town, and nearly the same distance from *Farshout*. The exertions of Browne, Caillaud, Edmonstone, and Henniker have supplied us with ample details relative to this interesting locality.—The *Little Oasis*, now *El-Kassar*, has not been much visited by travellers. We owe the latest and most distinct account to Belzoni,

who, proceeding in search of it westward from the valley of *Fayoum*, arrived at the close of the fourth day on the brink of what he calls the *Elloah*, that is, the *Ehwah* or Oasis. He describes it as a valley surrounded with high rocks, forming a spacious plain of twelve or fourteen miles in length, and about six miles in breadth. There is only a small portion cultivated at present, but there are many proofs remaining that it must at one time have been all under crop, and that, with proper management, it might again be easily rendered fertile. Here also the traveller found a fountain, the waters of which resembled, in their changes of temperature at different times of the day, the famous *Fons Solis* in the Oasis of Ammon. It is now ascertained that such fountains are not peculiar to any one of the Oases, having been discovered in various parts of the Libyan desert. The change, in fact, takes place in the surrounding atmosphere.—The Oasis of Ammon, called by the Arabs *Siwah*, has already been partially alluded to under the article Ammon. It is situated in lat. 29° 12' N., and in longitude 26° 6' E., being about six miles long, and between four and five in width, the nearest distance from the river of Egypt not exceeding one hundred and twenty miles. A large proportion of the land is occupied by date-trees; but the palm, the pomegranate, the fig, the olive, the vine, the apricot, the plum, and even the apple, are said to flourish in the gardens. No soil can be more fertile. Tepid springs, too, holding salts in solution, are numerous throughout the district; and it is imagined that the frequency of earthquakes is connected with the geological structure of the surrounding country. The ruins of the temple of Ammon are described as still very imposing; and nearly a mile from these ruins, in a pleasant grove of date-palms, is still discovered the celebrated Fountain of the Sun, dedicated of old to the Ammonian deity. (*Vid. Ammon*.) The interest of the traveller is still farther excited by a succession of lakes and remains of temples, which stretch into the desert far towards the west; all rendered sacred by religious associations, and by the traditional legends of the native tribes. Tombs, catacombs, churches, and convents are scattered over the waste, which awaken the recollections of the Christian to the early history of his belief, and which, at the same time, recall to the pagan and Mohammedan events more interesting than are to be found in the vulgar annals of the human race, or can touch the heart of any one but those who are connected with a remote lineage by means of a family history. At a short distance from the sacred lake there is a temple of Roman or Greek construction, the architecture of which is executed with much care and precision, a circumstance which cannot fail to excite surprise in a country surrounded by the immense deserts of Libya, and at the distance of not less than 400 miles from the ancient limits of civilization. In the consecrated territory of that mysterious land is the salt lake of *Ara-shieh*, distant two days and a half from *Siwah*, in a valley enclosed by two mountains, and extending from six to seven leagues in circumference. So holy is it esteemed, that M. Caillaud could not obtain permission to visit its banks. Even the pacha's firman failed to alter the determination of the sheiks on this essential point. They declared that they would sooner perish than suffer a stranger to approach that sacred island, which, according to their belief, contained treasures and talismans of mysterious power. It is said to possess a temple, in which are the seal and sword of the prophet, the palladium of their independence, and not to be seen by any profane eye. A reasonable doubt may however be entertained as to these assertions; for M. Drovetti, who accompanied a detachment of troops under Hassan Bey, walked round the borders of the lake, and observed nothing in its bosom but naked rocks. Mr. Browne, too, remarks that he found mis-

shapen rocks in abundance, but nothing that he could positively decide to be ruins; it being very unlikely, he adds, that any should be there, the spot being entirely destitute of trees and fresh water. Major Rennell has employed much learning to prove that the Oasis of *Sivak* is the site of the famous temple of Jupiter Ammon. He remarks that the variations between all the authorities, ancient and modern, amount to little more than a space equal to twice the length of the Oasis in question, which is, at the utmost, only six miles long. "And it is pretty clearly proved," he remarks, "that no other Oasis exists in that quarter, within two or more days' journey; but, on the contrary, that *Sivak* is surrounded by a wide desert: so that it cannot be doubted that this Oasis is the same with that of Ammon, and the edifice found there the remains of the celebrated temple whence the oracles of Jupiter Ammon were delivered." (*Geogr. of Herodotus*, vol. 2, p. 230, ed. 1830.)—The *Western Oasis*, as it is termed, was visited in the year 1819 by Sir A. Edmonstone, in company with two friends. Having joined a caravan of Bedouins at Beni Ali, and entered the Libyan desert, they proceeded towards the southwest. At the end of six days, having travelled about one hundred and eighty miles, they reached the first village of the Western Oasis, which is called Bel-lata. The principal town of the Oasis, however, is *El Cazar*. The situation of this last-mentioned place is said to be perfectly lovely, being on an eminence at the foot of a line of rock which rises abruptly behind it, and encircled by extensive gardens filled with palm, scasia, citron, and various other kinds of trees, some of which are rarely seen even in those regions. The principal edifice is an old temple or convent called *Daer el Hadjin*, about fifty feet long by twenty-five wide, but presenting nothing either very magnificent or curious. The Oasis is composed of twelve villages, of which ten are within five or six miles of each other. The prevailing soil is a very light red earth, fertilized entirely by irrigation. The latitude of this Oasis is nearly the same as that of the Great Oasis, or about 26° north. The longitude eastward from Greenwich may be a little more or less than 28°.—At different distances in the desert, towards the west, are other Oases, the exact position and extent of which are almost entirely unknown to the European geographer. The ancients, who would appear to have had more certain intelligence in regard to this quarter of the globe than is yet possessed by the moderns, were wont to compare the surface of Africa to a leopard's skin; the little islands of fertile soil being as numerous as the spots on that animal.—The fertility of the Oases has always been deservedly celebrated. Strabo mentions the superiority of their wine; Abulfeda and Edrisi the luxuriance of their palm-trees. The climate, however, is extremely variable, especially in winter. Sometimes the rains in the Western Oasis are very abundant, and fall in torrents, as appears from the furrows in the rocks; but the season Sir A. Edmonstone made his visit there was none at all, and the total want of dew in the hot months sufficiently proves the general dryness of the atmosphere. The springs are all strongly impregnated with iron and sulphur, and hot at their sources; but, as they continue the same throughout the whole year, they supply to the inhabitants one of the principal means of life. The water, notwithstanding, cannot be used until it has been cooled in an earthen jar. (*Russell's Egypt*, p. 393, *seqq.*)

OAXES, a river of Crete, said to have derived its name from Oaxes, a son of Apollo. (*Virg., Eclog.*, 1, 66.—*Serv., ad loc.*) It is now the *Myopotamo*, and is apparently one of the most considerable streams in the island. Some, however, identify it with the *Petra*. (*Cramer's Anc. Greece*, vol. 3, p. 381.—*Bischoff und Müller, Wörterb. der Geogr.*, p. 795.)

OAXUS, a town of Crete, on the northern side of the

island, at the mouth, probably, of the Oaxes. It was the capital of a kingdom which had its appropriate sovereign, and was said to have been founded by the Oaxes mentioned in the preceding article. (*Herod.*, 5, 158.—*Serv. ad Virg., Eclog.*, 1, 66.—*Steph. Byz.*, s. v.—*Hierocles*, p. 650.)

OBINGA, a river of Germany, forming the line of separation between Germania Superior and Inferior. According to Spenser, Cluverius, Cellarius, and others, it corresponds to the modern *Aar* or *Ahr*. Mannert, however, and Wilhelm, make it the same with the beginning of the *Upper Rhine* ("den Anfang des Ober-Rheins."—*Mannert, Geogr.*, vol. 8, p. 432.)

OBESQUENS, Julius, a Latin writer, whose era is uncertain. Vossius places him a short period prior to Honorius; but his style indicates an earlier era. Scaliger makes him to have been before the time of St. Jerome; while Saxe assigns him to about 107 A.D. (*G. I. Voss, de Hist. Lat.*, 3, p. 710.—*Saxe, Onomast.*, vol. 1, p. 289.—*Funcc., de veget. L. L. senect.*, 8, 11, *seq.*) He was probably either a Roman or an Italian, and some are inclined to identify him with the M. Livius Obesquens whose name occurs in one of Gruter's inscriptions (*Inscript.*, 241), on the supposition that *Livius* may have been altered to *Julius* in the only MS. that has come down to us of this work. (*Fuhrmann, Handbuch*, vol. 2, p. 490.) Obesquens has left us a work "On Prodigies" (*de Prodigis*), containing a brief account of all the presages remarked at Rome from the consulship of Scipio and Lælius, A.U.C. 453, down to that of Paulus Fabius and Quintus Elius, in the time of Augustus, or A.U.C. 742. The portion of the work which comprehended the history of the first five or six centuries is lost. This production is taken in part from Livy; but it contains, at the same time, some historical details which are nowhere else to be found. It is written in a pure style, and is not unworthy of the Augustan age. The contents, however, are full of absurdity. The best edition is that of Kapp, *Curia*, 1772, 8vo. (*Fuhrmann, Handbuch*, vol. 2, p. 490.—*Schöll, Hist. Lit. Rom.*, vol. 2, p. 465.—*Bähr, Gesch. Röm. Lit.*, p. 658, *seq.*)

OCEANIDES (*Ωκεανίδες*), the Ocean-Nymphs, daughters of Oceanus and Tethys, and sisters of the rivers. Mythologists make them three thousand in number. (*Hes., Theog.*, 364.—*Apollod.*, 1, 2.—*Heyne, not. crit.*, *ad loc.*) From their pretended names, as given by some of the ancient writers, they appear to be only personifications of the various qualities and appearances of water. (*Theog.*, 348.—*Götting, ad loc.*—*Keightley's Mythology*, p. 244.)

OCEANUS, I. the god of the stream Oceanus (*vid.* Oceanus II.), earlier than Neptune. He was the first-born of the Titans, the offspring of Coelus and Terra, or Heaven and Earth. Oceanus espoused his sister Tethys, and their children were the rivers of the earth, and the three thousand Oceanides or Nymphs of Ocean. (*Herod., Theog.*, 337, *seq.*) This is all the account of Oceanus that is given in the Theogony. Homer speaks of him and Tethys as the origin of the gods. (*Il.*, 14, 201, 302.) When Jupiter, he also says, placed his sire in Tartarus, Rhea committed her daughter Jano to the charge of Oceanus and Tethys, by whom she was carefully nurtured. (*Il.*, 14, 202, 303.) The abode of Oceanus was in the West. (*Il.*, 14, 200, 301.) He dwelt, according to Æschylus, in a grotto-palace, beneath his stream, as it would appear. (*Prom. Vinc.*, 300.) In the "Prometheus Bound" of this poet, Oceanus comes borne through the air on a hippo-griff, to console and advise the lofty-minded sufferer; and from the account he gives of his journey, it is manifest that he came from the West.—When Hercules was crossing his stream in the cup of the Sun-god to procure the oxen of Geryon, Oceanus rose, and, by agitating his waters, tried to terrify him; but, on the hero's bending his bow at him, he retired. (*Phærec.*,

ap. Athen., 11, p. 470.—*Keightley's Mythology*, p. 51, *seq.*)—II. Besides being the name of a deity, the term Oceanus (Ὠκεανός) occurs in Homer in another sense also. It is made to signify an immense stream, which, according to the rude ideas of that early age, circulated around the terraqueous plain, and from which the different seas ran out in the manner of bays. This opinion, which is also that of Eratosthenes, was prevalent even in the time of Herodotus (4, 36). Homer terms the ocean ἀπὸρροος, because it thus flowed back into itself. (*Mus. Crit.*, vol. 1, p. 254.) This same river Oceanus was supposed to ebb and flow thrice in the course of a single day, and the heavenly bodies were believed to descend into it at their setting, and emerge from it at their rising. Hence the term Ὠκεανός is sometimes put for the horizon (*Damm. Lex.*, s. v. ὁ ὀρίων καὶ ἀπορρέων τὸ ὑπὲρ γῆς καὶ ὑπὸ γῆν ἡμισφαίριον.) In Homer, therefore, Ὠκεανός andθάλασσα always mean different things, the latter merely denoting the sea in the more modern acceptation of the term. On the shield of Achilles the poet represents the Oceanus as encircling the rim or extreme border of the shield, in full accordance with the popular belief of the day; whereas in Virgil's time, when this primitive meaning of the term was obsolete, and more correct geographical views had come in, we find the sea (the idea being borrowed, probably, from the position of the Mediterranean) occupying in the poet's description the centre of the shield of Æneas. If it be asked whether any traces of this peculiar meaning of the term Ὠκεανός occurs in other writers besides Homer, the following authorities, in favour of the affirmative, may be cited in reply. *Hesiod. Theog.*, 242.—*Id.*, *Herc. Clyp.*, 314.—*Eurip.*, *Orest.*, 1369.—*Orph.*, *Hymn.*, 10, 14.—*Id.*, *H.*, 82.—*Id.*, *fragm.*, 44.—(*Malby, ad Morell.*, *Thea.*, s. v. Ὠκεανός.—Compare *Völcker, Homerische Geographie*, p. 86, *seq.*) As regards the etymology of the term Ὠκεανός, we are left in complete uncertainty. The form ὠγῆνος occurs in Pherecydes (*Clem. Alex., Strom.*, 6, p. 621.—*Sturz, ad Pherecyd.*), from which it appears to some that the root was connected with the Greek γέα, γῆ (ἡ-γέα-νος, ἡ-γῆ-νος). On the other hand, Munter (*Rel. der Karthager*, p. 68) finds the root of ὠγῆνος in the Hebrew *hug*, "in orbem ire," as referring to the circular course of the fabled Oceanus. Creuzer is inclined to consider ὠγῆνος as equivalent to παλαιός, "antiquus." (*Creuzer und Hermann, Briefe*, p. 160.) It is remarkable that one of the oldest names of the Nile among the Greeks was Ὠκεανός (*Tzetz. ad Lycophron.*, 119), or, more correctly, perhaps, Ὠκεμή (*Diod. Sic.*, 1, 19.—Compare *Ritter's Erdkunde*, vol. 1, p. 570, 2d ed.) Now in the Coptic, according to Champollion, *oukamé* means "black," "dark;" and according to Marcel, *ochemaux*, in the same language, denotes "a great collection of water." Will either of these give Ὠκεανός as a derivative? The one or the other of them seems connected in some way with the Arabic *Kāmus*, "ocean." (*Ritter, loc. cit.*) Perhaps, however, the most satisfactory derivation for the term Oceanus is that alluded to in the article Ogyges.

OCELLUS, surnamed Lucanus, from his having been a native of Lucania, a Pythagorean philosopher, who flourished about 480 B.C. He wrote many works on philosophical subjects, the titles of which are given in a letter written by Archytas to Plato, which has been preserved by Diogenes Laertius (8, 80). But the only production of his which has come down to us, is "On the Nature of the Universe" (Περὶ τῆς τοῦ παντὸς φύσεως). Its chief philosophical topic is to maintain the eternity of the universe. Ocellus also attempts to prove the eternity of the human race (c. 3, s. 3). These works were, without doubt, written in the Doric dialect, which prevailed in the native country of Ocellus; and hence much surprise

has been occasioned by the circumstance of the last of these productions, which we still possess, being in Ionic Greek. In consequence of this discrepancy, Barth (*Advers.*, l. 42, c. 1, p. 1867), Parker (*Disp. de Deo et Provid.*, 1678.—*Disp.*, 4, p. 355), Thomas Burnet (*Archæol. Philos.*, p. 152), and Meiners (*Philolog. Biblioth.*, vol. 1, pt. 3, p. 100 et 204.—*Hist. Doctr. de vero Deo*, p. 312.—*Gesch. der Wissensch.*, p. 584), have attacked the authenticity of the work in question: while, on the other hand, Bentley (*Phalaris*, p. 307, ed. 1816), Lipsius (*Manud. ad Stoic. Phil.*, l. 1, diss. 6), Adelung (*Gesch. der Philosophie für Liebhaber*), Tiedemann (*Griechenl. erste Philosophen*, p. 198 et 209), and Bardili (*Epochen der vorzügl. philos. Begriffe*, vol. 1, p. 165), declare in favour of the work. These conflicting opinions have been carefully examined and weighed by Rudolphi, in a Dissertation appended to his edition of the work, and he comes to the conclusion that the treatise in question was written by Ocellus. It would appear that some grammarians of subsequent ages, in copying the text of Ocellus, caused the Doric forms to disappear, and translated the work, so to speak, into the more common dialect. This idea was first started by Bardili, and what tends to clothe it with almost absolute certainty is, that the fragments of the same work which we meet with in the selections of Stobæus have preserved their original Doric form. And yet it must at the same time be acknowledged, that this production of Ocellus is only cited for the first time by the writers of the second century of our era, and at a period when the New-Pythagoreans began to forge works under the guise of celebrated names.—The best edition is that of Rudolphi, *Lips.*, 1801, 8vo. The edition of Batteux, Paris, 1768, 3 vols. 12mo, is also a very good one. Batteux corrected the text after two Paris MSS., and Rudolphi availed himself of Siebenkæe's collation of a Vatican MS. Gale has placed the work of Ocellus in his *Opuscula Mythologica*, &c., *Canab.*, 1671. (*Schöll, Hist. Lit. Gr.*, vol. 2, p. 311, *seqq.*)

OCELLUM, I. a city in Hispania Tarraconensis, in the territory of the Vettones, now *Formoselle*.—II. A city in Hispania Tarraconensis, in the territory of the Gallaici.—III. A city of Gallia Cisalpina, among the Cottian Alps, on the eastern borders of the kingdom of Cottius. According to Mannert, it is now *Avigliana*, a small town with a castle, in Piedmont, not far from Turin. (*Cas.*, B. G., 1, 10.)

OCHUS, a surname or epithet applied to Artaxerxes III., and also to Darius II., kings of Persia. It is generally thought to indicate illegitimate birth, and to be equivalent to the Greek Νόθος (*Nothus*). This explanation is opposed, however, by some Oriental scholars, who deduce the term *Ochus* from the Persian *Ochi* or *Achi*, which they make equivalent to the Latin *dignus* or *majestate dignus*. (Consult *Gesenius, Lex. Hebr.*, s. v. *Achas*.—*Bähr, ad Ctes.*, p. 185.) The reign of Artaxerxes Ochus has been noticed elsewhere (*vid. Artaxerxes III.*), that of Darius Ochus, or Darius II., will now be given. This prince was the illegitimate son of Artaxerxes Longimanus. Soon after the murder of Xerxes II., Darius succeeded in deposing Sogdianus, and ascended the throne himself, B.C. 423. By his wife Parysatis he had Artaxerxes Mnemon and Cyrus the Younger. Nothing very remarkable occurred during his reign, but some successful wars were carried on under Cyrus and other generals. He died B.C. 404, after a reign of nineteen years, and was succeeded by his son Artaxerxes, who is said to have asked him, on his death-bed, by what rule he had acted in his administration, that he might adopt the same, and find the same success. The king's answer is said to have been, that he had always kept, to the best of his knowledge, the strict path of justice and religion. (*Xen., Anab.*, 1, 1.—*Diod. Sic.*,

12, 71.—*Justin*, 5, 11.)—II. A river of Bactriana, rising in the mountains that lie northward of the source of the Arius, and falling into the Oxus. (*Plin.*, 6, 17.) Mannert makes it the modern *Dehaeck*.—(*Consult Wahl, Mittel und Vorder Asien*, vol. 1, p. 753.—*Ritter, Erdkunde*, vol. 2, p. 22.)

OCNUS, son of Manto, and said by some to have founded Mantua. (But *vid. Mantua*.)

OCRICULUM, a town of Umbria, below the junction of the Nar and Tiber, and a few miles from the bank of the latter river, now *Otricoli*. According to Livy (9, 41), it was the first city of Umbria which voluntarily submitted to Rome. Here Fabius Maximus took the command of the army under Servilius, and bade that consul approach his presence without lictors, in order to impress his troops with a due sense of the dictatorial dignity. (*Liv.*, 22, 11.) Otriculum suffered severely during the social war. (*Flor.*, 3, 18.) In Strabo's time it appears, however, to have been still a city of note (*Strab.*, 227), a fact which is confirmed by the numerous remains of antiquity which have been extracted from its ruins. From Cicero we collect that Milo had a villa in its vicinity. (*Orat. pro Mil.*—*Cramer's Anc. Italy*, vol. 1, p. 278.)

OCTAVIA, I. daughter of Caius Octavius and Accia, and sister to the Emperor Augustus. All the historians praise the beauty and virtues of this celebrated female. She was first married to Marcus Marcellus, a man of consular rank, and every way worthy of her; and after his death she became the wife of Marc Antony, this latter union being deemed essential to the public welfare, as a means of healing existing differences between Antony and Octavius. It was with this view that the senate abridged the period of her widowhood and of her mourning for her first husband, who had been dead little more than five months. Antony, however, was incapable of appreciating the excellence of her character. After her marriage she followed him to Athens, where she passed the winter with him (B.C. 39), though keeping far aloof from the dissolute pleasures to which he abandoned himself. Without her interposition, civil war would even then have broken out between Octavius and Antony. By urgent prayers she appeased her husband, who was incensed against her brother for his suspicions, and then, disregarding the difficulties of the journey and her own pregnancy, she went with his consent from Greece to Rome, and induced her brother to consent to an interview with Antony, and to come to a reconciliation with him. When Antony went to make war against the Parthians, she accompanied him to Corcyra, and at his order returned thence to remain with her brother. New quarrels arose between Octavius and Antony. To have a pretext for a rupture, the former ordered his sister to go to her husband, in the expectation that he would send her back. This actually happened. Antony was leading a life of pleasure with Cleopatra at Leucopolis, when letters from Octavia at Athens informed him that she would soon join him with money and troops. The prospect of this visit was so unwelcome to Cleopatra, that she persisted in her entreaties until Antony sent his wife an order to return. Even now, however, she endeavoured to pacify the rivals. Octavius commanded her to leave the house of a husband who had treated her so insultingly; but, feeling her duties as a wife and a Roman, she begged him not, for the sake of a single woman, to destroy the peace of the world, and of two persons so dear to her, by the horrors of war. Octavius granted her wish; she remained in the house of Antony, and occupied herself with educating, with equal care and tenderness, the children she had borne him, and those of his first wife Fulvia. This noble behaviour of hers increased the indignation of the Romans against Antony. At last he divorced her, and ordered her to leave his mansion at Rome. She obeyed without complaint, and

took with her all her children except Antillas, her eldest son, who was then with his father. The civil war soon after broke out.—On the overthrow and death of Antony, Octavia gave herself up to complete retirement. Her son Marcellus, the issue of her first marriage, was united to Julia, the daughter of Augustus, and intended by the emperor as his successor; but his early death frustrated this design, and plunged his mother and friends in the deepest affliction. It was on Virgil's reading to Octavia and Augustus the beautiful passage towards the close of the sixth book of the *Æneid*, where the premature death of Marcellus is deplored, that the poet received from the sorrowing parent so splendid a recompense. (*Vid. Virgilius*.) Octavia, in fact, never recovered from the loss of her son. His death continually preyed upon her mind, and she at last ended her days in deep melancholy, about 12 B.C. Augustus pronounced her funeral oration, but declined the marks of honour which the senate were desirous of bestowing upon her. (*Sueton., Vit. Jul.*, 27.—*Id.*, *Vit. Aug.*, 17.—*Id. ib.*, 61.—*Plut., Vit. Ant.*, 88.—*Encycl. Am.*, vol. 9, p. 367.)—II. A daughter of the Emperor Claudius by Messalina, and sister to Britannicus. Her life, though short, offers only one series of misfortunes. While still quite young, she was affianced to Lucius Silanus, the grandson of Augustus; but Agrippina, availing herself of her influence over the imbecile Claudius, broke off the match, and gave Octavia to her own son Nero, when the latter had attained his sixteenth year. Nero, on ascending the throne, repudiated Octavia on the ground of sterility, but, in reality, that he might unite himself to Poppæa; and this latter female, dreading the presence of one who was still young and beautiful, and her possible influence at some future day over the capricious feelings of the emperor, accused Octavia of criminal intercourse with a slave. Some pretended testimony having been obtained by means of the torture, Octavia was banished to Campania. The murmurs of the people, however, compelled Nero to recall her from exile, and her return was hailed by the populace with every demonstration of joy. Alarmed at this, and fearing lest the recall of Octavia might prove the signal of her own disgrace, Poppæa threw herself at the feet of Nero, and begged him to revoke the order for Octavia's return. The emperor granted more than she asked; for he caused the infamous Anicetus, the author of his mother's murder, to come forward and testify falsely to his criminality with Octavia. The unhappy princess, upon this, was banished to the island of Pandataria, and soon after put to death there. Her head was brought to Poppæa. Octavia was only twenty years of age at the time of her death. (*Tacit., Ann.*, 24, 68.—*Sueton., Vit. Ner.*, 35.)

OCTAVIANUS, the name of Octavius (afterward Augustus), which he assumed on his adoption into the Julian family, in accordance with the Roman custom in such cases. Usage, however, though erroneous, has given the preference to the name *Octavius* over that of *Octavianus*. (*Cic., Ep. ad Fam.*, 12, 25.—*Tacit., Ann.*, 13, 6.—*Aurel. Vict., de Cas.*, c. 1.)

OCTAVIUS, I. Nepos, Cn., was prætor B.C. 168, and appointed to the command of the fleet against Perseus. He followed this monarch, after his defeat by Paulus Æmilius, to the island of Samothrace, and there obtained his surrender. For this he was rewarded with a naval triumph. (*Liv.*, 44, 17.—*Id.*, 44, 45.—*Id.*, 45, 6.—*Id.*, 45, 42.) In B.C. 165 he was consul with M. Torquatus. Having been sent, three years after this, into Syria, at the head of a deputation to act as guardians to the young king, Antiochus Eupator, he was assassinated by order, as was supposed, of Lysias, a relation of the previous monarch, and who claimed the regency during the minority of Antiochus. The arrogant and haughty conduct of Octavius appears to have hastened his fate. The senate, however, erected

a statue to his memory.—II. M., a tribune of the commons, deprived of his office by means of Tiberius Gracchus. (*Vid.* Gracchus II.)—III. Cn., was consul B.C. 87, along with Cinna. Being himself attached to the party of Sylla, and having the support of the senate, he drove his colleague out of the city. Marius, however, having returned this same year and re-entered Rome with Cinna, Octavius was put to death.—IV. C., the father of Augustus, was prætor B.C. 81, and distinguished himself by the correctness and justice of his decisions. After his prætorship he was appointed governor of Macedonia, and defeated the Pæsi and other Thracian tribes, for which he received from his soldiers the title of *Imperator*. He died at Nola, on his return from his province. Octavius married Atia, the sister of Julius Cæsar, and had by this union Octavian (afterward Augustus) and Octavia, the wife of Antony.—V. The earlier name of the Emperor Augustus. (*Vid.* Augustus and Octavianus.)

OCTODŪRUS, a town of the Veragri, in Gallia Narbonensis. It was situate in the Vallis Pennina, on the river Dransa or *Drance*, near its junction with the *Rhone*, at a considerable distance above the influx of the latter into the Lacus Lemanus or *Lake of Geneva*. It is now *Martigni*, or, as the Germans call it, *Martench*. (*Cæs.*, B. G., 3, 1.)

OCTOGĒSA, a town of Spain, a little above the mouth of the Iberus, on the north bank of that river, where it is joined by the Sicoris. It is commonly supposed to answer to the modern *Meguinenza*. Ukert, however, places it in the territory of *la Granja*. (*Cæs.*, *Bell. Civ.*, 1, 61.)

OCYRĒTE, one of the Harpies. The name signifies *swift-flying*, from *ὠκύς*, "*swift*," and *πτερομαί*, "*to fly*." (*Vid.* Harpyiæ.)

ODENATUS, a celebrated prince of Palmyra, in the third century of the Christian era, who distinguished himself by his military talents and his attachment to the Romans. The accounts of his origin differ. Agathias makes him of mean descent; but the statements of others are entitled to more credit, according to whom he exercised hereditary sway over the Arab tribes in the vicinity of Palmyra. These same writers inform us, that his family had for a long time back been connected by treaties with the Romans, and had received from the latter not only honorary titles, but also subsidies for protecting the frontiers of Syria. That there existed, indeed, some sort of alliance between this family and the Roman power, is evident from the name *Septimius*, which was borne by some of his predecessors as well as by Odenatus himself, and which would carry us back probably to the time of Septimius Severus, who resided a long time in Syria, and from whom the honorary appellation may have been obtained. (*Saint-Martin*, in *Biog. Univ.*, vol. 31, p. 494, *seqq.*)—The manner in which Odenatus attained to the supremacy in Palmyra is not very clearly stated. He appears, independently of his sway over the adjacent tribes, to have held at first the office of decurio or senator in the city itself. When Philip the Arabian proclaimed himself emperor, after the murder of the younger Gordian, A.D. 244, and had set out for Rome, he left the government of Syria in the hands of his brother Priscus. The tyranny and oppression of the latter soon caused a general revolt. Palmyra from this time assumed the rank of an independent city; and we find Septimius Airanes, father of Odenatus, ruling over it as sovereign prince, A.D. 251. He was succeeded by his son, the subject of this article. (*Saint-Martin*, l. c.) Odenatus was twice married. The name and family of his first wife are not known. He had by her a son called Septimius Orodas. His second wife was the celebrated Zenobia, daughter of an Arabian prince, or sheik, who held under his sway all the southern part of Mesopotamia. By Zenobia he became the father of two sons, Herennius

and Timolaus. Zenobia herself had also a son by a previous husband.—After the defeat and capture of Valerian by the King of Persia, Odenatus, desirous at least to secure the forbearance of the conqueror, sent Sapor a magnificent present, accompanied by a letter full of respect and submission; but the haughty monarch, instead of being softened by this expression of good-will, ordered the gift to be thrown into the Euphrates, and returned an answer breathing the utmost contempt and indignation. The Palmyrian prince, who read his fate in the angry message of Sapor, immediately took the field, and falling upon the enemy, who had already been driven across the Euphrates by the Roman general Balista, gained a decisive advantage over their main body. He then burst into their camp, seized the treasures and the concubines of Sapor, dispersed the intimidated soldiers, and in a short time restored Carthæ, Nisibis, and all Mesopotamia to the possession of the Romans. Trebellius Pollio informs us, that he even proceeded so far as to lay siege to Ctesiphon, with the view of liberating Valerian, who was still alive, but that neither his arms nor his entreaties could effect this benevolent object. (*Treb. Poll.*, *Trigint. Tyrann.*, 13.—*Zonar.*, 12, 23.—*Zosim.*, lib. 1, p. 861.) The Palmyrian prince then turned his arms against Quietus, son of Macrinus, and a candidate for the empire, and overthrew his party in the East. As a recompense for these important services, and his constant attachment to Gallienus, the son of Valerian, the senate, with the consent of the emperor, conferred on Odenatus the title of Augustus, and intrusted him with the general command of the East. Zenobia also received the title of Augusta, and Orodas, Herennius, and Timolaus that of Cæsars. Odenatus signalized his attainment to these honours by new successes; and by one of the writers of the Augustan history, his name is connected with the repulse of the Goths, who had landed on the shores of the Euxine, near Heraclea. (*Treb. Poll.*, *Gallieni Duo*, c. 12.) Of this fact, however, there remains no satisfactory evidence; but it admits not of any doubt that the sovereign of Palmyra fell soon afterward by the hand of domestic treason, in which his queen Zenobia was suspected to have had a share. The murderer was his own nephew. His son Orodas was slain along with him. (*Treb. Poll.*, l. c.)

ODESSUS, a city on the coast of Mæsia Inferior, to the east of Marcianopolis. It was founded by a colony of Milesians, and is now *Varna* in Bulgaria. It was also called Odesopolis. Some editions of Ptolemy give the form *Ὀδύσσος* (*Odyssus*), and in the *Itin. Ant.* (p. 218) Odissus occurs. (*Mela*, 2, 2.—*Pliny*, 11.—*Strab.*, 1, 9, 37.)

ODĒUM, a musical theatre at Athens. (*Suidas*, s. v. *Ὀδίων*.—*Aristoph.*, *Vesp.*, 1104.) It was built by Pericles (*Plut.*, *Vit. Pericl.*—*Vitruv.*, 5, 9), and was so constructed as to imitate the form of Xerxes' tent. (*Plut.*, *Vit. Per.*) This shape gave rise to some pleasantries on the part of the Athenians. Thus, for example, Cratinus, in one of his comedies, wishing to express that the head of Pericles terminated as it were in a point, said that he carried the Odeum on his head. (Compare *Plut.*, l. c.) This building was destroyed by fire at the siege of Athens by Sylla. It was re-erected soon after by Ariobarzanes, king of Cappadocia. (*Pausan.*, 1, 20.)

ODINUS or ODIN, the principal deity of the ancient Scandinavians and Northern Germans. Other forms for the name were *Wodan*, *Guodan*, *Godan*, *Vothin*, *Othin*, &c. Among the Anglo-Saxons, Wodan was the god of merchants, corresponding to the Hermes of the Greeks or the Mercurius of the Latins. The fourth day of the week derived its name from him (*Wodanstag*). In the account of the origin of the world, as given in the older Edda, Odin, the eldest son of Bœr, the second man, is represented as having, with his two

brothers, Vilé and V6, defeated and slain the frost-giant Ymer, out of whose body they formed the habitable world. Some exponents of mythology make Odin and his brethren, together with their antagonist, as set forth in this fable, to be mere personifications of the elements of the world.—But there is another and a younger Odin, who, according to some writers, is partly a mythological and partly an historical personage. In all the Scandinavian traditions preserved by the chroniclers, mention is made of a chief called Odin, who came from Asia with a large host of followers called *Aser* (*vid. Asi*), and conquered Scandinavia, where they built a city by the name of Sigtuna, with temples, and established a worship and a hierarchy; he also invented or brought with him the characters of the Runic alphabet; he was, in short, the legislator and civilizer of the North. He is represented also as a great magician, and was worshipped as a god after death, when some of the attributes of the elder Odin are supposed to have been ascribed to him. The epoch of this emigration of Odin and his host is a subject of great uncertainty. Some place it in the time of the Scythian expedition of Darius Hystaspis: others (and this has been the most common opinion among Scandinavian archaeologists) fix it about the time of the Roman conquests in Pontus, 50 or 60 B.C. Sühm, in his "*Geschichte der Nordischen Fabelzeit*," enumerates four Odins. One was B6r's son; he came from the mouths of the Tanais, and introduced into the North the worship of the Sun. A second came with the Aser, from the borders of Europe and Asia, at the time of the invasion of Darius. He brought with him the Runic alphabet, built temples, and established the mythology of the Edda: he is called Mid Othin, or Mittel Othin. A third Odin, according to Sühm, fled from the borders of the Caucasus at the time of Pompey's conquests, 50 or 60 years B.C. The fourth Odin he makes to have lived in the third or fourth century of our era. All this, however, is far from being authenticated; though the north-western emigration of Odin from the borders of the Caucasus to Scandinavia has the support of a uniform tradition in its favour. Odin was worshipped by the German nations until their conversion to Christianity. (*Encycl. Us. Knowl.*, vol. 16, p. 400.)—The legend of Odin evidently points to the introduction of religious rites and ceremonies among the northern nations by some powerful leader from the East, who was himself, in some degree, identified after death with the deity whose worship he had brought in with him. This deity appears to have been none other than the Buddha of the East, just as the traditions of the North respecting the Aser connect the mythology of Scandinavia in a very remarkable manner with that of Upper Asia. (*Vid. Asi*.) The striking resemblance that exists between Buddha and Odin, not only in many of their appellations, but also in numerous parts of their worship, has been fully established by several Northern writers. (Consult *Magnusen, Eddalæren og dens Oprindelse*, vol. 4, *præf. v.*, *seqq.*—*Id. ib.*, vol. 4, p. 474, 478, *seqq.*; 512, *seqq.*; 534, *seqq.*; 541, *seqq.*—*Palmblad, de Buddha et Wodan, Upsal*, 1822, 4to.—*Wallman, om Odin och Buddha, Holm.*, 1824, 8vo.—Compare *Ritter, Vorhalle*, p. 472.—*Sir W. Jones, Asiatic Researches*, vol. 1, p. 511.—*Id. ib.*, vol. 2, p. 343.) One feature, however, in which these two deities approximate very closely, is too remarkable to be here omitted. The same planet, namely, Mercury, is sacred to both; and the same day of the week (Wednesday) is called after each of them respectively. Thus we have the following appellations for this day among the natives of India: in the Birman, *Buddahut*: in the Malabaric, *Buden-kirumei*, &c. So again, some of the names given to Buddha coincide very closely with those of Odin. Thus we may compare the *Godama*, *Gotama*, and *Samana-Codam* of the former, with the *Godan*, *Gutan*, *Gaudan*, &c., of the latter. (The Westphalians

still call Wednesday *Godenstag*.) We may even advance a step farther, and compare the names of both Odin and Buddha with one of the earliest appellations of Deity among many nations of Asia and Europe. Thus we have in Sanscrit, *Coda*; in Persian, *Choda*, *Chuda*, and *Ghuda*; in the language of the Kurds, *Chudi*; in that of the Afghans, *Chudas*; in the Gothic and German, *God* and *Gott*; in the Icelandic and Danish, *Gud*, &c. It is curious to observe, moreover, that traces of the worship of Odin or Buddha appear even in America. Among the ancient traditions collected by the Spanish bishop Nunez de la Vega, there is one which was current among the Indians of Chiapas respecting a certain *Wodan* or *Votan*. This individual is said to have been the grandson of one who, together with his family, was alone saved from a universal deluge. He aided in the erection of a great edifice, by which men attempted to reach the skies; but the execution of this daring project was frustrated; each family of men received a different language; and the Great Spirit (*Teotl*) ordered Wodan to go and people the country of Anahuac, or Mexico. This same Wodan, moreover, like Odin and Buddha, gave name to a particular day. So strong, indeed, does the resemblance between Odin and the Mexican Wodan appear, that even Humboldt himself hesitates not to use the following language in relation to it: "*Ce Votan, ou Wodan, Americain paroit de la même famille avec les Wods ou Odins des Goths et des peuples d'origine Celtique.*" (*Monumens de l'Amérique*, vol. 1, p. 382.) It would appear, then, from all that has been said, that the worship of Odin or Buddha is to be referred in its origin to the earliest periods of the history of our race, these names being nothing more than early appellations for Deity, and being afterward shared also by those individuals who had spread this particular worship over different parts of the earth. (Consult *Magnusen, Mythol. Boreal. Lex.*, p. 261, *seqq.*—*Niemeyer, Sagen, betreffend Othin, &c., Erf.*, 1821, 8vo.—*Leo, über Othin's Verehrung in Deutschland, Erl.*, 1822, 8vo.—*Klemm, Germ. Alterthumsk.*, p. 290, *seqq.*)

ODOACER, a Gothic chief, who, according to some authorities, was of the tribe of the Heruli. He originally served as a mercenary in the barbarian auxiliary force which the later emperors of the West had taken into their pay for the defence of Italy. After the two rival emperors, Glycerius and Julius Nepos, were both driven from the throne, Orestes, a soldier from Pannonia, clothed his own son Romulus, yet a minor, with the imperial purple, but retained all the substantial authority in his own hands. The barbarian troops now asked for one third of the lands of Italy, to be distributed among them as a reward for their services. Orestes having rejected their demand, they chose Odoacer for their leader, who immediately marched against Orestes, who had shut himself up in Ticinum or Pavia. Odoacer took the city by storm, and gave it up to be plundered by his soldiers. Orestes himself was taken prisoner, and led to Placentia, where he was publicly executed, A.D. 475, exactly a twelvemonth after he had driven Nepos out of Italy. Romulus, who was called Augustulus by way of derision, was in Ravenna, where he was seized by Odoacer, who stripped him of his imperial ornaments, and banished him to a castle in Campania, but allowed him an honourable maintenance. Odoacer now proclaimed himself King of Italy, rejecting the imperial titles of Cæsar and Augustus. For this reason the Western empire is considered as having ended with the deposition of Romulus Augustulus, the son of Orestes. Odoacer's authority did not extend beyond the boundaries of Italy. Little is known of the events of his reign until the invasion of Theodoric, king of the Ostrogoths, who, at the instigation, as some historians assert, of Zeno, emperor of the East, marched from the banks of the Danube to

dispossess Odoacer of his kingdom. Theodoric, at the head of a large army, defeated Odoacer near Aquileia, and entered Verona without opposition. Odoacer shut himself up in Ravenna, A.D. 489. The war, however, lasted for several years; Odoacer made a brave resistance, but was compelled by famine to surrender Ravenna, A.D. 493. Theodoric at first spared his life, but in a short time caused him to be put to death, and proclaimed himself King of Italy. (*Encycl. Us. Knowl.*, vol. 16, p. 400.)

ODRYÆ, one of the most numerous and warlike of the Thracian tribes. Under the dominion of Sitalces, a king of theirs, was established what is called in history the empire of the Odryæ. Thucydides, who has entered into considerable detail on this subject, observes, that of all the empires situated between the Ionian Gulf and the Euxine, this was the most considerable, both in revenue and opulence. Its military force was, however, very inferior to that of Scythia both in strength and numbers. The empire of Sitalces extended along the coast from Abdera to the mouths of the Danube, a distance of four days' and nights' sail; and in the interior, from the sources of the Strymon to Byzantium, a journey of thirteen days. The first founder of this empire appears to have been Teres. (*Herod.*, 7, 137.—*Thucyd.*, 2, 29.) For farther remarks on the Odryæ, see the article Thracia.

ODYSSEA, I. a city of Hispania Bætica, north of Abdera, among the mountains. It was founded, according to a fabulous tradition, by Ulysses. (*Posidon.*, *Artemidor.*, *Asclep.*, *Myrl.*, ap. *Strab.*, 149.—*Eustath.* ad *Od.*, p. 1379.—*Id.* ad *Dionys. Perieg.*, 281.—*Steph. Byz.*, s. v.—*Tzschucke ad Mel.*, 3, 1, 6.) Some have supposed it to be the same with Olisippo or Ulysippo (now *Lisbon*), and very probably we owe Odyssea to the same fabulous legend which assigns Ulysses as the founder of Ulysippo. There must have been a town in Bætica, the name of which, resembling in some degree the form Odyssea (*Ὀδυσσεα*), the Greeks, in their usual way, converted into the latter, and then appended to it the fable respecting a founding by Ulysses. (Consult *Ukert*, *Geogr.*, vol. 2, p. 351.—*Merula*, *Cosmogr.*, pt. 2, l. 2, c. 26.)—II. A promontory of Sicily, near Pachynum, supposed by Fazellus to be the same with the present *Cabo Marzo*. (*Bischoff und Müller*, *Wörterb. der Geogr.*, p. 798.)—III. The second of the two great poems ascribed to Homer. It consists, like the *Iliad*, of twenty-four books; and the subject is the return of Ulysses (*Ὀδυσσεύς*), after the fall of Troy, from a land lying beyond the range of human intercourse or knowledge, to a home invaded by a band of insolent intruders, who seek to rob him of his wife and kill his son. Hence, the *Odyssey* begins exactly at that point where the hero is considered to be farthest from his home, in the island of Ogygia, at the navel, that is, the central part, of the sea; where the nymph Calypso (*Καλυψώ*, "*The Concealer*") has kept him hidden from all mankind for seven years; thence, having, by the help of the gods, who pity his misfortunes, passed through the dangers prepared for him by his implacable enemy, Poseidon or Neptune, he gains the land of the Phæacians, a careless, peaceable, and effeminate nation, to whom war is only known by means of poetry. Borne along by a marvellous Phæacian vessel, he reaches Ithaca sleeping; here he is entertained by the honest swineherd Eumæus, and, having been introduced into his own house as a beggar, he is there made to suffer the harshest treatment from the suitors, in order that he may afterward appear with the stronger right as a terrible avenger. With this simple story a poet might have been satisfied; and we should, even in this form, notwithstanding its smaller extent, have placed the poem almost on an equality with the *Iliad*. But the poet to whom we are indebted for the *Odyssey* in a complete form, has interwoven a second story, by which the poem is rendered much

richer and more complete; although, indeed, from the union of two actions, some roughnesses have been produced, which, perhaps, with a plan of this kind, could scarcely be avoided. While the poet represents the son of Ulysses, stimulated by Minerva, coming forward in Ithaca with newly-excited courage, and calling the suitors to account before the people, and then afterward describes him as travelling to Pylos and Sparta in order to obtain intelligence of his lost father, he gives us a picture of Ithaca and its anarchical condition, and of the rest of Greece in its state of peace after the return of the princes, which produces the finest contrast; and, at the same time, he prepares Telemachus for playing an energetic part in the work of vengeance, which by this means becomes more probable.—The *Odyssey* is indisputably, as well as the *Iliad*, a poem possessing a unity of subject; nor can any one of its chief parts be removed without leaving a chasm in the development of the leading idea; but it differs from the *Iliad* in being composed on a more artificial and more complicated plan. This is the case partly, because, in the first and greater division of the poem, up to the sixteenth book, two main actions are carried on side by side; and partly, because the action, which passes within the compass of the poem, and, as it were, beneath our eyes, is greatly extended by means of an episodical narration, by which the chief action itself is made distinct and complete, and the most marvellous part of the story is transferred from the mouth of the poet to that of the hero himself.—It is plain that the plan of the *Odyssey*, as well as that of the *Iliad*, offered many opportunities for enlargement by the insertion of new passages; and many irregularities in the course of the narration, and its occasional diffuseness, may be explained in this manner. The latter, for example, is observable in the amusements offered to Ulysses when entertained by the Phæacians; and some of the ancients even questioned the genuineness of the passage about the dance of the Phæacians, and the song of Demodocus respecting the loves of Mars and Venus, although this part of the *Odyssey* appears to have been at least extant in the 50th Olympiad (B.C. 580–577), when the chorus of the Phæacians was represented on the throne of the Amyclæan Apollo. (*Pausan.*, 3, 18, 7.) So likewise Ulysses' account of his adventures contains many interpolations, particularly in the *nekya*, or invocation of the dead, where the ancients had already attributed an important passage (which, in fact, destroys the unity and connexion of the narrative) to the *diaskewastæ*, or interpolators; among others, to the Orphic Onomacritus, who, in the time of the Ptolemaic dynasty, was employed in collecting the poems of Homer. (*Schol.* ad *Od.*, 11, 104.) Moreover, the Alexandrine critics, Aristophanes and Aristarchus, considered the whole of the last part (from *Od.* 23, 296, to the end), from the recognition of Penelope, as added at a later period. Nor can it be denied that it has great defects; in particular, the description of the arrival of the suitors in the infernal regions is only a second and feebler *nekya*, which does not precisely accord with the first, and is introduced in this place without sufficient reason. At the same time, the *Odyssey* could never have been considered as concluded until Ulysses had embraced his father Laertes, who is often mentioned in the course of the poem, and until a peaceful state of things had been restored, or begun to be restored, in Ithaca. It is not, therefore, likely that the original *Odyssey* altogether wanted some passage of this kind; but it was probably much altered by the Homerides, until it assumed the form in which we now possess it.—That the *Odyssey* was written *after* the *Iliad*, and that many differences are apparent in the character and manners both of men and gods, as well as in the management of the language, is quite clear; but it is difficult and hazardous to raise upon this foundation any

definite conclusions as to the person and age of the poet. With the exception of the anger of Neptune, who always works unseen in the obscure distance, the gods appear in a milder form; they act in unison, without dissension or contest, for the relief of mankind, not, as is so often the case in the *Iliad*, for their destruction. It is, however, true, that the subject afforded far less occasion for describing the violent and angry passions and vehement combats of the gods. At the same time, the gods all appear a step higher above the human race; they are not represented as descending in a bodily form from their dwellings on Mount Olympus, and mixing in the tumult of the battle, but they go about in human forms, only discernible by their superior wisdom and prudence, in the company of the adventurous Ulysses and the intelligent Telenachus. But the chief cause of this difference is to be sought in the nature of the story, and, we may add, in the fine tact of the poet, who knew how to preserve unity of subject and harmony of tone in his picture, and to exclude everything irrelevant. The attempt of many learned writers to discover a different religion and mythology for the *Iliad* and the *Odyssey*, leads to the most arbitrary dissection of the two poems. M. Constant, in particular, in his celebrated work "*De la Religion*" (vol. 3), has been forced to go to this length, as he distinguishes "*trois espèces de mythologie*" in the Homeric poems, and determines from them the age of the different parts. It ought, however, above all things, to have been made clear how the fable of the *Iliad* could have been treated by a professor of this supposed religion of the *Odyssey*, without introducing quarrels, battles, and vehement excitement among the gods; in which there would have been no difficulty, if the difference of character in the gods of the two poems were introduced by the poet, and did not grow out of the subject. On the other hand, the human race appears, in the houses of Nestor, Menelaüs, and especially of Alcinoüs, in a far more agreeable state, and one of far greater comfort and luxury, than in the *Iliad*. But where could the enjoyments, to which the Atreids, in their native palace, and the peaceable Phæacians could securely abandon themselves, find a place in a rough camp? Granting, however, that a different taste and feeling is shown in the choice of the subject and in the whole arrangement of the poem, yet there is not a greater difference than is found in the inclinations of the same man in the prime of life and in old age; and, to speak candidly, we know no other argument, adduced by the *Chorizontes* both of ancient and modern times, for attributing the wonderful genius of Homer to two different individuals. It is certain that the *Odyssey*, in respect of its plan and the conception of its chief characters, of Ulysses himself, of Nestor and Menelaüs, stands in the closest affinity with the *Iliad*; that it always presupposes the existence of the earlier poem, and silently refers to it; which also serves to explain the remarkable fact, that the *Odyssey* mentions many occurrences in the life of Ulysses which lie out of the compass of the action, but not one which is celebrated in the *Iliad*. If the completion of the *Iliad* and the *Odyssey* seems too vast a work for the lifetime of one man, we may, perhaps, have recourse to the supposition, that Homer, after having sung the *Iliad* in the vigour of his youthful years, communicated in his old age to some devoted disciple the plan of the *Odyssey*, which had long been working in his mind, and left it to him for completion. (*Müller, Hist. Gr. Lit.*, p. 57, *seqq.*)

CEA, I. a town in the island of Ægina, above 20 stadia from the capital. (*Herod.*, 5, 83.)—II. A town in the island of Thera, called also Calliste.—III. A city on the coast of Africa, between the two Syrtis, and forming, together with Sabrata and Leptis Magna, the district called Tripolis. This city first grew up under the Roman sway, and was founded by a colo-

ny consisting of the natives and certain Sicilians intermingled. (Compare *Silius Ital.*, 3, 257.) It was a small place in comparison with the neighbouring Leptis, and yet was able to sustain a contest with this city about their respective boundaries, by the aid of the Garamantes in its vicinity. (*Tacit., Hist.*, 4, 50.) In the reign of Valentinian, the Tripolitan cities were for the first time obliged to shut their gates against a hostile invasion of the savages of Gætulia; and, finding themselves unprotected by the venal commander to whom the defence of Africa was intrusted, they joined the rebellious standard of a Moor. The insurrection was suppressed by the ability of Theodosius, the Roman general. Seventy years after, the whole country was ravaged by the Vandals. In the sixth century, CEA no longer existed, since Procopius, who speaks of the walls of the other cities in Tripoli being rebuilt, passes over CEA in silence. The ruins of the ancient city are said to lie four geographical miles to the east of the modern Tripoli (or, as the natives call it, *Tarables*). Ptolemy writes the name of the city 'Εἰσα (*Eosa*); the Peutinger Table gives *Osa*, and the Antonine itinerary *Œca*. (*Mannert, Geogr.*, vol. 10, pt. 2, p. 135.)

CEIORUS, the father of Orpheus by Calliope. He was king of Thrace, and from him Mount Hæmus, and also Hebrus, one of the rivers of the country, have received the appellation of *Œagrius*, which thus becomes equivalent to "*Thracius*" or "*Thracicus*." (*Ovid, Ib.*, 484.—*Virg., G.*, 4, 524.—*Apollod.*, 1, 3.)

CEBALIA, I. the ancient name of Laconia, which it received from CEBALUS, one of its ancient kings. (*Serv. ad Virg., Georg.*, 4, 125.) Hence *Cebalius* is used by the poets as equivalent to *Laconicus* or *Spartanus*, and is applied to Castor and Pollux ("*Cebali fratres*," *Statius, Sylv.*, 3, 2, 10), to Helen ("*Cebalia pellex*," *Ovid, Rem. Am.*, 458), to Hyacinthus ("*Cebalius puer*," *Martial*, 14, 173), &c.—II. A name applied to Tarentum, because founded by a Spartan colony. (*Plin.*, 3, 11.—*Flor.*, 1, 18.)

CEBALUS, I. a son of Argolius, king of Laconia, which country received from him, among the poets, the name of CEBALIA. He was the father of Tyndarus, and grandfather of Helen. (*Hygin., fab.*, 78.)—II. A son of Teloh, king of Capres, and of the nymph Sebethia. (*Virg., Æn.*, 7, 734.—*Serv., ad loc.*)

CECHALIA, I. a city of Thessaly, in the district of Estimotis. (*Hom., Il.*, 2, 729.) Homer here couples it with Tricca and Ithome, and of course means by it a Thessalian city. Many poets, however, as Strabo observes, not adhering to the Homeric geography, were of opinion that Cechalia was in Eubœa, as Sophocles, for instance, in his *Trachiniae*; while others consigned it to Arcadia or Messenia. (*Strabo*, 438.—*Cramer's Anc. Greece*, vol. 1, p. 362.)—II. A city of Ætolia, belonging to the tribe of Eurytanes. (*Strabo*, 448.)—III. A city of Eubœa, where Eurytus reigned, and which was destroyed by Hercules. But this opinion, which is maintained by many writers, would seem not to have been a well-grounded one, and we ought to look, in all probability, for the Cechalia of Eurytus in Thessaly. (*Vid. Cechalia I.*—*Cramer's Anc. Greece*, vol. 2, p. 139.)—IV. A city of Messenia, according to some the residence of Eurytus. (*Pausan.*, 4, 33.) This is, however, a question which has been much agitated by the commentators on Homer; for, as Strabo remarks, the poet seems to speak of two places of that name, both belonging to Eurytus, one in Thessaly, the other in Messenia; it was from the latter that Thamyris, the Thracian bard, was proceeding on his way to Dorium, another Messenian city, when he encountered the Muses, who deprived him of his art. (*Il.*, 2, 594.) Apollodorus acknowledged only one Cechalia of Eurytus, which he placed in Thessaly; but Demetrius of Scepsis admitted also the Messenian city, which he identified with Andania, a

well-known town of that province on the Arcadian frontier. (*Strabo*, 339.—*Cramer's Anc. Greece*, vol. 3, p. 146, *seqq.*)

ECUMENIUS, an ancient Greek Commentator on the Scriptures. The time at which he lived is uncertain; but it was after the eighth century and before the tenth. He is generally placed in the ninth century; Cave assigns to him the date A.D. 990; Lardner, A.D. 950. ECumenius was bishop of Tricca, and the author of commentaries on the Acts of the Apostles, the fourteen epistles of St. Paul, and the seven Catholic epistles, which contain a concise and perspicuous illustration of these parts of the New Testament. Besides his own remarks and notes, they consist of a compilation of the notes and observations of Chrysostom, Cyrill of Alexandria, Gregory Nazianzen, and others. He is thought to have written also a commentary on the four gospels, compiled from the writings of the ancient fathers, which is not now extant. The works of ECumenius were first published in Greek at Verona in 1532, and in Greek and Latin at Paris in 1631, in 2 vols. fol. To the second volume of the Paris edition is added the commentary of Arethas on the book of Revelations. (Consult *Hoffmann*, *Lex. Bibliogr.*, vol. 3, p. 156.)

ŒDIPUS (Ὀἰδίπους), was the son of LAIUS, king of Thebes; and of JOCASTA, the daughter of MENŒCEUS. Homer calls his mother EPICASTA. An oracle had warned LAIUS against having children, declaring that he would meet his death by means of his offspring; and the monarch accordingly refrained, until, after some lapse of time, having indulged in festivity, he forgot the injunction of the god, and JOCASTA gave birth to a son. The father immediately delivered the child to his herdsman to expose on Mount Cithæron. The herdsman, moved to compassion, according to one account (*Soph.*, *Œd. Tyr.*, 1038), gave the babe to a neatherd belonging to POLYBUS, king of Corinth, or, as others say (*Eurip.*, *Phœniss.*, 28), the neatherds of Polybus found the infant after it had been exposed, and brought it to PERIBŒA, the wife of Polybus, who, being childless, reared it as her own, and named it ŒDIPUS, on account of its *swollen feet* (from *oîdêw*, to swell, and *πούς*, a foot); for LAIUS, previous to its exposure, had pierced its ankles, and had inserted through the wound a leathern thong. The foundling ŒDIPUS was brought up by Polybus as his heir. Happening to be reproached by some one at a banquet with being a supposititious child, he besought PERIBŒA to inform him of the truth; but, unable to get any satisfaction from her, he went to Delphi and consulted the oracle. The god directed him to shun his native country, or else he would be the slayer of his father and the sharer of his mother's bed. He therefore resolved never to return to Corinth, where so much crime, as he thought, awaited him, and he took his road through Phocis. Now it happened that LAIUS, at this same time, was on his way to Delphi, for the purpose of ascertaining whether the child which had been exposed had perished or not. He was in a chariot, accompanied by his herald POLYPHONTES; a few attendants came after. The father and son, total strangers to each other, met in a narrow road in Phocis. ŒDIPUS was ordered to make way, and, on his disregarding the command, the charioteer endeavoured to crowd him out of the path. A contest thereupon ensued, and both LAIUS and the charioteer, together with all the attendants except one, who fled, were slain by the hand of ŒDIPUS. Immediately after the death of LAIUS, JUNO, always hostile to the city of Bacchus, sent a monster named the Sphinx to ravage the territory of Thebes. It had the face of a woman, the breast, feet, and tail of a lion, and the wings of a bird. This monster had been taught riddles by the Muses, and she sat on the Phœcean Hill, and propounded one to the Thebans. It was this: "What is that which has one voice, is four-foot-

ed, two-footed, and at last three-footed?" or, as others give it, "What animal is that which goes on four feet in the morning, on two at noon, and on three at evening?" The oracle told the Thebans that they would not be delivered from her until they had solved her riddle. They often met to try their skill; and when they had failed, the Sphinx always carried off and devoured one of their number. At length HAMON, son of CREON, having become her victim, the father offered by public proclamation the throne, to which he had succeeded on the death of LAIUS, and the hand of his sister JOCASTA, to whoever should solve the riddle of the Sphinx. ŒDIPUS, who was then at Thebes, hearing this, came forward and answered the Sphinx that it was Man; who, when an infant, creeps on all fours; when he has attained to manhood, goes on two feet; and when old, uses a staff, a third foot. The Sphinx thereupon flung herself down to the earth and perished; and ŒDIPUS now unknowingly accomplished the remainder of the oracle. He had by his mother two sons, ETEOCLES and POLYNICES, and two daughters, ANTIGONE and ISMENE.—After some years Thebes was afflicted with famine and pestilence; and the oracle being consulted, ordered the land to be purified of the blood which defiled it. Inquiry was set on foot after the murder of LAIUS, and a variety of concurring circumstances brought the guilt home to ŒDIPUS. JOCASTA, on the discovery being made, hung herself, and her unhappy son and husband, in his grief and despair, put out his eyes. He was banished from Thebes; and, accompanied by his daughters, who faithfully adhered to him, he came, after a tedious period of miserable wandering, to the grove of the Furies at COLONUS, a village not far from Athens, and there found the termination of his wretched life, having mysteriously disappeared from mortal view, and been received into the bosom of the earth. (*Apollod.*, 3, 5, 8, *seq.*—*Soph.*, *Œd. Col.*) The history of his sons will be found under the articles ETEOCLES and POLYNICES.—Such is the form in which the history of ŒDIPUS has been transmitted to us by the Attic dramatists. We will now consider its more ancient shape. The hero of the *Odyssey* says, "I saw (in Erebus) the mother of ŒDIPODES (such being his Homeric name), the fair EPICASTA, who, in her ignorance, did an awful deed, marrying her own son, and he married, having slain his own father, and immediately the gods made this known unto men. Now he ruled over the Cadmeans in desirable Thebes, suffering woes through the pernicious counsels of the gods; but she, oppressed with grief, went to the abode of Aïdes, the strong gate-keeper, having fastened a long halter to the lofty roof, and left to him many woes, such as the Furies of a mother produce." (*Od.*, 11, 271, *seqq.*) In the *Iliad* (23, 679) the funeral games are mentioned which were celebrated at Thebes in honour of the "fallen ŒDIPODES." Hesiod (*Op. et D.*, 162) speaks of the heroes who fell fighting at the seven-gated Thebes, on account of the sheep of ŒDIPODES. It would also seem that, according to the above passage of the *Odyssey*, and to the epic poem the "ŒDIPODES" (*Pausan.*, 9, 5, 11), EPICASTA had not any children by her son; EURYGENEIS, the daughter of Hyperphæas, being the mother of his well-known offspring. According to the cyclic Thebais, the fatal curse of ŒDIPUS on his sons had the following origin: POLYNICES placed before his father a silver table which had belonged to CADMUS, and filled a golden cup with wine for him; but when ŒDIPUS perceived the heir-looms of his family thus set before him, he raised his hands and prayed that his sons might never divide their inheritance peaceably, but ever be at strife. Elsewhere (*ap. Schol. ad Soph.*, *Œd. Col.*, 1440) the Thebais said, that his sons having sent him the loin, instead of the shoulder of the victim, he flung it to the ground, and prayed that they might fall by each other's hands. The motives as-

signed by the tragedians are certainly of a more dignified nature than these, which seem trifling and insignificant.—This story affords convincing proof of the great liberties which the Attic tragedians allowed themselves to take with the ancient myths. It was purely to gratify Athenian vanity that Sophocles, contrary to the current tradition, made Oedipus die at Colonus. His blindness also seems a tragic fiction. Euripides makes Jocasta survive her sons, and terminate her life by the sword. (*Keighley's Mythology*, p. 340, *seqq.*)

CENEUS, a king of Calydon in Ætolia, son of Parthaon. He married Althæa, the daughter of Thestius, by whom he had, among other children, Meleager and Deianira. After Althæa's death, he married Peribœa, the daughter of Hipponous, by whom he became the father of Tydeus. In a sacrifice which Ceneus made to all the gods, upon reaping the rich produce of his fields, he forgot Diana, and the goddess, to revenge this neglect, sent a wild boar to lay waste the territory of Calydon. The animal was at last killed by Meleager and the neighbouring princes of Greece, in a celebrated chase known by the name of the chase of the Calydonian boar. (*Vid.* Meleager.) After the death of Meleager, Ceneus was dethroned and imprisoned by the sons of his brother Agrius. Diomedes, having come secretly from the city of Argos, slew all the sons of Agrius but two, who escaped to the Peloponnesus, and then, giving the throne of Calydon to Andromon, son-in-law of Ceneus, who was himself now too old to reign, led the latter with him to Argolis. Ceneus was afterward slain by the two sons of Agrius, who had fled into the Peloponnesus. Diomedes buried him in Argolis, on the spot where the city of Cenoë, called after Ceneus, was subsequently erected. Ceneus is said to have been the first that received the vine from Bacchus. The god taught him how to cultivate it, and the juice of the grape was called after his name (*olvor*, "wine."—*Apollod.*, 1, 8.—*Hygin.*, *fab.*, 129).

CENIDÆ, a city of Acarnania, near the mouth of the Achelous. Thucydides represents it as situated on the Achelous, a little above the sea, and surrounded by marshes caused by the overflowing of the river, which rendered it a place of great strength, and deterred the Athenians from undertaking its siege; when, unlike the other cities of Acarnania, it embraced the cause of the Peloponnesians, and became hostile to Athens. (*Thucyd.*, 1, 111; 2, 102.) At a later period of the war, it was, however, compelled by the Acarnanian confederacy to enter into an alliance with that power. (*Thucyd.*, 3, 77.) The same writer gives us to understand, that Cenidæ was first founded by Alcmeon, according to an oracle which he consulted after the murder of his mother, and that the province was named after his son Acarnan (2, 102). Stephanus asserts that this city was first called Erysichæ, a fact of which the poet Alcman had made mention in a passage cited by more than one writer; but Strabo, on the authority of Apollodorus, places the Erysichæi in the interior of Acarnania, and consequently appears to distinguish them from the Cenidæ. From Pausanias we learn (4, 25), that the Messenians, who had been settled at Naupactus by the Athenians not long after the Persian invasion, made an expedition from that city to Cenidæ, which, after some resistance, they captured and held for one year, when they were in their turn besieged by the united forces of the Acarnanians. The Messenians, despairing of being able to defend the town against so great a number of troops, cut their way through the enemy, and reached Naupactus without experiencing any considerable loss. The Ætolians having, in process of time, conquered that part of Acarnania which lay on the left bank of the Achelous, became also possessed of Cenidæ, when they expelled the inhabitants under circumstances apparently of great hardship and cruelty, for which, it was said, they were threatened with the vengeance

of Alexander the Great. (*Plut.*, *Vit. Alex.*) By the advice of Cassander, the Cenidæ settled at Sauria (probably Thyria), another Acarnanian town. Many years afterward, the Ætolians were compelled to evacuate Cenidæ by Philip the son of Demetrius, king of Macedon, in an expedition related by Polybius. This monarch, aware of the advantage to be derived from the occupation of a place so favourably situated with regard to the Peloponnesus, fortified the citadel, and enclosed within a wall both the fort and arsenal. (*Polyb.*, 4, 65.) In the second Punic war this town was taken by the Romans, under Valerius Lævinus, and given up to the Ætolians their allies (*Liv.*, 26, 24.—*Polyb.*, 9, 39); but, on a rupture taking place with that people, it was finally restored to the Acarnanians. (*Liv.* 38, 11.—*Polyb.*, *fragm.*, 22, 15.) The precise site of this ancient city remains yet unascertained; for, though many antiquaries have supposed that it is represented by a place called Trigardon, close to the mouth of the Achelous, and on its right bank, there are several strong objections against the correctness of this. A principal obstacle to the reception of such an opinion is found in the fact, that Trigardon is situated on the right bank of the Achelous, whereas the ancient town was evidently on the left. The ruins which Sir W. Gell describes as situated above *Missonghi* and the lake of *Anatolico*, on the spot named *Kuria Irene*, seem to possess many of the characteristic features appertaining to Cenidæ. (*Itin. of Greece*, p. 297.) Dodwell, however, decides against *Kuria Irene*, and in favour of Trigardon. (*Cramer's Anc. Greece*, vol. 2, p. 21, *seqq.*)

CENIDÆA (*Oliveiōns*), a patronymic of Meleager, son of Ceneus. (*Ovid. Met.*, 8, 414.)

CENŌS, I. a town, and demus or borough, of Attica, classed by Harpocration and the other lexicographers under the tribe *Æantia*. We are informed by the same writers that it was part of the Tetrapolis. (*Harpocr.*, s. v. *Olvōn*.—*Steph. Byz.*, s. v.—*Strabo*, 383.) From Dodwell we learn (vol. 2, p. 163) that the site of this town still retains its name and some vestiges near the cave of Pan.—II. Another borough of Attica, on the confines of Boeotia, near Eleuthera.—III. A small Corinthian fortress, near the promontory of Olmiz. (*Strabo*, 380.) Xenophon states (*Hist. Gr.*, 4, 5, 5) that it was taken on one occasion by Agesilaus.—IV. A city of Elis, supposed by some to be the same with Ephyræ, situated near the sea on the road leading from Elis to the coast, and 120 stadia from that city. (*Strabo*, 338.)—V. A town of Argolis, between Argos and Mantinea, and on the Arcadian frontier. It was said to have been founded by Diomedes, and named after his grandfather Ceneus. (*Pausan.*, 2, 25.—*Apollod.*, 1, 8, 6.) The site of this place, according to modern maps, is still called *Enoa*. (*Cramer's Anc. Greece*, vol. 3, p. 292.)

CENOMĀUS, a son of Mars by Sterope, the daughter of Atlas. The legend connected with his name will be found under the article Pelops.

CENŌNÆ, a nymph of Mount Ida, daughter of the river Cebrenus in Phrygia. Paris, when a shepherd on Mount Ida, and before he was discovered to be a son of Priam, had united himself in marriage to Cēnone; and as she had received from Apollo the gift of prophecy, she warned her husband against the consequences of his voyage to Greece. She at the same time told him to come to her if ever he was wounded, as she alone could cure him. Paris came to her, accordingly, when he had been wounded by one of the arrows of Philoctetes, but Cēnone, offended at his desertion of her, refused to aid him, and he died on his return to Ilium. Repenting of her cruelty, Cēnone hastened to his relief; but, coming too late, she threw herself on his funeral pile and perished. (*Apollod.*, 3, 12, 6.—*Quint.*, *Smyr.*, 10, 259, *seqq.*—*Conon.*, 22.)

Ἐνωρία, one of the ancient names of the island Ægina. (*Ovid. Met.*, 7, 473.)

Ἐνωρίων, a son of Bacchus and Ariadne, and king of Chios. His name is connected with the legend of Orion. (*Vid.* Orion.)

Ἐνωτρί, the inhabitants of Ἐνωτρία.

Ἐνωτρία, a name derived from the ancient race of the Ἐνωτρί, and in early use among the Greeks to designate a portion of the southeastern coast of Italy. The name is derived by some from *οἶνος*, "wine," and they maintain that the early Greeks called the country Ἐνωτρία, or the *wine-land*, from the number of vines they found growing there when they first became acquainted with the region. (*Mannert, Geogr.*, vol. 9, pt. 1, p. 542.) With the poets of a later age it is a general appellation for all Italy. The Ἐνωτρί, as they were called, appear to have been spread over a large portion of Southern Italy, and may be regarded, not as a very early branch of the primitive Italian stock, but rather as the last scion propagated in a southerly direction. (*Cramer's Anc. Italy*, vol. 2, p. 336.)

Ἐνωτρίδες, small islands, two in number, off the coast of Lucania, and a little above the promontory of Palinurus. They lay in front of the city of Velia, where the river Heles empties into the sea. (*Plin.*, 7, 7.)

Ἐνωτρίων, a son of Lycaon. He was fabled to have passed with a body of followers from Arcadia into Southern Italy, and to have given the name of Ἐνωτρία to that part of the country where he settled. (But consult remarks under the article Ἐνωτρία, where a more probable etymology is given for the name of the country.)

Ἐνωσσά or Ἐνωσσά, I. small islands in the Ægean Sea, between Chios and the mainland, now *Spermadori*, or (as the modern Greeks more commonly term them) *Egonuses*. (*Herod.*, 1, 165.—*Thucyd.*, 8, 24.—*Plin.*, 5, 31.—*Bischoff und Möller, Wörterb. der Geogr.*, p. 800.)—II. Small islands off the coast of Messenia, and nearly facing the city of Methorie. They are two in number, and are now called *Sapienza* and *Cabrera*. (*Pausan.*, 4, 34.—*Plin.*, 4, 11.)

Ἐνυός, I. a town of Laconia, supposed to have been situated on the river of the same name flowing near Sellasia. (*Polyb.*, 2, 65.—*Liv.*, 34, 28.) The modern name is *Tohelesina*. Sir W. Gell describes the river as a large stream, which falls into the Euxotæ a little north of Sparta. (*Ilin. of the Morea*, p. 223.)—II. or Ἐνυός, a river of Germany, separating Noricum from Vindelicia, and falling into the Danube at Boiodorum or *Passau*. It is now the *Inn*. (*Tacit.*, *Hist.*, 3, 5.—*Id.*, *German.*, 28.—*Ptol.*, 2, 14.)

Ἐτᾶ, a celebrated chain of mountains in Thessaly, whose eastern extremity, in conjunction with the sea, forms the famous pass of Thermopylæ. It extended its ramifications westward into the country of the Dorians, and still farther into Ætolia, while to the south it was connected with the mountains of Locris, and those of Boeotia. (*Liv.*, 36, 15.—*Strabo*, 428.—*Herod.*, 7, 217.) Its modern name is *Katavothra*. Sophocles represents Jove as thundering on the lofty crags of Ἐτᾶ. (*Trach.*, 436.) As regards the expression of Virgil, "*tibi deserit Hesperus Ætæam*," the meaning of which many have misconceived, consult the remarks of Heyne (*ad Eclog.*, 8, 30). The highest summit of Ἐτᾶ, according to Livy, was named *Cellidromus*: it was occupied by Cato with a body of troops in the battle fought at the pass of Thermopylæ between the Romans under Acilius Glabrio and the army of Antiochus, and, owing to this manœuvre, the latter was entirely routed. (*Liv.*, 36, 15.—*Plin.*, 4, 7.) Herodotus describes the path by which the Persian army turned the position of the Greeks as beginning at the Æsopus. Its name, as well as that of the mountain, is Anopæa. It leads along this ridge as far

as Alponus, the first Locrian town (7, 216). On the summit of Mount Ἐτᾶ were two castles, named Tichius and Rhodontia, which were successfully defended by the Ætolians against the Romans. (*Liv.*, 36, 19.—*Strabo*, 428.—*Cramer's Anc. Greece*, vol. 1, p. 445.)

Ἐτῦλος, a town of Laconia, so called from an Argive hero of that name, was situate eighty stadia from Thalamæ. (*Pausan.*, 3, 26.) Homer has noticed it among the towns subject to Menelaus. (*Il.*, 2, 585.) Strabo observes that it was usually called Tylus. (*Strab.*, 360.) Ptolemy writes the name Bityla (p. 90), and it is still known by that of *Vitulo*. (*Gall's Ilin.*, p. 237.) Pausanias noticed here a temple of Serapis, and a statue of Apollo Carneius in the forum. (*Cramer's Anc. Greece*, vol. 3, p. 187.)

Οἶελλος, a character drawn in one of the satires of Horace. Ofellus represents a Sabine peasant, whose plain good sense is agreeably contrasted with the extravagance and folly of the great. (*Horat.*, *Sat.*, 2, 2.)

Οοῖαῖα, a small island off the coast of Etruria, some distance below Planasia, famed for its wine, now *Monte Cristo*. (*Plin.*, 3, 7.)

Οὐγγεός or Οὐγγεύς (Ὀγγύγης or Ὀγγυγός) is said to have been the first king of Athens and of Thebes. (*Tzetz. ad Lycophr.*, 1206.) Thus, Pausanias tells us that the Ectenes, who were the most ancient inhabitants of Boeotia, were the subjects of Ogyges, and that Thebes itself was called Ogygian, an epithet which is also applied to it by Æschylus. (*Pausan.*, 9, 5, 1.—*Æsch.*, *Pers.*, 37.) That Ogyges was closely connected with Thebes as well as Attica, appears from the tradition, according to which he was said to be the son of Boeotus. (*Schol. ad Apollon. Rh.*, 3, 1178.) It may also be mentioned, that the oldest gate in Thebes was called Ogygian. (*Pausan.*, 9, 5, 3.) The name of Ogyges is connected with the ancient deluge which preceded that of Deucalion, and he is said to have been the only person saved when the whole of Greece was covered with water. We possess scarcely any particulars respecting him; and the accounts which have come down to us are too vague and unsatisfactory to form any definite opinion on the subject. He clearly belongs to mythology rather than to history. The earlier Greek writers, Herodotus, Thucydides, Xenophon, &c., make no mention of his name; but the accounts preserved by Pausanias and other authors appear to indicate the great antiquity of the traditions respecting him. Varro places the deluge of Ogyges, which he calls the *first deluge*, 400 years before Inachus, and, consequently, 1600 years before the first Olympiad. This would refer it to a period of 2376 years before Christ; and the deluge of Noah, according to the Hebrew text, is 2349, there being only 27 years difference. Varro's opinion is mentioned by Censorinus (*de Die Nat.*, c. 21). It appears from Julius Africanus (*ap. Euseb., Præp. Ev.*) that Acusilaus, the first author who placed a deluge in the reign of Ogyges, made this prince contemporary with Phoroneus, which would have brought him very near the first Olympiad. Julius Africanus makes only an interval of 1020 years between the two epochs; and there is even a passage in Censorinus conformable to this opinion. Some also read *Erogitium* in place of *Ogygium*, in the passage of Varro which we have quoted. But what would this be but an Erogitian cataclysm, of which nobody has ever heard? (*Cuvier, Theory of the Earth*, p. 144, *Jameson's transl.*)—In a note appended to Lemaire's edition of Ovid's *Metamorphoses*, Cuvier enumerates the Mosiac, Grecian, Assyrian, Persian, Indian, and Chinese traditions concerning a universal deluge, and concludes from them that the surface of the globe, five or six thousand years ago, underwent a general and sudden revolution, by which the lands inhabited by the human beings who lived at that time, and by the

various species of animals known at the present day, were overflowed by the ocean; out of which emerged the present habitable portions of the globe. This celebrated naturalist maintains, that these regions of the earth were peopled by the few individuals who were saved, and that the tradition of the catastrophe has been preserved among these new races of people, variously modified by the difference of their situation and their social condition. According to Cuvier, similar revolutions of nature had taken place at periods long antecedent to that of the Mosaic deluge. The dry land was inhabited, if not by human beings, at least by land animals at an earlier period; and must have been changed from the dry land to the bed of the ocean; and it might even be concluded, from the various species of animals contained in it, that this change, as well as its opposite, had occurred more than once. (*Theory of the Earth, Jameson's transl.*, p. 418.) This theory, however, has been ably attacked by Jameson.—Various etymologies have been proposed for the name Ogyges. Kenrick supposes that the word was derived from the root γυγη, signifying darkness or night, and quotes a passage of Hesychius in support of his view, which appears, however, to be corrupt. The more favourite theory of modern scholars connects the name with Oceanus: which etymology is supported, as is thought, by the tradition that places Ogyges in the time of the deluge. In support of this view, it is remarked that Ogyges is only a reduplication of the radical syllable Og or Oc, which we find in Oceanus (*vid.* Oceanus II.), and also in Ogen (which is explained by Hesychius as equivalent to Oceanus: Ὀγῖν, Ὀκεανός). A similar reduplication appears to take place in ἔνυμος, ἐνῆνυμος: ἔνυμαι, ἐνικτεῖναι ἄταλος, ἀντιτάλλω. (Kenrick, *Philol. Museum*, No. 5, "On the early Kings of Attica."—Thirlwall, *Philol. Mus.*, No. 6, "On Ogyges."—Crenzer und Hermann, *Briefe über Homer und Hesiodus*, p. 105, in notes.—Völscher, *Mythol. des Iap. Geschl.*, p. 67.—Schwenck, *Andeut.*, p. 179.) Regarding, therefore, the name Ogyges as a general type of the waters, we may trace a resemblance between its radical syllable and the forms ἄχ-α, "water" (compare the Latin *aqua*); αἰ-ες, "the waves"; Ἀχ-ιός, "the water-god"; Ἀλαξ-ός, another marine deity, and the ruler over the island Ἀλγίνα. (Schwenck, *l. c.*) But, whatever may be the etymology of the name, the adjective derived from it is frequently employed by the Greek writers to indicate any thing ancient or unknown. We learn from the scholiast on Hesiod, that, according to one tradition, Ogyges was the king of the gods, and some think that the name originally indicated nothing more than the high antiquity of the times to which it referred. (*Encycl. Us. Knowl.*, vol. 16, p. 412.)

OGYIA, I. an ancient name of Boeotia, from Ogyges, who reigned there. (*Vid.* Ogyges.)—II. The island of Calypso. (*Vid.* Calypso.) The name Ogygia is supposed to refer to its being in the middle of the ocean. (*Vid.* Ogyges.)

OILEUS, king of the Locrians, was son of Odædocus, and father of Ajax the Less, who is called, from his parent, the Oilean Ajax. Oileus was one of the Argonauts. (*Apollod.*, 3, 10, 7.—*Hygin.*, *fab.*, 14, 18.)

OLBIA, I. a city of Bithynia, in the eastern angle of the Sinus Olbianus, and probably the same with Astacus. (*Plin.*, 5, 37.—*Steph. Byz.*, p. 512.)—II. A city on the coast of Pamphylia, west of Attalea. (*Ptol.*—*Steph. Byz.*, p. 512.)—III. A town on the coast of Gaul, founded by Massilia. It was also called Athenopolis, and is supposed by Mannert to have been the same with Telo Martius, or Toulon, these three ancient names indicating, as he thinks, one and the same city. (*Mannert, Geogr.*, vol. 2, p. 81.)—IV. A town on the eastern coast of Sardinia, in the

northern part of the island. According to Reichard, some traces of it still remain on the shores of the bay of Volpe. (*Itin. Ant.*, p. 79.)—V. Or Borysthenis, called also Olbiopolis and Miletopolis, a city of European Sarmatia, according to Stephanus of Byzantium and Mela, at the mouth of the Borysthenes, but, according to other writers, at some distance from the sea. It was colonized by the Milesians, and is at the present day, not *Otchakow*, as some have thought, but *Kudak*, a small place in the vicinity. (*Bischoff und Müller, Wörterb. der Geogr.*, p. 195.) The latest of the ancient names of this place was Borysthenis, and the one preceding it Olbia.

OLONINUM or OLCINUM, now *Dulcigno*, a town of Dalmatia, on the coast of the Adriatic. (*Liv.*, 45, 26.—*Plin.*, 3, 22.)

OLĒROS. *Vid.* Antiparos.

OLEN (Ὀλήν), the name of one of the earliest bards mentioned in the history of Greek Poetry. According to a tradition preserved by Pausanias (10, 5, 4), he came originally from the country of the Hyperboreans, and the Delphian priestess Bæo called him the first prophet of Phœbus, and the first who, in early times, founded the style of singing in epic metre (ἔρτυν εὐοιδία). He appears to have settled in Lycia, and afterward to have proceeded to Delos, whither he transplanted the worship of Apollo and Diana, and the birth of which deities, in the country of the Hyperboreans, he celebrated in his hymns. Many ancient hymns, indeed, attributed to Olen, were preserved at Delos, which are mentioned by Herodotus (4, 35), and which contained remarkable mythological traditions and significant appellatives of the gods. Mention is also made of his *nomes*, that is, simple and antique songs, combined with certain fixed tunes, and fitted to be sung for the circular dance of a chorus. The time when Olen flourished is uncertain. It is supposed to have been before Orpheus. (*Schöll, Hist. Lit. Gr.*, vol. 1, p. 33.—*Müller, Hist. Lit. Gr.*, p. 24.)

OLĒXUS, I. an ancient city of Ætolia, in the vicinity of Pleuron, and known to Homer, who enumerates it in his catalogue. (*Il.*, 2, 688.) It was destroyed by the Ætolians, and preserved but few vestiges in Strabo's time. (*Strab.*, 460.) The goat Amalthæa is called *Olenia* by the poets (*Ovid, Met.*, 2, 594), because nurtured in the vicinity of this place.—II. One of the most ancient of the cities of Achaia, situate on the western coast, at the mouth of the river Peyrus. According to Polybius (2, 41, 7), it was the only one of the twelve cities which refused to accede to the confederation, upon its renewal after an interruption of some years. In Strabo's time it was deserted, the inhabitants, as Pausanias affirms, having retired to the adjacent villages. (*Cramer's Anc. Greece*, vol. 3, p. 70.)

OLISIPPO, a city of Lusitania, at the mouth of the Tagus, near the Atlantic Ocean. (*Plin.*, 4, 35.—*Id.*, 8, 67.—*Varro, R. R.*, 2, 1.) It was the only municipium in this section of the country, and, as such, had the appellation of *Felicitas Julia*. It was very probably of Roman origin, and the story of its having been founded by Ulysses is a mere fable, arising out of an accidental coincidence of name. The horses bred in the territory adjacent to this place were remarkable for their speed. (*Plin.*, 8, 42.) Mannert and many other geographical writers make Olisippo coincide with the modern *Lisbon* (Lissabon), but others oppose this. (*Mannert, Geogr.*, vol. 1, p. 342.—Compare *Ukert*, vol. 2, p. 394.) The name of this city is variously written. Thus we have *Olisipo* in some authors, and in others, who favour the account of its foundation by Ulysses, we find *Ulyssippo*. (Consult *Wesseling, ad Itin.*, p. 416.—*Tzschucke, ad Mel.*, 3, 1, vol. 2, pt. 3, p. 25.)

OLLIVS, a river rising in the Alps, and falling into the Po. It is now the *Oglio*, and forms in its course the Lake Sebina, now *Lago d'Isco*. (*Plin.*, 3, 19.)

OLYMPIA (*orun*), i. the chief of the four great national games or festivals of the Greeks. They were celebrated at Olympia, a sacred spot on the banks of the Alpheus, near Elis, every fifth year. The exact interval at which they recurred was one of forty-nine and fifty lunar months alternately; so that the celebration sometimes fell in the month Apollonius (July), sometimes in the month Parthenius (August). (*Böckh, ad Pind., Olymp.*, 3, 18.—*Müller's Dorians*, vol. 1, p. 281, *Eng. transl.*) The period between two celebrations was called an Olympiad.—The Olympic festival lasted five days. Its origin is concealed amid the obscurity of the mythic period of Grecian history. Olympia was a sacred spot, and had an oracle of Jupiter long before the institution of the games. The Eleans had various traditions, which attributed the original foundation of the festival to gods and heroes at a long period prior to the Trojan war, and among these to the Isean Hercules, to Pelops, and to Hercules the son of Alcmena. The Eleans farther stated, that, after the Ætolians had possessed themselves of Elis, their whole territory was consecrated to Jupiter; that the games were revived by their king Iphitus, in conjunction with Lycurgus, as a remedy for the disorders of Greece; and that Iphitus obtained the sanction of the Delphic oracle to the institution, and appointed a periodical sacred truce, to enable persons to attend the games from every part of Greece, and to return to their homes in safety. This event was recorded on a disc, which was preserved by the Eleans, and on which the names Iphitus and Lycurgus were inscribed. (*Plut., Vit. Lycurg.*, 1.—*Pausan.*, 5, 20, 21.) Other accounts mention Cleostratus of Pisa as an associate of Iphitus and Lycurgus in the revival of the festival. All that can safely be inferred from this tradition, which has been embellished with a variety of legends, seems to be, that Sparta concurred with the two states most interested in the plan, and mainly contributed to procure the consent of the other Peloponnesians. (*Thirlwall's Greece*, vol. 1, p. 386.) The date of the revival by Iphitus is, according to Eratosthenes, 884 B.C.; according to Callimachus, 828 B.C. Mr. Clinton prefers the latter date. (*Fest. Hell.*, vol. 2, p. 408, note A.) The Olympiads began to be reckoned from the year 776 B.C., in which year Coræbus was victor in the foot-race. We have lists of the victors from that year, which always include the victors in the foot-race, and in later times those in the other games. (*Pausan.*, 5, 8, 3.)—The Olympic, like all the other public festivals, might be attended by all who were of the Hellenic race; though at first probably the northern Greeks, and perhaps the Achæans of Peloponnesus, were not admitted. Spectators came to Olympia, not only from Greece itself, but also from the Grecian colonies in Europe, Asia, and Africa. Among them were solemn deputations sent to represent their respective states. Women, however, were forbidden to appear at Olympia, or even to cross the Alpheus, during the festival, under pain of death. But at a later period we find women taking part in the chariot-race, though it is doubtful whether they ever drove their own chariots. An exception was made to this law of exclusion in favour of the priestesses of Ceres and certain virgins, who were permitted to be present at the games, and had a place assigned to them opposite the judges. The management of the festival was in the hands of the Eleans. Originally, indeed, Pisa, in whose territory Olympia lay, seems to have had an equal share in the administration; but in the fiftieth Olympiad the Eleans destroyed Pisa, and from that time they had the entire management of the games. They proclaimed the sacred truce, first in their own territories, and then throughout the whole of Greece. This truce took effect from the time of its proclamation in Elis, and while it lasted the Elean territory was inviolable, any armed invasion of it being

esteemed an act of sacrilege. On this privilege the Eleans founded a claim to have their territory always considered sacred, though in fact they themselves did not abstain from war. As the presiding nation, they gave laws for the regulation of the festival, imposed penalties on individuals and states, and had the power of excluding from the games those who resisted their decrees. They actually thus excluded the Lacedæmonians on one occasion, and the Athenians on another. The Eleans appointed the judges of the contest, who were called *Hellaniotæ* (*Ἑλλανοίται*). These were instructed in the duties of their office, for a period of ten months before the festival, by Elean officers called *Nomophylacæ* (*Νομοφύλακες*): they were sworn to act impartially, and an appeal might be made from their decision to the Elean senate. Their number varied at different periods: in the 106th Olympiad it was fixed at ten, which was the number ever afterward. The judges had under them different officers, called *ἀγῶναι*, whose business it was to keep order. These officers were called *μαστιγοφόροι* in the other Grecian games. (Consult, in relation to these details, *Pausanias*, 5, 9, 4, *seq.*—6, 24, 3.)—The Olympic festival consisted of religious ceremonies, athletic contests, and races. The chief deity who presided over it was Jupiter Olympius, whose temple at Olympia, containing the ivory and gold statue of the god, was one of the most magnificent works of art in Greece. The worship of Apollo was associated with that of Jupiter (*Müller's Dorians*, vol. 1, p. 279, *seqq.*, *Eng. transl.*); and the early traditions connect Hercules with the festival. (*Id. ib.*, p. 453.) This is another proof of the Dorian origin of the games, for Apollo and Hercules were two of the principal deities of the Doric race. There were altars at Olympia to other gods, which were said to have been erected by Hercules, and at which the victors sacrificed. The most magnificent sacrifices and presents were also offered to Jupiter Olympius by the competitors, and by the different states of Greece.—The games consisted of horse and foot races, leaping, throwing, wrestling and boxing, and combinations of these exercises. 1. The earliest of these games was the *foot-race* (*δρόμος*), which was the only one revived by Iphitus. The space run was the length of the stadium, in which the games were held, namely, about 600 English feet. In the 14th Olympiad (724 B.C.), the *διὰυλος* was added, in which the stadium was traversed twice. The *δολιχος*, which consisted of several lengths of the stadium (seven, twelve, or twenty-four, according to different authorities), was added in the 15th Olympiad (B.C. 720). A race in which the runners wore armour (*ὀπλιτῶν δρόμος*) was established in the 65th Olympiad, but soon after abolished. 2. *Wrestling* (*πάλη*) was introduced in the 18th Olympiad (B.C. 708). The wrestlers were matched in pairs by lot. When there was an odd number, the person who was left by the lot without an antagonist wrestled last of all with him who had conquered the others. He was called *ἐφεδρος*. The athlete who gave his antagonist three throws gained the victory. There was another kind of wrestling (*ἀνακλινομήλη*), in which, if the combatant who fell could drag down his antagonist with him, the struggle was continued on the ground, and the one who succeeded in getting uppermost and holding the other down gained the victory.—3. In the same year was introduced the *pentathlon* (*πένταθλον*), or, as the Romans called it, *quintquetium*, which consisted of the five exercises enumerated in the following verse, ascribed to Simonides:

Ἄλμα, ποδωκίτην, δίσκον, ἀκοντα, πᾶλην,

that is, "leaping, running, throwing the quoit, throwing the javelin, wrestling." Others, however, give a different enumeration of the exercises of the pentathlon. In leaping, they carry weights in their hands or on

their shoulders: the object was to leap the greatest distance, without regard to height. The discus, or quoit, was a heavy weight of a circular or oval shape; neither this nor the javelin was aimed at a mark, but he who threw farthest was the victor. In order to gain a victory in the pentathlon, it was necessary to conquer in each of its five parts.—4. *Boxing* (*πυγμαχία*) was introduced in the 23d Olympiad (B.C. 688). The boxers had their hands and arms covered with thongs of leather, called *cestus*, which served both to defend them and to annoy their antagonists. Virgil (*Æn.*, 5, 406) describes the *cestus* as armed with lead and iron; but this is not known to have been the case among the Greeks.—5. The *Pancratiſm* (*παγκράτιον*) consisted of boxing and wrestling combined. In this exercise, and in the *cestus*, the vanquished combatant acknowledged his defeat by some sign; and this is supposed to be the reason why Spartans were forbidden by the laws of Lycurgus to practise them, as it would have been esteemed a disgrace to his country that a Spartan should confess himself defeated. In these games the combatants fought naked.—The horse-races were of two kinds. 1. *The chariot-race*, generally with four-horse chariots (*ἵππων τελειῶν ὄρμος*), was introduced in the 25th Olympiad (B.C. 680). The course (*ἵπποδρόμος*) had two goals in the middle, at the distance probably of two stadia from each other. The chariots started from one of these goals, passed round the other, and returned along the other side of the hippodrome. This circuit was made twelve times. The great art of the charioteer consisted in turning as close as possible to the goals, but without running against them or against the other chariots. The places at the starting-post were assigned to the chariots by lot. There was another sort of race between chariots with two horses (*δύων ὄρμος* or *σύνορος*). A race between chariots drawn by mules (*ἀπηνή*) was introduced in the 70th Olympiad, and abolished in the 84th.—2. There were two sorts of races on horseback, namely, the *κέρως*, in which each competitor rode one horse throughout the course, and the *καλπή*, in which, as the horse approached the goal, the rider leaped from his back, and, keeping hold of the bridle, finished the course on foot.—In the 37th Olympiad (B.C. 632), racing on foot and wrestling between boys was introduced.—There were also contests in poetry and music at the Olympian festival.—All persons were admitted to contend in the Olympic games who could prove that they were freemen, that they were of genuine Hellenic blood, and that their characters were free from infamy and immorality. So great was the importance attached to the second of these particulars, that the kings of Macedon were obliged to make out their Hellenic descent before they were allowed to contend. The equestrian contests were necessarily confined to the wealthy, who displayed in them great magnificence; but the athletic exercises were open to the poorest citizens. An example of this is mentioned by Pausanias (6, 10, 1). In the equestrian games, moreover, there was no occasion for the owner of the chariot or horse to appear in person. Thus Alcibiades, on one occasion, sent seven chariots to the Olympic games, three of which obtained prizes. The combatants underwent a long and rigorous training, the nature of which varied with the game in which they intended to engage. Ten months before the festival they were obliged to appear at Elis, to enter their names as competitors, stating at the same time the prize for which they meant to contend. This interval of ten months was spent in preparatory exercises; and for a part of it, the last thirty days at least, they were thus engaged in the gymnasium at Elis. When the festival arrived, their names were proclaimed in the stadium, and after proving that they were not disqualified from taking part in the games, they were led to the altar of Jupiter the guardian of

oaths (*Ζεὺς ὀρκίος*), where they swore that they had gone through all the preparatory exercises required by the laws, and that they would not be guilty of any fraud, nor of any attempt to interfere with the fair course of the games. Any one detected in bribing his adversary to yield him the victory was heavily fined. After they had taken the oath, their relations and countrymen accompanied them into the stadium, exhorting them to acquit themselves nobly.—The prizes in the Olympic games were at first of some intrinsic value, like those given in the games described by Homer. But, after the 7th Olympiad, the only prize given was a garland of wild olive, cut from a tree in the sacred grove at Olympia, which was said to have been brought by Hercules from the land of the Hyperboreans. Palm-leaves were at the same time placed in the hands of the victors, and their names, together with the games in which they had conquered, were proclaimed by a herald. A victory at Olympia, besides being the highest honour which a Greek could obtain, conferred so much glory on the state to which he belonged, that successful candidates were frequently solicited to allow themselves to be proclaimed citizens of states to which they did not belong. Fresh honours awaited the victor on his return home. He entered his native city in triumph, through a breach made in the walls for his reception; banquets were given to him by his friends, at which odes were sung in honour of his victory; and his statue was often erected, at his own expense or that of his fellow-citizens, in the Altis, as the sacred grove at Olympia was called. At Athens, according to a law of Solon, the Olympic victor was rewarded with a prize of 500 drachmæ: at Sparta the foremost place in battle was assigned him. Three instances are on record in which altars were built and sacrifices offered to conquerors at the Olympic games.—It seems to be generally admitted that the chief object of this festival was to form a bond of union for the Grecian states. Besides this, the great importance which such an institution gave to the exercises of the body must have had an immense influence in forming the national character. Regarded as a bond of union, the Olympic festival seems to have had but little success in promoting kindly feelings between the Grecian states, and perhaps the rivalry of the contest may have tended to exasperate existing quarrels; but it undoubtedly furnished a striking exhibition of the nationality of the Greeks, of the distinction between them and other races. Perhaps the contingent effects of the ceremony were after all the most important. During its celebration, Olympia was a centre for the commerce of all Greece, for the free interchange of opinions, and for the publication of knowledge. The concourse of people from all Greece afforded a fit audience for literary productions, and gave a motive for the composition of works worthy to be laid before them. Poetry and statuary received an impulse from the demand made upon them to aid in perpetuating the victor's fame. But the most important and most difficult question connected with the subject is, whether their influence on the national character was for good or evil. The exercises of the body, in which these games conferred the greatest honour, have been condemned by some philosophers, as tending to unfit men for the active duties of a citizen (*Aristot., Polit.*, 7, 14, 18.—*Athenaus*, 10, p. 413); while they are regarded by others as a most necessary part of a manly education, and as the chief cause of the bodily vigour and mental energy which marked the character of the Hellenic race.—The description which we have given of the Olympic games will, for the most part, serve also for the other three great festivals of Greece, namely, the Isthmian, Nemean, and Pythian games. (*Pausan.*, lib. 5, 6, *seqq.*—*West's Pindar, Prelim. Diss.*—*Wachsmuth, Hellen. Alterthumsk.*, vol. 1, p. 108.—*Potter's Grecian*

Antiquities, vol. 1, p. 495.—*Thirrhall's Greece*, vol. 1, p. 384, *seqq.*—*Encyclop. Us. Knowl.*, vol. 16, p. 430, *seqq.*—II. A name given to the aggregate of temples, altars, and other structures on the banks of the Alpheus in Elis, in the immediate vicinity of the spot where the Olympic games were celebrated. It was not, as many have incorrectly supposed, a city, nor did it at all resemble one. The main feature in the picture was the sacred grove Altis, planted, as legends told, by Hercules, and which he dedicated to Jupiter. (*Pind., Olymp.*, 10, 51.) Throughout this grove were scattered in rich profusion the most splendid monuments of architectural, sculptural, and pictorial skill. The site was already celebrated as the seat of an oracle; but it was not until the Eleans had conquered the Pisatæ, and destroyed their city, that a temple was erected to the god with the spoils of the vanquished. This temple of the Olympian Jove was of Doric architecture, with a peristyle. It was sixty-eight feet in height from the ground to the pediment, ninety-five in width, and two hundred and thirty in length. Its roof, at each extremity of which was placed a gilt urn, was covered with slabs of Pentelic marble. The architect was a native of the country, named Libo. In the centre of one of the pediments stood a figure of victory, with a golden shield, on which was sculptured a Medusa's head. Twenty-one gilt bucklers, the offering of the Roman general Mummius on the termination of the Achaean war, were also affixed to the outside frieze. The sculptures of the front pediment represented the race of Pelops and Ctenomæus, with Myrtilus and Hippodamia; also Jupiter, and the rivers Alpheus and Cladeus; these were all by Pæonius, an artist of Mende in Chalcidic Thrace. In the rear pediment, Alcmena had sculptured the battle of the Centaurs and Lapithæ. The other parts of the building were enriched with subjects taken from the labours of Hercules. On entering the gates, which were of brass, the spectator passed the statue of Iphitus crowned by Eecchiria, on his right; and, advancing through a double row of columns supporting porticoes, reached the statue of Jupiter, the *chef-d'œuvre* of Phidias. The god was represented as seated on his throne, composed of gold, ebony, and ivory, studded with precious stones, and farther embellished with paintings and the finest carved work. (*Pausan.*, 5, 11.) The Olympian deity was portrayed by the great Athenian artist in the sublime attitude and action conceived by Homer. (*Il.*, 1, 528, *seqq.*) The figure was of ivory and gold, and of such vast proportions that, though seated, it almost reached the ceiling, which suggested the idea that in rising it would bear away the roof. (*Strabo*, 354.) The head was crowned with olive. In the right hand it grasped an image of victory, and in the left a sceptre, curiously wrought of different metals, on which was perched an eagle. Both the sandals and vesture were of gold; the latter was also enriched with paintings of beasts and flowers by Panæus, the brother, or, as some say, the nephew, of Phidias. (*Pausan.*, 1, c.—*Strabo*, 1, c.) An enclosure surrounded the whole, by which spectators were prevented from approaching too near; this was also decorated with paintings by the same artist, which are minutely described, together with the other ornamental appendages to the throne and its supporters, by Pausanias. The ivory parts of the statue were constantly rubbed with oil as a defence against the damp (*Pausan.*, 5, 12), and officers, named *φαιδονομοί*, or cleaners, were appointed to keep it well polished. The veil of the temple was of wool dyed with Phœnician purple, and adorned with Assyrian embroidery, presented by King Antiochus. Various other offerings are mentioned by Pausanias, to whom the student is referred for an account of these, as well as a description, &c., of the other buildings at Olympia. Among the altars, the most remarkable was that in the

temple of Pelops. It was entirely composed of ashes collected from the thighs of victims, which, being diluted with water from the Alpheus, formed a kind of cement.—A conspicuous feature at Olympia was the Cronius, or Hill of Saturn, often alluded to by Pindar, and on the summits of which priests named Basile offered sacrifices to the god every year at the vernal equinox. (*Pind., Olymp.*, 10, 56.) Xenophon mentions (*Hist. Gr.*, 7, 4, 14) that, in a war waged by the Eleans with the Arcadians, Mount Cronius was occupied and fortified by the latter. Below that hill stood the temple of Lucina Olympia, where Sosipolis, the protecting genius of Elis, was worshipped. The stadium was a mound of earth, with seats for the Hellenodiceæ, who entered, as well as the runners, by a secret portico. The hippodrome, which was contiguous to the stadium, was likewise surrounded by a mound of earth, except in one part, where, on an eminence, was placed the temple of Ceres Chamyne. Not far from this were the Olympic gymnasia, for all sorts of exercises connected with the games.—Olympia now presents scarcely any vestiges of the numerous buildings, statues, and monuments so elaborately detailed by Pausanias. Chandler could only trace "the walls of the cell of a very large temple, standing many feet high and well built, the stones all injured, and manifesting the labour of persons who have endeavoured by boring to get at the metal with which they were cemented. From a massive capital remaining, it was collected that the edifice had been of the Doric order." (*Travels*, vol. 2, ch. 76.) Mr. Revett adds, that "this temple appears to be rather smaller than that of Theseus at Athens, and in no manner agrees with the temple of the Olympian Jove." The ruins of this latter edifice, as Sir W. Gell reports, are to be seen towards the Alpheus, and fifty-five geographic paces distant from the Hill of Saturn. There are several bushes that mark the spot, and the Turks of *Lalla* are often employed in excavating the stones. Between the temple and the river, in the descent of the bank, are vestiges of the hippodrome, or buildings serving for the celebration of the Olympic games. These accompany the road to *Miracca* on the right for some distance. The whole valley is very beautiful. (*Cramer's Anc. Greece*, vol. 3, p. 95, *seqq.*)

OLYMPIAS, I. an Olympiad, or the space of time intervening between any two celebrations of the Olympic games. (*Vid.* Olympia I.) The Greeks computed time by means of them, beginning with B.C. 776, each Olympiad being regarded as equal to four years. The last one (the 304th) fell on the 440th year of the Christian era. (Consult remarks at the commencement of the article Olympia I.)—II. daughter of Neoptolemus, king of Epirus, and wife of Philip, king of Macedon, by whom she had Alexander the Great. The conduct of Olympias had given rise to the suspicion that Alexander was not the son of Philip; and the brilliant career of the Macedonian conqueror made his flatterers assign to him for a parent the Father of the Gods. Olympias herself, in the intoxication of female vanity, hesitated not, at a later day, to sanction the story, and Jupiter was said to have approached her under the form of a serpent. (Consult Wieland, *ad Lucian. Pseudomant.*, § 13.—*Sueton.*, *Vit. Aug.*, 92.—*Böttiger, Sabina*, p. 212.) The haughtiness of Olympias, or, more probably, her infidelity, led Philip to repudiate her, and contract a second marriage with Cleopatra, the niece of King Attalus. The murder of Philip, which happened not long after, has been attributed by some to her intrigues, though with no great degree of probability. Alexander, after his accession to the throne, treated her with great respect, but did not allow her to take part in the government. At a subsequent period, after the death of Antipater, Polysperchon, in order to confirm his power, recalled

Olympias from Epirus, whither she had fled, and confided to her the guardianship of the young son of Alexander. She now cruelly put to death Aristeus, son of Philip, with his wife Eurydice, as also Nicanor, the brother of Cassander, together with many leading men of Macedonia who were inimical to her interests. Her cruelties, however, did not remain long unpunished. Cassander besieged her in Pydna, and she was obliged to surrender after an obstinate siege, and was put to death. (*Vid.* Cassander.—*Justin*, lib. 7, 9, 11, 14, &c.)

OLYMPIODORUS, a name common to many individuals. The most deserving of our notice are the following: I. A native of Thebes in Egypt, flourished in the beginning of the fifth century of our era. He continued the history of Eusebius from 407 to 425 A.D. His work, entitled *Τὰ ἐν Ἱστορίαις* ("Materials for History"), or *Ἱστορικὰ Λόγια* ("Historical Narratives"), consisted of twenty-two books. Only a fragment of it has been preserved by Photius. The work began with the seventh consulship of the Emperor Honorius, and was brought down to the accession of Valentinian. It was dedicated to the younger Theodosius. The historian appears to have been employed also on public business, for he mentions his having been sent on a mission to Donatus, king of the Huns. In his description of the African Oases, he speaks of wells being made to the depth of 200, 300, and even 500 cubits, and of the water rising up and flowing from the aperture. Some have supposed that these must have been Artesian wells. Olympiodorus was a heathen.—II. An Alexandrian philosopher, who flourished about the year 430 B.C. He is celebrated for his knowledge of the Aristotelian doctrines, and was the master of Proclus, who attended upon his school before he was 20 years of age. This philosopher is not to be confounded with a Platonist of the same name who wrote a commentary upon Plato. He is also to be distinguished from a peripatetic of a still later age, who wrote a commentary on the Meteorology of Aristotle.—III. A Platonic philosopher, who flourished towards the close of the sixth century. He was the author of Commentaries on four of Plato's dialogues, the first Alcibiades, the Phædon, Gorgias, and Philebus. The first of these contains a life of Plato, in which we meet with certain particulars relative to the philosopher not to be found elsewhere. This Olympiodorus was a native of Alexandria, and enjoyed great reputation in that capital, as will appear from a distich appended to his commentary on the Gorgias. The title which his commentaries bear appears to indicate by the words *ἀπὸ φωνῆς* ("from the mouth" of Olympiodorus) that they were copied down by the hearers of the philosopher. Sainte-Croix, however, thinks that this phrase is merely employed to indicate that the doctrine contained in the commentaries was traditional in its nature. (*Magasin. Encycl.*, 3 ann., vol. 1, p. 195.) Fragments of the commentary on the Phædon are given in Fischer's edition of four Platonic dialogues (*Lips.*, 1783, 8vo), and in Foster's edition of five of Plato's dialogues (*Oxon.*, 1752, 8vo). Fragments of the commentary on the Gorgias were published by Routh, in his edition of the Gorgias and Euthydemus (*Oxon.*, 1784, 8vo). The commentary or scholia on the Philebus will be found in Stallbaum's edition of that dialogue (*Lips.*, 1820, 8vo). The commentary on the first Alcibiades forms the second part of Creuzer's *Initia Philosophiæ ac Theologiæ*, &c. (*Frankf.*, 1820, 8vo).—IV. A native of Alexandria, a peripatetic, who flourished during the latter half of the sixth century. He was the author of a commentary on the Meteorology of Aristotle, which was edited by Aldus, *Venet.*, 1551, fol. (*Schöll, Hist. Lit. Gr.*, vol. 7, p. 132, &c.)

OLYMPIUS, I. a surname of Jupiter at Olympia, where the god had a celebrated temple and statue, which

passed for one of the seven wonders of the world. (*Vid.* Olympia II.)—II. A poet. (*Vid.* Nemeseianus.)

OLYMPUS, I. a celebrated mountain on the coast of Thessaly, forming the limit, when regarded as an entire range, between the latter country and Macedonia. The highest summit in the chain, to which the name of Olympus was specially confined by the poets, was fabled to be the residence of the gods, and well deserved the honour. Travellers who have visited these shores dwell with admiration on the colossal magnificence of Olympus, which seems to rise at once from the sea to hide its snowy head amid the clouds. Dr. Holland, who beheld it from *Litochori* at its foot, observes, "We had not before been aware of the extreme vicinity of the town to the base of Olympus, from the thick fogs which hung over us for three successive days while traversing the country; but on leaving it, and accidentally looking back, we saw through an opening in the fog a faint outline of vast precipices, seeming almost to overhang the place, and so aerial in their aspect, that for a few minutes we doubted whether it might not be a delusion to the eye. The fog, however, dispersed yet more on this side, and partial openings were made, through which, as through arches, we saw the sunbeams resting on the snowy summits of Olympus, which rose into a dark blue sky far above the belt of clouds and mist that hung upon the sides of the mountain. The transient view we had of the mountain from this point showed us a line of precipices of vast height, forming its eastern front towards the sea, and broken at intervals by deep hollows or ravines, which were richly clothed with forest-trees. The oak, chestnut, beech, plane-tree, &c., are seen in great abundance along the base and skirts of the mountain; and, towards the summit of the first ridge, large forests of pine spread themselves along the acclivities, giving that character to the face of the mountain which is so often alluded to by the ancient poets." (*Travels*, vol. 2, p. 27.) The modern name of the mountain with the Greeks is *Elimbo*, and with the Turks *Sema-vat Evi*. (*Kruse, Hellas*, vol. 1, p. 282.—*Cramer's Anc. Greece*, vol. 1, p. 211, *seqq.*) "Few of the Grecian mountains," remarks Dodwell, "soar to the height of Olympus." Plutarch (*Vit. Emil. Paul.*), citing the philosopher Xenagoras, says that it is more than ten stadia in height, and M. Bernouille makes it 1017 toises (6501 English feet). It forms a gigantic mass, and occupies a very extensive space. Its southern side constitutes the boundary of Thessaly, and its northern base encloses the plains of Macedonia. To the west it branches out towards Othrys, where its remote swells are blended with those of Pindus, which terminates in the Adriatic with the abrupt and stormy promontory of Acroceraunia. Its rugged outline is broken into many summits, from which circumstance Homer gives it the epithet of *πολυδαιρῆς*. It is never completely free from snow, and Hesiod (*Theog.*, 118) characterizes it with the epithet of *νιφέεις*. Homer, in his *Iliad*, calls it *ἀγάννιφος*, whereas in his *Odyssey* he says that it is never agitated by the wind, rain, or snow, but enjoys a clear and luminous air. (*Il.*, 1, 420.—*Od.*, 6, 45.) Nothing is easier, says an ingenious author, than to reconcile these apparent contradictions. M. Boivin, indeed, employs for this purpose a climax of singular conjecture. He supposes a heavenly Olympus, which he turns upside down, with its foot in the heavens, where it never snows, and its summit towards the earth; to which part he conceives Homer gave the epithet of snowy. As the gods and mortals were Anticephali, he maintains that Homer imagined mountains to be in similar situations! (*Mém. de Litt. dans l'Hist. de l'Acad. des Inscr.*, &c., vol. 7.) But the poet represents the seat of the gods as on the summit of Olympus, under the clouds, and of course he does not imagine it turned upside down.—Olympus is full of breaks, glens, and forests, whence it had the epithets

of πολέπυρος and πολυδένδρεος. (*Dodwell's Tour*, vol. 2, p. 105, *seqq.*)—Near the top Dodwell encountered large quantities of snow, and at last reached a part where the mountain became bare of all vegetation, and presented only a cap of snow and ice, on which it was impossible to be sustained or to walk. At this time it was the middle of July; the heat was extreme towards the base of the mountain, as well as in the plain, while the masses of snow near its summit gave no signs of melting. The view from the highest accessible part of Olympus is described as being very extensive and grand. The mountain seemed to touch Pelion and Ossa, and the vale of Tempe appeared only a narrow gorge, while the Peneus was scarcely perceptible. There are hardly any quadrupeds to be seen beyond the half height of Olympus, and scarcely do even birds pass this limit.—The idea has been started, on mere conjecture, however, that the name *Olympus* may have some reference to the idea of a "limit" or "boundary," and it is a curious fact that the positions of most, if not all, of the mountains that bear this name would seem to countenance the assertion. The most remarkable instances, after the one we have just been considering, are the following.—II. A range of mountains in the southwestern angle of Bithynia. Mount Olympus, the loftiest of the range, rose above Prusa, and was one of the highest summits in Asia Minor, being covered with snow during great part of the year. (*Brown's Travels*, in Walpole's Collection, vol. 2, p. 112.) The lower parts, and the plains at the foot, especially on the western side, had from the earliest period been occupied by the Mysians, whence it was generally denominated the Mysian Olympus. (*Plin.*, 5, 32.) Its sides were covered with vast forests, which afforded shelter to wild beasts, and not unfrequently to robbers, who erected strongholds there. (*Strab.*, 574.) We read in Herodotus, that, in the time of Croesus, an immense wild boar, issuing from the woods of Olympus, laid waste the fields of the Mysians, and became so formidable that the inhabitants were obliged to send a deputation to the Lydian monarch to request his aid for deliverance from the monster. (*Herod.*, 1, 86.) The lower regions of this great mountain are still covered with extensive forests, but the summit is rocky, and destitute of vegetation. The Turks call it *Anadolî Dagh*. (*Cramer's Asia Minor*, vol. 1, p. 178.)—III. A mountain range of Lycia, on the eastern coast, above the Sacrum Promontorium. A city of the same name was situate in a part of the range. Mount Olympus would appear to be the chain to which Homer alludes in the *Odyssey* (5, 282, *seqq.*), under the name of the Solymean mountains, whence he supposes Neptune to have beheld in his wrath Ulysses sailing towards Phœnicia. The mountains rising at the back of the perpendicular cliffs which line the shore in this quarter, attain to the height of six and seven thousand feet. The highest, as we learn from Captain Beaufort, bears the name of *Adratchan*, and appears to answer to the Olympus of Strabo. (*Caramania*, p. 43.—*Cramer's Asia Minor*, vol. 2, p. 257.)—IV. A city of Lycia, alluded to in the preceding paragraph. It ranked among the six communities of Lycia. (*Strab.*, 666.) Cicero also bears testimony to its importance and opulence. Having become the residence and haunt of pirates, it was captured by Servilius Isauricus, and became afterward a mere fortress. (*Cic. in Verr.*, 1, 21.—*Eutrop.*, 6, 3.—*Plin.*, 5, 27.) Strabo states, that it was the stronghold of the pirate Zenicetus; and the situation was so elevated that it commanded a view of Lycia, Pamphylia, and Pisidia. (*Strab.*, 671.) We are indebted to Captain Beaufort for the discovery of the ruins of this place, which exist in a small circular plain, surrounded by the chain of *Adratchan* (*vid.* Olympus III.), and at a little distance from the sea. The only way leading to the site is by

a natural aperture in the cliff; it is now called *Delik-tash*, or "the perforated rock." (*Cramer's Asia Minor*, vol. 2, p. 257, *seq.*)—V. A mountain on the eastern coast of Cyprus, just below the promontory Dinetum. It is now *Monte Santa-Croce*. This mountain had on it a temple sacred to Venus Acraea, from which women were excluded; the mountain itself was shaped like a breast. (*Strab.*, 683.—*Cramer's Asia Minor*, vol. 2, p. 379, 385.)

OLYNTHUS, a powerful city of Macedonia, in the district of Chalcidice, at the head of the Sinus Toronæicus. It was founded probably by the Chalcidians and Eretrians of Eubœa. (*Strabo*, 447.) Herodotus relates, that it was afterward held by the Bottiæi, who had been expelled from the Thermaic Gulf by the Macedonians; but on the revolt of Potidaea, and other towns on this coast, from the Persians, it was besieged and taken by Artabazus, a commander of Xerxes, who put all the inhabitants to the sword, and delivered the town to Critobulus of Torone and the Chalcidians. (*Herod.*, 8, 127.) Perdiccas, some years after, persuaded the Bottiæi and Chalcidians to abandon their other towns and make Olynthus their principal city, previous to their engaging in hostility with the Athenians. (*Thucyd.*, 1, 58.) In this war, the Olynthians obtained some decisive advantages over that republic; and the expedition of Brasidas enabled them effectually to preserve their freedom and independence, which was distinctly recognised by treaty. From this time, the republic of Olynthus gradually acquired so much power and importance among the northern states of Greece, that it roused the jealousy and excited the alarm of the more powerful of the southern republics, Athens and Lacedæmon. The Olynthians, apparently proceeding on the federal system, afterward so successfully adopted by the Achæans, incorporated into their alliance all the smaller towns in their immediate vicinity; and, by degrees, succeeded in detaching several important places from the dominions of Amyntas, king of Macedonia, who had not the power of protecting himself from these encroachments. At length, however, a deputation from the Chalcidic cities of Apollonia and Acanthus, whose independence was at that time immediately threatened by Olynthus, having directed the attention of Sparta, then at the height of its political importance, to this rising power, it was determined, in a general assembly of the Peloponnesian states, to despatch an army of ten thousand men into Thrace. (*Xen., Hist. Gr.*, 5, 2, 14.) Teletias, brother of Agesilaus, and one of the most distinguished commanders of Sparta, was appointed to conduct the war. Having collected his forces, and those of Amyntas and his allies, he marched against the Olynthians, who ventured to give him battle before their walls; but, after a well-fought action, they were compelled to take refuge within their city. In a skirmish, however, which happened not long after, the Peloponnesian forces, in their disorderly pursuit of a body of Olynthian cavalry close to the town, were thrown into confusion by a sortie of the enemy, which communicated such a panic to the whole army, that, notwithstanding the efforts of Teletias to stop the flight of his troops, a total rout ensued, and he himself was slain. (*Hist. Gr.*, 5, 3.) This disaster, instead of disheartening, called forth fresh exertions on the part of the Spartan government. Agesipolis, one of the kings, was ordered to take the command, and prosecute the war with vigour. This young monarch had already obtained some advantages over the enemy, when he was seized with a disorder, which, baffling all remedies, soon proved fatal: he died at Aphyte, near the temple of Bacchus. Polybiades, his successor, had thus the credit of putting an end to the war; for the Olynthians, left to their own resources, found themselves unable to cope with their powerful

and persevering antagonists, and were at length forced to sue for peace, which was granted on condition that they should acknowledge their dependance on Sparta, and take part in all its wars. (*Xen., Hist. Gr.*, 5, 4, 27.) Olynthus, though awed and humbled, was far from being effectually subdued; and not many years elapsed before it renewed its attempts to form a confederacy, and again dismember the Macedonian states. In consequence of the alliance which it entered into with Amphipolis, once the colony of Athens, it became involved in hostilities with the Athenians, supported by Philip, son of Amyntas, who had just ascended the throne of Macedon; and Potidæa and Methone were successively wrested from its dominion. Indeed, Olynthus itself could not long have resisted such powerful enemies, had not jealousy, or some secret cause, spread disunion among the allies and induced them to form other designs. Shortly after, we find Philip and the Olynthians in league against Athens, with the view of expelling that power from Thrace. (*Demosth., Olynth.*, 2, p. 19.) Amphipolis was besieged and taken by assault; Potidæa surrendered, and was restored to Olynthus, which for a time became as flourishing and powerful as at any former period of its history. Of the circumstances which induced this republic to abandon the interests of Macedon in favour of Athens, we are not well informed; but the machinations of the party hostile to Philip led to a declaration of war against that monarch; and the Athenians were easily prevailed upon by the eloquence of Demosthenes to send forces to the support of Olynthus under the command of Chares. Although these troops were at first successful, it was evident that they were unable effectually to protect the city against the formidable army of Philip. The Olynthians, beaten in two successive actions, were soon confined within their walls; and, after a siege of some duration, were compelled to surrender, not without suspicion of treachery on the part of Eurysthenes and Laesthenes, who were then at the head of affairs. On obtaining possession of this important city, Philip gave it up to plunder, reduced the inhabitants to slavery, and razed the walls to the ground. (*Diod. Sic.*, 16, 53.—*Demosth., Phil.*, 3, p. 113.—*Justin*, 8, 4.—*Cramer's Anc. Greece*, vol. 1, p. 249, *seqq.*)

OMBOS, a city of Egypt, a little north of Syene, on the eastern side of the Nile. The Antonine Itinerary calls it *Ambos* (p. 165), and Ptolemy, *Ombi* (*Ὀμβί*). The edition of Erasmus has *Ὀμβί* by a mistake of the press.) Pliny speaks of the *Ombitis Præfectura*, whence we may conclude that Ombos was at one period the capital of a Nome. (*Plin.*, 5, 9.) Its position is now found in the name of *Koum-Ombi*, or the *Hill of Ombi*. Between the inhabitants of this place and Tentyra constant hostilities prevailed, the former adoring, the latter killing, the crocodile. A horrible instance of religious fury, which took place in consequence of their mutual discord, is the subject of the 15th satire of Juvenal. (Consult *Rupert's ad Sat. cit.*) In relation to the Ombites worshipping the crocodile, while the inhabitants of Tentyra and other places destroyed it, we may cite the explanation of two of the French savans (*Chabrol and Jomard, Descript. de l'Égypte*, vol. 1.—*Antiq.*, c. 4, p. 8, *seqq.*). They suppose, that the crocodile was revered by those cities which were more or less removed from the immediate vicinity of the Nile, by reason of its swimming towards them when the river began to overflow its banks, and thus bringing the first intelligence of the approach of the inundation. (Compare *Creuzer, Comment. Herod.*, p. 84.)

OMPHALE, a queen of Lydia, daughter of Iardanus. She married Tmolus, who, at his death, left her mistress of his kingdom. Omphale had been informed of the great exploits of Hercules, and wished to see so illustrious a hero. Her wish was soon gratified. Af-

ter the murder of Iphitus, Hercules fell into a malady, and was told by the oracle at Delphi that he would not be restored to health, unless he allowed himself to be sold as a slave for the space of three years, and gave the purchase-money to Eurytus as a compensation for the loss of his son. Accordingly, in obedience to the oracle, he was conducted by Mercury to Lydia, and there sold to Omphale. During the period of his slavery with this queen, he assumed female attire, sat by her side spinning with her women, and from time to time received chastisement at the hand of Omphale, who, arrayed in his lion-skin, and armed with his club, playfully struck him with her sandal for his awkward way of holding the distaff. He became by this queen the father of Agelaus, from whom, according to Apollodorus, came the race of Cræus (*ὄθεν καὶ τὸ Κροίσου γένος*.—*Apollod.*, 2, 7, 7). Some writers make the Lydian Heraclidæ to have sprung from this union, and not the line of Cræus; but the weight of authority is in favour of the opinion that the Heraclidæ of Lydia claimed descent from Hercules and a female slave of Iardanus. (*Creuzer, Fragm. Hist.*, p. 186, *seqq.*—*Hellanic.*, *ap. Steph. Byz.*, s. v. *Ἀκίλη*.—*Diod. Sic.*, 4, 31.—*Dio Chrysost.*, *Orat.*, 4, p. 236, b.)—The myth of Hercules and Omphale is an astronomical one. The hero in this legend represents the Sun-god, who has descended to the *ὀμφαλός* (*omphalos*), or "navel" of the world, amid the signs of the southern hemisphere, where he remains for a season shorn of his strength. Hence the Lydian custom of solemnizing the festival of the star of day by an exchange of attire on the part of the two sexes; and hence the fable of the Grecian writers, that Hercules had assumed, during his servitude with Omphale, the garb of a female. (*Creuzer, Symbolik, par Guigniaut*, vol. 2, pt. 1, p. 179.) Walker, however, takes a moral view of the legend which we have just been considering, and regards it as expressing the abasement of power amid sensual indulgence. (*Analysis of Beauty*, p. 32.)

ONCHUM, a town of Arcadia, near Thelpusa, on the banks of the river Ladon. The place was famed for a temple of Ceres, and the legend connected with it was as follows: When Ceres was in search of her daughter Proserpina, Neptune continually followed her. To elude him, she changed herself into a mare, and mingled with the mares of Oncus; but the sea-god assumed the form of a horse, and thus became the father of the celebrated steed Arion. (*Pausanias*, 8, 25, 4.)

ONCHESMUS, a town of Epirus, on the coast, situate, according to Strabo (324), opposite the western extremity of Corcyra. Dionysius of Halicarnassus pretended that the real name of this place was Anchisæ Portus, derived from Anchises the father of Æneas. (*Ant. Rom.*, 1, 32.) Cicero seems to refer to the port of Onchesmus, when he speaks of the wind Onchesmites as having favoured his navigation from Epirus to Brundisium. (*Ep. ad Att.*, 7, 2.—*Cramer's Anc. Greece*, vol. 1, p. 96.) Pouqueville gives *Santi Quaranta* as the modern name of Onchesmus (vol. 2, p. 133), or, more correctly, of a small place near it (vol. 2, p. 104).

ONCHESTUS, I. a river of Thessaly, rising near Cynoscephalæ, and falling into the Sinus Pelagicus. It is supposed to correspond to the modern *Patrassi*. (*Liv.*, 33, 6.—*Polyb.*, 18, 3.—*Steph. Byz.*, s. v.) Some have thought it to be the same with the river which Herodotus calls Onochonus (7, 196), but without any good reason. The Onochonus, whose waters were drained by the army of Xerxes, falls into the Peneus, and is probably the river *Rejani*. (*Cramer's Ancient Greece*, vol. 1, p. 390.)—II. A city of Boeotia, north-west of Thebes, and south of the lake Copais. It received its name from Onchestus, a son of Neptune, whose temple and grove are often celebrated by the

poets of antiquity, from Homer to Lycophron. Sir W. Gell noticed, on the ascent uniting Mount Phaga or Sphinx on the left, with the projecting hills from Helicon on the right, an immense tumulus of earth and stones, and many other vestiges, probably of Onchestus. (*Ilin.*, p. 125.—*Cramer's Anc. Greece*, vol. 2, p. 231, *seqq.*)

ONÉSICRITUS, a Cynic philosopher, a native of Ægina, and, according to Diogenes Laertius, a disciple of Diogenes of Sinope. He accompanied Alexander into Asia, and officiated as pilot to the principal vessel in the fleet of Nearchus. He wrote a history of Alexander's expedition, a work swarming with falsehoods and absurdities. (*Ælian*, H. A., 16, 39.—*Diog. Laert.*, 6, 4.—*Sainte-Croix, Examen des Hist. d'Alex.*, p. 38.)

ONION, a city of Egypt, southwest of Heroöpolis. It was inhabited by Jews, who had a temple here, which continued from the time of Onias, who built it, to that of Vespasian. Onias was nephew to Menelaus, and the rightful successor to the priesthood at Jerusalem; but, being rejected by Antiochus Eupator, who made Alcimus high-priest, he fled to Egypt, and persuaded Ptolemy Philometor to let him build this temple there, about 173 B.C. This structure remained for the space of 248 years, when it was destroyed by order of Vespasian, after the fall of Jerusalem. (*Josephus*, *Ant. Jud.*, 14, 14.—*Id.*, *Bell. Jud.*, 1, 7.)

ONOMACRITUS, a Greek poet in the time of the Pisistratides, who is said to have written the "hymns of initiation" (*teletai*) ascribed to Orpheus. (*Vid.* Orphica.) He was accused also of interpolating the poems of Musæus, mention of which has already been made in another article. (*Vid.* Musæus.) The oracles of this latter poet were collected by Onomacritus, in compliance with the orders of Hipparchus; but the poet Lasus of Hermione having discovered the fraud committed by him in intermingling his own verses among the ancient predictions, Onomacritus was thereupon driven into exile as an impostor by Hipparchus. It appears that from this time it was no longer possible to distinguish what was genuine in the poetry of Musæus from what was mere interpolation. (*Herod.*, 7, 6.—*Pausan.*, 1, 22.)

ONOSANDER, or, as Coray writes the name, ONESANDER, a Greek author and Platonic philosopher. Concerning the period in which he flourished, nothing more can be ascertained than that he lived about the middle of the first century. He was the author of a work of much celebrity, entitled, *Στρατηγικός λόγος*, being a treatise on the duties of a general. This production is the source whence all the works on this subject, in Greek and Latin, that were subsequently published, derived their origin. It is still held in estimation by military men. The best editions are, that of Schwebel, *Norimb.*, 1762, fol., and that of Coray, *Paris*, 1822, 8vo. Appended to the latter are the first elegy of Tyrteus and a translation of Onosander, both in French. The profits of his edition were given to the unfortunate sufferers of Chios. (*Schöll, Hist. Lit. Gr.*, vol. 5, p. 261, *seqq.*)

OPHELTES, son of Lycurgus, king of Nemea. Hypsipile, the Lemnian princess, whom her countrywomen had sold into slavery when they found that she had saved her father, was nurse to the infant Opheltēs, when the army of Adrastus marched to Nemea, on its way to Thebes. She undertook to guide the newcomers to a spring; and, for that purpose, left the child lying on the grass, where a serpent found and killed it. The Argive leaders slew the serpent and buried the child. Amphiaræus, the famous soothsayer and warrior, augured ill-luck from this event, and called the child Archemorus (*Fate-beginner*), as indicative of the evils that were to befall the chieftains. His other name, Opheltēs, is derived, according to the mythologists, from ὄφεις, as he died by the bite of a

serpent. Adrastus and the other chiefs then celebrated funeral games in his honour, which were the commencement of what were afterward called the Nemean games. (*Apollod.*, 3, 6, 4.—*Heyne, ad loc.*)

OPHIR, a land which was known to the Hebrews and to the neighbouring nations as early as the time of Job, and was famed for producing such an abundance of excellent gold, that "the gold of Ophir" became a proverbial expression for fine gold. (1 *Chron.*, 29, 4.—*Job*, 22, 24.—*Id.*, 28, 16.—*Psalms*, 45, 9.—*Isaiah*, 13, 12.) The Septuagint version gives *Sophira* (Σοφίρα) as the name of the region; but various forms occur in the MSS., such as Σοφείρ, Σουφείρ, Σοφίρ, Σοφείρ, Σοφίρα, and Σοφάρα. We meet with this last also in Josephus (*Ant. Jud.*, 8, 6, 4.—Consult *Havercamp, ad loc.*). The position of Ophir is very difficult to determine, and much diversity of opinion exists among biblical critics on the subject. We are informed in Scripture, that Solomon, in conjunction with Hiram, king of Tyre, sent a navy from Ezion-geber, at the head of the Red Sea, to Ophir, and that this navy returned, bringing four hundred and twenty (in *Chronicles* 450) talents of gold, sandal-wood (called, in our translation, almug or algaum trees), and precious stones. (1 *Kings*, 9, 26–28.—*Id.*, 10, 11.—Compare 2 *Chron.* 8, 17, 18; *Id.*, 9, 10); and also that Jehoshaphat built ships of Tarshish to go to Ophir for gold (in *Chronicles* it is said that he built ships to go to Tarshish), which were wrecked at Ezion-geber. (1 *Kings*, 22, 48, 49.—Compare 2 *Chron.*, 20, 36, 37.) We are also told, in 1 *Kings*, 10, 22, that Solomon had at sea a navy of Tarshish with the navy of Hiram. Once in three years (or every third year) came the navy of Tarshish, bringing gold and silver, ivory, and apes, and peacocks.—Now, since both Solomon and Jehoshaphat built the navies bound for Ophir at Ezion-geber, at the head of the Red Sea, it is clear that we must seek for Ophir somewhere on the shores of the Indian Ocean; for it is highly improbable that Solomon's ships went farther than the Cape of Good Hope in one direction, or than the Indian Archipelago in the other: it is not likely, indeed, that they went so far either way. Nearly all the inquiries into the position of Ophir have proceeded on the assumption, that the passage in 1 *Kings*, 10, 22, refers to the same navy which is spoken of in 1 *Kings*, 9, 27, *seqq.*, and, consequently, that Tarshish and Ophir were visited in the same voyage. It has therefore been necessary for those who make this assumption, not only to find a place which suits the description of Ophir, and which produces "gold, sandal-wood, and precious stones," but also to account for the "silver, ivory, apes, and peacocks" which were brought by the navy of Tarshish, and for the three years consumed in the voyage. But Tarshish was probably the same place as Tartessus in Spain; and therefore, if Tarshish and Ophir are to be connected, we must make the gratuitous supposition that there was another Tarshish in the East. Besides, Tarshish and Ophir are not mentioned together in the account of Solomon's voyages: the ships that went to Ophir (1 *Kings*, 9, 28) seem to have made only a single voyage, for the purpose of fetching only a specified quantity of gold, while the "navy of Tarshish," which "the king had" (not going to Ophir, but) "at sea," made its voyage every three years; and, moreover, the products of the two voyages were different, gold being the only article common to the two. For these reasons, Rennell appears to be correct in saying "that two distinct kinds of voyages were performed by these fleets: that to Ophir from the Red Sea, and that to the coast of Guinea (or to Tarshish, wherever it was) from the Mediterranean." (*Rennell, Geogr. of Herodotus*, vol. 2, p. 353.) The conjoint mention of Ophir and Tarshish, in the account of Jehoshaphat's navy, admits of easy explanation. Either there may be some mistake in the account in 2 *Chron.*, 20, 36, *seqq.*

which differs materially from that in 1 Kings, 22, 48, seq., or "Tarshish" in the former passage may mean only "a distant voyage;" and we know that the phrase in the latter passage, "ships of Tarshish," is frequently used in the Old Testament for large, strong ships. The question, therefore, as to the position of Ophir must not be encumbered with any considerations that refer to Tarshish. (*Encycl. Us. Knowl.*, vol. 16, p. 447.)—The early Portuguese navigators believed that they had found Ophir in the modern *Sofala*, on the eastern coast of Africa, opposite the island of Madagascar, and this same opinion was subsequently maintained by Dapper (*Africa*, p. 395), Montequien, and Bruce (*Travels*, vol. 2, p. 352). The improbability, however, of this position being the true one, has been fully shown by Vincent (*Periplus*, p. 266) and Salt (*Voyage to Abyssinia*, p. 102). The chief ground, indeed, for so erroneous an opinion, seems to have been a supposed resemblance in name between *Sofala* and *Ophir*, or *Sophara*. Calmet places Ophir at the head waters of the Tigris and Euphrates, among the Taperes or Saspire; the gold being conveyed from this quarter, he supposes, to some harbour on the Persian Gulf. (*Dict. Bibl.*, s. v.) Bochart makes two Ophirs, one in Arabia, near the Sabæi (*Geogr. Sacr.*, 2, 27.—*Op.*, vol. 2, col. 138), and the other in India. The former only of these, he thinks, was known to the Jews down to the time of Solomon, who, in conjunction with Hiram, king of Tyre, first sent an expedition to the latter. This latter Ophir he considers to be identical with *Ceylon*. (*Geogr. Sacr.*, l. c.—*Op.*, vol. 2, ed. 141.) Wells places Ophir in India, in the vicinity of *Cabul*. (*Sacr. Geogr.*, s. v.) Schleusener is in favour of Spain. (*Lex. Vet. Test.*, vol. 3, p. 75.) Tychsen also decides in favour of India, and supposes Ophir to have been one of the *Isles of Sunda*, an island called Ophir lying near Sumatra at the present day. (*De Commere. et Navigat. Hebræorum*, &c.—*Comment. Gött.*, vol. 16, p. 164, seq.) Michaelis supposes Ophir to have been in Arabia, and condemns the opinion of Bochart, who finds another in India, as already stated. (*Spicilegium, Geogr. Hebr. ext.*, pars. 11, p. 184, seq.) Prideaux, Gossellin (*Rech.*, vol. 2, p. 118), Vincent (*Periplus*, p. 265, seq.), Niebuhr, and others, likewise declare for Arabia Felix, or the country of the Sabæi, where *Aphar* (*Saphar*) and the ruins of the ancient Himiarite dwellings make it probable to them that we must here look for the Ophir of Solomon. Mannert comes to the same conclusion. (*Geogr.*, vol. 10, pt. 1, p. 123.) It is most probable, therefore, that Ophir was in the southern part of Arabia. It is mentioned in connexion with the names of Arabian tribes, in *Genesis*, 10, 29. The "gold of Ophir" is spoken of in the book of *Job*, a work most probably of Arabian origin. The products of the voyage, too, might easily have been obtained from Arabia; for, though gold is not found there now, we have the testimony of many ancient writers that it was in ancient times. It is, however, very probable that Ophir was an emporium of the Phœnicians for their eastern trade; and, if so, the difficulty as to the productions is at once removed.—Before bringing this article to a close, it may not be amiss to notice the very singular opinion of Arius Montanus, who finds Ophir in Peru, the gold of *Paracain* (2 *Chron.*, 3, 6) being, according to him, the gold of that country (*Peru-ain*). It is of this that Scaliger remarks, "*Puto Arium Montanum illius jocularis interpretationis auctorem esse.*" (*Scaliger, Epist.*, 237.)

Orpis, I. a small river of Asia Minor, forming part of the eastern boundary of Pontus. It rises in the mountains of the Tzani, and falls into the Euxine to the southwest of Rhizæum. Reichard gives *Of* as the modern name. (*Arrian, Periplus Eux.*—*Hudson, Geogr. Min.*, 1, 6.)—II. A river in Arcadia, running by Mantinea, and falling into the Alpheus. (*Paus.*, 8, 8.)

OPHITHA (*Ὀφίθηα*) or *OPHIUSA* (*Ὀφίουσα*), a name given to many places in ancient geography, and referring to their having been, at one time or other, more or less infested by serpents (*ὄφις*, a serpent). The most worthy of notice are the following: I. An island in the Mediterranean, off the coast of Spain, and forming one of the *Pityussæ*, or Pine islands. By the Romans it was generally called *Colubraria*, a translation of the Greek name, and is now styled *las Columbreles*, or *Mont Colibres*. Strabo and Ptolemy confound it with *Formontera*. (*Ukert, Geogr.*, vol. 2, p. 471.)—II. A city of European Scythia, on the left bank of the river Tyras, which in Pliny's time was also called Tyra. The modern *Palanca*, not far from the mouth of the Dneister, is supposed to correspond to the ancient city. (*Pliny*, 4, 12.—*Bischoff und Möller, Wörterb. der Geogr.*, p. 806.)—III. The earlier name of the island of Tenos. (*Pliny*, 4, 12.)—IV. One of the earlier names of the island of Rhodes. (*Plin.*, 5, 31.)

Opici, the same with the *Osci*. (*Vid. Osci*.) "That *Opicus*, *Opacus*, and *Oscus* are the same name, is expressly remarked," observes Niebuhr, "by Roman grammarians. (*Festus*, s. v. *Oscum*.) The Greek language adopted only the first form, and the last prevailed in the Latin." (*Rom. Hist.*, vol. 1, p. 54, *Cambridge transl.*)—Bottmann indulges in some curious speculations respecting this and other ancient names of cognate form. "There is a multiplicity of traces," he observes, "which concur in proving that in the word *Apis*, *Apia*, lies the original name of a most ancient people who inhabited the European coasts of the Mediterranean. The fabulous personages *Pelops*, *Cercops*, *Merops*, compared with the names of countries and people, as the Peloponnesus and the Meropes (in Cos); and, in the same way, the names *Dryopes*, *Dryops*; *Dolopes*, *Dolops*, show that *Ops*, *Opes*, corresponding with the *Opici*, *Opaci*, in Italy, and meaning the same as *Apis*, were ancient names of people; and that the first syllable in those names served to distinguish the different families or tribes, as the *Pelopes*, *Cercopes*, *Meropes*, &c. The *Abantes* in Eubœa, the *Aones* in Bœotia, the *Awones* and *Osci* in Italy, are but varieties of the same name." (*Lezilogus*, p. 164, *not.*, *Fishlake's transl.*)

OPIMA SPOLIA, spoils taken by a Roman general from a general of the enemy whom he had slain. They were dedicated to, and suspended in the temple of, Jupiter Feretrius. These spoils were obtained only thrice before the fall of the republic. The first by Romulus, who slew Acron, king of the Cœninenes; the next by A. Cornelius Cosus, who slew Lars Tolumnius, king of the Veientes, A.U.C. 318; and the third by M. Claudius Marcellus, who slew Viridomarus, a king of the Gauls, A.U.C. 530.

OPIMUS, L. NEROS, was consul 121 B.C. He made himself conspicuous by his inveterate hostility to Caius Gracchus, and was the leader in the affray which terminated with the death of the latter. He was afterward convicted of having received a bribe from Jugurtha, and was banished. He ended his days in great poverty and wretchedness at Dyrrhachium. (*Cic.*, *Orat.*, 2, 132.—*Id.*, *pro Planc.*, 69.—*Sall.*, *Bell. Jug.*, 12.—*Vell. Patere.*, 2, 6.) From all that we can gather relative to this individual, it would appear that he was a victim to the spirit of party. His conduct towards Caius Gracchus and his followers is represented as cruel in the extreme; and yet, when brought to trial by the tribune Cilius for having put to death a great number of citizens during his consulship without observing the forms of justice, he was acquitted through the powerful eloquence of the consul Papirius Carbo. So, again, his trial and condemnation for bribery are pronounced by Cicero (*pro Sextio*) decidedly unjust. (Compare *Schægk. ad Vell. Patere.*, 2, 7.) During the consulship of Opimus, the heat of the

summer was so great as to produce an extraordinary fertility and excellence in all the fruits of the earth throughout Italy. Hence the Opimian wine became famous to a late period. (*Vid. Falernus.*)

ORIS, a city on the river Tigris, in Assyria, west of Artemita. It is probably the same with that which Pliny calls Antiochia. (*Herodotus*, 1, 189.—*Xen. Anab.*, 2, 4.—*Pliny*, 6, 27.)

OPITERGIUM, a city of Venetia in Northern Italy, on the right bank of the river Plavia. It is now Odezso, a town of some consequence. (*Strabo*, 214.—*Pliny*, 3, 19.) The Opitergini Montes are in the neighbourhood of this place, and among them rises the Liguentia or Livenza.

OPPIA LEX, by C. Oppius, a tribune of the commons, A.U.C. 540. It required that no woman should have in her dress above half an ounce of gold, nor wear a garment of different colours, nor ride in a carriage in the city or in any town, or within a mile of it, unless upon occasion of a public sacrifice. This sumptuary law was made during the public distresses consequent on Hannibal's being in Italy. It was repealed eighteen years afterward, on the petition of the Roman ladies, though strenuously opposed by Cato. (*Livy*, 34, 1.—*Tacit.*, *Ann.*, 3, 33.)

OPPIANUS, an eminent Greek grammarian and poet of Cilicia, two of whose works are still extant under the titles "*Cynegetica*" (*Κυνηγητικά*), or "On Hunting;" and "*Halieutica*" (*Ἀλιευτικά*), or "On Fishing." The time and place of his birth are not fully agreed upon. Syncellus (*Chronogr.*, p. 352, *seq.*) and Jerome (*Chron.*) place him in the reign of Marcus Aurelius Antoninus; but Sozomen (*Præf. ad Hist. Eccles.*), Suidas (*s. v. Ὀππιανός*), and others, make him to have lived in the time of Severus; and though Oppian, in both his poems, addresses the emperor by the name "*Antoninus*," it is more than probable that Caracalla is meant, as this appellation was conferred upon him when he was associated with his father in the empire (A.D. 198.—*Herodian*, 2, 10), and as this is the name by which he is commonly designated by the ancient historians, Herodian, Dio Cassius, &c. As to his birthplace, Suidas supposes it to have been Corycus, but the anonymous author of the Greek life of Oppian, and most other authorities, say that he was born at Anazarba, a city which also gave birth to Dioscorides. His father appears to have been a person of some consideration in his native city, for he was banished to the island of Melita, in the Hadriatic, by Severus, for suffering himself to be so entirely engrossed by his philosophical studies as to neglect coming in person, along with his fellow-citizens, to pay his respects to the emperor, when, in taking a progress through Cilicia, the latter made his entrance into Anazarba. He was accompanied in his exile by his son Oppian, who had enjoyed the advantage of an excellent education under the superintendence of his father, and who now began to devote himself to poetry. Accordingly, he now composed his poem on fishing, and presented it to the Emperor Severus (*Sozomen*, *Præf. ad Hist. Eccles.*), or, more probably (*Suidas*, *s. v. Ὀππιανός*.—*Oppian*, *Halieut.*, 1, 3.—*Id. ib.*, 4, 5), to his son Caracalla, who was so much pleased with it that he not only repealed the sentence of his father's banishment, but also presented Oppian with a piece of gold for each verse that it contained. Suidas says that he received on this occasion 20,000 gold pieces; but he must have counted the verses contained in all Oppian's poems, since the *Halieutica* consisted of only about 3500. Reckoning the *aureus* at about \$3 40 cts. of our currency, the sum received by the poet will be nearly \$12,000. The verses of Oppian might therefore well be called χρυσᾶ ἐπη, "*golden verses*." (*Sozomen*, l. c.)—Oppian died of the plague shortly after his return to his native country, at the early age of thirty, leaving behind him three poems, on "*Haw-*

ing" (*Ἱεστυκά*), "*Hunting*" (*Κυνηγητικά*), and "*Fishing*" (*Ἀλιευτικά*).—The *Ἱεστυκά* consisted of two books according to Suidas, or rather of five according to the anonymous Greek author of Oppian's life, and are no longer extant; but a Greek paraphrase in prose, by Eutecnius, of three books, was published in 1793 (*Hænnæ*, 8vo, ed. E. Windingius), which is also inserted in Schneider's edition of Oppian, *Argent.*, 8vo, 1776.—The "*Cynegetica*" are written in hexameter verse, consist of about 2100 lines, and are divided into four books. They display a very fair knowledge of natural history, with which, however, a good many absurd fables are mixed up.—The "*Halieutica*" are also written in hexameter verse, and consist of five books, of which the first two contain the natural history of fishes, and the last three the art of fishing. In this poem, as in the "*Cynegetica*," the author displays considerable zoological knowledge, though it contains several fables and absurdities. The "*Halieutica*" are much superior to the "*Cynegetica*" in point of style and poetical embellishment, and it is partly on account of this great disparity that it has been supposed that the two poems were not composed by the same person. But there are other and stronger reasons in support of this opinion (which was first put forth by Schneider, in the preface to his first edition of Oppian's works), rendering it almost certain that, though by the universal consent of antiquity Oppian wrote a poem on hunting, yet it cannot be that which now goes under his name. Oppian was, as we have seen, a Cilician, but the author of the "*Cynegetica*" tells us distinctly, in two different passages, that his native place was a city on the Orontes in Syria (probably Apamea, lib. 2, v. 125, *seqq.*—*Id.*, v. 156, *seq.*). Schneider supposes that the two Oppians were either father and son, or uncle and nephew. This opinion respecting two Oppians has been denied by Belin de Ballu, who published an edition of the "*Cynegetica*" in 1786, *Argent.*, 4to and 8vo, and who, as Dibdin says, "seems to have entered upon the task almost expressly with a determination to oppose the authority and controvert the positions of Schneider;" but it is only by altering the text in both passages (and that, too, not very skilfully) that he has been able to reconcile them with the commonly-received opinion that the poem is the work of Oppian. In Schneider's second edition he continues to hold his former opinion, and replies to the objections of Belin de Ballu. It appears, from an allusion to fishing and the sea deities, in the first book of the "*Cynegetica*" (v. 77, *seqq.*), that this poem was composed after the "*Halieutica*," and as a sort of supplement or companion to it; and this has tended to confirm the common opinion that both poems were written by the same author.—With regard to the poetical merits of Oppian, he seems to be one of those poets whose works have been more praised than read. Julius Cæsar Scaliger pronounces him to be "a sublime and incomparable poet, the most perfect writer among the Greeks, and the only one of them that ever came up to Virgil." (*Poët.*, 5, 9.) Sir Thomas Browne calls him "one of the best epic poets," and "wonders that his elegant lines should be so much neglected" (*Vulgar Errors*, 1, 8); and if, as Rapin says, he is sometimes dry (*Reflex. sur la Poétique*, p. 176), it may fairly be accounted for and excused when we consider the unpropitious nature of his subject." His style is florid and copious, the language upon the whole very good, though (as is noticed by Heinsius, *ad Nomi Dionys.*, p. 197) it is now and then deformed by Latinisms.—The last and (as far as it goes) the best edition of Oppian's two poems is Schneider's second one, which unhappily is unfinished, *Lips.*, 8vo, 1813. The most complete edition is that published by Schneider in 1776, *Argent.*, 8vo, containing also the paraphrase of the "*Ἱεστυκά*," by Eutecnius, to which we have already referred. Schneider published some addenda to this

edition in his *Analecta Critica, Francof.*, 1777, 8vo, Fascic., 1, p. 31, seqq.—(*Encycl. Us. Knowl.*, vol. 16, p. 459, seqq.—Schöll, *Hist. Lit. Gr.*, vol. 4, p. 67.)

Ora, called also *Tellus*, the goddess of the Earth, and the same with the *Rhea* of the Greeks. (*Vid.* *Rhea*.) Another form of her name was *Opis*. The appellation *Ops* or *Opis* is plainly connected with *opes*, "wealth," of which the earth is the bestower; and her festival, the *Opalia*, was on the same day with the original *Saturnalia*. (*Macrob.*, *Sat.*, 1, 10.—*Varro*, *L. L.*, 5, p. 57.—*Keightley's Mythology*, p. 525.)

Orus (gen. *Opuntis*), one of the most ancient cities of Greece, the capital of the Locri Opuntii, whose territory lay to the north of Bœotia. According to Strabo, it was fifteen stadia from the sea, and the distance between it and Cynus, its emporium, was sixty stadia. (*Strabo*, 425.) Livy places Opus, however, only one mile from the sea (28, 6).—This place is celebrated by Pindar as the domain of Deucalion and Pyrrha (*Ol.*, 9, 62), and by Homer as the birthplace of Patroclus (*Iliad*, 18, 325.) The form of government adopted by the Opuntians was peculiar, since, as we learn from Aristotle, they intrusted the sole administration to one magistrate. (*Polit.*, 3, 16.) Plutarch commends their piety and observance of religious rites. Herodotus informs us that they furnished seven ships to the Greek fleet at Artemisium (8, 1). They were subsequently conquered by Myronides, the Athenian general. In the war between Antigonus and Cassander, Opus, having favoured the latter, was besieged by Ptolemy, a general in the service of Antigonus. It was occupied several years after by Attalus, king of Pergamus, in the Macedonian war; but, on the advance of Philip, son of Demetrius, he was forced to make a precipitate retreat to his ships, and narrowly escaped being taken. (*Livy*, 28, 6).—The position of this town has not been precisely determined by the researches of modern travellers. (*Wheler's Travels*, p. 575.—*Melet.*, *Geogr.*, 2, p. 323.—*Dodwell*, vol. 2, p. 58.—*Gell's Itinerary*, p. 229.) Its ruins are laid down, in Lapie's map, a little to the southwest of *Alacki*, and east of *Talanta*. (*Cramer's Anc. Greece*, vol. 2, p. 117, seqq.)

ORACULUM, an oracle. The primary and proper signification of the term is that of a response from an oracle, and Cicero says that "*oracula*" were so called "quod inest in his *Deorum oratio*." (*Top.*, 20.) The word, however, is frequently employed to denote the place whence the answers of divinities, as regarded the events of the future, were supposed to be obtained. Oracular responses were called by the Greeks *χρησμοί* or *μαντεία*; the name *μαντείων* was also often given to the oracular place, or seat of the oracle.—Curiosity regarding the future, and the desire to penetrate its mysteries, are dispositions which excite a powerful control over the minds of men in every stage of society. Among nations that have made little advancement in civilization and intelligence, they operate with peculiar force; and in these dispositions, combined with the belief that the gods had both the ability and the inclination to afford the knowledge so eagerly sought after, the oracles of the pagan world had their origin. Of these oracles the most famous were those of Greece, and among them the three most noted were those of Dodona, Delphi, and Trophonius. In the number of other noted oracles of antiquity may be mentioned that of Jupiter Ammon in the deserts of Libya, of the Branchidæ in Ionia, of Pella in Macedonia, of the head of Orpheus at Lesbos, &c. There were also current in Greece numerous so-called prophecies, the production of individuals who were probably supposed to speak under a divine influence. Such were those of Bacis and Musæus, in which the battle of Salamis was predicted; and that of Lysistratus, an Athenian. (*Herod.*, 8, 96.)—Though the Romans had various modes of ascertaining the will of the deities, it does not ap-

pear that oracles, like those of Dodona or Delphi, were ever established among them; and we find that the oracles of Greece, and particularly the far-famed one of Delphi, were consulted by them on many important occasions. (*Livy*, 5, 15.—*Id.*, 22, 57, &c.)—The importance attached by the Greeks and Romans to oracular responses is a striking feature in the history of that people. Hardly any enterprise, whether public or private, of any moment, was undertaken without recourse being had to them, and their sanction being obtained. In later times, indeed, their influence was greatly diminished, and thus gradually fell into disrepute. Cicero affirms, that, long before his age, even the Delphic oracle was regarded by many with contempt; and there is little doubt that oracles were considered by philosophers as nothing different from what they really were, and by politicians as instruments which could be used for their purposes.—The modes in which oracular responses were delivered were various. At Dodona they issued from the sacred oaks, or were obtained from the sounds produced by the lashing of a brazen caldron. At Delphi they were delivered by the Pythia after she had inhaled the vapour that proceeded from the sacred fissure. At Memphis, a favourable or unfavourable answer was supposed to be returned, according as Apis received or rejected what was offered him. (*Vid.* *Apis*.) Sometimes the reply was given by letter: and sometimes the required information could be obtained only by casting lots, the lots being dice with certain characters engraven on them, the meaning of which was ascertained by referring to an explanatory table. Dreams, visions, and preternatural voices also announced the will of the divinities.—Bishop Sherlock, in his discourses concerning the use and intent of prophecy, expresses his opinion that it is impious to disbelieve the heathen oracles, and to deny them to have been given out by the Evil Spirit. Dr. Middleton, however, in his *Examination*, &c., confesses that he, for his own part, is guilty of this very impiety, and that he thinks himself warranted to pronounce, from the authority of the best and wisest heathens, and the evidence of these oracles, as well as from the nature of the thing itself, that they were all a mere imposture, wholly invented and supported by human craft, without any supernatural aid or interposition whatever. He adds that Eusebius declares that there were 600 authors among the heathens themselves who had publicly written against the reality of them. Although the primitive fathers constantly affirmed them to be the real effects of a supernatural power, and given out by the devil, yet M. de Fontenelle maintains, that while they preferred this way of combating the authority of the oracles, as most commodious to themselves and the state of the controversy between them and the heathens, yet they believed them at the same time to be nothing else but the effects of human fraud and contrivance, which he has illustrated by the examples of Clemens of Alexandria, Origen, and Eusebius.—Another circumstance respecting the ancient oracles, which has given birth to much controversy, is the time when they ceased altogether to give responses. Eusebius was the first who propounded the opinion that they became silent ever after the birth of Christ; and many writers, willing thus to do honour to the author of Christianity, have given it their support. Milton makes allusion to this theory also in the most magnificent of all his minor poems, "*The Hymn of the Nativity*." But the circumstance that may be made available for the purpose of poetical ornament happens unfortunately to be contrary to the fact. It appears from the edicts of the emperors Theodosius, Gratian, and Valentinian, that oracles existed, and were occasionally, at least, consulted as late as A.D. 358. About that period they entirely ceased, though for several centuries previous they had sunk very low in public esteem. So few resorted to them,

that it was no longer a matter of interest to maintain them. Towards this consummation Christianity powerfully contributed, by the superior enlightenment which it carried along with it wherever it was introduced, and by the display which it made of the falsehood and folly of the superstitions which it was destined to overthrow. (*Encycl. Us. Knowl.*, vol. 16, p. 464, *seq.*)—The Grecian oracles, or, at least, the most celebrated of them, were of foreign origin, and were established either by Egyptian or Phœnician strangers. (*Heeren, Ideen*, vol. 6, p. 94.—Compare *Knight's Inquiry*, § 43, 71, 223.) But it was impossible for these sacerdotal settlements to assume in Greece the aspect which they took in Africa. The character of the country and the spirit of the people were alike opposed to it. For though the popular religion in Greece was not wholly unconnected with politics, the state, having never, as in Egypt, been founded entirely upon religion, never made a temple its central point, these settlements, however, continued as oracles, of which the Greek stood in need both in public and private life. (*Heeren, Ideen*, l. c.—*Politics of Ancient Greece*, p. p. 78.) Somewhat analogous to this view of the subject is the position assumed by the advocates for the existence of early sacerdotal castes or colleges in Greece; and they consider the oracles as a remnant surviving the overthrow of sacerdotal power. Hence they undertake to explain why the oracles play so subordinate a part, and exercise so little influence in the earlier periods of Grecian history; for the struggle between the sacerdotal caste and the warlike portion of the population had been too recent for this, and the hatred of the latter was still ardent against those who had endeavoured to reduce them under their sway. (*Constant, de la Religion*, vol. 3, p. 369.) Homer speaks of no oracle except Dodona, and of that indirectly; no mention is made of Delphi in either of his poems. What had, however, been wrested by force from the sacerdotal caste, was in a great measure regained by the influence of these very oracles on the weak and superstitious. Everything that could tend to keep up a feeling of awe in the visitor was carefully exhibited. The seats of the oracles were established in the bosoms of forests, by the lonely sources of rivers, on wild and craggy mountains, in gloomy caves, but, above all, near the mansions of the dead; and, notwithstanding the efforts of philosophy, and the raillery and sarcasm of the comic muse, they succeeded in acquiring a power which often placed in the hands of their expounders the common fortunes of Greece.—The ambiguity of the oracular responses has always been a subject of remark: in this, indeed, all the artifice and adroitness of the priests directly centred. Every prediction was susceptible of a double meaning, and the veracity of the gods in this way remained safe from impeachment. It must be remarked, however, that this fatal ambiguity on the part of the oracles does not confine itself merely to the ages of tradition and fable. On the contrary, it becomes more frequent the more men part with the improper and degrading notions of the deity which they had originally entertained. As long as men are still sufficiently rude and ignorant to believe the gods capable of voluntary falsehood, the predictions of oracles need be marked by no ambiguity; a deviation from truth on the part of the deity is in such a condition of society regarded merely as a mark of divine anger. But when the character of the gods is better understood, and when their attributes are made to assume a more perfect and becoming form, their honour is consulted, and the hypothesis of intentional falsehood on their part is no longer admitted. The predictions of Jupiter in the *Iliad* are false, but not obscure, whereas the oracles mentioned in Herodotus are obscure in order not to be false. Thus it is not merely Laius who, by exposing his newly-born child, prepares the accomplishment of the very

prediction which he believed he was eluding: it is not Croesus alone who rushes to his own destruction by marching against the King of Persia, because the gods had announced to him that, by crossing a certain river, he would overthrow a great empire; at a much later period than all this we find the Pythoness inducing the Lacedæmonians by a response of similar ambiguity to engage in a war with the Tegeans, who put them to the rout (*Herod.*, l. 66); and again we see the oracle of Dodona; in counselling the Athenians to establish themselves in Sicily, excite them to engage in a war with Syracuse, which proved the primary cause of their downfall and ruin, while all the time the Sicily indicated by the oracle was merely a small hill in the neighbourhood of Athens. (*Pausan.*, 8, 2.) In fine, it was at a period characterized by the general diffusion of mental culture that Epaminondas, who had always avoided maritime expeditions, because the gods had warned him to beware of *pelagos*, that is, as he thought, the sea, died in a wood which bore this name in the vicinity of Mantinea. These anecdotes, whether we regard the occurrences connected with them as authentic facts or otherwise, serve nevertheless to show the prolongation of popular belief on this all-engrossing topic.—When a religion has fallen and been succeeded by another, the more zealous advocates of the new belief sometimes find themselves in a curious state of embarrassment. So it is with regard to the heathen system and the Christian code. Among the numerous oracles given to the world in former days, some have chanced to find a remarkable accomplishment; and the pious but ill-judging Christian, unable to ascribe them to deities in whom man no longer believes, is driven to create for them a different origin. "God," says Rollin, "in order to punish the blindness of the heathen, sometimes permits evil spirits to give responses conformable to the truth." (*Hist. Anc.*, 1, 387.) The only evil spirit which had an agency in the oracular responses of antiquity was that spirit of crafty imposture which finds so congenial a home among an artful and cunning priesthood. (*Constant, de la Religion*, vol. 3, p. 369, *seqq.*)

ORBILIUS PUPILLUS, a grammarian of Beneventum, who was the first instructor of the poet Horace. He came to Rome in his 50th year, in the consulship of Cicero. From the account which Suetonius gives of him, as well as from the epithet "*plagor*" applied to him by Horace, he appears to have been what we would call at the present day a rigid disciplinarian. Orbilius, in early life, had served as a soldier. On settling at Rome he acquired more fame than profit, and is said to have alluded to his poverty in one of his writings. He published also a work entitled "*Perialogos*," containing complaints against parents on account of the treatment which instructors of youth were accustomed to receive at their hands. Orbilius reached nearly his 100th year, and for a long time before his death had completely lost his memory. A statue was erected to him at Beneventum. He left a son, named also Orbilius, who, like himself, was an instructor. (*Sueton., de Illustr. Gramm.*, 9.—*Horat., Epist.*, 2, 1, 71.)

ORCADES, islands to the north of Britain, answering to the modern *Orkney* and *Shetland* isles. They are supposed to have been first discovered by the fleet of Germanicus when driven in this direction by a storm. Agricola afterward made the Romans better acquainted with their existence as islands, separate from the mainland of Britain, when he circumnavigated the northern coast of that country. Mela (3, 6), following the oldest accounts, makes the number of these islands to be thirty, and this statement is received by subsequent writers, with the exception of Pliny (4, 16), who gives forty as the amount, provided the reading be correct. Orosius, in a later age, would seem to have had more recent information on this point, since

he states the number at thirty-three, of which twenty, according to him, were inhabited, and the remaining thirteen deserted.—The *Orkneys* at the present day are still called *Orca* by the French. They are separated from the northern extremity of Scotland by the Pentland Straits or Frith, in which the sea is so boisterous that the surf upon the rocks spreads a fine rain to a league's distance within the land: no wind, however strong, will enable the mariner to stem the current in this place. The group consists of 87 islands and islets, 27 of which are inhabited. Red sandstone is the prevailing rock. The soil of some of the islands is of inferior quality, but that of others is excellent. The *Shetland* or *Zealand* islands are eighty-six in number, of which forty are inhabited. They contain granite and rocks of igneous origin, with red sandstone: their vegetation is poorer than that of the *Orkneys*, and their soil for the most part is marshy. (*Malic-Brun*, vol. 8, p. 684.)

ORCHOMENUS, I. a celebrated city of Bœotia, near the Cephissus, and to the northwest of the Lake Copia. It was the second city of the land, and at one time even rivalled Thebes itself in wealth, power, and importance. Its first inhabitants are said to have been the Phlegyas, a lawless race, who regarded neither gods nor men, but laid the whole country under contribution by their frequent and daring robberies. (*Hom., Hymn. Apoll., 278.—Schol. in Apoll. Rhod., 1, 735.—Hom., Il., 13, 302.—Pausan., 9, 36.*) Pausanias, however, reports that a city named Andris existed before the time of Phlegyas, who is said to have been a son of Mars. The Phlegyas having been destroyed by the gods for their impiety, with the exception of a small remnant who fled into Phocis, were succeeded by the Minyæ (*vid. Minyæ*), who are commonly looked upon as the real founders of Orchomenus, which thence obtained the surname of "the Minyean." (*Od., 11, 283.—Pind., Ol., 14, 1.—Apoll. Rhod., 8, 1094.—Thucyd., 4, 36.*) At this period Orchomenus became so renowned for its wealth and power that Homer represents it as vying with the most opulent cities in the world. (*Il., 9, 381.*) These riches are said to have been deposited in a building erected for that purpose by Minyas, and which Pausanias describes as an astonishing work, and equally worthy of admiration with the walls of Tiryns or the pyramids of Egypt (9, 36). Thebes was at that time inferior in power to the Minyean city, and in a war with Erginus, king of the latter, was compelled to become its tributary. (*Strabo, 414.—Pausan., l. c.*) As another proof of the wealth and civilization to which Orchomenus had attained, it is mentioned that Eteoclea, one of its early kings, was the first to erect and consecrate a temple to the Graces (*Strab., l. c.—Pausan., 9, 35*), whence Orchomenus is designated by Pindar (*Pyth., 12, 45*) as the city of the Graces. In a war waged against Hercules, its power, however, was greatly impaired, though at the period of the Trojan war it still retained its independence, since we find it mentioned by Homer as a separate principality, distinct from Bœotia. (*Il., 2, 511.*) It appears to have joined the Bœotian confederacy about sixty years after the siege of Troy (*Strabo, 410*), and Thucydides informs us in his time it was no longer termed the Minyean, but the Bœotian Orchomenus (4, 76.—Compare *Herod., 8, 34*). It was occupied by the Lacedæmonians at the time they held the Cæmean citadel, but joined the Thebans after the battle of Leuctra. (*Diod. Sic., 15, 57.*) The latter, however, being now in the height of their ascendancy, not long after made an expedition against Orchomenus, and, having seized upon the town, put to death the male inhabitants, and enslaved the women and children. (*Diod. Sic., 15, 79.—Pausan., 9, 15.*) The pretext for this was an attempt on the part of some Orchomenian horsemen, 300 in number, to get possession of

Thebes, in conjunction with certain exiles from the latter city. During the sacred war Orchomenus was twice in the possession of Onomarchus and the Phocians (*Diod. Sic., 16, 33*), but on peace being concluded it was given up by Philip to the Thebans. (*Demosth., de Pac., p. 62.—Phil., 2, p. 69.*) Orchomenus was not restored to liberty and independence till the time of Cassander, when that prince rebuilt Thebes. (*Pausan., 9, 3.*) It is mentioned by Dicaearchus as existing at this period. (*Stat., Græc., 96.*)—Compare *Plut., Vit. Syll.—Arrian, Exp. Al., 1, 9.*—According to the accounts of modern travellers, the ruins of Orchomenus are to be seen near the village of *Scripou*. Dodwell says, "This celebrated city still exhibits traces of its former strength, and some remains of its early magnificence. The Acropolis stands on a steep rock, rising close to the west of the lower town; the Cephissus winds at its southern base. The walls, which extend from the plain to the summit of the hill, enclose an irregular triangle, the acuter angle of which terminates at the summit of the rock, which is crowned with a strong tower, the walls of which are regularly constructed. In the interior a large cistern is formed in the solid rock; ninety-one steps are cut in the rock, and lead up to the tower, the position of which is remarkably strong. It commands an extensive view over Phocis and Bœotia, while the distant horizon is terminated by the mountains of Eubœa" (vol. 1, p. 229). At the eastern foot of the Acropolis the same antiquary observed some remains of the treasury of Minyas. "The entrance is entire, though the earth, being raised above its ancient level, conceals a considerable part of it, as only six large blocks, which are of regular masonry, remain above ground. The whole building is of white marble, which must have been brought from a great distance, as the nearest quarries are those of Pentelicus." Mr. Dodwell found by approximation the diameter of the building to have been upward of sixty-five feet, which shows it to have been far superior to the treasury at Mycenæ. "The architecture of that portion which remains is composed of a single block, fifteen feet four inches in length, the breadth six feet three inches, the thickness three feet three inches, and it weighs at least twenty-four tons" (vol. 1, p. 227). Sir W. Gell says, "It has been a dome, formed by approaching blocks, laid in horizontal courses, which do not diverge from a centre like the principle of an arch. The interior of the building was in the form of a cone, or, rather, beehive. There seem to be two other treasures very near, but buried. Hence there is a steep ascent to the citadel, passing some huge blocks in the way." In the monastery of *Scripou* are several inscriptions, with the name of the city written *Erchomenos*. This appears also in the coins of the city, where the epigraph is *EPX.* instead of *OPX.* In others of more recent date it is *OPXOMENION*. (*Cramer's Anc. Greece*, vol. 2, p. 244, *segg.*) With regard to the form *Erchomenos*, the remarks of Baet may be consulted. (*Lettre Critique à Boissonade sur Anton. Lib.*, p. 123.—Compare *Müller, Orchomenos und die Minyer*, p. 129.)—II. A city of Arcadia, some distance to the northwest of Mantinea. It was first situated on the summit of a hill, but was afterwards, as we learn from Pausanias, removed to the plain below. Tradition assigned its foundation to Orchomenus, the son of Lycaon (*Pausan., 8, 3*), and its antiquity is farther evinced by Homer's mention of it in the catalogue of ships. (*Il., 2, 605.*) Orchomenus sent 120 soldiers to Thermopylæ (*Herod., 7, 102*) and 600 to Platæa (9, 28). In the Peloponnesian war, this town, being in alliance with Sparta, was besieged and taken by the Argives and Athenians. (*Thucyd., 5, 61.*) Several years after that event it fell into the power of Cassander (*Diod. Sic., 19, 63*), but, having at length regained its independence, joined

the Achaean league. Surprised again by Cleomenes, it was retaken by Antigonus Doson, who placed there a Macedonian garrison. After his death, however, it appears to have reverted to the Achæans. (*Polyb.*, 2, 46.—*Id.*, 2, 64.—*Id.*, 4, 6.—*Strabo*, 338.) The plain of Orchomenus was in a great measure occupied by a small lake, formed by the rain-water which descended from the surrounding hills: one of these, situated over against the town, was named Trachys. The modern village of *Kalpaki* is built on the ruins of Orchomenus. (*Cramer's Anc. Greece*, vol. 3, p. 306, *seqq.*)—III. A city of Thessaly, on the confines of Macedonia. (*Schol. in Apoll. Rhod.*, 2, 1186.—*Van Staveren, ad Hygin., fab.*, 1.—*Müller, Orchomenos und die Minyer*, p. 249.)—IV. A city of Pontus, according to the scholiast on Apollonius Rhodius (2, 1186). Consult the remarks of Müller (*Orchomenos*, &c., p. 288).

ORCUS, the god of the lower world, in the old Latin religion, corresponding to the Hades or Pluto of the Greeks. Verrius says that the ancients pronounced *Orcus* as if written *Uragus*, or, rather, *Urgus*, whence it would signify the *Driver* (from *urgeo*), answering to the Hades-Agesilaus of the Greeks. This etymology, however, is very doubtful. (*Festus*, s. v.—*Keightley's Mythology*, p. 527.)

ORDOVICES, a people of Britain, occupying what would correspond at the present day to the northern portion of *Wales*, together with the isle of *Anglesey*. (*Tacit., Hist.*, 13, 33.—*Mannert, Geogr.*, vol. 2, pt. 2, p. 187.) It was probably owing to the nature of their country, and to the vicinity of *Deva*, now *Chester*, where a whole Roman legion was quartered, that the Romans had so few towns and stations among the Ordovices. Mediomaniun was their capital, and was probably situated at *Maywood* or *Meisad*, in *Montgomeryshire*. (*Mela*, 3, 6.—*Plin.*, 4, 16.—*Mannert*, l. c.)

OREIDES, nymphs of the mountains, so called from the Greek *ὄρος*, "a mountain." Another form of the name is *Orestiades* (*Ὀρεστιάδες*). They generally attended upon *Diana*, and accompanied her in hunting. (*Virg., Æn.*, 1, 504.—*Ovid, Met.*, 8, 787.—*Hom., Il.*, 6, 420.)

ORESTÆ, a people of Epirus, situate apparently to the southeast of the *Lyncestæ*, and, like them, originally independent of the Macedonian kings, though afterward annexed to their dominions. At a later period, having revolted under the protection of a Roman force, they were declared free on the conclusion of peace between Philip and the Romans. (*Liv.*, 33, 34.—*Id.*, 42, 38.) Their country was apparently of small extent, and contained but few towns. Among these *Orestia* is named by *Stephanus Byzantinus*, who states it to have been the birthplace of *Ptolemy*, the son of *Lagus*. Its foundation was ascribed by tradition to *Orestes*. This is probably the same city called by *Strabo* (326) *Argos Oresticum*, built, as he affirms, by *Orestes*. *Hierocles* also (p. 641) recognises an *Argos* in Macedonia. (*Cramer's Ancient Greece*, vol. 1, p. 197.)

ORESTES, son of *Agamemnon* and *Clytemnestra*. On the assassination of *Agamemnon*, *Orestes*, then quite young, was saved from his father's fate by his sister *Electra*, who had him removed to the court of their uncle *Strophius*, king of *Phocis*. There he formed an intimate friendship with *Pylades*, the son of *Strophius*, and with him concerted the means, which he successfully adopted, of avenging his father's death, by slaying his mother and *Ægisthus*. (*Vid. Clytemnestra*, and *Ægisthus*.) After the murder of *Clytemnestra*, the *Furies* drove *Orestes* into insanity; and when the oracle at *Delphi* was consulted respecting the duration of his malady, an answer was given that *Orestes* would not be restored to a sane mind until he went to the *Tauric Chersonese*, and brought away

from that quarter the statue of *Diana* to *Argos*. It was the custom in *Taurica* to sacrifice all strangers to this goddess, and *Orestes* and *Pylades*, having made the journey together, and having both been taken captive, were brought as victims to the altar of *Diana*. *Iphigenia*, the sister of *Orestes*, who had been carried off by *Diana* from *Aulis* when on the point of being immolated (*Vid. Aulis*, and *Iphigenia*), was the priestess of the goddess among the *Tauri*. Perceiving the strangers to be Greeks, she offered to spare the life of one of them, provided he would carry a letter from her to Greece. This occasioned a memorable contest of friendship between them, which should sacrifice himself for the other, and it ended in *Pylades'* yielding to *Orestes*, and agreeing to be the bearer of the letter. The letter was for *Orestes*, and a discovery was the consequence. *Iphigenia*, thereupon, on learning the object of their visit, contrived to aid them in carrying off the statue of *Diana*, and all three arrived safe in Greece. *Orestes* reigned many years in *Mycenæ*, and became the husband of *Hermione*, after having slain *Neoptolemus*. (*Vid. Hermione*, and *Pyrrhus* 1.)—Such is the ordinary form of the legend of *Orestes*. The tragic writers, of course, introduced many variations. Thus, it is said, that when the *Furies* of his mother persecuted him, he fled to *Delphi*, whose god had urged him to commit the deed, and thence went to *Athens*, where he was acquitted by the court of *Areopagus*. (*Æschyl., Eumen.*—Compare *Müller, Eumen.*)—*Orestes* had by *Hermione* two sons, *Tisamenus* and *Penthilus*, who were driven from their country by the *Heraclide*. (*Apollod.*, 2, 8, 5.—*Æschyl., Orest.*—*Soph., Electr.*—*Æschyl., Agam.*, &c.)

ORESTHEUM or ORESTHÆUM, called by *Pausanias* (8, 3) *Oresthasium*, a town of *Arcadia*, southeast of *Megalopolis*, in the district of *Oresthis*. Its ruins, according to *Pausanias*, were to be seen to the right of the road leading from *Megalopolis* to *Tegæa* (8, 44). Allusion is made to it by *Euripides*. (*Orest.*, 1643.—*Electr.*, 1273.) It would seem from *Thucydides* and *Herodotus* to have been on the road from *Sparta* to *Tegæa*. (*Thucyd.*, 5, 64.—*Herod.*, 9, 11.) *Orestes* died here. (*Cramer's Anc. Greece*, vol. 3, p. 347.)

ORESTIÆ. *Vid. Orestæ*.

ORESTIÆS, the primitive name of *Adrianopolis*, in *Thrace*, and which the Byzantine authors frequently employ in speaking of that city. The name is derived from the circumstance of *Orestes* having purified himself on this spot after the murder of his mother. Three rivers had here their confluence, the *Hebrus*, receiving the *Ardicus* or *Arda* on one side, and the *Tonsus* or *Tonza* on the other. (*Vid. Adrianopolis*.)

ORETANI, a people of *Hispania Tarraconensis*, whose territory is supposed to have corresponded to the eastern part of *Extremadura*, the middle section of *La Mancha*, the eastern extremity of *Jaen*, and the northern extremity of *Granada*. (*Liv.*, 21, 11.—*Id.*, 35, 7.—*Plin.*, 3, 3.—*Polyb.*, 10, 38.—*Id.*, 11, 20.)

ORÆUS (*Ὀρεός*), an ancient city of *Eubœa*, in the northeastern part of the island, founded, as was said, by an Athenian colony. It was situate in the district of *Ellopiæ*. (*Strabo*, 445.) *Scymnus* of *Chios*, however, ascribes a Thessalian origin to the place. Its primitive name was *Histiæa*, and it retained this appellation until, having endeavoured to shake off the galling yoke of *Athens*, after the close of the Persian war, it met with a cruel punishment at the hands of that power. The inhabitants were expelled, and Athenian colonists were sent to occupy the lands which they had evacuated. (*Thucyd.*, 1, 115.) *Strabo*, on the authority of *Theopompus*, informs us, that the *Histiæans* withdrew on this occasion to Macedonia (l. c.). From henceforth we find the name of the place changed to *Oreus*, which at first was that of a small place dependant on *Histiæa*, at the foot of *Mount Telethrius*, and near the spot called *Drymos*, on the banks of the riv-

or Callas. Thucydides first notices Oreus at the close of his history, as the last place retained by the Athenians in Euboea (8, 96). From Xenophon we learn, that, having been subsequently occupied by the Lacedæmonians, who had expelled Neogenes the tyrant, it revolted from them previous to the battle of Leuctra. (*Hist. Gr.*, 5, 4, 57.) After that period we find Histia, or Oreus, governed by another tyrant named Philistides, who, as Demosthenes asserts, was secretly supported and befriended by Philip of Macedon (*Phil.*, 3, p. 125): he was afterward defeated and slain by the Athenians and Chalcidians. (*Steph. Byz.*, s. v.) Æschines, on the other hand, cites a decree of Oreus, to prove that Demosthenes had been bribed by the citizens of that town. (*Æsch. in Ctes.*, p. 68.)—In the second Punic war, Oreus, when besieged by Attalus and Sulpicius, a Roman general, was betrayed into their hands by Plator, who had been intrusted by Philip with the command of the place. (*Liv.*, 28, 6.) It must have been restored, however, to that monarch on peace being concluded; for, in the Macedonian war, we find it sustaining another obstinate siege against the same enemies, when it was taken by assault. (*Liv.*, 31, 46.—*Polyb.*, 11, 6.—*Id.*, 18, 28.) This city no longer existed in Pliny's time (4, 12). Its ruins are still to be seen near the coast, opposite to Cape Volo of Thessaly. (*Cramer's Anc. Greece*, vol. 2, p. 126.)

OROSTORIX, a nobleman of the Helvetii, the most conspicuous for rank and riches of any of his countrymen. He attempted to possess himself of the chief power in his native state, and was, in consequence, summoned to trial. His retainers, however, assembled in great numbers, and prevented the case from being heard. He died not long after, having fallen, as was supposed, by his own hands. (*Cæs.*, B. G., 1, 2, *seqq.*)

ORIBASIIUS, an eminent physician, and the intimate friend of the Emperor Julian, was born at Sardis, in Lydia, according to Suidas and Philostorgius (*Hist. Eccles.*, 7, 15), or, rather, according to Eusebius (*De Vita Philosoph. et Sophist.*), who was his contemporary, at Pergamus, a celebrated city of Mysia, and the birthplace of Galen. After enjoying the advantages of a good education, he became a pupil of Zeno, an able physician of Cyprus, to whom the Emperor Julian addressed a letter, still extant. (*Epist.*, 47.) Oribasius soon became so famous in the practice of his profession, as to induce Julian, upon being raised to the rank of Cæsar, to take him with him into Gaul as his physician, A.D. 355. Julian always held him in high esteem; and, indeed, he owed him a debt of gratitude, if, as Eusebius asserts, Oribasius aided in procuring for him the empire. How this was effected by Oribasius, the writer just mentioned does not state, and history is silent on the subject. It is this circumstance which has led Boissonade, the last editor of Eusebius, to doubt the accuracy of the meaning commonly attached to the words of this writer. He asks whether the passage in question, 'Ὁ δὲ τοσοῦτον ἐπλεονέκτει ταῖς ἀλλοδαῖς ἀρεταῖς, ὥστε καὶ βασιλεὺς τὸν Ἰουλιανὸν ἀπέδειξε, may not in fact mean that Oribasius had instilled into the bosom of Julian, both by precept and example, such virtues as made him *truly* a king? But, however this may be, it is certain that they were upon the most intimate terms, as is proved by one of Julian's letters, addressed to Oribasius, which still remains (*Epist.*, 17), and is, at the same time, a monument of their superstition and pagan idolatry. When Julian succeeded to the empire, A.D. 361, he raised Oribasius to the rank of quaestor of Constantinople, and afterward sent him to consult the oracle at Delphi, whence he brought back the celebrated answer, that the oracles had ceased to utter predictions. (*Cedrenus, Chronic.*, p. 304, ed. Paris, 1647.) Oribasius accompanied the emperor in his expedition against Persia, and was present at his death. He afterward fell

into disgrace through the envy of his enemies, had all his estate confiscated, and was banished by Valentinian and Valens. He supported his misfortunes with fortitude, and by his medical talents gained so much love and reverence, that the *barbarians* (as they were called) to whom he had come began almost to adore him as a god. At last the emperors, feeling the loss of his professional skill, recalled him from banishment, restored his confiscated fortune, and loaded him with honours. He was still alive when Eusebius, who was his intimate friend, wrote his account of his life, which is placed by Lardner about the year 400; and as this was more than 50 years after his attending Julian in Gaul, he must have lived to a good old age. There are in the Greek Anthology two epigrams written in honour of him.—Oribasius composed, by order of the Emperor Julian, an abridgment of the works of Galen, under the title of *Πραγματεία ἱατρικὴ* ("Treatise on Medicine"), in four books, a compilation entirely lost. He afterward, at the instance of the same monarch, made a collection of extracts from the writings of previous physicians; these he arranged in methodical order, and distributed into seventy books, as the title of the compilation indicates, *Ἐβδομηκοντάβιβλος*. (*Photius, cod.*, 217.) Suidas, however, says that it consisted of seventy-two. Of this large work we possess rather more than one third part, namely, books, 1–15, 24, 25, 43, 44, 45, 46, 47, 48, 49, 50. Dietz states, in the preface to his unedited "*Scholium in Hippocratem et Galenum*" (*Regim. Pruss.*, 1834, 2 vols. 8vo), that he discovered two more books that had been overlooked by Mai, but does not specify which they are. These he intended to insert in their proper places in the new edition of Oribasius which he was preparing for the press at the time of his death. Among these are books 43d to 47th inclusive, which treat of various matters connected with surgery, and are taken from the works of Galen, Heliodorus, Archigenes, Asclepiades, and other ancient writers on medicine. Oribasius subsequently made an abridgment of this great work, which he entitled *Σύνοψις*, in nine books. Although these two works are merely compilations, they are, notwithstanding, important for the history of the healing art: besides, the paraphrases of Oribasius serve frequently to explain passages in the originals which would be otherwise difficult to understand. Oribasius finally composed a treatise on *Simplex* (*Ἐμπόριον*), in four books. A commentary on the Aphorisms of Hippocrates, which exists merely in a Latin translation, has been erroneously ascribed to him; it is the work of a Christian writer, who, in order to make the production pass for an ancient one, feigned that it had been composed by order of Ptolemy Euergetes. (*Encycl. Us. Knowl.*, vol. 17, p. 10.—*Schöll, Hist. Lit. Gr.*, vol. 7, p. 248, *seqq.*)—"Oribasius," observes Mr. Adams, "is the first medical writer of celebrity after Galen, from whom he borrows so freely that he has been called the *Ape of Galen*. But, although this appellation might indicate that he is a servile copyist from his prototype, his work contains many curious things, which are either original or derived from some other source of information, which is now lost. He describes minutely the mode of letting blood by scarification, which, as described by him, is an operation that does not appear to have been practised by his predecessors. He is also particularly full upon the use of baths, and gives from Herodotus an account of the manner of practising with most advantage the bath of oil. This appears to have been a very powerful remedy, which has now been laid aside for no other reason than the expense attending it. No ancient writer on the *Materia Medica* has given so circumstantial an account of the mode of administering hellebore as he has done in the 8th book. In the 24th and 25th books of the *Collectanea*, he gives a complete treatise on anatomy, which, although mostly

copied from Galen, is highly valuable from its accuracy and precision. As Dr. Freind remarks, he has given a correct account of the salivary glands, which appear to have been overlooked by Galen; at least no description of them is to be found in such anatomical works of his as have come down to us. His method of treating epilepsy is also deserving of attention, as it appears to be a rational one, and yet is not clearly recommended by any other ancient authority. It consists in first abstracting blood several times, then administering drastic purgatives, such as colocynth, scammony, and black or white hellebore, applying cupping instruments to the occiput, and afterward sinapisms and other stimulants. In confirmation of the beneficial effects of hellebore in epilepsy, I would refer the reader to a case related by Aulus Gellius (17, 15). As a professed copyist from Galen, Oribasius may be safely consulted for a correct exposition of his doctrines."—We have no complete edition of Oribasius. The 40th chapter of the first book of the *Hebdomenkatabiles*, treating of waters, and the first six chapters of the fifth book, were edited by Riccius, *Roma*, 1548, 4to. The first two books were edited by Gruner, *Jena*, 1784, 4to. The 24th and 25th books, treating of anatomy, &c., were edited by Dundas, *Lugd. Bat.*, 1735, 4to. The 46th and 47th books, treating of fractures, &c., as well as the fragments of the books respecting bandages and dressings, are contained in the collection of Cocchi. There remain unedited from the 3d to the 15th books, and from the 43d to the 45th inclusive; and there remain to be discovered from the 16th to the 23d, and from the 26th to the 42d, inclusive. Latin translations, however, have been printed of some of the books that are yet unpublished in the Greek text.—The text of the *Abridgment* has never been printed. A Latin translation by Rasarius appeared at *Venice*, 1553, 8vo, and at *Paris*, 1554, 12mo.—The treatise on *Simplex*, translated into Latin, appeared at the end of Sichard's edition of Cælius Aurelianus, *Basle*, 1559, fol. Another translation by Rasarius is contained in the *Basle* edition of the works of Oribasius.—The *Commentary on the Aphorisms of Hippocrates* was published at *Paris* by Winter (Quintorius), 1533, 8vo, and reprinted at *Basle* in 1535, at *Rome* in 1553, and at *Padua* in 1558, in 8vo. (*Schöll, Hist. Lit. Gr.*, vol. 7, p. 250, *seqq.*)

ORICUM or ORICUS, a port of Illyricum, at the head of a bay, the outer side of which is formed by the Acroceraunian promontory. Seylax (p. 10) and other early writers place it in Illyria, while Ptolemy enumerates it among the cities of Epirus. Herodotus (9, 94) speaks of it as a port not far from Apollonia and the mouth of the Aölis. It was known also to Hecæatus and Apollodorus (*ap. Steph. Byz.*, s. v. Ὀρικόν). Scymnus of Chios appears to be the only writer who gives any account of its foundation; he ascribes it to the Eubœans after their return from Troy. These are the same people with the Abantes (v. 449). Apollonius speaks of the arrival of a party of Cælebsians in this port (4, 1216), whence Pliny calls it a colony of that people (3, 23). Oricum, however, is much more known in history as a haven frequented by the Romans in their communication with Greece, being very conveniently situated for that purpose from its proximity to Hydruntum and Brundisium. During the second Punic war, this town was taken by Philip, king of Macedonia, but was afterward recovered by the prætor Valerius Lavinius, who surprised the enemy in his camp before Apollonia during the night, and put him to the rout. Philip having retired into Macedonia, the Roman general established winter-quarters at Oricum. (*Livy*, 24, 49.) It was from this place that Paulus Æmilius sailed back to Italy, after having so happily terminated the Macedonian war. We find it subsequently occupied by Cæsar, soon after his landing on this coast. (*Bell. Civ.*, 3, 11.) Horace, Propertius, and Lucan also speak of Oricum as a well-known port in their time. (*Horat.*, *Od.*, 3, 7.—*Propert.*, 1, 8.—*Lucan.*, 3, 187.) Philostratus says the town of Oricus was restored by Herodes Atticus, together with many other Greek cities. It would seem from Virgil that it was famous for its turpentine. (*Æn.*, 10, 136.) Nicander alludes to its boxwood. (*Ther.*, v. 516.) No traveller appears to have investigated the remains of Oricum; but it would seem, from modern maps, that the name of *Ericho* is still attached to the spot on which the town must have stood. (*Mannert, Geogr.*, vol. 7, p. 407.—*Cramer's Anc. Greece*, vol. 1, p. 62, *seqq.*)

ORIGENES (Ὀριγῆνης), commonly called, by English writers, Origen, a celebrated father of the church, who flourished in the latter part of the second, and during the first half of the third, century. He was a native of Alexandria, where he chiefly resided. Origen was distinguished not more for his learning than for his piety and eloquence; and his indefatigable application to study procured for him the surname of *Adamantius* (Ἀδαμάντιος), i. e., "Man of adamant." Porphyry supposes him to be of heathen parentage, and educated in the heathen faith; but Eusebius, who wrote his life, has shown conclusively that his parents were Christians, and took the greatest possible care of his early religious instruction. His father Leonidas having been put to death during the persecution in the reign of Severus, Origen, who was then not quite seventeen years of age, was with difficulty restrained by the care of his mother from offering himself also for martyrdom. He sent a letter to his father in prison, containing this sentence: "Take heed, father, that you do not change your mind for our sake." After his father's death, Origen was supported for a short time by a rich lady of Alexandria, but he soon became able to support himself and the rest of the family (he was the eldest of seven children), by teaching grammar. At the age of eighteen, Demetrius, bishop of Alexandria, put him at the head of the catechetical school in that city, to the duties of which he devoted himself entirely and with great success. Renouncing his grammatical pursuits, he sold all his books connected with profane learning to an individual, who agreed, in return, to supply him with four oboli a day, and he made this scanty pittance suffice for all his wants. We are not told how long this payment was continued. His manner of life was now marked by the very extremity of self-denial; he drank no wine, ate little food, went barefoot even in winter, contented himself with a single garment, and took on the ground the little repose which he could not refuse to nature. So great was the interest excited by his discourses, that the philosophers, the learned, the very pagans themselves, flocked to hear him. During all this time Origen signalized his zeal for the true faith by visiting the confessors in prison, accompanying them into the judgment-hall, going with them to the place of execution, and giving them, when about to die, the kiss of peace. Conduct such as this, together with the fact of his having made many conversions, naturally exposed him to danger, and he was at last compelled constantly to change his place of abode in order to escape the persecution of the pagans. His retreats were frequently discovered, and he was more than once dragged through the streets of the capital, and put to the torture. His firmness, however, never forsook him.—Being a young man, and obliged, in the exercise of his office as catechist, to be frequently in the company of those whose presence might excite other thoughts than such as ought ever to be connected with his sacred functions, Origen, in order to avoid all temptation, took the words of Holy Writ (*Matt.*, 19, 12) in their most literal acceptation, and resorted to physical means as a preventive. Though he strove to keep this rash act a profound secret, yet Demetrius

eventually became acquainted with it. Surprised at the hardihood of the deed, and yet forced to respect such ardent and devoted piety in so young a man, he encouraged him to persevere. Origen himself was subsequently convinced of his error, and confuted in his writings the literal interpretation of a text which had led him to this extreme.—After a visit to Rome, where Zephyrinus was then bishop, Origen turned his attention to the acquiring of the Hebrew tongue, a thing very unusual at that time (*Hieron., de Vir. Illust.*, c. 56); but his knowledge of the language was never very great. About the year 212, his preaching reclaimed from the Valentinian heresy a wealthy person of the name of Ambrose, who afterward assisted him materially in the publication of his Commentaries on the Scriptures. His reputation kept continually increasing, and he became eminent not merely as an instructor in religion, but also in philosophy and human sciences. The governor of Arabia, having heard wonderful accounts of his abilities, requested Demetrius and the patriarch of Egypt to send Origen to him, that they might converse together on literature and the sciences. The voyage was made, and, when the curiosity of the ruler was gratified, Origen returned to his native capital. This city, however, he soon after quitted, and fled to Cæsarea to avoid the cruelties exercised upon the Alexandrians by the odious Caracalla. At Cæsarea he gave public lectures, and, though not yet a priest, was invited by the bishops in this quarter to expound the scriptures in the assemblies of the faithful. Demetrius took offence at this, and Origen, at his earnest request, returned to the capital of Egypt and resumed his former functions. About this time the Emperor Alexander Severus had stopped for a while at Antioch, to expedite the preparations for war against the Persians; and the Empress Mammea, who accompanied her son, sent letters and an escort to Origen, inviting him to Antioch. The opportunity was eagerly embraced, and Origen unfolded to his illustrious hearer the hopes and the promises of the gospel. At a later period also he had a correspondence with the Emperor Philip and his wife Severa. On his return once more to Alexandria, he directed his attention to the writing of commentaries on the Old and New Testaments, at the instance principally of Ambrose, whom he had both instructed in the sciences, and, as we have already observed, reclaimed from his heretical opinions. This disciple, well known in Alexandria by the fame of his riches, liberally supplied his former master with all the means requisite for pursuing his studies. Origen had around him several secretaries, to whom he dictated notes, and seven others to arrange these notes in order: the former were called *notarii*, the latter *librarii*. Other copyists were employed in transcribing works. Origen commented first on the Gospel of St. John, then on Genesis, the first twenty-five Psalms, and the Lamentations of Jeremiah. Obligated at this period to undertake a journey to Athens, for the purpose of succouring the churches of Achaia, he again visited Cæsarea on his way, where the bishop of this church and the bishop of Jerusalem ordained him priest. He was at this time forty-five years of age. Demetrius vehemently disapproved of this ordination, and made known the act committed by Origen on his own person, and which he had thus far kept secret. According to him, Origen could not be admitted to sacred orders, and he insisted that this point of ancient discipline could not be abandoned by the church. An assembly was convened, and Origen received orders to leave Alexandria, whither he had returned. In a second assembly or council, Demetrius pronounced sentence of deposition against him, and excommunicated him for the errors which he had propagated in his writings. These errors were principally contained in his Treatise on First Principles, and one of the most prominent is said to have been the opin-

ion maintained by him in favour of the finite punishment of the wicked, the doctrine of the modern Universalists. It must be observed, however, in behalf of Origen, that we are not fully competent, at the present day, to pronounce an opinion on this subject, or to determine whether he actually inclined towards this particular heresy. We no longer possess the Greek text of this work of his, and only know it through the medium of a very free, and, to all appearances, very unfaithful translation, executed by Rufinus. For some curious remarks on this head, the reader is referred to Bayle (*Dict.*, vol. 8, p. 44, *seqq.*, *ed. Lond.*, 1739). Origen retired, after this ecclesiastical sentence, to the city of Cæsarea, where, at the instance of the bishops in this quarter, he once more undertook to expound in public the Sacred Writings. Hearers came from far and near, and among them Firmilianus, one of the most illustrious bishops of Cappadocia. The most eminent of the disciples of Origen was undoubtedly St. Gregory Thaumaturgus, and in the discourse pronounced by this grateful follower in honour of his master, we see what was the method pursued by Origen, and by what degrees he conducted his pupils to the science of sciences. The persecution under Maximin compelled Origen to flee from Palestine, and he took refuge with Firmilianus, who concealed him for the space of two years in the house of a pious widow. In this abode he discovered a large number of volumes, which Symmachus, the translator of Scripture, had left as an heritage to the female with whom Origen was residing, and he was thus enabled to devote himself to profitable study, and compare together the different versions of the sacred volume. Ambrose, the disciple and generous friend of Origen, having been arrested, the latter addressed to him, from his place of retreat, an *Exhortation to martyrdom*. This production not only urges the motives which ought to animate to unshaken constancy the confessors of the faith, but also unfolds the rules of conduct and the principles of Christian philosophy to which they ought to adhere. The persecution having ceased on the death of Maximin, Origen returned to Alexandria, and ceased not to occupy himself with what had so long been the subject of his labours, the famous *Hexapla*. This great work was completed at Tyre, but in what year is not precisely known. At the age of sixty Origen consented that his Homilies or familiar sermons should be published: these had been taken down during delivery by *notarii*, and, though many had been lost, it is said that by this means more than a thousand of his discourses were preserved. As he was consulted from all quarters, his correspondence became very voluminous: more than a hundred of these letters were preserved by Eusebius, and, among the number, two in particular, one addressed to the Emperor Philip, and the other to his consort Severa. Origen wrote also to Fabian and other bishops, to repel imputations that had been cast upon his faith. After a long and honourable life, towards the close of which he wrote his famous work against Celsus, he suffered martyrdom, according to some accounts, in the Decian persecution; but, according to the more correct and general opinion, he died a natural death at Tyre, A.D. 254. His sufferings, however, during the last-mentioned persecution were dreadfully severe (*Euseb., Hist. Eccles.*, 6, 39. — *Niceph.*, 5, 32), and this, perhaps, has led to the error of supposing that they terminated his existence. Origen, says Epiphanius (*De Pond. et Mens.*), “suffered very much, yet he did not arrive at the end to which a martyrdom leads.”—Origen is undoubtedly one of the most remarkable men among the Christian writers. His talents, eloquence, and learning have been celebrated, not only by Christian writers, but by heathen philosophers, including Porphyry himself. Jerome calls him “a man of immortal genius, who understood

ORIGENES.

logic, geometry, arithmetic, music, grammar, rhetoric, and all the sects of the philosophers; so that he was resorted to by many students of secular literature, whom he received chiefly that he might embrace the opportunity of instructing them in the faith of Christ" (*de Vir. Illustr.*, c. 54). Elsewhere he calls him the greatest teacher since the Apostles. We find this same Jerome, however, at a later period of his life, violently attacking Origen, and approving of the persecution of his followers. Sulpicius Severus says, that in reading Origen's works he saw many things that pleased him, but many also in which he (Origen) was undoubtedly mistaken. He wonders how one and the same man could be so different from himself; and adds, "where he is right, he has not an equal since the Apostles; where he is in the wrong, no man has erred more shamefully." (*Dialog.*, l. 3.) All agree that he was a man of an active and powerful mind, and of fervent piety; fond of investigating truth, and free from all mean prejudices, of the most profound learning, and the most untiring industry. His whole life was occupied in writing, teaching, and especially in explaining the Scriptures. No man, certainly none in ancient times, did more to settle the true text of the sacred writings, and to spread them among the people; and yet few, perhaps, have introduced more dangerous principles into their interpretation. For, whether from a defect in judgment or from a fault in his education, he applied to the Scriptures the allegorical method which the Platonists used in interpreting the heathen mythology. He says himself, "that the source of many evils lies in adhering to the carnal or external part of Scripture. Those who do so shall not attain the kingdom of God. Let us therefore seek after the spirit and the substantial fruit of the word, which are hidden and mysterious." And, again, "the Scriptures are of little use to those who understand them as they are written."—In the fourth century, the writings of Origen led to violent controversies in the Church. Epiphanius, in a letter preserved by Jerome, enumerates eight erroneous opinions as contained in his works. He is charged with holding heretical notions concerning the Son and the Holy Spirit; with maintaining that the human soul is not created with the body, but has a previous existence; that in the resurrection the body will not have the same members as before; and that future punishments will not be eternal, but that both fallen angels and wicked men will be restored, at some distant period, to the favour of God. (*Hieron. adv. Ruf.*, lib. 2, vol. 4, p. 403.) These opinions were not generally held by his followers, who maintained that the passages from which they had been drawn had been interpolated in his writings by heretics. In 401, Theophilus, bishop of Alexandria, held a synod, in which Origen and his followers were condemned, and the reading of his works was prohibited; and the monks, most of whom were Origenists, were driven out of Alexandria. His opinions were again condemned by the second general council of Constantinople, in A.D. 553.—We will now proceed to give a more particular account of the several works of this father, as far as they have come down to us, or are known from the statements of other writers. 1. *Περὶ Ἀρχῶν* ("On First Principles"). This work was divided into four books; but we possess only a short notice of it in the *Myriobiblon* of Photius (*cod.*, 8), an extract in Eusebius (*contra Marc. Ancyran.*, lib. 1), and some fragments in the *Philocalia*. Rufinus made a Latin translation of the work in the fourth century, which has reached us; but he has, by his own confession, added so much to Origen's work, that it cannot be taken as a fair exhibition of his opinions. In the first book, Origen treats of God: he explains in it also his views with regard to the Trinity, which are in accordance with the principles of the Platonic school; and it is in this particularly that

ORIGENES.

he deviates from the path pointed out by the church, though it must be confessed that she had not yet expressed herself as clearly in relation to this fundamental doctrine, as she subsequently did at the Council of Nice. In this same book Origen starts the strange idea, that the stars are animated bodies. In the second book he discusses the origin of the world, which, like the Platonists, he regards as having been created from all eternity; the incarnation of the Son of God; the nature of the soul, which he assigns also to the brute creation; the resurrection of the dead, and eternal life. The third book treats of Free Agency; Demons or Evil Spirits, and the various ways in which men are tempted by them. The fourth book is devoted to the Interpretation of the Bible.—2. *Ἀποστροφὴ μὲν* ("Doctrines of the Philosophers"). This is properly the first book of a work entitled *Κατὰ πᾶσιν αἰρέσεων ἑλεγχος* ("Refutation of all sects"), and consisting of two books. In it Origen briefly explains the doctrines of the different Greek schools of philosophy, and the second book was devoted to their refutation. There is some doubt, however, whether Origen was actually the author of it.—3. *Commentaries* on the Old and New Testaments, the greater part of which, however, is now lost. In these Commentaries Origen gave full scope to his learning and imagination, in what appeared to him to be the historical, literal, mystical, and moral sense of the Bible. His grand fault, as we have already remarked, is that of allegorizing the Scriptures too much; and this method of interpretation he adopted from the Alexandrine philosophers, in the hope of establishing a union between heathen philosophy and Christian doctrine. His fundamental canon of criticism was, that, wherever the literal sense of Scripture was not obvious or not clearly consistent with his peculiar tenets, the words were to be understood in a spiritual and mystical sense; a rule by which he could easily incorporate any fancies, whether original or borrowed, with the Christian creed.—4. *Scholía*, or short notes explanatory of difficult passages of Scripture. Of these some extracts only are preserved in the collection made by Gregory Nazianzen and Basil the Great, entitled *Philocalia*.—5. *Homilies*, or familiar sermons, in which he addressed himself to the capacities of the people.—6. *Hexapla* (*Ἑξάπλῃ*). The great use which had been made by the Jews of the Septuagint, previously to their rejection of it, and the constant use of it by the Christians, naturally caused a multiplication of copies; in which, besides the alterations designedly made by the Jews, numerous errors became introduced, in the course of time, from the negligence or inaccuracy of transcribers, and from glosses or marginal notes, which had been added for the explanation of difficult words, being suffered to creep into the text. In order to remedy this growing evil, Origen, in the early part of the third century, undertook the laborious task of collating the Greek text then in use with the original Hebrew, and with the other translations then in existence, and from the whole to produce a new recension or revisal. Twenty-eight years were devoted to the preparation of this arduous task, in the course of which he collected manuscripts from every possible quarter, aided by the pecuniary liberality of Ambrose. Origen commenced, as has already been stated, his labour at Caesarea, and, it appears, finished his Polyglott at Tyre, but in what year is not precisely known. This noble critical work is designated by various names among ancient writers; as *Tetrapla*, *Hexapla*, *Octapla*, and *Enneapla*. The Tetrapla contained the four Greek versions of Aquila, Symmachus, the Septuagint, and Theodotion, disposed in four columns; to these Origen added two columns more, containing the Hebrew text in its original characters, and also in Greek letters; these six columns, according to Epiphanius, formed the Hexapla. Having subse-

quently discovered two other Greek versions of some parts of the Scriptures, usually called the fifth and sixth, he added them to the preceding, inserting them in their respective places, and thus composed the Octapla, containing eight columns. A separate translation of the Psalms, usually called the seventh version, being afterward added, the entire work has by some been termed the Enneapla. This last appellation, however, was never generally adopted. But, as the two editions made by Origen generally bore the name of the Tetrapla and Hexapla, Grabe thinks that they were thus called, not from the number of the columns, but of the versions, which were six, the seventh containing the Psalms only. Bauer, after Montfaucon, is of opinion that Origen edited only the Tetrapla and Hexapla; and this appears to be the real fact.—The original Hebrew being regarded as the basis of the whole work, the proximity of each translation to the text, in point of closeness and fidelity, determined its rank in the order of the columns; thus, Aquila's version, being the most faithful, is placed next to the sacred text; that of Symmachus occupies the fourth column; the Septuagint the fifth; and Theodotion's the sixth. The other three anonymous translations, not containing the entire books of the Old Testament, were placed in the last three columns of the Enneapla, according to the order of time in which they were discovered by Origen. In the Pentateuch, Origen compared the Samaritan text with the Hebrew as received by the Jews, and noted their differences. To each of the translations inserted in his Hexapla was prefixed an account of the author; each had its separate prolegomena; and the ample margins were filled with notes. A few fragments of these prolegomena and marginal annotations have been preserved, but nothing remains of his history of the Greek versions. Montfaucon supposes that the Hexapla must have made fifty large folio volumes. During nearly half a century this great work remained buried, as it were, in a corner of the city of Tyre, probably because the expense of procuring a copy exceeded the means of any single individual. It would, no doubt, have perished there, had not Eusebius and Pamphilus restored it to the light, and placed it in the library of the latter at Cæsarea. It may be doubted whether a copy of the original work was ever made. St. Jerome saw it still at Cæsarea, but as no writer makes mention of it after his time, it is probable that it perished in 653 A.D., when Cæsarea was taken by the Arabians.—To repair as much as possible the loss of the Hexapla of Origen, various scholars have occupied themselves, in modern times, with the care of restoring it. The first that undertook this task was Flaminio Nobili, in the notes to his edition of the Septuagint (Rome, 1587); and after him Drusius, in his *Fragmenta veterum interpretum* (Amst., 1622). With these materials, and with the aid of manuscripts, Montfaucon arranged his *Hexapla Origenis*, which were printed in 2 vols. folio, at Paris, in 1713, and were reprinted by Bahrdt (*Lips.*, 2 vols. 8vo, 1769). It is thought, however, that the learned Benedictine was not sufficiently well acquainted with Hebrew, and that he was deficient in critical acumen.—7. The last work of Origen's deserving of mention is his *Reply to Celsus*. This philosopher, a member of the Epicurean sect, had composed, under the Emperor Hadrian, a work against Christianity, replete with calumny and falsehood. (*Vid. Celsus II.*) At the instance of his friend Ambrose, Origen undertook to reply to it, and triumphantly succeeded.—The best edition of Origen's works is that of De la Rue, Paris, 1733–59, 4 vols. fol., reprinted by Oberthur, at Würzburg, in 15 vols. 8vo, 1780 and following years. The best edition of the commentaries separately is that of Huet, Rotom., 1668, 2 vols. fol. The Scholia were published by themselves in 1618, Paris, 4to. (*Horne's Introduc-*

tion, vol. 2, p. 172, seqq.—*Id. ibid.*, vol. 2, p. 742.—Schöll, *Hist. Lit. Gr.*, vol. 3, p. 451, seqq.—*Id. ibid.*, vol. 5, p. 223, seqq.—*Biogr. Univ.*, vol. 32, p. 71, seqq.—Montefalc., *Prælim. in Hex. Orig.*)

ORION ('Ορίων), a celebrated giant, was said by one legend to have been the son of Neptune and Euryale. His father, according to this same account, gave him the power of wading through the depths of the sea, or, as others say, of walking on its surface. (*Hæsiad, ap. Schol. ad Nicandr., Ther.*, 15.) He married Side, whom Juno cast into Erebus for contending with her in beauty. (*Apollod.*, 1, 4, 3.) Another and more common account makes Hyria, a town of Boeotia, to have been the birthplace of Orion, and the story of his origin is told as follows: As Jupiter, Neptune, and Mercury were one time taking a ramble upon earth, they came, late in the evening, to the house of a farmer named Hyrieus. Seeing the wayfarers, Hyrieus, who was standing at his door, invited them to enter, and pass the night in his humble abode. The gods accepted the kind invitation, and were hospitably entertained. Pleased with their host, they inquired if he had any wish which he desired to have gratified. Hyrieus replied, that he once had a wife whom he tenderly loved, and that he had sworn never to marry another. She was dead: he was childless: his vow was binding: and yet he was desirous of being a father. The gods took the hide of his only ox, which he, on discovering their true nature, had sacrificed in their honour; they buried it in the earth; and ten months afterward a boy came to light, whom Hyrieus named Union or Orion (*ἀνδρὶ τοῦ ὀρένιου*—*Euphorion, ap. Schol. ad Il.*, 18, 1, 86.—*Ovid, Fast.*, 5, 495, seqq.—*Hygin, fab.*, 195.—*Id., Poët. Astron.*, 2, 34.) This unseemly legend owes its origin to the name Orion, and was the invention of the Athenians. (*Müller, Orchem.*, p. 99.) In Hyginus, Hyrieus is Byrsus (from the *hide, βέρρα*).—When Orion grew up, he went, according to this same account, to the island of Chios, where he became enamoured of Merope, the daughter of Cænopion, son of Bacchus and Ariadne. He sought her in marriage; but, while wooing, seized a favourable opportunity, and offered her violence. Her father, incensed at this conduct, and having made Orion drunk, blinded him, and cast him on the seashore. The blinded hero contrived to reach Lemnos, and came to the forge of Vulcan, who, taking pity on him, gave him Kedalion (*Guardian*), one of his men, to be his guide to the abode of the Sun. Placing Kedalion on his shoulder, Orion proceeded to the East; and there meeting the Sun-god, was restored to vision by his beams. Anxious for revenge on Cænopion, he returned to Chios: but the Chians, aware of his intention, concealed the object of his search under the ground, and Orion, unable to find him, returned to Crete. (*Hæsiad, l. c.*—*Apollod.*, 1, c.—*Hygin.*, 1, c.)—The death of Orion is variously related. As all the legends relating to him are evidently later than the time of Homer, none ventures to assign any other cause to it than the goddess Diana, whose wrath (though Homer rather says the contrary) he drew on himself. Some said that he attempted to offer violence to the goddess herself; others to Opis, one of her Hyperborean maidens, and that Diana slew him with her arrows; others, again, that it was for presuming to challenge the goddess at the discus. It was also said that, when he came to Crete, he boasted to Latona and Diana that he was able to kill anything that would come from the earth. Indignant at his boast, they sent a scorpion, which stung him, and he died. It was said finally that Diana loved Orion, and was even about to marry him. Her brother was highly displeased, and often chid her, but to no purpose. At length, observing one day Orion wading through the sea with his head just above the waters, he pointed it out to his sister, and maintained that she could not hit that black thing on

the sea. The archer-goddess discharged a shaft: the waves rolled the dead body of Orion to the land; and, bewailing her fatal error with many tears, Diana placed him among the stars.—The hero Orion is not mentioned in the *Iliad*; but in the *Odyssey* (5, 121) we are told by Calypso, that rosy-fingered Aurora took him, and that Diana slew him with her gentle darts in Ortygia. In another place his size and beauty are praised. (*Od.*, 11, 309.—*Keightley's Mythology*, p. 461, *seqq.*)

—The constellation of Orion, which represents a man of gigantic stature wielding a sword, is mentioned as early as the time of Homer and Hesiod (*Il.*, 17, 486.—*Op. et D.*, 589, 616, 619.) Both poets, in alluding to it, use the expression *ὀρέας Ὀρίωνος*, "the strength of Orion" (i. e., the strong or powerful Orion), analogous to the *βίη Ἡρακλέη*. We must connect, therefore, with the idea of Orion, as represented on the celestial planisphere, that of a powerful warrior, armed with his "golden sword," or, as Aratus expresses it, *εἰς ἑρως . . . ἰμὲ πεποιδός* (v. 588). So, too, the Arabic name for this constellation, namely, *El-aschebbâr*, means the "Giant," the "Hero." According to Buttmann, the form *Orion* (*Ὀρίων*, *Pind.*, *Isth.*, 3, 67) is earlier than *Orion*, and the letter *o* itself has arisen from a peculiar mode of pronouncing the digamma, which is known to have had a sound resembling our *uk* or *w*. The name *Ῥάριον*, therefore, will be derived from *Ῥάριος* or *Ῥάρις*, and signify "a warrior." Indeed, the English term *Warrior* is almost identical in form with the Greek *Ῥάριον*, and the word *War* connects itself as plainly with the root of *Ῥάριος* or *Mars*. It is worthy of remark, too, that the constellation Orion was called by the Boeotians *Κανδάρων*, a derivative in all likelihood of *Κανδάρ*, a name given to the god Mars. (*Lycophr.*, 328.—*Tzetzs.*, *ad loc.*—*Lycophr.*, 938.)—That part of the legend, also, which relates to the ox's hide, is explained by the same eminent scholar, on the supposition of some resemblance having been discovered, between the position of the stars in this constellation and the hide of an ox. Thus the four stars, α , β , γ , δ , will indicate the four extremities or corners, and the feebler stars, which now form the head, will represent the neck. In the same way, the three brilliant stars in the middle may have suggested the idea of the three deities, Jupiter, Neptune, and Mercury. (*Buttmann, Anmerk.*—*Ideler, Sternnamen*, p. 331.)—The cosmical setting of Orion, which took place towards the end of autumn, was always accompanied with rain and wind. Hence the south wind is called by Horace "the rapid companion of the setting Orion" (*Od.*, 1, 28, 21), and Orion himself as "fraught with harm to mariners." (*Epid.*, 15, 7.—Compare *Od.*, 3, 27, 18.—*Virg.*, *Æn.*, 1, 535.—*Id. ib.*, 4, 52.)—From the view which has here been taken of the origin of the name *Orion*, it will be seen at once how erroneous is the etymology assigned by Isidorus, when he says, "*Orion dictus ab urina, id est ab inundatione aquarum. Tempore enim hiemis obortus, mare et terras aquis et tempestatibus turbat.*" (*Orig.*, 3, 70.) There is also another error here. It was not the rising, but the cosmical setting, of the constellation which brought stormy weather. (*Ideler, Sternnamen*, p. 219.)

ORITHYIA (four syllables), a daughter of Erechtheus, king of Athens, by Praxitha. She was carried off by Boreas, the god of the northern wind. (*Vid. Boreas.*)

ORMINIUM, a city of Thessaly, in the district of Magnesia, near the shores of the Sinus Pelasgicus, and southeast of Demetrias. It is noticed by Homer, in the catalogue of the ships, as belonging to Eurypylus. (*Il.*, 2, 734.) According to Demetrius of Scepsis, it was the birthplace of Phoenix, the preceptor of Achilles. (*Strabo*, 438.—*Eustath.*, *ad Il.*, p. 782.) Strabo affirms, that in his time it was called Orminium; and that it contributed, with many of the neighbouring towns, to the rise and prosperity of the city of

Demetrias, from which it was distant only twenty-seven stadia. In Diodorus Siculus it is said that Cassandra had wished to remove the inhabitants of Orchomenus and Diom to Thebes of Phthia, but was prevented by the arrival of Demetrius Poliorcetes. As there was no Thessalian city named Orchomenus, it is very likely that we ought to read Ormenium in the passage here referred to (*Diod. Sic.*, 4, 37.—Consult *Wesseling, ad loc.*). The modern Goritza appears to occupy the site of the ancient city. (*Cramer's Anc. Greece*, vol. 1, p. 427.)

ΟΡΝΕΣ, a city of Argolis, northwest of Nemea, and near the confines of the country. It was situated on or near a river of the same name. Pausanias reports, that this place was founded by Orneus, son of Erechtheus (3, 25). The Orneats were originally independent of Argos; but, in process of time, having been conquered by their more powerful neighbours, from Ionians they became Dorians, as Herodotus informs us (8, 73). But we may observe that, according to Homer (*Iliad*, 2, 569, *seqq.*), this place was held in subjection by the sovereigns of Mycenæ as early as the time of the Trojan war. Thucydides writes, that Orneæ was destroyed by the Argives in the sixteenth year of the Peloponnesian war, after it had been abandoned by its inhabitants (6, 7). Strabo seems to acknowledge two towns of this name, assigning one to Argolis, and the other to Corinthia or Sicyonia; but in regard to this fact he was probably mistaken. In his time Orneæ was deserted. No modern traveller appears to have discovered the ruins of this ancient city; Fourmont, however, whose authority is very dubious, affirmed that the site was in his time still known by the name of *Ornica*. (*Voyage manuscript*, cited by *Pouqueville*, vol. 5, p. 297.—*Cramer's Anc. Greece*, vol. 3, p. 283, *seqq.*)

ΟΡΩΔΗΣ, king of Parthia. He was on the throne when Crassus undertook his ill-starred expedition against that country. (*Vid. Parthia.*)

ΟΡΩΤΕΣ, a Persian governor of Sardis, notorious for his cruel murder of Polyocrates. He was put to death, B.C. 521, by order of Darius Hystaspis, on account of various offences committed by him, more particularly for having destroyed Mitrobates, governor of Daschylum, and his son Cranæus, and for having put to death a royal messenger. Historians are not quite agreed about the name of this man. He is called by some Orontes. (*Herod.*, 3, 120, *seqq.*)

ΟΡΟΝΤΗΣ, a river of Syria, rising on the eastern side of the range of Libanus, and, after pursuing a northerly course, falling into the Mediterranean about six leagues below Antiochia. It was called Orontes, according to Strabo, from the person who first built a bridge over it, its previous name having been Typhon. (*Strab.*, 756, *seqq.*) This name it received from a dragon, which, having been struck with a thunderbolt, sought in its flight a place of concealment by breaking through the surface of the earth, from which aperture the river broke forth, so that, according to this statement, it pursued a part of its course at first under ground. This, however, is a mere fable. Typhon was probably a fanciful appellation given to it by the Greeks, since it is altogether different from the Syriac term which the natives now apply to it, namely, *El Aasi*, or, "the Obetinate," in reference to its only irrigating the neighbouring fields through compulsion, as it were, and by the agency of machines (*Abulfeda. Tab. Syr.*, ed. Köhler, p. 150). This name, no doubt, was also given to it by the Syrians of former days, since from it the Greeks appeared to have formed their other name for this river, viz., the Axius. Scylax calls the stream Thapsacus. The Orontes is a large river in winter, on account of the accession to its waters from the rain and melted snows, but it is a very small stream in summer. (*Mannert, Geogr.*, vol. 6, pt. 1, p. 446, *seqq.*)

OROPUS, I. a city on the confines of Boeotia and Attica, on the lower bank of the Asopus, and not far from its mouth. The possession of this place was long the object of eager contest between the Boeotians and the Athenians. There is little doubt but that the former could prove priority of possession; but, as the Athenians were anxious to enlarge their territory at the expense of their Boeotian neighbours, and to make (as all nations have been anxious to do) a river (the Asopus) their boundary, and also to secure their communication with Euboea, they used their rising power to appropriate this place to themselves. (*Bloomf. ad Thucyd.*, 2, 23.) In the Peloponnesian war we find it occupied by the Athenians; but, towards the close of that contest, we hear of the city being surprised by the Boeotians, who retained possession of it for many years. (*Thucyd.*, 8, 60.) In consequence of a sedition which occurred there, the Thebans changed the site of the place, and removed it about seven stadia from the sea. (*Diod. Sic.*, 14, 17.) After the overthrow of Thebes, Oropus was ceded to the Athenians by Alexander. Hence Livy, Pausanias, and Phny place the town in Attica. Dicaearchus and Stephanus, on the other hand, ascribe it to Boeotia. Dicaearchus (*Stat. Gr.*, p. 11) styles Oropus "the dwelling-house of Thebes, the traffic of retail venders, the unsurpassable avarice of excisemen versed in excess of wickedness for ages, ever imposing duties on imported goods. The generality are rough in their manners, but courteous to those who are shrewd; they are repulsive to the Boeotians, but the Athenians are Boeotians." The meaning of the last passage is perhaps this, that the Athenians on this border were so much mixed with the Boeotians as to have lost their usual characteristics of acuteness and intelligence. "Oropus," says Dodwell, "is now called *Ropo*, and contains only few and imperfect ruins" (vol. 2, p. 156. — *Cramer's Anc. Greece*, vol. 2, p. 272). — II. A city of Macedonia, mentioned by Stephanus (p. 770), but otherwise unknown. — III. A city in the island of Euboea. (*Amm. Marcell.*, 30, 4. — *Steph. Byz.*, p. 770.)

OROSIUS, Paulus, a presbyter of the Spanish Church, and a native of Hispania Tarraconensis, who flourished about the beginning of the fifth century, under Arcadius and Honorius. The invasion of his country by the barbarians, and the troubles excited by the Priscillianists, a sect of the Gnostics or Manichaeans, caused him, about A.D. 414, to betake himself to St. Augustine in Africa, who afterward sent him to St. Jerome. The latter prelate was then in Palestine. Orosius acted in this country the part of a turbulent man, and embroiled St. Jerome with Pelagius and John of Jerusalem. He wrote also a treatise against Pelagius, who was at that time spreading his opinions concerning original sin and grace. The title of this production is "*Liber Apologeticus contra Pelagium, de Arbitrii libertate*." The treatise is annexed to the "History" of Orosius. From Palestine he returned to Hippo Regius in Africa, to his friend St. Augustine, and thence to Spain. The calamities which had befallen the Roman empire, and, above all, the capture and pillage of Rome by Alaric (A.D. 410), afforded to the heathens, and to Symmachus among the rest, a pretence for accusing the Christian religion of being the cause of all these disasters, and of saying that, since the abandonment of the old religion of the state, victory had utterly forsaken the Roman arms. To refute this charge, Orosius, at the advice of St. Augustine, composed a history, in which he undertook to show that ever since the creation, which he dated back 5618 years, the habitable world had been the theatre of the greatest calamities. The work consists of seven books, divided into chapters. It begins with a geographical description of the world, then treats of the origin of the human race according to the book of Genesis, and afterward relates the various accounts of the mythologists

and poets concerning the heroic ages. Then follows the history of the early monarchies, the Assyrian, Babylonian, and Persian, the conquests of Alexander, and the wars of his successors, as well as the early history of Rome, the contents being chiefly taken from Trogus Pompeius, and his abridger Justin. The fourth book contains the history of Rome, from the wars of Pyrrhus to the fall of Carthage. The fifth book comprises the period from the taking of Corinth to the war of Spartacus. Orosius quotes among his authorities several works which are now lost. The narrative in the sixth book begins with the war of Sylla against Mithradates, and ends with the birth of our Saviour. The seventh book contains the history of the empire till A.D. 416, including a narrative of the capture and sack of Rome by Alaric, which was the great event of the age. Orosius intermingles with his narrative moral reflections, and sometimes whole chapters of advice and consolation, addressed to his Christian brethren, and intended to confirm their faith amid the calamities of the times, which, however heavy, were not, as he asserts, unprecedented. The Romans, he says, in their conquests, had inflicted equal, if not greater, wrongs on other countries. His tone is that of a Christian moralist, impressed with the notions of justice, retribution, and humanity, in which the heathen historians show themselves so deficient. As an historical writer, Orosius shows considerable critical judgment in general, though in particular passages he appears quite credulous, as in chapter 10th of the first book, where he relates from report, that the marks of the chariot-wheels of Pharaoh's host are still visible at the bottom of the Red Sea.—As an instance of the incidental value of the passages taken by Orosius from older writers, consult Savigny (*Das Recht des Besitzes*, p. 176). King Alfred made a free translation of the History of Orosius into the Anglo-Saxon language, which was published by Daines Barrington, with an English version, London, 1773, 8vo.—The work of Orosius, in some MSS., is entitled "*Adversus Paganos Historiarum libri vii*." In others it is called "*De totius Mundi Calamitatibus*;" in others, again, "*De Cladibus et Miseriis Antiquorum*." The most singular title, however, given by some MSS., is "*Hormesta*" or "*Ormesta*." The general opinion is, that this has arisen from a mistake made by some old copyist. The true title, in all probability, was *Pauli Orosii moesta mundi*, from which, by abbreviation, was first made *Pauli Or. moesta mundi*, and finally *Pauli Ormesta*, or simply *Ormesta*. (*Wühof., Relat., Duisburg*, 1762, N. 47, 52.)—One of the best editions of Orosius is that of Havercamp, *Lugd. Bat.*, 1728, 4to. (*Encycl. Us. Knowl.*, vol. 17, p. 36. — *Schöll, Hist. Lit. Rom.*, vol. 3, p. 170. — *Bähr, Gesch. Röm. Lit.*, vol. 1, p. 477.)

OROSPEDA. *Vid.* Ortopeda.

ORPHEUS (two syllables), a poet, musician, and philosopher, whose name is very prominent in the early legends of Greece. The traditions respecting him are remarkably obscure. According to Cicero (*N. D.*, 1, 38), Aristotle believed that no such person as Orpheus the poet had ever existed; but perhaps he only means that the poems ascribed to him were spurious. Orpheus is mentioned as a real person by several of the ancient Greek writers, namely, by the lyric poets Ibycus and Pindar, the historians Hellanicus and Pherecydes, and the Athenian tragedians: he is not mentioned by Homer or Hesiod. Some ancient writers reckon several persons of this name, and Herodotus speaks of two. In later times a number of marvellous stories were connected with his name.—The following is the legendary history of Orpheus. His native country was Thrace. It is a remarkable fact, that most of the traditions respecting Greek civilization are connected with the Thracians, who in later times spoke a language unintelligible to the Greeks, and were looked

upon by them as barbarians. Müller explains this by pointing out that the Thracians of these legends were not the same people as those of the historical period, but a Greek race who lived in the district called Pieria, to the east of the Olympus-range, to the north of Thessaly, and to the south of Emathia or Macedonia. (Müller, *Hist. Gr. Lit.*, p. 28.) The time at which Orpheus lived is placed by all writers not long before the Trojan war, and by most at the period of the Argonautic expedition, about twelve or thirteen centuries before our era. He was said to have been the son of Apollo and the muse Calliope, or, according to another account, of Oeagrus and a muse. The poets represent him as a King of Thrace, but the historians are generally silent about his station. According to Clemens of Alexandria he was the disciple of Musæus, but the more common accounts make him his teacher. He was one of the Argonauts, to whom he rendered the greatest services by his skill in music; the enchanting tones of his lyre made the Argo move into the water, delivered the heroes from many difficulties and dangers while on the voyage, and mainly contributed to their success in obtaining the golden fleece. After the voyage, Orpheus returned to the cavern in Thrace in which he commonly dwelt. He is said by some authors to have made a voyage to Egypt before the Argonautic expedition.—The skill with which Orpheus struck the lyre was fabled to have been such as to move the very trees and rocks, and the beasts of the forest assembled round him as he touched its chords. He had for his wife a nymph named Eurydice, who died from the bite of a serpent, as she was flying from Aristæus. Orpheus, disconsolate at her loss, determined to descend to the lower world, to endeavour to mollify its rulers, and obtain permission for his beloved Eurydice to return to the regions of light. Armed only with his lyre, he entered the realms of Hades, and gained an easy admittance to the palace of Pluto. At the music of his "golden shell," to borrow the beautiful language of ancient poetry, the wheel of Ixion stopped, Tantalus forgot the thirst that tormented him, the vulture ceased to prey on the vitals of Tityos, and Pluto and Proserpina lent a favouring ear to his prayer. Eurydice was allowed to return with him to the upper world, but only on condition that Orpheus did not look back upon her before they had reached the confines of the kingdom of darkness. He broke the condition, and she vanished from his sight. His death is differently related. The most common account is, that he was torn in pieces by the Thracian women, at a Bacchic festival, in revenge for the contempt which he had shown towards them through his sorrow for the loss of Eurydice. (Apollod., 1, 3.—Virg., *Georg.*, 4, 454.) His limbs were scattered over the plain, but his head was thrown upon the river Hebrus, which bore it down to the sea, and the waves then carried it to Lesbos, where it was buried. (Vid. Lesbos.) The Muses collected the fragments of his body and interred them at Libethra, and Jupiter, at their prayer, placed his lyre in the skies. (Apollod., l. c.—Apoll. Rhod., 1, 23.—Hermes, ap. Athen., 13, p. 597.)—The poets and fabulists have attributed to Orpheus many great improvements in the condition of the human race. Indeed, his having moved even animals, and trees, and the flinty rocks by the sweetness of his strains, would seem to indicate nothing more than his successful exertions in civilizing the early race of men. (Horat., *Ep. ad Pis.*, 391.) Nearly all the ancient writers state, that Orpheus introduced into Greece the doctrines of religion and the worship of the gods. The foundation of mysteries is also ascribed to him. (Aristoph., *Ran.*, 1030—Eurip., *Rhes.*, 945.—Plato, *Protag.*, p. 216.) Herodotus (2, 91) speaks of Orphic and Bacchic mysteries. These mysteries seem to have been different from those of Eleusis. The establishment of social institutions, and the commencement of civilization, are,

as we have just remarked, attributed to Orpheus. Aristophanes says, that he taught men to abstain from murder. (*Ran.*, 1030.) He is said to have been the author of many fables. A passage in an epigram, to which, however, no authority can be attached, ascribes to him the invention of letters. (Fabric., *Bib. Græc.*, vol. 1, p. 173.) The discovery of many things in medicine is also assigned to him (Plin., 26, 2), and the recall of Eurydice from the lower world is sometimes explained as referring to his skill in the healing art. He was said to have been a soothsayer and an enchanter, and he had a famous oracle in Lesbos. A share in the invention of the lyre is also ascribed to him: he received it from Apollo with seven strings, and added to it two more. According to Plutarch, he was the first that accompanied the lyre with singing. The fable that, after his death, his head floated to Lesbos, is a poetical mode of representing the skill of the natives of that island in lyric poetry. Orpheus is said to have imbibed his religious and philosophical opinions in poems, but the works ascribed to him are evidently spurious. An account of these will be found under the article Orphica. (Encycl. Us. Knowl., vol. 17, p. 37.)—It is stated of Orpheus by some ancient authorities, that he abstained from the eating of flesh, and had an abhorrence of eggs, considered as food, from a persuasion that the egg was the principle of all beings. Many other accounts are given of him, which would seem to assimilate his character to that of the earlier priests of India. The ancients, however, unable to discover any mode by which he could have obtained his knowledge from any other source, pretended that he had visited Egypt, and had there been initiated into the mysteries of Isis and Osiris. This, however, appears to be a supposition purely gratuitous, since a careful examination of the subject leads directly to the belief that Orpheus was of Hindu origin, and that he was a member of one of those sacerdotal colonies which professed the religion of Buddha, and who, being driven from their homes in the northern parts of India and in the plains of Tartary by the superior power of the rival sect of Brahmins, moved gradually onward to the west, dispensing in their progress the benefits of civilization, and the mysteries and tenets of their peculiar faith. There seems to be a curious analogy between the name of the poet and the old Greek term ὄρφος, dark or tawny-coloured (compare ὄρφαρος, ἑρπός, orbis, furvus), so that the appellation Orpheus may have been derived by the early Greeks from his dusky Hindu complexion. The death of Eurydice, and the descent of Orpheus to the shades for the purpose of effecting her restoration, appear to be nothing more than an allegorical allusion to certain events connected with the religious and moral instructions of the bard. It will not, we hope, be viewed as too bold an assertion, that such a female as Eurydice never existed. The name Eurydice (Εὐρυδική) appears to be compounded of the adverbial form εὐρύ, or perhaps the adjective εὐρύς, considered as being of two terminations (Mathæa, *Gr. Gr.*, vol. 1, § 120.—Kühner, *Gr. Gr.*, vol. 1, p. 353, § 309), and the noun δίκη, and it would seem to be nothing more than an appellation for that system of just dealing and moral rectitude which Orpheus had introduced among the earlier progenitors of the Grecian race, and the foundations of which had been laid broadly and deeply by him in the minds of his hearers. According to the statements of the ancient mythologists, Aristæus, the son of Apollo and the nymph Cyrene, became enamoured of Eurydice, the wife of Orpheus, and pursued her into a wood, where she ended her days from the sting of a serpent.—It has already been stated, in another part of this volume (vid. Aristæus), that Aristæus would seem to be in reality an early deity of the Greeks, presiding over flocks and herds, over the propagation of bees and the rearing of the olive. At the same time, we find among the ancient writers the

name of Aristæus connected, in a greater or less degree, with the rites and mysteries of Bacchus. Thus, Diodorus Siculus (3, 39) cites a legend, in which Aristæus is mentioned as the instructor or governor of the young Bacchus. From the same source (3, 71) we are informed, that Aristæus was the first who sacrificed to Bacchus as to a god. Nonnus represents him as one of the principal leaders in the expedition of Bacchus against India; and in Greece his history is connected with that of the time of Cadmus, the founder of Thebes, the birthplace of Bacchus in Grecian mythology. (*Nonni Dionys.*, 5, p. 163, ed. 1605, 8vo.) From a view of these and other authorities, it would seem that there had been some union effected between the religious worship of Aristæus and Bacchus. Regarding this latter deity as emblematic of the great productive principle, which imparts its animating and fertilizing influence to everything around, it is not difficult to conceive how a union should have taken place between this system and that of Aristæus, the god of agriculture and of the flocks. Now the religious system introduced by Orpheus, though itself connected with the worship of Bacchus, was very different from the popular rites of this same deity. The Orphic worshippers of Bacchus did not indulge in unrestrained pleasure and frantic enthusiasm, but rather aimed at an ascetic purity of life and manners. The consequence, therefore, would seem to have been, that these two systems, the Orphic and the popular one, came at last into direct collision, and the former was made to succumb. In the figurative language of poetry, Aristæus (the type of the popular system) pursues Eurydice (*Εὐρυδίκη*, the darling institutions of Orpheus), and the venom of the serpent (the gross license connected with the popular orgies) occasions her death. Orpheus, say the poets, lamenting the loss of his beloved Eurydice, descended in quest of her to the shades. The meaning of the legend evidently is, that, afflicted at the overthrow of the favourite system which he had so ardently promulgated, and the corruption which had succeeded to his purer precepts of moral duty, he endeavoured to reclaim men from the sensual indulgences to which they had become attached, by holding up to their view the terrors of future punishment in another world. Indeed, that he was the first who introduced among the Greeks the idea of a future state of rewards and punishments, is expressly asserted by ancient authorities. (*Diod. Sic.*, 1, 96.—*Wesseling, ad Diod.*, l. c.—*Baxter's Mythology*, vol. 4, p. 159.) The awful threatenings that were thus unfolded to their view, and the blissful enjoyments of an Elysium which were at the same time promised to the faithful, succeeded for a time in bringing back men to the purer path of moral rectitude, and to a fairer and brighter state of things; but either the impatience of their instructor to see his efforts realized, or some act of heedlessness and inattention on his part, frustrated all his hopes, and mankind relapsed once more into moral darkness. In the fanciful phraseology of the poet, the doctrine of a future state of punishment, as taught by Orpheus, was converted into his descent to the shades. His endeavour to re-establish by these means the moral system which he had originally promulgated, became, to the eye of the earlier bard, an impassioned search, even amid the darkness of the lower world, for the lost object of conjugal affection; and by the tones of the lyre, which bent even Pluto and Proserpina to his will, appear to be indicated those sweet and moving accents of moral harmony, in which were described the joys of Elysium, and whose power would be acknowledged even by those whom the terrors of punishment could not intimidate.

ORPHICA, certain works falsely ascribed to Orpheus, which embodied the opinions of a class of persons termed 'Ορφικοί. These were the followers of Orpheus, that is to say, associations of persons who, under

the guidance of the ancient mystical poet Orpheus, dedicated themselves to the worship of Bacchus, in which they hoped to find the gratification of an ardent longing after the soothing and elevating influences of religion. The Bacchus, to whose worship these Orphic rites (*τὰ Ὀρφικά καλούμενα καὶ Βακχικά*, *Herod.*, 2, 81) were annexed, was the Chthonian deity, Bacchus or Dionysus Zagreus, closely connected with Ceres and Proserpina, and who was the personified expression, not only of the most rapturous pleasure, but also of a deep sorrow for the miseries of human life. The Orphic legends and poems related in great part to this same Bacchus, who was combined, as an infernal deity, with Pluto or Hades (a doctrine given by the philosopher Heraclitus as the opinion of a particular sect), and upon whom the Orphic theologians founded their hopes of the purification and ultimate immortality of the soul. But their mode of celebrating this worship was very different from the popular rites of Bacchus. The Orphic worshippers of Bacchus did not indulge in unrestrained pleasure and frantic enthusiasm, but rather aimed at an ascetic purity of life and manners. The followers of Orpheus, when they had tasted the mystic sacrificial feast of raw flesh torn from the ox of Bacchus (*ζωοφαγία*), partook of no other animal food. They wore also white linen garments, like Oriental and Egyptian priests. (*Müller, Hist. Lit. Gr.*, p. 231, *seqq.*)—Of the Orphic writers, the most celebrated are, Onomacritus, who lived under Pisistratus and his sons, and Cercops, a Pythagorean, who lived about B.C. 504. Works ascribed to Orpheus were extant at a very early period. Plato mentions several kinds of Orphic poems; but he intimates that they are not genuine. Aristotle speaks of them as the so-called (*τὰ καλούμενα*) Orphic poems. In later times, all manner of works on mysteries and religion were ascribed to him. There are also Orphic poems later than the Christian era, which are difficult to be distinguished from those of earlier times.—The writings ascribed to Orpheus, and which have reached our times, are as follows: 1. *Hymns* (*ὕμνοι*), eighty-eight in number. They are in hexameter verse, and were most of them, as is thought, composed by Onomacritus.—2. An historical or epic poem on the *Expedition of the Argonauts* (*Ἀργοναυτικά*), in 1384 verses, probably by Onomacritus; at least, by some one not earlier than Homer.—3. A work on the *Magical Virtues of Stones* (*περὶ λίθων, or Λιθικά*), in 768 hexameters, showing how they may be used as preservatives against poisons, and as a means of conciliating the favour of the gods.—4. Fragments of various other works; among which is placed a poem of 66 verses, entitled *περὶ σεισμῶν, concerning Earthquakes*, that is, of the prognostics to be derived from this species of phenomena; a production sometimes ascribed to the fabulous Hermes Trismegistus. Many other fragments of the Orphic poems, some in a metrical form, others converted into prose, and scattered throughout the commentary of Proclus on the *Cratylus* of Plato, were collected from the Munich MSS. by Werfer, and inserted in the *Philological Transactions* of Munich. (*Acta Philologorum Monacensium*, vol. 2, p. 113, *seqq.*)—Other writings, also ascribed to Orpheus, but which have not come down to us, except it be a few scattered fragments of some of them, are the following: 1. *Sacred Legends* (*ἱερὰ λόγια*), a complete system of Orphic theology, in twenty-four books. It was ascribed by some to Cercops and Diognetus, but was probably the production of several authors.—2. *Prophecies* (*Χρησμοί*).—3. *Bakchika*, probably stories relative to Bacchus and his mysteries. They were attributed by some to Arignotes, a pupil or daughter of Pythagoras.—4. *The descent to Hades* (*Ἡ ἐς Αἴδου Κατάβασις*), a poem of great antiquity, ascribed, among others, to Cercops.—5. *Religious Rites or Mysteries* (*Τελεραί*), directions for worshipping and appeasing

the gods; probably by Onomacritus.—As late as the 17th century, no one doubted but that the different works which bear the name of Orpheus, or, at least, the greater part of them, were either the productions of Orpheus himself, or of Onomacritus, who was regarded as the restorer of these ancient poems. The learned Huet was the first who, believing that he had discovered in them traces of Christianity, expressed the suspicion that they might be the work of some pious impostor. In 1751, when Ruhnken published his second critical letter, he attacked the opinion of Huet, and placed the composition of the works in question in the tenth century before the Christian era. Gesner went still farther, and in his *Prolegomena Orphica*, which were read in 1759 at the University of Göttingen, and subsequently placed in Hamberger's edition of Orpheus, published after Gesner's death, he declared that he had found nothing in these poems which prevented the belief that they were composed before the period of the Trojan war. He allowed, however, at the same time, that they might have been retouched by Onomacritus. Gesner found an opponent in the celebrated Valckenaer, who believed the author of the poems in question to have belonged to the Alexandrian school. (*Valck., ad Herod., ed Wesseling.*) In 1777, Schneider revived and developed the theory of Huet. (*Schneider, de dubia Carm. Orphic. auctoritate et vetustate. — Analect. Crit., fasc. 1.*) The same poems, in which Ruhnken had found a diction almost Homeric, and Gesner the simple style of remote antiquity, appeared, to the German professor, the work of a later Platonist, initiated into the tenets of Judaism and the mysteries of Christianity. His arguments, deduced entirely from the style of these productions, were strengthened by Thunmann (*Neue philolog. Bibliothek*, vol. 4, p. 298), who discovered in these poems historical and geographical errors such as could only have been committed by a writer subsequent to the age of Ptolemy Euergetes. And yet it is singular enough, that Mannert, arguing from the acquaintance with geographical terms displayed by the author of these poems, places him between Herodotus and Pythias. (*Geogr.*, vol. 4, p. 67.) In 1782 Ruhnken published a new edition of his critical letter, in which he endeavoured to refute the opinion of Schneider, allowing, at the same time, that the position assumed by Valckenaer was not an improbable one. The discussion rested here for twenty years, when Schneider, in his edition of the Argonautics published in 1803, defended the theory which he had supported in his younger days, adding, at the same time, however, some modifications; for he allowed that the author of the Argonautics, although comparatively modern, had appropriated to himself the style and manner of the Alexandrian school. Two years after, Hermann, in a memoir annexed to his edition of the Orphica, and subsequently in a separate dissertation, supported with rare erudition the opinion of Huet, and that which Schneider had advanced in 1777. After giving a brief account of the state of the controversy, Hermann proceeds to examine the structure of the Orphic verse. He first indicates the progressive modification of the hexameter verse, through the series of the epic and didactic hexameter writers, pointing out the gradual changes which it underwent from the time of Homer till it was wholly remodelled by Nonnus. He detects, in the hexameters of the Orphic poems, those peculiarities which show, as he thinks, that their author must have lived in the fourth century of the Christian era, just before the hexameter verse received its last considerable modification under the hands of Nonnus. (*Vid. Nonnus.*) Five German critics, Heyne, Voss, Wolf, Hueschke, and Königsmann, opposed the hypothesis of Schneider and Hermann, and declared in favour of Valckenaer's theory. (*Voss, Dedic. der überrest. des Hesiodus. — Id., Recens. Jon. L. Z.*, 1805, n. 138.

—*Hueschke, de Orphi Argonaut., Ross., 1806, 4to.*—*Königsmann, Poet. Crit., 1810, 4to.*)—The authority of the grammarian Draco, who cites the Argonautics of Orpheus, having been strongly urged by Königsmann against Hermann, the latter obtained the work of Draco, which until then had remained unedited, from the celebrated Bast, and published it at Leipsic in 1812. Draco does, in fact, cite the Argonautics, and his authority is the more entitled to attention, since Hermann himself has shown that he lived before the time of Apollonius Dyscolus, and, consequently, at the beginning of the second century; whereas, before this, he had been generally assigned to the sixth century. (Compare *Tiedemann, Griechenlands erste Philosophen, Leipz., 1780, 8vo.*—*Gerlach, de Hymnis Orphicis Commentatio, Göt., 1797, 8vo.*) Hermann, however, has greatly shaken the authority of Draco, and leads us to entertain the opinion that we possess only an extract of the work, augmented by interpolations and marginal glosses that have crept into the text. (*Schöll, Hist. Lat. Gr.*, vol. 1, p. 38, *seqq.*) It is even probable that the very part relating to Orpheus was added by Constantine Lascaris.—In 1824, a prize dissertation appeared by another German scholar, Bode. (*Orpheus Posteriorum Græcorum Antiquissimus, Göt., 4to.*) Assuming the spuriousness of the Orphic poems, the author aims only to establish the country, age, and character of the poet; and of him, not as one historical personage, but only as the representative of a primeval school of bards. By a learned and ingenious train of argument, he fixes the period of the commencement of the Orphic school about the 13th century before the commencement of the Christian era, making it earlier than the time of the Homeric poems, which he assigns to the 10th century.—The best edition of the Orphica is that of Hermann, *Lips.*, 1805, 8vo. The edition of Gesner is also a valuable one, *Lips.*, 1764, 8vo. Schäfer published likewise a new edition of the Greek text in 1818, 12maj., for the use of prælections and schools. (*Hoffmann, Lex. Bibliog.*, vol. 3, p. 186.) The Orphic fragments are given by Lobeck in his *Aglaophamus, Regiom.*, 1829, 8vo.)

ORPHIA, a surname of Diana at Sparta. At her altar boys were scourged during the festival called *Di-amastigosis* (*Διαμαστιγισμός*). The young sufferers were called *Bomoniceæ*. (*Vid. Bomoniceæ, and Diana.*)

ORTHOΣ, the dog that guarded the oxen of Geryon. He had two heads, and was sprung from the union of Echidna and Typhon. (*Apollod.*, 2, 5.)

ORTOSFIDA or OROSFIDA MONS (Ptolemy giving it the former name, and Strabo the latter), a chain of mountains in Spain; properly speaking, a continuation of the range of Idubeda. One part terminates, in the form of a segment of a circle, on the coast of Murcia and Grenada, while two arms are sent off in the direction of Bætica, one of which pursues nearly a western direction, and is called Mons Marianus, now *Sierra Morena*; the other runs more to the south-west, nearer the coast, and is called Mons Ilipula, now *Sierra Nevada*, ending on the coast at Calpe or *Gibraltar*. (*Mannert, Geogr.*, vol. 1, p. 406.)

ORTYGEIA, I. a spot near the port of Ephesus, thickly planted with cypresses and other trees, and watered by the little river Cenchrus. Latona was said by some to have been delivered here of her twins. The grove was filled with shrines, and adorned with statues by the hand of Scopas and other eminent sculptors. (*Strab.*, 639.) According to Chandler (*Travels in Asia Minor*, p. 176), this part of the coast has undergone considerable alterations. Ortygia has disappeared, the land having encroached on the sea. (*Cramer's Asia Minor*, vol. 1, p. 376.)—II. An island in the bay of Syracuse, forming one of the five quarters of that city. The colonists under Archies first settled here, and afterward extended to Acradina on the

mainland of Sicily. Ortygia was famed for containing the celebrated fount of Arethusa. The earliest mention of this island is found in Hesiod (*Theog.*, 1018). On it is now situate the greater part of modern Syracuse. (*Göller, de Situ et Orig. Syracus.*, p. 39, seq.) —III. One of the early names of the island of Delos. (*Vid. Delos.*)

Oaus, an Egyptian deity, son of Osiris and Isis. (*Vid. Horus.*)

Oscæ, a town of Hispania Bætica, in the territory of the Turdetani. According to Mannert, it corresponds to the modern *Huesca*, in Aragon. (*Geogr.*, vol. 1, p. 410.) Ukert, however, places its site to the west of the city. It was in Oscæ that Sertorius, collected together, from the various nations of Spain, the children of the nobility, and placed masters over them to instruct them in Greek and Roman literature. Plutarch states, that this had the appearance only of an education, to prepare them for being admitted citizens of Rome; but that the children were, in fact, so many bootlegs. (*Vid. Sertor.*)

Osci or Opici, a people of ancient Italy, who seem to have been identical with the Ausones or Aurunci, and who inhabited the southern part of the peninsula. Some ancient writers consider the Ausones to be a branch of the Osci; others, as Polybius, have spoken of them as distinct tribes, but this appears to be an error. The names *Opicus* and *Oscus* are undoubtedly the same. Aristotle (*Polit.*, 7, 10) calls the country from the Tiber to the Silurus, Ausonia and Opicia; and other ancient writers extended the name much farther, to the Straits of Sicily; but the southern extremity of the peninsula appears to have been occupied previously by the Cénorians, a Pelasgic race, who were conquered by the Lucanians and Brutii. Cumæ, one of the earliest Greek colonies on the coast of Italy, was in the country of the Opici. The early immigrations of the Illyrians or Liburnians along the eastern coast of Italy, drove the aboriginal inhabitants from the lowlands into the fastnesses of the central Apennines, whence they issued under the various names of Sabini, Cæci, or Latini veteres. There was an ancient tradition in Italy, in the time of the historian Dionysius, of a sudden irruption of strangers from the opposite coast of the Adriatic, which caused a general commotion and dispersion among the aboriginal tribes. Afterward came the Hellenic colonies, which occupied the whole seacoast from Mount Garganus to the extremity of the peninsula, in the first and second centuries of Rome; in consequence of which, the population of the southern part of the Italian peninsula became divided into two races, the tribes of Aboriginal or Oscan descent, such as the Sabini, Samnites, Lucani, and Brutii, who remained in possession of the highlands, and the Greek colonists and their descendants, who occupied the maritime districts, but never gained possession of the upper or Apennine regions. Such is the view taken by Micali and other Italian writers. But Niebuhr describes the Sabini, and their colonies the Samnites, Lucani, and other tribes, which the Roman writers called by the general name of Sabellians, as a people distinct from the Osci or Opici. He says, after Cato and other ancient historians, that the Sabini issued out of the highlands of the central Apennines, near Amiternum, long before the epoch of the Trojan war, and, driving before them the Cæcans or Priaci Latini, who were an Oscan tribe, settled themselves in the country which has to this day retained the name of Sabina. Thence they sent out numerous colonies, one of which penetrated into the land of the Opicans, and became the Samnite people; and afterward the Samnites occupied Campania, and, mixing themselves with the earlier Oscan population, settled there and adopted their language. But, farther on, in speaking of the Sabini and Sabellians, Niebuhr admits the probability of their being

originally a branch of the same stock as the Opici or Osci. Micali considers the Sabini, Apuli, Messapii, Campani, Aurunci, and Volsci, as all branches of the great Oscan family.—The Greeks, being superior to the native tribes in refinement and mental cultivation, affected to despise them, and they applied to the native Italian tribes, including the Romans, the epithet "Opican," as a word of contempt, to denote barbarism both in language and manners (*Cato, ap. Plin.*, 29, 1); and the later Roman writers themselves adopted the expression in the same sense: "*Oscæ loqui*" was tantamount to a barbarous way of speaking. Juvenal says (3, 207), "*Et divina Opici rodebant carmina mures*," where *Opici* is equivalent to "*barbari*;" and Ausonius (*Prof.*, 22, 8) uses "*Opicas chartas*" in the sense of rude, unpolished compositions. The Oscan language was the parent of the dialects of the native tribes from the Tiber to the extremity of the peninsula, Sabini, Hernici, Marsi, Samnites, Sidicini, Lucani, and Brutii, while in the regions north of the Tiber the Etrurian predominated. Livy (10, 20) mentions the Oscan as being the language of the Samnites. The older Latin writers, and especially Ennius, have many Oscan words and Oscan terminations. The Oscan language continued to be understood at Rome down to a later period of the empire, and the *Fabula Atellana*, which were in the Oscan tongue, were highly relished by the great body of the people. In the Social war, the Confederates, who were chiefly communities of Oscan descent, stamped Oscan legends on their coins. In Campania and Samnium, the Oscan continued to be the vulgar tongue long after the Roman conquest, as appears from several monuments, and especially from the Oscan inscriptions found at Pompeii. (*Micali, Storia degli Antichi Popoli Italiani*, ch. 29.—*Id.*, *Atlas*, pl. 120.—*De Iorio, Plan of Pompeii*, pl. 4.)—The Oscan race, like the Etruscan, appears to have been, from the remotest times, strongly under the influence of religious rites and laws (*Festus, s. v. Oscum*); and the primitive manners and simple morals of the Oscan and Sabine tribes, as well as their bravery in arms, have been extolled by the Roman writers, among others by Virgil (*Æn.*, 7, 728, seqq.) and Silius Italicus (8, 528, seqq.).—Concerning the scanty remains of the Oscan language which have come down to us, the following may be consulted: "*Lingua Oscan Specimen Singulare, quod superest Nola, in marmore Musei Semnarij*," which is given by Passeri in his "*Picturæ Etruscorum in Vaseculis*," &c., *Rome*, 3 vols. fol., 1767-75; and also Guarini, in his "*In Osa Epigrammata nonnulla Commentarius*," Naples, 1830, 8vo, where several Oscan inscriptions are found collected; but particularly the learned work of Grotefend, "*Rudimenta Lingua Oscan*," Hannover, 1840. Another work of the last-mentioned writer, entitled "*Rudimenta Lingua Umbrica*," Hannover, 1835, &c., is also worthy of being consulted. Grotefend makes both the Oscan and the Latin come from the Umbrian language. (*Encycl. Us. Knowl.*, vol. 17, p. 47.—Niebuhr, *Rom. Hist.*, vol. 1, p. 55, *Cambr. transl.*)

OSIRIS, one of the principal Egyptian deities, was brother of Isis, and the father of Horus. His history is given in the first book of Diodorus, and in Plutarch's treatise "*On Isis and Osiris*;" but it is not improbable that the genuine Egyptian traditions respecting the deity had been considerably corrupted at the time of these writers. According to their accounts, however, Osiris was the first who reclaimed the Egyptians from a state of barbarism, and taught them agriculture and the various arts and sciences. After he had introduced civilization among his own subjects, he resolved to visit the other nations of the world and confer on them the same blessing. He accordingly committed the administration of his kingdom to Isis, his sister and queen, and gave her Hermes to assist her

in council, and Hercules to command her troops. Having collected a large army himself, he visited in succession Ethiopia, Arabia, and India, and thence marched through Central Asia into Europe, instructing the nations in agriculture, and in the arts and sciences. He left his son Macedon in Thrace and Macedonia, and committed the cultivation of the land of Attica to Triptolemus. After visiting all parts of the inhabited world, he returned to Egypt, where he was murdered soon after his arrival by his brother Typhon, who cut up his body into twenty-six parts, and divided it among the conspirators who had aided him in the murder of his brother. These parts were afterward, with one exception, discovered by Isis, who enclosed each of them in a statue of wax, made to resemble Osiris, and distributed them through different parts of Egypt.—Other forms of the legend may be found in Creuzer's elaborate work (*Symbolik*, vol. 1, p. 259, *seqq.*—*Symbolik*, par Guignaut, vol. 1, pt. 1, p. 389, *seqq.*) For some remarks explanatory of it, consult the article Isis.—Herodotus informs us (2, 48), that the festival of Osiris was celebrated in almost the same manner as that of Bacchus. It appears, however, not improbable, that the worship of Osiris was introduced into Egypt, in common with the arts and sciences, from the Ethiopian Meroë. We learn from Herodotus (2, 29), that Ammon and Osiris were the national deities of Meroë, and we are told by Diodorus (3, 3) that Osiris led a colony from Ethiopia into Egypt.—Osiris was venerated under the form of the sacred bulls Apis and Mnevis (*Diod. Sic.*, 1, 21); and as it is usual in the Egyptian symbolical language to represent their deities with human forms, and with the heads of the animals which were their representatives, we find statues of Osiris with the horns of a bull. (*Egyptian Antiquities*, vol. 2, p. 295.) Osiris, in common with Isis, presided over the world below; and it is not uncommon to find him represented on rolls of papyrus, as sitting in judgment on departed spirits. His usual attributes are the high cap, the flail or whip, and the crozier. (*Encycl. Us. Knowl.*, vol. 17, p. 49.—*Cory, Horapollo Niloticus*, p. 164, pl. 2.)

OSSENTI, a people of Gallia Lugdunensis Tertia, on the coast of the Mare Britannicum, and at the southwestern extremity of the Tractus Armoricus. Their country, according to some, answers to the modern Léon and Tréguier; but, according to D'Anville, their chief city was Vorgannum, now *Karhez*, in *Basse Bretagne*. (*Cæs.*, B. G., 2, 34.—*Id. ib.*, 3, 9, &c.—*Lemaire, Ind. Geogr.*, ad *Cæs.*, s. v.)

OSKHOINE, a district of Mesopotamia, in the north-western section of the country. (*Vid.* Mesopotamia.)

Ossa, I. a celebrated mountain, or, more correctly, mountain-range of Thessaly, extending from the right bank of the Peneus along the Magnesian coast to the chain of Pelion. It was supposed that Ossa and Olympus were once united, but that an earthquake had rent them asunder (*Herod.*, 7, 132.—*Ælian*, V. H., 3, 1), forming the vale of Tempe. (*Vid.* Tempe.) Ossa was one of the mountains which the giants, in their war with the gods, piled upon Olympus in order to ascend to the heavens. (*Hom.*, *Od.*, 11, 312, *seqq.*—*Virg.*, *Georg.*, 1, 282.) The modern name is *Kissavos*, or, according to Dodwell, *Kissabos* (Kissavos). "Mount Ossa," observes Dodwell, "which does not appear so high as Pelion, is much lower than Olympus. It rises gradually to a point, which appears about 5000 feet above the level of the plain; but I speak only from conjecture." (*Tour*, vol. 2, p. 106.—*Cramer's Anc. Greece*, vol. 1, p. 422.)—II. A small town of Macedonia, in the territory of Bisaltia, and situate on a river (probably the Basantes) falling into the Strymon.

OSTIA, a celebrated town and harbour, at the mouth of the river Tiber, in Italy. It was the port of Rome, and its name even now continues unchanged, though

few vestiges remain of its ancient greatness. All historians agree in ascribing the foundation of Ostia to Ancus Marcius. (*Liv.*, 1, 33.—*Dion. Hal.*, 3, 44.—*Flor.*, 1, 4.) That it was a Roman colony we learn from Florus (*l. c.*—Compare *Senec.*, 1, 15.—*Tacit.*, *Hist.*, 1, 80). When the Romans began to have ships of war, Ostia became a place of greater importance, and a fleet was constantly stationed there to guard the mouth of the Tiber. (*Liv.*, 22, 11 et 27.—*Id.*, 23, 38.—*Id.*, 27, 22.) It was here that the statue of Cybele was received with due solemnity by Scipio Nasica, when the public voice had selected him for that duty, as the best citizen of Rome. (*Livy*, 29, 14.—*Herodian*, 1, 11, 10.) In the civil wars, Ostia fell into the hands of Marius, and was treated with savage cruelty. (*Liv.*, *Epit.*, 79.) Cicero, in one of his orations, alludes with indignation to the capture of the fleet stationed at Ostia by some pirates. (*Pro. L. Manil.*) The town and colony of Ostia were distant only thirteen miles from Rome, but the port itself, according to the itineraries, was at the mouth of the Tiber; unless it be thought with Vulpian, that the town and harbour, with all their dependencies, might occupy an extent of three miles along the river. (*Vet. Lat.*, 3, 1, p. 136.) There is some difficulty, however, in ascertaining the exact situation of the harbour, from the change which appears to have taken place in the mouth of the river during the lapse of so many ages. Even the number of its channels is a disputed point. Ovid seems to point out two (*Fast.*, 4, 291.—*Ibid.*, 4, 329), but Dionysius Periegetes positively states that there was but one. The difference, however, may be reconciled by supposing that, in the geographer's time, the right branch of the river might alone be used for the purposes of navigation, and that the other stream was too insignificant and shallow for the reception of ships of any size. The two streams still exist; the left is called *Fiumaro*, the right, on which the *Portus Augusti* was situate, is known by the name of *Fiumicino*.—According to Plutarch, Julius Cæsar was the first who turned his attention to the construction of a port at Ostia, by raising there a mole and other works; but it was to the Emperor Claudius that this harbour seems indebted for all the magnificence ascribed to it by antiquity. Suetonius, in his life of that prince, has given us a detailed account of the formation of this harbour with its pharos (c. 20.—Compare *Dio Cass.*, 60, 11.—*Plin.*, 36, 9.—*Id.*, 36, 15 et 40). It is generally supposed that Trajan subsequently improved and beautified the port of Ostia; but the only authority for such a supposition is derived from the scholiast on Juvenal, in his commentary on the passage where that poet describes the entrance of Catullus into this haven (12, 75). It is not improbable, however, that the scholiast might confound the harbour of Ostia with that of Centum Cellæ.—In process of time, a considerable town was formed around the harbour of Ostia, which was itself called *Portus Augusti*, or simply *Portus*; and a road was constructed thence to the capital, which took the name of *Via Portuensis*. Ostia, as has been remarked, attained the summit of its prosperity and importance under Claudius, who always testified a peculiar regard for this colony. It seems to have flourished likewise under Vespasian, and even as late as the reign of Trajan; for Pliny the younger informs us, when describing his Laurentine villa, that he derived most of his household supplies from Ostia. In the time of Procopius, however, this city was nearly deserted, all its commerce and population having been transported to the neighbouring *Portus Augusti*. The same writer gives a full account of the trade and navigation of the Tiber at this period; from him we learn, that the island which was formed by the separation of the two branches of that river was called *Sacra*. (*Rer. Got.*, 1.—Compare *Rutil.*, *Itin.*, 1, 169.) The salt marshes form-

ed by Anous Marcus, at the first foundation of Ostia (*Lex.*, 1, 33), still subsist near the site now called *Casone del Sale*. (*Cramer's Anc. Italy*, vol. 2, p. 11, *seqq.*)—"Nothing," observes a modern traveller, "can be more dreary than the ride from Rome to this once magnificent seaport. You issue out of the Porta San Paolo, and proceed through a continued scene of dismal and heart-sinking desolation; no fields, no dwellings, no trees, no landmarks, no marks of cultivation, except a few scanty patches of corn, thinly scattered over the waste; and huts, like wigwags, to shelter the wretched and half-starved people that are doomed to live on this field of death. The Tiber, rolling turbidly along in its solitary course, seems sullenly to behold the altered scenes that have withered around him. A few miles from Ostia we entered upon a wilderness indeed. A dreary swamp extended all around, intermingled with thickets, through which roamed wild buffaloes, the only inhabitants of the waste. A considerable part of the way was upon the ancient pavement of the Via Ostiensis, in some places in good preservation, in others broken up and destroyed. When this failed us, the road was execrable. The modern fortifications of Ostia appeared before us long before we reached them. At length we entered its gate, guarded by no sentinel; on its bastions appeared no soldier; no children ran from its houses to gaze at the rare splendour of a carriage; no passenger was seen in the grass-grown street. It presented the strange spectacle of a town without inhabitants. After some beating and hallooing, on the part of the coachman and lackey, at the shut-up door of one of the houses, a woman, unclosing the shutter of an upper window, presented her ghastly face; and, having first carefully reconnoitred us, slowly and reluctantly admitted us into her wretched hovel. 'Where are all the people of the town?' we inquired. 'Dead,' was the brief reply. The fever of the malaria annually carries off almost all whom necessity confines to this pestilential region. But this was the month of April, the season of comparative health, and we learned, on more strict inquiry, that the population of Ostia, at present, nominally consisted of twelve men, four women, no children, and two priests.—The ruins of old Ostia are farther in the wilderness. The sea is now two miles, or nearly, from the ancient port. The cause of this, in a great measure, seems to be, that the extreme flatness of the land does not allow the Tiber to carry off the immense quantity of earth and mud its turbid waters bring down; and the more that is deposited, the more sluggishly it flows, and thus the shore rises, the sea recedes, and the marshes extend. The marshy *insula sacra*, in the middle of the river, is now inhabited by wild buffaloes. We had intended to cross to the sacred island, and from thence to the village of *Fiumicino*, on the other side, where there are said to be still some noble remains of ancient Porto, particularly of the mole, but a sudden storm prevented us." (*Rome in the Nineteenth Century*, vol. 2, p. 449.)

OETORIUS SCARULA, a governor of Britain in the reign of Claudius, who defeated and took prisoner the famous Caractacus. He died A.D. 55. (*Tacit., Ann.*, 12, 36.)

OETROGTHA, or Eastern Goths, a division of the great Gothic nation, who settled in Pannonia in the fifth century of our era, whence they extended their dominion over Noricum, Rætia, and Illyricum. About 483 or 489 A.D., their king Theodoric was serving as an auxiliary under the Emperor Zeno, and distinguished himself in Syria. On his return to Constantinople, Theodoric, according to the statement of the historian Evagrius, fearing Zeno's jealousy of his success, retired into Pannonia in 487, where he collected an army, and in the following year marched into Italy, with all his tribe, men, women, and children, and, as

appears, with the consent of Zeno himself, who wished to remove the Ostrogoths from his territories. Theodoric defeated Odoacer in various battles, took him prisoner, and some time after put him to death. Upon this event, Theodoric sent an ambassador to Anastasius, the emperor of Constantinople, who transmitted to him, in return, the purple vest, and acknowledged him as King of Italy. It appears that both Theodoric and his predecessor Odoacer acknowledged, nominally at least, the supremacy of the Eastern emperor. The rest of the history of the Ostrogoths is connected with that of Theodoric, who established his dynasty over Italy, which is generally styled the reign of the Goths in that country. (*Encycl. Us. Knowl.*, vol. 17, p. 55.)

OSYMANDIAS, a king of Egypt, the same with Amemph or Phamenoph. (*Vid.* Memnon, and Memnonium.) Jablonski makes Osymandyas equivalent in meaning to "*dans vocem*," voice-emitting. (*Voc. Egypt.*, p. 29, p. 97.—Compare Creuzer, *Symbolik*, par Guigniaut, vol. 1, p. 482.)

OTHO, I. MARCUS SALVIUS, was born A.D. 31 or 32. He was descended of an honourable family, which originally came from Ferentinum, and which traced its origin to the Lucumones of Etruria. His grandfather, who belonged to the equestrian order, was made a senator through the influence of Livia Augusta, but did not rise higher in office than the praetorship. His father, Lucius Otho, was advanced to offices of great honour and trust by the Emperor Tiberius, whom he is said to have resembled so closely in person as to have been frequently taken for a near relation. Marcus Otho was an intimate friend of Nero during the early years of his reign, and his associate in his excesses and debaucheries; but Nero's love for Poppaea, whom Otho had seduced from her husband, and to whom he was greatly attached, produced a coolness between them, and this rivalry for the affections of an unprincipled woman would soon have terminated in the ruin of Otho, had not Seneca procured for the latter the government of Lusitania, to which he was sent as into a kind of honourable exile. In this province, which he governed, according to Suetonius (*Vit. Othonis*, 3), with great justice, he remained for ten years; and afterward took an active part in opposition to Nero, and in placing Galba on the throne, A.D. 68. Otho appears to have expected, as the reward of his services, that he would be declared his successor; but when Galba proceeded to adopt Piso Licinianus, Otho formed a conspiracy among the guards, who proclaimed him emperor, and put Galba to death after a reign of only seven months. Otho commenced his reign by ingratiating himself with the soldiery, whom Galba had unwisely neglected to conciliate. He yielded to the wishes of the people in putting to death Tigellius, who had been the chief minister of Nero's pleasures, and he acquired considerable popularity by his wise and judicious administration. He was, however, scarcely seated upon the throne, before he was called upon to oppose Vitellius, who had been proclaimed emperor by the legions in Germany a few days before the death of Galba. Vitellius, who was of an indolent disposition, sent forward Cæcina, one of his generals, to secure the passes of the Alps, while he himself remained in his camp upon the Rhine. Otho quickly collected a large army and marched against Cæcina, while he sent his fleet to reduce to obedience Liguria and Gallia Narbonensis. (Compare Tacitus, *Agric.*, c. 7.) At first Otho was completely successful. Liguria and Gallia Narbonensis submitted to his authority, while Cæcina was repulsed with considerable loss in an attack upon Placentia. Cæcina encountered subsequently a second check. But, shortly after, Otho's army was completely defeated by the troops of Vitellius, in a hard-fought battle near Bedriacum, a village on the Po, southwest of Mantua. Otho, who

does not appear, however, to have been deficient in bravery, had been persuaded, for the security of his person, to retire before the battle to Brizellum; a step which tended, as Tacitus has observed, to occasion his defeat. When he was informed of the result of the conflict, he refused to make any farther effort for the empire, but put an end to his own life by falling upon his sword, at the age of 37 according to Tacitus (*Hist.*, 2, 50), or of 38 according to Suetonius (*Vit. Oth.*, c. 11), after reigning 95 days. Plutarch, in his life of Otho, relates that the soldiers immediately buried his body, that it might not be exposed to indignity by falling into the hands of his enemies, and erected a plain monument over his grave, with the simple inscription, "To the memory of Marcus Otho." The early debaucheries of Otho threw a stain upon his reputation, which his good conduct in Lusitania and his mildness as emperor did not altogether remove. The treatment which he received from Nero might in some degree justify his rebellion against that prince; but no palliation can be found for the treason and cruelty with which he was chargeable towards Galba. In all things his actions were marked by a culpable extreme; and perhaps both the good and the evil which appeared in his life were the result of circumstances rather than of virtuous principles or of fixed and incurable depravity. (*Tacit., Hist.*, lib. 1 et 2.—*Sueton., Vit. Otho.*—*Plut., Vit. Otho.*—*Dio Cass., lib. 64.*—*Encycl. Us. Knowl.*, vol. 17, p. 59.—*Encycl. Metropolit.*, div. 3, vol. 3, p. 497, *seqq.*)—II. L. Roscius, a tribune of the commons, who, in the year that Cicero was consul, proposed and caused to be passed the well-known law which allowed the equestrian order particular seats in the theatre. The equites, previous to this, sat promiscuously with the commons. By this new regulation of Otho's, the commons considered themselves dishonoured, and hissed and insulted Otho when he appeared in the theatre: the equites, on the other hand, received him with loud plaudits. The commons repeated their hissings and the knights their applause, until at last they came to mutual reproaches, and the whole theatre presented a scene of the greatest disorder. Cicero, being informed of the disturbance, came and summoned the people to the temple of Bellona, where, partly by his reproofs and partly by his persuasive eloquence, he so wrought upon them that they returned to the theatre, loudly testified their approbation of Otho, and strove with the equites which should show him the most honour. The speech delivered on this occasion was afterward reduced to writing. It is now lost, but, having been delivered extempore, it affords a strong example of the persuasive nature of his eloquence. One topic which he touched on in this oration, and the only one of which we have any hint from antiquity, was his reproaching the rioters for their want of taste, in creating a tumult while Roscius was performing on the stage. (*Livy, Epit.*, 99.—*Horat., Epist.*, 1, 1, 62.—*Juv., Sat.*, 3, 159.—*Vell. Patern., 2, 32.*—*Fuss, Rom. Antiq.*, p. 147.)

OTHEYS, a mountain-range of Thessaly, which, branching out of Tymphrestus, one of the highest points in the chain of Pindus, closed the great basin of Thessaly to the south, and served at the same time to divide the waters which flowed northward into the Peneus from those received by the Sperchius. This mountain is often celebrated by the poets of antiquity. (*Eurip., Alceste*, 583.—*Theocr., Idyll.*, 3, 43.—*Virg., Æn.*, 7, 674.—*Lucan.*, 6, 337.) At present it is known by the different names of *Helloro*, *Variboro*, and *Goura*. (*Pouqueville*, vol. 3, p. 394.—*Cramer's Anc. Greece*, vol. 1, p. 412.)

OTUS and EPHEALTES, sons of Neptune. (*Vid. Alodæ.*)

OVIDIUS NASO, P., a celebrated poet, born at Sulmo (now *Sulmona*), a town lying on the river Pescara, in the territory of the Peligni, at the distance of

ninety miles from Rome. Ovid came into the world A.U.C. 711, the memorable year in which Cicero was murdered, and on the very day when the two consuls, Hirtius and Pansa, fell at the battle of Mutina. The events of his life are chiefly known from his own writings, and more particularly from the tenth elegy of the fourth book of the *Tristia*. Ovid was of an equestrian family, and was brought to Rome at an early period of life, along with an elder brother, to be fully instructed in the arts and learning of the capital. (*Trist.*, 4, 10.) He soon disclosed an inclination towards poetry; but he was for some time dissuaded from a prosecution of the art by his father, whose chief object was to make him an accomplished orator and patron, and thereby open up to him the path to civic honours. The time was indeed past when political harangues from the rostra paved the way to the consulship or to the government of wealthy provinces; but distinction and emolument might yet be attained by eminence in judicial proceedings, and by such eloquence as the servile deliberations of the senate still permitted. Ovid, accordingly, seems to have paid considerable attention to those studies which might qualify him to shine as a patron in the Forum, or procure for him a voice in a submissive senate. He practised the art of oratory, and not without success, in the schools of the rhetoricians Arellius Fuscus and Porcius Latro, the two most eminent teachers of their time. Seneca, the rhetorician, who himself had heard him practising declamation before Fuscus, informs us, that he surpassed all his fellow-students in ingenuity: but he harangued in a sort of poetical prose; he was deficient in methodical arrangement, and he indulged too freely in digressions, as also in the introduction of the commonplaces of disputation. He rarely declaimed, moreover, except on ethical subjects; and preferred delivering those sort of persuasive harangues which have been termed *Suasoria*. (*Senec., Controv.*, 2, 10.) After having assumed the *Toga Virilis*, and completed the usual course of rhetorical tuition at Rome, he proceeded to finish his education at Athens. It is not known whether he made much progress in philosophy during his stay in that city; but, from the tenour of many of his works, it appears probable that he had at least studied physics, and that in morals he had embraced the tenets of the Epicurean school. In company with Æmilius Macer, he visited the most illustrious cities of Asia (*Ep. e Pont.*, 2, 10); and on his way back to Rome he passed with him into Sicily. He remained nearly a year at Syracuse, and thence made several agreeable excursions through different parts of the island. After his return to Rome, and on attaining the suitable age, Ovid held successively several of the lower judicial offices of the state, and also frequently acted as arbiter, highly to the satisfaction of litigants whose causes he decided. (*Trist.*, 2, 93.) These avocations, however, were speedily relinquished. The father of Ovid had for some time restrained his son's inclination towards poetry; but the arguments he deduced against its cultivation, from the stale example of the poverty of Homer (*Trist.*, 4, 10), were now receiving an almost practical refutation in the court favour and affluence of Virgil and Horace. The death, too, of his elder brother, by leaving Ovid sole heir to a fortune ample enough to satisfy his wants, finally induced him to abandon the profession to which he had been destined, and bid adieu at once to public affairs and the clamours of the Forum. Henceforth, accordingly, Ovid devoted himself to the service of the Muses; though he joined with their purer worship the enjoyment of all those pleasures of life which a capital, the centre of every folly and amusement, could afford. He possessed an agreeable villa and extensive farm in the neighbourhood of Sulmo, the place of his birth; but he resided chiefly at his house on the Capitoline Hill (*Trist.*, 1, 3), or his

gardens, which lay a little beyond the city, at the junction of the Clodian and Flaminian Ways, near the Pons Milvius, where he composed many of his verses. He was fond, indeed, of the rural pleasures of flowers and trees, but he chiefly delighted to sow and plant them in these suburban gardens. (*Ep. e Ponto*, 1, 8.) Far from hiding himself amid his groves, like the melancholy Tibullus, he courted society, and never was happier than amid the bustle of the capital. One day, when Augustus, in his capacity of censor, according to ancient custom, made the whole body of Roman knights pass before him in review, he presented our poet with a beautiful steed. (*Tristia*, 2, 89.) The gift was accounted a peculiar mark of favour, and shows that, at the time when it was bestowed, he had incurred no moral stain which merited the disapprobation of his prince. While frequenting the court of Augustus, Ovid was well received by the politest of the courtiers. The titles of many of the epistles written during his banishment, show that they were addressed to persons well known to us, even at this distance of time, as distinguished statesmen and imperial favourites. Messala, to whose house he much resorted, had early encouraged the rising genius, and directed the studies of Ovid; and the friendship which the father had extended to our poet was continued to him by the sons. But his chief patron was Q. Fabius Maximus, long the friend of Augustus, and, in the closing scenes of that prince's life, the chief confidant of his weaknesses and domestic sorrows. (*Tacit., Ann.*, 1, 5.) Nor was Ovid's acquaintance less with the celebrated poets of his age than with its courtiers and senators. Virgil, indeed, he had merely seen, and premature death cut off the society of Tibullus; but Horace, Macer, and Propertius were long his familiar friends, and often communicated to him their writings previous to publication. While blessed with so many friends, he seems to have been undisturbed, at least during this period of his life, by the malice of a single foe: neither the court favour he enjoyed nor his poetical renown procured him enemies; and he was never assailed by that spirit of envy and detraction by which Horace had been persecuted. His poetry was universally popular (*Tristia*, 1, 1, 64): like the stanzas of Tasso, it was often sung in the streets or at entertainments; and his verses were frequently recited in the theatre amid the applause of the multitude. Among his other distinctions, Ovid was a favourite of the fair, with whom his engagements were numerous and his intercourse unrestrained. (*Am.*, 2, 4. — *Tristia*, 4, 10, 65.) He was extremely susceptible of love, and his love was ever changing. His first wife, whom he married when almost a boy, was unworthy of his affections, and possessed them but a short while. The second, who came from the country of the ancient Falisci, led a blameless life, but was soon repudiated. After parting with her, Ovid was united to a third, who was of the Fabian family. In her youth she had been the companion of Marcia, the wife of Fabius Maximus, and a favourite of Marcia's mother, who was the maternal aunt of Augustus. She was a widow at the time of her marriage with Ovid, and had a daughter by her former husband, who was married to Suilius, the friend of Germanicus. (*Ep. e Ponto*, 4, 8.) But these successive legitimate connexions did not prevent him from forming others of a different description. Corinna, a wanton, enticing beauty, whose real name and family the commentators and biographers of our poet have ineffectually laboured to discover, allured him in his early youth from the paths of rectitude. It is quite improbable that Corinna denoted Julia, the daughter of Augustus, and impossible that she represented Julia, his granddaughter, who was but an infant when Ovid recorded his amours with Corinna. Ovid passed nearly thirty years in the voluptuous enjoyment of the pleasures of the capital, blessed

with the smiles of fortune; honoured with the favour of his prince, and fondly anticipating a tranquil old age. (*Tristia*, 4, 8, 29.) He now remained at Rome the last of the constellation of poets which had brightened the earlier age of Augustus. That prince had by this time lost his favourite ministers, Mæcenas and Agrippa: he was less prosperous than during former years in the external affairs of the empire, and less prudently advised in his domestic concerns: he was insidiously alienated from his own family, and was sinking in his old age under the sway of the imperious Livia and the dark-souled Tiberius. Ovid's friendships lay chiefly among those who supported the lineal descendants of Augustus, the unfortunate offspring of Julia and Agrippa. He thus became an object of suspicion to the party in power, and had lost many of those benefactors who might have shielded him from the storm which now unexpectedly burst on his head, and swept from him every hope and comfort for the remainder of his existence. It was in the year 762, and when Ovid had reached the age of 51, that Augustus suddenly banished him from Rome to a wild and distant corner of the empire. Ovid has derived nearly as much celebrity from his misfortunes as his writings; and, having been solely occasioned by the vengeance of Augustus, they have reflected some dishonour on a name which would otherwise have descended to posterity as that of a generous and almost universal protector of learning and poetry. The real cause of his exile is the great problem in the literary history of Rome, and has occasioned as much doubt and controversy as the imprisonment of Tasso by Alphonso has created in modern Italy. The secret unquestionably was known to many persons in Rome at the time (*Tristia*, 4, 10. — Compare *Ep. e Ponto*, 2, 6); but, as its discovery had deeply wounded the feelings of Augustus (*Tristia*, 2, 209), no contemporary author ventured to disclose it. Ovid himself has only dared remotely to allude to it, and when he does mention it, his hints and suggestions are scarcely reconcilable with each other, sometimes speaking of his offence as a mistake or chance, in which he was more unfortunate than blameable, and at other times as if his life might have been forfeited without injustice. (*Tristia*, 5, 11.) No subsequent writer thought of revealing or investigating the mystery till it was too late, and it seems to be now closed for ever within the tomb of the Cæsars. The most ancient opinion (to which Sidonius Apollinaris refers) is, that Ovid was banished for having presumed to love Julia, the daughter of Augustus, and for having celebrated her under the name of Corinna (*Sidon. Apoll., Carm.*, 23, v. 158); and it was considered as a confirmation of this opinion, that exile was the punishment inflicted on Sempronius, the most known and best beloved of all her paramours. This notion was adopted by Crinitus and Lilius Gyraldus; but it was refuted as early as the time of Aldus Manutius, who has shown from the writings of Ovid that he was engaged in the amour with his pretended Corinna in his earliest youth; and it certainly is not probable that such an intrigue should have continued for about thirty years, and till Ovid had reached the age of fifty-one, or that Augustus should have been so slow in discovering the intercourse which subsisted. Julia, too, was banished to Pandataria in the year 752, which was nine years before the exile of Ovid; and why should his punishment have been delayed so long after the discovery of his transgression? Besides, had he been guilty of such an offence, would he have dared in his *Tristia*, when soliciting his recall from banishment, to justify his morals to the emperor, and to declare that he had committed an involuntary error? Or would he have been befriended and supported in exile by the greatest men of Rome, some of whom were the favourites and counsellors of Augustus? — Subsequently

o the time of Manutius, various other theories have been devised to account for the exile of Ovid. Dryden, in the Preface to his translation of Ovid's Epistles, thinks it probable that "he had stumbled by some inadvertency on the privacies of Livia, and had seen her in a bath; for the words '*sine veste Dianam*,' he remarks, agree better with Livia, who had the fame of chastity, than with either of the Julias." It would no doubt appear that our poet had a practice of breaking in unseasonably on such occasions (*A. A.*, 3, 246). But it is not probable that Augustus would have punished such an offence so severely, or that it would have affected him so deeply. Livia, at the time of Ovid's banishment, had reached the age of sixty-four, and was doubtless the only person in the empire who would consider such an intrusion as intentional.—Tiraboschi has maintained, at great length, that he had been the involuntary and accidental witness of some moral turpitude committed by one of the imperial family, most probably Julia, the granddaughter of Augustus, who had inherited the licentious disposition of her mother, and was banished from Rome on account of her misconduct, nearly at the same time that the sentence of exile was pronounced on Ovid. This theory, on the whole, seems the most plausible, and most consistent with the hints dropped by the poet himself. He repeatedly says, that the offence for which he had been banished was a folly, an error, an imprudence rather than a crime: using the words *stultitia* and *error* in opposition to *crimen* and *facinus*. (*Tristia*, 1, 2, 100, *et passim*.) He invariably talks of what he had seen as the cause of his misfortunes (*Tristia*, 2, 103, *segg.*), and he admits that what he had seen was a fault. But he farther signifies, that the fault he had witnessed was of a description which offended modesty, and which, therefore, ought to be covered with the veil of night. (*Tristia*, 3, 6.) It is by no means improbable that he should have detected the granddaughter of the emperor in some disgraceful intrigue. Neither of the Julias confined their amours to the recesses of their palaces, so that the most dissolute frequenter of the lowest scenes of debauchery may have become the witness of her turpitude. Farther, it is evident that it was something of a private nature, and which wounded the most tender feelings of Augustus, who, we know from history, was peculiarly sensitive with regard to the honour of his family. Lastly, it appears, that, after being a witness of the shameful transgression of Julia, Ovid had fallen into some indiscretion through timidity (*Ep. e. Ponto*, 2, 2), which might have been avoided, had he enjoyed the benefit of good advice (*Tristia*, 3, 6, 13); and it seems extremely probable, that the imprudence he committed was in revealing to others the discovery he had made, and concealing it from Augustus.—It is not likely that any better guess will now be formed on the subject. Another, however, has been recently attempted by M. Villenave, in a life of Ovid prefixed to a French translation of the *Metamorphoses*. His opinion, which has also been adopted by Schöll (*Hist. Lit. Rom.*, vol. 1, p. 240), is, that Ovid, from accident or indiscretion, had become possessed of some state secret concerning Agrippa Posthumus, the son of Agrippa and Julia, and grandson of Augustus. The existence of the family of Julia long formed the great obstacle to the ambition of Livia and her son Tiberius. Agrippa Posthumus, the last survivor of the race, was banished from Rome to the island of Planasia, near Corsica, in 758; but considerable apprehensions seem to have been entertained by Livia that he might one day be recalled. Ovid, in a poetical epistle from Pontus, written in the fifth year of his exile, accuses himself as the cause of the death of his friend Fabius Maximus; and this Fabius Maximus, it appears, was the chief confidant of the emperor in all that related to the affairs of Agrippa, which he wished concealed

from Livia. A few months before his own death, Augustus, attended by Fabius Maximus alone, privately visited Agrippa in his retirement of Planasia; and the object of his journey from Rome having been discovered by Livia, the death of this counsellor followed shortly after. It will be remarked, however, that this voyage was undertaken in 686, four years subsequently to the exile of Ovid, and was disclosed through the indiscretion of the wife of Fabius. (*Tacit., Ann.*, 1, 5.) But the French author conjectures, that the scene to which Ovid alludes in his writings as having witnessed, had some close connexion with the ensuing visit to Planasia, and gave a commencement to those suspicions which terminated in the death of his friend. His chief objection to the theory of Tiraboschi is, that Augustus would not have banished Ovid for discovering or revealing the disgrace of Julia, when, by her exile, he had already proclaimed her licentiousness to the whole Roman people. But, in fact, Ovid was not banished for the sake of concealment. The discovery which proved so fatal to himself was no secret at Rome; and, had secrecy been the emperor's object, banishment was the very worst expedient to which he could have resorted. Ovid might better have been bribed to silence; or, if sentence of death could have served the purpose more effectually, the old triumvir would not have scrupled to pronounce it. The secret, however, was already divulged, and was in the mouths of the citizens. Ovid was therefore exiled as a punishment for his temerity, as a precaution against farther discoveries, and to remove from the imperial eye the sight of one whose presence must have reminded Augustus of his disgrace both as a sovereign and parent.—Whatever may have been the real cause of the exile of Ovid, the pretext for it was the licentious verses he had written. (*Ep. e. Ponto*, 2, 3.) Augustus affected a regard for public morals; and concealing, on this occasion, the true motive by which he was actuated, he claimed a merit with the senate, and all who were zealous for a reformation of manners, in thus driving from the capital a poet who had reduced licentiousness to a system, by furnishing precepts, deduced from his own practice, which might aid the inexperienced in the successful prosecution of lawless love. He carefully excluded from the public libraries not merely the "*Art of Love*," but all the other writings of Ovid. (*Tristia*, 3, 1, 65.) It is evident, however, that this was all colour and pretext. Ovid himself ventures gently to hint, that Augustus was not so strict a moralist that he would seriously have thought of punishing the composition of a few licentious verses with interminable exile. (*Tristia*, 3, 524.) In point of expression, too, the lines of Ovid are delicate compared with those of Horace, whom the emperor had always publicly favoured and supported. Nor was his sentence of banishment passed until many years after their composition; yet, though so long an interval had elapsed, it was suddenly pronounced, as on the discovery of some recent crime, and was most rapidly carried into execution. The mandate for his exile arrived unexpectedly in the evening. The night preceding his departure from Rome was one of the utmost grief to his family, and of consternation and dismay to himself. In a fit of despair, he burned the copy of the *Metamorphoses* which he was then employed in correcting, and some others of his poems. He made no farther preparations for his journey, but passed the time in loud complaints, and in adjuration to the gods of the Capitol. His chief patron, Fabius Maximus, was absent at the time, and his only daughter was with her husband in Africa; but several of his friends came to his house, where they remained part of the night, and endeavoured, though in vain, to console him. After much irresolution, he at length departed on the approach of dawn, his dress neglected and his hair dishevelled.

His wife, who had wished to accompany him, but was not permitted, fainted the moment he left the house.—After his departure from Rome, Ovid proceeded to Brundisium, where he had an interview with Fabius Maximus. He recommended his wife to the care of his friend, and received repeated assurances of his support.—The destined spot of his perpetual exile was Tomi, the modern *Temeswar*, on the shore of the Euxine, a few miles to the south of the spot where the most southern branch of the Danube unites with that sea. (Vid. Tomi.) The place had been originally an Athenian colony, and was still inhabited by a few remains of the Greeks, but it was chiefly filled with rude and savage barbarians, of whose manners and habits the poet draws a most vivid description. The town was defended by but feeble ramparts from the incursions of the neighbouring Getae, or still more formidable tribes to the north of the Danube. Alarms from the foe were constant, and the poet himself had sometimes to grasp a sword and buckler, and place a helmet on his gray head, on a signal given by the sentinel (*Tristia*, 4, 1, 73), when squadrons of barbarians covered the desert which Tomi overlooked, or surrounded the town in order to surprise and pillage it.—Without books or society, Ovid often wished for a field (*Ep. e Ponto*, 1, 8) to remind him of the garden near the Flaminian Way, in which, in his happier days, he had breathed his love-sighs and composed his amorous verses. Some of the barbarian inhabitants were along with our poet in the small and inconvenient house which he inhabited (*Tristia*, 2, 200), and kept him in a state of constant alarm by their ferocious appearance. They neither cut their beards nor hair, which, hanging dishevelled over the face, gave a peculiar horror to their aspect. The whole race were clothed in the shaggy skins of various animals (*Tristia*, 3, 10), and each barbarian carried with him constantly a bow, and a quiver containing poisoned arrows. (*Tristia*, 3, 7.) They daily filled the streets with tumult and uproar, and even the litigants sometimes decided their cause before the tribunals by the sword. (*Tristia*, 5, 10.) But if there was danger within the walls of Tomi, destruction lay beyond them. Tribes, who foraged from a distance, carried off the flocks and burned the cottages. From the insecurity of property and severity of climate, the fields were without grain, the hills without vines, the mountains without oaks, and the banks without willows. (*Tristia*, 3, 10, 71.) Absinthium, or wormwood, alone grew up and covered the plains. (*Ep. e Ponto*, 4, 8.) Spring brought with it neither birds nor flowers. In summer the sun rarely broke through the cloudy and foggy atmosphere. The autumn shed no fruits; but, through every season of the year, wintry winds blew with prodigious violence (*Tristia*, 3, 10, 17), and lashed the waves of the boisterous Euxine on its desert shore. (*Tristia*, 4, 4, 57.) The only animated object was the wild Sarmatian driving his car, yoked with oxen, across the snows, or the frozen depths of the Euxine (*Tristia*, 3, 10, 32), clad in his fur cloak, his countenance alone uncovered, his beard glistening and sparkling with the hoar-frost and flakes of snow. (*Tristia*, 3, 10, 21.)—Such was the spot for which Ovid was compelled to exchange the theatres, the baths, the porticoes, and gardens of Rome, the court of Augustus, the banks of the Tiber, and the sun and soil of Italy.—While thus driving him to the most remote and savage extremity of his empire, Augustus softened the sentence he had pronounced on Ovid with some alleviating qualifications. He did not procure his condemnation by a decree of the senate, but issued his own mandate, in which he employed the word “relegation” (*relegatio*), and not “banishment” (*exilium*), leaving him, by this choice of terms, the enjoyment of his paternal fortune and some other privileges of a Roman citizen. (*Tristia*, 5, 11, 21.—*Ibid.*, 4, 9.) Nor were other circum-

stances wanting in his fate which might have contributed to impart consolation. His third wife, to whom he was tenderly attached, though not permitted to accompany him on the voyage to Scythia, continued faithful to her husband during his long exile, and protected his property from the rapacity of his enemies. (*Tristia*, 1, 5.) Many of his friends remained unabaken by his misfortunes, and from time to time he received letters from them, giving him hopes of recall. The Getae, though they at length became displeased with his incessant complaints of their country (*Ep. e Ponto*, 4, 14), received him at first with kindness and sympathy, and long paid him such distinguished honours, that he almost appears to have realized the fables of Orpheus and Amphion, in softening their native ferocity by the magic of the Roman lyre. (*Ep. e Ponto*, 4, 9.—*Ibid.*, 4, 14.)—Nothing, however, could compensate for the deprivations he suffered; nor was anything omitted on Ovid's part which he thought might prevail on the emperor to recall him to Rome, or assign him, at least, a place of milder exile; and Sicily was particularly pointed at as a suitable spot for such a mitigation of punishment. (*Tristia*, 5, 3.) This is the object of all his epistles from Pontus, the name of the district of Mœsia in which Tomi was situate, and not to be confounded with the Pontus of Asia Minor. He flattered Augustus during his life with an extravagance which bordered on idolatry (*Ep. e Ponto*, 4, 6.—*Tristia*, 2); and the letters addressed to his friends inculcate skillful lessons of choosing the most favourable opportunities for propitiating the despot. It does not appear, however, that any one of his numerous and powerful acquaintances ventured to solicit his recall, or to entreat Augustus in his behalf. Yet the poet seems to suppose that Augustus, previous to his decease, was beginning to feel more favourably towards him. (*Ep. e Ponto*, 4, 6.) After the death of the emperor, with a view, doubtless, of propitiating his successor, Ovid wrote a poem on his Apotheosis, and consecrated to him, as a new deity, a temple, where he daily repaired to offer incense and worship. (*Ep. e Ponto*, 4, 9.) Nor was he sparing in his panegyrics on the new emperor (*Ep. e Ponto*, 4, 13); but he found Tiberius equally inexorable with Augustus.—The health of Ovid had been early and severely affected by his exile and confinement at Tomi. He was naturally of a feeble constitution, and, in the place of his banishment, every circumstance was combined which could wear out the mind and the body. The rigour of the climate bore hard on one who had passed a delicate youth of pleasure and repose under an Italian sky. In consequence, soon after his arrival at Tomi, he totally lost his strength and appetite (*Ep. e Ponto*, 1, 10), and became thin, pale, and exhausted. From time to time he recovered and relapsed, till at length, at the age of 60, he sunk under the hardships to which he had been so long subjected. His death happened in the year 771, in the ninth year of his exile, and the fourth of the reign of Tiberius. Before his decease, he expressed a wish that his ashes might be carried to Rome; even this desire, however, was not complied with. His bones were buried in the Scythian soil, and the Getae erected to him a monument near the spot of his earthly sojourn.—It would seem that Ovid had commenced his poetical career with some attempt at heroic subjects, particularly the *Gigantomachia*. But he soon directed his attention from such topics to others which were more consonant to his disposition. Accordingly, the earliest writings of Ovid now extant are amatory elegies in the style of Tibullus and Propertius. These elegies are styled *Amores*, amounting in all to forty-nine, and were originally divided by the poet into five books. There are now only three books in the printed editions of Ovid; but it has been doubted whether all the elegies he wrote be still included in this division, or if two

books have been suppressed. These elegies, with a very few exceptions, are of an amatory description.—As an elegiac writer, Ovid has more resemblance to Propertius than to Tibullus. His images and ideas are for the most part drawn from the real world. He dwells not amid the visionary scenes of Tibullus, he indulges not in his melancholy dreams, nor pours forth such tenderness of feeling as the lover of Delia. The *Amores* of Ovid have all the brilliancy and freshness of the period of life in which they were written. They are full of ingenious conceptions, graceful images, and agreeable details. These are the chief excellences of the elegies of Ovid. Their faults consist in an abuse of the facility of invention, a repetition of the same ideas, an occasional affectation and antithesis in the language of love, and (as in the elegies of Propertius) the too frequent, and sometimes not very happy or appropriate, allusion to mythological fables.—Before finishing the elegies styled *Amores*, Ovid had already commenced the composition of the *Heroides* (*Am.*, 2, 18), which are likewise written in the elegiac measure. They are epistles supposed to be addressed chiefly from queens and princesses who figured in the heroic ages, to the objects of their vehement affections, and are in number not fewer than twenty-one; but there is some doubt with regard to the authenticity of six of them, namely, Paris to Helen, Helen to Paris; Leander to Hero, Hero to Leander; Acontius to Cydippe, Cydippe to Acontius. These six, though they appear in the most ancient MSS. under the name of Ovid, along with the others, are of doubtful authenticity, and have been generally ascribed by commentators to Aulus Sabinus, a friend of Ovid's, who was also the author of several answers to the epistles of our poet, as Ulysses to Penelope, and Æneas to Dido.—The *Heroides* present us with some of the finest and most popular fictions of an amorous antiquity, resounding with the names of Helen, Ariadne, and Phædra. Julius Scaliger pronounces them to be the most polished of all the productions of Ovid. (*Poet.*, 6, 7.) But there is a tiresome uniformity in the situations and characters of the heroines. The injudicious length to which each epistle is extended has occasioned a repetition in it of the same ideas; while the ceaseless tone of complaints uttered by these forsaken damsels has produced a monotony, which renders a perusal, at least of the whole series of epistles, insupportably fatiguing. There is also a neglect of a due observance of the manners and customs of the heroic ages; and in none of the works of Ovid is his indulgence in exuberance of fancy so remarkable to the reader, because many of the epistles, as those of Penelope, Briseis, Medea, Ariadne, and Dido, lead us to a comparison of the Latin author with Homer, the Greek tragedians, Catullus, and Virgil, those poets of true simplicity and unaffected tenderness. The work of Ovid entitled *De Arte Amandi*, or, more properly, *Artis Amatoria Liber*, is written, like the *Amores* and *Heroides*, in the elegiac measure. There is nothing, however, elegiac in its subject, as it merely communicates, in a light and often sportive manner, those lessons in the Art of Love which were the fruits of the author's experience, and had been acquired in the course of the multifarious intrigues recorded in the *Amores*. This poem was not written earlier than the year 752; for the author mentions in the first book the representation of a sea-fight between the Greek and Persian fleets, which was exhibited at that period in the *Naumachia*, under the direction of Augustus. The whole work is divided into three books.—This work is curious and useful, from the information it affords concerning Roman manners and antiquities in their lighter departments; and, though not written in the tone or form of satire, it gives us nearly the same insight as professed satirical productions into the minor follies of the Augustan age. Whatever

object the poet may have had in view when composing this work, it may be safely concluded that the poem itself did not in any degree tend to the corruption of the morals of his fellow-citizens, since the indulgence of every vice was then so licensed at Rome that they could hardly receive any additional stain; on the contrary, this very depravation of manners gave birth to the work of Ovid, suggested its pernicious counsels, and obtained for it the popularity with which it was crowned.—The book *De Remedio Amoris* is connected with that *De Arte Amandi*, and was written a short while after it. This poem discloses the means by which those who have been unsuccessful in love, or are enslaved by it to the prejudice of their health and fortune, may be cured of their passion. Occupation, travelling, society, and a change of the affections, if possible, to some other object, are the remedies on which the author chiefly relies. This work, on the whole, is not so pleasant and entertaining as the *De Arte Amandi*. It is almost entirely destitute of those agreeable episodes by which the latter poem is so much beautified and enlivened. It has fewer sportive touches and fewer fascinating descriptions.—The *Metamorphoses* of Ovid had been composed by him previous to his exile. But he received the mandate for his relegation while yet employed in the task of correction, and when he had completed this labour only on the first three books. Finding himself thus condemned to banishment from Rome, he threw the work into the flames, partly from vexation and disgust at his verses in general, which had been made the pretext for his punishment, and partly because he considered it an unfinished poem, which he could no longer have any opportunity or motive for perfecting. (*Tristia*, 1, 6.) Fortunately, however, some transcripts had been previously made by his friends of this beautiful production, which was thus preserved to the world. After Ovid's departure from Rome, these quickly passed into extensive circulation; they were generally read and admired, and a copy was placed in his library, which was still preserved and kept up by his family. (*Tristia*, 1, 1, 118.) In the depths of his dreary exile, Ovid learned, perhaps not without satisfaction, that his work had been saved; and he even expressed a wish that some of his favourite passages might meet the eye of Augustus. (*Tristia*, 2, 557.) But he was annoyed by the recollection that the poem would be read in the defective state in which he had left it. (*Tristia*, 3, 14, 23.) He had no copy with him at Tomi, on which he could complete the corrections which he had commenced at Rome. He therefore thought it necessary to apprise his friends in Italy, that the work had not received his last emendations; and, as an apology for its imperfections, he proposes that the six following lines should be prefixed as a motto to the copies of his *Metamorphoses* which were then circulating in the capital. (*Tristia*, 1, 6.)

"Orba parente suo quicumque volumina tangis;
His saltem vestra detur in urbe locus.
Quoque magis faveas, non hæc sunt edita ab ipso,
Sed quæ de domini funere rapta sui.
Quicquid in his igitur vitæ rude carmen habebis,
Emendaturus, si licuisset, erat."

The *Metamorphoses*, therefore—at least the twelve concluding books—should be read with some degree of that indulgence which is given to the last six books of the *Æneid*; though, from what we see in the perfected works of Ovid, it can hardly be supposed that, even if he had been permitted, he would have expunged conceits and retrenched redundancies with the pure taste and scrupulous judgment of the Mantuan bard.—In the composition of his *Metamorphoses*, Ovid can lay no claim to originality of invention. Not one of the immense number of transmutations which he has recorded, from the first separation of Chaos till the

OVIDIUS.

apotheosis of Julius Cæsar, is of his own contrivance. They are all fictions of the Greeks and Oriental nations, interspersed, perhaps, with a few Latin or Etruscan fables. In fact, a book of *Metamorphoses* which were feigned by the poet himself, would have possessed no charm, being unauthorized by public belief, or even that species of popular credulity which bestows interest and probability on the most extravagant fictions. And, indeed, Ovid had little motive for invention, since, in the relations of those who had gone before him in this subject, he could enter the most extensive field ever opened to the career of a poet.—The *Metamorphoses* of Ovid are introduced by a description of the primeval world, and the early changes it underwent. All that he writes of Chaos is merely a paraphrase of what he had found in the works of the ancient Greeks, and is more remarkable for poetic beauty than philosophic truth and consistency. The account of the creation, which is described with impressive brevity, is followed by a history of the four ages of the world, the war with the giants, Deucalion's deluge, and the self-production of various monsters in those early periods by the seeming and yet unexhausted earth. This last subject leads to the destruction of the serpent Python by Apollo, and the institution of the Pythian games in honour of his victory: at their first celebration, the conquerors were crowned with oak, the laurel being unknown till the transformation of Daphne, when it became the prize of honour and renown. Our poet thus glides into the series of his metamorphoses, which are extended to fifteen books, and amount in all to not less than two hundred and fifty. The stories of this description related by Ovid's predecessors were generally insulated, and did not hang together by any association or thread of discourse. But the Roman poet continues as he had commenced, and, like the Cyclic writers of Greece, who comprehended, in one book, a whole circle of fables, he proceeds from link to link in the golden chain of fiction, leading us, as it were, through a labyrinth of adventures, and passing imperceptibly from one tale to another, so that the whole poem forms an uninterrupted recital. In themselves, however, the events have frequently no relation to each other, and the connexion between the preceding and succeeding fable often consists in nothing more than that the transformation occurred at the same place or at the same time, or had reference, perhaps, to the same amorous deity.—In such an infinite number, the merit of the stories must be widely different; the following, however, may be mentioned as among the best: the fables of Cephalus and Procris, of Philemon and Baucis, of Hippomenes and Atalanta, the flight of Dædalus and Icarus, the loves of Pyramus and Thisbe. But of the whole, the story of Phæthon is, perhaps, the most splendid and highly poetical.—It has been objected, however, to the *Metamorphoses*, that, however great may be the merit of each individual tale, there is too much uniformity in the work as a whole, since all the stories are of one sort, and end in some metamorphosis or other. (*Kuimes's Elements of Criticism*, vol. 1, c. 9.) But this objection, if it be one, can lie only against the choice of the subject; for if a poet announces that he is to sing of bodies changed and converted into new forms, what else than metamorphoses can be expected? Besides, in the incidents that lead to these transformations, there is infinite variety of feeling excited, and the poet intermingles the noble with the familiar, and the gay with the horrible or tender. Sometimes, too, the metamorphosis seems a mere pretext for the introduction of the story, and occupies a very inconsiderable portion of it. The blood which flowed from Ajax, when he slew himself in a transport of indignation, because the arms of Achilles were adjudged to Ulysses, produced a hyacinth, and on this feeble stem the poet has ingrafted the animated and eloquent

OVIDIUS.

speeches of the contending Grecian chiefs. In the tragic history of Pyramus and Thisbe, the lovers themselves are not metamorphosed, but the fruit of the mulberry-tree under which their blood was shed assumes a crimson dye. It would be endless to point out in detail the blemishes and beauties of such an extensive work as the *Metamorphoses*. The luxuriance of thought and expression which pervade all the compositions of Ovid, prevails likewise here; but his comparisons are pleasing and appropriate, and his descriptions are rich and elegant, whether he exhibits the palace of the Sun or the cottage of Philemon. The many interesting situations displayed in the *Metamorphoses* have formed a mine for the exertion of human genius in all succeeding periods, not merely in the province of narrative fable, but in the department of the drama and fine arts; and no work, with the exception of the Sacred Scriptures, has supplied so many and such happy subjects for the pencil. The Greek books from which the *Metamorphoses* were chiefly taken having been lost, the work of Ovid is now the most curious and valuable record extant of ancient mythology. It would be difficult to reduce every story, as some writers have attempted, into a moral allegory (*Garth, Pref. to Translation*); it would be impossible to find in them, with others, the whole history of the Old Testament, and types of the miracles and sufferings of our Saviour, or even the complete ancient history of Greece, systematically arranged (compare *Müller, Einleitung*, vol. 4, p. 163, &c.—*Fabric., Bibl. Lat.*, vol. 1, p. 447.—*Goujet, Bib. Franc.*, vol. 6, p. 16, 52.) It cannot be denied, however, that the *Metamorphoses* are immense archives of Grecian fable, and that, beneath the mask of fiction, some traits of true history, some features of manners and the primeval world, may yet be discovered. In this point of view, the *Fasti* of Ovid, though written in elegiac and not in heroic measure, may be considered as a supplement or continuation of the *Metamorphoses*. Its composition was commenced at Rome by the author previous to his exile. The work was corrected and finished by him at Tomi (*Fasti*, 4, 81), and was thence sent to Rome, with a prefatory dedication to the great Germanicus. The plan of this production was probably suggested by the didactic poem which Callimachus had published under the title of *Alûia*, in which he feigns that, being transported to Helicon, he was there instructed by the Muses in the nature and origin of various religious usages and ancient ceremonies. It would appear that, before the time of Ovid, some vague design of writing a poem of this description had been entertained by Propertius (*Eleg.*, 4, 1). But Ovid, in his *Fasti*, executed the work which Propertius did not live, or, perhaps, found himself unable, to accomplish. In the Latin language, the word *Fasti* originally signified, in opposition to *Nefasti*, the days on which law proceedings could be legally held, or other ordinary business transacted; and thence it came, in course of time, to denote the books or tables on which the days in each month accounted as *Fasti* or *Nefasti* were exhibited. The term at length was applied to any record digested in regular chronological order, as the *Fasti Consulares*; and with Ovid it signifies the anniversaries of religious festivals, of dedications of temples, or of other memorable events, indicated in the calendar under the name of *Dies Fasti*, and which in general belonged, in the ancient meaning, to the class of *Dies Nefasti* rather than *Fasti*. C. Hemina and Claudius Quadrigarius had given histories of these festivals in prose: but their works were dry and uninteresting; and Ovid first bestowed on the subject the embellishments of poetry and imagination. The object of the *Fasti* of Ovid is to exhibit in regular order a history of the origin and observance of the different Roman festivals, as they occurred in the course of the year; and to associate the celebration of these holidays with the

sun's course in the zodiac, and with the rising or setting of the stars. A book is assigned to each month, but the work concludes with June. The six other books, which would have completed the Roman calendar, may have perished during the middle ages; but it seems more probable that they never were written. No ancient author or grammarian quotes a single phrase or word from any of the last six books of the *Fasti*; and, in some lines of the *Tristia* (2, 549, *seqq.*), the author himself informs us that the composition had been interrupted. This subject itself does not afford much scope for the display of poetic genius. Its arrangement was prescribed by the series of the festivals, while the proper names, which required to be so often introduced, and the chronological researches, were alike unfavourable to the harmony of versification. The *Fasti*, however, is a work highly esteemed by the learned on account of the antiquarian knowledge which may be derived from it. The author has poured a rich and copious erudition over the sterile indications of the calendar, he has traced mythological worship to its source, and explained many of the mysteries of that theology which peopled all nature with divinities. Even Scaliger, whose opinions are generally so unfavourable to Ovid, admits the ancient and extensive erudition displayed in the *Fasti*. (*Poet.*, 6, 7.) In particular, much mythological information may be obtained from it as to the points in which the superstitions and rites of the Romans differed from those of the Greeks, and also the manner in which they were blended. "The account," says Gibbon, "of the different etymologies of the month of May, is curious and well expressed. We may distinguish in it an Oriental allegory, a Greek fable, and a Roman tradition." Some truths concerning the ancient history of Rome may be also elicited from the *Fasti*. It may appear absurd to appeal to a poet in preference or contradiction to annalists and chroniclers; but it must be recollected, that these annalists themselves originally obtained many of their facts from poetical tradition. Ovid, besides, had studied the Registers of the Pontifex Maximus, which are now lost, and which recorded, along with religious observances, many historical events. Occasional light may therefore be thrown by the *Fasti* of Ovid on some of the most ancient and dubious points of Roman story. For example, our poet completely vindicates Romulus from the charge of having slain his brother in a momentary transport of passion. Remus was legally sentenced to death, in consequence of having violated a salutary law enacted by the founder of Rome, and which, in an infant state, it was requisite to maintain inviolably.—The circumstance of the melancholy exile of Ovid gave occasion to the last of his works, the *Tristia*, and the *Epistola e Ponto*. The first book of the *Tristia*, containing ten elegies, was written by Ovid at sea, during his perilous voyage from Rome to Pontus. (*Tristia*, 1, 1, 42.—*Ibid.*, 1, 10.) It may be doubted, however, whether this, which is the generally received opinion, will hold good with respect to all the elegies of the first book. He speaks in the sixth of copies of his *Metamorphoses* being circulated at Rome, and it is not likely that he could receive this intelligence while on his way to Pontus. The first book is chiefly occupied with detailing the occurrences at his departure from the capital, the storms he encountered, and the places he saw in the course of his navigation. The remaining four books were composed during the first three years of his gloomy residence at Tomi. In the second book, addressed to Augustus, he apologizes for his former life and writings. In some of the elegies of the third, fourth, and fifth books, he complains to himself of the hard fate he had suffered in being exiled from Italy to the inhospitable shores of the Euxine: in others he exhorts his correspondents at Rome to endeavour to mitigate the anger of Augustus and obtain his recall.

The names, however, of the friends and patrons whom he addressed are not mentioned (*Tristia*, 1, 4, 7), since, during this time, his relatives and acquaintances were afraid lest they should incur the displeasure of Augustus by holding any communication with the unhappy exile. At the end of three years, this apprehension, which, perhaps, had been all along imaginary, was no longer entertained; and, accordingly, the epistles which he wrote from Pontus during the remainder of his severe sojourn are inscribed with the names of his friends, among whom we find the most distinguished characters of the day. These elegiac epistles differ from the *Tristia* merely in the poet's correspondents being addressed by name, instead of receiving an appellation whatever, or being only mentioned under some private and conventional title. The subjects of the four books of epistles from Pontus are precisely the same with those in the *Tristia*, complaints of the region to which the poet had been banished, and exhortations to his friends to obtain his recall. From the first line of the *Tristia* to the last of the epistles from Pontus, the lyre of the exiled bard sounds but one continued strain of wailing and complaint. All the melancholy events of his former life are recalled to his recollection, and each dismal circumstance in his present condition is immeasurably deplored. But he speaks of his old age, mortifications, and sorrows with such touching and natural eloquence, and in a tone so truly mournful, that no one can read his plaintive lines without being deeply affected. The only elegies in which Ovid quits even for a moment this tone of complaint, are those where he celebrates the victories of Tiberius in Germany; and the commencement of a poem on the return of spring, which contains the sole lines in the *Tristia* that give any indication of a mind soothed by the improving season or the reviving charms of nature.—During his exile, Ovid appears to have been much indebted to the kindness and commiseration of the friends whom he had left behind him at Rome. A few, however, with whom he had been bound in ties of the closest intimacy, not only neglected him during his banishment, but attempted to despoil him of the patrimony which he still retained by the indulgence of the emperor. The conduct of one who had been his warmest friend in prosperity, and became his bitterest foe in adversity, prompted him, while at Tomi, to dip his pen in the gall of satire, from which, during a long life, he had meritoriously abstained. The friend, now changed to foe, whose altered conduct drove our poet to pen a vehement satire, is generally supposed to have been Hyginus, the celebrated mythographer, and at this time the keeper of the imperial library. Ovid, however, does not name his enemy, but execrates him in his *Ibis*. Callimachus, having had a quarrel with Apollonius Rhodius, satirized him under the appellation of *Ibis*, an unclean Egyptian bird, and hence Ovid bestowed it on Hyginus, who, though a native of Spain, had gone in early youth to Egypt, and was brought from Alexandria to Rome. He had offended our poet by attempting to persuade his wife to accept another husband, and by soliciting the emperor to confiscate his property, with a view of having it bestowed on himself. The poem which Ovid directed against this selfish and ungrateful friend cannot, perhaps, be properly termed a satire, being a series of curses in the style of the *Dra* of Valerius Cato. They are of such a description that, compared with them, the Anathemas of Erulphus and the Curse of Kehama may be considered as benedictions.—Besides the works of Ovid which yet remain entire, and which have now been fully enumerated, there are fragments still extant from some poems of which he is reputed to have been the author. The *Halieuticon*, which is much mutilated, is attributed to Ovid on the authority of the elder Pliny (32, 2), who says that he has told many wonderful things concerning the nature of fishes in his *Hali*

ention: and we find in Pliny the names of several fishes which are not mentioned by any other author, but perhaps were natives of the sea on the shore of which Ovid commenced this poem towards the close of his life. Notwithstanding this authority, Wernsdorff is of opinion that it was not written by Ovid, as it is not found in any MS. of his works; and he assigns it to Grætius Faliscus. Ovid also wrote a poem *De Medicamine faciei*, as we learn from two lines in his *Art of Love* (3, 205). It is doubted, however, if the fragment remaining under this title be the genuine work of our poet.—During his residence at Tomi, Ovid acquired a perfect knowledge of the language which was there spoken. The town had been originally founded by a Greek colony, but the Greek language had been gradually corrupted, from the influx of the Getæ, and its elements could hardly be discovered in the jargon now employed. Ovid, however, composed a poem in this barbarous dialect, which, if extant, would be a great philological curiosity. The subject he chose was the praises of the imperial family at Rome. When completed, he read it aloud in an assembly of the Getæ; and he paints with much spirit and animation the effect it produced on his audience.—After what has been already said of the different works of Ovid in succession, it is unnecessary to indulge in many general remarks on his defects or merits. Suffice it to say, that the brilliancy of his imagination, the liveliness of his wit, his wonderful art in bringing every scene or image distinctly, as it were, before the view, and the fluent, unlaboured ease of his versification, have been universally admired. But his wit was too profuse and his fancy too exuberant. The natural indolence of his temper, and his high self-esteem, did not permit him to become, like Virgil or Horace, a finished model of harmony and proportion. (*Dunlop's Roman Literature*, vol. 3, p. 349, *seqq.*)—The best editions of Ovid are, that of Burmann, *Amst.*, 1727, 4 vols. 4to, and that of Lemaire, *Paris*, 1820–24, 10 vols. 8vo. The edition of N. Heinsius, *Amst.*, 1661, 3 vols. 12mo, is also a valuable one.

Oxiæ, small pointed islands, near the Echinades, off the coast of Acarnania. Their ancient name has reference to their form (*Ὀξείαι*). Strabo reports, that these are the same which Homer calls Thm. (*Od.*, 15, 298.—*Strabo*, 456.) Stephanus supposes the Oxiæ to be Dulchium (*s. v. Δουλίχιον*). This group is now commonly known by the name of *Curzolari*, but the most considerable among them retains the appellation of *Oxiæ*. (*Gell's Lin.*, p. 298.)

Oxus, a large river of Bactriana, rising in the north-eastern extremity of that country, or, rather, in the southeastern part of *Great Bukharia*, and flowing for the greater part of its course in a northwest direction. It receives numerous tributaries, and falls, after a course of 1200 miles, into the *Sea of Aral*. The Oxus is now the *Amoo* or *Jihon* (the latter being the name given to it by the Arabian geographers). According to most of the ancient writers, it flowed direct into the Caspian, and this statement is said to be confirmed by the existence of its former channel; but, in all probability, they were ignorant of the existence of the Sea of Aral. Some writers think that Herodotus speaks of the Oxus under the name of *Araxes* (1, 201, *seqq.*; 4, 11); but it is more likely that he there refers to the *Volga*. The historian, however, certainly confounds it with the *Araxes* of Armenia, since he says it rises in the country of the *Matieni* (1, 202), and flows towards the east (4, 40). According to his account, there were many islands in it, some as large as Lesbos, and it emptied itself by forty mouths, which were all lost in marshes, with the exception of one, that flowed into the Caspian (1, 202). Strabo says, that the Oxus rose in the Indian Mountains, and flowed into the Caspian (*Strab.*, 509, 519), which is also the opinion of Mela (3, 5) and Ptolemy. Pliny (6, 18) makes it rise in a lake

called Oxus; but it is not improbable that, with his usual carelessness in matters relating to geography, he confounds its source with its termination. The Oxus is a broad and rapid river, and receives many affluents, of which the most important mentioned by the ancients was the *Ochus*, which, according to most accounts, flowed into the Oxus near its mouth, though some make it to have entered the Caspian by a separate channel. (*Strab.*, 509, 518.)—The Oxus has exercised an important influence upon the history and civilization of Asia. It has in almost all ages formed the boundary between the great monarchies of South-western Asia and the wandering borders of Scythia and Tartary. The conquests of Cyrus were terminated by its banks, and those of the Macedonians were few and unimportant beyond it. The Oxus appears also to have formed one of the earliest channels for the conveyance of the produce of India to the western countries of Asia. Strabo informs us, on the authority of Aristobulus, that goods were conveyed from India down the Oxus to the Caspian, and were thence carried by the river Cyrus into Albania and the countries bordering on the Euxine. (*Strab.*, 509.) This account is also confirmed by the statement of Varro (*ap. Plin.*, 6, 19), who informs us, that Pompey learned, in the war with Mithradates, that Indian goods were carried by the Oxus into the Caspian, and thence through the Caspian to the river Cyrus, from which river they were conveyed, by a journey of five days, to the river Phasis in Pontus. The breadth of the Oxus, immediately to the north of *Balkh*, is 800 yards, and its depth 20 feet (*Burne's Travels*, vol. 1, p. 249); but south of *Bokhara* the river is only 650 yards wide, but from 25 to 29 feet deep. (*Burne's Travels*, vol. 2, p. 5.—*Encycl. Us. Knowl.*, vol. 17, p. 108.)—According to Wahl, the term *Oechan* in Pehlvi meant "river," and he thinks that this name was softened down by the Greeks into *Oxus*, the intermediate form having been probably *Oschus* or *Ochus*. A Hindoo name for the same river is said to be *Kasseh*, which means "water," and has a strong resemblance to the German *Wasser*. The Oxus, therefore, may have been so called *καὶ ἑξ ὀχῆν*, as being in an emphatic sense the great river of Upper Asia. The root in *Oechan* (or *Och-i*) bears some analogy to that in the old names *Ogyges* and *Oceanus*. (*Vid. Ogyges*.—Wahl, *Mittel-und Vorder-Asien*, vol. 1, p. 763.—*Ritter, Erdkunde*, vol. 2, p. 22.—*Bähr, ad Ctes.*, p. 186.)

Oxydricæ, a nation of India who are supposed to have inhabited the district now called *Outsch*, near the confluence of the *Aceines* and *Indus*. (*Strabo*, 701.—*Steph. Byz.*, p. 615.—*Arrian*, 6, 13.—*Vincent's Nearchus*, p. 133.)

Oxyrynchus, a city of Egypt, in the district of Heptanomia, and capital of the Oxyrynchite Nome. It was situate on the canal of Moeris, south of Heracleopolis Magna, and received its name (a translation very probably from the Egyptian) on account of a fish called *ὀξύρυγχος* in Greek, a species of pike, being worshipped and having a temple here. This place became a great resort of monks and hermits when Christianity was spread over Egypt. Nothing remains of this city, in the village called *Bekness*, built on its ruins, but some fragments of stone pillars, and a single column left standing, and which appears to have formed part of a portico of the composite order. (*Ælian, Hist. An.*, 10, 46.—*Rufinus, de vita Patrum*, c. 5.—*Mannert, Geogr.*, vol. 10, pt. 1, p. 412.)

Oxôlæ, one of the divisions of the Locri in Greece. Besides the explanation of their name as given in a previous article (*vid. Locri I.*), the following etymologies are mentioned by Pausanias. 1. During the reign of Orestheus, son of Deucalion, a bitch brought forth a stick (*ξύλον*) instead of a whelp. Orestheus planted this, and a vine shot up, from the branches (*ἔκον*) of which the race derived their name. 2. An-

other explanation made the term come from the *stench* (δῆς) of the stagnant water in the neighbouring parts. 3. A third class of etymologists derived the appellation from the stench that proceeded from the persons of the early Ozolæ, they having been accustomed to wear undressed skins of wild beasts. (Pausan., 10, 38.—Consult also Siebelis, *ad loc.*)

P.

PACATIANUS, TITUS JULIUS, a general of the Roman armies, who proclaimed himself emperor in Gaul about the latter part of Philip's reign. He was soon after defeated, A.D. 249, and put to death.

PACHYNUS (Πάχυνος ἄκρα), a promontory of Sicily, forming the southeastern extremity of the island, and called also, by some of the Latin writers, Pachynum. (Mela, 2, 7.—Plin., 3, 8.) It is one of the three promontories that give to Sicily its triangular figure, the other two being Pelorus and Lilybæum. The modern name is *Capo Passaro*. Its southernmost point is called by Ptolemy *Odyssæa Acra* ('Ὀδυσσεῖα ἄκρα), and coincides with the projection of the coast before which the islands *delle Correnti* lie. Between Pachynus and this latter cape lies a small harbour, called at the present day *Porto di Palo*, and the same with what Cicero terms *Portus Pachyni*. (In Verr., 5, 34.) It served merely as a temporary refuge for mariners in stress of weather. This harbour is very probably meant by the *Itin. Marit.* when it gives the distance "a Syracusis Pachyno" at 400 stadia or 45 geographical miles along the coast, since the direct line from Syracuse to the promontory of Pachynus is less than this. (Itin. Marit., p. 492, ed. Wesseling.—Mannert, *Geogr.*, vol. 9, pt. 2, p. 341.)

PACORUS, I. the eldest of the sons of Orodes, king of Parthia, and a prince of great merit. After the defeat of Crassus, he was sent by his father to invade Syria, having Osaces, a veteran commander, associated with him. The Parthians were driven back, however, by Caius Cassius, and Osaces was slain. After the battle of Philippi, Pacorus invaded Syria in conjunction with Labienus, and, having many exiled Romans with him, met with complete success, the whole of the country being now reduced under the Parthian sway. From Syria he passed into Judæa, and placed on the throne Antigonus, son of Hyrcanus. The Roman power having been re-established in Syria by the efforts of Ventidius, Pacorus again crossed the Euphrates, but was defeated and slain by the Roman commander. His death was deeply lamented by Orodes, who for several days refused all nourishment. (Justin, 42, 4.—Vell. Patenc., 12, 78.—Tacit., Hist., 5, 9.)—II. Son of Vonones II., king of Parthia. He received from his brother Vologeses, who succeeded Vonones, the country of Media as an independent kingdom. His dominions were ravaged by the Alani, who compelled him to take shelter for some time in the mountains. (Tacit., Ann., 15, 2 at 14.)

PACTOLUS, a river of Lydia, rising in the southeastern part of Mount Tmolus, and falling into the Hermus, after having passed by Sardes, the ancient capital of Croesus. Its sands were auriferous, the particles of gold being washed down by the mountain torrents (Plin., 5, 29), and hence it was sometimes called *Chrysorrhæus*. The poets accounted for the golden sands of the river by the fable of Midas having bathed in its waters when he wished to rid himself of the transmuting powers of his touch. (Vid. Midas.) It was from the gold found amid the sands of the Pactolus that Croesus is said to have acquired his great riches. At a time when this precious metal was scarce, the labour of procuring it in this way was no doubt well bestowed. At a later period, however, the stream was neglected; and Strabo, passing over the true reason, informs us that the river yielded no more (ὅθεν δ'

ἐλλείπειν τὸ φέγγος.—Strab., 637). Callimachus and Dionysius Periegetes speak of the swans of the Pactolus. (Callim., H. in Del., 249.—Dionys. Perieg., 830.) The Turkish name of this stream is the *Beguly*. (Cramer's *Asia Minor*, vol. 1, p. 442.—Mannert, *Geogr.*, vol. 6, pt. 3, p. 361.)

PACUVIUS, M. an early Roman dramatic poet, the nephew of Ennius by a sister of his (Plin., 36, 4), was born at Brundisium, A.U.C. 534. At Rome he became intimately acquainted with Lælius, who, in Cicero's treatise *De Amicitia*, calls him his host and friend. There is an idle story, that Pacuvius had three wives, all of whom successively hanged themselves on the same tree; and that, lamenting this to Attius, who was married, he begged for a slip of it to plant in his own garden; an anecdote which has been very seriously confuted by Annibal di Leo, in his learned memoir on Pacuvius. A story somewhat similar to this is told of a Sicilian by Cicero (*de Orat.*, 2, 69). Pacuvius, besides attending to poetry, employed himself also in painting. He was one of the first Romans who attained any degree of eminence in that elegant art, and he particularly distinguished himself by the picture which he executed for the temple of Hercules in the *Forum Boarium*. (Plin., 35, 4.) He published his last piece at the age of eighty (Cic., *Brut.*, c. 63); after which, being oppressed with old age, and afflicted with perpetual bodily illness, he retired to Tarentum, where he died, after having nearly completed his ninetieth year. (Aul. Gell., 18, 2.—Hieron., *Chron.*, p. 39.) An elegant epitaph, supposed to have been written by himself, is quoted with much commendation by Aulus Gellius, who calls it *veracundissimum et parisimum* (1, 24). It appears to have been inscribed on a tombstone, which stood by the side of a public road, according to the usual custom of the Romans.—Though a few fragments of the tragedies of Pacuvius remain, our opinion of his dramatic merits can only be formed at second hand, from the observations of those critics who wrote while his works were yet extant. Cicero, though he blames his style, and characterizes him as a poet *male locutus* (*Brut.*, c. 74), places him on the same level for tragedy as Ennius for epic poetry, or Cæcilius for comedy; and he mentions, in his treatise *De Oratore*, that his verses were by many considered as highly laboured and adorned: "*Omnes apud hunc ornati elaboratique sunt versus.*" It was in this laboured polish of versification, and skill in the dramatic conduct of the scene, that the excellence of Pacuvius chiefly consisted; for so the lines of Horace have been usually interpreted, where, speaking of the public opinion entertained concerning the dramatic writers of Rome, he says (*Ep.*, 2, 1, 56),

"Ambigitur quoties uter utro sit prior, auctor
Pacuvius docti famam senis, Attius alti;"

and the same meaning must be affixed to the passage in Quintilian: "*Virium tamen Attio plus tribuitur; Pacuvium videri doctiorem, qui esse docti adfectant, volunt.*" (*Inst.*, *Orat.*, 10, 1.) Most other Latin critics, though, on the whole, they seem to prefer Attius, allow Pacuvius to be the more correct writer. The names are still preserved of about 20 tragedies of Pacuvius. Of these the *Antiope* was one of the most distinguished. It was regarded by Cicero as a great national tragedy, and an honour to the Roman name. (*De Fin.*, 1, 2.) Persius, however, ridicules a passage in this tragedy, where Antiope talks of propping her melancholy heart with misfortunes (1, 78).—With regard to the *Dulorestes* (Orestes Servus), another of these tragedies, there has been a good deal of discussion and difficulty. Nævius, Ennius, and Attius are all said to have written tragedies which bore the title of *Dulorestes*; but a late German writer has attempted, at great length, to show that this is a misconception; and that all the fragments which have been classed with the remains

of these three dramatic poets, belong to the *Dulorestes* of Pacuvius, who was, in truth, the only Latin poet that wrote a tragedy with this appellation. What the tenor or subject of the play, however, may have been, he admits, is difficult to determine, as the different passages still extant refer to different periods of the life of Orestes; which is rather adverse, it must be observed, to his idea, that all these fragments were written by the same person, unless, indeed, Pacuvius had utterly set at defiance the observance of the celebrated unities of the ancient drama. On the whole, however, he agrees with Stanley in his remarks on the Chœphori of Æschylus, that the subject of the Chœphori, which is the vengeance taken by Orestes on the murderers of his father, is also that of the *Dulorestes* of Pacuvius. (*Eberhard, Zustand der schönen Wissenschaften bei den Römern*, p. 35, seqq.)—In the *Iliona*, the scene where the shade of Polydorus, who had been assassinated by the King of Thrace, appears to his mother, was long the favourite of a Roman audience, who seemed to have indulged in the same partiality for such spectacles that we still entertain for the goblins in Hamlet and Macbeth.—All the plays of Pacuvius were either imitated or translated from the Greek, except *Paulus*. This was of his own invention, and was the first Latin tragedy formed on a Roman subject. Unfortunately, there are only five lines of it extant, and these do not enable us to ascertain which Roman of the name of Paulus gave his appellation to the tragedy. It was probably either Paulus Æmilius, who fell at Cannæ, or his son, whose story was a memorable instance of the instability of human happiness, as he lost both his children by his second marriage, one five days before and the other five days after, his Macedonian triumph.—From no one play of Pacuvius are there more than fifty lines preserved, and these generally very much detached. It does not appear that his tragedies had much success or popularity in his own age. He was obliged to have recourse for his subjects to foreign mythology and unknown history. Iphigenia and Orestes were always more or less strangers to a Roman audience, and the whole drama in which these and similar personages flourished, never attained in Rome to a healthy and perfect existence. (*Dunlop's Roman Literature*, vol. I, p. 343, seqq.)—The fragments of Pacuvius are given in the collections of Stephens, Maittaire, &c.

PADUS, now the *Po*, the largest river of Italy, anciently called also Eridanus, an appellation which is frequently used by the Roman poets, and almost always by Greek authors. (*Vid.* Eridanus.) This latter name, however, belongs properly to the Ostium Spineticum of the Padua. (*Plin.*, 3, 20.—*Müller, Etrusker*, vol. 1, p. 225.) The name Padus is said to have been derived from a word in the language of the Gauls, which denoted a pine-tree, in consequence of the great number of those trees growing near its source. (*Plin.*, 3, 16.) Whatever be the derivation of the term Padus, the more ancient name of the river, which was Bodincus, is certainly of Celtic origin, and is said to signify "bottomless." (Compare the German *bodenlos*.—*Dalecamp, ad Plin.*, 3, 16.) The *Po* rises in Mons Vesulus, now *Monte Viso*, near the sources of the Druentia or *Durance*, runs in an easterly direction for more than 500 miles, and discharges its waters into the Adriatic, about 30 miles south of Portus Venetus or *Venice*. It is sufficiently deep to bear boats and barges at 30 miles from its source, but the navigation is at all times difficult, and not unfrequently hazardous, on account of the rapidity of the current. Its waters are liable to sudden increase from the melting of the snows and from heavy falls of rain, the rivers that flow into it being almost all mountain-streams; and in the flat country, in the lower part of its course, great dikes are erected on both sides of the river to protect the lands from inundation. During its

long course it receives a great number of tributaries, its channel being the final receptacle of almost every stream which rises on the eastern and southern declivities of the Alps, and the northern declivity of the Apennines. The mouths of the *Po* were anciently reckoned seven in number, the principal one, which was the southernmost, being called Padusa, and now *Po di Primaro*. It was this mouth also to which the appellations Eridanus and Spineticum Ostium were applied. It sends off a branch from itself near Trigaboli, the modern *Ferrara*, which was anciently styled *Volana Ostium*, but is now denominated *Po di Ferrara*. (*Polyb.*, 2, 16.) Pliny mentions the following other branches or mouths of the *Po*: the Caprasia Ostium, now *Bocca di bel Occhio*; Sagis, now *Fossage*; and Carbonaria, now *Po d' Ariano* (3, 16). The Fœna Philistina is the *Po grande*. (*Cramer's Anc. Italy*, vol. 1, p. 115.)—The Padus is rendered famous in the legends of mythology by the fate of Phaëthon, who fell into it when struck down from heaven by the thunderbolt of Jove. (*Vid.* Phaëthon.)

PADUSA, the same with the Ostium Spineticum, or southernmost branch of the river Padus. (*Vid.* Padus.) A canal was cut by Augustus from the Padusa to Ravenna. (*Valg. cl. ap. Serv. ad Virg., Æn.*, 11, 456.) Virgil speaks of the swans along its banks (*l. c.*—*Cramer's Anc. Italy*, vol. 1, p. 114).

PÆAN, an appellation given to Apollo, who under this name was either considered as a destroying (*παῖς*, "to smite"), or as a protecting and healing deity, who frees the mind from care and sorrow (*παῖς*, "to cause to cease"). The tragedians, accordingly, by an analogical appellation of the word, also called Death, to whom both these attributes belonged, by the title of Pæan. (*Eurip., Hippol.*, 1373.—*Æsch.*, *ap. Stob.*, *Serm.*, p. 121.) And thus this double character of Apollo, by virtue of which he was equally formidable as a foe and welcome as an ally (*Æsch.*, *Agam.*, 518), was authorized by the ambiguity of the name. Homer speaks of Pæon (*Παῖων*) as a separate individual, and the physician of Olympus; but this division appears to be merely poetical, without any reference to actual worship. Hesiod also made the same distinction. (*Schol. ad Hom., Od.*, 4, 231.) Still, however, Apollo must be regarded as the original deity of the healing art. From very early times, the pæan had, in the Pythian temple, been appointed to be sung in honour of Apollo. (*Hom., Hymn. ad Apoll.*—*Eurip., Ion*, 123, 140.—*Pind.*, *Pæan, ap. Fragm.*) The song, like other hymns, derived its name from that of the god to whom it was sung. The god was first called Pæan, then the hymn, and lastly the singers themselves. (*Hom., Hymn. ad Apoll.*, 272, 320.) Now we know that the pæan was originally sung at the cessation of a plague and after a victory; and generally, when any evil was averted, it was performed as a purification from the pollution. (*Proclus, ap. Phot.*—*Soph., Œd. T.*, 152.—*Schol. ad Soph., Œd. T.*, 174.—*Suid.*, s. v. *ἱγίων*.) The chant was loud and joyous, as celebrating the victory of the preserving and healing deity. (*Callim., Hymn. ad Apoll.*, 21.) Besides the pæans of victory, however, there were others that were sung at the beginning of a battle (*Æsch.*, *Sept. c. Theb.*, 250); and there was a tradition, that the chorus of Delphian virgins had chanted "*Io Pæan*" at the contest of Apollo with the Python. (*Callim., ad Apoll.*, 113.—*Apoll. Rh.*, 2, 710.—Compare *Athenæus*, p. 15, 701, c.) The pæan of victory varied according to the different tribes; all Dorians, namely, Spartans, Argives, Corinthians, and Syracuseans, had the same one. (*Thucyd.*, 7, 44.—Compare 4, 43.) This use of the pæan as a song of rejoicing for victory, sufficiently explains its double meaning; it bore a mournful sense in reference to the battle, and a joyous one in reference to the victory. (*Müller's Doriæans*, vol. 1, p. 319, seqq.; *Eng. transl.*)

Παύλιαι, a people of Belgic Gaul, supposed by D'Anville and Wersbe to have occupied the present district of *Pavens*, in Luxembourg. (*Cas.*, B. G., 2, 4.—D'Anville, *Notice de la Gaule*, p. 188.—Wersbe, *über die Völker, des alten Teutschlands*, Hanno., 1836.) Lemaire, however, thinks the analogy between the ancient and modern names, on which this opinion is founded, too far-fetched. (*Ind. Geogr. ad Cas.*, s. v.)

Παῖον (Παῖόν), or, according to the earlier and Homeric form of the name, **Παῖον** (Παῖον), the physician of the gods. Nothing is said in Homer about his origin. All we are told is, that he cured Mars when wounded by Diomedes (*Il.*, 5, 899), and Pluto of the wound in his shoulder given him by Hercules (*Il.*, 5, 401), and also that the Egyptian physicians were of his race. (*Od.*, 4, 232.) He would seem to have been, in the Homeric conception of the legend, distinct from Apollo, though perhaps originally identical with him. (*Keightley's Mythology*, p. 200.—Consult remarks under the article **Παῖον**.)

Παῖνες (Παῖνες), a numerous and ancient nation, that once occupied the greatest part of Macedonia, and even a considerable portion of what is more properly called Thrace, extending along the coast of the *Ægean* as far as the *Euxine*. This we collect from Herodotus's account of the wars of the *Paiones* with the *Perinthians*, a Greek colony settled on the shores of the *Propontis*, at no great distance from *Byzantium*. Homer, who was apparently well acquainted with the *Paiones*, represents them as following their leader *Asteropæus* to the siege of *Troy* in behalf of *Prism*, and places them in Macedonia, on the banks of the *Axius*. (*Il.*, 11, 849.) We know also from *Livy* (40, 3) that *Emathia* once bore the name of *Paonia*, though at what period we cannot well ascertain. From another passage in the same historian, it would seem that the *Dardani* of *Illyria* had once exercised dominion over the whole of Macedonian *Paonia* (45, 29). This passage seems to agree with what Herodotus states, that the *Paiones* were a colony of the *Teucri*, who came from *Troy* (5, 13.—Compare 7, 20), that is, if we suppose the *Dardani* to be the same as the *Teucri*, or at least a branch of them. But these transactions are too remote and obscure for examination. Herodotus, who dwells principally on the history of the *Paonians* around the *Strymon*, informs us, that they were early divided into numerous small tribes, most of which were transplanted into Asia by *Megabyzus*, a Persian general, who had made the conquest of their country, by order of *Darius*. The circumstances of this event, which are given in detail by Herodotus, will be found in the fourth book, c. 12. It appears, however, from Herodotus, that these *Paonians* afterward effected their escape from the Persian dominions, and returned to their own country (5, 98). Those who were found on the line of march pursued by *Xerxes* were compelled to follow that monarch in his expedition. Herodotus seems to place the main body of the *Paonian* nation near the *Strymon*; but *Thucydides* (2, 99), with Homer, extends their territory to the river *Axius*. But if we follow *Strabo* and *Livy*, we shall be disposed to remove the western limits of the nation as far as the great chain of *Mount Scardus* and the borders of *Illyria*. In general terms, then, we may affirm, that the whole of northern Macedonia, from the source of the river *Erigonus* to the *Strymon*, was once named *Paonia*. This large tract of country was divided into two parts by the *Romans*, and formed the second and third regions of Macedonia. (*Liv.*, 44, 29.) The *Paonians*, though constituting but one nation, were divided into several tribes, each probably governed by a separate chief. We hear, however, of a king of *Paonia*, named *Autoleon*, who is said to have received assistance from *Cassander* against the *Antariates*, an *Illyrian* horde, who had invaded his country. (*Diod. Sic.*, 20, 19.—*Cramer's Anc. Greece*, vol. 1, p. 266, seqg.)

Παῖονια, the country of the *Paiones*. (*Viâ. Paiones*.)

Παῖονιος Σινος, a gulf on the lower coast of Italy, its upper shore belonging to *Campania*, and its lower to *Lucania*. According to *Strabo* (251), it extended from the *Siren's Cape* to the Promontory of *Posidium*. The modern name is the Gulf of *Salerno*. Its ancient appellation was derived from the city of *Paestum*.

Παῖονιον, a celebrated city of *Lucania*, in *Lower Italy*, below the river *Silarus*, and not far from the western coast. Its Greek appellation was *Posidonia*, the place being so called in honour of *Neptune* (Ποσειδών). The name *Paestum* is used by the Latin writers more commonly. This latter *Mazocchi*, on no very good grounds, derives from the Phœnician *Pæstan* or *Postan*, the alleged root, with some Oriental scholars, for the Greek Ποσειδών. (*Viâ*, however, remarks under the article *Neptunus*.) Nothing, however, can be more fallacious than Phœnician etymologies.—The origin of this once flourishing city has afforded matter of much conjecture and discussion to antiquaries. *Mazocchi*, who has just been referred to, makes *Paestum* to have been founded by a colony from *Dora*, a city of *Phœnicia*, to which place he also assigns the origin of the *Dorian* race! This same writer distinguishes between *Paestum* and *Posidonia*, the latter place having been founded, according to him, in the immediate vicinity of the former, by a *Sybarite* colony, who expelled at the same time the primitive inhabitants of *Paestum*. *Eustace* (*Class. Tour*, vol. 3, p. 92), following this authority, has fallen into the same error of making *Paestum* and *Posidonia* distinct places.—Those who contend for an earlier origin than that which history assigns to *Paestum*, adduce in support of their opinion the *Oscan* or *Etruscan* coins of this city, with such barbarous legends as **PHISTV**, **PHISTVL**, **PHISTELIA**, **PHISTVLIS**, and **PHIIS**. A very eminent numismatic writer, however, attributes them to a different town. But, even supposing that they ought to be referred to *Paestum*, it must be proved that they are of an earlier date than those with the retrograde Greek inscriptions **ΠΙΟΜ**, **ΠΙΟΞΙ**, **ΠΙΟΞΙΑΑΝ**, **ΠΙΟΞΙΑΓΝΕΑ**. Others inscribed **ΠΑΕΣ**, **ΠΑΙΣ**, **ΠΑΙΣΤΑΝΟ**, are more recent, and belong to *Paestum* in its character of a Roman colony. (*Sestini, Monet. Vet.*, p. 16 and 14.—*Paoli, Rovine della città di Pesto Tav.*, 49.—*Micali, Italia avanti il dominio dei Romani*, vol. 1, p. 233.—*Romanelli*, vol. 1, p. 332.—*Cramer's Anc. Italy*, vol. 2, p. 363.)—It seems now generally determined, that whether the *Enotri* or *Tyrreni* were the original possessors of this coast, they can lay no claim to those majestic piles which, under the name of the ruins of *Paestum*, form at the present day the admiration and wonder of all who have visited them. The temples of *Paestum* too closely resemble in their plan and mode of structure the early edifices of *Greece* and *Sicily*, to be the work of any of the native tribes of Italy. The *Tuscans*, to whom alone they could be referred, have left us no example of a similar style in any of their architectural monuments.—*Strabo* is the only ancient writer who has transmitted to us any positive account of the foundation of *Posidonia*. He states, that it was built by a colony of *Sybarites*, close to the shore in the first instance, but that it was afterward removed more into the interior. (*Strab.*, 251.) This account is further confirmed by *Scymnus* of *Chios*, and agrees with what we know of the extent of dominion possessed by *Sybaris* at an early period on this sea, where she founded also the towns of *Laüs* and *Scidrus*. (*Herod.*, 6, 21.) We are left in uncertainty as to the exact date of this establishment of the *Sybarites*; but we have two fixed points which may assist us in forming a right conclusion on the subject. The first is the foundation of *Sybaris* itself, which took place about 730 B.C.—the other is that of *Velia*, a Phœcean colony, built, as we learn from *Herodotus*, in the reign of *Cyrus*, or

nearly 540 B.C. It will be seen by that historian's account of the events which induced the Phocæans to settle on the shores of Lucania, that they were chiefly led to form this resolution by the advice of a citizen of Posidonia (1, 167). It may thence reasonably be supposed, that the latter city had already existed for twenty or thirty years.—There are but few other particulars on record relative to its history. That it must have attained a considerable degree of prosperity, is evident from the circumstance of its name having been attached to the present Gulf of Salerno (*vid. Pæstanus Sines*); and we possess yet farther confirmation of the fact in the splendid monuments which age has not yet been able to deface or destroy. It appears from Strabo that the Posidonians, jealous of the aggrandizement of Velia, endeavoured more than once to reduce that town to subjection: these attempts, however, proved fruitless; and, not long after, they were called upon to defend themselves against the aggressions of the Lucani, the most determined and dangerous of all the enemies with whom the Greeks had to contend. After an unsuccessful resistance, they were at length compelled to acknowledge the superiority of these barbarians, and to submit to their authority. It was probably to rescue Posidonia from their yoke that Alexander of Epirus landed here with a considerable army, and defeated the united forces of the Lucanians and Samnites in the vicinity of that place. (*Liv.*, 8, 17.) The Romans, having subsequently conquered the Lucani, became possessed of Posidonia, whither they sent a colony A.U.C. 480. (*Liv., Epit.*, 14, at 27, 10.—*Strab.*, 251.) The loss of their liberty, even under these more distinguished conquerors, and still more the abolition of their usages and habits as Greeks, seem to have been particularly afflicting to the Posidonians. Aristoxenus, a celebrated musician and philosopher at Tarentum, who is quoted by Athenæus (10, 11), feelingly depicts the distress of this hapless people. "We follow the example," says this writer, "of the Posidonians, who, having been compelled to become Tuscanæ, or, rather, Romans instead of Greeks, and to adopt the language and institutions of barbarians, still, however, annually commemorate one of the solemn festivals of Greece. On that day it is their custom to assemble together in order to revive the recollection of their ancient rites and language, and to lament and shed tears in common over their sad destiny: after which they retire in silence to their homes."—The unhealthy situation of Pæstum, which has been remarked by Strabo, may probably have prevented that colony from attaining to any degree of importance; and as it was placed on an unfrequented coast (*Cic. ad Att.*, 11, 17), and had no trade of its own, it soon decayed, and we find it only noticed by subsequent writers for the celebrity of its roses, which were said to bloom twice in the year. (*Virg., Georg.*, 4, 118.—*Propert.*, 4, 5.—*Ovid, Met.*, 15, 708.—*Id., ep. c. Pont.*, 2, 4.—*Auson., Idyll.*, 14.)—The ruins of Pæstum, as has already been remarked, form a great object of attraction to the modern tourist. Eustace has given a very spirited description of the beautiful temples of this ancient city, the most striking edifices, unquestionably, which have survived the dilapidations of time and the barbarians in Italy. (*Class. Tour*, vol. 3, p. 94, *segg.*) "Within these walls," he remarks in conclusion, "that once encircled a populous and splendid city, now rise one cottage, two farmhouses, a villa, and a church. The remaining space is covered with thick matted grass, overgrown with brambles spreading over the ruins, or buried under yellow undulating corn. A few rosebushes, the remnants of *biferi rosæria Pæsti*, flourish neglected here and there, and still blossom twice a year, in May and in December, as if to support their ancient fame, and justify the descriptions of the poets. The roses are remarkable for their fragrance. Amid these objects, and scenes rural

and ordinary, rise the three temples, like the mausoleum of the ruined city, dark, silent, and majestic.—Pæstum stands in a fertile plain, bounded on the west by the Tyrrhene Sea, and about a mile distant on the south by fine hills: on the north by the Bay of Salerno and its rugged border; while to the east the country swells into two mountains, which still retain their ancient names Callimara and Castena, and behind them towers Mount Alburnus itself with its pointed summits." (*Class. Tour*, vol. 3, p. 99, *segg.*—*Cramer's Anc. Italy*, vol. 2, p. 362, *segg.*)

ΠΑΪΣΤΑ, CÆCINA, the husband of Arria. (*Vid. Arria.*)

ΠΑΓΑΣΑ, a maritime town of Thessaly, on the Sinus Pagasæna, and just below the mouth of the river Onchestus. It was the port of Iolcos, and afterward of Phæra, and was remarkable in Grecian story as the harbour whence the ship Argo set sail on her distant voyage. It was, indeed, asserted by some, that it derived its name from the construction of that famous vessel (πάγνυμι, "to construct"). But Strabo is of opinion that it rather owed its appellation to the numerous springs which were found in its vicinity (παγή, a spring), and this, indeed, seems the preferable etymology. (*Strabo*, 436.—Compare *Schol. ad Apoll. Rhod.*, 1, 237.) Apollo was the tutelary deity of the place. (*Apoll. Rhod.*, 1, 411.) Hermitippus, a comic poet, cited by Athenæus (1, 49), says of this town,

αἱ Παγασαὶ δούλους καὶ σιγματίας παρέχουσι.

Its site is nearly occupied by the present castle of Volo. (*Gell's Itinerary of Greece*, p. 360.—*Cramer's Anc. Greece*, vol. 1, p. 431.) Pagasa gave its name to the extensive gulf, on the shores of which it was situated; and which we find variously designated, as Pagasæticus Sinus (*Scyl.*, p. 25.—*Strab.*, 438), or Pagasætes (*Demosth., Phil., Epist.*, 159), Pagasæus (*Mela*, 2, 3), and Pagasicus (*Plin.*, 4, 9). In modern geography it is called the Gulf of Volo. (*Cramer's Anc. Greece*, vol. 1, p. 432.)

ΠΑΓΑΣÆΣ ΣΙΝΟΣ, a gulf of Thessaly, on the coast of Magnesia; now the Gulf of Volo. (*Vid. Pagasa.*)

ΠΑΛΑΜΩΝ, I. a sea-deity, son of Athamas and Ino. His original name was *Melicerta*, and he assumed that of Palæmon after he had been changed into a sea-deity by Neptune. (*Vid. Athamas*, and *Leucothes.*) Roth Palæmon and his mother were held powerful to save from shipwreck, and were invoked by mariners. Palæmon was usually represented riding on a dolphin. The Isthmian games were celebrated in his honour, and indeed his name (Παλαμίων, "Champion") appears to refer to them. (*Keightley's Mythology*, p. 249.)—II. A Roman grammarian (M. or Q. Remmius), the preceptor of Quintilian, and who flourished under Tiberius and Claudius. From the account of Suetonius, he appears to have been a man of very corrupt morals. He was also excessively arrogant, and boasted that true literature was born and would die with him. (*Juv.*, 6, 452.—*Id.*, 7, 215.—*Suet., de Illustr. gramm.*, 23.—*Dodwell, Ann. Quint.*, p. 163, *segg.*)—III. or Palæmonius, a son of Vulcan, one of the Argonauts. (*Apoll. Rhod.*, 1, 202, *segg.*—*Krause, ad loc.*)

ΠΑΛΕΡΑΪΟΣ. *Vid. Paphos.*

ΠΑΛΕΡΗΪΤΗΣ, I. a town of Thessaly, in the north-western section of the country, plundered by Philip, in his retreat through Thessaly, after his defeat on the banks of the Aolis. (*Livy*, 32, 13.)—II. An early Athenian epic poet, mentioned by Suidas. The lexicographer states, that, according to some, he lived before the time of Phemonœ, the first priestess of Delphi, while others placed him after her. Suidas cites the following productions of his. 1. *A Cosmopæia*, in five books.—2. *The Nativity of Apollo and Diana*, in four books.—3. *Discourses of Venus and Love* (Ἀφροδίτης καὶ Ἔρωτος φωναὶ καὶ λόγοι), in five books.—4. *The dispute between Minerva and Nep-*

tunc.—5. *Latona's tress* (Ἀγροῦς κλόκαμος). (Schöll, *Hist. Lit. Gr.*, vol. 1, p. 36.)—III. A native either of Paros or Priene, who lived in the time of Artaxerxes Mnemon, and wrote, according to Suidas, a work in five books, entitled Ἀπίστω, "Incredible Things." (Suid., s. v.)—IV. A native of Abydos, and a great friend of Aristotle's. He wrote several historical works. (Suid., s. v.)—V. A grammarian of Alexandria, according to Suidas, but called by Tzetzes and others a Peripatetic philosopher. The period in which he lived is not stated. (Fabric., *Bibl. Gr.*, lib. 1, c. 21.) Suidas mentions a work by him, entitled "Explanations of things related in Mythology." This seems to be the production which has come down to us, in one book, divided into 60 short chapters, under the name of Palæphatus, and which is commonly entitled "On Incredible things" (Περὶ Ἀπίστων). The author explains, according to his fashion, the origin of many of the Greek fables, such as those of the Centaurs and Lapithæ, Pasiphaë, Actæon, &c. All these legends have, according to him, an historical basis, and more or less truth connected with them, but which has been strangely distorted by the ignorance and credulity of men. Palæphatus, therefore, may be assigned, as a mythologist, to what is termed the class of pragmatists. The work is written in a very good style, and, notwithstanding the forced nature of many of the explanations, may be regarded as, in some respects, an instructive book. Virgil alludes to Palæphatus in his *Ciris*,

"Docta Palæphatia testatur voce papyrus."

The term *docta* would seem to refer to the productions of some Alexandrian writer, and the word *papyrus* to imply that his work consisted merely of a single book. Simonides Palæphatus in 409 B.C. (*Chron. Cathol.*, col. 779), while Saxius assigns him to 322 B.C. (*Onomast.*, vol. 1, p. 88)—The best edition of the treatise περὶ Ἀπίστων is that of Fischer, *Lips.*, 1789, 8vo, in the prolegomena to which is contained much information from Fabricius, relative to the various individuals who have borne the name of Palæphatus. There are also two other pieces published with this work under the name of Palæphatus, one on the invention of the purple colour, and the other on the first discovery of iron. (Schöll, *Hist. Lit. Gr.*, vol. 3, p. 194.)

PALÆPŌLIS. *Vid.* Neapolis.

PALÆSTRE, a little harbour of Epirus, on the Chaonian coast, and south of the Ceraunian promontory. Here Cæsar landed his forces from Brundisium, in order to carry on the war against Pompey in Illyria. (*Bell. Civ.*, 3, 6.) It must be observed, however, that in nearly all the MSS. of Cæsar, this name is written Pharsalia; but, on the other hand, Lucan certainly seems to have read Palæstra (5, 458, *seqq.*). Some trace of the ancient name is perceptible in that of *Paleassa*, marked in modern maps as being about twenty-five miles southeast of the Acroceraunian cape. (*Cramer's Anc. Greece*, vol. 1, p. 95, *seqq.*)

PALÆSTINA, a country of Asia below Syria, though, properly speaking, forming part of that land. In its earliest acceptations, the name was applied to the tract of coast between Egypt and Phœnicia, having Ascalon for its chief city. (*Josephus, Bell. Jud.*, 3.—*Id.*, *Ant. Jud.*, 1, 19.) It was extended at a later period to the territory of the Jewish nation, and the terms Palestine and Holy Land are now regarded as synonymous. The Jews were not acquainted with the name Palæstina; it is thought to be derived from that of the Philistæi or Philistines. A full description of Palestine will be found under the article *Judæa*.—A late writer (*Russell, Egypt*, p. 71) has revived Wilford's etymology for the name Palæstina, namely, *Pali-etan*, "Shepherd-land," and has adopted the theory relative to the migration of the *Pali*, or Shep-

herd-race, from India towards the West. It is very surprising that such a derivation as this should be gravely advanced at the present day, when there are few who do not know how little faith is to be reposed in the researches of Captain Wilford, and how grossly he was imposed upon by the pundits of India.

PALÆTYRUS, the ancient town of Tyre on the Continent. (*Vid.* Tyrus.)

PALAMÉDES, son of Nauplius, king of Eubœa, and a pupil of the famous Chiron. He is celebrated in fable as the inventor of weights and measures; of the games of chess and backgammon; as having regulated the year by the sun, and the twelve months by the moon; and as having introduced the mode of forming troops into battalions. He was said to have been the first also who placed sentinels round a camp, and excited their vigilance and attention by giving them a watch-word. (*Philostr., Heroic.*, p. 682, ed. Morell.—*Pausan.*, 10, 31.—*Eudocia*, p. 321.—*Schol. ad Eurip., Orest.*, 426.) Phiny ascribes to him the addition of the four letters Θ, Ξ, Φ, Χ, to the Greek alphabet (*Pliny*, 7, 57); for which Suidas gives Ζ, Η, Φ, Χ (Suid., s. v. Παλαμήδης.—Consult *Salmas., ad Inscrip. Herod.*, p. 29, *seqq.*, 221, *seqq.*—*Fischer, Animadv. ad Well., Gr. Gr.*, vol. 1, p. 5.) A fragment of Euripides, preserved by Stobæus, assigns to Palamedes the honour of having invented the Greek vowel-signs. The meaning of this evidently is, that he was the first who conceived the idea of employing the four aspirates of the Phœnician alphabet to express the vowel sounds in Greek. (Schöll, *Hist. Lit. Gr.*, vol. 1, p. 87.—Compare *Hug, Erfindung der Buchstabenschrift*, p. 123, *seqq.*)—Palamedes was the prince deputed by the Greeks to induce Ulysses to join in the war against Troy; but the stratagem by which he effected the desired object, and exposed the pretended insanity of the chieftain of Ithaca (*vid.* Ulysses), produced an irreconcilable enmity between these two heroes. His death is attributed to the revenge of Ulysses, for having, by his intervention, been separated from his wife Penelope, or to his jealousy at having been superseded by Palamedes in an expedition in which he had failed. Ulysses had been despatched to Thrace for the purpose of obtaining provisions for the army; but, not having succeeded in his mission, Palamedes instituted an accusation against him, and, to justify his charge, undertook to supply what was required. He was more successful than Ulysses, who, to be revenged on his rival, hid a sum of money in his tent; and, to make it appear that the supplies had been furnished by Palamedes for the enemy, counterfeited a letter to him from Priam, expressive of his thanks for the stratagem of Palamedes in favour of the Trojans, and informing him that he had caused the reward to be deposited in his tent. The tent being searched, the money was discovered, and Palamedes was stoned to death by the Greeks for his supposed treachery. (*Eudocia*, l. c.—*Philostr.*, l. c.) Another account states, that, while fishing on the seashore, Ulysses and Diomedes drowned him. (*Pausanias*, 10, 31.) According to Dictys of Crete, the two chieftains just mentioned induced Palamedes to descend into a well in search of a treasure which they pretended was hidden there, and of which they promised him a share. After he had been let down by means of a rope, they hurled stones upon and destroyed him. (*Dict. Cret.*, 2, 15.) The death of Palamedes appears to have been related in the *Cypria*. (*Siebelis, ad Pausan.*, l. c.—Consult *Hopfner, ad Eurip., Iph. in Aul.*, 198.) Virgil makes Sinon impute the tragical end of Palamedes to his disapproval of the war. He was called Belides, from Belus his progenitor, if the reading in Virgil be correct, on which point consult the learned critical note of Heyne (*ad Virg., Æn.*, 2, 82).

PALANTIA, a city of the Vaccæi, in Hispania Tarraconensis, now *Palencia*. (*Uheri, Geogr.*, vol. 2, p.

432.) Strabo (162) assigns it to the Averci, but other authorities to the Vaccini. (*Plin.* 3, 4.—*Appian*, *Bell. Hisp.*, c. 55, c. 80.—*Liv.*, 48, 25.—*Id.*, 56, 8.)

PALATINUS MOUNT, one of the seven hills on which Rome was built, and the first of the number that was inhabited. It formed, consequently, the most ancient part of the city. Although of comparatively little extent, it was remarkable as the favourite residence of the Cæsars, from the time of Augustus to the decline of the empire. It contained also several spots, venerable from their antiquity, and to which the Romans attached a feeling of superstition, from their being connected with the earliest traditions of the infant city. Among these were the Lupercal, a cave supposed to have been consecrated to Pan by Evander (*Dion. Hal.*, 1, 32.—*Æn.*, 8, 342); the Germalus, deriving its name from the Latin word *Germari*, because the *twin-brothers* Romulus and Remus were said to have been found under the "ficus Ruminalis," which grew in its vicinity (*Varro*, *L. L.*, 4, 18), while at the foot of the hill was the temple of Jupiter Stator, said to have been founded by Romulus. (*Liv.*, 1, 12.—*Dion. Hal.*, 2, 50.) Here also were the cottage of Romulus, near the steps called "*Gradus pulchri litoris*" (*Plut.*, *Vit. Rom.*), and the sacristy of the Salii, in which were kept the *ancilia*, and other sacred relics. (*Dion. Hal.*, 2, 70.—*Val. Max.*, 1, 8, 11.)—Sixty years before the destruction of Troy (B.C. 1244), Evander, at the head of a colony of Arcadians, is said to have left the city of Pallantium, and to have fixed his settlement on this hill, to which he gave the name of Pallantium, from his native city in Arcadia. Dionysius (2, 2), Livy (1, 5), Solinus (*de cons. Urb.*, lib. 2), Virgil (*Æn.*, 8, 51), and other ancient writers, agree in giving this as a received tradition, of the value of which, however, the investigations of modern philologists have taught us to entertain no very exalted opinion. In one thing, however, all writers, both ancient and modern, agree, namely, that the original site of Rome was on the Palatine, whether we ascribe its foundation to Evander or to Romulus. The steepness of the sides of the hill would be its natural defence, and on one quarter it was still farther strengthened by a swamp, which lay between the hill and the Tiber, and which was afterward drained and called the Volabrum. In the course of time, dwellings sprung up around the foot of the hill, but the Palatine must still have remained the citadel of the growing town, just as at Athens, that which was the πόλις became eventually the ἀκρόπολις. These suburbs were enclosed by a line, probably a rude fortification, which the learning of Tacitus enabled him to trace, and which he calls the *pomerium* of Romulus. (*Ann.*, 12, 24.) It ran under three sides of the hill; the fourth was occupied by the swamp before mentioned, where it was neither needful nor possible to carry a wall. The ancient city was comprised within this outline, or possibly only the citadel on the summit of the hill was called by Roman antiquaries the "Square Rome" (*Roma Quadrata*). (*Ennius*, *ap. Fest.*, s. v. *Quadrata Roma*.—*Plut.*, *Vit. Rom.*)—Varro, in the true spirit of an etymologist, gives us our choice of several derivations for the name of Palatium: "It might be called," he says, "*Palatium*, because the companions of Evander were *palantes*" or "wanderers;" or "because the inhabitants of *Pallantium*, which is the Reatine territory, who were also the aborigines, settled there; or because *Palatia* was the name of the wife of Latinus; or, finally, because the bleating sheep (*balantes*) were accustomed to stray upon it." (*Varro*, *L. L.*, 4, p. 161.) It is hardly necessary to state, that no one of these etymologies is of the least value. The name in question is most probably connected with that of the goddess *Pales*, whose festival, termed *Palia*, was regarded as the natal day of Rome. (*Vid. Pales*).—The Palatine Mount at the present day is about a mile and a half in circuit, and is nearly square. The ruins

of the successive edifices which have stood upon it have raised the soil around its base considerably above the ancient level. About one half of the surface of it is called the *Villa Farnese*, which is let and cultivated as a kitchen-garden. Adjoining on the south is the *Villa Spada*.—"With all my respect for this venerable mount," observes a modern tourist, "I must say, that it is very little of its size. I had previously been disappointed in the lowly height of the Capitol; but I stood yet more amazed at the square, flat-topped, and dwarfish elevation of the Palatine. It must certainly have been materially degraded by the fall of the successive generations of buildings which have stood on it, from the straw-roofed cottages of Romulus and his *Roma quadrata* to the crumbling erections of popes and cardinals. The ruins of these multifarious edifices, heaped up round its base, have raised the surface at least twenty feet above the ancient level: still, with all the allowances one can make, it must originally have been very little of a hill indeed." (*Rome in the Nineteenth Century*, vol. 1, p. 152, *Am. ed.*—Compare *Burgess*, *Antiquities of Rome*, vol. 2, p. 159.—*Malden's History of Rome*, p. 123.)—On this same hill stood the famous Palatine Library, an account of which will be given under the article *Palatium*.

PALATIUM, I. an appellation sometimes given to the Palatine Hill. The plural form (*Palatia*) is more frequently used, and contains a particular reference to the Cæsars.—II. The residence of Augustus, on the Palatine Hill, afterward, when enlarged and beautified, the palace of the Cæsars. Augustus appears to have had two houses on the Palatine; the one in which he was born, and which after his decease was held sacred, was situated in the street called *Capia Bubula* (*Suet.*, *Vit. Aug.*, 5); the other, where he is said to have resided for forty years, formerly belonged to Hortensius. After the battle of Actium, he decreed that this last should be considered as public property. (*Suet.*, *Vit. Aug.*, 72.—*Serv. ad Virg.*, *Æn.*, 4, 410.) Tiberius made considerable additions to the house of Augustus, which neither in size nor appearance was worthy of an emperor of Rome, and from that time it exchanged the name of *Domus Augusti* for *Domus Tiberiana*. (*Tacit.*, *Hist.*, 1, 77.—*Suet.*, *Vit. Tiber.*, 15.) Caligula augmented still farther the imperial abode, and brought it down to the verge of the Forum, connecting it with the temple of Castor and Pollux, which he converted into a vestibule for this now overgrown pile. He also formed and executed the gigantic project of uniting the Palatine and Capitol by a bridge; and concluded by erecting a temple to himself. (*Suet.*, *Vit. Calig.*, 22.) But even his folly was far surpassed by the extravagance of Nero, whose golden house extended from the Palatine to the Cælian Hill, and even reached as far as the Esquiline. (*Suet.*, *Vit. Ner.*, 31.—*Tacit.*, *Ann.*, 15, 42.) It was not, however, destined to be of long duration; that portion of the building which interfered with the projects of Vespasian and Titus, on the Cælian, was soon destroyed, and little remained of this huge and glittering palace, except the part which stood on the Palatine Hill. (*Vid. Nero*, where an account of the "Golden House" is given.) Domitian again, however, renewed and even enlarged the favourite abode of the Cæsars; and such appears to have been the lavish magnificence which he displayed in these works, that Plutarch, quoting a sentence of Epicharmus, compares him to Midas, who converted everything into gold. (*Vit. Publ.*) Stripped by Trajan of its gaudy decorations, which were destined to adorn the temple of Jupiter Capitolinus (*Mart.*, 12, 75), it was afterward destroyed or much injured by fire under Commodus, but was once more restored by that emperor, and further enriched by Heliogabalus, Alexander Severus (*Lampridius*, *Heliogab.*, 8.—*Id.*, *Alex. Sev.*, 24), and almost every succeeding emperor until the reign of Theodoric.

(*Cæsioid.*, 7, 5).—Contiguous to the house of Augustus was the famous temple of the Palatine Apollo, erected by the emperor in fulfilment of a vow made to that deity on the morning of the battle of Actium. Ovid and Propertius describe it as a splendid structure of white marble. (*Ov.*, *Trist.*, 3, 1.—*Propert.*, 2, 31.) The portico more especially was an object of admiration; it was adorned with columns of African marble, and statues of the Danaïdes. Connected with the temple was a magnificent library, filled with the works of the best Greek and Latin authors. (*Suet.*, *Vit. Aug.*, 29.) It contained, according to Pliny (34, 7), a colossal statue of Apollo, in bronze, of Tuscan workmanship, which was much esteemed. (*Cramer's Anc. Italy*, vol. 1, p. 448, *seqq.*)—"The fall of the palace of the Cæsars," observes a late writer, "like that of almost every other monument of antiquity, was less the work of foreign barbarians than of the Romans themselves. The Goths, in the fifth century, pillaged it of its gold, its silver, its ivory, and most of its portable treasures. Generic seized its bronze, and all its remaining precious metals; and the shipload of statues which the capricious Vandal sent to Africa, was supposed to consist chiefly of the plunder of the imperial palace. The troops of Belisarius lodged in it; so also did the soldiers of Totila, during his second occupation of Rome; but that is no proof of its destruction; on the contrary, the spoils of modern excavations have proved how vast were the treasures of art and magnificence, which had been spared or despised by their forbearance or ignorance; and, however the interior splendour of the palace of the Cæsars might suffer by these barbarian inmates, we know, at least, that its immense exterior, its courts and corridors, and walls, and roofs, and pavements, were in perfect preservation at a much later period; for in the days of Heraclius, the beginning of the seventh century, it was still fit to receive a royal guest, and it appears to have been entire in the eighth century, from the mention made of it by Anastasius. In the long feudal wars of the Roman nobles, during the barbarous ages, its ruin began. It was attacked and fortified, taken and retaken, and for a length of time was the central fortress of the Frangipani family, who possessed a chain of redoubts around it, erected on the ruins of Rome. But its final destruction was consummated by the Farnese popes and princes, who laboriously destroyed its ruins to build up their palaces and villas with the materials; buried these magnificent halls beneath their wretched gardens, and erected upon them the hideous summer-houses and grottoes, the deformity of which still impeaches the taste of their architect, Michael Angelo Buonarroti.—In the southern part of the palace, about 150 years ago, a room full of Roman coins was discovered, and a magnificent hall hung with cloth of gold, which fell into dust as soon as the air was admitted. About one hundred years ago, a hall forty feet in length was discovered on the Palatine, the walls of which were entirely covered with paintings. They were taken off and sent to Naples, and there were permitted to lie mouldering in damp cellars until every vestige of the paintings had disappeared." (*Rome in the Nineteenth Century*, vol. 1, p. 164, *seqq.*, *Am. ed.*)

PALÆA, the goddess who presided over cattle and pastures among the ancient Romans. Her festival, called the *Palilia*, was celebrated on the 21st of April, and was regarded as the day on which Rome had been founded. The shepherds, on the *Palilia*, lustrated their flocks by burning sulphur, and making fires of olive, pine, and other substances. Millet, and cakes of it and milk, were offered to the goddess, and prayers were made to her to avert disease from the cattle, and to bless them with fecundity and abundance of food. Fires of straw were kindled in a row, and the rustics leaped thrice through them; the blood of a horse, the

ashes of a calf, and bean-stalks, were used for purification. (*Ovid, Fast.*, 4, 721, *seqq.*—*Keightley, ad loc.*—*Tibull.*, 1, 1, 36.—*Id.*, 2, 5, 87, *seqq.*—*Propert.*, 4, 1, 19.) The statue of Palæa was represented bearing a sickle. (*Tibull.*, 2, 5, 28.—*Keightley's Mythology*, p. 538, *seqq.*) The worship of Palæa was often blended with that of Vesta (*Serv. ad Virg., Æn.*, *Georg.*, 3, 1), and sometimes, again, she was represented as an androgynous divinity. (*Spangenberg, De Vet. Lat. Rel. Dom.*, p. 60.) Among the Etruscans we meet with a male deity of this name. (*Müller, Etrusker*, vol. 2, p. 130.)—For the etymology of the term *Palæa*, consult Zoega (*de Obelisc.*, p. 213, *seqq.*).

PALIBOTHA (Παλιβοθρα, *Strab.*—*Plin.*) or **PALIBOTHA** (Παλιβοθρα, *Arrian.*—*Steph. Byz.*), a large city of ancient India, at the junction of the Erannobos with the Ganges. (*Arrian, Ind.*, c. 10.) It appears, from the accounts of the ancient writers, to have been defended by wooden ramparts, having 570 towers and 64 gates, to which Diodorus Siculus (2, 39) adds the equally incredible statement that the place was founded by Hercules. Making all due allowance for Oriental exaggeration, the city of Palibothra would seem to have been one of considerable size. The position of Palibothra has been much disputed. Robertson places it at *Allahabad*; but the opinion of Major Rennell, who assigns it to the neighbourhood of *Patna* near the confluence of the *Ganges* and the *Sone*, appears more correct. Strabo says it was at the confluence of the Ganges with another river (*Strab.*, 702), but he does not mention the name. Arrian, as above quoted, makes it to have been situate at the junction of the Ganges with the Erannobos. This latter river, Sir W. Jones remarks, is evidently the Sanscrit *Hiranyavāha*. The "*Amara Kośha*," an ancient Sanscrit dictionary, gives this river as synonymous with *Sone*. (*Schlegel, Reflexions sur l'Étude des Langues Asiatiques*, p. 100.—*Id.*, *Indische Bibliothek*, vol. 2, p. 394.—*Wilson's Theatre of the Hindus*, vol. 2, p. 135, 2d ed.)

PALICI or **PALISCI**, two deities, sons of Jupiter by the Sicilian nymph Thalia, or, as others give the name, *Ætna*. Thalia having been united to Jupiter near the river Symæthus, and not far from the city of Catania, and fearing the wrath of Juno, entreated the god to conceal her from that deity. Jupiter complied, and hid her in the bowels of the earth; and, when the time of her delivery had arrived, the earth opened again, and two children came forth. These were called *Palici*, either from *πάλεν*, "*again*," because they came forth into the light on the earth's having *again* gaped; or from *παλιν*, "*again*," and *ἔκειν*, "*to come*," because, after having been consigned to the bowels of the earth, they had *again* come forth therefrom. The *Palici* were worshipped with great solemnity by the Sicilians, and near their temple were two small lakes of sulphureous water, which were supposed to have sprung out of the earth at the same time that they were born. These pools were properly craters of volcanoes, and their depths were unknown. (*Diod. Sic.*, 11, 89.) The water kept continually bubbling up from them, emitting at the same time a sulphureous stench. The neighbouring inhabitants called them *Delli*, and supposed them to be the brothers of the *Palici*. (*Macrob.*, *Sat.*, 5, 19.) A curious custom, tending to show the power of the priesthood, was connected with these lakes. All controversies, of whatsoever kind, were here decided; and it was sufficient, in order to substantiate a charge or clear one's self from an accusation, to swear by these waters and depart unhurt; for, if the oath were a false one, the party who made it was either struck dead, or deprived of sight, or punished in some other preternatural manner. (*Diod. Sic.*, l. c.) The temple also was an inviolable asylum for slaves, especially those who had cruel masters; and the latter were compelled to promise a more

gentle mode of treatment, and to ratify their promise with an oath, before the fugitives returned.—The Sicilian leader Ducetius founded a city named Palice in the vicinity of the temple and lakes. It did not, however, flourish for any length of time, but was already in ruins in the time of Diodorus. We are not acquainted with the causes of its overthrow.—The Sicilian Palici, according to Creuzer, are mythic creations typifying some of the movements of the elements. Some authorities make Jupiter, changed into a vulture, to have been their father; while others mention Menanus or Amenanus, a deified stream (perhaps the stream of the year), as their parent. (*Clem., Homil.*, 6, 13.—*Creuzer, ad Cic. de N. D.*, 3, 23.) Vulcan, the god of fire, was one of these subterranean genii. The story of their birth and subsequent movements, when stripped of its mythic character, is simply this: the Palici denote the elements of fire and water in a state of activity; engendered by the eternal power of nature, but subjected, like it, to eternal vicissitudes, they alternately escape from the bowels of the earth in torrents of flame or water, and again, when their fury is spent, plunge into its bosom. (*Creuzer, Symbolik*, vol. 2, p. 239.—*Guigniaut*, vol. 3, p. 186.)

PALILIA, a festival celebrated by the Romans, in honour of the goddess Pales. (*Vid.* Pales.)

PALINURUS, I. the son of Iasius, a Trojan, and the pilot of the vessel of Æneas. While the fleet was sailing near Capree, he yielded to sleep and fell into the sea; a circumstance which Virgil has dignified, by representing Morpheus as overpowering Palinurus, who had been already exhausted by the fatigue of watching. He floated in safety for three days, but, on landing near Velia, he fell a victim to the ferocity of the inhabitants, who (it seems) were wont to assail and plunder the shipwrecked mariner. When Æneas visited the lower world, he assured Palinurus that, though his bones had been deprived of sepulture, and though he was thereby prevented from crossing the Stygian Lake, there should yet be a monument dedicated to his memory on the spot where he had been inhumanly murdered. This eventually took place. The Lucani, being afflicted by a pestilence, were told by the oracle that, in order to be relieved from it, they must appease the manes of Palinurus. A tomb was accordingly erected to his memory, and a neighbouring promontory called after his name. (*Virg., Æn.*, 6, 840, *seqq.*—*Id. ib.*, 6, 837, *seqq.*—*Serv.*, *ad loc.*)—II. A promontory of Italy, on the western coast of Lucania, just above the Laüs Sinus. It was also called Palinurum, and Palinuri Promontorium. Tradition ascribed its name to Palinurus, the pilot of Æneas. (*Virg., Æn.*, 6, 380.) The modern appellation is *Capo di Palinuro*. Orosius (4, 9) records a disastrous shipwreck on the rocks of Palinurus, sustained by a Roman fleet on its return from Attica, when 150 vessels were lost. Augustus also encountered great peril on this part of the coast, when, according to Appian, many of his ships were dashed against this headland. (*Bell. Civ.*, 5, 98.—*Cramer's Anc. Italy*, vol. 2, p. 373.)

PALIOÖRUS STAGNA, sulphureous pools in Sicily. (*Vid.* Palici.)

PALLADIUM, a celebrated statue of Minerva, said to have fallen from the skies, and on the preservation of which depended the safety of the city of Troy. The traditions respecting it were innumerable. According to Apollodorus, it was made by Minerva herself, and was not an image of that goddess, but of Pallas, daughter of Triton, whom Minerva had slain, and whose loss she afterward deplored. It was first placed in the skies with Jupiter; but when Electra had been corrupted by the latter, and had polluted the statue by her touch, it was thrown by Minerva upon earth, and fell in the Trojan territory, where Ilus placed it in a temple which he had founded. (*Apollod.*, 3, 12, 3.—

Heyne, ad loc.) One of the scholiasts to the *Iliad* (6, 311) describes it as *ξύδιον μικρὸν ἑλάνιον*, "a small wooden figure of an animal," made by a sage named Asius, and given to Troy, when he was building the city of Troy, as a talisman on the preservation of which the safety of his capital depended. (Compare *Tzetx. ad Lycophr.*, 363.) Another legend, alluded to by Clement of Alexandria, made the Palladium to have been formed of the bones of Pelops. (*Clem. Alex., Admon. ad Gent.*, p. 30, *D. ed. Paris*, 1629.)—But, whatever may have been the origin of this famous statue, the Greeks, while before Troy, had discovered, it seems, from Helenus, whom they had made captive, that the Palladium was the chief obstacle to the fall of the city. He informed them also that, in order to ensure the safety of this revered image, and to diminish the risk of its being stolen, there were many others made like it, but that the true statue was the smallest one of the whole number. Helenus, it seems, was induced to make these disclosures partly by threats and partly by presents, but most of all by resentment towards the Trojans, in consequence of Helen's having been given to Menelaus. The Greeks now resolved to carry off this fated image, and the enterprise was intrusted to Ulysses and Diomedes. When these two heroes had reached the wall of the citadel, Diomedes raised himself on the shoulders of Ulysses, and thus ascended the rampart; but he would not draw up Ulysses, although the latter stretched out to him his arms for that purpose. Diomedes then went and took the Palladium, and returned with it to Ulysses. The latter beginning to inquire into all the particulars, Diomedes, knowing the art of the man, determined on overreaching him, and told him that he had not taken the Palladium which Helenus had mentioned, but another image. The statue, however, having moved in a preternatural manner, Ulysses immediately knew that it was the true one; and, having come behind Diomedes as he was returning through the plain, was going to despatch him, when Diomedes, attracted by the brightness of the weapon (as it was moonlight), drew his own sword in turn, and frustrated the purpose of the other. He then compelled Ulysses to go in front, and kept urging him on by repeatedly striking him on the back with the flat part of his sword. Hence arose, say the mythographers, the proverb, "*Diomedean necessity*" (*ἡ Διομήδεως ἀνάγκη*), applicable to one who is compelled to act directly contrary to his inclination. (Consult *Erasmus, Adag. Chil.*, 1, cent. 9, col. 290, where other explanations are given.) The narrative which we have just been detailing is taken from Conon (*sp. Phot.*, cod., 186—vol. 1, p. 137, *ed. Bekker*.) The scholiast to Homer (*Il.*, 6, 311) states, that after the Greeks had become possessed of the Palladium, and Troy had fallen, a quarrel arose between Ajax and Ulysses as to which of the two should carry the image home. Evening having come on, and the dispute being still undecided, the statue was intrusted to Diomedes for safe-keeping until the next morning; but during the night Ajax was secretly murdered. Other accounts make the Palladium to have willingly accompanied Ulysses and Diomedes (*Ovid, Fast.*, 6, 431.—*Tryphiod.*, 54), and both heroes to have been equally concerned in the enterprise. (*Procl., Arg. Il. Pers.*—*Heyne, Excurs.*, 9, *ad Æn.*, 2, p. 308.) Pausanias relates, that Diomedes, on his return from Troy, brought away the Palladium along with him; and that, having reached the coast of Attica, near the promontory of Phalerum, his followers, mistaking it for an enemy's country, landed by night and ravaged the adjacent parts. Demophoon, however, came out against them, and being equally ignorant, on his part, of the real character of his opponents, attacked them, and took from them the Palladium, which was preserved thereafter in the Athenian Acropolis. (*Pausanias*, 1, 28.) Harpocration, who is sel-

labeled by Suidas, says it was not Diomedes, but Agamemnon. The Argives, on the other hand, maintained that they had the true Palladium in their country (*Pausan.*, 2, 23); while Pausanias himself insists that Æneas carried off with him the true statue to Italy (*l. c.*). It was an established belief among the Romans that their city contained the real Palladium, and that it was preserved in the temple of Vesta. It was regarded as the fated pledge of the continuance of their empire, and not even the Pontifex Maximus was allowed to behold it. (*Ovid, Fast.*, 6, 424, *seqq.*) Hence on ancient gems we sometimes see Vesta represented with the Palladium. (*Maffei, Gemm. Ant.*, p. 2, n. 76.) Herodian relates (1, 114), that when, in the reign of Commodus, the temple of Vesta was consumed, the Palladium was for the first time exposed to public view, the Vestal Virgins having conveyed it through the Via Sacra to the palace of the emperor. This was the only instance of its having been disturbed since the time when Metellus the Pontifex rescued it from the flames on a similar occasion. (*Ovid, Fast.*, *l. c.*) In the reign of Elagabalus, however, that emperor, with daring impiety, caused the sacred statue to be brought into his bedchamber, *πρὸς γάμον τῷ θεῷ*. (*Herodian*, 5, 6, 8.)—In order to account for the Romans having the Palladium among them, it was pretended that Diomedes had, in obedience to the will of heaven, restored it to Æneas when the latter had reached Italy; and that Æneas being engaged at the time in a sacrifice, an individual named Nautus had received the image, and hence the Nautian, not the Julian, family had the performance of the rites of Minerva. (*Varro, ap. Serv. ad Virg., Æn.*, 2, 166.) This story deserves to be classed with another, which states, that the Illicees were never deprived by the Greeks of the statue of Minerva, but concealed it in a cavern until the period of the Mithradatic war, when it was discovered and sent to Rome by Fimbria. (*Serv.*, *l. c.*)—From all that has been said, it would appear, that the ancient cities in general were accustomed to have tutelary images, which they held peculiarly sacred, and with which their safety was thought to be intimately connected; and as Pallas or Minerva was in an especial sense the "protectress of cities" (*πολιούχος*), it was but natural that many places should contend for the honour of having the true image of that goddess contained within its walls. (*Du Teil, Mem. de l'Acad. des Inscr.*, &c., vol. 39, p. 238.—*Heyne, Excurs.*, 9, ad *Æn.*, 2.—*Spanheim, ad Callim.*, *H. in Lav. Pall.*, 39.)

PALLADIUS, I. a sophist, a native of Methone, who lived in the time of Constantine the Great. He wrote Dissertations or Declamatory Essays, and also a work on the Roman festivals. (*Photius, cod.*, 132, vol. 1, p. 97, ed. Bekker.—*Schöll, Hist. Lit. Gr.*, vol. 6, p. 312.)—II. An eastern prelate and ecclesiastical writer, a native of Galatia, born about A.D. 368, and made bishop of Hellenopolis in Bithynia. He was ordained by Chrysostom, to whose party he attached himself, and, on the banishment of Chrysostom, fell under persecution, and, being obliged to withdraw from his see, retired to Italy, and took refuge at Rome. Some time after, venturing to return to the East, he was banished to Syene. Having regained his liberty, he resigned the see of Hellenopolis, and was appointed to the bishopric of Alexandria. He is thought to have died A.D. 431. He wrote the "Lausiatic History" about the year 421, which contains the lives of persons who were at that time eminent for their extraordinary austerities in Egypt and Palestine. It was called the "Lausiatic History," from Lausus, an officer in the imperial court at Constantinople, to whom it was dedicated. It is by no means certain whether Palladius, author of the "Lausiatic History," and Palladius, author of the "Life of Chrysostom," were different persons, or one and the same. Dupin thinks

that these were the productions of the same individual; but Tillemont and Fabricius adopt the opposite opinion. The best edition of the history is that of Meursius, *L. Bat.*, 1616. A work on the nations and Brahmins of India (*Περὶ τῶν τῆς Ἰνδίας ἐθνῶν καὶ τῶν Βραχμάνων*) is also ascribed to him by the MSS. It would appear, however, that the author of this book had been actually in India, which cannot be affirmed with any certainty of the anchorite Palladius. This latter work is given in the *gnomologic Collection* of Camerarius. An edition also appeared from the London press in 1665, 4to, and, with a new title-page merely, in 1668. The editor (*Bisacensis*) speaks of the work as previously unedited, not knowing that it had already appeared in the *Collection* of Camerarius. (*Schöll, Hist. Lit. Gr.*, vol. 7, p. 34.)—III. A physician of Alexandria, distinguished from other individuals of the same name by the appellation of *Ἱατροσοφιστής*. This title he is supposed to have gained by having been a professor of medicine at Alexandria. His age is very uncertain; but as he quotes Galen, and as he is several times mentioned by Rases, we may safely place him somewhere between the beginning of the third and the end of the ninth century A.D. Palladius wrote a commentary on the work of Hippocrates respecting Fractures, which has reached us in an imperfect state; but, in Freind's opinion, what remains is enough to let us see that we have not lost much, the text being as full and as instructive as the annotations. He has left also Scholia on the sixth book of Epidemics; others, still unpublished, on the regimen to be observed in acute maladies, and a treatise on Fevers. The scholia on the Epidemics of Hippocrates has, like the work on Fractures, reached us only in part, but is more valuable. In it, according to Freind, he with great perspicuity and exactness illustrates not only Hippocrates, but also several passages of Galen. The treatise on Fevers is too short to be of much value, and almost the whole of it is to be found in Galen, Aëtius, and Alexander Trallianus. A work on alchymy is also ascribed to him, but very probably the author of this last production has merely borrowed his name. The commentary is published with the works of Hippocrates. The scholia on the Epidemics have appeared in a Latin translation by Crassus, *Basil*, 1681, 4to. The Greek text has lately been published, for the first time, by Dietz, in his "*Scholia in Hippocratem et Galenum*," &c., *Regiomont. Pruss.*, 1834, 2 vols. 8vo. The treatise on Fevers was edited, with a Latin version, by Chartier, *Paris*, 1646, 4to; the last and best edition is by St. Bernard, *Lugd. Bat.*, 1745, 8vo. The commentary on Fractures was translated into Latin by Santalbinus, and is inserted in the edition of Hippocrates by Fossius, and in that of Hippocrates and Galen by Chartier. Dietz, in his preface, mentions another work by Palladius, which he found in MS. in the library at Florence, consisting of Scholia on Galen's work "*De Secta*," which he intended to publish, but he found the MS. so corrupt that he was obliged to give it up. Palladius appears to have been well known to the Arabians, since, besides being quoted by Rases, he is mentioned, among other commentators on Hippocrates, by the unknown author of "*Philosoph. Biblioth.*," quoted in Casiri, "*Biblioth. Arabico-Hisp. Escorial*," vol. 1, p. 237. (*Encyclop. Use. Knowl.*, vol. 17, p. 171.—*Schöll, Hist. Lit. Gr.*, vol. 7, p. 259.)—IV. Rutilius Taurus Æmilianus, the last of the Latin writers on agriculture. His work is entitled "*De Re Rustica*," and is divided into fourteen books. It contains materials selected from earlier authors on this subject, and especially from Columella, who is often literally copied. Nevertheless, Palladius treats, in a much more exact manner than Columella, the respective heads of fruit-trees and kitchen-gardens, having followed in these the work of Gargilius Martialis.

What he states respecting the mode of preserving fruits, &c., is taken from the Greek *Geoponica*, of which he appears to have possessed a much more complete copy than the abridgment which has come down to us.—Of the fourteen books of his work, the first contains a general introduction; each of the twelve following bears the name of one of the months of the year, and treats of the labours proper to each season; the fourteenth book is a poem, in elegiac measure, on the grafting of trees. The style of Palladius is incorrect and full of neologisms. In his poems he displays some talent by the variety which he introduces in describing the operation of grafting as suitable to different kinds of trees. He is often, however, obscure, and too figurative.—Critics have not been able to agree as to the period when this writer lived; some placing him at the beginning of the second century, others at the end of the fourth. Some suppose him to be the same with the relative of whom the poet Rutilius speaks in his *Itinerary* (1, 208), while others very justly remark, in opposition to this, that the last-mentioned writer was a young Gaul, sent by his father to the capital of the empire, to study law there, whereas Palladius had possessions in Italy and Sardinia: they add, that the name of Palladius does not occur among those of the prefects and other high magistrates during the first half of the fifth century, while the title of *Vir illustris*, which the manuscripts give to our author, indicate that he was invested with some high official dignity. Wernsdorff has attempted another mode of ascertaining the age of Palladius. The fourteenth book of his work being dedicated to a certain Pasiphilus, he has endeavoured to discover the period when this latter individual lived, whom Palladius styles a wise man, and whose fidelity he praises (*ornatus fidei*). Ammianus Marcellinus (29, 1), in speaking of the conspiracy against Valens, which was discovered in 371, relates, that the proconsul Eutropius, who was among the accused, was saved by the courage of the philosopher Pasiphilus, from whom the torture could wring no confession. These circumstances harmonize in some degree, according to Wernsdorff, with the epithets bestowed by Palladius on his friend; and if this is the same Pasiphilus who, in 395, was *rector* of a province, as appears from a law of the Theodosian code (*L. 8.—Cod. Theod.*, 1, 2, tit. 1), we may suppose that the fourteenth book of Palladius, where no allusion is made to this official rank, was written between 371 and 395. (*Schöll, Hist. Lit. Rom.*, vol. 3, p. 243, *seqq.*)

PALLANTĒUM, an ancient town of Italy, in the vicinity of Reate, in the territory of the Sabines. It was said, in tradition, to have been founded by the Arcadian Pelasgi united with the Aborigines. (*Dion. Hal.*, 1, 14.) From it, according to some, the Palatine Mount at Rome is said to have derived its name. (*Varro, L. L.*, 4.) Holstenius (*ad Steph. Byz.*, s. v.) thinks it must have occupied the site of Palazzo, on the hill called *Monte di Rieti*. The real name of this place was Palacium, as appears from a rare coin published by Sestini from the Museo Fontana. (*Classes Gen. seu Mon. Vet.*, p. 12.—*Cramer's Ancient Italy*, vol. 1, p. 317.)

PALLANTĪAS, I. a name of Aurora, as being related to the giant Pallas, whose cousin she was. Pallas was son of Creüs (*ροῦ Κρείου*), Aurora was daughter of Hyperion, and Hyperion and Creüs were brothers, offspring of Coelus and Terra. (*Hesiod, Theog.*, 134, 371, *seqq.*—*Ovid, Fast.*, 4, 373.—*Id., Met.*, 9, 420.—*Id. ib.*, 15, 191.)—II. An appellation given to the Tritonis Palus in Libya, because Minerva (Pallas) was fabled by some to have been first seen on its banks. (*Pliny*, 5, 4.—*Mela*, 1, 7.—*Serv. ad Virg.*, *Æn.*, 2, 171.)

PALLANTĪDÆ, the fifty sons of Pallas the brother of Ægeus, and next heirs to the latter if Theseus had

not been acknowledged as his son. They had recourse to arms in order to enforce their claim to the sovereignty, but were defeated by Theseus. (*Plut., Vit. These.*)

PALLANTIŪM (Παλλάντιον), a town of Arcadia, north-west of Tegea. The Romans affirmed, that from this place Evander led into Italy the colony which settled on the banks of the Tiber. (*Pausan.*, 8, 43.—*Æn.*, 8, 64.—*Plin.*, 4, 6.) Pallantium was subsequently united to Megalopolis, and became nearly deserted; but in the reign of Antoninus it was again restored to independence, and received other privileges from that emperor, in consideration of the ancient connexion which was supposed to exist between its inhabitants and the Romans. The vestiges of this town are discernible near the village of Thana, on the right of the road leading from Tripolitza to Leondari. (*Gell's Itin.*, p. 136.—*Cramer's Anc. Greece*, vol. 3, p. 349.)

PALLAS (gen. -ādīs), an appellation given to the goddess Minerva (Παλλάς Ἀθηνᾶ—*Pallas Athena*). For a probable etymology of the term, consult remarks at the close of the article Minerva. The ordinary derivation makes the goddess to have obtained this name from having slain the Titan, or Giant, Pallas. (*Vid. Pallas*, -antis, I.)

PALLAS (gen. -antis), I. a son of Pandion, who became the father of Clytus, Butes, and the "fifth Minerva," according to Cicero's enumeration. (*N. D.*, 3, 23.) He was destroyed by his daughter for attempted violence to her person. (*Cic.*, l. c.—*Ovid, Met.*, 7, 500.)—II. One of the Titans, but enumerated by Claudian (*Gigantom.*, 94), and others, among the Giants. He was the son of Creüs, and grandson of Coelus and Terra, and was also cousin to Aurora. (*Vid. Pallanties* I.)—III. King of Arcadia, the grandfather or great-grandfather of King Evander. (*Serv. ad Virg.*, *Æn.*, 8, 64.)—IV. The son of Evander, according to Virgil. (*Æn.*, 8, 104.) Other poetic legends, however, made him the offspring of Hercules and Dymæ the daughter of Evander. Pallas followed Æneas to the war against Turnus, by whose hand he fell, after having distinguished himself by his valour. The belt which Turnus tore from the body of the young prince; and wore as a trophy of his victory, was the immediate cause of his own death; for, being vanquished by Æneas in single combat, he had almost persuaded the victor to spare his life, when the sight of Pallas' belt rekindled the wrath of Æneas, and he indignantly slew the destroyer of his youthful friend. (*Virg.*, *Æn.*, 10, 439.—*Id. ib.*, 12, 941.)

PALLĒNE, a peninsula of Macedonia, one of the three belonging to the district of Chalcidice. It was situate between the Sinus Thermaicus or Gulf of Saloniki, and the Sinus Toronaicus or Gulf of Cassandria. This peninsula was said to have borne the name of Phlegra, and to have witnessed the conflict between the gods and the earth-born Titans. (*Pind., Nem.*, 1, 100.—*Id., Isth.*, 6, 47.—*Lycophron*, 1408.) It is connected with the mainland by a narrow isthmus of little more than two miles in breadth, on which once stood the rich and flourishing city of Potidæa. (*Scyl., Periopl.*, p. 26.) Among other towns on this peninsula was one of the same name with it, according to Stephanus of Byzantium. (*Cramer's Ancient Greece*, vol. 1, p. 244.)

PALMARĪA, a small island in the Tyrrhenian Sea, off the coasts of Latium and Campania, and south of the promontory of Circeii. It is now *Palmaruola*. (*Plin.*, 3, 5.)

PALMYRA, a celebrated city of Asia, situate in an oasis of the Syrian desert, nearly half way between the Orontes and Euphrates, and about 140 miles east-northeast of Damascus. Its Oriental name was Tadmor, which, according to Josephus, signifies the same as Palmyra, "the place of palm-trees." There seems to be sufficient evidence that the Palmyra of the

PALMYRA.

Greeks was the "Tadmor in the wilderness" built by Solomon: from which two things may be inferred; first, that this monarch extended his arms and his territory thus far; and, secondly, that he must have had some adequate object for so doing, and for maintaining an establishment and erecting a city, at incredible pains and expense, on a spot so remote from the habitable parts of his kingdom. The circumstances of Palmyra's being situated in an oasis, sheltered by hills to the west and northwest, and supplied with wholesome water, and also on a line leading from the coast of Syria to the regions of Mesopotamia, Persia, and India, must have pointed it out, in very early times, to the caravans, as a convenient halting-place in the midst of the desert. The Phœnicians, in all probability, were acquainted with it at an early period, and may have suggested to Solomon, with whom the King of Tyre was in alliance, the idea of establishing an emporium here. We read in the second book of Chronicles (8, 4), that Solomon "built Tadmor in the wilderness, and all the store-cities which he built in Hamath." Hamath was a town and territory extending along the banks of the Orontes, and bordering on the Syrian desert. After this, we read no more of Tadmor in the Scriptures; but John of Antioch, probably from some tradition, says that it was destroyed by Nebuchadnezzar. The first notice which we have of it in Roman history is at the commencement of the wars with the Parthians, when we find it mentioned as a rich and powerful city, and permitted to maintain a state of independence and neutrality between the contending parties in this struggle. Marc Antony, indeed, attempted to plunder it, but the inhabitants removed their most valuable effects over the Euphrates, and defended the passage of the river by their archers. The pretence he made use of, to give such conduct a colour of justice, was, that they did not preserve a strict neutrality; but Appian says his real motive was to enrich his troops with the plunder of the Palmyrenes. In the time of Pliny it was the intermediate emporium of the trade with the East, a city of merchants and factors, who carried on traffic with the Parthians on the one hand, and the Romans on the other. The produce of India found its way to the Roman world through Palmyra. Pliny has very happily collected in a few lines the most striking circumstances with regard to this place, except that he takes no notice of the buildings. "Palmyra is remarkable for situation, a rich soil and pleasant streams; it is surrounded on all sides by a vast sandy desert, which totally separates it from the rest of the world, and has preserved its independence between the two great empires of Rome and Parthia, whose first care when at war is to engage it in their interest." Palmyra afterward became allied to the empire as a free state, and was greatly favoured by Hadrian and the Antonines, under whom it attained its greatest splendour. We find, from the inscriptions, that the Palmyrenes joined Alexander Severus in his expedition against the Persians. We do not meet with the mention of the city again until the reign of Gallienus, when it makes a principal figure in the history of those times, and in a few years experienced the greatest vicissitudes of good and bad fortune. After attaining to a widely-extended sway under Odenatus and his queen Zenobia, who survived him, it fell at length, together with the latter, under the power of Aurelian. (Vid. Odenatus, and Zenobia.) A revolt, on his departure, compelled him to return, and, having retaken the city, he delivered it without mercy to the pillage and havoc of his soldiery. This event happened in the year 273, after which Palmyra never recovered her former importance, although it is certain that none of the public edifices were destroyed, though some were damaged, by the soldiers of Aurelian. From this time Palmyra had a Roman governor. The first Illyrian legion was stationed here

PALMYRA

about A.D. 460. But Procopius states that the place had been for some time almost deserted, when Justinian repaired the town, and supplied it with water for the use of a garrison which he left there. We hear no more of Palmyra in the Roman history, and the ecclesiastical historians supply us with no information respecting its subsequent fortunes. The Moslems are said to have taken it under the caliphate of Abu Bekr, Mohammed's successor. That it has been made use of as a place of strength by the Saracens and Turks appears from the alterations made in the temple, as well as from the modern temple on the hill. Benjamin of Tudela, who visited it about A.D. 1173, states that it then contained about 2000 Jews. Abulfeda, who wrote about 1321 A.D., mentions very briefly its situation, referring to its many ancient columns, its palm and fig trees, its walls and castle; he only calls it Tadmor.—The ruins of Palmyra are said to present a fine view at a distance, but disappointment succeeds when they are examined in detail. "On opening upon the ruins of Palmyra," says Captain Mangies, "as seen from the valley of the tombs, we were much struck with the picturesque effect of the whole, presenting altogether the most imposing sight of the kind we had ever seen. It was rendered doubly interesting by our having travelled through a wilderness destitute of a single building, from which we suddenly opened upon these innumerable columns and other ruins, on a sandy plain on the skirts of the desert. So great a number of Corinthian columns, mixed with so little wall or solid building, and the snow-white appearance of the ruins contrasted with the yellow sand, produced a very striking impression." Great, however, he proceeds to say, was the disappointment of himself and his fellow-traveller (Mr. Irby), when, on a minute examination, they found that there was not a single column, pediment, architrave, portal, frieze, or other architectural remnant worthy of admiration. None of the columns exceeded forty feet in height or four feet in diameter; those of the boasted avenue have little more than thirty feet of altitude: whereas the columns of Balbec are nearly sixty feet in height and seven in diameter, supporting a most rich and beautifully-wrought epistylum of twenty feet more; and the pillars are constructed of only three pieces of stone, while the smallest columns at Palmyra are formed of six, seven, and eight parts. In the centre of the avenue, however, are four granite columns, each of one single stone, about thirty feet high: one only is still standing. "Take any part of the ruins separately," says this traveller, "and they excite but little interest; and, altogether, we judged the visit to Palmyra hardly worthy of the time, expense, anxiety, and fatiguing journey through the wilderness which we had undergone to visit it. The projecting pedestals in the centre of the columns of the great avenue have a very unsightly appearance. There is also a great sameness in the architecture, all the capitals being Corinthian, excepting those which surround the Temple of the Sun. These last were fluted, and, when decorated with their brazen Ionic capitals, were doubtless very handsome; but the latter being now deficient, the beauty of the edifice is entirely destroyed. The sculpture, as well of the capitals of the columns as of the other ornamental parts of the doorways and buildings, is very coarse and bad. The three arches at the end of the avenue, so beautiful in the designs of Wood and Dawkins, are excessively insignificant, the decorated frieze is badly wrought, and even the devices are not striking. They are not to be compared to the common portals of Thebes, if indeed the Egyptians were unacquainted with the arch."—If inferior, however, to Balbec, and not to be compared to Thebes, it is only by comparison that these remains of ancient magnificence can be with any propriety thus slightly estimated; and when this traveller speaks of

them as hardly repaying the toils and expense of the journey, it must be recollected that he was already satiated with the wonders of Egypt. Yet, taken as a *sout ensemble*, he admits that they are more remarkable by reason of their extent (being nearly a mile and a half in length), than any which he had met with; they have the advantage, too, of being less encumbered with modern fabrics than almost any ancient ruins. Exclusive of the Arab village of *Tadmor*, which occupies the peristyle court of the Temple of the Sun, and the Turkish burying-place, there are no obstructions whatever to the antiquities. The temple itself is disfigured, indeed, by modern works, but it is still a most majestic object. The natives firmly believe, Mr. Wood informs us, that the existing ruins were the works of King Solomon. "All these mighty things," say they, "Solyman Ebn Daoud (Solomon the son of David) did by the assistance of spirits." King Solomon is the Merlin of the East, and to the genii in his service the Persians as well as the Arabs ascribe all the magnificent remains of ancient art. From the dates in the inscriptions, in which the era of Seleucus is observed, with the Macedonian names of the months, it appears that none of the existing monuments are earlier than the birth of Christ; nor is there any inscription so late as the destruction of the city by Aurelian, except one in Latin, which mentions Dioclesian. "As to the age of those ruinous heaps," says Mr. Wood, "which belonged evidently to buildings of greater antiquity than those which are yet partly standing, it is difficult even to guess; but if we are allowed to form a judgment by comparing their state with that of the monument of Isambichus at Palmyra, we must conclude them extremely old; for that building, erected 1750 years ago" (Mr. Wood published in 1758), "is the most perfect piece of antiquity I ever saw." (*Mansford's Scripture Gazetteer*, p. 451, *seqq.*—*Modern Traveller*, part 5, p. 10, *seqq.*)

PAMÍLOS, I. a river of Thessaly, now the *Fanari*, falling into the Peneus to the east of Tricca. (*Herod.*, 7, 132.)—II. Major, a river of Messenia, falling into the Sinus Messeniacus at its head. It is now the *Pimatza*. (*Walpole*, vol. 2, p. 35.) Pausanias affirms, that the waters of this river were remarkably pure, and abounded with various kinds of fish. He adds, that it was navigable for ten stadia from the sea (4, 34.—Compare *Polyb.*, 16, 16).—III. A torrent of Messenia, falling into the Sinus Messeniacus near Leuctrum, and forming part of the ancient boundary between Laconia and Messenia. (*Strab.*, 361.)

PAMPHILA, a Grecian female, whom Photius makes a native of Egypt, but who, according to Suidas, Diogenes Laertius (1, 24), and others, was born at Epidaurus in Argolis. She wrote several works, the contents of which were chiefly historical. One of these was entitled *Ἐντοπὰ ἱστοριῶν* (*Historical Abridgements*). Another, which Photius has made known to us, bore the name of *Σύμμικτα ἱστορικὰ ὑπομνήματα* (*Historical Miscellany*). It was a species of note or memorandum book, in which this female regularly inserted, every day, whatever she heard most deserving of being remembered, in the conversations between her husband Socratidas and the literary friends who visited his house, and also whatever she had met with worthy of being recorded, in the course of her historical reading. She was united to Socratidas for thirteen years, during all which time the compilation was being formed. The work, however, was without any systematic arrangement, though it would appear to have contained a vast variety of literary anecdote, some few portions of which have reached us in the quotations of others. Photius only knew of eight books of this collection, but Suidas says it contained thirty-three; and, in fact, Aulus Gellius (15, 17) quotes the 29th, and Diogenes Laertius (1, 24) the 30th. The work is un-

fortunately lost. There were some who ascribed it to Soterides, the father of Pamphila. (*Suidas*, s. v. corrected by *Vossius*, *de Hist. Græc.*, p. 237, ed. *Weestermann*.) According to Photius, Pamphila lived in the reign of Nere. (*Phot.*, *cod.*, 175—vol. 1, p. 119, ed. *Bekker*.—*Vossius*, *de Hist. Græc.*, l. c.—*Schöll*, *Hist. Lit. Gr.*, vol. 4, p. 106.) Krüger, in his *Life of Thucydides* (p. 7), calls in question the credit of this female author. (*Weestermann*, *ad Voss.*, l. c.)

PAMPHILUS, I. an Alexandrine grammarian, and a pupil of Aristarchus. He was the author of a large lexicon, in 91 or 95 books, often quoted by Athenæus, in which he had incorporated the lexicon of the Crotonian dialect by Hermonax, and an Italian (i. e., Doric) lexicon by Diodorus and Heraclæon. Other works of his are enumerated by Athenæus. (*Needham*, *Proleg. ad Geopon.*, p. 63, *seqq.*—*Schwanhaeuser*, *Ind. Auct. ad Athen.*, vol. 9, p. 159.)—II. A celebrated painter, a native of Amphipolis, but who studied his art under Eupompus of Sicyon, and succeeded in establishing the school which his master had founded. The characteristics of the Sicyonian school of painting were, a stricter attention to dramatic truth of composition, and a finer and more systematic style of design. Pamphilus taught the principles of this school to Apelles. Such was his authority, says Pliny (35, 10, 36), that, chiefly through his influence, first in Sicyon and then throughout all Greece, noble youth were taught the art of drawing before all others; it was considered among the first of liberal arts, and was practised exclusively among the freeborn, for there was a law prohibiting all slaves the use of the *cestrum* or *γρᾶψις*. In this school of Pamphilus, the most famous of all the ancient schools of painting, the progressive courses of study occupied the long period of ten years, and the fee of admission was not less than a talent. Pamphilus, like his master Eupompus, seems to have been occupied principally with the theory of his art and with teaching, since we have very scanty notices of his works. Yet he, and his pupil Melanthius, according to Quintilian (12, 10), were the most renowned among the Greeks for composition. We have accounts of only four of his paintings, the "Heraclidæ," mentioned by Aristophanes (*Plutus*, 385), and three others named by Pliny, the "Battle of Philus and victory of the Athenians," "Ulysses on the raft," and a "Relationship" or *Cognatio*, probably a family portrait. These pictures were all conspicuous for the scientific arrangement of their parts, and their subjects certainly afforded good materials for fine composition. The period of Pamphilus is sufficiently fixed by the circumstance of his having taught Apelles, and he consequently flourished somewhat before, and about the time of Philip II. of Macedon, from B.C. 398 to about B.C. 348. He left writings upon the arts, but they have unfortunately suffered the common fate of the writings of every other ancient artist. He wrote on painting and famous painters. (*Encyclop. Us. Knout.*, vol. 17, p. 177.—*Sillig*, *Dict. Art.*, s. v.)—III. A bishop of Cæsarea in Palestine, and the intimate friend of Eusebius, who, in memory of him, appended "*Pamphilus*" (i. e., the friend of Pamphilus) to his own name (*vid. Eusebius*). He is said to have been born at Berytus, and educated by Pierius. He spent the greater part of his life in Cæsarea, where he suffered martyrdom in the year 309. Pamphilus was a man of profound learning, and devoted himself chiefly to the study of the Scriptures and the works of the Christian writers. Jerome states, that he wrote out with his own hand the greater part of Origen's works. He founded a library at Cæsarea, chiefly consisting of ecclesiastical works, which became celebrated throughout the ancient world. It was destroyed, however, before the middle of the seventh century. He constantly lent and gave away copies of the Scriptures. Both Eusebius and Jerome

1
speak in the highest terms of his piety and benevolence. Jerome states, that Pamphilus composed an apology for Origen before Eusebius; but, at a later period, having discovered that the work which he had taken for Pamphilus's was only the first book of Eusebius's apology for Origen, he denied that Pamphilus wrote anything except short letters to his friends. The truth seems to be, that the first five books of the "Apology for Origen" were composed by Eusebius and Pamphilus jointly, and the sixth book by Eusebius alone, after the death of Pamphilus. Another work, which Pamphilus effected in conjunction with Eusebius, was an edition of the Septuagint, from the text in Origen's Hexapla. This edition was generally used in the Eastern church. Montfaucon and Fabricius have published "Contents of the Acts of the Apostles" as a work of Pamphilus; but this is in all probability the work of a later writer. Eusebius wrote a "Life of Pamphilus," in three books, which is now entirely lost, with the exception of a few fragments, and even of these the genuineness is extremely doubtful. We have, however, notices of him in the "Ecclesiastical History" of Eusebius (7, 32), and in the "*De Viris Illustribus*," and other works of Jerome. (*Lardner's Credibility*, pt. 3, c. 59.)

PAMPHUS, an early Athenian bard, and a disciple, as was said, of Linus. Philostratus has preserved two remarkable verses of his, which recall to mind the symbol under which the Egyptians typified the Creator of the universe, or the author of animal life. The lines are as follows:

Ζεῦ, κύντιστε, μέγιστε θεῶν, εἰλυμένη κόπρῳ
Μηλείη τε καὶ ἱππέϊν τε καὶ ἡμυνέην.

"Oh Jove, most glorious, most mighty of the gods, thou that art enveloped in the dung of sheep, and horses, and mules." (*Philostr., Heroic.*, c. 2, p. 98, ed. Boissonade.)—According to Pausanias (9, 27), Pamphus composed hymns for the Lycomedæ, a family which held by hereditary right a share in the Eleusinian worship of Ceres. Pamphus is also said to have first sung the strain of lamentation at the tomb of Linus. (*Schöll, Hist. Lit. Gr.*, vol. 1, p. 33.—*Müller, Hist. Lit. Gr.*, p. 25.)

PAMPHYLIA (Παμφυλία), a province of Asia Minor, extending along the coast of the Mediterranean from Olbia to Ptolemais, and bounded on the north by Pisidia, on the west by Lycia and the southwestern part of Phrygia, and on the east by Cilicia. Pliny (5, 26) and Mela (1, 14) make Pamphylia begin on the coast at Phaselis, which they reckon a city of Pamphylia, but the majority of writers speak of it as a Lycian city. Pamphylia was separated from Pisidia by Mount Taurus, and was drained by numerous streams which flowed from the high land of the latter country. The eastern part of the coast is described by Captain Beaufort as flat, sandy, and dreary; but this remark does not apply to the interior of the country, which, according to Mr. Fellows' account (*Excursion in Asia Minor*, p. 204), is very beautiful and picturesque. The western part of the coast is surrounded by lofty mountains which rise from the sea, and attain the greatest height in Mount Solyma, on the eastern borders of Lycia. The western part of the country is composed, according to Mr. Fellows (p. 184), "for thirty or forty miles, of a mass of incrustated or petrified vegetable matter, lying imboomed, as it were, in the side of the high range of marble mountains which must originally have formed the coast of this country. As the streams, and, indeed, large rivers which flow from the mountains, enter the country formed of this porous mass, they almost totally disappear beneath it; a few little streams only are kept on the surface by artificial means, for the purpose of supplying aqueducts and mills, and, being carried along the plain, fall over the cliffs into the sea. The course of the rivers beneath these deposited plains

is continued to their termination at a short distance out at sea, where the waters of the rivers rise abundantly all along the coast, sometimes at the distance of a quarter of a mile from the shore." (*Encycl. Us. Knowl.*, vol. 17, p. 177.)—The Greeks, ever prone to those derivations which flattered their national vanity, attached to the word "Pamphylia" (Παμφυλία) that meaning which the component words πᾶν and φύλον would in their language naturally convey, namely, "an assemblage of different nations." (*Strab.*, 668.) It was, however, farther necessary to account for the importation of Grecian terms among a people as barbarous as the Carians, Lycians, and other tribes on the same line of coast; and the siege of Troy, so fertile a source of fiction, gave rise to the tale which supposed Calchas and Amphilochous to have settled on the Pamphylian shores with portions of various tribes of the Greeks. This story, which seems to have obtained general credit, is to be traced, in the first instance, to the father of history (*Herod.*, 7, 91), and after him it has been repeated by Strabo (*l. c.*), Pausanias (7, 3), and others. Of the Grecian origin of several towns on the Pamphylian coast we can indeed have no doubt; but there is no reason for supposing that the main population of the country was of the Hellenic race. It is more probable that they derived their origin from the Cilicians or the ancient Solymi. Other etymologies may be found in Stephanus of Byzantium (*s. v. Παμφυλία*). Pliny reports, that this country was once called Mopsopia, probably from the celebrated Grecian soothsayer Mopsus (5, 26).—Pamphylia possesses but little interest in an historical point of view. It became subject in turn to Croesus, the Persian monarch, Alexander, the Ptolemies, Antiochus, and the Romans. The latter, however, had considerable difficulty in extirpating the pirates, who swarmed along the whole of the southern coast of Asia Minor, and even dared to insult the galleys of those proud republicans off the shores of Italy, and in sight of Ostia. Pamphylia was entirely a maritime country: its coast is indented by a deep gulf, known to the ancients by the name of Mare Pamphylium, and in modern geography it bears that of "Gulf of Attalia." The Turks call this part of Carmania by the appellation of Teké-İli. (*Cramer's Asia Minor*, vol. 2, p. 273, *seqq.*) Mr. Leake gives the following account of the natural features of part of this country, which may be compared with that of Mr. Fellows. "From Alaya (the ancient Coracesium) to Alara (the ancient Ptolemais) are eight reputed or caravan hours. The road leads along the seashore, sometimes just above the seabeach, upon high woody banks, connected on the right with the great range of mountains which lies parallel to the coast; at others, across narrow fertile valleys, included between branches of the same mountains. There are one or two fine harbours, formed by islands and projecting capes; but the coast for the most part is rocky and without shelter.—From Alara to Menasgat (situate near the mouth of the ancient Melas) the road proceeded at a distance of three or four miles from the sea, crossing several fertile and well-cultivated valleys, and passing some neat villages pleasantly situated. The valleys are watered by streams coming from a range of lofty mountains, appearing at a great distance on the right." (*Leake's Journal*, p. 130.)—The Melas is described as a large river, and the adjacent valleys as well-cultivated and inhabited. From Menasgat to Dashasher (the ancient Syllium) the country is represented as being a succession of fine valleys, separated by ridges branching from the mountains, and each watered by a stream of greater or less magnitude. (*Leake's Journal*, *l. c.*)

PAN (Πάν), the god of shepherds, and in a later age the guardian of bees, and the giver of success in fishing and fowling. He haunted mountains and pastures, was fond of the pastoral reed and of entrapping nymphs.

In form he combined that of man and beast, having a red face, horned head, his nose flat, and his legs, thighs, tail, and feet those of a goat. Honey and milk were offered to him.—This god is unnoticed by Homer and Hesiod; but, according to one of the Homerids, he was the son of Mercury by an Arcadian nymph. (*Hom., Hymn.*, 19.) So monstrous was his appearance, that the nurse, on beholding him, fled away in affright. Mercury, however, immediately caught him up, wrapped him carefully in a hare-skin, and carried him away to Olympus: then taking his seat with Jupiter and the other gods, he produced his babe. All the gods, especially Bacchus, were delighted with the little stranger; and they named him *Pan* (i.e., "*All*"), because he had charmed them *all*!—Others fabled that Pan was the son of Mercury by Penelope, whose love he gained under the form of a goat, as she was tending in her youth the flocks of her father on Mount Taygetus. (*Herod.*, 2, 145.—*Schol. ad Theocr.*, 7, 109.—*Eudocia*, 323.—*Tzetzes, ad Lycophr.*, 772.) Some even went so far as to say that he was the offspring of the amours of Penelope with *all* her suitors. (*Schol. ad Theocr.*, 1, 3.—*Eudocia*, l. c.—*Serv. ad Æn.*, 2, 44.) According to Epimenides (*Schol. ad Theocr.*, l. c.), Pan and Arcas were the children of Jupiter and Callisto. Aristippus made Pan the offspring of Jupiter and the nymph Ceneis; others, again, said that he was a child of Heaven and Earth. (*Schol. ad Theocr.*, 7, 123.) There was also a Pan said to be the son of Jupiter and the nymph Thymbris or Hybris, the instructor of Apollo in divination. (*Apollod.*, 1, 4, 1.)—The worship of Pan seems to have been confined to Arcadia till the time of the battle of Marathon, when Phidippides, the courier who was sent from Athens to Sparta to call on the Spartans for aid against the Persians, declared that, as he was passing by Mount Parthenius, near Tegea in Arcadia, he heard the voice of Pan calling to him, and desiring him to ask the Athenians why they paid no regard to him, who was always, and still would be, friendly and willing to aid. After the battle, the Athenians consecrated a cave to Pan under the Acropolis, and offered him annual sacrifices. (*Herod.*, 6, 105.—*Plut.*, *Vit. Arist.*, 11.) Long before this time, the Grecian and Egyptian systems of religion had begun to mingle and combine. The goat-formed Mendes of Egypt was now regarded as identical with the horned and goat-footed god of the Arcadian herdsmen (*Herod.*, 2, 46); and Pan was elevated to great dignity by priests and philosophers, becoming a symbol of the *universe*, for his name signified *all*. Moreover, as he dwelt in the woods, he was called "*Lord of the Hyle*" (*Ὁ τῆς ὕλης κύριος*); and as the word *hyle* (*ὕλη*), by a lucky ambiguity, signified either *wood* or *primitive matter*, this was another ground for exalting him. It is amusing to read how all the attributes of the Arcadian god were made to accord with this notion. "*Pan*," says Servius, "is a rustic god, formed in similitude of nature, whence he is called Pan, i. e., *All*: for he has horns, in similitude of the rays of the sun and the horns of the moon; his face is ruddy, in imitation of the ether; he has a spotted fawn-skin upon his breast, in likeness of the stars; his lower parts are shaggy, on account of the trees, shrubs, and wild beasts; he has goat's feet, to denote the stability of the earth; he has a pipe of seven reeds, on account of the harmony of the heavens, in which there are seven sounds; he has a crook, that is, a curved staff, on account of the year, which runs back on itself, because he is the god of all nature. It is feigned by the poets that he struggled with Love, and was conquered by him, because, as we read, Love conquers all: "*Omnia vincit amor*." (*Serv. ad Virg., Eclog.*, 2, 31.—Compare *Schol. ad Theocr.*, 1, 3.—*Eudocia*, 323.)—In Arcadia, his native country, Pan appears never to have attained to such distinction; on the contrary, we find in Theocritus (7, 106) a ludicrous

account of the treatment which this deity received from the Arcadians when they were unsuccessful in hunting. (*Schol. ad Theocr.*, l. c.)—The Homerid already quoted, who is older than Pindar, describes in a very pleasing manner the occupations of Pan. He is lord of all the hills and dales: sometimes he ranges along the tops of the mountains, sometimes pursues the game in the valleys, roams through the woods, floats along the streams, or drives his sheep into a cave, and there plays on his reeds, producing music not to be excelled by that of the bird "which, among the leaves of the flowery spring, laments, pouring forth her moan, a sweet-sounding lay." In after times, as we have already remarked, the care of Pan was held to extend beyond the herds. We find him regarded as the guardian of the bees (*Anthol.*, 9, 326), and as the giver of success in fishing and fowling. (*Anthol.*, 7, 11, *segg.*; 179, *segg.*)—The origin of the *syrtinx* or pipe of Pan is given as follows: Syrtinx was a Naiad, of Nonacris in Arcadia, and devoted to the service of Diana. As she was returning one day from the chase, and was passing by Mount Lycæus, Pan beheld her: but when he would address her, she fled. The god pursued: she reached the river Ladon, and, unable to cross it, implored the aid of her sister-nymphs; and when Pan thought to grasp the object of his pursuit, he found his arms filled with reeds. While he stood sighing at his disappointment, the wind began to agitate the reeds, and produced a low musical sound. The god took the hint, cut seven of the reeds, and formed from them his *syrtinx* (*σύριγξ*) or pastoral pipe. (*Ovid, Met.*, 1, 690, *segg.*) Another of his loves was the nymph Pitys, who was also beloved by Boreas. The nymph favoured more the god of Arcadia, and the wind-god, in a fit of jealousy, blew her down from the summit of a lofty rock. A tree of her own name (*πίτυς, pine*) sprang up where she died, and it became the favourite plant of Pan. (*Noëmus*, 43, 259, *segg.*—*Geopon.*, 11, 4.)—What are called *Panic terrors* were ascribed to Pan; for loud noises, whose cause could not easily be traced, were not unfrequently heard in mountainous regions; and the gloom and loneliness of forests and mountains fill the mind with a secret horror, and dispose it to superstitious apprehensions.—The ancients had two modes of representing Pan: the first, according to the description already given, as horned and goat-footed, with a wrinkled face and a flat nose. The artists, however, sought to soften the idea of the god of shepherds, and they portrayed him as a young man hardened by the toils of a country life. Short horns sprout on his forehead to characterize him; he bears his crook and his *syrtinx*, and he is either naked, or clad in the light cloak denominated *chlamys*. (*Sil. Ital.*, 13, 326, *segg.*) Like many other gods who were originally single, Pan was multiplied in course of time, and we meet with Pans in the plural. (*Plat., Leg.*, 7, 815.—*Aristoph.*, *Eccles.*, 1089.—*Moschus*, 3, 22.)—The name *Pan* (*Πάν*) is probably nothing more than *πάνν*, "*feeder*" or "*owner*." Buttmann connects Pan with Apollo Nomius, regarding his name as the contraction of *Pæon* (*Παιών*), and he refers, in support of his opinion, to the forms *Alcman* from *Alcmaon*, *Amythan* from *Amythaon*, &c. (*Mythologus*, vol. 1, p. 169.) This, however, would rather favour the derivation of *Pan* from *Paon*, as first given. Welcker says that *Pan* was the Arcadian form of *Φάων*, *Φάν* (*Phaon*, *Phan*), apparently regarding him as the sun. (*Welcker, Kret. Kol.*, p. 45.—*Schwenck, Andeut.*, p. 213.—*Keightley's Mythology*, p. 229, *segg.*)

PANACEA (*All-Heal*), a daughter of Æsculapius. (*Vid. Æsculapius*.)

PANÆTIUS, a Greek philosopher, a native of Rhodes. He studied at Athens under Diogenes the Stoic, and afterward came to Rome, about 140 B.C., where he gave lessons in philosophy, and was intimate with Scipio Æmilianus, the younger Lælius, and Polybius.

After a time Panætius returned to Athens, where he became the leader of the Stoic school, and where he died at a very advanced age. Posidonius, Scylax of Halicarnassus, Hecaton, and Mnesarchus are mentioned among his disciples. Panætius was not apparently a strict Stoic, but rather an Eclectic philosopher, who tempered the austerity of his sect by adopting something of the more refined style and milder principles of Plato and the other earlier Academicians. (*Cic., de Fin.*, 4, 28.) Cicero, who speaks repeatedly of the works of Panætius in terms of the highest veneration, and acknowledges that he borrowed much from them, says that Panætius styled Plato "the divine," and "the Homer of Philosophy," and only dissented from him on the subject of the immortality of the soul, which he seems not to have admitted. (*Tusc. Quest.*, 1, 32.) Aulus Gellius says (12, 5) that Panætius rejected the principle of apathy adopted by the later Stoics, and returned to Zeno's original meaning, namely, that the wise man ought to know how to master the impressions which he receives through the senses. In a letter of consolation which Panætius wrote to Q. Tubero, mentioned by Cicero (*De Fin.*, 4, 9), he instructed him how to endure pain, but he never laid it down as a principle that pain was not an evil. He was very temperate in his opinions, and he often replied to difficult questions with modest hesitation, saying, *ἐπὶ τοῦτο*, "I will consider."—None of the works of Panætius have come down to us; but their titles, and a few sentences from them, are quoted by Cicero, Diogenes Laertius, and others. He wrote a treatise "On Duties," the substance of which Cicero merged in his own work "De Officiis." Panætius wrote also a treatise "On Divination," of which Cicero probably made use in his own work on the same subject. He wrote likewise a work "On Tranquillity of Mind," which some suppose may have been made use of by Plutarch in his work bearing the same title. Cicero mentions also a treatise "On Providence," another "On Magistrates," and one "On Heresies," or sects of philosophers. His book "On Socrates," quoted by Diogenes Laertius, and by Plutarch in his "Life of Aristides," made probably a part of the last-mentioned work. Laertius and Seneca quote several opinions of Panætius concerning ethics and metaphysics, and also physics. (*Encycl. Us. Knowl.*, vol. 17, p. 178.—*Van Lynden, Disp. Historico-Crit. de Panætio Rhodio, Lugd. Bat.*, 1802.—*Charbon de la Rochette, Melanges, &c.*, vol. 1, Paris, 1812.)

PANATHENÆA (Παναθήναια), the greatest of the Athenian festivals, was celebrated in honour of Minerva (Athena) as the guardian deity of the city. It is said to have been instituted by Erichthonius, and to have been called originally *Athenæa* (Ἀθήναια), but it obtained the name of *Panathenæa* in the time of Theseus, in consequence of his uniting into one state the different independent communities into which Attica had been previously divided. (*Pausan.*, 8, 2, 1.—*Plut., Vit. These.*, c. 20.—*Thucyd.*, 2, 15.) There were two Athenian festivals which had the name of Panathenæa; one of which was called the *Great Panathenæa* (Μεγάλα Παναθήναια), and the other the *Less* (Μικρά). The Great Panathenæa was celebrated once every five years, with very great magnificence, and attracted spectators from all parts of Greece. The Less Panathenæa was celebrated every year in the Piræus. (*Harpocrat.*, s. v. Παναθ.—*Plat., Rep.*, 1, 1.) When the Greek writers speak simply of the festival of the Panathenæa, it is sometimes difficult to determine which of the two is alluded to; but when the Panathenæa is mentioned by itself, and there is nothing in the context to mark the contrary, the presumption is that the Great Panathenæa is meant; and it is thus spoken of by Herodotus (5, 56) and Demosthenes (*De Fals. Leg.*, p. 394).—The Great Panathenæa was celebrated on the 28th day of Hecatombeon

(*Clinton, Fast. Hell.*, vol. 1, p. 335), the first of the Athenian months; which agrees with the account of Demosthenes (*contra Timocr.*, p. 708, seq.), who places it after the twelfth day of the month. There is considerable dispute as to the time when the Less Panathenæa was celebrated. Meursius places the celebration in Thargelion, the eleventh of the Athenian months; but Potius and Corsini in Hecatombeon. Mr. Clinton, who has examined the subject at considerable length (*Fast. Hell.*, vol. 1, p. 332, seqq.), supports the opinion of Meursius; and it does not appear improbable that the Less Panathenæa was celebrated in the same month as the Great, and was perhaps omitted in the year in which the great festival occurred. The celebration of the Great Panathenæa only lasted one day in the time of Hipparchus (*Thucyd.*, 6, 56), but it was continued in later times for several days.—At both of the Panathenæa there were gymnastic contests (*Pind., Isthm.*, 4, 42.—*Polux.*, 8, 93), among which the torch-race seems to have been very popular. In the time of Socrates there was introduced at the Less Panathenæa a torch-race on horseback. (*Plat., Rep.*, 1, 1.) At the Great Panathenæa there was also a musical contest, and a recitation of the Homeric poems by rhapsodists. (*Lycurg., contra Leocr.*, p. 209.) The victors in these contests were rewarded with vessels of sacred oil. (*Pind., Nem.*, 10, 64.—*Schol., ad loc.*—*Schol. ad Soph., Œd. Col.*, 696.)—The most celebrated part, however, of the grand Panathenæic festival was the solemn procession (πομπή), in which the Peplus (Πέπλος), or sacred robe of Athena, was carried through the Ceramicus, and the other principal parts of the city, to the Parthenon, and suspended before the statue of the goddess within. This Peplus was covered with embroidery (ποικιλύματα.—*Plat., Euthyph.*, c. 6), on which was represented the battle of the Gods and the Giants, especially the exploits of Jupiter and Minerva (*Plat.*, l. c.—*Esrip., Hec.*, 468), and also the achievements of the heroes in the Attic mythology, whence Aristophanes speaks of "men worthy of this land and of the Peplus." (*Equit.*, 564.) The embroidery was worked by young maidens of the noblest families in Athens (called *ἐργαστήραι*), of whom two were superintendents, with the name of Arephoræ. When the festival was celebrated, the Peplus was brought down from the Acropolis, where it had been worked, and was suspended like a sail upon a ship (*Pausan.*, 29, 1), which was then drawn through the principal parts of the city. The old men carried olive-branches in their hands, whence they were called Thallophori (Θαλλοφόροι); and the young men appeared with arms in their hands, at least in the time of Hipparchus (*Thucyd.*, 6, 65). The young women carried baskets on their heads, whence they were called Canephori (Κανηφόροι). The sacrifices were very numerous on this occasion. During the supremacy of Athens, every subject state had to furnish an ox for the festival. (*Schol. ad Aristoph., Nub.*, 385.) It was a season of general joy; even prisoners were accustomed to be liberated, that they might take part in the general rejoicing. (*Schol. ad Demosth., Timocr.*, p. 184.) After the battle of Marathon, it was usual for the herald at the Great Panathenæa to pray for the good of the Plataans as well as the Athenians, in consequence of the aid which the former had afforded to the latter in that memorable fight. The procession which has just been described formed the subject of the bas-reliefs which embellished the exterior of the Parthenon, and which are generally known by the name of the Panathenæic frieze. A considerable portion of this frieze, which is one of the most splendid of the ancient works of art, is now in the British Museum, and belongs to the collection called the "Elgin Marbles."—A full and detailed account of the Panathenæic festivals is given by Meursius in a treatise on the subject, which is printed in

the seventh volume of the "Thesaurus" of Gronovius. *Encycl. Us. Knowl.*, vol. 17, p. 182.)

PANCHAIA, a fabled island in the Eastern or Indian Ocean, which Euhemerus pretended to have discovered, and to have found in its capital, Panara, a temple of the Triphylian Jupiter, containing a column inscribed with the date of the births and deaths of many of the gods. (*Vid. Euhemerus*.)—Virgil makes mention of Panchaia and its "*turifera arena*." (*Georg.*, 3, 139.) The poet borrows the name from Euhemerus, but evidently refers to Arabia Felix. (Compare *Heyne* and *Voss*, *ad loc.*)

PANDARUS, son of Lycaon, and one of the chieftains that fought on the side of the Trojans in the war with the Greeks. He led the allies of Zelea from the banks of the Æsepus in Mysia, and was famed for his skill with the bow. (*Il.*, 2, 824, *seqq.*) It was Pandarus that broke the truce between the Greeks and Trojans by wounding Menelaus. (*Il.*, 4, 93, *seqq.*) He was afterward slain by Diomedes. (*Il.*, 5, 290.) In one part of the *Iliad* (5, 105) he is spoken of as coming from Lycia, but the Lycia there meant is only a part of Troas, forming the territory around Zelea, and inhabited by Lycian colonists. (Consult *Eustath.* *ad Il.*, 2, 824.—*Heyne*, *ad loc.*)

PANDATARIA, an island in the Mare Tyrrhenum, in the Sinus Puteolanus, on the coast of Italy. It was the place of banishment for Julia, the daughter of Augustus, and many others. It is now *Isola Vandotina*. (*Livy*, 53, 14.—*Mela*, 2, 7.—*Pliny*, 3, 6.—*Itin. Marit.*, 615.)

PANDION, I. an early king of Athens, belonging to mythology rather than to history. He was the son of Erichthonius, and succeeded his father in the kingdom. In his reign Ceres and Bacchus are said to have come to Attica. The former was entertained by Celeus, the latter by Icarus. Pandion married Xeuxippe, the sister of his mother, by whom he had two sons, Erechtheus and Butes, and two daughters, Procne and Philomela. Being at war with Labdacus, king of Thebes, about boundaries, he called to his aid Tereus, the son of Mars, out of Thrace; and having, with his assistance, come off victorious in the contest, he gave him his daughter Procne in marriage, by whom Tereus had a son named Itys. The tragic tale of Procne and Philomela is related elsewhere. (*Vid. Philomela*.) Pandion is said to have died of grief at the misfortunes of his family, after a reign of 40 years. He was succeeded by Erechtheus. (*Apollod.*, 3, 14, 5, *seqq.*) The visit paid by Ceres and Bacchus to Attica, during the reign of Pandion, refers merely to improvements in agriculture which were then introduced. (*Wordsworth's Greece*, p. 96.)—II. The second of the name, was also king of Attica, and succeeded Cecrops II., the son of Erechtheus. He was expelled by the Metonids, and retired to Megara, where he married Pylia, the daughter of King Pylos. This last-mentioned monarch being obliged to fly for the murder of his brother Bias, resigned Megara to his son-in-law, and, retiring to the Peloponnesus, built Pylos. Pandion had four sons, Ægeus, Pallas, Nisus, and Lycus, who conquered and divided among them the Attic territory, Ægeus, as the eldest, having the supremacy. (*Apollod.*, 3, 15, 4.—Consult *Heyne*, *ad loc.*)

PANDORA, the first created female, and celebrated in one of the early legends of the Greeks as having been the cause of the introduction of evil into the world. Jupiter, it seems, incensed at Prometheus for having stolen the fire from the skies, resolved to punish men for this daring deed. He therefore directed Vulcan to knead earth and water, to give it human voice and strength, and to make it assume the fair form of a virgin like the immortal goddesses. He desired Minerva to endow her with artist-knowledge, Venus to give her beauty, and Mercury to inspire her with an impudent and artful disposition. When form-

ed, she was attired by the Seasons and Graces, and each of the deities having bestowed upon her the commanded gifts, she was named Pandora (*All-gifted*—*πᾶν*, *all*, and *δῶρον*, *a gift*). Thus furnished, she was brought by Mercury to the dwelling of Epimetheus; who, though his brother Prometheus had warned him to be on his guard, and to receive no gifts from Jupiter, dazzled with her charms, took her into his house and made her his wife. The evil effects of this imprudent step were speedily felt. In the dwelling of Epimetheus stood a closed jar, which he had been forbidden to open. Pandora, under the influence of female curiosity, disregarding the injunction, raised the lid, and all the evils hitherto unknown to man poured out, and spread themselves over the earth. In terror at the sight of these monsters, she shut down the lid just in time to prevent the escape of Hope, which thus remained to man, his chief support and comfort. (*Hesiod, Op. et D.*, 47, *seqq.*—*Id.*, *Theog.*, 570, *seqq.*)—An attempt has frequently been made to trace an analogy between this more ancient tradition and the account of the fall of our first parents, as detailed by the inspired penman. Prometheus, or *forethought*, is supposed to denote the purity and wisdom of our early progenitor before he yielded to temptation; Epimetheus, or *after-thought*, to be indicative of his change of resolution, and his yielding to the arguments of Eve; which the poet expresses by saying that Epimetheus received Pandora after he had been cautioned by Prometheus not to do so. The curiosity of Pandora violated, it is said, the positive injunction about not opening the jar, just as our first parent Eve disregarded the commands of her Maker respecting the tree of knowledge. Pandora, moreover, the author of all human woes, is, as the advocates for this analogy assert, the author likewise of their chief, and, in fact, only solace; for she closed the lid of the fatal jar before Hope could escape; and this she did, according to Hesiod, in compliance with the will of Jove. May not Hope, they ask, thus secured, be that hope and expectation of a Redeemer which has been traditional from the earliest ages of the world? Even so our first parents commit the fatal sin of disobedience, but from the seed of the woman, who was the first to offend, was to spring one who should be the hope and the only solace of our race.—All this is extremely ingenious, but, unfortunately, not at all borne out by the words of the poet from whom the legend is obtained. The jar contains various evils, and, as long as it remains closed, man is free from their influence, for they are confined closely within their prison-house. When the lid or top is raised, these evils fly forth among men, and Hope alone remains behind, the lid being shut down before she could escape. Here, then, we have man exposed to suffering and calamity, and *no hope* afforded him of a better lot, for Hope is imprisoned in the jar (*ἐν ἀρήκτοις δόμοις . . . πίδου ὑπὸ χειλέσιν*), and has not been allowed to come forth and exercise her influence through the world. Again, how did Hope ever find admission into the jar? Was it placed there as a kindred evil? It surely, then, could have nothing to do with the promise of a Redeemer. Or, was it placed in the jar to lure man to the commission of evil, by constantly exciting dissatisfaction at the present, and a hope of something better in the future? This, however, is not hope, but discontent. Yet the poet would actually seem to have regarded hope as no better than an evil, since, after stating that the exit of Hope from the jar was arrested by the closing of the lid, he adds, "but countless other woes wander among men" (*ἔλλα δὲ μὲν πᾶσι λυγρὰ κατ' ἀνθρώπων ἀλάλγεται*, v. 100). It is much more rational, then, to regard the whole legend as an ebullition of that spleen against the female sex occasionally exhibited by the old Grecian bards. The resemblance it bears to the Scripture account is very unsatisfactory:

Eve was tempted, Pandora was not; the former was actuated by a noble instinct, the love of knowledge, the latter by mere female curiosity.—It seems very strange that the ancients should have taken so little notice of this myth. There is no allusion to it in Pindar or the tragedians, excepting Sophocles, one of whose lost satyric dramas was named "Pandora, or the Hammerers." It was equally neglected by the Alexandrians. Apollodorus merely calls Pandora the first woman. In fact, with the exception of a dubious passage in Theognis (*Paran.*, 1135, *seq.*), where Hope is said to have been the only good deity that remained among men, we find no allusion to it in Grecian literature except in the fables of Babrius, in Nonnus (*Dionys.*, 7, 56), and in the epigrammatic Macedonius. (*Anthol. Palat.*, 10, 71.) It seems to have had as little charms for the Latin poets, even Ovid passing over it in silence.—It is also deserving of notice, that Hesiod and all the others agree in naming the vessel which Pandora opened a *jar* (*πίθος*), and never hint at her having brought it with her to the house of Epimetheus. Yet the idea has been universal among the moderns, that she brought all the evils with her from heaven, shut up in a *box* (*πυξίς*). The only way of accounting for this is, that, at the restoration of learning, the narrative in Hesiod was misunderstood. (*Keightley's Mythology*, p. 292, *seqq.*—*Buttmann, Mythologus*, vol. 1, p. 48, *seqq.*)

PANDOSIA, I. a city of Lucania, in Lower Italy, on the banks of the Aciris, and not far from Heraclea. The modern *Anglona* is thought to represent the ancient place. (*Cramer's Anc. Greece*, vol. 2, p. 351.)—II. A city in the territory of the Bruttii, near the western coast, and often confounded with the preceding. It was anciently possessed by the Ænetri, as Strabo reports, but is better known in history as having witnessed the defeat and death of Alexander, king of Epirus. (*Strabo*, 255.—*Liv.*, 39, 38.)—The precise position which ought to be assigned to the Brutian Pandosia remains yet uncertain. The early Calabrian antiquaries placed it at *Castel Franco*, about five miles from *Consenza*. D'Anville lays it down, in his map of ancient Italy, near *Lao* and *Cirella*, on the confines of Lucania. Cluverius supposes that it may have stood between Consentia and Thurii; but more modern critics have, with greater probability, sought its ruins in a more westerly direction, near the village of *Mendocino*, between Consentia and the sea, a hill with three summits having been remarked there, which answers to the fatal height pointed out by the oracle,

Πανδοσία τρικέλυνη, πολὺν ποτε λαὸν ἐλέσσεις,

together with the rivulet *Maresanto* or *Arconti*, which last name recalls the Acheron, denounced by another prediction as so inauspicious to the Molossian king. (*Cramer's Anc. Italy*, vol. 2, p. 436.)—III. A city of Epirus, not far removed from the Acheron and the Acherusian Lake, as we may infer from the passage in which Livy speaks of this city with reference to the oracle delivered to Alexander, king of Epirus (8, 24). It is not improbable that the antiquities which have been discovered at *Paramythia*, on the borders of the *Souliot* territory, may belong to this ancient place. (*Hughes's Travels*, vol. 2, p. 306.—*Holland's Travels*, vol. 2, p. 251.—*Strabo*, 324.—*Plin.*, 4, 1.—*Cramer's Anc. Greece*, vol. 1, p. 132.)

PANDROSOS, a daughter of Cecrops, king of Athens, sister to Aglauros and Herse. For an explanation of the name, consult remarks under the article Cecrops.

PANGÆUS, a celebrated ridge of mountains in Thrace, apparently connected with the central chain of Rhodope and Hæmus, and which, branching off in a southeasterly direction, closed upon the coast at the defile of Acontisma. The name of this range often appears in the poets. (*Pind.*, *Pyth.*, 4, 319.—*Æsch.*, *Pers.*, 500.—*Eurip.*, *Rhes.*, 972.—*Virg.*, *Georg.*, 4,

462.) It is now called *Pandher Dagh*, or *Castagnats*, according to the editor of the French *Strabo*. Herodotus informs us (7, 112), that Mount Pangæus contained gold and silver mines, which were worked by the Pieres, Odomanti, and Satræ, clans of Thrace, but especially the latter. Euripides confirms this account (*Rhes.*, 919, *seqq.*). These valuable mines naturally attracted the attention of the Thasians, who were the first settlers on this coast; and they accordingly formed an establishment in this vicinity at a place named Crenides. (*Vid. Philippi*.)—Theophrastus speaks of the *rosa centifolia*, which grew in great beauty and was indigenous on Mount Pangæus (*ap. Athen.*, 15, 29). Nicander mentions another sort, which grew in the gardens of Mides (*ap. Athen.*, 16, 31.—*Cramer's Anc. Greece*, vol. 1, p. 302).

PANIONIUM, a sacred spot, with a temple and grove, at the foot of Mount Mycale in Ionia. It derived its name from having been the place where delegates from the Ionian states were accustomed to meet at stated periods. Not only the place, but also the temple and the assembly itself were called Panionium. The temple was dedicated to the Heliconian Neptune, whose worship had been imported by the Ionians from Achæia in Peloponnesus; and the surname of Heliconian was derived from Helice, one of their cities in that country. (*Strab.*, 639.—*Pausan.*, 7, 24.) But the assembly was not merely convened for religious purposes: it was also a political body, and met for deliberative and legislative ends; and it appears that some remnants of this ancient institution were preserved till very late in the Roman empire, if it be true, as Chandler imagines, that there is a medal of the Emperor Gallus which gives a representation of a Panionian assembly and sacrifice. (*Travels*, p. 192.) The site of this celebrated convention is supposed, with great probability, to answer to that of *Tchangeli*, a Turkish village close to the sea, and on the northern slope of Mycale. (*Cramer's Asia Minor*, vol. 1, p. 379.)

PANIUM (Πάνιον ὄρος), a mountain of Syria, forming part of the chain of Mount Libanus. It makes part of the northern boundary of Palestine, and at the foot of it was situate the town of Paneas, afterward called *Cæsarea Philippi*. Herod, out of gratitude for having been put in possession of Trachonitis by Augustus, erected a temple to that prince on the mountain. On the partition of the states of Herod among his children, Philip, who had the district Trachonitis, gave to the city Paneas the name of *Cæsarea*, to which was annexed, for distinction's sake, the surname of *Philippi*. This did not, however, prevent the resumption of its primitive denomination, pronounced *Banias*, more purely than *Belines*, as it is written by the historians of the crusades. (*Josephus*, *Bell. Jud.*, 1, 21.—*Euseb.*, *Hist. Eccles.*, 7, 17.)—II. Panium (Πανιον), a cavern at the sources of the Jordan. (*Vid. Jordanes*.)

PANNONIA, an extensive province of the Roman empire, bounded on the west by the range of Mount Cælius, separating it from Noricum; on the south by Illyria, including in this direction the country lying along the lower bank of the Sava; and on the north and east by the Danube. It answered, therefore, to what is now the eastern part of *Austria*, *Styria*, a part of *Carinthia*, that portion of *Hungary* which lies on the southern side of the Danube, the greater part of *Sclavonia*, and the portion of *Boemia* which lies along the Saave. Ptolemy distinguishes between Upper and Lower Pannonia, *Pannonia Superior* and *Inferior*, and separates the two divisions by an imaginary line drawn from Bregactium to the Sava. In the fourth century, the Emperor Galerius formed out of a part of Lower Pannonia the province of *Valeria*, and then *Pannonia Superior* changed its name to that of *Pannonia Prima*, while the part of *Pannonia Inferior* that remained after *Valeria* was taken from it, received the appellation

of *Pannonia Secunda*.—The Pannonii were of Illyrian origin, and their earlier seats extended from the river Colapis, on the southern side of the Savus, in a south-easterly direction, as far as the Dardanii and the confines of Macedonia. With one branch of their race, under the name of Pœones, the Greeks were acquainted from an early period, along the southern coast of Thrace. That the Pœones, however, were one and the same race with the distant Pannonii to the northwest, they first discovered at a later period, and from this time the appellation of Pœones was applied by the Grecian historical writers to both divisions. (*Mannert, Geogr.*, vol. 3, p. 502.—*Cramer's Anc. Greece*, vol. 1, p. 46.) The Romans, on the other hand, becoming acquainted with the race from the west, learned the name Pannonii as the national appellation, and retained it as such. The etymology assigned to this name by some, from the patches (*pæni*) of which their long-sleeved tunics were formed, is too ridiculous to require refutation. (*Dio Cass.*, 49, 36.) They were reduced under the Roman sway in the reign of Augustus, especially during the campaigns of Tiberius and Drusus; and, after their subjection, were transplanted to the country beyond the Savus, which had been occupied by the Scordisci, and which now received from them the name of Pannonia. The Pannonians becoming, in process of time, completely Romanized in laws, customs, and language, served as a rampart that might be confided in against the Sclavonian lazyges and the Marcomanni, beyond the Danube.—After the fall of the Roman empire, Pannonia passed under the power of the barbarians, especially the Huns, Avars, and Bulgarians. (*Mannert, Geogr.*, vol. 3, p. 304.) The chief city in Pannonia Superior was Carnuntum, now *Allenbourg*, a little to the east of Vindobona or Vienna. The chief city in Pannonia Inferior was Sirmium.

PANOPHÆUS, a surname of Jupiter, from his being the parent source of omen and augury, "*omnium omnique vaticinium auctor*." (*Heyne ad Il.*, 8, 250.)

PANŌPE or PANOPĒA, one of the Nereids, named by Virgil as a representative of the whole number, and often invoked by mariners. (*Hesiod, Theog.*, 250.—*Virg., Georg.*, 1, 437.—*Id., Æn.*, 6, 240, &c.)

PANOPŌLIS, a city of Egypt in the Thebaid, on the eastern bank of the Nile, and south of Antæopolis. It was the capital of the Panopolitic Noma, and, as its name implies, sacred to the god Pan ("City of Pan"). According to the later traditions, however, it would seem to have been sacred to the Pans or wood-deities collectively, and hence we find it in Strabo (812) designated by the appellation of Πανὸν πόλις. (Compare *Diod. Sic.*, 1, 18.—*Plut., de Is. et Os.*) In some of the subsequent writers we find the place called *Panos*, the term *polis* being omitted. (*Ilin. Ant.*, p. 166.) The name Panopolis (Πανὸς πόλις) is supposed to be merely a translation of the Egyptian term *Chemmis*, by which this city was known to the natives of the land. This Chemmis, however, must not be confounded with the place of that name mentioned by Herodotus (2, 91), and by which that historian intends evidently to designate Coptos. (*Mannert, Geogr.*, vol. 10, pt. 1, p. 374.) The modern *Akhenyn* is supposed to occupy part of the site of the ancient Panopolis. (*Description de l'Égypte*, vol. 4, p. 43, *seqq.*)

PANORMUS, I. now called *Palermo*, a town of Sicily, built by the Phœnicians, on the northwest part of the island, with a good and capacious harbour. The ancient name is derived from the excellence and capaciousness of its harbour (πᾶς ὁμοῦς), and is equivalent to *All-Port*. (*Diod. Sic.*, 23, 14.) It is uncertain, however, whether this name originated with the Greeks, or was merely a translation of the Phœnician one. From the Phœnicians Panormus passed into the hands of the Carthaginians, and was for a long period

an important stronghold of the latter people, though little noticed by the Grecian writers. Here was the chief station of their fleet, and here also were the winter quarters of their army. (*Polyb.*, 1, 21, 24.) It was taken by the Romans, with their fleet of 300 sail (A.U.C. 500), and carefully guarded by them to prevent its again falling into the hands of the foe. (*Polyb.*, 1, 38.) It was subsequently ranked among the free cities of Sicily. (*Cic. in Verr.*, 3, 6.—*Mannert, Geogr.*, vol. 9, pt. 2, p. 400.)—II. A harbour on the eastern coast of Attica, south of the promontory of Cynossema, and opposite to the southern extremity of Eubœa. It is now *Porto Raphia*.—III. A harbour on the coast of Achaia, east of Rhium and opposite Naupactus. It is now *Teket*. (*Thucyd.*, 2, 86.—*Plin.*, 4, 5.)—IV. A name given to the harbour of Epheus. (*Mela*, 2, 7.)—V. A harbour in Crete, between Rithymna and Cytæum. (*Plin.*, 4, 12.)—VI. A town in the Thracian Chersonese, between Cardis and Cœlos. (*Plin.*, 4, 11.)

PANSA, C. Vibius, consul with Hirtius the year after Cæsar's assassination, B.C. 43. He had previously served under Cæsar in Gaul, and had aided him as tribune of the commons in attaining to sovereign power. Though Pansa and Hirtius had obtained the consulship through Cæsar's nomination, they nevertheless joined the party of the senate after the death of the dictator, and marched against Antony, who was besieging Brutus in Mutina. In the first engagement Antony had the advantage, and Pansa received two mortal wounds; but Antony himself was defeated the same day by Hirtius as he was returning to his camp. In a second engagement Hirtius also fell.—It was a current report at the time, that Glycon, the physician in attendance on Pansa, having been gained over by Octavius, had taken off the Roman consul by poisoning his wounds. (*Sueton., Vit. Aug.*, 11.) Another account stated that Pansa, finding his wounds mortal, sent for Octavius, and engaged him to become reconciled to Antony, unfolding to him, at the same time, the project of the senate, which was to destroy the partisans of Cæsar by means of one another. Pansa appears to have been a worthy man, and esteemed by Cicero, who, without sharing his political sentiments, lived on terms of intimacy with him. (*Biogr. Univ.*, vol. 32, p. 496.)

PANTAGFAS, a small river on the eastern coast of Sicily, which falls into the sea between Megara and Syracuse, according to Pliny (3, 8), after running a short space in rough caecades over a rugged bed. (*Virg. Æn.*, 3, 689.) Ptolemy writes the name Πάνταγας, and Thucydides Παντακίος (6, 4).

PANTHĒA, the wife of Abradates, celebrated for her beauty and conjugal affection. She slew herself on the corpse of her husband, who had fallen in battle on the side of the elder Cyrus. (*Æn., Cyrop.*, 4, 6, 11.—*Id. ib.*, 7, 3, 14.)

PANTHĒON (or PANTHĒON), a famous temple of a circular form, built by M. Agrippa, son-in-law of Augustus, in his third consulship, about 27 A.C., and repaired by Septimius Severus, and Caracalla. The architect was Valerius of Ostia. The structure consists of a rotunda, with a noble Corinthian octastyle portico attached to it. That the portico of the Pantheon indeed was erected by Agrippa, is testified by the inscription still remaining on the frieze. Yet some have supposed that he merely made that addition to the previously erected rotunda. Hirt, in his work on the Pantheon, very reasonably argues, that, there being no direct proof to the contrary, the whole structure may safely be assumed to have been erected according to one original plan, because without the portico it would have been a lumpish and heavy mass. Hirt farther rejects the idea of the rotunda's having been originally not a temple, but an entrance to public baths. It is certain that circular plans were greatly

affected by the Romans both in their temples and other buildings, on which account their architecture presents a variety that does not occur in that of Greece. —The structure was dedicated to Jupiter Ultor. Besides the statue of this god, however, there were in six other niches as many colossal statues of other deities, among which were those of Mars and Venus, the founders of the Julian line, and that of Julius Cæsar. About the other three we know nothing; but in all probability they were the images of Æneas, Iulus, and Romulus. The edifice was called the *Pantheon* (Πάνθεον or Πάνθεον), not, as is commonly supposed, from its having been sacred to all the gods (πᾶς, "all," and θεός, "a god"), but from its majestic dome, which represented, as it were, the "all-divine" firmament (πᾶν, "all," and θεῖον, "divine"). —The Pantheon is by far the largest structure of ancient times, the external diameter being 188 feet, and the height to the summit of the upper cornice 102, exclusive of the flat dome or calotte, which makes the entire height about 148 feet. The portico (103 feet wide) is, as has been said, octastyle, yet there are in all sixteen columns, namely, two at the returns, exclusive of those at the angles, and two others behind the third column from each end, dividing the portico, internally, into three aisles or avenues, the centre one of which is considerably the widest, and contains the great doorway within a very deep recess, while each of the others has a large semicircular tribune or recess. But, although, independently of its recessed parts, the portico is only three intercolumns in depth, its flanks present the order continued in pilasters, making two additional closed intercolumns, and the projection there from the main structure about 70 feet; which circumstance produces an extraordinary air of majesty. The columns are 47 English feet high, with bases and capitals of white marble, and granite shafts, each formed out of a single piece. The interior diameter of the rotunda is 142 feet, the thickness of the wall being 23 feet through the piers, between the exhedra or recesses, which, including that containing the entrance, are eight in number, and each, except that facing the entrance, is divided into three intercolumns by two columns (34.7 feet high), between antæ or angular pilasters. But as, besides being repaired and altered by Septimius Severus, the interior has undergone many changes, or, rather, corruptions, it is hardly possible now to determine what it originally was. —The dome has five rows of coffers (now stripped of their decorations), and a circular opening in the centre, 26 feet in diameter, which not only lights the interior perfectly, but in the most charming and almost magical manner. Indeed, there has scarcely ever been but one opinion as to the captivating effect thus produced, and the exquisite beauty of the whole as regards plan and general proportions. (*Encyclop. Us. Knowl.*, vol. 17, p. 192. — *Hirt, Geschichte der Baukunst*, vol. 2, p. 233, seqq.) The Pantheon is now commonly called the *Rotunda*, from its circular form. It was given to Boniface IV. by the Emperor Phocas in 609, and was dedicated as a Christian church to the Virgin and the Holy Martyrs, a quantity of whose relics were placed under the great altar. In 830 Gregory IV. dedicated it to all the saints. This consecration of the edifice, however, seems to have afforded it no defence against the subsequent spoliation, both of emperors and popes. The plates of gilded bronze that covered the roof, the bronze bassi relievi of the pediment, and the silver that adorned the interior of the dome, were carried off by Constant II. (A.D. 655), who destined them for his imperial palace at Constantinople; but, being murdered at Syracuse when on his return with them, they were conveyed by their next proprietors to Alexandria; and thus the spoils of the Pantheon, won from the plunder of Egypt after the battle of Actium, by a kind of poetical justice, reverted to their original

source. Urban the Eighth carried off all that was left to purloin, the bronze beams of the portico, which amounted in weight to more than forty-five millions of pounds. He records his plunder with great complacency in an inscription on the walls of the portico, as if it were a meritorious deed; seeming to pride himself on having melted it down into the frightful tabernacle of St. Peter's, and the useless cannon of the castle of St. Angelo. Urban, who was one of the Barberini family, also gave a share of it to his nephew, for the embellishment of the Barberini palace; and this gave rise to the pasquinade,

"Quod non fecerunt Barbari fecere Barberini."

But he did more mischief by adding than by taking away, for he bestowed upon it two hideous belfries, as a perpetual monument of his bad taste. —Beautiful as the Pantheon is, it is not what it was. During eighteen centuries it has suffered from the dissipations of time and the cupidity of barbarians. The seven steps which elevated it above the level of ancient Rome are buried beneath the modern pavement. Its rotunda of brick is blackened and decayed; its leaden dome, overlooked by the modern cupolas of every neighbouring church, boasts no imposing loftiness of elevation; the marble statues, the bassi relievi, the brazen columns, have disappeared; its ornaments have vanished; its granite columns have lost their lustre, and its marble capitals their purity; all looks dark and neglected, and its splendour is gone for ever. Yet, under every disadvantage, it is still beautiful, pre-eminently beautiful. No eye can rest on the noble simplicity of the matchless portico without admiration, and without feeling, what is so rarely felt, that there is nothing wanted to desire, nothing committed to rectify. Its beauty is of that sort which, while the fabric stands, time has no power to destroy. (*Rome in the Nineteenth Century*, vol. 1, p. 254.)

PANTHEUS, or PANTHŪS, a Trojan, son of Othryas, and priest of Apollo. He fell in the nocturnal combat described by Virgil as attendant on the taking of Troy (*Æn.*, 2, 429). He was father of Polydamas, Euphorbus, and Hyperenor. (*Hom.*, *Il.*, 3, 146; 15, 522.) The story which Servius, and also Eustathius relate, of Panthus's having been by birth a Delphian, and of his having been brought away from Delphi to Troy to explain an oracle for King Priam, is a fiction of the posthomeric bards. (*Eustath.* ad *Il.*, 12, 725. — *Heyne ad Virg.*, *Æn.*, 2, 318.)

PANTHOÏDES, a patronymic of Euphorbus, the son of Pantheus. (*Vid.* Euphorbus. — *Horat.*, *Od.*, 1, 28, 10.)

PANTICAPÆUM, a city in the Tauric Chersonese, on the shore of the Cimmerian Bosphorus, and opposite to Phanagoria on the Asiatic shore. Ptolemy gives the name as *Panticapæa* (Παντικαπæα). It was founded by a Milesian colony, and lay on a hill, and was in circumference 20 stadia. On the east side was a good harbour, and also an inner and stronger one (νέσπιον). This place was the capital of the kings of Bosphorus, and was also known by the name of Bosphorus as early as the time of Demosthenes. Some writers erroneously distinguish between the two appellations, as if they belonged to different cities. (*Eutrop.*, 7, 9.) The modern *Kertsch* lies near the site of the ancient Panticapæum. (*Mannert, Geogr.*, vol. 4, p. 307, seqq.) Here Mithradates the Great ended his days.

PANYASIS, a native of Samos, or, according to others, of Halicarnassus (for his country is uncertain; we only know that he was an uncle of Herodotus). He flourished about 490 B.C., and was regarded as an excellent epic poet, the Alexandrian critics having subsequently assigned him the fourth place in the Epic canon. He was the author of an *Heracleid*, in fourteen books, to which, according to Valckenaer's conjecture, belong two

fragments found in the collection of the works of Theocritus, but which others attribute to Pisander. Both parties, however, agree in regarding them as worthy of a writer of the first merit, and above the strength of Theocritus. Hermann, however, does not adopt this opinion. He recognises, it is true, in these pieces an imitation of Homer; but he discovers in the prosody certain licenses which were unknown to the epic poets, and only introduced by the bucolic ones. (*Orphica*, ed. Hermann, p. 691.) Besides, these pieces are written in Doric, whereas Panyasis made use of the Ionic dialect. According to Suidas, he also composed Elegies entitled *Ἰωνικά*. There exist, likewise, some other fragments of Panyasis. They are all found in the collections of Winterton, Gaisford, and Boissonade. (*Schöll, Hist. Lit. Gr.*, vol. 2, p. 121. — *Müller, Die Dörner*, vol. 2, p. 471, German work.)

ΠΑΡΦΙΑ, I. a surname of Venus, because worshipped at Paphos.—II. An ancient name of the island of Cyprus.

ΠΑΦΛΑΓΟΝΙΑ (*Παφλαγονία*), a province of Asia Minor, also called Pylamonia, according to Pliny (6, 2). It was bounded on the north by the Euxine, on the south by the part of Phrygia afterward called Galatia, on the east by Pontus, and on the west by Bithynia. It was separated from Bithynia by the river Parthenius, and from Pontus by the Halys, which was also its eastern boundary in the time of Herodotus (1, 6). Paphlagonia is described by Xenophon (*Anab.*, 5, 6, 6) as a country having very beautiful plains and very high mountains. It is traversed by two chains of mountains running parallel to one another from west to east. The higher and more southerly of these chains, called Olgassys by Ptolemy, is a continuation of the great mountain chain which extends from the Hellespont to Armenia, and was known to the ancients under the names of Ida and Temnon in Mysia, and Olympus in the neighbourhood of Prusias. Strabo, however, appears to give the name of Olgassys to the chain of mountains in the northern part of Paphlagonia, on which the Paphlagonians had built many temples. The country between these two chains is drained by the Amnias, which flows into the Halys. The only river of importance, besides the Amnias and the Halys, was the Parthenius, which is said by Xenophon to be impassable (*Anab.*, 5, 6, 9). In the neighbourhood of Pompeiopolis, in the central part of the province, was a mountain called Sandaracurgium, where, according to Strabo (562), sandaraca was obtained in mines, which were worked by criminals, who died in great numbers on account of the unhealthiness of the labour. The sandaraca spoken of by Strabo was probably the same as sinopia, which was a kind of red ochre, obtained by the Greeks from Sinope, from which place it derived its name.—The Paphlagonians are said by Homer (*Il.*, 2, 851, *seq.*) to have come to the assistance of the Trojans under the command of Pylamenes, from the country of the Heneti. This mention of the Heneti in connexion with the Paphlagonians seems to have puzzled some of the ancient writers. Several explanations of the passage were given; but the one which appeared most probable to Strabo (544) was, that the Heneti were a Paphlagonian people, who followed Pylamenes to Troy, and after the death of their leader emigrated to Thrace, and at length wandered to Italy, where they settled under the name of Veneti. Pliny (6, 2) also connects the Heneti of Homer with the Veneti of Italy, upon the authority of Cornelius Nepos. Few modern critics, however, will be disposed to attach much credit to a rambling story of this kind, which seems to have arisen merely from the similarity of the two names. (*Vid.* Veneti.)—The Paphlagonians were subdued by Croesus. (*Herod.*, 1, 28.) They afterward formed a part of the Persian empire, and were governed by a satrap in the reign of Darius Hystaspis (*Herod.*, 7, 72);

but they appear in later times, like several other nations in the remote parts of the Persian empire, to have been only nominally subjects. On the return of the Ten Thousand we find that they were governed by Corylae, who does not appear to have been a satrap (Xenophon calls him *ἀρχὴν*, *Anab.*, 6, 1, 2), and who did not hesitate to afford assistance to the Greeks. After the death of Alexander, Paphlagonia, together with Cappadocia, fell to the share of Eumenes. (*Diad. Sic.*, 18, 3.) It subsequently formed part of the kingdom of Pontus; but, after the conquest of Pontus by the Romans, it appears to have been allowed to have kings of its own, the last of whom was Deiotarus, the son of Castor. (*Strabo*, 564.) Under the early Roman emperors it did not form a separate province, but was united to Galatia till the time of Constantine, who first erected it into a separate province. (*Encycl. Us. Knowl.*, vol. 17, p. 216.)—The chain of mountains in the southern part of Paphlagonia was covered with forests, which yielded abundance of excellent timber for ship-building, and various kinds of wood for tables and other ornamental works. They contained also salt-mines. Eudoxus reports that fossil fish were likewise to be found in some parts of the country. (*Strabo*, 561, 563.) The plains afforded rich pastures for horses and cattle, and the mules of the Paphlagonian Heneti were celebrated as early as the days of Homer (*Il.*, 2, 852). The sheep of the country adjoining the Halys furnished wool much esteemed for the fineness of its quality (*Strabo*, 546); and the Euxine, along the whole extent of coast, supplied great quantities of excellent fish; especially the kind of tunny called pelamys. (*Strabo*, 545.—*Athenaeus*, 7, p. 307.)—Cramer thinks that the Paphlagonians were of the same race with the Bithyni, Mysi, and Phryges; that is, that they were a Thracian people, and that they came in from the West, driving the Leuco-Syri from the country, and finally compelling them to retire beyond the Halys. (*Cramer's Asia Minor*, vol. 1, p. 217, *seqq.*)

ΠΑΦΟΣ, I. Palepaphos (Old Paphos), a very ancient city of Cyprus, on the southwestern side of the island, situate on a rising ground near the little river Bocarus. (*Hesych.*, s. v. *Βόκαρος*.) Strabo places it ten stadia from the coast. It was peculiarly famed for the worship of Venus, who was fabled to have been wafted hither after her birth amid the waves. (*Mela*, 2, 7.—*Tacitus, Hist.*, 2, 3.) The Grecian writers give, as the founder of the place, Cinyras the son of Apollo, or Paphos the son of Cinyras, about the time of the Trojan war. Apollodorus also makes Cinyras to have been a Syrian monarch (3, 14.—Compare *Heyne, ad loc. Obs.*, p. 325). Tacitus makes it to have been founded by Aërias; at least he names him as the founder of the temple; he adds, however, that a later tradition assigns the origin of the temple to Cinyras. (*Hist.*, 2, 3.—*Ann.*, 3, 62.) Eusebius carries back the founding of the city to the time of the Hebrew Gideon. (*Chron.*, n. 590.)—The Phœnician or Syrian origin of the place was clearly shown by the worship established here; for Venus Urania was here adored under the same attributes and with the same licentiousness as the Syrian goddess at Ascalon, Emesa, and elsewhere in that country. The effigy of the goddess was not of human shape. She was represented under the form of a white, round, conical stone. (*Tyrius Max. Diss.*, 38.—*Tacit., Hist.*, 2, 3.—*Clem. Alex., protrept.*, 29, *seqq.*) The office of high-priest was next in rank to the regal dignity. The worship of the goddess continued long after the ancient city was completely sunk in importance, and had been supplanted by the Paphos of later origin. Annual processions were still made to the earlier temple, which was regarded as the most sacred of any, and acquired great fame by an oracle connected with it.—Pococke found many ruins on this ancient site.

(Mannert, *Geogr.*, vol. 6, pt. 1, p. 584, *seqq.*)—II. Neapophos (New Paphos), a city of Cyprus, on the western coast of the island, and north of Palæpophos. According to Strabo (683), the distance between the two places was sixty stadia, while the Peutinger Tables give eleven miles. The place had a good harbour, was adorned with handsome temples, and was the capital of a separate principality. (*Diod. Sic.*, 20, 21.) Under the Roman sway, it was the chief city of the whole western coast. Strabo and Pausanias (8, 5) make the Arcadian Agapenor to have been the founder of the place, having been driven hither by a storm on his return from Troy. Stephanus of Byzantium asserts, that the previous name of this city was Erythra; and, if he be correct, Agapenor could only have enlarged and strengthened it. Paphos suffered severely from earthquakes, and particularly from one in the reign of Augustus. That emperor not only aided the suffering inhabitants, but also directed the city, when rebuilt, to be called by his name. The earlier appellation, however, eventually prevailed. Strabo and Ptolemy make no mention of any Augusta, but merely of a city called Paphos. It appears from Tacitus, that the worship of Venus was yet remaining in the reign of Titus, who visited Paphos, and made many inquiries about the rites and customs of the place. (*Tacit., Hist.*, 2, 2.—*Id.*, *Ann.*, 3, 62.—*Sueton.*, *Vit. Tit.*, 5.) Paphos appears in later writings, both civil and ecclesiastical, as an episcopal town, and one of the most noted in the island. The site is yet marked by some ruins, and the name of *Baffo* serves sufficiently to attest their identity. (*Cramer's Asia Minor*, vol. 2, p. 376.—Mannert, *Geogr.*, vol. 6, pt. 1, p. 585.) For an account of the remains of antiquity in this quarter, consult *Turner's Tour in the Levant*, vol. 2, p. 557.

PAPIA LEX, I. *de peregrinis*, by C. Papius Celsus, tribune of the commons, A.U.C. 638, which required that all foreigners should depart from Rome, excepting those who were inhabitants of Italia Propria. (*Dio Cass.*, 37, 9.—*Cic.*, *de Off.*, 3, 11.—*Heinecc.*, *Antiq. Rom.*, p. 345, *ed. Haubold.*)—II. Another, called *Papia Poppæa*, because it was proposed by the consuls Papius and Poppæus, A.U.C. 762. It was passed at the desire of Augustus, and enforced and enlarged the Julian law for promoting population, and repairing the desolation occasioned by the civil wars. (*Vid. Julia lex de maritandis ordinibus.*)

PAPIAS, one of the early Christian writers in the Greek language, was bishop of Hierapolis in Asia at the beginning of the second century. According to Cave, he flourished in the year 110; according to others, in 115 or 116. He wrote a work in five books, entitled "*An Explanation of the Words (or Oracles) of the Lord*," which is now lost. In a passage of this work, quoted by Eusebius, Papias professes to have taken great pains to gain information respecting Christianity from those who had known the Apostles, and some remarkable statements of his respecting the Apostles and Evangelists are still preserved. According to Irenæus, he was himself a hearer of John and a companion of Polycarp. He is said by Eusebius to have been a Millenarian, and a man of little mind, "as appears," says Eusebius, "from his own writings." (*Euseb.*, *Hist. Eccles.*, 3, 39.—*Cave*, *Hist. Lit.*, s. v.—*Lardner's Credibility*, pt. 2, c. 9.)

PAPINIUS, Æmilius, a celebrated Roman lawyer. He was born A.D. 175, and was a pupil of the jurist Q. Cervidius Scaevola at the same time with Septimius Severus, afterward emperor. Under Marcus Aurelius he held the office of *advocatus fisci*, in which he succeeded S. Severus. After Severus became emperor, Papinian was his *libellorum magister* and *præfectus prætorio*; and the monarch had so high an opinion of him, that at his death he recommended his sons Caracalla and Geta to his care. The former,

having brutally murdered his brother Geta, enjoined on Papinian to compose a discourse in accusation of the deceased, in order to excuse his barbarity in the eyes of the senate and people. With this mandate the prefect not only refused to comply, but he nobly observed that it was easier to commit a parricide than to excuse it, and that slander of innocence was a second parricide. Caracalla, enraged by this refusal, secretly induced the prætorian guards to mutiny, and demand their leader's head; and, apparently to satisfy them, Papinian was executed in 212, and his body dragged through the streets of Rome. The reputation of Papinian as a lawyer was so high, that Valentinian III. ordered that, whenever the opinions of the judges were divided, Papinian's should be followed. The Roman law-students, too, when they had reached the third year of their studies (the whole number of years being five), were called Papinians (*Papinianiste*), and a festival was celebrated on the occasion of commencing his work. Papinian composed several works, among which were twenty-seven books of "*Questions on the Law*;" nineteen of "*Responses*" or "*Opinions*;" two of "*Definitions*;" two upon "*Adultery*;" and one upon the "*Laws of Ædiles*." Extracts from all his works are found in the "*Digest*." (*Schöll, Hist. Lit. Rom.*, vol. 3, p. 285.)

PAPIRÏ, the name of a patrician and plebeian gens in Rome, who were at first called Papii. (*Cic.*, *Ep. ad Fam.*, 9, 21.) This gens was divided into several families, such as the Mugillani, Crassi, Cursores, and Massones, and the most celebrated of the different individuals of these families was L. PAPIRIUS CURSOR. He was the grandson of the L. Papirius Cursor who was censor in the year in which Rome was taken by the Gauls, and son of Spurius Papirius Cursor, who was military tribune B.C. 379. (*Liv.*, 6, 27.)—We first read of L. Papirius Cursor as master of the horse to L. Papirius Crassus, who was created dictator B.C. 339, by the consul Manlius, in order to carry on the war against the Antiates. (*Liv.*, 8, 12.—*Cic.*, *Ep. ad Fam.*, 9, 21.) The time of his first consulship is doubtful. Livy mentions C. Postillius and L. Papirius Mugillanus as consuls B.C. 325; but he adds, that, instead of Papirius Mugillanus, the name of Papirius Cursor was found in some annals. (*Livy*, 8, 28.) During the year of their consulship the *Lex Pettia-Papiria* was passed, which enacted that no one should be kept in fetters or bonds except for a crime which deserved them, and only until he had suffered the punishment which the law provided; it also enacted that creditors should have a right to attach the goods, but not the persons, of their debtors. (*Liv.*, l. c.) In the following year, Papirius Cursor, who is said by Livy (8, 29) to have been considered at that time the most illustrious general of his age, was appointed dictator to carry on the war against the Samnites. He appointed Q. Fabius Maximus his master of the horse; and during his absence at Rome to renew the auspices, Fabius attacked the enemy contrary to his commands, and gained a signal victory. On his return to the camp he commanded Fabius to be put to death; but the soldiers espousing the cause of the latter, the execution was delayed till the following day, before which time Fabius had an opportunity of escaping to Rome, where he placed himself under the protection of the senate. The proceedings which followed are interesting to the student of the constitutional history of Rome, as they show that an appeal could be made to the people from the decision of a dictator, which is in accordance with a remark of Livy in another part of his history (3, 55), that, after the decemvirs were expelled from Rome, a law was passed, enacting that, in future, no magistrate should be made from whom there should be no appeal. Papirius demanded Fabius of the senate; and as neither the entreaties of

the senators nor those of the father of Fabius, who had been dictator and three times consul, could induce Papirius to pardon him, the father of Fabius appealed to the people, and at length, at the earnest entreaties of the people and the tribunes of the commons, the life of Fabius was spared. Papirius named a new master of the horse, and, on his return to the army, defeated the Samnites, and put an end to the war at the time. (*Liv.*, 8, 29, *seqq.*) Papirius was elected consul a second time, with Q. Publius Philo, in B.C. 320, and again defeated the Samnites; and apparently a third time in the following year, though there appears to be some doubt upon the latter point. (*Liv.*, 9, 7, *seqq.*) He was consul for the fourth time in B.C. 315 (*Liv.*, 9, 22), and for the fifth time in B.C. 313. (*Liv.*, 9, 38.) He was again named dictator in B.C. 309, to carry on the war against his old enemies the Samnites, whom he defeated with great slaughter, and obtained, on account of his victory, the honours of a triumph (*Liv.*, 9, 38, *seqq.*); after which time we find no more mention of him. Papirius Cursor, says Livy (9, 16), was considered the most illustrious man of his age, and it was thought he would have been equal to contend with Alexander the Great, if the latter, after the conquest of Asia, had turned his arms against Europe. (*Encycl. Use. Knowl.*, vol. 17, p. 218.)—II. One of this family received the surname of *Prætextatus*, from an action of his while still wearing the *prætexta*, or youthful gown, and before he had assumed the *toga virilis*, or gown of manhood. It was customary in those days for fathers to take their young sons to the senate-house when anything important was under discussion, in order that they might sooner become familiarized with public affairs. The father of young Papirius took him on one of these occasions, while a matter of considerable moment was pending; and it having been deemed advisable to adjourn the debate unto the morrow, an injunction of secrecy was laid upon all who were present. The mother of young Papirius wished to know what had passed in the senate; but the son, unwilling to betray the secrets of that assembly, amused his parent by telling her that it had been debated whether it would be more advantageous to the republic to give two wives to one husband, or two husbands to one wife. The mother of Papirius was alarmed, and she communicated the secret to the other Roman matrons, and on the morrow they assembled in large numbers before the senate-house, bathed in tears, and earnestly entreating that one woman might have two husbands rather than one husband two wives. The senators were astonished at so singular an application; but young Papirius modestly explained the cause, and the fathers, in admiration of his ready tact, passed a decree, that for the future boys should not be allowed to come to the senate with their fathers, except Papirius alone. This regulation continued until the time of Augustus, who rescinded it. (*Macrob.*, 1, 6.)

PAPPUS, a celebrated mathematician of Alexandria, who lived towards the end of the fourth century. He is known by his *Mathematical Collections* (*Μαθηματικὰ συναγώγαι*), in eight books, and by other works, among which were a Commentary on Ptolemy's *Almagest*, a work on Geography, a Treatise on Military Engines, a Commentary on Aristarchus of Samos, &c. His *Collections* have chiefly come down to us; of his other productions we have merely some fragments. The last five books of the *Collections* remain entire; the third is acephalous, wanting the commencement. Wallis published a fragment of the second. The first two books contained the Greek Arithmetic. What we have of the work is interesting, on account of the extracts it contains from works that are now lost, and it merits the careful perusal of those who make researches into the history of the exact sciences. Montucla ascribes to Pappus the first idea of the principle

often referred to by mathematicians, the use, namely, of the centre of gravity for the dimension of figures. We owe to Pappus also an elegant though indirect solution of the famous problem of the trisection of an angle. "Pappus," observes a writer in the *American Quarterly Review* (No. 21, p. 124), "is the only name worthy of note that occurs to fill up the great blank between Archimedes and the Italian mechanicians of the sixteenth century. He attempted to ascertain the principle of all the simple machines, in the same manner that his illustrious predecessor had that of the lever; his attention, however, was principally directed to the inclined plane. In this he failed, owing to the fundamental error upon which all his investigations proceeded, that some force was necessary to keep a body even on a plane of no inclination."—Only parts of the Greek text of the *Collections* have been published. We have a Latin version of six books, from the third to the end of the work, made by Commandino, an Italian mathematician of the sixteenth century. It was printed at Pesaro in 1588, fol., with a commentary by Ubaldi, and afterward revised by Manolesius, and reprinted at Bologna, 1660, fol. A fragment of the Greek text of the second book was given by Wallis at the end of his *Aristarchus*, *Oxon.*, 1688, 8vo, and in the third volume of his *Opera Mathematica*. The second part of the fifth book was published by Eisenmann, professor in "L'Ecole royale des ponts et chaussées," Paris, 1824, fol. A part of the preface of the seventh book is given in the *Prolegomena* of Gregory's *Euclid*, *Oxon.*, 1703, fol., and the entire preface in the edition of Apollonius of Perga, *Oxon.*, 1706, 8vo. Meibomius has inserted some lemmas from the seventh book in his *Dialogi de Proportionibus*, *Hafniae*, 1655, fol. (*Schöll, Hist. Lit. Gr.*, vol. 7, p. 49.—*Biogr. Univ.*, vol. 32, p. 538.)

ΠΑΡΑΤΛΑΞ or -ΤΑΞΗ, a people of Persia, occupying the mountain range between that country and Media. Their territory was called by the Greeks *Parastacene*, and Stephanus Byzantinus makes mention of a city in it by the name of *Parstaca* (p. 626.—*Diod. Sic.*, 19, 34.—*Arrian*, 3, 19.—*Plin.*, 6, 26).

ΠΑΡΑΤΟΝΙΟΝ, a strongly-fortified place, the frontier-city of Egypt on the side of Libya, and situate on the coast of the Mediterranean. It had, including its harbour, a circuit of about 40 stadia. (*Strab.*, 798.) Justinian repaired and strengthened it. (*Procop.*, *de Edif.*, 6, 2.) Strabo gives the distance from Alexandria at about 1300 stadia: Scylax makes it 1700, and Pliny 1600. Ptolemy removes *Paratonion* from Alexandria 3° 30', or 35 geographical miles.—The modern name is *Al Bareton*. (*Mannert, Geogr.*, vol. 10, pt. 2, p. 29, *seqq.*)

ΠΑΡΑΣΑΝΓΕΣ (*Παρασάγγης*), in Latin *Parasang*, a parasang, or Persian measure of length, which, according to Herodotus (2, 6; 5, 63; 6, 42), was equal to 30 stadia; and if we reckon eight stadia as equal to one English mile, the parasang was consequently equal to nearly four English miles. Hesychius and Suidas also give the length of the parasang at 30 stadia; and Xenophon must have calculated it at the same length, since he says (*Anab.*, 2, 2, 6) that 16,050 stadia are equal to 535 parasangs (16,050 ÷ 535 = 30). Pliny (6, 30), however, informs us, that the length of the parasang was reckoned differently by different authors; and Strabo (618) states, that some reckoned it at 60, others at 40, and others at 30 stadia. The Arabian geographers (*Freytag, Lex. Arab.*, s. v. *Farakh*) reckon it equal to three miles, which agrees with the statements of English travellers (quoted by *Rödiger*, in *Ersch and Gruber's Encyclopædie*), who estimate it variously at from 3½ to 4 English miles. Franklin (*Tour to Persia*, p. 17) reckons it at four miles: Ouseley (*Travels*, vol. 1, p. 23) at between 3½ and 3¾ miles; and Kinneir (*Geogr. of Persia*, p. 57) at 3½ miles.—*Parasang* is a Persian word, and is derived from the

ancient *Farsang*, which is pronounced in modern Persian *Ferseng*. It has been changed in Arabic into *Farsakh*. Various etymologies have been proposed for the term. The latter part of the word is thought to be the Persian *seng*, "a stone," and the term might thus be derived from the stones which were placed to mark the distances in the road. Bohlen (quoted by Rödiger) supposes the first part of the word to be the preposition *fera*, and compares the word with the Latin *ad lapidem*. (*Encycl. Us. Knowl.*, vol. 17, p. 241.)

ΠΑΡΚΑ, the Fates, called also *Fata*, and in Greek *Moirai* (*Moiræ*). In the *Iliad*, with the exception of one passage (20, 49), the *Moiræ* is spoken of in the singular number, and as a person, almost exactly as we use the word *Fate*. But in the *Odyssey* this word is employed as a common substantive, followed by a genitive of the person, and signifying *decree*. The *Theogony* of Hesiod limits the Fates, like so many other goddesses, to three, and gives them Jupiter and Themis for their parents. (*Theog.*, 904.) In an interpolated passage of the same poem (v. 217) they are classed among the children of Night; and Plato, on his part, makes them the daughters of Necessity. (*Rep.*, 10, 617.) Their names in Hesiod are Clotho (*Spinster*), Lachesis (*Allotter*), and Atropos (*Unchangeable*); but he does not speak of their spinning the destinies of men. This office of theirs is, however, noticed in both the *Iliad* and *Odyssey*. It is probable that Homer, in accordance with the sublime fiction in the *Theogony*, regarded the Fates as the offspring of Jupiter and Order, for in him they are but the ministers of Jupiter, in whose hands are the issues of all things. (*Nitzsch, ad Od.*, 3, 236.) Æschylus makes even Jupiter himself subject to the Fates. (*Prom. Vinc.*, 615.—*Keightley's Mythology*, p. 195.)—According to the popular mythology, Clotho held the distaff, Lachesis span each one's portion of the thread of existence, and Atropos cut it off; hence the well-known line expressing their respective functions:

"*Clotho colum retinet, Lachesis net, et Atropos occat.*"

The more correct explanation, however, is to make Clotho spin, Lachesis mark out each one's portion, and Atropos sever it.—The Latin writers indulge in various views of the functions of the *Parcæ*, as suggested by their own ingenuity of elucidation. Thus Apuleius (*De Mundo, sub fin.*) makes Clotho preside over the present, Atropos the past, and Lachesis the future; an idea probably borrowed from Plato, who introduces the *Moiræ* singing τὰ γυνόμενα, τὰ ὄντα, τὰ μέλλοντα. (*Rep.*, 10, 617.) So in the Scandinavian mythology, the Norns or Destinies, who are also three in number, are called *Urður*, *Verdandi*, and *Skuld*, or "Past," "Present," and "Future."—According to Fulgentius (*Mythol.*, 1, 7), Clotho presides over nativity, Atropos over death, and Lachesis over each one's lot in life.—The term *Moiræ* (*Μοῖραι*) comes from *μεῖω*, "to divide" or "portion out." The ordinary etymology for the word *Parcæ* deduces it by antiphrasis from *parco*, "to spare," because they never spare. (*Serv. ad Æn.*, 1, 26.—*Martian. Capell.*—*Donat.*—*Diomed.*, ap. *Voss.*, *Etymol.*) Varro derives it "a *pariendo*," because they presided over the birth of men (*Aul. Gell.*, 3, 16); or, to quote his own words, "*Parcæ, immutata litera una, a partu nominata.*" Scaliger makes it come from *parco*, "to spare," in a different sense from Servius and the other grammarians quoted above; because, according to him, only one of the Fates cuts the thread of existence, whereas of the other two, one gives life and the other prolongs it. Perhaps, after all, the best explanation (supposing the word *Parcæ* to be of Latin origin) is that which makes it come from *parco*, "to spare," not by antiphrasis, nor in accordance with Scaliger's notion, but because these deities were invoked in prayer to spare the lives

of mortals. (Consult *Scheller, Lat. Deutsch. Wörterb.*, s. v.)

ΠΑΡΙΣ, the son of Priam, king of Troy, by Hecuba, and also called *Alexander*. He was destined, even before his birth, to become the ruin of his country; and when his mother, being about to lie-in of him, had dreamed that she brought forth a torch which set all Ilium in flames, the soothsayer Æseus declared that the child would prove the ruin of his country, and recommended to expose it. As soon as born, the babe was given to a servant to be left on Ida to perish. The domestic obeyed, but, on returning at the end of five days, he found that a bear had been nursing the infant. Struck with this strange event, he took home the infant, reared him as his own son, and named him Paris. When Paris grew up he distinguished himself by his strength and courage in repelling robbers from the flocks, and the shepherds, in consequence, named him Alexander (*Man-protector*), or, according to the Greek form, Ἀλέξανδρος (ἀπὸ τοῦ ἀλέξειν τοὺς ἀνδρας). In this state of seclusion, too, he united himself to the nymph CEnone, whose tragical fate is elsewhere related. (*Vid. CEnone.*) Their conjugal happiness was soon disturbed. At the marriage of Peleus and Thetis, the goddess of Discord, who had not been invited to partake of the entertainment, showed her displeasure by throwing into the assembly of the gods who were at the celebration of the nuptials a golden apple, on which were written the words Ἡ καλὴ λαβέτω, "*Let the beauty (among you) take me.*" Juno, Minerva, and Venus laying claim to it, and Jove being unwilling to decide, the god commanded Mercury to lead the three deities to Mount Ida, and to intrust the decision of the affair to the shepherd Alexander, whose judgment was to be definitive. The goddesses appeared before him, and urged their respective claims, and each, to influence his decision, made him an alluring offer of future advantage. Juno endeavoured to secure his preference by the promise of a kingdom, Minerva by the gift of intellectual superiority and martial renown, and Venus by offering him the fairest woman in the world for his wife. To Venus he assigned the prize, and brought upon himself, in consequence, the unrelenting enmity of her two disappointed rivals, which was extended also to his whole family and the entire Trojan race. Soon after this event, Priam proposed a contest among his sons and other princes, and promised to reward the conqueror with one of the finest bulls of Mount Ida. Persons were sent to procure the animal, and it was found in the possession of Paris, who reluctantly yielded it up. The shepherd, desirous of obtaining again this favourite animal, went to Troy, and entered the lists of the combatants. Having proved successful against every competitor, and having gained an advantage over Hector himself, that prince, irritated at seeing himself conquered by an unknown stranger, pursued him closely, and Paris must have fallen a victim to his brother's resentment had he not fled to the altar of Jupiter. This sacred place of refuge preserved his life; and Cassandra, the daughter of Priam, struck with the similarity of the features of Paris to those of her brothers, inquired his birth and his age. From these circumstances she soon discovered that he was her brother, and as such she introduced him to her father and to his children. Priam, thereupon, forgetful of the alarming predictions of Æseus, acknowledged Paris as his son, and all enmity instantly ceased between the new-comer and Hector. Not long after this, at the instigation of Venus, who had not forgotten her promise to him, Paris proceeded on his memorable voyage to Greece, from which the soothsaying Helenus and Cassandra had in vain endeavoured to deter him. The ostensible object of the voyage was to procure information respecting his father's sister Hesione, who had been given in marriage by Hercules to his follower Telamon, the monarch of Salamis. The real motive,

however, which prompted the enterprise, was a wish to obtain, in the person of Helen, then the fairest woman of her time, a fulfilment of what Venus had offered him when he was deciding the contest of beauty. Arriving at Sparta, where Menelaüs, the husband of Helen, was reigning, he met with an hospitable reception; but, Menelaüs soon after having sailed away to Crete, the Trojan prince availed himself of his absence, seduced the affections of Helen, and bore her away to his native city, together with a large portion of the wealth of her husband. (Consult remarks under the article *Helena*.) Hence ensued the war of Troy, which ended in the total destruction of that ill-fated city. (*Vid. Troja*.) Paris, though represented in general as effeminate and vain of his personal appearance, yet distinguished himself during the siege of Troy by wounding Diomedes, Machaon, Antilochus, and Palamedes, and subsequently by discharging the dart which proved fatal to Achilles. Venus took him under her special protection, and, in the single combat with Menelaüs, rescued him from the vengeance of the latter. The circumstances of his death are mentioned under the article *Eneida*. (*Dict. Cret.*, 1, 3, 4.—*Apollod.*, 3, 12.—*Hygin.*, *fab.*, 92, 273.—*Tetz.* *ad Lycophr.*, 67, 61, 63, 66, &c.)

PARISI, a British nation lying to the north of the Coritani, and occupying the district which is called *Holerness*, or, according to Camden, the whole *East-Riding of Yorkshire*. They are supposed to have derived their name from the two British words *par* *isa*, which signify low pasture, and which are descriptive of the situation and uses of their country. Their capital was Petuaria. (*Mannert, Geogr.*, vol. 2, pt. 2, p. 187.)

PARISI, a people and city of Gaul, now *Paris*, the capital of the kingdom of France. (*Vid. Lutetia*.—*Cæs.*, *B. G.*, 6, 3.)

PARISUS, a river of Pannonia, falling into the Danube; according to Mannert, the *Mur*, in the Hungarian part of its course. (*Mannert, Geogr.*, vol. 3, p. 489.)

PARIUM, now *Camanar*, a town of Asia Minor, in Mysia Minor, on the Propontis, southwest of Linae, and northeast from Pesus. It was founded by the Milesians and Parians. (*Plin.*, 5, 32.—*Paul. Lex.*, viii., *de Consab.*)

PARMA, a city of Italy, south of the Po, on the small river Parma. It was founded by the Etrurians, taken by a tribe of Gauls called the Boii, and at last colonized by the Romans, A.U.C. 569. (*Liv.*, 39, 56.) From Cicero it may be inferred that Parma suffered from the adverse factions in the civil wars. (*Ep. ad Fam.*, 10, 33.—*Id. ibid.*, 12, 5.—*Id.*, *Philipp.*, 14, 3.) It was probably recolonized under Augustus, as some inscriptions give it the title of Colonia Julia Augusta Parma. Strabo (316) speaks of it as a city of note. From Martial we learn that its wool was highly prized (14, 53; 5, 13). In the ages that immediately succeeded the fall of the Roman empire, we find this city distinguished also by the appellation of Chrysopolis (*Gold-city*), but are unacquainted with the causes that led to the adoption of the name. (*Geogr. Ravennas*, 4, 33.—*Donizo, Vit. Machtilidis*, 1, 10.) The modern name is *Parma*. (*Mannert, Geogr.*, vol. 3, pt. 1, p. 218.)

PARMENIDES (*Παρμενίδης*), the second in the series of the Eleatic philosophers, was a native of Elea. He was descended from a noble family, and is said to have been induced to study philosophy by Aminias. (*Diog. Laert.*, 9, 21.) He is also stated to have received instruction from Diocleates, the Pythagorean, to whom he erected an *heroon*. Later writers inform us that he heard Xenophanes, the founder of the Eleatic school, but Aristotle (*Met.*, 1, 5) speaks of it with some doubt. We read that Parmenides gave a code of laws to his native city, which was so highly esteemed that at first the citizens took an oath every year to observe it.

(*Diog. Laert.*, 9, 23.—*Plut.*, *Ado. Colot.*, 32.—*Strabo*, 362.) The time when he lived has been much disputed. According to Plato (*Parmen.*, 127), Parmenides, at the age of sixty-five, accompanied by Zeno, at the age of forty, visited Athens during the great Panathenæa, and stopped at the house of Pythodorus. As this visit to Athens probably occurred about B.C. 454 (*Clinton, Fast. Hell.*, p. 364), Parmenides would have been born about B.C. 519. But to this date two objections are urged; first, that Diogenes Laertius (9, 23) says that Parmenides flourished (*ἡκμαζε*) in the 60th Olympiad; and, secondly, that Socrates is stated by Plato, in his dialogue entitled *Parmenides*, to have conversed with Parmenides and Zeno on the doctrine of ideas, which we can hardly suppose to have been the case, as Socrates at that time was only thirteen or fourteen. Athenæus, accordingly (11, p. 506), has censured Plato for saying that such a dialogue ever took place. But in reply to these objections it may be remarked, first, that little reliance can be placed upon the vague statement of such a careless writer as Diogenes; and, secondly, that the dialogue which Plato represents Socrates to have had with Parmenides and Zeno is doubtless fictitious; yet it was founded on a fact, that Socrates, when a boy, had heard Parmenides at Athens. Plato mentions, both in the "*Theætetus*" (p. 183) and the "*Sophistes*" (p. 127), that Socrates was very young (*πάρυ νέος*) when he heard Parmenides. We have no other particulars of the life of Parmenides. He taught Empedocles and Zeno, and with the latter lived on the most intimate terms. (*Plato, Parmen.*, 127.) He is always spoken of by the ancient writers with the greatest respect. In the "*Theætetus*" (p. 183) Plato compares him with Homer; and in the "*Sophistes*" (p. 237) he calls him "the Great." (Compare *Aristot.*, *Met.*, 1, 5.) Parmenides wrote a poem, which is usually cited by the title "*Of Nature*" (*περί φύσεως*;—*Sext. Empir.*, *adv. Mathem.*, 7, 111.—*Theophr.*, *ap. Diog. Laert.*, 8, 56), but which also bore other titles. Suidas calls it *φυσικολογία* (*s. v. Παρμενίδ.*), and adds, on the authority of Plato, that he also wrote works in prose. The passage in Plato (*Soph.*, p. 237), however, to which Suidas refers, perhaps only means an oral exposition of his system, which interpretation is rendered more probable by the fact that Sextus Empiricus (*adv. Mathem.*, 7, 111) and Diogenes Laertius (1, 16) expressly state, that Parmenides only wrote one work. Several fragments of this work "*On Nature*" have come down to us, principally in the writings of Sextus Empiricus and Simplicius. They were first published by Stephanus in his "*Poësis Philosophica*" (*Paris*, 1578), and next by Fülleborn, with a translation in verse, *Züllichau*, 1795. Brandis, in his "*Commentationes Eleatica*," *Hafnia*, 1813, also published the fragments of Parmenides, together with those of Xenophanes and Melissus; but the most recent and complete edition is by Karsten, in the second volume of his "*Philosophorum Græcorum æternum, præsertim qui ante Platonem, floruerunt, Operum Reliquia*," *Bruz.*, 1835. The fragments of his work which have come down to us are sufficient to enable us to judge of its general method and subject. It opened with an allegory, which was intended to exhibit the soul's longing after truth. The soul is represented as drawn by steeds along an untrodden road to the residence of Justice (*Δίκη*), who promises to reveal everything to it. After this introduction the work is divided into parts; the first part treats of the knowledge of truth, and the second explains the physiological system of the Eleatic school. (*Encyclop. Useful Knowl.*, vol. 17, p. 283.)

PARMENIO, a Macedonian general, who distinguished himself in the service of Philip, father of Alexander the Great. He gained a decisive victory over the Illyrians about the time of Alexander's birth, and the news of both events reached Philip, who was then absent

from his capital on some expedition, together with that of his having won the prize at the Olympic games. Philip, while preparing to invade the Persian empire, sent a considerable force into Asia as an advanced guard, and he chose Parmenio and Attalus as the leaders of the expedition. These commanders began by expelling the Persian garrisons from several Greek towns of Asia Minor. Parmenio took Gryneum in Æolia, the inhabitants of which, having sided with the Persians, and fought against the Macedonians, were sold as slaves. When Alexander set out on his Asiatic expedition, Parmenio had one of the chief commands in the army. At the head of the Thessalian cavalry he contributed much to the victory of the Granicus; and at Issus he had the command of the cavalry on the left wing, which was placed near the seacoast, and had to sustain for a time the principal attack of the Persians. At Arbela he advised Alexander not to give battle until he had well reconnoitred the ground. Being in command of the left wing, he was attacked in flank by the Persians, and was for a time in some danger, until Alexander, who had been successful in another part of the field, came to his assistance. Parmenio afterward pursued the fugitives, and took possession of the Persian camp, with the elephants, camels, and all the baggage. When Alexander marched beyond the Caspian gates in pursuit of Darius and Beasus, he left Parmenio, who was now advanced in years, in Media, at the head of a considerable force. Some time after, while Alexander was encamped at Artacoana, a conspiracy is said to have been discovered against his life, in which Philotas, the son of Parmenio, was accused of being implicated. He was, in consequence, put to the torture, and, after enduring dreadful agonies, confessed, though in vague terms, that he had conspired against the life of Alexander, and that his father Parmenio was cognizant of it. This being considered sufficient evidence, Philotas was stoned to death, and Alexander despatched a messenger to Media, with secret orders to Cleander and other officers who were serving under Parmenio, to put their commander to death. The unsuspecting veteran, while conversing with his officers, was run through the body by Cleander. This is the substance of the account of Curtius (lib. 6 et 7). Arrian's account is somewhat different (lib. 3). Whatever may be thought of the trial and execution of Philotas, and it appears to have been at least a summary and unsatisfactory proceeding, the murder of Parmenio, and the manner of it, form one of the darkest blots in Alexander's character. Parmenio was evidently sacrificed in cold blood to what have been styled, in after ages, "reasons of state." He was seventy years of age; he had lost two sons in the campaigns of Alexander, and Philotas was the last one remaining to him. Parmenio appears to have been a steady, brave, and prudent commander. (*Encycl. Us. Knowl.*, vol. 17, p. 283, seq.)

PARNASSUS (Παρνασσός), i. the name of a mountain-chain in Phocia, which extends in a northeasterly direction from the country of the Locri Ozolæ to Mount Ceta, and in a southwesterly direction through the middle of Phocia, till it joins Mount Helicon on the borders of Bœotia. Strabo (316) says that Parnassus divided Phocia into two parts; but the name was more usually restricted to the lofty mountain upon which Delphi was situated. According to Stephanus of Byzantium, it was anciently called Larnassus, because the ark or *larnax* of Deucalion landed here after the flood. (Compare *Ovid, Met.*, 1, 318.) Pausanias (10, 6, 1) derives the name from Parnassus, the son of Neptune and Cleodora. It is called at the present day *Liakura*. Parnassus is the highest mountain in Central Greece. Strabo (379) says that it could be seen from the Acrocorinthus in Corinth, and also states (409) that it was of the same height as Mount Helicon; but in the latter point he was mistaken, ac-

cording to Colonel Leake, who informs us (*Travels in Northern Greece*, vol. 2, p. 537) that *Liakura* is some hundreds of feet higher than *Paleovuna*, which is the highest point of Helicon. Parnassus was covered the greater part of the year with snow, whence the epithet of "snowy" so generally applied to it by the poets. (*Soph.*, *Œd. Tyr.*, 473.—*Eurip.*, *Phœn.*, 214.) When Brennus invaded Greece, we learn from Pausanias (10, 23, 3 et 4) that it was covered with snow. Above Delphi there were two lofty rocks, from which the mountain is frequently called by the poets the two-headed (*δικόρυφος*), one of which Herodotus (8, 39) names Hyampea, but which were usually called Phœdiades. Between these two rocks the celebrated Castalian fount flows from the upper part of the mountain. The water which oozes from the rock was in ancient times introduced into a hollow square, where it was retained for the use of the Pythia and the oracular priests. The fountain is ornamented with pendant ivy, and overshadowed by a large fig-tree. (*Dodwell's Travels*, vol. 1, p. 173.) Above the spring, at the distance of 60 stadia from Delphi, was the Corycian cave, sacred to Pan and the Corycian nymphs, which Pausanias (10, 32, 2, 5) speaks of as superior to every other known cavern. (Compare *Strabo*, 417.) When the Persians were marching against Delphi, a part of the inhabitants took refuge in this cavern. (*Herod.*, 8, 37.) It is described by a modern traveller (*Raikes, in Walpole's Collection*, &c., vol. 1, p. 312) as 330 feet long and nearly 200 wide. As far as this cave the road to Delphi was accessible by horses and mules, but beyond it the ascent was difficult even for an active man (*ἄνθρωπος ἐνέργων*.—*Pausan.*, 10, 32, 2, 5). Above this cave, and near the summit of Parnassus, at the distance of 80 stadia from Delphi (*Pausan.*, 10, 32, 6) was the town of Tithorea or Neon, the ruins of which are near the modern village of *Velitza*. (*Encycl. Us. Knowl.*, vol. 17, p. 284, seq.)—II. A son of Neptune, who gave his name to a mountain of Phocia. **PARNES** (γεν. *-ῆτις*), a mountain of Attica, north of Athens, famous for its wines. It was the highest mountain in the whole country, rising on the northern frontier, and being connected with Pentelicus to the south, and towards Bœotia with Cithæron. Pausanias says (1, 32) that on Mount Parnes was a statue of Jupiter Parnethius, and an altar of Jupiter Semalens. It abounded with wild boars and bears. (*Pausan.*, l. c.—*Pliny*, 11, 37.) The modern name is *Nozæ*. "Mount Parnes is intermingled," says Dodwell, "with a multiplicity of glens, crags, and well-wooded rocks and precipices, and richly diversified with scenery which is at once grand and picturesque: its summit commands a view over a vast extent of country." (*Tour*, vol. 1, p. 604.)

PAROPAMISUS, a province of India, the eastern limit of which, in Alexander's time, was the river Cophenes. According to the ideas of Ptolemy, it lay between the countries which the moderns name *Khorasan* and *Cabul*, and it answers to the tract between *Herat* and *Cabul*. This province was separated from Bactria by a range of mountains also called Paropamisus, now *Hindu Khos*, and which formed part of the great chain of *Imaus*. (*Vid. Imaus*.—*Mela*, 1, 15.—*Plin.*, 6, 17.)

PAROS, now *Paro*, one of the Cyclades, to the south of Delos, at the distance of about seven and a half miles. It was said to have been first peopled by the Cretans and Arcadians. (*Steph. Byz.*, s. v. *Πάρος*.) Its early prosperity is evinced by the colonies it established at *Thasus* and on the shores of the Hellespont. (*Thucydides*, 4, 104.—*Strabo*, 487.) During the time of the Persian war, we are told that it was the most flourishing and important of the Cyclades. (*Ephor.*, ap. *Steph. Byz.*, s. v. *Πάρος*.—*Herod.*, 5, 28, seqq.) After the battle of Marathon it was besieged in vain by Miltiades for twenty-six days, and thus proved the cause of his disgrace. (*Herod.*, 6,

134.) The Parians, according to the historian just cited, did not take part with the Persians in the battle of Salamis, but kept aloof near Cythrus, awaiting the issue of the action. (*Herod.*, 8, 67.) Themistocles, however, subsequently imposed upon them a heavy fine. (*Herod.*, 8, 112.) Paros was famed for its marble. The quarries were on Mount Marpessa. (*Virg.*, *Æn.*, 6, 470.—*Pind.*, *Nem.*, 4, 131.—*Virg.*, *Georg.*, 3, 34.—*Hor.*, *Od.*, 1, 19, 5.—*Steph. Byz.*, s. v. *Μάρπησσα*.) Some remarks on the Parian marble will be offered below.—Paros was the birthplace of the poet Archilochus. (*Strabo*, l. c.—*Fabr.*, *Bibl. Gr.*, vol. 2, p. 107.)—It was in Paros that the famous marble was disinterred, known by the name of the *Parian Chronicle*, from its having been kept in this island. It is a chronological account of the principal events in Grecian, and particularly in Athenian, history, during a period of 1318 years, from the reign of Cecrops, B.C. 1450, to the archonship of Diognetus, B.C. 264. But the chronicle of the last 90 years was lost, so that the part now remaining ends at the archonship of Diotimus, B.C. 354. The authenticity of this chronicle has been called in question by Mr. Robertson, who, in 1788, published a "*Dissertation on the Parian Chronicle*." His objections, however, have been ably and fully discussed, and the authenticity of this ancient document has been fully vindicated by Porsen, in his review of Robertson's essay. (*Monthly Review*, January, 1789, p. 690.—*Porsen's Tracts*, ed. Kidd, p. 57, seqq.—Consult also the *Encyclopædia Metropolitana*, Art. "*Arundelian Marbles*.") The chronicle is given, with an English version, in *Hale's Analysis of Chronology* (vol. 1, p. 107, seqq.)—The following very interesting account of the quarries and marbles of Paros is given by Dr. Clarke. "This day we set out upon mules for the ancient quarries of the famous Parian marble, which are situate about a league to the east of the town, upon the summit of a mountain, nearly corresponding in altitude with the situation of the Grotto of Antiparos. The mountain in which the quarries are situate is now called *Capresso*: there are two of these quarries. When we arrived at the first, we found in the mouth of the quarry heaps of fragments detached from the interior: they were tinged, by long exposure to the air, with a reddish, ochreous hue; but, upon being broken, exhibited the glittering sparry fracture which often characterizes the remains of Grecian sculpture: and in this we instantly recognised the beautiful marble, which is generally named, by way of distinction, the Parian, although the same kind of marble is also found in Thasos. The marble of Naxos only differs from the Thasian and Parian in exhibiting a more advanced state of crystallization. The peculiar excellence of the Parian is extolled by Strabo; and it possesses some valuable qualities unknown even to the ancients, who spoke so highly in its praise. These qualities are, that of hardening by exposure to atmospheric air (which, however, is common to all homogeneous limestone), and the consequent property of resisting decomposition through a series of ages; and this, rather than the supposed preference given to the Parian marble by the ancients, may be considered as the cause of its prevalence among the remains of Grecian sculpture. That the Parian marble was highly and deservedly extolled by the Romans, is well known: but in a very early period, when the arts had attained their full splendour in the age of Pericles, the preference was given by the Greeks, not to the marble of Paros, but to that of Mount Pentelicus, because it was whiter; and also, perhaps, because it was found in the immediate vicinity of Athens. The Parthenon was built entirely of Pentelican marble. Many of the Athenian statues, and of the works carried on near Athens during the administration of Pericles (as, for example, the temple of Ceres at Eleusis), were exe-

cuted in the marble of Pentelicus. But the finest Grecian sculpture which has been preserved to the present time, is generally of Parian marble. The Medicean Venus, the Belvidere Apollo, the Antinous, and many other celebrated works, are made of it; notwithstanding the preference which was so early bestowed upon the Pentelican; and this is easily explained. While the works executed in Parian marble retain, with all the delicate softness of wax, the mild lustre even of their original polish, those which were finished in Pentelican marble have been decomposed, and sometimes exhibit a surface as earthy and as rude as common limestone. This is principally owing to veins of extraneous substances which intersect the Pentelican quarries, and which appear more or less in all the works executed in this kind of marble. The fracture of Pentelican marble is sometimes splintery, and partakes of the foliated texture of the schistus, which traverses it; consequently, it has a tendency to exfoliate, like *cipolino*, by spontaneous decomposition.—We descended into the quarry, whence not a single block of marble has been removed since the island fell into the hands of the Turks; and perhaps it was abandoned long before, as might be conjectured from the ochreous colour by which all the exterior surface of the marble is now invested. We seemed, therefore, to view the grotto exactly in the state in which it had been left by the ancients: all the cavities, cut with the greatest nicety, showed to us, by the sharpness of their edges, the number and the size of all the masses of Parian marble which had been removed for the sculptors of ancient Greece. If the stone had possessed the softness of potter's clay, and had been cut by wires, it could not have been separated with greater nicety, evenness, and economy. The most evident care was everywhere displayed, that there should be no waste of this precious marble: the larger squares and parallelograms corresponded, as a mathematician would express it, by a series of equimultiples, with the smaller, in such a manner that the remains of the entire vein of marble, by its dipping inclination, resembled the degrees or seats of a theatre.—We quitted the larger quarry, and visited another somewhat less elevated. Here, as if the ancients had resolved to mark for posterity the scene of their labours, we observed an ancient bas-relief on the rock. It is the same which Tournefort describes (*Voy. du Lev.*, vol. 1, p. 239), although he erred in describing the subject of it. It is a more curious relic than is commonly supposed. It represents, in three departments, a festival of Silenus, mistaken by Tournefort for Bacchus. It has never been observed that Pliny mentions the image of Silenus in this bas-relief as a natural curiosity, and one of the marvels of ancient Greece. The figure of Silenus was accidentally discovered, as a *lusus naturæ*, in splitting the rock, and the other parts of the bas-relief were adjusted by the hand of art. Such a method of brightening and improving any casual effect of this kind has been very common in all countries, especially where the populace are to be deluded by some supposed prodigy; and thus the cause is explained why this singular piece of sculpture, so rudely executed, yet remains as a part of the natural rock. 'A wonderful circumstance,' says Pliny, 'is related of the Parian quarries. The mass of entire stone being separated by the wedges of the workmen, there appeared within it an effigy of Silenus' (36, 5). In the existence of this bas-relief as an integral part of the natural rock, and in the allusion made to it by Pliny, we have sufficient proof that these were ancient quarries; consequently, they are the properest places to resort to for the identical stone whose colour was considered as pleasing to the gods (*Plato, de Leg.*, 12, p. 296), which was used by Praxiteles (*Preper.*, 3, 7, 18.—*Quintil.*, 2, 19) and by other illustrious

Grecian sculptors, and celebrated for its whiteness by Pindar (*Nem.*, 4, 362) and by Theocritus (6, 38). We collected several specimens: in breaking them we observed the same whiteness and brilliant fracture which characterizes the marble of Naxos, but with a particular distinction before mentioned, the Parian marble being harder, having a closer grain, and a less foliated texture. Three different stages of crystallization may be observed, by comparing the three different kinds of marble dug at Carrara in Italy, in Paros, and in Naxos: the Carrara marble being milk-white, and less crystalline than the Parian; and the Parian whiter, and less crystallized than the Naxian." (*Clarke's Travels*, vol. 6, p. 133, *seqq.*, *Lond. ed.*)—Parian marble has been frequently confounded not only with Carrara marble, but also with alabaster, though differing altogether in nature from the latter substance, and in character from the former. The true Parian marble has generally somewhat of a faint bluish tinge among the white, and often has blue veins in different parts of it. (*Elme's Dict. of the Fine Arts*, s. v.)

ΠΑΡΗΝΑΪΤ, a people of Arcadia, apparently on the Laconian frontier; but the extent and position of their territory is not precisely determined. Thucydides says their district was under the subjection of Mantinea, and near Sciritis of Laconia (5, 33). But Pausanias seems rather to assign the Parrhasii a more western situation; for he names as their towns Lycosura, Thocnias, Trapeus, Acacesium, Macarea, and Dasea, all of which were to the west and northwest of Megalopolis. (*Cramer's Anc. Greece*, vol. 3, p. 360.)

ΠΑΡΗΝΑΣΤΗΣ, a celebrated painter, son and pupil of Evener, and a native of Ephesus, but who became eventually a citizen of Athens, having been presented with the freedom of that place. (*Plut., Vit. Thest.*, 4.—*Juvénus, Catal.*, p. 142.) The period when he flourished admits of some discussion. From a passage in Pliny (35, 9, 36) it would appear to have been about the 96th Olympiad; and Quintilian (12, 10) places Parrhasius and Zeuxis about the time of the Peloponnesian war, producing, in support of this opinion, the well-known conversation of the former artist with Socrates. (*Xen. Mem.*, 3, 10.) Now Socrates died in the first year of the 95th Olympiad, and this date fully accords with the year to which Parrhasius is assigned by Pliny. (*Sillig, Dict. Art.*, s. v.)—Parrhasius raised the art of painting to perfection in all that is exalted and essential. He compared his three great predecessors with one another, rejected what was exceptionable, and adopted what was admirable in each. The classic invention of Polygnotus, the magic tone of Apollodorus, and the exquisite design of Zeuxis, were all united in the works of Parrhasius; what they had produced in practice, he reduced to theory. He so circumscribed and defined, says Quintilian (12, 10), all the powers and objects of art, that he was termed the legislator; and all contemporary and subsequent artists adopted his standard of divine and heroic proportions. Parrhasius gave, in fact, to the divine and heroic character in painting what Polygnotus had given to the human in sculpture, by his Dorophorus, namely, a canon of proportion. Phidias had discovered in the nod of the Homeric Jupiter the characteristic of majesty, *inclination of the head*: this hinted to him a higher elevation of the neck behind, a bolder protrusion of the front, and the increased perpendicular of the profile. To this conception Parrhasius fixed a maximum; that point from which descends the ultimate line of celestial beauty, the angle within which moves whatever is inferior, beyond which what is portentous.—Parrhasius himself was aware of his own ability: he assumed the appellation of the "*Elegant*" (*Ἀσποδίαστος*), and styled himself the "Prince of Painters." He also wrote an epigram upon himself (*Athen.*, 12, p. 548), in which he proclaimed his birth-

place, celebrated his father, and pretended that in himself the art of painting had attained to perfection. He likewise declared himself to be descended from Apollo, and carried his arrogance so far as to dedicate his own portrait in a temple as Mercury, and thus receive the adoration of the multitude. (*Themist.*, 14.) He wore a purple robe and a golden garland; he carried a staff wound round with tendrils of gold, and his sandals were bound with golden straps. (*Ælian, V. H.*, 9, 11.) It appears, therefore, that Pliny was right in styling him the most insolent and most arrogant of artists. (*Pliny*, 35, 10, 36.) The branch of art in which Parrhasius eminently excelled was a beautiful outline, as well in form as execution, particularly in the extremities, for, says Pliny, when compared with himself, the intermediate parts were inferior. The fault here censured consisted, according to Fuseli, in an affectation of smoothness bordering on insipidity, in something effeminately voluptuous, which absorbed the character of his bodies and the idea of elastic vigour; and this Euphranor seems to have hinted at, when, on comparing his own Theseus with that of Parrhasius, he pronounced the Ionian's to have fed on roses, his own on beef: emasculate softness was not, in his opinion, the proper companion of the contour, nor flowery freshness of colour an adequate substitute for the sterner tints of heroic form. One of the most celebrated works of Parrhasius was his allegorical figure of the Athenian people or Demos. Pliny says that it represented and expressed, in an equal degree, all the good and bad qualities of the Athenians at the same time; one might trace the changeable, the irritable, the kind, the unjust, the forgiving, the vain-glorious, the proud, the humble, the fierce, and the timid. How all these contrasting and counteracting qualities could have been represented at the same time, it is difficult to conceive. If we are to suppose it to have been a single figure, it is very certain that it could not have been such as Pliny has described it; for, except by symbols, it is totally incompatible with the means of art. "We know," observes Fuseli, "that the personification of the Athenian Demos was an object of sculpture, and that its images by Lyson and Leocbares were publicly set up; but there is no clew to decide whether they preceded or followed the conceit of Parrhasius." Pliny enumerates many other works of this eminent painter; and he mentions a contest between him and Timanthes of Cythaus, in which the former was beaten. The subject of the picture was the contest between Ulysses and Ajax: and the proud painter, indignant at the decision of the judges, is said to have remarked, that the unfortunate son of Telamon was for a second time, in the same cause, defeated by an unworthy rival. (*Athenæus*, 12, p. 543.) Pliny records also a trial of skill between Parrhasius and Zeuxis (*vid. Zeuxis*), in which the latter allowed his grapes to have been surpassed by the curtain of the former: "this contest," remarks Fuseli, "if not a frolic, was an effort of puerile dexterity."—The story told by Seneca of Parrhasius having crucified an old Olynthian captive when about to paint a "Prometheus chained," that he might seize from nature the true expression of bodily agony, cannot relate to this Parrhasius, and is probably a fiction: it is nowhere to be found but in the "Controversies" (5, 10) of the preceptor of Nero. Olynthus was taken by Philip in the second year of the 108th Olympiad, or B.C. 347, which is nearly half a century later than the latest accounts we have of Parrhasius. (*Encycl. Us. Knowl.*, vol. 17, p. 287.—*Sillig, Dict. Art.*, s. v.—*Fuseli, Lecture on Ancient Art*, p. 40, *seqq.*)

ΠΑΡΘΗΝΙΑ, a name given at one period to a certain class of persons at Sparta, whose history is as follows: The absence from home to which the Lacedæmonians had bound themselves, during the first Messenian war (*vid. Messenia*), became, by the pro-

traction of the contest, an evil threatening the existence of the state, no children being born to supply the waste of war and natural decay. The remedy said to have been adopted was a strange one, highly characteristic of Lacedæmon, and such as no other people would have used. The young men who had come to maturity since the beginning of the war were free from the oath which had been taken, and they were sent home to cohabit promiscuously with the marriageable virgins. But even at Sparta this expedient in some degree ran counter to the popular feelings. When the war was ended, and the children of this irregular intercourse, called Parthenia (*filii virginum*), had attained to manhood, they found themselves, though bred in all the discipline of Lycurgus, becoming every day more and more alighted. Their spirit was high, and a conspiracy was accordingly formed by them against the state, in conjunction with the Helots; but the public authorities, aware of the existence of disaffection among them, obtained information of all their plans, by means of certain individuals whom they had caused to join the Parthenia, and to pretend to be friendly to their views. The festival of the Hyacinthia was selected by the conspirators as the day for action; and it was arranged, that when Phalanthus, their leader, should place his felt-cap upon his head, this was to be the signal for commencing. The appointed time arrived, and the festival had begun, when a public crier coming forth, made proclamation, in the name of the magistrates, that "Phalanthus should not put his felt-cap on his head" (*μή δὲ περθεῖναι κοῦρην Φάλανθον*). The Parthenia immediately perceived that their plot was discovered, and were soon after sent off in a colony, under the guidance of Phalanthus, and founded the city of Tarentum in Italy. (*Strab.*, 379.) It is more than probable that so much of this story as relates to the oath taken by the Spartans, and the sending home of their young men, is a mere fiction. On the other hand, however, it would seem that the emergencies of the state had actually induced the Spartans to relax the rigour of their principles, by permitting marriages between Spartan women and Laconians of inferior condition. Theopompus (*ap. Athen.*, 6, p. 371) says, that certain of the Helots were selected for this purpose, who were afterward admitted to the franchise under a peculiar name (*ἐκρύπτειν*). Still, however, even supposing that the number of the Spartans was thus increased by a considerable body of new citizens, drawn from the servile or the subject class of Laconians, or from the issue of marriages formed between such persons and Spartan women, it would nevertheless remain to be explained, how this act of wise liberality could be connected with that discontent, which is uniformly mentioned, certainly not without some historical ground, as the occasion of the migration to Tarentum. And this seems inexplicable, unless we suppose that a distinction was made between the new and the old citizens, which provoked a part of the former to attempt a revolution, and compelled the government to adopt one of the usual means of getting rid of disaffected and turbulent subjects. (*Thirlwall's Greece*, vol. 1, p. 353.)

PARTHENIUM MARE, a name sometimes given to that part of the Mediterranean which lies on the right of Egypt. It was also called *Iuaniacum Mare*. (*Amm. Marcell.*, 14, 8.—*Id.*, 23, 16.) Gregory Nazianzen styles the sea around Cyprus Παρθενικὸν πέλαγος. (*Or.*, 19.)

PARTHENIUM, I. the southwestern extremity of the Tauric Chersonese. It received its name (Παρθένιον ἀκροῦριον, "Virgin's Promontory") from Iphigenia's having been fabled to have offered up here her human sacrifices to the Tauric Diana. It is now called *Felent Bourgen*, and on it stands the monastery of St. George. (*Plin.*, 4, 12.—*Dischoff und Müller, Wörterb. der Geogr.*, p. 828.)—II. A city of Mysia, in

the territory of Troas. (*Xen., Anab.*, 7, 8.—*Plin.*, 5, 30.)

PARTHENIUS, I. a river of Asia Minor, forming the boundary between Paphlagonia and Bithynia, and falling into the Euxine to the southwest of Amastria. Strictly speaking, it separates Bithynia from Paphlagonia only in the lower part of its course, being elsewhere considerably within the limits of the latter country. The modern Greek inhabitants in this quarter call it the *Bartın*; the Turkish name is the *Delap*. (*Apoll. Rhod.*, 2, 938.—*Xen., Anab.*, 6, 2.) The Greek name of this river was very probably a corruption of the original appellation, or, rather, an adaptation of it to a Grecian ear; and the name *Parthenes* (Παρθένος, *Anon. Periplus*, p. 8) would seem to be an intermediate form. The Greeks, who were never at a loss for explanations derived from their national mythology, made the stream obtain its title of Parthenius (*Virgin's River*) from the circumstance of Diana's having delighted to bathe in its pure waters and hunt along its banks. (*Apoll. Rhod.*, l. c.—*Schol. ad Apoll. Rhod.*, l. c.—*Steph. Byz.*, s. v.—*Anon. Periplus*, p. 70.)—II. A mountain in Arcadia, forming the limit between that country and Argolis, and lying to the east of Tegea. (*Strabo*, 376.—*Pausan.*, 8, 6.—*Lin.*, 34, 26.) It was on this mountain that Pan was said to have appeared to Phidippides, the Athenian courier, who was sent to Sparta to solicit succour against the Persians. (*Herod.*, 6, 107.—*Apollod.*, 2, 7, 4.) It still retains the name of *Parthemi*. (*Cramer's Anc. Greece*, vol. 3, p. 294.)—III. A river of Elis, to the east of the Harpinae, and, like it, a tributary of the Alpheus. On its banks lay the town of Epina. (*Pausan.*, 6, 31.—*Strabo*, 356.)—IV. A native of Nicæa, in Asia Minor, taken prisoner by Cinna in the war with Mithradates (B.C. 81), and brought to Rome, where he instructed Virgil in Greek. Suidas states that he lived till the time of the Emperor Tiberius. The same lexicographer informs us that he gained his freedom on account of his learning. Of the numerous works written by Parthenius, only one now remains. Its title is *Περὶ ἐρωτικῶν παθημάτων* ("Of Amatory Affections"), and it is addressed to Cornelius Gallus, the elegiac poet. It is a collection of thirty-six erotic tales, all of a melancholy cast. At the period when he wrote, the corruption of taste had not, as yet, become strongly marked, and hence he may almost be regarded as one of the classic Greek writers. Virgil and Ovid have imitated him. He has preserved for us some interesting extracts from various ancient poets, especially those of the elegiac class; as, for example, Alexander the Ætolian, and Euphorion of Chalcis. (*Le Beau, Mem. de l'Acad. des Inscri.*, &c., vol. 34, p. 63, seqq.) The ancients cite other works of Parthenius, such as his *Metamorphoses*, which, perhaps, first suggested to Ovid the idea of his mythological poem. If any reliance is to be placed on a marginal note in a Milan manuscript, the *Moratum* of Virgil is a mere imitation of one of the poems of Parthenius. (*Voss, de Poet. Gr.*, p. 70.) The best edition of this writer is that of Passow, *Lips.*, 1830, 12mo. There is only one MS. of Parthenius (*Bast, Epist. Crit.*, p. 168, 208), from which the early editions often depart without any necessity. Passow has made this MS. the basis of his edition. (*Schöll, Hist. Lit. Gr.*, vol. 6, p. 42, seqq.)

PARTHENON, a celebrated temple at Athens, on the summit of the Acropolis, and sacred to Minerva, the virgin-goddess (παρθένος, "Virgin"). It occupied the site of an older temple, also dedicated to Minerva, and which was denominated Hecatompædon (ἑκατόμπεδον), from its having been one hundred feet square. This earlier temple was destroyed in the Persian invasion, and the splendid structure of the Parthenon, enlarged and modelled after a more perfect plan, arose in its place. In beauty and grandeur it surpassed all

PARTHENON.

other buildings of the kind, and was constructed entirely of Pentelic marble. It was built during the splendid era of Pericles, and the expense of its erection was estimated at six thousand talents. The architects were Ictinus and Callistratus, and the work was adorned with sculptures from the hand of Phidias and his scholars. The following animated description, by a modern scholar, may afford some idea of the appearance presented by this splendid edifice in the days of its glory.—“Let us here suppose ourselves as joining that splendid procession of minstrels, priests, and victims, of horsemen and of chariots, which ascended the Acropolis at the quinquennial solemnity of the great Panathenæa. Aloft, above the heads of the train, the sacred Peplos, raised and stretched like a sail upon a mast, waves in the air: it is variegated with an embroidered tissue of battles, of giants, and of gods: it will be carried to the temple of the Minerva Polias in the citadel, whose statue it is intended to adorn. In the bright season of summer, on the twenty-eighth day of the Athenian month Hecatombeon, let us mount with this procession to the western slope of the Acropolis. Towards the termination of its course we are brought in face of a colossal fabric of white marble, which crowns the brow of the steep, and stretches itself from north to south across the whole western part of the citadel, which is about 170 feet in breadth. The centre of this fabric consists of a portico 60 feet broad, and formed of six fluted columns of the Doric order, raised upon four steps, and intersected by a road passing through the midst of the columns, which are 30 feet in height, and support a noble pediment. From this portico two wings project about 30 feet to the west, each having three columns on the side nearest the portico in the centre. The architectural mouldings of the fabric glitter in the sun with brilliant tints of red and blue: in the centre the coffers of its soffits are spangled with stars, and the antæ of the wings are fringed with an azure embroidery of ivy-leaf. We pass along the avenue lying between the two central columns of the portico, and through a corridor leading from it, and formed by three Ionic columns on each hand, and are brought in front of five doors of bronze; the central one, which is the loftiest and broadest, being immediately before us. This structure which we are describing is the *Propylæa*, or vestibule of the Athenian citadel. It is built of Pentelic marble. In the year B.C. 437 it was commenced, and was completed by the architect Mnesicles in five years from that time. Its termination, therefore, coincides very nearly with the commencement of the Peloponnesian war. We will now imagine that the great bronze doors of which we have spoken are thrown back upon their hinges, to admit the riders and charioteers, and all that long and magnificent array of the Panathenæic procession, which stretches back from this spot to the area of the Agora, at the western foot of the citadel. We behold through this vista the *Interior of the Athenian Acropolis*. We pass under the gateway before us, and enter its precincts, surrounded on all sides by massive walls: we tread the soil on which the greatest men of the ancient world have walked, and behold buildings ever admired and imitated, but never equalled in beauty. We behold before and around us almost a city of statues, raised upon marble pedestals, the works of noble sculptors, of Phidias and Polyclethus, of Alcámenes, and Praxiteles, and Myron; and commemorating the virtues of benefactors of Athens, or representing the objects of her worship: we see innumerable altars dedicated to heroes and gods; we perceive large slabs of white marble inscribed with the records of Athenian history, with civil contracts and articles of peace, with memorials of honours awarded to patriotic citizens or munificent strangers. Proceeding a little farther, we have, on our

PARTHENON.

left, raised on a high base, a huge statue of bronze, the labour of Phidias. It is seventy feet in height, and looks towards the west, upon the Areopagus, the Agora, and the Pnyx, and far away over the Ægean Sea. It is armed with a long spear and oval shield, and bears a helmet on its head; the point of the lance and the crest of the casque, appearing above the loftiest building of the Acropolis, are visible to the sailor who approaches Athens from Sunium. This is *Minerva Promachus*, the champion of Athens, who, looking down from her lofty eminence in the citadel, seems, by her attitude and her accoutrements, to promise protection to the city beneath her, and to bid defiance to its enemies. Passing onward to the right, we arrive in front of the great marble temple, which stands on the most elevated ground of the Acropolis. We see eight Doric columns of huge dimensions elevated on a platform, ascended by three steps at its western front. It has the same number of columns on the east, and seventeen on each side. At either end, above the eight columns, is a lofty pediment, extending to a length of eighty feet, and furnished with nearly twenty figures of superhuman size. The group which we see before us, at the western end, represents the contest of Minerva with Neptune for the soil of Athens; the other, above the eastern front, exhibits the birth of the Athenian goddess. Beneath the cornice, which ranges on all sides of the temple, is the frieze, divided into compartments by an alternating series of triglyphs and metopes, the latter of which are ninety-two in number, namely, fourteen on either front, and thirty-two on each flank; they are a little more than four feet square, and are occupied by one or more figures in high relief; they represent the actions of the goddess, to whom the temple is dedicated, and of the heroes, especially those that were natives of Athens, who fought under her protection and conquered by her assistance. They are the works of Phidias and his scholars; and, together with the pediments at the two fronts, may be regarded as offering a history in sculpture of the most remarkable subjects contained in the mythology of Athens. Attached to the temple, beneath each of the metopes on the eastern front, hang round shields covered with gold; below them are inscribed the names of those who dedicated them as offerings to Minerva, in testimony of their gratitude for the victories they had won; the spoils of which they shared with her, as she partook in the labours which achieved them. The members of the building above specified are enriched with a profusion of vivid colours, which throw around the fabric a joyful and festive beauty, admirably harmonizing with the brightness and transparency of the atmosphere that encircles it. The cornice of the pediments is decorated with painted ovoli and arrows; coloured meanders twine along its annulets and beads; and honeysuckle ornaments wind beneath them; the pediments themselves are studded with disks of various hues; the triglyphs of the frieze are streaked with tints which terminate in plate-bands and guttæ of azure dye; gilded festoons hang on the architrave below them. It would, therefore, be a very erroneous idea to regard this temple which we are describing merely as the best school of architecture in the world. It was also the noblest museum of sculpture, and the richest gallery of painting. We ascend by three steps, which lead to the door of the temple at the posticum or west end, and stand beneath the roof of the peristyle. Here, before the end of the cella, and also at the pronaos or eastern front, is a range of six columns, standing upon a level raised above that of the peristyle by two steps. The cella itself is entered by one door at the west and another at the east: it is divided into two compartments of unequal size, by a wall running from north to south; of which, the western or smaller chamber is called the *Opisthodomus*, and serves as

the treasury of Athens; the eastern is the temple properly so called: it contains the colossal statue of Minerva, the work of Phidias, composed of ivory and gold, and is peculiarly termed, from that circumstance, the *Parthenon*, or Residence of the Virgin-Goddess, a name by which, however, the whole building is more frequently described." (*Wordsworth's Greece*, p. 135, *seqq.*)—The statue of Minerva, to which allusion has just been made, was 39 feet high. It was ornamented with gold to the amount of 40 talents according to Thucydides, but according to Philochorus 44 talents, or about \$465,000. Of this, however, it was stripped by Lachares, somewhat more than a century and a quarter after the death of Pericles.—This magnificent temple had resisted all the outrages of time, had been in turn converted into a Christian church and a Turkish mosque; but still subsisted entire when Spon and Wheeler visited Attica in 1676. It was in the year 1687 that the Venetians besieged the citadel of Athens, under the command of General Königseberg. A bomb fell most unluckily on the devoted Parthenon, set fire to the powder which the Turks had made therein, and thus the roof was entirely destroyed, and the whole building almost reduced to ruins. The Venetian general, being afterward desirous of carrying off the statue of Minerva, which had adorned the pediment, had it removed; thereby assisting in the defacement of the place, without any good result to himself, for the group fell to the ground and was shattered to pieces. Since this period, every man of taste must have deplored the demolition of this noble structure, and the enlightened travellers who have visited the spot have successively published engravings of its remains. One of the first of these was Le Roy, in his *Ruins of Greece*; after him came Stuart, who, possessing great pecuniary means, surpassed his predecessor in producing a beautiful and interesting work on the Athenian antiquities. Chandler, and other travellers in Greece, have also described what came under their eye of the remains of the Parthenon, of which many models have likewise been executed. But, not content with these artistical labours and publications, more recent travellers have borne away with them the actual spoils of the Parthenon. The foremost of these was Lord Elgin, who, about the year 1800, removed a variety of the matchless friezes, statues, &c., which were purchased of him by parliament on the part of the nation, and now form the most valuable and interesting portion of the British Museum. This act of Lord Elgin's called forth at the time severe animadversion, though it is now well known that there was imminent danger of those relics of art being totally destroyed by the wanton barbarism of the Turks and others. (*Bume's Dictionary of the Fine Arts*, s. v. *Parthenon*.)

PARTHENOPÆUS, son of Milanion (according to some, of Mars) and Atalanta. He was one of the seven chieftains who engaged in the Theban war. (*Vid. Etæocles and Polyneices*.) He was slain by Amphidicus, or, as others state, by Periclymenus. (*Apol. l.*, 3, 6, 8.—Consult *Heyne, ad loc.*)

PARTHENOPÆ, one of the Sirens. (*Vid. Neapolia*.)

PARTIA, called by Strabo and Arrian Parthymæ (*Παρθωμία*), was originally a small extent of country to the southeast of the Caspian Sea, of a mountainous and sandy character, with here and there, however, a fruitful plain, and regarded as forming, under the Persian sway, one satrapy with the province of Hyrcania, which lay to the west of it. The inhabitants, a nomadic race, were of Scythian descent. Under the successors of Alexander, the Parthian Arsaces, a man of obscure origin but great military talents, succeeded in founding a separate kingdom, which gradually extended itself, under those who came after him, until it reached the Euphrates, comprehending the fairest provinces of the old Persian monarchy. This new empire

took the name of Parthian from the country where it first arose, and, in its fullest extent, reached to the Indus on the east, the Tigris on the west, the Mars Erythreum on the south, and the range of Caucasus, together with a portion of Scythia, on the north. The primitive Parthia was now regarded, under the name of Parthyene, as the royal province, and contained Hecatompylos, the capital, until succeeded by Ctesiphon, of the whole empire. The Parthian empire lasted from B.C. 256 to A.D. 226. Its history may be divided into three periods.—*First Period, from B.C. 256 to B.C. 130.* During this period the Parthians were engaged in almost continual struggles with the Syrian kings. Under Mithradates I., the fifth or sixth in succession from Arsaces I., the dominions of the Parthian kings were extended as far as the Euphrates and the Indus; and Demetrius II., king of Syria, was defeated and taken prisoner about B.C. 140. Mithradates was succeeded by Phraates II., whose dominions were invaded by Antiochus Sidetes, the brother and successor of Demetrius. Antiochus met with considerable success at first, but he was afterward cut off with all his army, about B.C. 130, and Parthia was from this time entirely delivered from the attacks of the Syrian kings. (*Joseph. Ant. Jud.*, 13, 8.—*Appian, Bell. Syr.*, 68.)—*Second Period, from B.C. 130 to B.C. 53.* During the early part of this period, the Parthians were constantly engaged in war with the nomadic tribes of Central Asia, who, after the destruction of the Greek kingdom of Bactria, attempted to obtain possession of the western parts of Asia. Phraates II. and his successor Artabanus fell in battle against these invaders; but their farther progress was effectually stopped by Mithradates II., who met, however, with a powerful rival in Tigranes, king of Armenia. Tigranes obtained possession of some of the western provinces of the Parthian empire; but, after his overthrow by the Romans, the Parthians acquired their former power, and were brought into immediate contact with Rome.—*Third Period, from B.C. 53 to A.D. 226.* This period comprises the wars with the Romans. The invasion of Crassus, during the reign of Orodes, terminated in the death of the Roman general and the destruction of his army, B.C. 53. In consequence of this victory, the Parthians obtained a great increase of power. They invaded Syria in the following year, but were driven back by Cassius. In the war between Cæsar and Pompey they took the side of the latter, and after the death of Cæsar they sided with Brutus and Cassius. Orodes, at the instigation of Labienus, sent an army into Syria commanded by Pacorus and Labienus, but they were defeated the following year by Ventidius, B.C. 48, and again in B.C. 38. In B.C. 37, Orodes was murdered by his son Phraates IV., an ambitious and energetic prince, who, as soon as he obtained the throne, made great preparations for renewing the war with the Romans. Antony marched into Media against him, but was obliged to retire with great loss. Phraates, however, was unable to follow up his victory, in consequence of having to contend with Tiridates, a formidable competitor for the Parthian throne. After an obstinate struggle, Tiridates was defeated (B.C. 25), but he contrived to get into his power the youngest son of Phraates, with whom he fled to Rome, and besought the aid of Augustus. Menaced by a Roman invasion, and in danger from a large part of his own subjects, Phraates willingly made great concessions to Augustus. He sent four of his sons to Rome as hostages, and restored to Augustus the Roman standards which had been taken on the defeat of Crassus, an event which is frequently alluded to by the poets of the Augustan age. The history of Parthia after this becomes of less importance, and is little more than a record of civil wars and revolts, which tended greatly to diminish the power of this once formidable empire;

and it was the great object of Roman policy to support, as much as possible, pretenders to the throne, and thereby prevent all offensive operations on the part of the Parthians. The great subject of contention between the Romans and Parthians was the kingdom of Armenia, which had monarchs of its own, and was nominally independent; but its rulers were always appointed either by the Parthians or the Romans, and the attempts of each nation to place its own dependants on the throne, led to incessant wars between them. In the reign of Trajan, Armenia and Mesopotamia were converted into Roman provinces, and a new king of the Parthians was appointed by the emperor. Under Hadrian, however, the conquered territory was given up, and the Euphrates again became the boundary of Parthia. The two nations now remained at peace with each other until the reign of Marcus Aurelius and Lucius Verus. Cassius, the general of Verus, met with great success in the war, and at length took and almost destroyed the powerful city of Seleucia on the Tigris, A.D. 165. Under the reign of Vologeses IV., the Parthian dominions were invaded by Septimius Severus, who took Ctesiphon and several other important places, A.D. 196, and annexed to the Roman empire the important province of Osrhoëne. Caracalla followed up the successes of his father; and though Marcius, who came after him, made a disgraceful peace with the Parthians, their power had become greatly weakened by the conquests of Verus, Severus, and Caracalla.—Artaxerxes, who had served with great reputation in the army of Artabanus, the last king of Parthia, took advantage of the weakened state of the monarchy to found a new dynasty. He represented himself as a descendant of the ancient kings of Persia, and called upon the Persians to recover their independence. The call was readily responded to: a large Persian army was collected; the Parthians were defeated in three great battles, and Artaxerxes succeeded to all the dominions of the Parthian kings, and became the founder of the new Persian empire, which is usually known as that of the Sassanids. (*Vid.* Artaxerxes IV.—*Encycl. Us. Knowl.*, vol. 17, p. 292.)—The Parthians, as we have already remarked, were of Scythian origin; and, according to Justin (41, 1), their name signified, in the Scythian language, “banished” or “exiles.” Isidorus makes the same statement, and adds, that they were driven out of Scythia by domestic strife. (*Orig.*, 10, 2, 44.—Compare *Wahl, Vorder- und Mittel-Asien*, p. 545, *in notis.*) The mode of fighting adopted by their cavalry was peculiar, and well calculated to annoy. When apparently in full retreat, they would turn round on their steeds and discharge their arrows with the most unerring accuracy; and hence, to borrow the language of an ancient writer, it was victory to them if a counterfeited flight threw their pursuers into disorder. (*Plut., Vit. Crass.*, 24.—*Horat., Od.*, 1, 19, 11.—*Id. ib.*, 2, 13, 17.—*Lucan.*, 1, 230.—*Herodian.*, 3, 4, 20.)

PARTHYËNE, the original, and subsequently the royal, province of Parthia. (*Vid.* remarks near the commencement of the preceding article.)

PARYÄDES or PARYARDES (*Ptol.*), a branch of Caucasus, running off to the southwest, and separating Cappadocia from Armenia. On the confines of Cappadocia the name was changed to Seordiscus: it here united with the chain of Antitaurus, and both stretched onward to the west and southwest through Cappadocia. The highest elevation in this range was Mons Argæus. Ptolemy gives the name of Paryardea, in particular, to that part of the chain in which the Euphrates and Araxes took their rise; but Pliny calls this Capotes. (*Plin.*, 5, 27.—*Strabo*, 523.)

PARYÄTIS, a Persian princess, queen of Darius Ochus, by whom she had Artaxerxes Mnemon and Cyrus the younger, the latter of whom was her favourite. (*Xen., Anab.*, 1, 1.) She is represented as

a very cruel woman, and wreaked her vengeance, as far as she was able, on all who had been instrumental in the fall and death of her son. One of the principal sufferers was the eunuch Measabates, who had cut off the head and right hand of Cyrus by order of Artaxerxes. She also poisoned Statira, the wife of the king. (*Plut., Vit. Artax.*, 17.) Von Hammer makes the Persian name to have been *Perisade*, i. e., “Periborn.” (*Wien. Jahrb.*, vol. 8, p. 394.) Strabo, on the other hand (a very poor authority in such a matter), says that the original Persian name was *Pharsaris*. (*Strab.*, 785.—*Bähr, ad Ctes.*, p. 186.)

ΠΑΣΑΓΕΔΩΝ, sometimes written *Pasargada*, and also, but only by Ptolemy and Solinus, *Pasargada*, a very ancient city of Persia, and the royal residence previous to the founding of Persepolis. Some difference of opinion has existed relative to its site; but, from the accounts of Ptolemy and other writers, it would appear to have stood to the southeast of Persepolis, and near the confines of Carmania. (*Mannert, Geogr.*, vol. 5, pt. 2, p. 529.—*Bähr, ad Ctes.*, p. 118.) Hence Morier is wrong in fixing the position of this place at the modern *Mourgaub* (vol. 1, p. 206), which lies to the north of Persepolis, an error in which he is followed by Malte-Brun. *Pasargada* was situate in Cœle-Persia, on the banks of the Cyrus or Kores (*Strabo*, 729), a circumstance which would seem to point to the modern *Pasa* or *Fasa* as occupying its site. (Compare the remarks of Lassen, in *Erach und Grubers Encyclopädie*, s. v. *Pasargada*.) It was said to have owed its origin to a camp which remained on the spot where Cyrus defeated Astyages, and the name of the city has been explained as signifying “the camp of the Persians.” (*Steph. Byz.*, s. v.—*Curt.*, 5, 6.—*Strabo*, 730.) Lassen, however, says that it means “the treasury of the Persians.” Here Cyrus, in fact, built a treasury, and erected his own tomb in an adjacent park. Strabo (730) and Arrian (6, 80) have given a description of this sepulchre, taken from the work of Aristobulus, who had visited the spot. According to their accounts, the tomb was situated in a well-watered park, and surrounded by numerous trees. The lower part of it, which was solid, was of a quadrangular shape, and above it was a chamber built of stone, with an entrance so very narrow that a person of thin and pliant make could alone pass through. Aristobulus entered this chamber by the command of Alexander, and found in it a golden couch, a table with cups upon it, a golden coffin, and many beautiful garments, swords, and chains. Aristobulus says, that the inscription on the tomb was, “Oh man, I am Cyrus, who acquired sovereignty for the Persians, and was King of Asia. Do not then grudge me this monument.” There were certain Magi appointed to guard this tomb, who received every day a sheep, and a certain quantity of wine and wheat, and also a horse every month as an offering to Cyrus. This tomb was plundered during the lifetime of Alexander by some robbers, who carried off everything except the couch and the coffin.—According to Plutarch, the kings of Persia were consecrated at Pasargada by the Magi. (*Vit. Artax.*, 3.)—Those modern travellers who make *Mourgaub* correspond to the site of the ancient Pasargada, have discovered a building in the plain which they have imagined to be the tomb of Cyrus. This building is called by the people of the country “*Kabr Maderi Suleiman*,” i. e., the tomb of the mother of Solomon; and the description given by Sir Robert K. Porter (*Travels*, vol. 1, p. 498) corresponds in many particulars to that of Arrian and Strabo. The tomb contains no inscription, but on a pillar in the neighbourhood there is a cuneiform inscription, which Grotefend, in an essay on the subject, appended to Heeren’s work on Asia (vol. 2, p. 360, *seqq.*, *Eng. trans.*), interprets to mean “Cyrus the King, ruler of the universe.” Saint-Martin, however (*Journal Asiatique* for Febru-

ary, 1838), supposes that it rather refers to Artaxerxes Ochus; and Lassen, a most competent authority on the subject, thinks it impossible to make out the name of Cyrus in this inscription. Höck is of opinion, that the building described by Porter, and before him by Morier, is the tomb of one of the Sassanian kings, the dynasty that ruled in Persia from the third to the middle of the seventh century of our era. (*Veteris Medice et Persie Monumenta*, Göttingen, 1818.) Herodotus does not speak of Pasargade as a place, but as the noblest of the Persian tribes, so that Cyrus must have founded the city of the same name in their territory. (*Herod.*, 1, 125.—*Cresuser*, *ad loc.*)

PASIPHÆ, a daughter of the Sun and of Perseis, and wife of Minos, king of Crete. The ordinary legend connected with her name has been given in a different article (*vid.* Minotaurus), and the opinion has there been advanced, that the whole story rests on some astronomical basis, and that Pasiphæ is identical with the moon. Thus we find the epithet Πασιφαιή (*"all-illuminating"* or *"all-bright"*) applied to Diana in the Orphic hymns (35, 3), after having been given to the Sun in a previous effusion (7, 14). The same term, together with Πασιφαιή, is applied to Selene, or the full moon, by a later bard. (*Maximus, Philos.*, *επεὶ καραφύον*, *ap. Fabric.*, *Bibl. Gr.*, vol. 8, p. 415.—*Cresuser*, *Symbolik*, vol. 4, p. 88.) The *"all-illuminating"* Pasiphæ, then, is, with every appearance of probability, a goddess in the sphere of the Cretan lunar worship. With regard to Pasiphæ, considered as a divinity, we have no direct proof from the island of Crete itself: in Laconia, however, which derived so many of its institutions from Crete, several confirmatory circumstances do not fail to present themselves. Tertullian mentions the oracle of Pasiphæ in Laconia as one of the most celebrated in that country (*de Anima*, c. 46.—*Op.*, vol. 4, p. 311, *ed. Seml.*). Plutarch also speaks of a temple and oracle of Pasiphæ at Thalamæ, though he leaves it undecided what particular deity is meant by the name. (*Vit. Agid.*, c. 9.) It would seem, however, to have been an oracle of one of their most ancient and revered deities, and therefore, in all likelihood, a Cretan one, since it was consulted on all great political occasions by the Spartan Ephori. (Compare *Cic.*, *de Divin.*, 1, 43.—*Plut.*, *Vit. Cleom.*, c. 7.)—Pausanias mentions this same sanctuary (3, 36). He calls it, indeed, the temple and oracle of Ino: and yet he informs us that without was a statue of Pasiphæ, and another of the sun. We must here read Πασιφαιή with Sylburgius and Meursius, in place of the common lection Πασιφαιή. (Consult, in relation to the Laconian Pasiphæ, *Meursius*, *Misc. Lacon.*, 1, 4; and, on the subject of Pasiphæ generally, Höck, *Kreta*, vol. 2, *Vorrede*, p. xxix.—*Id.* *ib.*, vol. 2, p. 49, *seqq.*)

PASTORIS. *Vid.* Tigris.

PASSARON, a town of Epirus, the capital of the Molossæ. Here, according to Plutarch (*Vit. Pyrrh.*), the kings of Epirus convened the solemn assembly of the whole nation, when, after having performed the customary sacrifices, they took an oath that they would govern according to the established laws, and the people, in return, swore to maintain the constitution and defend the kingdom. After the termination of the war between the Romans and Perseus, king of Macedon, Passaron did not escape the sentence which doomed to destruction so many of the unfortunate cities of Epirus that had shown an inclination to favour the cause of the enemy. It was given up to plunder, and its walls were levelled to the ground. (*Liv.*, 45, 34.) With regard to the site of this ancient place, it seems highly probable that it is to be identified with some remarkable ruins, described by more than one traveller, near Jovanena, in a S.S.W. direction, and about four hours from that city. (*Hughes's Travels*, vol. 2, p. 486.—*Cramer's Anc. Greece*, vol. 1, p. 138, *seqq.*)

PASSINUS, Paulus, a Roman knight, nephew to the poet Propertius, whose elegiac compositions he successfully imitated. He likewise attempted lyric poetry with equal success, and chose for his model the writings of Horace. (*Pliny, Ep.*, 6, 9.—*Crisp.*, *de Poet. Lat.*, c. 76.)

PATALA. *Vid.* Pattala.

PATARA (*orum*), a city of Lycia, on the left bank and at the mouth of the river Xanthus. (*Arrian*, 1, 24.—*Leake's Tour*, p. 183.) According to Strabo (665), it was built by Patarus, whom mythology made a son of Apollo. (*Eustath.* *ad Dionys. Perieg.*, v. 129.) Hence the high estimation in which the god was here held, and the famous oracle which he had in this place. Hence also his surname of *Patarus* (*Hor.*, *Od.*, 3, 4, 64), and the legend that he spent the six winter-months at Patara, and the summer at Delos. (*Servius ad Virg.*, *Æn.*, 4, 143.) Strabo speaks of the numerous temples in this city, without particularizing the temple and oracle of Apollo. The oracle, probably, had by this time declined in reputation, and Mela, the geographer, speaks of its former fame (1, 15). We learn from Strabo, that Ptolemy Philadelphus restored Patara, and attempted to change its name to "Arsinoë in Lycia;" but this alteration does not appear to have succeeded. Livy and other writers always use the other appellation. (*Liv.*, 37, 15.—*Id.*, 38, 39.—*Polyb.*, 23, 26.) Patara was a city of considerable size, and had a good harbour, though too small to contain the allied fleet of the Romans, Rhodians, and other Greek states in the war with Antiochus. (*Liv.*, 37, 17.) It is now entirely choked up by encroaching sands. Appian remarks, that Patara was like a port to Xanthus; which city appears from Strabo and the Stadiasmus to have been on the banks of the river Xanthus, eight or nine miles above Patara.—The modern *Patera* occupies the site of the ancient city, but is nothing more than a collection of ruins, being entirely uninhabited. Captain Beaufort describes the harbour of Patara as a swamp filled with sand and bushes, and all communication with the sea as being cut off by a straight beach, through which there is no opening. The sand has not only filled up the harbour, but has accumulated to a considerable height between the ruins and the river Xanthus. The ruins are represented as extensive. (*Cramer's Asia Minor*, vol. 2, p. 250.—*Leake's Tour*, p. 183.)

PATAVIUM, a city of Cisalpine Gaul, in the district of Venetia, and situate between the Meduacus Major and Minor, in the lower part of their course. From its celebrity and importance it may justly be considered as the capital of ancient Venetia. The story of its foundation by Antenor is one which will scarcely be believed in the present day, though so universally accredited by the poets of antiquity. (*Æn.*, 1, 242.—Compare *Mela*, 2, 4.—*Solin.*, 8.—*Senec.*, *Consol. ad Helv.*, 7.) It seems as difficult to refute as to prove a fact of so remote an era; but, granting the origin of Patavium, as far as regards the Trojan prince, to be an invention of a later period, it does not follow that the tradition should be wholly destitute of foundation: perhaps a similarity of name between the Antenor of Homer and the chief of the Heneti might not unreasonably be fixed upon as accounting for this otherwise improbable story; most improbable, indeed, when we consider that, in the *Iliad*, Antenor is represented as of the same age with Priam (3, 148).—An interesting event in the subsequent history of Patavium is recorded at some length by Livy, who naturally dwells on it as honourable to his native city (10, 2). A Spartan fleet, under the command of Cleomenes, king of Lacedæmon, being driven by contrary winds from the neighbourhood of Tarentum, to the aid of which city he had been summoned against a threatened attack on the part of the Romans (*Strabo*, 206), arrived unexpectedly in the Adriatic,

and anchored at the mouth of the Meduacus Major, and near the present villages of *Chiozza* and *Fusina*. A party of these adventurers, having advanced up the river in some light vessels, effected a landing, and proceeded to burn and plunder the defenceless villages on its banks. The alarm of this unexpected attack soon reached Patavium, whose inhabitants were kept continually on the alert and in arms, from fear of the neighbouring Gauls. A force was instantly despatched to repel the invaders; and such was the skill and promptitude with which the service was performed, that the marauders were surprised and their vessels taken before the news of this reverse could reach the fleet at the mouth of the river. Attacked at his moorings, it was not without great loss, both in ships and men, that the Spartan commander effected his escape. The shields of the Greeks and the beaks of their galleys were suspended in the temple of Juno, and an annual mock-fight on the Meduacus served to perpetuate the memory of so proud a day in the annals of Patavium. This event is placed by the Roman historian in the 450th year of Rome. Strabo speaks of Patavium as the greatest and most flourishing city in the north of Italy; and states that it counted in his time 500 Roman knights among its citizens, and could at one period send 20,000 men into the field. Its manufactures of cloth and woollen stuffs were renowned throughout Italy, and, together with its traffic in various commodities, sufficiently attested the great wealth and prosperity of its inhabitants. (*Strab.*, 213.—Compare *Martial*, 14, 141.) Vessels could come up to Patavium from the sea, a distance of 250 stadia, by the Meduacus. About six miles to the south of the city were the celebrated Patavinæ Aquæ. (*Plin.*, 2, 103.—*Id.*, 31, 6.) The principal source was distinguished by the name of Aponus Fons, from whence that of *Bagni d'Abano*, by which these waters are at present known, has evidently been formed.—The modern *Padua* (in Italian *Padova*) occupies the site of the ancient Patavium. (*Cramer's Anc. Italy*, vol. 1, p. 120, *seqq.*)

PATERCULUS, an historian. (*Vid.* Velleius Paterculus.)

PATMOS, a small rocky island in the Ægean, south of Icaria, and southwest of Samos. It belonged to the group of the Sporades. This island appears to have had no place which deserved the name of a city. It became a spot of some consequence, however, in the early history of the church, from St. John's having been banished to it, and having here written his Apocalypse. It is the general opinion of commentators on Scripture, that St. John was banished to Patmos towards the close of the reign of Domitian. It is not known how long his captivity lasted, but it is thought that he was released on the death of Domitian, which happened A.D. 96, when he retired to Ephesus. (*Iren.*, 2, 22, 5.—*Euseb.*, *Hist. Eccles.*, 3, 18.—*Dio Cass.*, 68, 1.) A small bay on the east side, and two others on the western shore, divide Patmos into two portions, of which the southern is the more considerable. The modern name of the island is *Patmo* or *Palmosa*. It contains several churches and convents; the principal one is dedicated to the apostle. There are also the ruins of an ancient fortress, and some other remains. (*Whittington*, in *Walpole's Memoirs of Turkey*, vol. 2, p. 43.) Dr. Clarke, in speaking of Patmos, declares that there is not a spot in the Archipelago with more of the semblance of a volcanic origin than this island. (*Travels*, vol. 6, p. 73, *Lond. ed.*)

PATRÆ, a city of Achaia, west of Rbium, and at the opening of the Corinthian Gulf. It is said to have been built on the site of three towns, called Aroë, Anthea, and Messatis, which had been founded by the Ionians when they were in possession of the country. On their expulsion by the Achæans, the small towns above mentioned fell into the hands of Patreus, an il-

lustrious chief of that people; who, uniting them into one city, called it by his name. Patræ is enumerated by Herodotus among the 13 cities of Achaia (1, 46). We are informed by Thucydides, that, during the interval of peace which occurred in the Peloponnesian war, Alcibiades persuaded its inhabitants to build long walls down to the sea (5, 53). This was one of the first towns which renewed the federal system after the interval occasioned by the Macedonian dominion throughout Greece. (*Polyb.*, 2, 41.) Its maritime situation, opposite to the coast of Ætolia and Acarnania, rendered it a very advantageous port for communicating with these countries; and in the Social war, Philip of Macedon frequently landed his troops there in his expeditions into Peloponnesus. The Patræans sustained such severe losses in the different engagements fought against the Romans during the Achæan war, that the few men who remained in the city determined to abandon it, and to reside in the surrounding villages and boroughs. (*Pausanias*, 7, 18.—*Polybius*, 40, 3, *seqq.*) Patræ was, however, raised to its former flourishing condition after the battle of Actium by Augustus, who, in addition to its dispersed inhabitants, sent thither a large body of colonists, chosen from his veteran soldiers, and granted to the city, thus restored under his auspices, all the privileges usually conceded by the Romans to their colonies. Strabo (387) affirms, that in his day it was a large and populous town, with a good harbour. The modern *Patras* occupies the site of the ancient city. (*Cramer's Anc. Greece*, vol. 3, p. 67.)

PATROCCLUS, one of the Grecian chieftains during the Trojan war, son of Menætius, and of Sthenela the daughter of Acæstus, and the beloved friend of Achilles. Having in his youth accidentally killed Clytemnestra, the son of Amphidamas, in a moment of ungovernable fury, he was compelled to fly from Opus, where his father reigned, and found an asylum with Peleus, king of Phthia, who educated him with his son Achilles under the centaur Chiron; and thus was contracted between the two youthful heroes a friendship that never suffered the slightest diminution. Upon the determination of Achilles to retire from the war after his quarrel with Agamemnon, Patroclus, impatient at the successes of the Trojans, obtained permission from his friend to lead the Thessalians to the conflict. Achilles equipped him in his own armour, except giving him the spear called Pelias, which no one but the hero himself could wield, and which he had received from his father Peleus, on whom Chiron had bestowed it. (*Il.*, 16, 140, *seqq.*) The stratagem proved completely successful; and from the consternation into which the Trojans were thrown at the presence of the supposed Achilles, Patroclus was enabled to pursue them to the very walls of the city. The protecting hand, however, of their tutelary god, Apollo, at last prevailed, and the brave Greek fell beneath the arm of Hector, who was powerfully aided by the son of Latona. A fierce contest ensued for the dead body of Patroclus, of which Ajax and Menelaus ultimately obtained possession. The grief of Achilles, and the funeral rites performed in honour of his friend, are detailed in the 18th and 23d books of the Iliad. Patroclus was surnamed *Menætiades* from his father, and *Actorides* from his grandfather. (*Hom.*, *Il.*, l. c.—*Apollod.*, 3, 13.—*Hygin.*, *fab.*, 97, 275.—*Ovid.*, *Met.*, 13, 273.)

PATULCIVS, a surname of Janus. (*Vid.* Janus.)

PAULINUS, a Roman commander. (*Vid.* Suetonius Paulinus.)

PAULUS, I. ÆMILIUS, son of the consul of the same name, who fell in the battle near Cannæ (B.C. 216), after using his utmost efforts to check the rashness of his colleague. Young Æmilius was a mere boy at the death of his father, yet by his personal merits, and the powerful influence of his friends, he eventually at-

PAULUS.

tailed to the highest honours of his country. His sister Æmilia was married to P. Cornelius Scipio, the conqueror of Hannibal, who was consul for the second time B.C. 194; and this very year Æmilium, though he had held no public office, was appointed one of three commissioners to conduct a colony to Crotona, in the south of Italy, a city with which he might claim some connexion on the ground of his descent from Mamercus, the son of Pythagoras. Two years after, at the age of about 36, he was elected a curule ædile in preference, if we may believe Plutarch, to twelve candidates of such merit that every one of them became afterward consuls. His ædileship was distinguished by many improvements in the city and neighbourhood of Rome. The following year (191 B.C.) he held the office of prætor, and in that capacity was governor of the southwestern part of the Spanish peninsula, with a considerable force under his command. The appointment was renewed the following year, but with enlarged powers, for he now bore the title of proconsul, and was accompanied by double the usual number of lictors. In an engagement, however, with the Lusitani, 6000 of his men were cut to pieces, and the rest only saved behind the works of the camp. But this disgrace was retrieved in the third year of his government, by a signal defeat of the enemy, in which 18,000 of their men were left upon the field. For this success a public thanksgiving was voted by the senate in honour of Æmilium. Soon after he returned to Rome, and found that he had been appointed, in his absence, one of the ten commissioners for regulating affairs in that part of Western Asia which had lately been wrested by the two Scipios from Antiochus the Great. Æmilium was a member also of the college of augurs from an early age, but we do not find any means of fixing the period of his election. As a candidate for the consulship he met with repeated repulses, and only attained that honour in 182 B.C., nine years after holding the office of prætor. During this and the following year he commanded an army in Liguria, and succeeded in the complete reduction of a powerful people called the Ingauni (who have left their name in the maritime town of *Albenga*, formerly *Albium Ingaunum*). A public thanksgiving of three days was immediately voted, and, on his return to Rome, he had the honour of a triumph. For the next ten years we lose sight of Æmilium, and at the end of this period he is only mentioned as being selected by the inhabitants of farther Spain to protect their interests at Rome, an honour which at once proved and added to his influence. It was at this period (B.C. 171) that the last Macedonian war commenced; and though the Romans could scarcely have anticipated a struggle from Perseus, who inherited from his father only the shattered remains of the great Macedonian monarchy, yet three consuls, in three successive years, were more than baffled by his arms. In B.C. 168 a second consulship, and with it the command against Perseus, was intrusted to Æmilium. He was now at least 60 years of age, but he was supported by two sons and two sons-in-law, who possessed both vigour and ability. By Papiria, a lady belonging to one of the first families in Rome, he had two sons and three daughters. Of the sons, the elder had been adopted into the house of the Fabii by the celebrated opponent of Hannibal, and consequently bore the name of Quintus Fabius Maximus, with the addition of Æmilianus, to mark his original connexion with the house of the Æmilii. The younger, only seventeen years of age at this period, had been adopted by his own cousin, the son of Scipio Africanus, and was now called by the same name as his grandfather by adoption, viz., P. Cornelius Scipio, with the addition of Æmilianus, as in his brother's case. The careless reader of Roman history often confounds these two persons, and the more so as the younger eventually acquired the same title of Africanus. By the marriage of his

PAULUS.

daughters, again, Æmilium was father-in-law to Marcus Porcius Cato, son of the censor, and to Ælius Tubero. These four young men accompanied Æmilium to the war in Macedonia, and all contributed in a marked manner to his success. Perseus was strongly posted in the range of Olympus to defend the passes from Perrhæbia into Macedonia, but he allowed himself to be out-manceuvred. Æmilium made good his passage through the mountains, and the two armies were soon in view of each other near Pydna. On the evening before the battle, an officer in the Roman army, named Sulpicius, obtained the consul's permission to address the troops upon a point which was of no little importance in those ages. An eclipse of the moon, it was known to Sulpicius, would occur that night, and he thought it prudent to prepare the soldiers for it. When the eventful moment arrived, the soldiers went out, indeed, to assist the moon in her labours with the usual clamour of their kettles and pans, nor omitted to offer her the light of their torches; but the scene was one of amusement rather than fear. In the Macedonian camp, on the other hand, superstition produced the usual effect of horror and alarm; and on the following day the result of the battle corresponded to the feelings of the night. In a single hour the hopes of Perseus were destroyed for ever. The monarch fled with scarcely a companion, and on the third day reached Amphipolis. Thence he proceeded to Samothrace, where he soon after fell into the hands of the conqueror. The date of the battle of Pydna has been fixed by the eclipse to the 22d of June. Livy, indeed, assigns it to a day in the early part of September; but it is not impossible that the difference may be owing to some irregularity in the Roman calendar, which, prior to the Julian correction, must often have differed widely from the present distribution of the year. The Romans were careful in recording the day of every important battle. After reducing Macedonia to the form of a Roman province, Æmilium proceeded on his return to Epirus. Here, under the order of the senate, he treacherously surprised seventy towns, and delivered up to his army 150,000 of the inhabitants as slaves, and all their property as plunder. On his arrival in Rome, however, he found in this army, with whom he was far from popular, the chief opponents to his claim to a triumph. This honour he at last obtained, and Perseus, with his young children, some of them too young to be sensible of their situation, were paraded for three successive days through the streets of Rome. But the triumphant general had a severe lesson from affliction in the midst of his honour. Of two sons by a second wife (he had long divorced Papiria), one, aged twelve, died five days before the triumph, the other, aged fourteen, a few days after; so that he had now no son to hand down his name to posterity. Æmilium lived eight years after his victory over Perseus, in which period we need only mention his censorship, B.C. 164. At his death, 160 B.C., his two sons, who had been adopted into other families, Fabius and Scipio, honoured his memory in the Roman fashion by the exhibition of funeral games; and the Adelphi of Terence, the last comedy the poet wrote, was first presented to the Roman public on this occasion. The fact is attested by the inscription still prefixed to the play. Æmilium found in his grateful friend Polybius one willing and able to commemorate, perhaps to exaggerate, his virtues. Few Romans have received so favourable a character from history. (*Encycl. Us. Knowl.*, vol. 1, p. 143.)—II. Ægineta, a medical writer. (*Vid. Ægineta*.)—III. A native of Alexandria, who wrote, A.D. 378, an *Introduction to Astrology* (*Εἰσαγωγή εἰς τὴν Ἀποτελεσματικὴν*), dedicated to his son Cronammon, which has come down to us. We have also a body of scholia on this work, composed A.D. 1151. The author of these is called, in one of the MSS., by the apparently Arabian name of Apomasar. Another writ-

ter, equally unknown, by the name of Heliodorus, is the author of a Commentary on this same work, in 68 chapters, which still remains in MS. There are two editions of the work of Paulus: one by Schaton, *Witeb.*, 1586, 8vo, and the other in 1588, *Witeb.*, 4to. (*Schöll, Hist. Lit. Gr.*, vol. 7, p. 47.)—IV. Silentiarius, a poet in the time of Justinian. (*Vid. Silentiarius.*)

PAUSANIAS, I. son of Cleombrotus, was of that royal house in Sparta which traced its descent from Eurytheneus. Aristotle calls him "king," but he only governed as the cousin-german and guardian of Pleistarchus, who succeeded to the throne on the death of Leonidas. Pausanias comes principally into notice as commander of the Grecian army at the battle of Plataea. The Spartan contingent had been delayed as long as was possible; but, owing to the representations made by the Athenian ministers at Lacedæmon, it was at last despatched, though not until the Persians had advanced into Boeotia. This delay, however, had one good effect, that of taking the Argives by surprise, and defeating their design of intercepting any troops hostile to Persia which might march through their territory. The Spartans, under the command of Pausanias, got safe to the Isthmus, met the Athenians at Eleusis, and ultimately took up that position which led to the battle of Plataea. The result is well known. Pausanias, elated by his success, took all methods of showing his own unfitness to enjoy good fortune. Being sent with 20 ships, and in the capacity of commander-in-chief of the confederates, to the coast of Asia Minor, he, by his overbearing conduct, disgusted the Asiatic Greeks who had lately revolted from the Persian rule. To his oppression he added an affectation of Eastern luxury; and what we know of Spartan manners seems to lead to the conclusion, that no mixture could possibly be more repugnant to persons accustomed at once to Persian elegance and Ionic refinement, than a clumsy imitation of both, such as the conduct of Pausanias in all probability presented. Prejudice in favour of the Athenians, who were of the Ionic race, was also active; intrigues commenced, the Athenians encouraged them, and Pausanias was recalled. Much criminality was imputed to him by those Greeks who came to Sparta from the seat of war, and his conduct was clearly more like the exercise of arbitrary power than of regular military command. He was accordingly put on his trial. Private and public charges were brought against him; from the former he was acquitted, but his Medism (or leaning to Persia) seemed to be clearly proved. Dorcis was sent in his place; but the Spartan supremacy had received its death-blow, and thenceforward Lacedæmon interfered only sparingly in the prosecution of the contest with Persia. Pausanias, however, with the feelings of a disappointed man, went in a private capacity to the Hellespont, on pretence of joining the army. After the taking of Byzantium, which happened during his command, he had winked at the escape of certain Persian fugitives of rank, and, by means of an accomplice, had conveyed a letter to the Persian monarch, containing an offer to subjugate Greece to his dominion, and subjoining the modest request of having his daughter to wife. A favourable answer had elated him to such a degree as to disgust the allies in the manner already stated. On his second journey he was forcibly prevented from entering Byzantium, upon which he retired to a city in Troas. There, too, his conduct was unfavourably reported at home, and a messenger was despatched with orders for his immediate return, under threats of declaring him a public enemy. Pausanias returned, but it was still hard to bring home any definite charge against him, and the Spartans were shy of adducing any but the strongest evidence. At last, however, one of his emissaries, having discovered that

he was, like all his predecessors, the bearer of orders for his own death, as well as of his master's treason, denounced him to the ephori. By their instructions, this person took sanctuary, and, through a partition made by a preconcerted plan in a hut where he had found refuge, they had the opportunity of hearing Pausanias acknowledge his own treason, during a visit which he paid to his refractory messenger. The ephori proceeded to arrest Pausanias; but a hint from one of their number enabled him to make his escape to the temple of Minerva of the "Brazen House," only, however, to suffer a more lingering death. He was shut up in the temple, and, when on the brink of starvation, was brought out to die (B.C. 467). His mother is said to have carried the first stone to the temple-door for the purpose of immuring him within. (*Thucyd.*, i, 132, *seqq.*—*Encycl. Us. Knowl.*, vol. 17, p. 330.)—II. A youth of noble family, at the court of Philip, and who filled, according to Diodorus Siculus, a post in the royal guards. He is rendered memorable in history for the murder of Philip of Macedon, father of Alexander the Great. The motive that impelled him to the deed was, that he had suffered an outrage from Attalus, one of the courtiers, for which Philip had refused to give him satisfaction. (*Vid. Philippus.*) After committing the deed, the murderer rushed towards the gates of the city, where horps were waiting for him. He was closely pursued by some of the great officers of the royal body-guard, but he would have mounted before they had overtaken him if his sandal had not been caught by the stump of a vine, which brought him to the ground. In the first heat of their passion his pursuers despatched him. (*Justin.*, 9, 6.—*Diod. Sic.*, 16, 93.)—III. A traveller and geographical writer, whose native country has not been clearly ascertained. He is supposed by some to have been born in Lydia, from a passage in his own work (5, 13, 4.—Compare the remarks of *Siebelius, Pref. ad Pausan.*, p. v., *seqq.*), and to have flourished during the reigns of Hadrian and the Antonines. (*Siebelius, Pref. ad Pausan.*, p. viii.) He travelled in Greece, Macedonia, Asia, Egypt, and even in Africa as far as the temple of Jupiter Ammon. After this he appears to have taken up his residence at Rome, and to have there published his *Travels through Greece* (*Ἑλλάδος περιήγησις*), in ten books. It is an important work for antiquities and archaeology, combining with a description of public edifices and works of art, the historical records and the legends connected with them. Hence the researches into which this mode of handling the subject has led him, and the discussions on which he enters, serve not only to throw light upon the Grecian mythology, but also to clear up many obscure points of ancient history. Pausanias displays judgment and erudition: occasionally, however, he falls into errors. He describes, moreover, many things too much in the style of a traveller who has not had sufficient leisure to examine every object with attention; and he describes things, too, on the supposition that Greece would always remain nearly in the same state in which he himself saw it. In consequence of this, he is satisfied oftentimes with merely indicating objects; and, even when he gives an account of them, he does it in a manner that is very concise, and sometimes actually obscure. (Compare *Heyne, Antig. Aufg.*, vol. 1, p. 11.—*Manus, Versuchen, &c.*, p. 377.—*Herm. ad Lucian.*, vol. 1, p. 4, *ed. Amst.*—*Valch. ad Herodot.*, 7, 50.—*Siebelius, Pref. ad Pausan.*, p. xix.)—In respect of style, Pausanias cannot be cited as a model. His own, which is a bad imitation of that of Herodotus, offends frequently by an affectation of conciseness.—In the first book of his work Pausanias describes Attica and Megaris; in the second, Corinth, Sicyonia, the territory of Phlius, and Argolis; in the third, Laconia; in the fourth, Mænesia; in the fifth and sixth, Elis; in the seventh, Achaia; in the eighth, Arcadia; in the ninth, Boeotia;

and in the south, Phocia.—The best edition of Pausanias is that of Siebelis, *Lips.*, 1822-28, 6 vols. 8vo. A new edition has recently appeared, by Schubart and Walz, *Lips.*, 1838-40, 8 vols. 8vo. (*Schöll, Hist. Lit. Gr.*, vol. 5, p. 307.)—IV. A grammarian, a native of Caesarea ad Argum, in Cappadocia. He is often confounded with the preceding. (*Philost., Vit. Sophist.*, 2, 13.—*Siebelis, Pref. ad Pausan.*, p. iv., *segg.*)

PAUSIAS, a painter of Sicyon, contemporary with Apelles. After he had learned the rudiments of his art from his father Brietes, he studied encaustic in the school of Pamphilus, where he was the fellow-pupil of Apelles and Melanthius. Pausias was the first painter who acquired a great name for encaustic with the *castrum*. He excelled particularly in the management of the shadows; his favourite subjects were small pictures, generally of boys, but he also painted large compositions. He was the first who introduced the custom of painting the ceilings and walls of private apartments with historical and dramatic subjects. The practice, however, of decorating ceilings simply with stars or arabesque figures (particularly those of temples) was of very old date. Pausias undertook the restoration of the paintings of Polygnotus at Thebes, which had been greatly injured by the hand of time; but he was judged inferior to his ancient predecessor, for he contended with weapons not his own; he generally worked with the castrum, whereas the paintings of Polygnotus were with the pencil, which Pausias, consequently, also used in this instance. The most famous work of his was the sacrifice of an ox, which in the time of Pliny was in the hall of Pompey. In this picture the ox was foreshortened; but, to show the animal to full advantage, the painter judiciously threw his shadow upon a part of the surrounding crowd, and he added to the effect by painting a dark ox upon a light ground. Pausias, in his youth, loved a native of his own city named Glycera, who earned her living by making garlands of flowers and wreaths of roses, which led him into competition with her, and he eventually acquired great skill in flower-painting. A portrait of Glycera, with a garland of flowers, was reckoned among his master-pieces; a copy of it was purchased by Lucullus at Athens at the great price of two talents (nearly \$2200). Pausias was reproached by his rivals for being a slow painter; but he silenced the censure by completing a picture of a boy, in his own style, in a single day, which on that account was called the "*Hemeresius*" (*Ἡμερησιος*), or the work "of a single day." (*Plin.*, 35, 11, 40.—*Silieg, Dict. Art.*, s. v.—*Jaxius, Catal.*, s. v.—*Encycl. Us. Grec.*, vol. 17, p. 231.) At a later period, the Sicyonians were obliged to part with the pictures which they possessed of this distinguished artist, to deliver themselves from a heavy debt. They were purchased by M. Scaurus when exile, and were brought to Rome to adorn the new theatre which he had erected. (*Plin.*, 21, 2.)

PAUSILYPTUS, a celebrated mountain and grotto near the city of Naples. It took its name from a villa of Vedius Pollio, erected in the time of Augustus, and called Pausilyptus, from the effect which its beauty was supposed to produce in suspending sorrow and anxiety (*παύειν λύπην*, "*about to make care cease*"). This mountain is said to be beautiful in the extreme, and justly to merit the name bestowed upon it. The grotto is nearly a mile in length, and is made through the mountain 20 feet in breadth, and 30 in height. On the mountain, Vedius Pollio had not only a villa, but also a reservoir or pond, in which he kept a number of lampreys, to which he used to throw such slaves as had committed a fault. When he died, he bequeathed, among other parts of his possessions, his villa to Augustus: but this monarch, abhorring a house where so many ill-fated creatures had lost their lives for very slight faults, caused it to be demolished, and the finest

materials in it to be brought to Rome; and with them raised Julia's portico. Virgil's tomb is said to be above the entrance of the grotto of Pausilyptus. Cluverius and Addison, however, deny this to be the tomb of the poet. (*Vid. Virgilina*, where an account of this sepulchre is given.)

PAXOS, a small island southeast of Corcyra, now Paxo. It is one of the seven Ionian islands. (*Plin.*, 4, 12.) The distance from Corcyra is about six miles. No fresh spring-water has been discovered on it; the land does not yield much corn or pasture, but is fruitful in oil and wine. It is peopled by six or seven thousand inhabitants. (*Malte-Brun, Geogr.*, vol. 6, p. 172.—*Pouqueville, Voyage de la Grèce*, vol. 2, p. 145.)

PEDAEUS, I. the mortal one of the three steeds of Achilles, and which that hero obtained when he sacked the city of Etion. (*Il.*, 16, 153.) He died of a wound received from Sarpedon, in the contest between the latter and Patroclus. (*Il.*, 16, 487, *segg.*)—II. A town of the Leleges in Troas, on the river Satnioeis. (*Il.*, 21, 86.) The situation of this Homeric town remains undefined. It appears from Pliny, that some authors identified it with Adramyttium. (*Plin.*, 5, 32.)—III. More commonly Pedasum or Pedasa, a city of the Leleges in Caria, and the capital of a district which included no less than eight cities within its limits. It was situated above Halicarnassus, towards the east, and not far from Stratonicea, and the site corresponds probably to the modern *Peitchin*. (*Strab.*, 611.) Herodotus also notices Pedasa, on account of a strange phenomenon which was stated to occur there. Whenever the inhabitants were threatened with any calamity, the chin of the priestess of Minerva became furnished with a beard: this prodigy was reported to have happened three times. (*Herod.*, 1, 176.—Compare *Aristot., Hist. An.*, 3, 11.)—IV. The Homeric name, according to some, for Methone, in Messenia. (*Il.*, 9, 294.)

PEDO ALBINOVANUS. *Vid. Albinovanus II.*

PEDUM, an ancient town of Latium, often named in the early wars of Rome, and which must be placed in the vicinity of Praeneste. The modern site of *Zagarolo* seems best to answer to the data which are supplied by Livy respecting its position. For, according to this historian (8, 11), Pedum was situate between Tibur, Praeneste, Bola, and Labicum. (*Nibby, Viag. Antiq.*, vol. 1, p. 261.) It was taken by storm, and destroyed by Camillus. (*Liv.*, 8, 13.) Horace mentions the Regio Pedana in one of his epistles (1, 4.—*Cramer's Anc. Italy*, vol. 2, p. 74.)

PEGASIDES, a name given to the Muses from the fountain Hippocrene, which the winged steed Pegasus is said to have produced with a blow of his hoof. (*Propert.*, 3, 1, 19.—*Ovid, Heroid.*, 15, 27.—*Cottemella*, 10, 273.)

PEGASUS, a winged steed, the offspring of Neptune and Medusa, and which sprang forth from the neck of the latter after her head had been severed by Perseus. (*Apollo.*, 2, 4, 2.—*Tzetx. ad Lycophr.*, 17.) Hesiod says he was called Pegasus (*Πήγασος*) because born near the sources (*πηγαι*) of Ocean. (*Theog.*, 283.) As soon as he was born he flew upward, and fixed his abode on Mount Helicon, where with a blow of his hoof he produced the fountain Hippocrene. (*Ovid, Met.*, 5, 256, *segg.*) He used, however, to come and drink occasionally at the fountain of Pirene, on the Acrocorinthus, and it was here that Bellerophon caught him preparatory to his enterprise against the Chimera. After throwing off Bellerophon when the latter wished to fly to the heavens, Pegasus directed his course to the skies, and was made a constellation by Jupiter. (Consult remarks under the article *Bellerophon*.) Pegasus was the favourite of the Muses, who derived from him, among the poets, the appellation of "*Pegasides*." The fountain of Hippocrene is likewise called from him "*Pegasides unda*" or "*Pegasus unda*." (*Tzetx. ad Lycophr.*, l. c.—*Apollo.*,

l. c.—Ovid, *Met.*, 4, 785.—Hygin., *fab.*, 57.—Van Staveren, *ad Hygin.*, *l. c.*—"The horse," observes Knight, "was sacred to Neptune and the rivers; and employed as a general symbol of the waters, on account of a supposed affinity, which we do not find that modern naturalists have observed. Hence came the composition, so frequent on the Carthaginian coins, of the horse with the asterisk of the sun, or the winged disk and hooded snakes, over his back; and also the use made of him as an emblematical device on the medals of many Greek cities. In some instances the body of the animal terminates in plumes; and in others has only wings, so as to form the Pegasus, fabled by the later Greek poets to have been ridden by Bellerophon, but only known to the ancient theogonists as the bearer of Aurora, and of the thunder and lightning to Jupiter, an allegory of which the meaning is obvious." (*Inquiry into the Symb. Læg.*, &c., § 111.—*Class. Journ.*, vol. 25, p. 34.)—As regards the constellation Pegasus, it may be remarked, that the Greek astronomers always give it the simple appellation of "the Horse" (ἵππος). The name Πήγασος first comes in among the later mythological poets. It does not even occur in Aratus; the poet merely remarking that this is supposed to be the same horse whose hoof produced the fountain Hippocrene. (*Arat., Phæn.*, 219.) Eratosthenes, however, says (c. 18) that this is the steed, as some think, which, after Bellerophon had been thrown from it, flew upward to the stars. The opinion, however, is, according to him, an erroneous one, since the steed in the heavens has no wings. It would appear, therefore, from this remark of Eratosthenes, that the custom of representing Pegasus with wings came in at a later period. They are added in Ptolemy. The Romans, in imitation of the Greeks, call the constellation simply *Equus*, for which the poets substitute *Sonipes*, *Sonipes ales*, *Cornipes*, and other similar expressions. The name *Pegasus* appears to occur only in Germanicus (v. 221, 282). Ovid has *Equus Gorgoneus*, in allusion to the fabled birth of the steed. (*Fast.*, 3, 460.—*Ideler, Sternnamen*, p. 115.)

PELAGONIA, I. a district of Macedonia bordering on Illyria. The Pelagones, though not mentioned by Homer as a distinct people, were probably known to him, from his naming Pelagon, the father of Asteropæus, a Pæonian warrior. (Compare *Strabo*, 331.) They must at one time have been widely spread over the north of Greece, since a district of Upper Thessaly bore the name of Pelagonia Tripolitica, and it is ingeniously conjectured by Gatterer, in his learned commentary on ancient Thrace (*Com. Soc. Gott.*, vol. 6, p. 67), that these were a remnant of the remote expedition of the Teuceri and Mysi, the progenitors of the Pæonians, who came from Asia Minor, and conquered the whole of the country between the Strymon and Peneus. (*Herod.*, 7, 20.—*Strab.*, 327.) Frequent allusion is made to Pelagonia by Livy, in his account of the wars between the Romans and the kings of Macedonia. It was exposed to invasion from the Dardani, who bordered on its northern frontiers; for which reason, the communication between the two countries was carefully guarded by the Macedonian monarchs. (*Liv.*, 31, 28.) This pass led over the chain of Mount Scardus. An account of it is given in *Brown's Travels*, p. 45. (*Cramer's Anc. Greece*, vol. 1, p. 269.)—II. Civitas, a city of Pelagonia, the capital of the fourth division of Roman Macedonia. (*Liv.*, 45, 29.) Little is known of it. Its existence at a late period appears from the Synecdemus of Hierocles, and the Byzantine historian Malchus, who speaks of the strength of its citadel. (*Cramer's Anc. Greece*, vol. 1, p. 270.)—III. Tripolitica or Tripolis, a district of Thessaly, around the upper part of the course of the river Titaresius. It was called Tripolitica from the circumstance of its containing three principal towns; which, as Livy informs us (42, 53), were Azorus, Doliche, and Pythium. This

district was connected with Macedonia by a narrow defile over the Cambunian mountains. Livy describes this same canton in one part of his history under the name of Ager Tripolitanus (36, 10.—*Cramer's Anc. Greece*, vol. 1, p. 365).

PELAGI (Πελαγοί), were the most ancient inhabitants of Greece, as far as the knowledge of the Greeks themselves extended. A dynasty of Pelagic chiefs existed in Greece before any other dynasty is mentioned in Greek traditions. Danaus is in the ninth, Deucalion in the eighth, and Cadmus in the seventh generation before the Trojan war; but Phoroneus, the Pelagian, is in the eighteenth generation before that epoch. The Greek traditions represent the Pelagic race as spread most widely over almost all parts of Greece and the islands of the Ægean. The whole of Hellas, according to Herodotus (2, 56), was originally called Pelasgia; and Æschylus (*Suppl.*, 250) introduces Pelasgus, king of Argos, as claiming for the people named after him all the country through which the Alpheus flows, and to the west of the Strymon. We find mention of the Pelagi in the Peloponnesus, Thrace, Thesprotia, Attica, Boeotia, and Phocia. (*Strab.*, 321.—*Herod.*, 8, 44.) The oracles of Dodona and Delphi were originally Pelagic (*Strab.*, 402.—*Herod.*, 2, 52), and Clinton (*Fast. Hell.*, vol. 1, p. 22) and Niebuhr (*Rom. Hist.*, vol. 1, p. 27) have adduced reasons for believing that the Macedonians were also a Pelagic race. We likewise find traces of the Pelagi in many of the islands of the Ægean Sea, as Lemnos, Imbros, Lesbos, Chios, &c. (*Strab.*, 631), and Herodotus informs us (7, 95), that the islands were inhabited by the Pelagic race till they were subdued by the Ionians. The neighbouring coast of Asia Minor was also inhabited in many parts by the Pelagi. (*Strab.*, 621.) The country afterward called Æolis was occupied by Pelasgians (*Herod.*, 7, 95), and hence Antandros was called Pelagic in the time of Herodotus (7, 42). Tralles in Caria was a Pelagic town (*Niebuhr, Rom. Hist.*, vol. 1, p. 33), and two of their towns on the Hellespont were still extant in the time of Herodotus (1, 57). The preceding authorities are sufficient to show the wide diffusion of the Pelagic race; but it is a difficult matter to determine from what quarter they originally came. Many modern writers conclude, from our knowledge of the original seats of the human race, that the Pelasgians spread themselves from Asia into Europe, across the Hellespont, and around the northern shores of the Ægean Sea. (*Malden, Hist. of Rome*, p. 69.—*Marsh, Hæta Pelagica*, c. 1.) This, no doubt, is the true opinion, though it is opposed to many Greek traditions, which represent the Peloponnesus as the original seat of the Pelasgians, whence they spread to Thessaly, and thence to the islands of the Ægean and the Asiatic coast.—The Pelagi were also widely spread over the south of Italy; and the places in which they appear to have been settled are indicated by Malden (*Rom. Hist.*, p. 72, *seqq.*) and Niebuhr (*Rom. Hist.*, vol. 1, p. 25, *seqq.*). There seems no reason for rejecting, as some modern writers have done, the account of Dionysius, that the Pelagi emigrated from Greece to Italy.—In some parts of Greece, the Pelasgians remained in possession of the country to the latest times. The Arcadians were always considered by the Greeks themselves as pure Pelasgians, and a Pelagian dynasty reigned in Arcadia until the second Messenian war. (*Herod.*, 1, 146.—*Id.*, 2, 171.—*Id.*, 8, 73.) According to Herodotus (8, 44; 1, 57), the Athenians were a Pelagic race, which had settled in Attica from the earliest times, and had undergone no change except by receiving a new name and adopting a new language. In most parts of Greece, however, the Pelagic race became intermingled with the Hellenic; but the Pelagi probably at all times formed the principal part of the population of Greece. The Hellenes excelled the Pe-

laegi in military prowess and a spirit of enterprise, and were thus enabled, in some cases, to expel the Pelasgi from the country, though the Hellenes generally settled among the Pelasgi as a conquering people. — The connexion between the Pelasgi and Hellenic races has been a subject of much controversy among modern writers. Many critics have maintained that they belonged to entirely different races, and some have been disposed to attribute to the Pelasgians an Etrurian or Phœnician origin. It is true that many of the Greek writers speak of the Pelasgians and their language as barbarous, that is, not Hellenic; and Herodotus (1, 57) informs us, that the Pelasgian language was spoken in his time at Placia and Scylace on the Hellespont. This language he describes as barbarous; and on this fact he mainly grounds his general argument as to the ancient Pelasgian tongue. It may, however, be remarked, that it appears exceedingly improbable, if the Pelasgi and Hellenic languages had none or a very slight relation to each other, that the two tongues should have so readily amalgamated in all parts of Greece, and still more strange that the Athenians and Arcadians, who are admitted to have been of pure Pelasgi origin, should have lost their original language and learned the pure Hellenic tongue. In addition to which, it may be remarked, that we scarcely ever read of any nation entirely losing its own language and adopting that of its conquerors. Though the Persians have received many new words into their language from their Arab masters, yet twelve centuries of Arab domination have not been sufficient to change, in any essential particular, the grammatical forms and general structure of the ancient Persian; and, notwithstanding all the efforts that were used by the Norman conquerors to bring the French language into general use in England, the Saxon remains to the present day the main element of the English language. It is therefore reasonable to suppose that the Pelasgi and Hellenic tongues were different dialects of a common language, which formed by their union the Greek language of later times. — The ancient writers differ as much respecting the degree of civilization to which the Pelasgi attained before they became an Hellenic people, as they do respecting their original language. According to some ancient writers, they were little better than a race of savages till conquered and civilized by the Hellenes; but others represent them, and perhaps more correctly, as having attained to a considerable degree of civilization previous to the Hellenic conquest. Many traditions represent the Pelasgians as cultivating agriculture and the useful arts. Pelasgius in Arcadia, said the tradition, taught men to bake bread. (*Pausan.*, 1, 14, 1.) The ancient Pelasgi Buzyges yoked bulls to the plough (*Etym. Mag.*, s. v. Βουζύγης); Pelasgians invented the goad for the purpose of driving animals (*Etym. Mag.*, s. v. ἄκαινα. — *Bekker, Anecd. Gr.*, 357); and a (Pelasgi) Thessalian in Egypt taught the art of measuring land (*Etym. Mag.*, ubi sup.). — It is a curious fact, which has been noticed by Mr. Malden (*Hist. of Rome*, p. 70), that the Grecian race which made the most early and the most rapid progress in civilization and intellectual attainments, was one in which the Pelasgian blood was least adulterated by foreign mixture, namely, the Ionians of Attica and of the settlements in Asia; and that we probably owe to the Pelasgi element in the population of Greece all that distinguishes the Greeks in the history of the human mind. The Dorians, who were the most strictly Hellenic, long disdained to apply themselves to literature or the fine arts. — Some writers have maintained, that the Greeks derived the art of writing and most of their religious rites from the Pelasgians; but, without entering into these questions, it may be asserted, with some degree of certainty, that the most ancient architectural monuments in Europe clearly appear to have been the work of their hands. The struc-

tures in Greece, Italy, and along the western coast of Asia Minor, usually called Cyclopean, because, according to the Greek legends, the Cyclopes built the walls of Tiryns and Mycenæ, may properly be assigned to a Pelasgi origin. All these structures are characterized by the immense size of the stones with which they are built. The most extraordinary of them all is the treasury, or, as others call it, the tomb of Atreus at Mycenæ. — It remains but to add a few remarks respecting the name of this race. The most ancient form of the name was Πελαγγοί, and Mr. Thirlwall rather fancifully supposes that the appellation was derived from ἄργος and πέλω, and that it signified "inhabitants" or "cultivators of the plain." The analogy, however, of αἰβάτος, ταυροπόλος, &c., seems, as Mr. Thirlwall himself confesses, unfavourable to this etymology. (*Hist. of Greece*, vol. 1, p. 59.) There is also another objection. Such a derivation of the name makes the Pelasgians to have been solely addicted to agricultural pursuits, a statement which is not borne out by facts. We are told, it is true, that they loved to settle on the rich soil of alluvial plains. The powers, too, that preside over husbandry, and protect the fruits of the earth and the growth of the flocks, appear to have been the eldest Pelasgian divinities; but this is taking too narrow a view of the subject. Even if it were not highly probable that a part of the nation crossed the sea to reach the shores of Greece, and thus brought with them the rudiments of the arts connected with navigation, it would be incredible that the tribes settled on the coast should not soon have acquired them. Accordingly, the islands of the Ægean are peopled by Pelasgians, the pirates of the Leleges precede the rise of the first maritime power among the Greeks, and the Tyrrhenian Pelasgians are found infesting the seas after the fall of Troy. (*Thirlwall's Greece*, vol. 1, p. 60.) — Mr. Kenrick, in a very ingenious paper "On the names of the Antehellenic inhabitants of Greece" (*Philol. Museum*, vol. 1, p. 609, seqq.), maintains, that the name Pelargi (Πελαργοί) was given to the race on account of their rudeness of speech, which sounded "to the exquisite fineness of the Hellenic ear" like the cry of the stork (πελαργός). Hence the people who spoke thus were called Πελαργοί or storks. And he seeks to confirm this etymology by endeavouring to show that, "among birds, the stork laboured under the heaviest charge of defective elocution;" that he was held to have no tongue at all; that, as being ὄλιγος, he was especially adapted to represent a people of barbarous speech; and that we find, in the time of Homer, the inhabitants of the Thracian side of the Hellespont called Κίκορες, a name which appears to be closely analogous to the Latin *Ciconia*. This etymology, however, proves too much. It is based on the supposition that there was a radical difference between the Pelasgi and Hellenic forms of speech, which, from what has already been premised, could not possibly have been the case. This same derivation of the name from that of πελαργός, "a stork," appears also among the Greek writers, but there the explanation is founded on the erroneous idea that the Pelasgi were a roaming race. Myrsilus of Lesbos related, according to Dionysius of Halicarnæsus, that the Tyrrhenians, flying from public calamities with which they were chastised by heaven, because among other tithes they had not offered that of their children, had quitted their home, and had long roamed about before they again acquired a fixed abode; and that, as they were seen thus going forth and returning, the name of Pelargi, or storks, was given to them! (*Dion. Hal.*, 1, 23.) This etymology is about as valuable as the one which deduces *Pelasgius* from *Pelæg*, or *Græius* from *Reu*. Nor is that derivation much superior which traces *Pelasgius* to πέλαγος, "the sea," and makes the name refer to the maritime habits of the race. It is sanctioned, indeed, by the authority of Hermann

(*Opusc.*, vol. 2, p. 174), but it offends grievously against analogy (*Lobeck, ad Phryn.*, p. 109); and if it be applicable to the Tyrrhenian Pelasgians of later times, it certainly is not so to the original Pelasgians of Dodona or Thessaly. Perhaps the peculiar style of building ascribed to the Pelasgic race may furnish us with an etymology for their name, equal, at least in point of plausibility, to any of those which have thus far been enumerated. The term *Pelargi* may mean "stone-builders" or "stone-workers," as indicating a race whose massive style of architecture may have excited the wonder of the early Greeks, and have given rise to a species of national appellation. Thus, in the Macedonian dialect, *πέλα* signified "a stone" (*τὰς πέλας, τοὺς λίθους, κατὰ τὴν Μακεδόνων φωνήν.*—*Ulpian, ad Demosth., de fals. leg.*, 1, p. 376, B., ed. *Francof.*, 1604.—Compare *Ruhnken, ad Tim. Lex.*, p. 270), and *ἄργον* (or *ῥάργον*) is an earlier form for *ἔργον*. (*Höckh, Corp. Inscript.*, fasc. 1, p. 29, 88.) The two old forms, then, *πέλα* ("a stone") and *ἄργον* ("work"), may perhaps have produced, by their combination, the name of *Πελαργοί*. (*Encycl. Us. Knowl.*, vol. 17, p. 377, seqq.—*Clinton, Fast. Hell.*, vol. 1, p. 1, seqq.—*Curtius, de Antiquis Italia incolis*, § 6, seqq.—*Kruse, Hellas*, vol. 1, p. 404, seqq.—*Thirlwall's Greece*, vol. 1, p. 33, seqq.—*Philological Museum*, vol. 1, p. 613.)

Πελασγικὸν (*Πελασγικόν*), a name given to the most ancient part of the fortifications of the Acropolis at Athens, from its having been constructed by the Pelasgi, who, in the course of their migrations, settled in Attica, and were employed by the Athenians in the erection of these walls. The rampart raised by this people is often mentioned in the history of Athens, and included also a portion of ground below the wall at the foot of the rock of the Acropolis. This had been allotted to the Pelasgi while they resided at Athens, and on their departure it was forbidden to be inhabited or cultivated. (*Thucyd.*, 2, 7.—*Pollux*, 8, 102.—*Myrsil.*, ap. *Dion. Hal.*, 1, 19.—*Herod.*, 2, 51.—*Id.*, 6, 137.) It was apparently on the northern side of the citadel, as we are informed by Plutarch, that the southern wall was built by Cimon, from whom it received the name of *Cimonium*. (*Cramer's Anc. Greece*, vol. 2, p. 382.)

Πελασιότις, a district of Thessaly, occupying the lower valley of the Peneus as far as the sea. It was originally inhabited by the Perrhæbi, a tribe of Pelasgic origin. (*Simon.*, ap. *Strab.*, 441.—*Cramer's Anc. Greece*, vol. 1, p. 363.)

Πελασγός, an ancient monarch of the Pelasgi. (*Vid. Pelasgi.*)

Πελεθρονίη, an epithet given to the Lapithæ, because they dwell in the vicinity of Mount Pelethronium, in Thessaly. (*Virg., Georg.*, 3, 115.) Pelethronium appears to have been a branch of Pelion.

PELEUS, a king of Thessaly, son of *Æacus* monarch of *Ægina*, and the nymph *Endeis* the daughter of *Chiron*. Having been accessory, along with *Telaamon*, to the death of their brother *Phocus*, he was banished from his native island, but found an asylum at the court of *Eurytus*, son of *Actor*, king of *Phthia* in Thessaly. He married *Antigone*, the daughter of *Eurytus*, and received with her, as a marriage portion, the third part of the kingdom. *Peleus* was present with *Eurytus* at the chase of the *Calydonian boar*; but, having unfortunately killed his father-in-law with the javelin which he had hurled against the animal, he was again doomed to be a wanderer. His second benefactor was *Acastus*, king of *Iolcos*; but here again he was involved in trouble, through a false charge brought against him by *Astydamia*, or, as *Horace* calls her, *Hippolyte*, the queen of *Acastus*. (*Vid. Acastus.*) To reward the virtue of *Peleus*, as fully shown by his resisting the blandishments of *Astydamia*, the gods resolved to give him a goddess in mar-

riage. The spouse selected for him was the sea-nymph *Thetis*, who had been wooed by *Jupiter* himself and his brother *Neptune*; but *Themis* having declared that her child would be greater than his sire, the gods withdrew. (*Pind., Isth.*, 8, 58, seqq.) Others say that she was courted by *Jupiter* alone, till he was informed by *Prometheus* that, if he had a son by her, that son would dethrone him. (*Apollod.*, 2, 13, 1.—*Schol. ad Il.*, 1, 519.) Others, again, maintain that *Thetis*, who was reared by *Juno*, would not assent to the wishes of *Jupiter*, and that the god, in his anger, condemned her to espouse a mortal; or that *Juno* herself selected *Peleus* for her spouse. (*Il.*, 24, 59.—*Apoll. Rhod.*, 4, 793, seqq.) *Chiron*, being made aware of the will of the gods, advised *Peleus* to aspire to the bed of the nymph of the sea, and instructed him how to win her. He therefore lay in wait, and seized and held her fast, though she changed herself into every variety of form, becoming fire, water, a serpent, and a lioness. (*Pind., Nem.*, 4, 101.—*Soph., frag. ap. Schol. ad Nem.*, 3, 60.) The wedding was solemnized on Mount *Pelion*: the gods all honoured it with their presence, and bestowed armour on the bridegroom. (*Il.*, 17, 195.—*Id.*, 18, 84.) *Chiron* gave him the famous ashen spear afterward wielded by his son; and *Neptune* bestowed on him the immortal *Harry-born* steeds *Balius* and *Xanthus*. The offspring of this union was the celebrated *Achilles*. According to one account, *Peleus* was deserted by his goddess-wife for not allowing her to cast the infant *Achilles* into a caldron of boiling water, to try if he were mortal. (*Vid. Achilles.*) This, however, is a posthomeric fiction, since *Homer* represents *Peleus* and *Thetis* as dwelling together all the lifetime of their son. Of *Peleus* it is farther related, that he survived his son, and even grandson (*Od.*, 11, 493.—*Eurip., Androm.*), and died in misery in the island of *Coa*. (*Callim., ap. Schol. ad Pind., Pyth.*, 3, 167.—*Keightley's Mythology*, p. 313, seqq.) It was at the nuptials of *Peleus* and *Thetis* that the goddess of *Discord* threw the apple of gold into the middle of the assembled deities, with which was connected so much misfortune for both the *Trojans* and the *Greeks*. (*Vid. Helena*, and *Paris*.)

PELIDES, daughters of *Pelias*. (*Vid. Jason*, and also *Pelias*, towards the end of the latter article.)

PELIAS, the twin brother of *Neleus*, was son of *Neptune* by *Tyro*, the daughter of *Salmoneus*. The mother, to conceal her disgrace, exposed her twins as soon as they were born. A troop of mares, followed by their keeper, passing by where they lay, one of the mares touched the face of one of the infants with her hoof, and made it *livid* (*πέλιον*). The keeper took and reared the babes, naming the one with the mark *Pelias*, the other *Neleus*. When they grew up they discovered their mother, and resolved to kill her stepmother *Sidero*, by whom she was cruelly treated. They pursued her, accordingly, to the altar of *Juno*; and *Pelias*, who never showed any regard for that goddess, slew her before it. The brothers afterward fell into discord, and *Pelias* abode at *Iolcos*, but *Neleus* settled in *Elis*, where he built a town named *Pylus*. *Tyro* afterward married her uncle *Cretheus*, to whom she bore three sons, *Æson*, *Pherees*, and *Amythaon*. *Cretheus* was succeeded in the kingdom of *Iolcos* by *Æson*, who became by *Alcimedea* the father of *Jason*. *Pelias*, by force or fraud, deprived *Æson* of his kingdom, and then sought the life of the infant *Jason*; but the parents of the latter gave out that he was dead, and meantime conveyed him by night to the cave of the centaur *Chiron*, to whose care they committed him.—The rest of the legend of *Pelias* will be found under the article *Jason*. (*Apollod.*, 1, 9, 7, seqq.—*Od.*, 11, 235, seqq.) *Pelias* married *Anaxibia* the daughter of *Bias*, or, as others say, *Philomache* the daughter of *Amphion*, and became

by her the father of one son, Acastus, and of four daughters, Pisidice, Pelopea, Hippothoë, and Alceste. (*Apollod.*, 1, 9, 10.) These daughters were called Peliades, and became, unwittingly, through the arts of Medea, the slayers of their sire. (*Vid.* Jason.)

PELIDES, a patronymic of Achilles, as the son of Peleus. (*Vid.* Peleus.)

PELIGNI, an Italian tribe, belonging to the Sabine race, according to Ovid (*Fast.*, 3, 95), but, according to Festus, deriving their origin from Illyria. The statement of Ovid appears the more probable one, if we consider the uniformity of language, customs, and character apparent in all the minor tribes of central Italy, as well as in the Samnites, between whom and the Sabines these tribes may be said to form an intermediate link in the Oscan chain.—The Peligni were situate to the east and northeast of the Marsi, and had Corfinium for their chief town. They derive some consideration in history from the circumstance of their chief city having been selected by the allies in the Social war as the seat of the new empire. Had their plans succeeded, and had Rome fallen beneath the efforts of the coalition, Corfinium would have become the capital of Italy, and perhaps of the world. (*Strab.*, 241.)—The country of the Peligni was small in extent, and mountainous, and noted for the coldness of its climate, as well as for the abundance of its springs and streams. (*Horace, Od.*, 3, 19.—*Ovid, Fast.*, 4, 685.) That some portion of it, however, was fertile, we learn also from the latter poet. (*Am.*, 2, 16.—*Cramer's Anc. Italy*, vol. 1, p. 332.)

PELION, I. a range of mountains in Thessaly, along a portion of the eastern coast. Its principal summits rises behind Iolkos and Ormenium. The chain extends from the southeastern extremity of the Lake Bæbeis, where it unites with one of the ramifications of Ossa, to the extreme promontory of Magnesia. (*Strabo*, 443.—*Herod.*, 7, 129.—*Cramer's Ancient Greece*, vol. 1, p. 429.) In a fragment of Diocæarchus which has been preserved to us, we have a detailed description of Pelion and its botanical productions, which appear to have been very numerous, both as to forest-trees and plants of various kinds. (*Cramer, l. c.*) On the most elevated part of the mountain was a temple dedicated to Jupiter Actæus, to which a troop of the noblest youths of the city of Demetrias ascended every year by appointment of the priest; and such was the cold experienced on the summit, that they wore the thickest woollen fleeces to protect themselves from the inclemency of the weather. (*Diocæarch.*, p. 29.) It is with propriety, therefore, that Pindar applies to Pelion the epithet of stormy. (*Pyth.*, 9, 6.)—Homer alludes to this mountain as the ancient abode of the Centaurs, who were ejected by the Lapithæ. (*Il.*, 2, 743.—Compare *Pind.*, *Pyth.*, 2, 83.) It was, however, more especially the haunt of Chiron, whose cave, as Diocæarchus relates, occupied the highest point of the mountain. (*Cramer, l. c.*) In their wars against the gods, the giants, as the poets fable, placed Ossa upon Pelion, and "rolled upon Ossa the leafy Olympus," in their daring attempt to scale the heavens. (*Virg., Georg.*, 1, 281, *seq.*) The famous spear of Peleus, which descended to his son Achilles, and which none but the latter and his parent could wield, was cut from an ash-tree on this mountain, and thence received its name of *Pelias*. (*Hom.*, *Il.*, 16, 144.)—II. A city of Illyria, on the Macedonian border, and commanding a pass leading into that country. It was a place of considerable importance from its situation; and Arrian speaks of it at some length in his relation of an attack made upon it by Alexander. (*Exp. Al.*, 1, 5, *seqq.*) We must look for it, most probably, in the mountains which separate the district of *Castoria* (the ancient *Orestis*) from that of *Okrida*. It cannot have been far from the modern town of

Dichlistas, situated on a river of the same name.—(*Cramer's Anc. Greece*, vol. 1, p. 76.)

PALLA, a city of Macedonia, near the top of the Sinus Thermaicus, on the confines of Emathia. It became the capital of the kingdom when Edessa was annihilated, according to Ptolemy, and owed its grandeur to Philip and to his son Alexander, who was born there, and who was hence styled *Pellæus Juvenis* by the Roman poets. According to Stephanus Byzantinus, its more ancient appellation was Bunomus and Bunomeia, which it exchanged for the name of its founder Pellæas. Livy describes it as situate on a hill which faced the southwest, and surrounded with morasses formed by stagnant waters from the adjacent lakes, so deep as to be impassable either in winter or in summer. In the morass nearest the city, the citadel rose up like an island, being built on a mound of earth formed with immense labour, so as to be capable of supporting the wall, and secure against any injury from the surrounding moisture. At a distance it seemed to join the city rampart, but it was divided from it by a river which ran between, and over which was a bridge of communication. This river was called Ludias, Loddias, and Lydius. (*Liv.*, 44, 46.) The baths of Pella were said to be injurious to health, producing bilious complaints, as we are informed by the comic poet Macho. (*Athen.*, 8, 41.) Pella, under the Romans, was made the chief town of the third region of Macedonia. (*Liv.*, 45, 29.) It was situated on the Via Egnatia, according to Strabo (328) and the Itineraries. From the coins of this city we may infer that it was colonized by Julius Cæsar. Under the late emperors it assumed the title of *Col. Jul. Pella*; and it is probable, as Mannert has observed, that in the reign of Dioclesian this name was exchanged for Dioclesianopolis, which we find in the Antonine Itinerary (p. 330.—*Mannert, Geogr.*, vol. 7, p. 479). Its ancient appellation, however, still remained in use, as may be seen from Jornandes (*R. G.*, 56) and Hierocles (*Synecdem.*, p. 638). The ruins of Pella are yet visible on the spot called *Palatisa* or *Alaklisi* by the Turks. "Il ne reste plus de Pella," says Beaujour, "que quelques ruines insignifiantes; mais on voit encore le pourtour de son magnifique port, et les vestiges du canal qui joignoit ce port à la mer par le niveau le mieux entendu. Les mosquées de *Jemidjé* ont été bâties avec les débris des palais des rois Macédoniens." (*Tableau du Commerce de la Grèce*, vol. 1, p. 87.—*Cramer's Anc. Greece*, vol. 1, p. 225.)

PELLÈNE, a city of Achaia, southwest of Sicyon, situate on a lofty and precipitous hill about sixty stadia from the sea. From the nature of its position, the town was divided into two distinct parts. (*Pausan.*, 7, 28.—*Strabo*, 386.) Its name was derived either from the Titan Pallas, or Pellen, an Argive, who was son of Phorbas. (*Apollon., Arg.*, 1, 176.—*Hom.*, *Il.*, 2, 574.) The Pellenians alone among the Achæans first aided the Lacedæmonians in the Peloponnesian war, though afterward all the other states followed their example. (*Thucyd.*, 2, 9.) They were often engaged in hostilities with their neighbours the Phliasiens and Sicyonians. (*Xen., Hist. Gr.*, 7, 2.) Pellene was celebrated for its manufacture of woollen cloaks, which were given as prizes to the riders at the gymnastic games held there in honour of Mercury. (*Pindar, Olymp.*, 9, 146.) The ruins of Pellene are to be seen not far from *Tricala*, as we are assured by Sir W. Gell, who obtained his information from Col. Leake. (*Itin. of the Morea*, p. 20.—*Cramer's Anc. Greece*, vol. 3, p. 55.)

PELOPÆA or PELOPÆA, a daughter of Thyestes, the brother of Atreus. She became, by her own parent, the mother of Ægisthus. (*Vid.* Atreus.)

PELOPIDAS, son of Hippocles, belonged to one of the principal families of Thebes. He distinguished himself at the battle of Mantinea (B.C. 385), in which the

Thebans took part as allies of the Lacedæmonians, under the Spartan king Agesipolis. In this battle, Pelopidas being wounded and thrown down, was saved from death by Epaminondas, who protected him with his shield, maintaining his ground against the Arcadians until the Lacedæmonians came to their relief, and saved both their lives. From that time a close friendship was formed between Epaminondas and Pelopidas, which lasted till the death of the latter. When the Lacedæmonians surprised the citadel of Thebes, and established the power of the aristocracy in that city, Pelopidas, who belonged to the popular party, retired to Athens, together with a number of other citizens. After a time, he and his brother exiles formed a plan, with their friends in Thebes, for surprising and overthrowing the oligarchy, and restoring the popular government. Pelopidas and some of his friends set off from Athens disguised as hunters, found means to enter Thebes unobserved, and concealed themselves in the house of a friend, whence they issued in the night, and, having surprised the leaders of the aristocratic party, put them to death. The people then rose in arms, and, having proclaimed Pelopidas their commander, they obliged the Spartan garrison to surrender the citadel by capitulation (B.C. 379). Pelopidas soon after contrived to excite a war between Sparta and Athens, and thus divide the attention of the former power. The war between the Thebans and the Lacedæmonians was carried on for some years in Boeotia by straggling parties, and Pelopidas, having obtained the advantage in several skirmishes, ventured to encounter the enemy in the open field at Tegyra, near Orchomenus. The Lacedæmonians were defeated, and thus Pelopidas demonstrated, for the first time, that the armies of Sparta were not invincible; a fact which was afterward confirmed by the battle of Leuctra (B.C. 371), in which Pelopidas fought under the command of his friend Epaminondas. In the year 369 B.C., the two friends, being appointed two of the Boeotarchs (*Plut., Vit. Pelop.*, c. 24), marched into the Peloponnesus, obliged Argos, and Arcadia, and other states to renounce the alliance of Sparta, and carried their incursions into Laconia in the depth of winter. Having conquered Messenia, they invited the descendants of its former inhabitants, who had gone into exile about two centuries before, to come and repopulate their country. They thus confined the power of Sparta to the limits of Laconia. Pelopidas and Epaminondas, on their return to Thebes, were tried for having retained the command after the expiration of the year of their office, but were acquitted; and Pelopidas was afterward employed against Alexander, tyrant of Phææ, who was endeavouring to make himself master of all Thessaly. He defeated him. From Thessaly he was called into Macedonia, to settle a quarrel between Alexander, king of that country, and son of Amyntas II., and his natural brother Ptolemy. Having succeeded in this, he returned to Thebes, bringing with him Philip, brother of Alexander, and thirty youths of the chief families of Macedonia as hostages. A year after, however, Ptolemy murdered his brother Alexander, and took possession of the throne. Pelopidas, being applied to by the friends of the late king, enlisted a band of mercenaries, with which he marched against Ptolemy, who entered into an agreement to hold the government only in trust for Perdiccas, a younger brother of Alexander, till he was of age, and to keep the alliance of Thebes; and he gave to Pelopidas his own son Philoxenus and fifty of his companions as hostages. Some time after, Pelopidas, being in Thessaly, was treacherously surprised and made prisoner by Alexander of Phææ, but the Thebans sent Epaminondas with an army, who obliged the tyrant to release him. The Thebans, soon after, having discovered that the Spartans and Athenians had sent ambassadors to conclude an alliance with Artaxerxes, king

of Persia, sent on their part Pelopidas to support their own interest at the same court. His fame had preceded him, and he was received by the Persians with great honour, and Artaxerxes showed him peculiar favour. Pelopidas obtained a treaty, in which the Thebans were styled the king's hereditary friends, and in which the independence of each of the Greek states, including Messenia, was fully recognised. He thus disappointed the ambition of Sparta and of Athens, which aimed at the supremacy over the rest. The Athenians were so enraged at this, that they put their ambassador Timagoras to death on his return to Athens. Pelopidas, after his return, was appointed to march against Alexander of Phææ, who had committed fresh encroachments in Thessaly. But, when the army was on the point of marching, an eclipse of the sun took place, which so dismayed the Thebans that Pelopidas was obliged to set off with only 300 volunteers, trusting to the Thessalians, who joined him on the route. Alexander met him with a large army at a place called Cynosephalæ. Pelopidas, by great exertions, although his army was much inferior in numbers, obtained an advantage, and the troops of Alexander were retreating, when Pelopidas, venturing too far amid the enemy, was slain. The grief of both Thebans and Thessalians at his loss was unbounded: they paid splendid funeral honours to his remains. The Thebans avenged his death by sending a fresh army against Alexander, who was defeated, and was soon after murdered by his own wife.—Pelopidas was not only one of the most distinguished and successful commanders of his age, but he and his friend Epaminondas rank among the most estimable public men of ancient Greece. (*Plut., Vit. Pelop.—Xen., Hist. Gr.—Pausan., 9, 13, &c.—Encycl. Us. Knowl.*, vol. 17, p. 388, *seq.*)

PELOPONNESIACUM BELLUM is the name given to the great contest between Athens and her allies on the one side, and the Peloponnesian confederacy, headed by Sparta, on the other, which lasted from 431 to 404 B.C. The war was a consequence of the jealousy with which Sparta and Athens regarded each other, as states each of which was aiming at supremacy in Greece, as the heads respectively of the Dorian and Ionian races, and as patrons of the two opposite forms of civil government, oligarchy and democracy. The war was eagerly desired by a strong party in each of those states; but it was necessary to find an occasion for commencing hostilities, especially as a truce for thirty years had been concluded between Athens and Sparta in the year B.C. 445. Such an occasion was presented by the affairs of Corcyra and Potidæa. In a quarrel, which soon became a war, between Corinth and Corcyra, respecting Epidamnus, a colony of the latter state (B.C. 436), the Corcyreans applied to Athens for assistance. Their request was granted, as far as the conclusion of a defensive alliance between Athens and Corcyra, and an Athenian fleet was sent to their aid, which, however, soon engaged in active hostilities against the Corinthians. Potidæa, on the isthmus of Pallene, was a Corinthian colony, and, even after its subjection to Athens, continued to receive every year from Corinth certain functionaries or officers (*ἐπίδοκοι*). The Athenians, suspecting that the Potidæans were inclined to join in a revolt, to which Perdiccas, king of Macedon, was instigating the towns of Chalcidice, required them to dismiss the Corinthian functionaries, and to give other pledges of their fidelity. The Potidæans refused; and, with most of the other Chalcidic towns, revolted from Athens, and received aid from Corinth. The Athenians sent an expedition against them, and, after defeating them in battle, laid siege to Potidæa (B.C. 433). The Corinthians now obtained a meeting of the Peloponnesian confederacy at Sparta, in which they complained of the conduct of Athens with regard to Corcyra and Potidæa. After others of the allies had brought their charges against Athens, and

after some of the Athenian envoys, who happened to be in the city, had defended the conduct of their state, the Spartans first, and afterward all the allies, decided that Athens had broken the truce, and they resolved upon immediate war; King Archidamus alone recommended some delay. In the interval necessary for preparation, an attempt was made to throw the blame of commencing hostilities upon the Athenians, by sending three several embassies to Athens with demands of such a nature as could not be accepted. In the assembly which was held at Athens to give a final answer to these demands, Pericles, who was now at the height of his power, urged the people to engage in the war, and laid down a plan for the conduct of it. He advised the people to bring all their moveable property from the country into the city, to abandon Attica to the ravages of the enemy, and not to suffer themselves to be provoked to give them battle with inferior numbers, but to expend all their strength upon their navy, which might be employed in carrying the war into the enemy's territory, and in collecting supplies from subject states; and farther, not to attempt any new conquest while the war lasted. His advice was adopted, and the Spartan envoys were sent home with a refusal of their demands, but with an offer to refer the matters in difference to an impartial tribunal, an offer which the Lacedæmonians had no intention of accepting. After this, the usual peaceful intercourse between the rival states was discontinued. Thucydides (2, 1) dates the beginning of the war from the early spring of the year 431 B.C., the fifteenth of the thirty years' truce, when a party of Thebans made an attempt, which at first succeeded, but was ultimately defeated, to surprise Plataea. The truce being thus openly broken, both parties addressed themselves to the war. The Peloponnesian confederacy included all the states of Peloponnesus except Achaia (which joined them afterward) and Argos, and without the Peloponnesus, Megaris, Phocis, Locris, Boeotia, the island of Leucas, and the cities of Ambracia and Anactorium. The allies of the Athenians were Chios and Lesbos, besides Samos and the other islands of the Ægean which had been reduced to subjection (Thera and Melos, which were still independent, remained neutral), Plataea, the Messenian colony in Naupactus, the majority of the Acarnanians, Corcyra, Zacynthus, and the Greek colonies in Asia Minor, in Thrace and Macedonia, and on the Hellespont. The resources of Sparta lay chiefly in her land forces, which, however, consisted of contingents from the allies, whose period of service was limited; the Spartans were also deficient in money. The Athenian strength lay in their fleet, which was manned chiefly by foreign sailors, whom the wealth they collected from their allies enabled them to pay. Thucydides informs us, that the cause of the Lacedæmonians was the more popular, as they professed to be deliverers of Greece, while the Athenians were fighting in defence of an empire which had become odious through their tyranny, and to which the states which yet retained their independence feared to be brought into subjection. In the summer of the year 431 B.C., the Peloponnesians invaded Attica under the command of Archidamus, king of Sparta. Their progress was slow, as Archidamus appears to have been still anxious to try what could be done by intimidating the Athenians before proceeding to extremities. Yet their presence was found to be a greater calamity than the people had anticipated; and, when Archidamus made his appearance at Acharæ, they began loudly to demand to be led out to battle. Pericles firmly adhered to his plan of defence, and the Peloponnesians returned home. Before their departure the Athenians had sent out a fleet of 100 sail, which was joined by fifty Corcyrean ships, to waste the coasts of Peloponnesus; and towards the autumn Pericles led the whole disposable force of the city into Megaris, which he laid

waste. In the same summer the Athenians expelled the inhabitants of Ægina from their island, which they colonized with Athenian settlers. In the winter there was a public funeral at Athens for those who had fallen in the war, and Pericles pronounced over them an oration, the substance of which is preserved by Thucydides (2, 35-46). In the following summer (B.C. 430) the Peloponnesians again invaded Attica under Archidamus, who now entirely laid aside the forbearance which he had shown the year before, and left scarcely a corner of the land unravaged. This invasion lasted forty days. In the mean time, a grievous pestilence broke out in Athens, and raged with the more virulence on account of the crowded state of the city. Of this terrible visitation Thucydides, who was himself a sufferer, has left a minute and apparently faithful description (2, 46, *seq.*). The murmurs of the people against Pericles were renewed, and he was compelled to call an assembly to defend his policy. He succeeded so far as to prevent any overtures for peace being made to the Lacedæmonians, but he himself was fined, though immediately afterward he was re-elected general. While the Peloponnesians were in Attica, Pericles led a fleet to ravage the coasts of Peloponnesus. In the winter of this year Potidæa surrendered to the Athenians on favourable terms. (*Thucyd.*, 2, 70.) The next year (B.C. 429), instead of invading Attica, the Peloponnesians laid siege to Plataea. The brave resistance of the inhabitants forced their enemies to convert the siege into a blockade. In the same summer, an invasion of Acarnania by the Ambracians and a body of Peloponnesian troops was repulsed; and a large Peloponnesian fleet, which was to have joined in the attack on Acarnania, was twice defeated by Phormion in the mouth of the Corinthian gulf. An expedition sent by the Athenians against the revolted Chalcidian towns was defeated with great loss. In the preceding year (B.C. 430) the Athenians had concluded an alliance with Sitalces, king of the Odrysæ in Thrace, and Perdiccas, king of Macedon, on which occasion Sitalces had promised to aid the Athenians to subdue their revolted subjects in Chalcidice. He now collected an army of 150,000 men, with which he first invaded Macedonia, to revenge the breach of certain promises which Perdiccas had made to him the year before, and afterward laid waste the territory of the Chalcidians and Bottians, but he did not attempt to reduce any of the Greek cities. About the middle of this year Pericles died. The invasion of Attica was repeated in the next summer (428 B.C.); and, immediately afterward, all Lesbos except Methymne revolted from the Athenians, who laid siege to Mytilene. The Mytilenians begged aid from Sparta, which was promised, and they were admitted into the Spartan alliance. In the same winter a body of Plataeans, amounting to 220, made their escape from the besieged city in the night, and took refuge in Athens. In the summer of 427 the Peloponnesians again invaded Attica, while they sent a fleet of 42 galleys, under Alcidas, to the relief of Mytilene. Before the fleet arrived Mytilene had surrendered, and Alcidas, after a little delay, sailed home. In an assembly which was held at Athens to decide on the fate of the Mytilenians, it was resolved, at the instigation of Cleon, that all the adult citizens should be put to death, and the women and children made slaves; but this barbarous decree was repealed the next day. The land of the Lesbians (except Methymne) was seized and divided among Athenian citizens, to whom the inhabitants paid a rent for the occupation of their former property. In the same summer the Plataeans surrendered; they were massacred, and their city was given up to the Thebans, who razed it to the ground. In the year 426 the Lacedæmonians were deterred from invading Attica by earthquakes. An expedition against Ætolia, under the Athenian general Demoe-

thenes, completely failed; but afterward Demosthenes and the Acarnanians routed the Ambracians, who nearly all perished. In the winter (426-5) the Athenians purified the island of Delos, as an acknowledgment to Apollo for the cessation of the plague. At the beginning of the summer of 425, the Peloponnesians invaded Attica for the fifth time. At the same time, the Athenians, who had long directed their thoughts towards Sicily, sent a fleet to aid the Leontini in a war with Syracuse. Demosthenes accompanied this fleet, in order to act, as occasion might offer, on the coast of Peloponnesus. He fortified Pylus on the coast of Messenia, the northern headland of the modern Bay of Navarino. In the course of the operations which were undertaken to dislodge him, a body of Lacedæmonians, including several noble Spartans, got blockaded in the island of Sphacteria, at the mouth of the bay, and were ultimately taken prisoners by Cleon and Demosthenes. Pylus was garrisoned by a colony of Messenians, in order to annoy the Spartans. After this event the Athenians engaged in vigorous offensive operations, of which the most important was the capture of the island of Cythera by Nicias early in B.C. 424. This summer, however, the Athenians suffered some reverses in Boeotia, where they lost the battle of Delium, and on the coasts of Macedonia and Thrace, where Brasidas, among other exploits, took Amphipolis. The Athenian expedition to Sicily was abandoned, after some operations of no great importance, in consequence of a general pacification of the island, which was effected through the influence of Hermocrates, a citizen of Syracuse. In the year 423, a year's truce was concluded between Sparta and Athens, with a view to a lasting peace. Hostilities were renewed in 422, and Cleon was sent to cope with Brasidas, who had continued his operations even during the truce. A battle was fought between these generals at Amphipolis, in which the defeat of the Athenians was amply compensated by the double deliverance which they experienced in the deaths both of Cleon and Brasidas. In the following year (421) Nicias succeeded in negotiating a peace with Sparta for fifty years, the terms of which were, a mutual restitution of conquests made during the war, and the release of the prisoners taken at Sphacteria. This treaty was ratified by all the allies of Sparta except the Boeotians, Corinthians, Eleans, and Megarians. This peace never rested on any firm basis. It was no sooner concluded than it was discovered that Sparta had not the power to fulfil her promises, and Athens insisted on their performance. The jealousy of the other states was excited by a treaty of alliance which was concluded between Sparta and Athens immediately after the peace; and intrigues were commenced for the formation of a new confederacy, with Argos at the head. An attempt was made to draw Sparta into alliance with Argos, but it failed. A similar overture, subsequently made to Athens, met with better success, chiefly through an artifice of Alcibiades, who was at the head of a large party hostile to the peace, and the Athenians concluded a treaty offensive and defensive with Argos, Elis, and Mantinea for 100 years (B.C. 420). In the year 418, the Argive confederacy was broken up by their defeat at the battle of Mantinea, and a peace, and soon after an alliance, was made between Sparta and Argos. In the year 416 an expedition was undertaken by the Athenians against Melos, which had hitherto remained neutral. The Melians surrendered at discretion; all the males who had attained manhood were put to death; the women and children were made slaves; and subsequently 500 Athenian colonists were sent to occupy the island. (*Thucyd.*, 5, 116.) The fifty years' peace was not considered at an end, though its terms had been broken on both sides, till the year 415, when the Athenians undertook their disastrous expedition to Sicily.

(*Vid.* SYRACUSE.) Sicily proved a rock against which their resources and efforts were fruitlessly expended. And Sparta, which furnished but a commander and a handful of men for the defence of Syracuse, soon beheld her antagonist reduced, by a series of unparalleled misfortunes, to a state of the utmost distress and weakness. The accustomed procrastination of the Spartans, and the timid policy to which they ever adhered, alone preserved Athens in this critical moment, or at least retarded her downfall. Time was allowed for her citizens to recover from the panic and consternation occasioned by the news of the Sicilian disaster; and, instead of viewing the hostile fleets, as they had anticipated, ravaging their coasts and blockading the Piræus, they were enabled still to dispute the empire of the sea, and to preserve the most valuable of their dependancies. Alcibiades, whose exile had proved so injurious to his country, since it was to his counsels alone that the successes of her enemies are to be attributed, now interposed in her behalf, and by his intrigues prevented the Persian satrap, Tissaphernes, from placing at the disposal of the Spartan admiral that superiority of force which must at once have terminated the war by the complete overthrow of the Athenian republic. (*Thucyd.*, lib., 8.) The temporary revolution which was effected at Athens by his contrivance also, and which placed the state at variance with the fleet and army stationed at Samos, afforded him another opportunity of rendering a real service to his country by moderating the violence and animosity of the latter. The victory of Cynossema and the subsequent successes of Alcibiades, now elected to the chief command of the forces of his country, once more restored Athens to the command of the sea, and, had she reposed that confidence in the talents of her general which they deserved and her necessities required, the efforts of Sparta and the gold of Persia might have proved unavailing. But the second exile of Alcibiades, and, still more, the iniquitous sentence which condemned to death the generals who fought and conquered at Arginusæ, sealed the ruin of Athens; and the battle of Argos Potamos at length terminated a contest which had been carried on, with scarcely any intermission, during a period of twenty-seven years, with a spirit and animosity unparalleled in the annals of warfare. Lysander now sailed to Athens, receiving as he went the submission of the allies, and blockaded the city, which surrendered after a few months (B.C. 404) on terms dictated by Sparta, with a view of making Athens a useful ally by giving the ascendancy in the state to the oligarchical party. The history of the Peloponnesian war was written by Thucydides, upon whose accuracy and impartiality, as far as his narrative goes, we may place the fullest dependence. His history ends abruptly in the year 411 B.C. For the rest of the war we have to follow Xenophon and Diodorus. The value of Xenophon's history is impaired by his prejudices, and that of Diodorus by his carelessness. (*Encycl. Us. Knowl.*, vol. 17, p. 389, seq.—*Cramer's Ancient Greece*, vol. 2, p. 299, seq.)

PELOPONNĒSUS (Πελοπόννησος), that is, according to the commonly-received explanation, "the island of Pelops" (Πέλοπος νῆσος), a celebrated peninsula, comprehending the most southern part of Greece, and which would be an island were it not for the Isthmus of Corinth. Its name is said to have been derived from Pelops, who is reported by the later Greek mythologists to have been of Phrygian origin. Thucydides, however (1, 9), simply observes that he came from Asia, and brought great wealth with him. He married Hippodamia, the daughter of CENOMANUS, king of Pisa in Elis, and succeeded to his kingdom. Pelops is said also to have subsequently extended his dominions over many of the districts bordering upon Elis, whence the whole country, according to the common account, obtained the name of Peloponnesus. Aga-

memnon and Menelaüs were descended from him.—Such is the mythic legend relative to the origin of the name Peloponnesus. The word, however, does not occur in Homer. The original name of the peninsula appears to have been *Apia* (*Hom., Il., 1, 270.—Id. ib., 3, 49*), and it was so called, according to *Æschylus* (*Suppl., 255*), from *Apia*, a son of *Apollo*, or, according to *Pausanias* (2, 5, 5), from *Apia*, a son of *Telchin*, and descendant of *Ægialeus*. When *Argos* had the supremacy, the peninsula, according to *Strabo* (371), was sometimes called *Argos*; and, indeed, *Homer* seems to use the term *Argos*, in some cases, as including the whole peninsula. (*Thucyd., 1, 9*.) The origin, therefore, of the name *Peloponnesus* still remains open to investigation. It is possible that *Pelops*, instead of having actually existed, may be merely a symbol representing an old race by the name of *Pelopes*, according to the analogy which we find in the national appellations of the *Dryopes*, *Meropes*, *Dolopes*, and others. The *Peloponnesus*, then, will have derived its name from this old race, and the very term *Pelopes* (*Pel-opes*) itself will receive something like confirmation from the ingenious remarks of *Buttmann* relative to the early population along the shores of the Mediterranean. (*Vid. Apia, and Opici.*) After the line of the mythic *Pelops* had become celebrated in epic poetry as the lords of all *Argos* and of many islands, the name of *Peloponnesus* would appear to have come into general use, and, by a common error, to have been transferred from the race or nation of the *Pelopes* to their fabulous leader. (*Vid. Pelops.*)—*Peloponnesus*, though inferior in extent to the northern portion of Greece, may be looked upon, says *Strabo*, as the acropolis of *Hellas*, both from its position, and the power and celebrity of the different people by which it was inhabited. In shape it resembled the leaf of a plane-tree, being indented by numerous bays on all sides. (*Strab., 335.—Plin., 4, 5.—Dionys. Per., 403.*) It is from this circumstance that the modern name of *Mores* is doubtlessly derived, that word signifying a mulberry leaf.—*Strabo* estimates the breadth of the peninsula at 1400 stadia from *Cape Chelonatas*, now *Cape Tornese*, its westernmost point, to the isthmus, being nearly equal to its length from *Cape Malea*, now *Cape St. Angelo*, to *Ægium*, now *Vostizza*, in *Achaia*. *Polybius* reckons its periphery, setting aside the sinuosities of the coast, at 4000 stadia, and *Artemidorus* at 4400; but, if these are included, the number of stadia must be increased to 5600. *Pliny* says that "*Isidorus* computed its circumference at 563 miles, and as much again if all the gulfs were taken into the account. The narrow stem from which it expands is called the isthmus. At this point the *Ægean* and *Ionian* seas, breaking in from opposite quarters north and east, eat away all its width, till a narrow neck of five miles in breadth is all that connects *Peloponnesus* with Greece. On one side is the *Corinthian*, on the other the *Saronic Gulf*. *Lecheum* and *Cenchrea* are situated on opposite extremities of the isthmus, a long and hazardous circumnavigation for ships, the size of which prevents their being carried over land in wagons. For this reason various attempts have been made to cut a navigable canal across the isthmus by *King Demetrius*, *Julius Cæsar*, *Caligula*, and *Nero*, but in every instance without success." (*Plin., 4, 5*).—On the north the *Peloponnesus* is bounded by the *Ionian Sea*, on the west by that of *Sicily*, to the south and southeast by that of *Libya* and *Crete*, and to the northeast by the *Myrtoan* and *Ægean*. These several seas form in succession five extensive gulfs along its shores: the *Corinthiacus Sinus*, now *Gulf of Corinth* or *Lepanto*, which separated the northern coast from *Ætolia*, *Locris*, and *Phocis*; the *Sinus Messeniæcus*, now *Gulf of Coron*, on the coast of *Messenia*; the *Sinus Laconicus*, now *Gulf of Colokythia*, on that of *Laconia*; the *Sinus Argolicus*, now *Gulf of Napoli*; and, lastly,

the *Sinus Saronicus*, a name derived from *Saron*, which in ancient Greek signified an oak leaf (*Plin., 4, 5*), now called *Gulf of Engia*. (*Strab., l. c.*)—The principal mountains of *Peloponnesus* are, those of *Cyllene* (*Zyria*) and *Erymanthus* (*Olonos*) in *Arcadia*, and *Taygetus* (*St. Elias*) in *Laconia*. Its rivers are, the *Alpheus*, now *Rouphia*, passing through *Arcadia* and *Elis*, and discharging itself into the *Sticilian Sea*; the *Eurotas*, or *Basiliopotamo*, watering *Laconia*, and falling into the *Sinus Laconicus*; the *Pamæus*, or *Piræatza*, a river of *Messenia*, falling into the *Sinus Messeniæcus*. The *Peloponnesus* contains but one small lake, which is that of *Stymphalus*, or *Zaracca*, in *Arcadia*.—According to the best modern maps, the area of the whole peninsula may be estimated at 7800 square miles; and in the more flourishing period of Grecian history, an approximate computation of the population of its different states furnishes upward of a million as the aggregate number of its inhabitants.—The divisions of the *Peloponnesus* were *Achaia*, *Elis*, *Messenia*, *Laconia*, *Argolis*, and *Arcadia*. (*Cramer's Anc. Greece*, vol. 3, p. 1, seqq.)

PELOPS, son of *Tantalus* king of *Phrygia*, and celebrated in both the mythic and historical legends of Greece. At an entertainment given to the gods by *Tantalus*, the latter, in order to try their divinity, is said to have killed and dressed his son *Pelops*, and to have set him for food before them. The assembled deities, however, immediately perceived the horrid nature of the banquet, and all abstained from it with the exception of *Ceres*, who, engrossed with the loss of her daughter *Proserpina*, in a moment of abstraction ate one of the shoulders of the boy. At the desire of *Jupiter*, *Mercury* put all the parts back into the caldron, and then drew forth the young *Pelops* alive again, and perfect in all his parts except the shoulder, which was replaced by an ivory one, that was said to possess the power of removing every disorder and healing every complaint by its touch. Hence, says the scholiast to *Pindar*, the descendants of *Pelops* had all such a shoulder as this (ροιστρον εἶχον τὸν ὤμον.—*Schol. ad Pind., Ol., 1, 38*). The ivory shoulder of *Pelops* became also a subject for the painter, as appears from *Philostratus* (*Imag., 1, 30, p. 897*), where *Pelops* is said ἀσπράσαι τὸ ὤμον, "to flash forth rays of light from his shoulder." The shoulder of the son of *Tantalus* also plays a conspicuous part in the legend of *Troy*. The soothsayers, it seems, had declared that the city of *Priam* would never be taken until the Greeks should have brought to their camp the arrows of *Hercules* and one of the bones of *Pelops*. Accordingly, the shoulder-blade (ὀμοπλάτην) of the son of *Tantalus* was brought from *Pisa* to *Troy*. (*Pausan., 5, 13, 3.—Böckh, ad Pind., l. c.*) Another legend states, that the *Palladium* in *Troy* was made of the bones of *Pelops*. (*Vid. Palladium.*)—But to return to the regular narrative: *Neptune*, attracted by the beauty of *Pelops*, carried him off in his golden car to *Olympus*, where he remained until his father *Tantalus* had drawn on himself the indignation of the gods, when they sent *Pelops* once more down to the "swift-fated race of men." (*Pind., Ol., 1, 60, seqq.*)—When *Pelops* had attained to manhood, he resolved to seek in marriage *Hippodamia*, the daughter of *Cenomaüs*, king of *Pisa*. An oracle having told this prince that he would lose his life through his son-in-law, or, as others say, being unwilling, on account of her surpassing beauty, to part with her, he proclaimed that he would give his daughter only to the one who should conquer him in the chariot-race. The race was from the banks of the *Cladius* in *Elis* to the altar of *Neptune* at the *Isthmus* of *Corinth*, and it was run in the following manner: *Cenomaüs*, placing his daughter in the chariot with the suitor, gave him the start; he himself followed with a spear in his hand, and, if he overtook the unhappy lover, he ran him through.—

Thirteen had already lost their lives when Pelops came. In the dead of the night, says Pindar, Pelops went down to the margin of the sea, and invoked the god who rules it. On a sudden Neptune stood at his feet, and Pelops conjured him, by the memory of his former affection, to grant him the means of obtaining the lovely daughter of Cénomaüs. Neptune heard his prayer, and bestowed upon him a golden chariot, and horses of winged speed. Pelops then went to Pisa to contend for the prize. He bribed Myrtilus, son of Mercury, the charioteer of Cénomaüs, to leave out the linchpins of the wheels of his chariot, or, as others say, to put in waxen ones instead of iron. In the race, therefore, the chariot of Cénomaüs broke down, and he fell out and was killed, and thus Hippodamia became the bride of Pelops. (*Schol. ad Pind., Ol., 1, 114.—Hygin., fab., 84.—Pind., Ol., 1, 114, seqq.—Apoll. Rhod., 1, 752.—Schol., ad loc.—Tzet., ad Lycophr., 156.*) Pelops is said to have promised Myrtilus, for his aid, one half of his kingdom, or, as other accounts have it, to have made a most dishonourable agreement of another nature with him. Unwilling, however, to keep his promise, he took an opportunity, as they were driving along a cliff, to throw Myrtilus into the sea, where he was drowned. To the vengeance of Mercury for the death of his son were ascribed all the future woes of the line of Pelops. (*Soph., Electr., 504, seqq.*) Hippodamia bore to Pelops five sons, Atreus, Thyestes, Copreus, Alcathoüs, and Pittheus, and two daughters, Nicippe and Lysidice, who married Sthenelus and Mestor, sons of Perseus.—The question as to the personality of Pelops has been considered in a previous article (*vid. Peloponnesus*), and the opinion has there been advanced which makes him to have been merely the symbol of an ancient race called Pelopes. To those, however, who are inclined to regard Pelops as an actual personage, the following remarks of Mr. Thirlwall may not prove uninteresting: "According to a tradition, which appears to be sanctioned by the authority of Thucydides, Pelops passed over from Asia to Greece with treasures, which, in a poor country, afforded him the means of founding a new dynasty. His descendants sat for three generations on the throne of Argos: their power was generally acknowledged throughout Greece; and, in the historian's opinion, united the Grecian states in the expedition against Troy. The renown of their ancestor was transmitted to posterity by the name of the southern peninsula, called after him Peloponnesus, or the isle of Pelops. Most authors, however, fix his native seat in the Lydian town of Sipylus, where his father Tantalus was fabled to have reigned in more than mortal prosperity, till he abused the favour of the gods, and provoked them to destroy him. The poetical legends varied as to the marvellous causes through which the abode of Pelops was transferred from Sipylus to Pisa, where he won the daughter and the crown of the bloodthirsty tyrant Cénomaüs as the prize of his victory in the chariot-race. The authors who, like Thucydides, saw nothing in the story but a political transaction, related that Pelops had been driven from his native land by an invasion of Ilus, king of Troy (*Pausan., 2, 22, 3*); and hence it has very naturally been inferred, that, in leading the Greeks against Troy, Agamemnon was merely avenging the wrongs of his ancestor. (*Kruse, Hellas, vol. 1, p. 485.*) On the other hand, it has been observed that, far from giving any countenance to this hypothesis, Homer, though he records the genealogy by which the sceptre of Pelops was transmitted to Agamemnon, nowhere alludes to the Asiatic origin of the house. As little does he seem to have heard of the adventures of the Lydian stranger at Pisa. The zeal with which the Eleans maintained this part of the story, manifestly with a view to exalt the antiquity and the lustre of the Olympic games, over

which they presided, raises a natural suspicion that the hero's connexion with the East may have been a mere fiction, occasioned by a like interest, and propagated by like arts. This distrust is confirmed by the religious form which the legend was finally made to assume when it was combined with an Asiatic superstition, which found its way into Greece after the time of Homer. The seeming sanction of Thucydides loses almost all its weight, when we observe that he does not deliver his own judgment on the question, but merely adopts the opinion of the Peloponnesian antiquaries, which he found best adapted to his purpose of illustrating the progress of society in Greece." (*Thirlwall's Greece, vol. 1, p. 70.*) Mr. Kenrick sees in Pelops the dark-faced one (*μελός* and *ὥψ*), and thinks that the reference is to a system of religion, characterized by dark and mysterious rites, which spread from Phrygia into Greece. (*Philol. Museum, No. 5, p. 353.*) For another explanation of the legend of Pelops, consult remarks under the article Tantalus.

PELÓRUS (*v. is-idis, v. ias-iados*), now Cape Faro, one of the three great promontories of Sicily. It lies near the coast of Italy, and is said to have received its name from Pelorus, the pilot of the ship which carried Hannibal away from Italy. This celebrated general, as it is reported, was carried by the tide into the straits between Italy and Sicily; and, as he was ignorant of the coast, and perceived no passage through (for, in consequence of the route which the vessel was pursuing, the promontories on either side seemed to join), he suspected the pilot of an intention to deliver him into the hands of the Romans, and killed him on the spot. He was soon, however, convinced of his error, and, to atone for his rashness and pay honour to his pilot's memory, he gave him a magnificent funeral, and called the promontory on the Sicilian shore after his name, having erected on it a tomb with a statue of Pelorus. (*Val. Max., 9, 8.—Mela, 2, 7.—Strab., 5.—Virg., Æn., 3, 411, 687.—Ovid, Met., 5, 350; 13, 727; 15, 706.*)—This whole story is fabulous; nor is that other one in any respect more worthy of belief, which makes the promontory in question to have derived its name from a colossal (*πελώριος*) statue of Orion placed upon it, and who was fabled to have broken through and formed the straits and promontory. (*Diod. Sic., 4, 85.—Mannert, Geogr., vol. 9, pt. 2, p. 264.*) The name is, in fact, much older than the days of Hannibal. Polybius, a contemporary of the Carthaginian commander, gives the appellation of Pelorius to this cape without the least allusion to the story of the pilot: Thucydides, long before the time of Hannibal, speaks of Peloris as being included in the territory of Messana (4, 25): and, indeed, it may be safely asserted that Hannibal never was in these straits.—The promontory of Pelorus is sandy, but Silius Italicus errs when he speaks of its being a lofty one (14, 79). It is a low point of land, and the sand-flats around contain some salt-meadows. Solinus describes them with an intermixture of fable (c. 11). The passage directly across to Italy is the shortest; but as there is no harbour here, and the current runs to the south, the route from the Italian shore is a southwestern one to Messana. The Italian promontory facing Pelorus is that of Cænya. (*Mannert, Geogr., vol. 9, pt. 2, p. 265.*)

PELTÆ, a city of Phrygia, southeast of Cotysum, mentioned by Xenophon in his narrative of the retreat of the Ten Thousand (1, 2). He describes it as well inhabited. Pliny (5, 27) speaks of Peltæ as belonging to the Conventus Juridicus of Apameæ. In the notices of the ecclesiastical writers it appears as the seat of a bishopric. Xenophon makes the distance between it and Celæne ten parasangs. We must look for the site of this place to the north of the Meander, and probably in the valley and plain formed by the

western branch of that river, now called *Asht-i-chai*, out formerly Glaucus. (*Cramer's Asia Minor*, vol. 2, p. 24.—*Mannert, Geogr.*, vol. 6, pt. 3, p. 104.—Compare *Kennell's Geography of Western Asia*, vol. 2, p. 141, *seqq.*, in *notis.*)

PELUSIUM, an important city of Egypt, at the entrance of the Pelusiac mouth of the Nile, and about 20 stadia from the sea. It was surrounded by marshes, and was with truth regarded as the key of Egypt in this quarter. An Arabian horde might indeed traverse the desert on this side without approaching Pelusium; but an invading army would be utterly unable to pass through this sandy waste, where water completely failed. The route of the latter would have to be more to the north, and here they would encounter Pelusium, surrounded with lakes and marshes, and which extended from the walls of the city down to the very coast. Hence it was that the Persian force sent against King Nectanebis did not venture to attack the city, but sailed into the Mendesian mouth with their vessels. (*Diod. Sic.*, 15, 42.) Subsequently, however, the Persians diverted the course of that arm of the Nile on which the city stood, and succeeded in throwing down the walls and taking the place. Pelusium, after this, was again more than once taken, and gradually sank in importance. Ptolemy does not even name it as the capital of a Nome. In the reign of Augustus, however, it became the chief city of the newly-erected province of Augustamnica. The name of this city is evidently of Grecian origin, and is derived from the term *πηλός*, *mud*, in allusion to its peculiar situation. It would seem to have received this name at a very early period, since Herodotus gives it as the usual one, without alluding to any older term. Most probably the appellation was first given under the latter Pharaohs, and a short time previous to the Persian sway, since about this time the Greeks were first allowed to have any regular commercial intercourse with the ports of Egypt. To give a more reputable explanation of the Grecian name than that immediately suggested by its root, the mythologists fabled that Peleus, the father of Achilles, came to this quarter, for the purpose of purifying himself, from the murder of his brother Phocus, in the lake that afterward washed the walls of Pelusium, being ordered so to do by the gods; and that he became the founder of the city. (*Ann. Marcell.*, 22, 16.)—As soon as the easternmost or Pelusiac mouth of the Nile was diverted from its usual course, Pelusium, as has already been remarked, began to sink in importance, and soon lost all its consequence as a frontier town, and even as a place of trade. It fell back eventually to its primitive mire and earth, the materials of which it was built having been merely burned bricks; and hence, among the ruins of Pelusium at the present day, there are no remains of stone edifices, no large temples; the ground is merely covered with heaps of earth and rubbish. Near the ruins stands a dilapidated castle or fortress named *Tinsh*, the Arabic term for "mire."

PENĀTES, a name given to a certain class of household deities among the Romans, who were worshipped in the innermost part of their dwellings. For the points of distinction between them and the Lares, consult the latter article.

PENELÖPE, a princess of Greece, daughter of Icarus, brother of Tyndarus king of Sparta, and of Polycaete or Periboea. She became the wife of Ulysses, monarch of Ithaca, and her marriage was celebrated about the same time with that of Menelaus and Helen. Penelope became by Ulysses the mother of Telemachus, and was obliged soon after to part with her husband, whom the Greeks compelled to go to the Trojan war. (*Vid. Ulysses.*) Twenty years passed away, and Ulysses returned not to his home. Meanwhile, his palace at Ithaca was crowded with numerous and

importunate suitors, aspiring to the hand of the queen. Her relations also urged her to abandon all thoughts of the probability of her husband's return, and not to disregard, as she had, the solicitations of the rival aspirants to her favour. Penelope, however, exerted every resource which her ingenuity could suggest to protract the period of her decision: among others, she declared that she would make choice of one of them as soon as she should have completed a web that she was weaving (intended as a funeral ornament for the aged Laertes); but she baffled their expectations by undoing at night what she had accomplished during the day. This artifice has given rise to the proverb of "Penelope's web," or "to unweave the web of Penelope" (*Penelopes telam retezzere*), applied to whatever labour appears to be endless. (*Erasm.*, *Adag. Chil.*, 1, cent. 4, col. 145.) For three years this artifice succeeded; but, on the beginning of a fourth, a disclosure was made by one of her female attendants; and the faithful and unhappy Penelope, constrained at length by the renewed importunities of her persecutors, agreed, at their instigation, to bestow her hand on him who should shoot an arrow from the bow of Ulysses through a given number of axe-eyes placed in succession. An individual disguised as a beggar was the successful archer. This was no other than Ulysses, who had just returned to Ithaca. The hero then directed his shafts at the suitors, and slew them all. (*Vid. Ulysses.*)—The character of Penelope has been variously represented; but it is the more popular opinion that she is to be considered as a model of conjugal and domestic virtue. (*Apollod.*, 3, 10, 11.—*Heyne, ad loc.*—*Hom., Od.*—*Hygin., fab.*, 127.—*Ovid, Her. Ep.*, 1.)

PENĒVS, I. a river of Thessaly, rising in the chain of Pindus, and falling into the Sinus Thermaicus after traversing the whole breadth of the country. Towards its mouth it flows through the celebrated Vale of Tempe. (*Vid. Tempe.*) It seems to have been the general opinion of antiquity, founded on very early traditions, that the great basin of Thessaly was at some remote period covered by the waters of the Peneus and its tributary rivers, until some convulsion of nature had rent asunder the gorge of Tempe, and thus afforded a passage to the pent-up streams. This opinion, which was first reported by Herodotus in his account of the march of Xerxes (7, 129), is repeated by Strabo, who observes in confirmation of it, that the Peneus in his day was still liable to frequent inundations, and also that the land in Thessaly is higher towards the sea than towards the more central parts. (*Strab.*, 430.) The Peneus is called Salambría by Tzetzes (*Chil.*, 9, 707), and Salabria and Salampría by some of the Byzantine historians, which name appears to be derived from *σαλάβρη*, "an outlet," and was applicable to it more particularly at the Vale of Tempe, where it has forced a passage through the rocks of Ossa and Olympus. (*Dodwell, Tour*, vol. 2, p. 102.) The Peneus is said to be never dry, though in summer it is shallow: after heavy rains, and the sudden melting of the snow on Pindus, it sometimes overflows its banks, when the impetuous torrent of its waters sweeps away houses and inundates the neighbouring plain. *Ælian*, in his description of Tempe (*V. H.*, 3, 1), makes the Peneus flow through the vale as smoothly as oil; and *Dodwell* remarks, that, in its course through the town of Larissa, it has at the present day a surface as smooth as oil. The intelligent traveller well mentioned observes in relation to this river, "Many authors have extolled the diaphanous purity of the Peneus, although it must in all periods have exhibited a muddy appearance, at least during its progress through the Thessalian plain; for who can expect a current of lucid crystal in an argillaceous soil? Strabo, Pliny, and others have misunderstood the meaning of Homer (*Il.*, 2, 766) when he speaks of the confluence of the silvery

Peneus and the beautiful Titaresius, which he says do not mix their streams, the latter flowing like oil on the silver waters of the former. Strabo, in complete contradiction to the meaning of Homer, asserts that the Peneus is clear, and the Titaresius muddy. Pliny has committed the same error. The mud of the Peneus is of a light colour, for which reason Homer gives it the epithet of silvery. The Titaresius, and other smaller streams, which are rolled from Olympus and Ossa, are so extremely clear, that their waters are distinguished from those of the Peneus to a considerable distance from the point of their confluence. Barthelmy has followed Strabo and Pliny, and has given an interpretation to the descriptive lines of Homer which the original was never intended to convey. The same effect is seen when muddy rivers of considerable volume mingle with the sea or any other clear water." (*Tour*, vol. 2, p. 110.)—II. A river of Elis, now the *Igliaco*, falling into the sea a short distance below the promontory of Chelonatas. Modern travellers describe it as a broad and rapid stream. (*Itin. of the Morea*, p. 32.) The city of Elis was situate in the upper part of its course. (*Strab.*, 387.—*Cramer's Anc. Greece*, vol. 2, p. 86.)

PENNINE ALPES, a part of the chain of the Alps, extending from the *Great St. Bernard* to the source of the Rhone and Rhine. The name is derived from the Celtic *Penn*, a summit. (*Vid.* Alps.)

PENTAPOLIS, I. a town of India, placed by Mannert in the northeastern angle of the Sinus Gangeticus, or *Bay of Bengal*.—II. A name given to Cyrenaica in Africa, from its five cities. (*Vid.* Cyrenaica).—III. A part of Palestine, containing the five cities of Gaza, Gath, Ascalon, Azotus, and Ekron.—IV. A name applied to Doris in Asia Minor, after Halicarnassus had been excluded from the Doric confederacy. (*Vid.* Doris.)

PENTELICUS, a mountain of Attica, containing quarries of beautiful marble. According to Dodwell (*Tour*, vol. 1, p. 498), it is separated from the northern foot of Hymettus, which in the narrowest part is about three miles broad. It shoots up into a pointed summit; but the outline is beautifully varied, and the greater part is either mantled with woods or variegated with shrubs. Several villages and some monasteries and churches are seen near its base.—According to Sir W. Gell, the great quarry is forty-one minutes distant from the monastery of Penteli, and affords a most extensive prospect from Cithæron to Sunium. (*Itin.*, p. 64.) "Mount Pentelicus," observes Hobhouse, "at this day called *Pendele*, and sometimes *Mendele*, must be, I should think, one third higher than Hymettus, and its height is the more apparent, as it rises with a peaked summit into the clouds. The range of Pentelicus runs from about northwest to southeast, at no great distance from the eastern shore of Attica overhanging the plain of Marathon, and mixing imperceptibly, at its northern extremity, with the hills of Brilessus, now called, as well as part of Mount Parnes, *Ossa*." (*Hobhouse, Journey*, vol. 1, p. 235, *seqq.*)—Interesting accounts of visits to the quarries are given by Dodwell and Hobhouse.

PENTHEILIA, a celebrated queen of the Amazons, daughter of Mars, who came to the aid of Priam in the last year of the Trojan war, and was slain by Achilles after having displayed great acts of valour. According to Tzetzes, Achilles, after he had slain Penthesilea, admiring the prowess which she had exhibited, and struck by the beauty of the corpse, wished the Greeks to erect a tomb to her. Therites, thereupon, both ridiculed the grief which the hero testified at her fall, and indulged in other remarks so grossly offensive that Achilles slew him on the spot. Diomedes, the relative of Therites, in revenge for his loss, dragged the dead body of the Amazon out of the camp, and threw it into the Scamander. (*Tzetz. ad Lycophr.*, 900.—*Dict.*

Cret., 4, 3.—*Hayne ad Virg.*, *Æn.*, 1, 490.) Dares Phrygius, however, makes Penthesilea to have been slain by Neoptolemus. (*Dar. Phryg.*, 36.)

PENTHEUS, son of Echion and Agave, and king of Thebes in Boeotia. During his reign, Bacchus came from the East, and sought to introduce his orgies into his native city. The women all gave enthusiastically in to the new religion, and Mount Cithæron resounded with the frantic yells of the Bacchantes. Pentheus sought to check their fury; but, deceived by the god, he went secretly and ascended a tree on Cithæron, to be an ocular witness of their revels. While there he was desecrated by his mother and aunts, to whom Bacchus made him appear to be a wild beast, and he was torn to pieces by them. (*Eurip.*, *Baccha.*—*Apollod.*, 3, 5, 2.—*Ovid, Met.*, 3, 511, *seqq.*)

PEPARETHOS, a small island in the *Ægean Sea*, off the coast of Thessaly, and in a northeastern direction from Euboea. Pliny (4, 12) observes that it was formerly called *Erænus*, and assigns to it a circuit of nine miles. It was colonized by some Cretans, under the command of Staphylus. (*Scymn.*, *Ch.*, 579.) The island produced good wine (*Athen.*, 1, 61) and oil. (*Ovid, Met.*, 7, 470.) The town of Peparethos suffered damage from an earthquake during the Peloponnesian war. (*Thucyd.*, 3, 89.) It was defended by Philip against the Romans (*Liv.*, 28, 5), but was afterwards destroyed. (*Strab.*, 9, p. 436.)—Diocles, who wrote an early history of the origin of Rome, was a native of this island. (*Plut.*, *Vit. Rom.*—*Athen.*, 2, 44.) The modern name is *Piperi*. (*Cramer's Anc. Greece*, vol. 1, p. 453.)

PERÆA, I. a name given by the Greeks to that part of Judæa which lay east of Jordan, from its egress out of the Lake of Gennesareth to its entrance into the Dead Sea, and still lower down as far as the river Arnon. The term is derived from *πέραν*, *beyond*. (*Plin.*, 5, 14.)—II. A part of Caria, deriving its name from its lying over against Rhodes (*πέραν*, *beyond*, *over against*). It began at the promontory *Cynossema*, and is mentioned by Scylax (p. 38) under the name of *ἡ Περὶ τὴν ῥόδον*. Philip, king of Macedon, having seized upon it, was called upon by the Romans to restore it to Rhodes. (*Polyb.*, 17, 2, *seq.*—*Liv.*, 32, 33.) The Rhodians, however, were obliged to recover this territory by force of arms. (*Liv.*, 33, 18.)

PERCOTE, an ancient town of Mysia, south of Lampascus, and not far from the shores of the Hellespont. It appears to have been situate on the banks of the small river *Practius*. (*Il.*, 2, 835.) Chæron of Lampascus, cited by Strabo (583), reckoned 300 stadia from Parium to the *Practius*, which he looked upon as the northern boundary of the Troad. This distance serves to identify the stream with the river of *Bergas* or *Bergan*, a small Turkish town situated on its left bank, and which probably represents *Percote*. This place continued to exist long after the Trojan war, since it is spoken of by Herodotus (5, 117), Scylax (*Peripl.*, p. 35), Arrian (*Exp. Al.*, 1, 13), Pliny (5, 32), and others. It is named by some writers among the towns given to Themistocles by the King of Persia. (*Athenæus*, 1, p. 29.—*Plut.*, *Vit. Themist.*, c. 30.—*Cramer's Asia Minor*, vol. 1, p. 69, *seq.*)

PERDICCAS, I. the youngest of the three brothers who came from Argos and settled in Upper Macedonia, and who are said to have been descended from Temenus. (*Vid.* Macedonia.) The principality of which they became possessed devolved on Perdicas, who is therefore considered by both Herodotus (8, 137) and Thucydides (3, 99) as the founder of the Macedonian dynasty. Eusebius, however, names three kings before Perdicas I., thus making him the fourth Macedonian monarch. These are, Caranus, who reigned 28 years; Cænus, who reigned 12 years; and Tharimas, who continued on the throne for 38. Herodotus and Thucydides, however, omit all notice of these three mon-

archa, and begin with the dynasty of the Temenids. (Compare *Clinton, Fast. Hell.*, vol. 1, p. 231.) Little is known of the reign of Perdicas. On his deathbed he is said to have given directions to his son and successor Argæus, where he wished his remains to be interred; and to have told him also, that, as long as the remains of the Macedonian kings should be deposited in the same place, so long the crown would remain in his family. (*Justin*, 7, 2.—*Vid. Edessa II.*)—II. The second of the name, was son of Alexander I. of Macedon, and succeeded his father about 463 B.C. He was a fickle and dishonourable prince, who took an active part in the Peloponnesian war, and alternately assisted Athens and Sparta, as his interests or policy dictated. (*Thucyd.*, 1, 57, *seqq.*—*Id.*, 4, 79.—*Id.*, 2, 99, &c.) There is great uncertainty about the beginning and the length of this monarch's reign. Dodwell makes it commence within B.C. 454; but Alexander I. lived at least to B.C. 468, when Cimon recovered Thasos. (*Plut.*, *Vit. Cim.*, 14.) Mr. Clinton makes the last year of Perdicas to have been the third of the 91st Olympiad, or B.C. 414. (*Fast. Hell.*, vol. 1, p. 223.)—III. The third of the name, who succeeded Alexander II., after having cut off Ptolemy Alorites, who was acting as regent, but who had abused his trust. Perdicas, after a reign of five years, fell in battle against the Illyrians, B.C. 359. (*Diod. Sic.*, 16, 2.—*Clinton, Fast. Hell.*, vol. 1, p. 227.)—IV. Son of Orontes, was one of the generals of Alexander the Great, to whom that conqueror, on his deathbed, delivered his royal signet, thus apparently intending to designate him as protector or regent of his vast empire. Alexander's wife Roxana was then far advanced in pregnancy, and his other wife, Statira, the daughter of Darius, was supposed to be in the same situation. In the mean time, the Macedonian generals agreed to recognise as king, Aridæus, a natural son of Philip, a youth of weak intellects, with the understanding that, if the child of Roxana should prove a son, he should be associated in the throne with Aridæus. Perdicas contented himself with the command of the household troops which guarded the person of King Aridæus; but in that capacity he was in reality the guardian of the weak king and the minister of the whole empire. He distributed among the chief generals the government of the various provinces, or, rather, kingdoms, subject to Alexander's sway. Roxana being soon after delivered of a son, who was called Alexander, became jealous of Statira, from fear that the child she was pregnant with might prove a rival to her own son; and, in order to remove her apprehensions, Perdicas did not scruple to put Statira to death. He endeavoured to strengthen himself by an alliance with Antipater, whose daughter he asked in marriage, while, at the same time, he was aspiring to the hand of Cleopatra, Alexander's sister. Olympias, Alexander's mother, who hated Antipater, favoured this last alliance. Antipater, having discovered this intrigue, refused to give his daughter to Perdicas, who, in the end, obtained neither. The other generals, who had become satraps of extensive countries, considered themselves independent, and refused to submit to Perdicas and his puppet-king. Perdicas, above all, fearing Antigonus as the one most likely to thwart his views, sought to destroy him; but Antigonus escaped to Antipater in Macedonia, and represented to him the necessity of uniting against the ambitious views of Perdicas. Antipater, having just brought to a successful termination a war against the Athenians, prepared to march into Asia, and Ptolemy joined the confederacy against Perdicas. The latter, who was then in Cappadocia, with Aridæus and Alexander the infant son of Roxana, held a council, in which Antipater, Antigonus, and Ptolemy being declared rebels against the royal authority, the plan of the campaign against them was arranged. Eumenes, who remained faithful to

Perdicas, was appointed to make head against Antipater and Antigonus, while Perdicas, having with him the two kings, marched to attack Ptolemy in Egypt. He was, however, unsuccessful, owing to his ill-concerted measures; he lost a number of men in crossing a branch of the Nile, and the rest became discontented, and, in the end, Perdicas was murdered in his tent, B.C. 321, after holding his power for two years from the death of Alexander. (*Encycl. Useful Knowl.*, vol. 17, p. 435.)

PERDIX, nephew of Dædalus. He is said to have shown a great genius for mechanics; having, from the contemplation of a serpent's teeth, or, according to some, of the back bone of a fish, invented the saw. He also discovered the compasses. Dædalus, jealous of his skill, and apprehensive of the rivalry of the young man, cast him down from the Acropolis at Athens and killed him. The poets fabled that he was changed after death into the bird called *Perdis* or "partridge." (*Hygin.*, *fab.*, 274.—*Ovid, Met.*, 8, 241, *seqq.*) The cry of the partridge resembles very much the noise made by a saw in cutting wood, and this circumstance, in all likelihood, gave rise to the fable. (*Buffon, Hist. Nat.*, vol. 6, n. 25.—*Gierig, ad Ovid, l. c.*)

PERENNA. *Vid. Anna Perenna.*

PERGA or PERER (Πέργα or Πέρρη), a city of Pamphylia, at the distance of sixty stadia inland from the mouth of the river Cestrus. It was renowned for the worship of Diana Pergæa. The temple of the goddess stood on a hill near the city, and a festival was annually celebrated in her honour. (*Callim.*, *H. in Dian.*, 187.—*Strab.*, 667.) Alexander occupied Perga with part of his army after quitting Phaselis; and we are informed by Arrian that the road between these two places was long and difficult. (*Exp. Al.*, 1, 26.) Polybius leads us to suppose that Perga belonged rather to Pisidia than Pamphylia (5, 72, 9.—Compare 23, 25.—*Liv.*, 38, 37). We learn from the Acts of the Apostles (14, 24, *seq.*), that Paul and Barnabas, having "passed throughout Pisidia, came to Pamphylia. And when they had preached the word in Perga, they went down into Attalia." This was their second visit to the place, since they had come thither from Cyprus. It was here that John, surnamed Mark, departed from them; for which he incurred the censure of St. Paul. (*Acts* 13, 13.) Perga, in the Ecclesiastical Notices, and in Hierocles (p. 679), stands as the metropolis of Pamphylia. (Compare *Plin.*, 5, 28.—*Steph. Byz.*, s. v. Πέρρη.) The ruins of this city are probably those noticed by General Köhler, under the name of *Eski Kalesi*, between *Stauros* and *Adalia*. (*Leake's Asia Minor*, p. 132.) Mr. Fellows says, "The first object that strikes the traveller on arriving here (at Perga) is the extreme beauty of the situation of the ancient town, lying between and upon the sides of two hills, with an extensive valley in front, watered by the river Cestrus, and backed by the mountains of Taurus." He speaks also of the ruins here of an immense and beautiful theatre; and likewise of the remains of an enormous building, which he thinks can have been nothing but a palace of great extent. (*Fellows' Asia Minor*, p. 191.—*Cramer's Asia Minor*, vol. 2, p. 279.)

PERGÆUS (gen. -i, in the plural *Pergæa*, gen. -orum), the citadel or acropolis of Ilium (*Hom.*, *Il.*, 4, 508), and sometimes used by the poets as a term for the city itself. (*Senec.*, *Trac.*, 14.—*Id.*, *Agam.*, 421.—*Virg.*, *Æn.*, 1, 466, &c.) The relationship of the word Pergamus to the Greek πέργος and the Teutonic *berg*, is obvious. The names of the towns Berge in Thrace and Perge in Pamphylia, contain the same element *berg*. (Compare the Gothic *burgs*; the German *burg*, "a castle, fort, citadel;" the Irish *brag* and *brag*, "a grand house or building; a fortified place; a palace or royal residence," &c.) The writers on Linguistics seek to trace these and other cognate expressions to the Sanscrit root *pār* or *pār*, "to fill," "to

furnish," but with no very great success. (Consult remarks under the article *Mesembria*.—*Eichhoff, Parallele des Langues*, p. 348.—*Kaltackmidt, Vergleichung der Sprachen*, p. 238.)—II. or ΠΕΡΓΑΜΟΝ (Πέργανον or Πέργαμον), the most important city in Mysia, situate in the southern part of that country, in a plain watered by two small rivers, the Selinus and Cetus, which afterward joined the Caicus. This celebrated city is mentioned for the first time in Xenophon's *Anabasis* (7, 84). Xenophon remained here for some time as the guest of Gorgion and Gongylus, who appear to have been the possessors of the place. (Compare *Hist. Gr.*, 3, 1, 4.) It would seem to have been at first a fortress of considerable natural strength, situate on the top of a conical hill, and, when the city began to be formed around the base of this hill, the fortress served as a citadel. In consequence of the strength of the place, it was selected by Lysimachus, Alexander's general, as a place of security for the reception and preservation of his great wealth, said to amount to the enormous sum of 9000 talents. The care of this treasure was confided to Phileterus of Tium in Bithynia, in whom he placed the greatest confidence. Phileterus remained for a long time faithful to his charge; but, having been injuriously treated by Arsinoë, the wife of Lysimachus, who sought to prejudice the mind of her husband against him, he was induced to withdraw his allegiance from that prince, and declare himself independent. The misfortunes of Lysimachus prevented him from taking vengeance on the offender, and thus Phileterus remained in undisturbed possession of the town and treasure for twenty years, having contrived, by dexterous management and wise measures, to remain at peace with all the neighbouring powers. He transmitted the possession of his principality to Eumenes, his nephew. An account of the reign of this monarch, and of the other kings of Pergamus, has been already given. (*Vid.* Eumenes II., III.; Attalus I., II., III.)—After the death of Attalus III., who left his dominions by will to the Romans, Aristonicus, a natural son of Eumenes, the father of Attalus, opposed this arrangement, and endeavoured to establish himself on the throne; but he was vanquished and made prisoner, and the Romans finally took possession of the kingdom, which henceforth became a province of the empire under the name of Asia. (*Strab.*, 624, 646.) Pergamus continued to flourish and prosper as a Roman city, so that Pliny (5, 32) does not scruple to style it "*longe clarissimum Asiae Pergamum*." To the Christian the history of Pergamus affords an additional interest, since it is one of the seven churches of Asia mentioned in the Book of Revelations. Though condemnation is passed upon it as one of the churches infected by the Nicolaitan heresy, its faithful servants, more especially the martyr Antipas, are noticed as holding fast the name of Christ. (*Rev.* 2, 12, *seqq.*)—Pergamus was famed for its library, which yielded only to that of Alexandria in extent and value. (*Strab.*, 624.—*Athenaus*, 1, 3.) It was founded by Eumenes II., and consisted of no less than 200,000 volumes. This noble collection was afterward given by Antony to Cleopatra, who transported it to Alexandria, where it formed part of the splendid library in the latter city. (*Plut.*, *Vit. Ant.*, 58.) It was from their being first used for writing in this library that parchment skins were called "*Pergamena charta*" (*Varro, ap. Plin.*, 13, 11), but it is erroneous to say that parchment was invented at Pergamus. What drove Eumenes to employing it for books, was the circumstance of Ptolemy's having forbidden the exportation of papyrus from his kingdom, in order to check, if possible, the growth of the Pergamian library, and prevent it from rivaling his own.—Pergamus was the native place of the celebrated Galen. In the vicinity of the city was a famous temple of *Æsculapius*, which, among other privileges, had that of an asylum. The concourse of

individuals to this temple was almost without number or cessation. They passed the night there to invoke the deity, who communicated remedies, either in dreams or by the mouths of his priests, who distributed drugs and performed surgical operations. The Emperor Caracalla, A.D. 215, repaired to Pergamus for the recovery of his health, but *Æsculapius* was unmoved by his prayers. When Prusias, second king of Bithynia, was forced to raise the siege of Pergamus, he nearly destroyed this temple, which stood contiguous to the theatre, without the city walls.—The modern town retains the name of *Bergamah* or *Bergma*, and is still a place of considerable importance. Mr. Fellows, who visited it in 1838, says that it is as busy and thriving as heavy taxation will allow, and has seven or eight khans. (*Tour in Asia Minor*, p. 34.) It contains many extensive ruins. Col. Leake informs us, that remains of the temple of *Æsculapius*, of the theatre, stadium, amphitheatre, and several other buildings, are still to be seen. (*Journal*, p. 266.) Mr. Fellows remarks, that the walls of the Turkish houses are full of the relics of marbles, with ornaments of the richest Grecian art (p. 34.—*Cramer's Asia Minor*, vol. 1, p. 136, *seqq.*).

PERGAS. *Vid.* Perga.

PERIANDER, son of Cypselus, tyrant of Corinth. He succeeded his father in the sovereign power, and in the commencement of his reign displayed a degree of moderation unknown to his parent. Having subsequently, however, contracted an intimacy with Thrasylbus, tyrant of Miletus, he is said by Herodotus to have surpassed, from that time, his father Cypselus in cruelty and crime. It is certain that, if the particulars which the historian has related of his conduct towards his own family be authentic, they would fully justify the execration he has expressed for the character of this disgusting tyrant (5, 92; 3, 50, &c.). Notwithstanding these enormities, Periander was distinguished for his love of science and literature, which entitled him to be ranked among the seven sages of Greece. (*Diog. Laert.*, *Vit. Periand.*) According to Aristotle, he reigned 44 years, and was succeeded by his nephew Psammetichus, who lived three years only. (*Cramer's Anc. Greece*, vol. 3, p. 13.)—Herodotus relates, that Periander, having sent a messenger to Thrasylbus of Miletus, to ascertain from him in what way he might reign most securely, Thrasylbus led the messenger out of the city, and, taking him through a field of standing corn, kept interrogating him about the object of his mission, and every now and then striking down an ear of grain that was taller than the rest. After having passed through the field, he dismissed the man without any answer to his message. On his return to Corinth, the messenger reported to Periander all that had occurred, and the latter, quickly perceiving what Thrasylbus meant by his apparently strange conduct, put to death the most prominent and powerful of the citizens of Corinth. (*Herod.*, 5, 92.) Niebuhr thinks that this story furnished the materials for the somewhat similar one related of Sextus Tarquinius and the people of Gabii. (*Rom. Hist.*, vol. 1, p. 450, *Eng. transl.*) Plutarch, however, makes Periander to have disapproved of the advice which Thrasylbus silently gave him, and not to have followed it. (*Sept. Sep. Conviv.*—*Op.*, ed. Reiske, vol. 6, p. 558.) Aristotle, on the other hand, reverses the story, and says that Periander was applied to by Thrasylbus, and did what Herodotus makes the latter to have done. (*Polit.*, 3, 11.—*Id.*, 5, 10.—Consult *Cruizer, ad Herod.*, 5, 92.)

PERILOUS (Περικλῆς) was son of Xanthippus, who defeated the Persians at Mycale, and of Agariste, niece of the famous Cleisthenes. (*Herod.*, 8, 131.) He was thus the representative of a noble family, and he improved the advantages of birth by those of education. He attended the teaching of Damon, who communicated political instruction in the form of music lessons; of

PERICLES.

Zeno the Eleatic; and, most especially, of the subtle and profound Anaxagoras. Plutarch's account shows that he acquired from Anaxagoras moral as well as physical truths; and that, while he learned enough of astronomy to raise him above vulgar errors, the same teachers supplied him with those notions of the orderly arrangement of society which were afterward so much the object of his public life. But all these studies had a political end; and the same activity and acuteness which led him into physical inquiries, gave him the will and the power to become ruler of Athens. In his youth, old men traced a likeness to Pisistratus, which, joined to the obvious advantages with which he was endowed, excited distrust, and actually seems to have retarded his appearance on the stage of politics. However, about the year 469, two years after the ostracism of Themistocles, and about the time when Aristides died, Pericles came forward in a public capacity, and before long became head of a party opposed to that of Cimon the son of Miltiades. Plutarch accuses Pericles of taking the democratic side because Cimon headed that of the nobles. A popular era usually strengthens the hands of the executive, and is therefore unfavourable to public liberty; and the Persian war seems to have been emphatically so to Athens, as at its termination she found herself under the guidance of a statesman who partook more of the character of a general than of the prime minister. (*Heeren's Polit. Antig. of Greece.*) Cimon's character was in itself a guarantee against aggrandizement, either on his own part or others; but we may perhaps give Pericles credit for seeing the danger of so much power in less scrupulous hands than Cimon's. Be this as it may, Pericles took the popular side, and, as such, became the opponent of Cimon. About the time when Cimon was prosecuted and fined (B.C. 461), Pericles began his first attack on the aristocracy through the side of the Areopagus; and in spite of Cimon, and of an advocate yet more powerful (the poet Æschylus), succeeded in depriving the Areopagus of its judicial powers, except in certain inconsiderable cases. This triumph preceded, if it did not produce, the ostracism of Cimon (B.C. 461). From this time until Cimon's recall, which Mr. Thirlwall places, though doubtfully, in the year 453, we find Pericles acting as a military commander, and by his valour at Tanagra preventing the regret which Cimon's absence would otherwise undoubtedly have created. What caused him to bring about the recall of Cimon is doubtful; perhaps, as Mr. Thirlwall suggests, to strengthen himself against his most virulent opponents by conciliating the more moderate of them, such as their great leader himself. After the death of Cimon, Thucydides took his place, and for some time stood at the head of the stationary party. He was a better rhetorician than Cimon; in fact, more statesman than warrior; but the influence of Pericles was irresistible; and in 444 Thucydides was ostracized, which period we may consider as the turning point of Pericles' power, and after which it was wellnigh absolute. We are unable to trace the exact steps by which Athens rose from the situation of chief among allies to that of mistress over tributaries; but it seems pretty clear that Pericles aided in the change, and increased their contributions nearly one third. His finishing blow to the independence of the allies was the conquest of Samos and Byzantium, a transaction belonging rather to history than biography; he secured his success by planting colonies in various places, so as to accustom the allies to look on Athens as the capital of a great empire, of which they themselves were component parts, but still possessed no independent existence. From this time till the beginning of the Peloponnesian war, Pericles appears engaged in peaceful pursuits. He constructed a third wall from Athens to the harbour of

PERICLES.

the Piræus. He covered the Acropolis with magnificent buildings, and encouraged public taste by the suzerainty of all methods, the accustoming the eye to statue and architectural beauty. At Athens, as is usually the case, poetry had the start of the kindred arts; but, during the age of Pericles, it attained to a greater height than had ever before been reached. The drama was then at perfection in the hands of Sophocles; and, by enabling the poor to attend theatrical representations, Pericles nurtured their taste, and increased his own popularity by thus throwing open the theatre to all. This precedent, whether made by Pericles or not, ultimately proved more ruinous to the state than any defeat. It made the people a set of pleasure-takers, with all that restlessness in the pursuit of pleasure which usually belongs to the privileged few. Another innovation, of which Pericles is supposed to have been the author, was equally injurious in its consequences, that, namely, of paying the dicasts in the courts. At first the pay was only moderate; but it operated as a premium on the attendance at lawsuits, the causes became a mode of excitement for a people whose intellectual activity made them particularly eager for anything of the kind, and thence resulted that litigious spirit which is so admirably ridiculed in the "Wasps" of Aristophanes. But we may well excuse mistakes of this kind, grounded probably on a false view of civil rights and duties, such as an Athenian, with the highest possible sense of the dignity of Athens, would be the most likely to fall into. Pericles, no doubt, had an honest and serious wish to establish such an empire for Athens as should enable her citizens to subsist entirely on the contributions of their dependent allies, and, like a class of rulers, to direct and govern the whole of that empire, of which the mere brute force and physical labour were to be supplied by a less noble race. Pericles was descended, as we have seen, by the mother's side from the family of Cleisthenes, and he was thus implicated, according to the religious notions of those times, in the guilt of the murder of Cylon's partisans, which was committed at the very altars of the Acropolis. (*Thucyd.*, 1, 126.—*Herod.*, 5, 70, &c.) The Lacedæmonians, before the actual commencement of the Peloponnesian war, urged on the Athenians the necessity of banishing the members of the family who had committed this offence against religion, which was only an indirect way of attacking Pericles and driving him into exile. The Athenians retorted by urging the Lacedæmonians to cleanse themselves from the guilt incurred by the death of Pausanias. (*Vid. Pausanias.*) Pericles lived to direct the Peloponnesian war for two years. His policy was that of uncompromising though cautious resistance, and his great effort was to induce the Athenians to consider Attica in the light merely of a post, to be held or resigned as occasion required, not of hallowed ground, to lose which was to be equivalent to the loss of all. In the speech which he made before war was declared, as it is recorded by Thucydides, he impressed the Athenians with these opinions, representing the superiority of their navy and the importance of avoiding conflicts in the field, which, if successful, could only bring temporary advantage; if the contrary, would be irretrievable. At the end of the first campaign, Pericles delivered an oration upon those who had fallen in the war, as he had done before at the close of the Samian war. From that speech (at least if Thucydides reported well) we learn what Pericles considered to be the character of a good citizen, and we see in what strong contrast he placed the Spartan to the Athenian method of bringing up members of the state. This speech, the most remarkable of all the compositions of antiquity—the full transference of which into a modern language is an impossibility—exhibits a more complete view of the intellectual power and moral character of Pericles than all that the histo-

rian and biographers have said of him. The form in which the great orator and statesman has embodied his lofty conceptions, is beauty chastened and elevated by a noble severity. Athens and Athenians are the objects which his ambition seeks to immortalize, and the whole world is the theatre and the witness of her glorious exploits. His philosophy teaches that life is a thing to be enjoyed; death a thing not to be feared. The plague at Athens soon followed, and its debilitating effects made restraint less irksome to the people; but, while it damped their activity, it increased their impatience of war. In spite of another harangue, in which he represented most forcibly how absurd it would be to allow circumstances like a plague to interfere with his well-laid plans, he was brought to trial, and fined, but his influence returned when the fit was over. In the third year of the war, having lost his two legitimate sons, his sister, and many of his best friends, he fell ill, and, after a lingering sickness, died. Some beautiful tales are told of his deathbed, all tending to show that the calm foresight and humanity for which he was so remarkable in life did not desert him in death. It is an interesting question, and one which continually presents itself to the student of history, how far those great men, who always appear at important junctures for the assertion of some principle or the carrying out of some great national object, are conscious of the work which is appointed for them to do. It would, for instance, be most instructive, could we now ascertain to what extent Pericles foresaw that approaching contest of principles, a small part only of which he lived to direct. Looking from a distance, we can see a kind of necessity imprinted on his actions, and think we trace their dependance on each other and the manner in which they harmonize. Athens was to be preserved by accessions of power, wealth, and civilization, to maintain a conflict in which, had she been vanquished, the peculiar character of Spartan institutions might have irreparably blighted those germs of civilization, the fruit of which all succeeding generations have enjoyed. But how should this be? Her leader must have been a single person, for energetic unity of purpose was needed, such as no cluster of contemporary or string of successive rulers could have been expected to show. That ruler must have governed according to the laws, for a tyrant would have been expelled by the sword of the Spartans, as so many other tyrants were, or by the voice of the commonalty, every day growing into greater power. Moreover, without being given to change, he must have been prepared to modify existing institutions so as to suit the altered character of the times. He must have been above his age in matters of religious belief, and yet of so catholic a temper as to respect prejudices in which he had no share; for otherwise, in so tolerant an age, he would probably have incurred the fate of Anaxagoras, and destroyed his own political influence without making his countrymen one whit the wiser. He must have been a man of taste, or he would not have been able to go along with and direct that artistic skill, which arose instantly on the abolition of those old religious notions forbidding any departure from traditional resemblances in the delineation of the features of gods and heroes, otherwise he would have lost one grand hold upon the people of Athens. If Pericles had not possessed oratorical skill, he would never have won his way to popularity; and later in life he must have been able to direct an army, or the expedition to Samos might have been fatal to that edifice of power which he had been so long in building. Lastly, had he not lived to strengthen the resolve of the wavering people while the troops of Sparta were yearly ravaging the Thracian plain, the Peloponnesian war would have been prematurely ended, and that lesson, so strikingly illustrative of the powers which a free people can exercise under every kind of misfortune,

would have been lost to posterity. (*Encycl. Useful Knowl.*, vol. 17, p. 445, *seqq.*)—As regards the connexion that existed between Pericles and the celebrated Aspasia, consult remarks under the latter article.

PERILLUS, an ingenious artist, who made a brazen bull as an instrument of torture, and presented it to Phalaris, tyrant of Agrigentum. His native city has not been ascertained. In the pseudo-epistles of Phalaris he is called an Athenian; but it is more probable that he was a Sicilian, perhaps an Agrigentine. (*Bentley on Phalaris*, p. 382, ed. 1816.) The brazen image which he fabricated was hollow, and had an opening or door (*θύρα*) on the upper part of the back, where the shoulder-blades approach each other (*περὶ τὰς σπονδυλάς*.—*Polyb.*, 12, 25). Through this opening the victim of the tyrant's cruelty was introduced into the body of the bull, and, a fire being kindled beneath the belly of the image, was slowly roasted alive; while the cry of the sufferer, as it came forth from the mouth of the bull, resembled the roaring of a living animal. Phalaris is said to have tried the experiment first upon the artist himself. He lost his own life, too, according to Ovid, in this same manner, having himself been burned in the bull when stripped of his tyranny, and having had his tongue previously cut out. (*Val. Max.*, 3, 3.—*Phal., Epist.*, 103.—*Phin.*, 34, 8.—*Lucian, Phalaris prior*, 11.—*Ovid, Ibis*, 441.) According to Lucian's account, pipes were to be inserted into the nostrils of the bull when a person was about to suffer, and the cry of the victim would come forth with a kind of low, moaning music (*ἡ βοῇ δὲ διὰ τῶν αὐλῶν μέλῃ ἀποτελέσσει, ὅλα λεγυρώματα, καὶ ἐνανθήσει θρηνηδὲς, καὶ μυκήσεται γοερώτατον*.—*Lucian*, l. c.). This, however, is all embellishment; and in the same light, no doubt, are we to regard what this writer also tells us, that Phalaris, after having punished the artist by means of his own work, sent the bull as an offering to Apollo at Delphi; unless, as Bentley inclines to believe, there was some tradition that the bull had been so sent, and that, having been rejected by the priests, it was carried back to Agrigentum. (*Bentley on Phalaris*, p. 383.)—*Timæus*, the Sicilian historian, who wrote about the 128th Olympiad (B.C. 268–264), maintained, as we are informed by Polybius (12, 25) and Diodorus Siculus (13, 90), that the whole story of the bull of Phalaris was a mere fiction, though it had been so much talked of by historians as well as poets. The two writers just mentioned, however, undertake to refute this assertion of *Timæus*, and inform us that the brazen bull of Phalaris was carried off from Agrigentum by the Carthaginians; and that, when Carthage was taken by the younger Scipio, the image was restored to Agrigentum by the Roman commander, its identity having been fully proved by the opening on the back alluded to above. (*Polybius*, l. c.—*Diod. Sic.*, l. c.) The scholiast on Pindar (*Pyth.*, 1, 185) gives the narration of *Timæus* in a different way; for he tells us, from this historian, that the Agrigentines cast the bull of Phalaris into the sea; and that the bull in Agrigentum, which in his (*Timæus*’ time was shown for that of Phalaris, was only an effigy of the river Gela. From this it would appear, that *Timæus* did not deny that the tyrant had a brazen bull, but only censured the mistake of those who took a tauriform image of a river for it. Bentley thinks, however, that few will prefer the account of the scholiast to that of Polybius and Diodorus (*Phal.*, p. 380), but perhaps the solution which Götter proposes is the best, namely, that the bull of Phalaris had been carried away to Carthage, and that the one which *Timæus* saw at Agrigentum was actually a tauriform effigy of the river Gela. The only difficulty that remains is the statement respecting the bull of Phalaris having been cast into the sea, which may possibly be an error on the part of the scholiast. (*Götter, de Situ et orig. Syracus.*, p. 274.—Compare

the remarks of *Böckh, ad Schol., l. c., in not.—Find., Op., vol. 2, p. 310.*—As regards the name of the artist himself, most authors adopt the form *Perillus*, as we have given it; Lucian, however, and the scholiast on Pindar have *Perilaus*, and Bentley also prefers this. The change, indeed, from ΠΕΡΙΑΔΟΣ to ΠΕΡΙΑΑΟΣ is so extremely easy, that one or the other must be a mere error of transcription. A similar name has been critically discussed by Hermann in his work entitled, "*Ueber Böckhs Behandlung der Griech. Inschriften* (p. 106.—*Sillig, Dict. Art., s. v.*).

PERINTHUS, a city of Thrace, on the coast of the Propontis, west of Byzantium. It was originally colonized by the Samians (*Scymn. Ch., v. 718.—Scylax, p. 28*), and was said to have received its name from the Epidaurian Perinthus, one of the followers of Orestes. Another account, however, assigned its foundation to Hercules, and the inhabitants themselves would seem to have believed this, from their having a figure of Hercules on the reverse of their coins. Perinthus soon became a place of great trade, and, surpassing in this the neighbouring Selymbria, eventually rivalled Byzantium. When this last-mentioned city, however, fell under the Spartan power, Perinthus was compelled to follow its example. It subsequently suffered from the attacks of the Thracians, but principally from those of Philip of Macedonia, who besieged and vigorously pressed the city, but was unable to take it. The city was situate on a small peninsula, and the isthmus connecting it with the mainland was only a stadium broad, according to Ephorus, but Pliny (4, 11) makes it somewhat more. The place was built along the slope of a hill, and afforded to one approaching it the appearance of a theatre, the inner rows of dwellings being overtopped by those behind. (*Diad., 16, 76.*) Perinthus continued to be a flourishing city even under the Roman power, and received a great accession of power when its rival Byzantium fell under the displeasure of the Emperor Severus. The case was altered, however, when Constantine transferred the seat of empire to Byzantium; and about this period we find Perinthus appearing with the additional name of Heraclea, without our being able to ascertain either the exact cause or period of the change. Ptolemy, it is true, says "Perinthus or Heraclea," but this is evidently the interpolation of some later scholiast. The coins of this place reach upward to the time of Aurelian: they bear no other name but that of Perinthus. With the writers of the fourth century, on the other hand, the more usual name is Heraclea; though they almost all add that the city was once called Perinthus, or else, like Ammianus Marcellinus, join both names together. Hence it would appear that the change of appellation was a gradual one, and not suddenly made, in accordance with the command of any emperor, as in the case of Constantinople. After this last-mentioned place Perinthus was the most important city in this quarter of Thrace. Justinian rebuilt the ancient palace in it, and repaired the aqueducts. (*Procop., Edif., 4, 9.*) It could not, indeed, be an unimportant city, as all the main roads to Byzantium from Italy and Greece met here. The modern *Erekli* occupies the site of the ancient city. (*Mancini, Geogr., vol. 7, p. 174, seqq.*)

ΠΕΡΙΠΑΤΗΤΙΚΟΙ (*Περικατητικοί*), a name given to the followers of Aristotle. According to the common account, the sect were called by this appellation from the circumstance of their master's walking about as he discoursed with his pupils (*Περικατητικοί, ἀπὸ τοῦ περικατεῖν*). Others, however, more correctly, derive the name from the public walk (*περίπατος*) in the Lycæum, which Aristotle and his disciples were accustomed to frequent. (*Brucker, Hist. Crit. Phil., vol. 1, p. 788.*) A summary of the doctrine of this school will be found under the article *Aristoteles*.—Before withdrawing from his public labours, Aristotle

appointed Theophrastus his successor in the chair (*vid. Theophrastus*), and the latter was followed consecutively by Strato of Lampascus, Lycon or Glycon of Trossa, Ariston of Ceos, and Critolaus the Lycian. With Diodorus of Tyre, who came immediately after Critolaus, the uninterrupted succession of the Peripatetic school terminated, about the 140th Olympiad. The Peripatetic doctrines were introduced into Rome, in common with the other branches of the Greek philosophy, by the embassy of Critolaus, Carneades, and Diogenes, but were little known until the time of Sylla. Tyrannion the grammarian and Andronicus of Rhodes were the first who brought the writings of Aristotle and Theophrastus into notice. The obscurity of Aristotle's works tended much to hinder the success of his philosophy among the Romans. Julius Caesar and Augustus patronised the Peripatetic doctrines. Under Tiberius, Caligula, and Claudius, however, the adherents of this school, in common with those of other sects, were either banished or obliged to remain silent on the subject of their peculiar tenets. This was the case, also, during the greater part of the reign of Nero, although, in the early part of it, philosophy was favoured. Ammonius the Peripatetic made great exertions to extend the authority of Aristotle; but about this time the Platonists began to study his writings, and prepared the way for the establishment of the Eclectic Peripatetics under Ammonius Sacas, who flourished about a century after Ammonius the Peripatetic. After the time of Justinian, philosophy in general languished. But in that mixture of ancient opinions and theological dogmas which constituted the philosophy of the middle ages, the system of Aristotle predominated. About the 12th century it had many adherents among the Saracens and Jews, particularly in Spain; and at the same period, also, it began to be diligently studied, though not without much opposition, among the ecclesiastics of the Christian Church. Out of this latter circumstance gradually arose the Scholastic philosophy, which took its tone and complexion from the writings of Aristotle, and which continued long to perplex the minds of men with its frivolous though subtle speculations. The authority of Aristotle received a severe shock at the Reformation, but it survived the fall of the scholastic system. His opinions were patronised by the Catholic Church on account of their supposed favourable bearing upon certain doctrines of faith; and, although Luther and others of the Reformers determinedly opposed them, they were maintained by such men as Melancthon, who himself commented on several portions of the works of the Stagirite. Many individuals, distinguished for their genius and learning, exerted themselves to revive the Peripatetic philosophy in its primitive purity; nor did it cease to have numerous illustrious supporters until the time of Bacon, Grotius, and Des Cartes. (*Brucker, Hist. Crit. Phil.—Enfield, Hist. Phil., vol. 2, p. 95, seqq.—Tennemann, Hist. Phil., p. 121, 168, 375.*)

PERMESSUS, a river of Boeotia, rising in Mount Helicon, and which, after uniting its waters with those of the Olmias, flowed along with that stream into the Copaic Lake near Haliartus. Both the Olmias and Permessus received their supplies from the fountains of Aganippe and Hippocrene. The river Permessus, as well as the fountain Aganippe, were sacred to the Muses. (*Strab., 407.—Ptolemy, 2, 10, 26.*)

PERO, a daughter of Nелеus, king of Pylos, by Chloris. She married Bias, son of Amythaon. (*Virg. Metamorph.*)

PERFENNA, I. M., was consul B.C. 130, and defeated and took prisoner Aristonicus in Asia. (*Liv., 44, 27.—Id., 44, 32.—Vell. Pat., 2, 4.*)—II. M. Vento, was proscribed by Sylla, whereupon he passed into Spain, and became one of the lieutenants of Sertorius. Dissatisfied eventually with playing only a secondary

part, and envious of the fame and successes of his leader, he conspired against him, along with others of his officers. Sertorius was assassinated by the conspirators at a banquet, and Perpenna took the command of the forces; but he soon showed his utter incapacity, and was defeated by Pompey and put to death. (*Plut., Vit. Sertor.*)

PERRHÆIA, a district of Thessaly. Strabo, in his critical examination of the Homeric geography of Thessaly, affirms, that the lower valley of the Peneus, as far as the sea, had been first occupied by the Perrhæbi, an ancient tribe, apparently of Pelasgic origin. (*Simonid. ep. Strab., 441.*) On the northern bank of the great Thessalian river, they had peopled also the mountainous tract bordering on the Macedonian districts of Elimiotis and Pieria, while to the south they stretched along the base of Mount Ossa, as far as the shores of Lake Boebœa. These possessions were, however, in course of time, wrested from them by the Lapithæ, another Pelasgic nation, whose original abode seems to have been in the vales of Ossa and the Magnesian district. Yielding to these more powerful invaders, the greater part of the Perrhæbi retired, as Strabo informs us, towards Dolopia and the ridge of Pindus; but some still occupied the valleys of Olympus, while those who remained in the plains became incorporated with the Lapithæ, under the common name of Pelasgiotæ. (*Strab., 439.*) The Perrhæbi are noticed in the catalogue of Homer among the Thessalian clans who fought at the siege of Troy. (*Il., 2, 794.*) Their antiquity is also attested by the fact of their being enrolled among the Amphictyonic states. As their territory lay on the borders of Macedonia, and comprised all the defiles by which it was possible for an army to enter Thessaly from that province, or return from thence into Macedonia, it became a frequent thoroughfare for the troops of different nations. The country occupied by them seems to have been situated chiefly in the valley of the river Titaresius, now *Saranta Poros*. (*Cramer's Anc. Greece, vol. 1, p. 363, seqq.*)

PERSÆ, the inhabitants of Persia. (*Vid. Persia.*)

PERSEPHŌNE, the Greek name of Proserpina. (*Vid. Proserpina.*)

PERSEPOLIS, a celebrated city, situate in the royal province of Persia, about twenty stadia from the river Araxes. It is mentioned by Greek writers after the time of Alexander as the capital of Persia. The name, however, does not occur in Herodotus, Ctesias, Xenophon, or Nehemiah, who were well acquainted with the other principal cities of the Persian empire, and make frequent mention of Susa, Babylon, and Ecbatana. Their silence may be accounted for by the fact that Persepolis never appears to have been a place of residence for the Persian kings, though we must conclude, from the account of Arrian and other writers, that it was from the most ancient times regarded as the capital of the empire. The kings of Persia appear to have been buried here or at Pasargadæ. There was at Persepolis a magnificent palace, which, at the time of Alexander's conquest, was full of immense treasures, that had accumulated there since the time of Cyrus. (*Diod. Sic., 17, 71.—Strab., 729.*) We know scarcely anything of the history of Persepolis. The palace of the Persian kings was burned by Alexander (*Arrian, 3, 18.—Curt., 5, 7.—Strab., 729.—Diod. Sic., 17, 70*), and Persepolis was plundered by the Macedonian soldiers in retaliation, according to Diodorus Siculus (17, 69), for the cruelties inflicted by the Persians upon the Greek prisoners that had fallen into their hands; for Alexander had met, in his approach to the city, with a body of about 800 Greek captives shamefully mutilated. Curtius, after speaking of the plundering of Persepolis, states that Alexander, while under the influence of wine, was instigated by Thais, the courtesan, to set fire to the royal palace, an account in which Diodorus

also concurs. The city was not destroyed by fire on this occasion, as some suppose. The palace was the only building that suffered, Alexander having repented of the rash act almost the very instant after the work of destruction had commenced. That the city was not laid in ruins on this occasion is proved by the circumstance of Peucestes, the satrap of Persia, having given in Persepolis, only a few years after, a splendid entertainment to the whole army. (*Diod., 19, 23.*) Alexander, moreover, found the city still standing on his return from India. (*Arrian, 7, 1.*) Persepolis is mentioned also by subsequent writers, and even under the sway of Mohammedan princes, this city, with its name changed to *Istakhar*, was their usual place of residence. Its destruction was owing to the fanatic Arabs. (*Langlè, Voyages, &c., vol. 3, p. 199.*) Oriental historians say that the Persian name for Persepolis was likewise *Istakhar* or *Etekkhar*. (*D'Habelot, Biblioth. Oriental.*) The fullest account of the ruins of Persepolis is to be found in the Travels of Sir Robert Ker Porter. The most remarkable part of these ruins is the *Shehel-Minar*, or *Forty Columns*. The general impression produced by this part of the ruins is said to be the strong resemblance which they bear to the architectural taste of Egypt. It is somewhat doubtful, however, whether the ruins called *Shehel-Minar* are in reality those of Persepolis; and whether we are not to look for the remains of the ancient city more to the north. The sculptures of Persepolis, though of no value as works of art, serve to elucidate some passages in Greek and Roman writers which relate to Persian affairs. (Compare the remarks of *Hirt, Geschichte der Baukunst, vol. 1, p. 168.*)

PERSES, a son of Perseus and Andromeda. From him the Persians, who were originally called *Cephones*, are fabled to have received their name. (*Herod., 7, 61.*)

PERSEUS, I. son of Jupiter and Danaë the daughter of Acrisius. A sketch of his fabulous history has already been given under a previous article (*vid. Danaë*); and it remains here but to relate the particulars of his enterprise against the Gorgons.—When Perseus had made his rash promise to Polydectes, by which he bound himself to bring the latter the Gorgon's head, full of grief, he retired to the extremity of the island of Scyros, where Mercury came to him, promising that he and Minerva would be his guides. Mercury brought him first to the Graie (*vid. Phorcydæ*), whose eye and tooth he stole, and would not restore these until they had furnished him with directions to the abode of the Nymphs, who were possessed of the winged shoes, the magic wallet, and the helmet of Pluto which made the wearer invisible. Having obtained from the Graie the requisite information, he came unto the Nymphs, who gave him their precious possessions: he then flung the wallet over his shoulder, placed the helmet on his head, and fitted the shoes to his feet. Thus equipped, and grasping the short curved sword (*harpe*) which Mercury gave him, he mounted into the air, accompanied by the gods, and flew to the ocean, where he found the three Gorgons asleep. (*Vid. Gorgones.*) Fearing to gaze on their faces, which changed the beholder to stone, he looked on the head of Medusa as it was reflected on his shield, and Minerva guiding his hand, he severed it from her body. The blood gushed forth, and with it the winged steed Pegasus, and Chrysaor the father of Geryon, for Medusa was at that time pregnant by Neptune. Perseus took up the head, put it into his wallet, and set out on his return. The two sisters awoke, and pursued the fugitive; but, protected by the helmet of Pluto, he eluded their vision, and they were obliged to give over the bootless chase. Perseus pursued his aerial route, and after having, in the course of his journey, punished the inhospitality of Atlas by changing him into a rocky mountain (*vid. Atlas*), he came to the country of the Æthiopians. Here he lib-

erated Andromeda from the sea-monster, and then returned with the Gorgon's head to the island of Seriphus. This head he gave to Minerva, who set it in the middle of her shield. The remainder of his history, up to the death of Acrisius, is given elsewhere. (*Vid.* Danaë, and Acrisius.) After the unlooked-for fulfilment of the oracle, in the accidental homicide of his grandfather, Perseus, feeling ashamed to take the inheritance of one who had died by his means, proposed an exchange of dominions with Megapenthes, the son of Proetus, and thenceforward reigned at Tiryns. He afterward built and fortified Mycenæ and Midea. (*Apollod.*, 2, 4, 2, *seqq.*—*Schol. ad Apoll. Rhod.*, 4, 1091, 1515.—*Keightley's Mythology*, p. 415, *seqq.*)—We now come to the explanation of the whole legend. The Perseus of the Greeks is nothing more than a modification of the Persian Mithras (*Creuzer, Symbolik, par Guigniaut*, vol. 1, p. 368, in *notis*), and a piece of ancient sculpture on one of the gates of the citadel of Mycenæ fully confirms the analogy. (*Guigniaut, l. c.*—*Gell, Specimens of Ancient Sculpture, Lond.*, 1810.—*Id., Itinerary of Greece*, p. 35, *seqq.*—*Knight, Carm. Homeric. Prolegom.*, 58, p. 31.)—Perseus, however, if we consult his genealogy as transmitted to us by the mythographers, will appear to have still more relation to Egypt than to Asia. Descended from the ancient Inachus, the father of Phoroneus and Io, we see his family divide itself at first into two branches. From Phoroneus sprang Sparton, Apis-Serapis, and the Argive Niobe. The union of Io and Jupiter produced Epaphus, Belus, Danaüs, and, omitting some intermediate names, Acrisius, Danaë, and the heroic Perseus. If we examine closely the import of the names that form both branches of this completely mythic genealogy, we shall discover an evident allusion to Mithriac ideas and symbols. For example, *Sparton* has reference to the sowing of seed; *Apis*, become *Serapis*, is the god-bull upon or under the earth; *Io* is the lowing heifer, wandering over the whole earth, and at last held captive; *Epaphus*, another and Græcised name of *Apis*, is the sacred bull, the representative of all the bulls in Egypt; *Belus* is the Sun king both in Asia and Egypt, &c. It is in the person, however, of Perseus that all these scattered rays are in some degree concentrated. The name of his mother Danaë would seem to have reference to the earth in a dry and arid state. Jupiter, descending in a shower of gold, impregnating and rendering her the mother of Perseus, is Mithras, or the golden Sun, fertilizing the earth. Perseus, coming forth from the court of the king of the shades (*Polydectes*, the "all-recipient;" *πῶλις* and *δέχομαι*), proceeds under the protection of the goddess Minerva, holding in his hand the *harpē* (*ἄρπη*), symbol of fertility, to combat in the West the impure and sterile Gorgons: after this, returning to the East, he delivers Andromeda from the sea-monster, and becomes the parent of a hero of light, another Perseus, a son resembling his sire. Having returned victorious to Argolis, he builds, by the aid of the Cyclopes subterranean workmen whom he leads in his train, a new city; Mycenæ, the name of which, according to different traditions, had reference either to the lowings of Io, or to the Gorgons mourning for the fate of their sister (*μύκη*, "*lowing*:" *μυκάομαι*, *-ίζω*, "*to low*,"—*Μυκήναι*). Others, again, derive the appellation from the scabbard (*μύκης*) of the hero's sword, which fell upon the spot; and others, again, from a mushroom (*μύκης*) torn up by Perseus when suffering from thirst, and which yielded a refreshing supply of water in the place it had occupied. (*Pausan.*, 2, 16.—*Plut., de fium.*, 18, p. 1034, *ed. Wytt.*) In all these there is more or less of mystic meaning, the leading idea being still that of the earth; just as in the legend which makes Perseus to have killed Acrisius (the "confused," "dark," or "gloomy one," *ἄ* and *κρίνω*), there is an evident allu-

sion in the *discus*, by which the blow was given, to the orb of the sun.—If now we closely compare the principal features of these legends with the essential symbols presented by the Mithriac bas-reliefs, we cannot but discover, as well in the myths as in the sculptures of Mycenæ, a wonderful accordance with these symbols. The Argive fables tell of a heifer, a heifer lowing and distracted by pain. An allusion to the sword plunged into the bosom of the earth (represented by the heifer and by the Mithriac bull) is preserved in the legend of the scabbard that fell to the earth, and gave name to the city of which it presaged the founding. The shower of gold, the mushroom, and the never-ending stream of water, of which this last is the pledge, are emblems of the solar emanations, the signs of terrestrial fertility, and all Mithriac ideas. The Gorgons have reference to the moon, regarded as a dark body; and in the early language of Greece the moon was called *γερρόνιον*, in allusion to the dark face believed to be seen in it. (*Clem. Alex., Strom.*, 5, p. 667.) They typify the natural impurity of this planet, and which the energies of the sun (Mithras-Perseus, armed with his golden sword) are to remove, and to give purity in its stead. Here, then, at the very foundation of the mythos, we find ideas of purification. Perseus, and Hercules who descends from him, are purifiers in heaven and on earth. They purify the stains of evil by force and by the shedding of blood. They are just murderers; and the wings given in preference to Perseus enter into this general conception. (*Olympiodor., Comment. in Alcib.*, 1, p. 156, *seqq.*, *ed. Creuzer.*) Both, assuming an aspect more and more moral, end with intermingling themselves in human history; and thus Perseus, according to one tradition, put to death the sensual and voluptuous Sardapalus. (*Malal., Chron.*, 21, *Oxon.*—*Suid., s. v. Σαρδάπ.*—*Reines., Obs. in Suid.*, p. 222, *ed. Müller.*) This brings us to consider the numerous points of approximation, acknowledged to exist even by the ancient writers themselves, between the Greek hero Perseus and various countries of antiquity, such as Asia Minor, Colchis, Assyria, and Persia. At Tarsus in Cilicia, of which city both Perseus and Sardapalus passed as the founders, the first was worshipped as a god, and very probably the second also. (*Helianic., frag.*, p. 92, *ed. Sturz, ad loc.*—*Dio Chrysost., Orat.*, 32, p. 24, *seqq.*, *ed. Reiske.*—*Amm. Marcell.*, 14, 8.) The name of Perseus (or Persees) is found in the solar genealogies of Colchis. (*Herod. Theog.*, tab. 5, p. 164, *ed. Wolf.*—*Apollod.*, 1, 9, 1.—*Diod. Sic.*, 4, 45.) Persees, the son of Perseus and Andromeda, was, according to Hellenicists, the author of civilization in the district of Persia called Artæa. (*Fragm.*, p. 94.) Herodotus also was acquainted with the traditions which, emanating originally from Persia itself, claimed Perseus for Assyria (6, 54). Finally, in the place of Persees, it is Achæmenes (Djemshid) whom the ancient expounders of Plato make to have sprung from Perseus and Andromeda. (*Olympiodor., l. c.*, p. 151, *Coll.*, 157.—*Schol. Plat., Alcib.*, 1, p. 75, *ed. Ruhken.*) We have here, under the form of a Greek genealogy, the fundamental idea of the worship of Mithras: the beam of fire which the sun plunges into the bosom of the earth, produces a solar hero, who in his turn becomes the parent of one connected with agriculture. Djemshid-Persees, the chief and model of the dynasty of the Achæmenides, was the first to open the soil of Persia with the same golden sword wielded by Perseus and Mithras, and which is nothing else but an emblem of the penetrating and fertilizing rays of the luminary of day. If Perseus, however, seems, by his father or his primitive type, to have reference to Asia, on the mother's side he is connected with Egypt, the native country of Danaüs and the Danaïdes. (*Herod.*, 2, 91, 171.—*Apollod.*, 2, 1, 4.) At Chemmis he had a temple and statue; and as Tarsus, where he was

also worshipped, received its name from the impress made by the fertilizing foot of Pegasus or Bellerophon, who followed in the track of the high deeds achieved by Perseus in Lower Asia, so the Chemmites pretended that Egypt was indebted for its fertility to the gigantic sandal left by the demi-god upon earth at the periods of his frequent visitations. (*Herod.*, 2, 91.) They alone of the Egyptians celebrated games in honour of this warlike hero of the Sun, this conqueror in his celestial career, this worthy precursor of Hercules, his grandson.—If we connect what has been here said with the traces of Mithriac worship in Ethiopia and Egypt, as well as in Persia and Greece, we will be tempted to conjecture, that these two branches of a very early religion, the fundamental idea in which was the contest incessantly carried on by the pure and fertilizing principle of light against darkness and sterility, unite in one parent trunk at the very centre of the East. (*Cruzer, Symbolik, par Guignaut*, vol. 3, p. 156, *seqq.*)—II. Son of Philip V., king of Macedonia, began at an early age to serve in his father's army, and distinguished himself by some successes against the barbarous nations which bordered on Macedonia. His younger brother Demetrius was carried away as hostage by the consul Flamininus, at the time of the peace between Rome and Philip, and, after remaining several years at Rome, where he won the favour of the senate, was sent back to Macedonia. After a time, he was again sent by his father to Rome, on a mission, in consequence of fresh disagreements which had sprung up between the two states. Demetrius succeeded in maintaining peace, but, after his return to Macedonia, he was accused of ambitious designs, of aspiring to the crown, and of being in secret correspondence with Rome. Perseus, who was jealous of him, supported the charges, and Philip doomed his younger son to death; but, not daring to have him openly executed, through fear of the Romans, he caused him to be poisoned. It is said that, having discovered his innocence, his remorse and his indignation against Perseus hastened his death. Perseus ascended the throne B.C. 179. This monarch had been brought up by his father with sentiments of hatred against the Romans, for the humiliation which they had inflicted on Macedonia. He dissembled his feelings, however, at the beginning of his reign, and confirmed the treaty existing between his father and the senate. Meanwhile he endeavoured, by a prudent and diligent administration, to strengthen his power, and retrieve the losses which his kingdom had sustained during the previous reign. But the Romans, who viewed with suspicion these indications of rising opposition, sought an early opportunity of crushing their foe, before his plans could be brought to maturity. Pretexts were not long wanting for such a purpose, and war was declared, notwithstanding every offer of concession on the part of Perseus. After a campaign of no decisive result in Thessaly, the war was transferred to the plains of Pieria in Macedonia, where Perseus encamped in a strong position on the banks of the river Enipeus. But the consul Paulus Æmilius having despatched a chosen body of troops across the mountains to attack him in the rear, he was compelled to retire to Pydna, where a battle took place, which terminated in his entire defeat, 20,000 Macedonians having fallen on the field. This single battle decided the fate of the ancient and powerful kingdom of Macedonia, after a duration of 530 years. Perseus fled almost alone, without waiting for the end of the conflict. He went first to Pella, the ancient seat of the Macedonian kings, then to Amphipolis, and thence to the island of Samothrace, whose asylum was considered inviolable. From this quarter he attempted to escape by sea to Thrace; but a Crætan master of a vessel, after having shipped part of his treasure, sailed away, and left the king on the shore. The attendants having also forsaken him except one, Perseus, with his

eldest son Philip, came out of the temple where he had taken refuge and surrendered to the Romans. He was treated at first by Æmilius with considerable indulgence, but was obliged to parade the streets of Rome with his children, to grace the triumph of his conqueror. He was afterward confined, by order of the senate, at Alba Fucentina, near the lake Fucinus, where he died in a few years. His son Philip also died at Alba. Another and younger son is said to have become a scribe or writer to the municipality of the same place. (*Liv.*, 44, 43.—*Plut.*, *Vit. P. Æmil.*—*Encycl. Us. Knowl.*, vol. 17, p. 466.—*Cramer's Anc. Greece*, vol. 1, p. 191.)

PERSIA, a celebrated kingdom of Asia, comprehending, in its utmost extent, all the countries between the Indus and the Mediterranean, and from the Euxine and Caspian to the Persian Gulf and Indian Ocean. In its more limited acceptation, however, the name Persia (or rather Persis) denoted a particular province, the original seat of the conquerors of Asia, where they were inured to hardship and privation. This region was bounded on the north and northwest by Media, from which it was separated by the mountain-range known to the ancients under the name of Paracathras (*Ptol.*, 6, 4.—*Strab.*, 522); on the south by the Persian Gulf; on the east by Carmania; and on the west by Susiana, from which it was separated by rugged and inaccessible mountains. (*Strab.*, 728.) The country included within these limits is, according to Chardin's estimate, as large as France. The southern part of it, near the coast, is a sandy plain, almost uninhabitable, on account of the heat and the pestilential winds that blow from the desert of Carmania. (*Plin.*, 12, 20.—*Strab.*, 727.) But, at some distance from the coast, the ground rises, and the interior of the country, towards the north, is intersected by numerous mountain-ranges. The soil upon these mountains is very dry and barren, and, though there are some fertile valleys among them, they are in general fit only for the residence of nomadic shepherds. In the inner part of the country, however, there are many well-watered and fertile plains, in the largest of which Persepolis is situated. (*Strab.*, 727.—*Ptol.*, 6, 4.)

1. Names of Persia.

Persia is called, in the Old Testament, *Paras*. Another name employed by the sacred writers is *Elam*. Moses first uses this appellation in *Genesis* (10, 23), but a great error is committed by many who regard the ancient Elamites as the forefathers and progenitors of the whole nation of the Persians. The term *Elam*, strictly speaking, belongs only to one particular province of the Persian empire, called by the Grecian writers Elymais, and forming part of the modern *Chouistan*. The geographical notions of the ancient Hebrews were extremely limited: and as they first became acquainted with the inhabitants of the province of Elymais, before they knew anything respecting the rest of the Persians, they applied the term *Elam* to the whole of Persia.—Some modern writers have also regarded the name *Chouta* (Cutha), in the Scriptures, as designating Persia; and, in forming this opinion, they have been guided by the passage in the 2d book of *Kings*, 17, 24, where a Chouta is mentioned, which Josephus (*Ant. Jud.*, 9, 14, 3) places in Persia. Michaelis, however (*Spicilg.*, *Geogr. Hebr. Ext.*, pt. 1, p. 104, *seqq.*), seeks to prove that Chouta was in Phœnicia, not in Persia; while Hyde and Reland place it in Babylonia. If we adopt, in preference to the two last-mentioned writers, the testimony of Josephus, we may, with great probability, conclude that Chouta, like Elam, only denoted in fact a part, but, like it, was used to designate a whole.—Among the Greek and Roman writers Persia occasionally bears the name of *Achæmenia*, and the Persians themselves that of *Achæmeni* (Ἀχαιμενίοι). Hence Hesychius

remarks, Ἀχαμένως, Πέρσης. Ammianus Marcellinus (19, 2), in the common text of his history, gives *Achamenismus* as equivalent, in the Persian tongue, to "*Rex regibus imperans*;" but Valois (Valesius) corrects the common reading by the substitution of *Saasac*, which closely resembles the modern title of royalty in Persia, *Schaakinachah*.—The name *Achamenus* comes in reality from that of *Achamenes*, the founder of the royal line of Persia. In the word *Achamenes*, the last two syllables (*-enes*) are a mere Greek appendage, owing their existence to the well-known custom, on the part of the Greeks, of altering foreign, and particularly Oriental names, in such a way as to adapt them to their own finer organs of hearing. (Compare *Josephus, Ant. Jud.*, 1, 6.—*Plin.*, *Ep.*, 8, 4.) We have, then, *Achæm* (*Ἀχαμ*) remaining. The initial letter is merely the Oriental *ah* pronounced as a soft breathing, and the root of the word is *Chæm* (*Χαμ*). On comparing this with the Oriental name *Djemachid* (in which the final syllable, *schid*, is a mere addition of a later age), we cannot fail to be struck by the resemblance. And this resemblance will become still more marked if we consider that *Djem* (*Djoëmo* in the Zend-Avesta) begins properly with a species of sibilant *G*, which, being pronounced more roughly in some dialects than in others, approximates very closely to the sound of *Ch*. Besides, all that the Greeks tell us of Achæmenes corresponds very exactly with what the East relates of its Djemachid. Achæmenes was the founder of the royal line of Persia, and to him Cyrus, Darius, and Xerxes were proud of tracing their origin. With the Persians of the present day, the name of *Djemachid* is held in the highest veneration as that of the founder of Persepolis, and a great and glorious monarch.—Herodotus (7, 61) states that the Persians were anciently (πάλαι) called by the Greeks *Cephænes* (Κηφῆνες), but by themselves and their neighbours *Artai* (Ἀρταίοι). As regards the name Cephænes, there is an evident mistake on the part of the historian, and the appellation beyond a doubt belongs only to certain tribes of the ancient Northern Chaldaea, who actually bore this name. With respect to the term *Artai* it may be remarked, that it merely designates a brave and warrior-people, being derived from the Persian *art* or *ard*, "strong," "brave." (Consult remarks at the end of the article Artaxerxes.)—One of the earliest names of Persia and the Persian empire, and the one most usual with the Persians themselves up to the present day, is *Iran*, while all the country beyond the Oxus was denominated *Turan*. The former of these appellations is identical with the *Eriene* of the Zend-Avesta, and will be alluded to again in the course of the present article.—The name *Persia* would seem to have come from that of the province of *Faarsi-stan* or *Parsi-stan*, called also *Faars* or *Pars*, and the same with the *Peris* (Πέρσις) of the Greeks. (Compare the Scripture *Peras* already mentioned.) In this province we find the genuine race of Iranians; and it was here that the magnificent city of *Istakhar*, which the Greeks have made known to Europe by the name of Persepolis, was built by the monarchs of Iran. The origin of the term *Faars* or *Pars* has been much disputed by philologists (*Wahl, Vorder und Mittel-Asien*, p. 325, *seqq.*); the root is evidently to be sought for in the term *Arîe* or *Eriene*, and this would bring *Iran* and *Persia*, as names of the same country, in close approximation. (*Vid. Aria*.) One explanation of the name "*Persian*" will be given farther on.

2. Origin and Early History of the Persians.

The first historical and religious epochs of Persia are enveloped in such obscurity, and so many have erred in relation to the character, far more mythic than historical, of the early Oriental traditions, that we need not wonder at the earnest enthusiasm with which such men as Sir W. Jones and J. von Müller have adopted

the fictions of Dabistan. These fictions have far more connexion with the Brahminical traditions than with those of the Zend-Avesta, though they are found, in fact, ingrafted on the latter. The fourteen *Abads*; the institution of the four castes by the great Abad; in a word, that ideal empire, as unlimited in geographical extent as in the immensity of the periods (sidereal in appearance, but at bottom purely artificial and arbitrary), that are connected with it; all this is evidently borrowed from India: and yet all this, when joined to the name of *Mahabak*, supposed to be identical with Baal or Belus, was thought to furnish a wonderful confirmation of the favourite hypothesis of a great antediluvian monarchy, which had embraced India, Persia, and Assyria in a common bond of language, religion, and national institutions. In this way it was believed that a solution could be given of all the difficult problems presented by the earliest portion of the history of the world. These traditions, however, have an air of philosophic abstraction, or, to speak more candidly, of premeditated invention, which ill agrees with the native simplicity that marks the legends of the Zend-Avesta. It is from the Zend-Avesta, carefully compared with the more genuine portion of the Schab-Naméh, and with the scanty information which the Hebrews and Greeks have transmitted to us on this subject, that we must seek for some true information relative to the first periods of Persian history. At first view, indeed, there seems to be the widest possible difference between the narratives of the Jews and Greeks, and the national recollections of the people of Iran; and critics have heaped hypothesis upon hypothesis, in order to reconcile this discrepancy: some have even regarded the thing as altogether impossible. Before the discovery of the Zend books, it was easy to suppose that the Oriental writers, coming as they did at so late a period upon the stage, had confounded together the Assyrians, Medes, and Persians as one and the same people, or else that they had designedly, and from feelings of national vanity, connected their own history with that of the powerful communities which had preceded them in the sovereignty of Western Asia. (Consult *Anquetil du Perron, Mem. de l'Acad. des Inscrip.*, vols. 40 and 42.—*Görres, Mythengesch.*, vol. 1, p. 213, *seqq.*, &c.) At the present day, however, this opinion is accompanied with great difficulties; for the same names, and, in general, the same ancient facts, are found, with some slight shades of difference, in the Zend-Avesta and in Ferdousi or his copyists. Everything, therefore, depends upon the period to be assigned for the composition of the Zend books.—Most writers distinguish between the Medes and Persians from their very origin; and to the former of these two nations they refer Zoroaster, his laws, the books that bear his name—in a word, the whole system of the Magian worship, and the civilization of the Persians themselves. This theory makes the Medes to have formed originally a part of a great Bactrian nation, a Bactro-Median empire, and to have received from the Bactrians the elements of their own civilization. (Compare *Haarm, Ideen*, vol. 1, p. 427, *seqq.*) The writer just mentioned even inclines to the opinion that the Medes and Bactrians formed, for a long time, two distinct states, of which the latter was much earlier in its origin than the former (*Handbuch der Gesch.*, p. 29); and this will serve to explain the two dynasties, so different from each other and so very unequal in number, that are given by Herodotus and Ctesias, while it at the same time re-establishes in their rights the communities on the banks of the Oxus, whom Aristotle and Clearchus regarded as having enjoyed, at so remote a period, the blessings of civilization. (*Diog. Laert.*, *proem.* vi.)—As regards the origin of the Medes, Persians, and other ancient nations of the remote East, as well as their early history, all remains uncertain and obscure. It

is generally conceded, however, that the Bactrians, Medes, and Persians bore at first the common name of *Arii*, which recalls to mind that of *Iran*; but with respect to the primitive country of these *Arii* there is little unanimity of opinion. Some make them to have come from Caucasus; others seek for their earliest settlement among the mountains to the northeast of India, and, it must be confessed, with great probability. Görres persists in his hypothesis of making the Assyrians, Medes, and Persians to have descended from the chain of Caucasus, speaking the same language, and forming one and the same race; and to this race, thus combined, he assigns a great monarchy of Iran, extending from Caucasus to the Himalayan Mountains. He brings together and compares with each other the names *Iran*, *Aria*, *Aturia*, *Assyria*, *Assur*, &c., and appears to identify *Shem* with *Djem* or *Djemschid*, the first mythic chief of this early empire. (*Mythengesch.*, vol. 1, p. 213, *seqq.*—Compare *Schah. Nameh*, *Einleit.*, p. vi., *seqq.*) Another system has been more recently started by Rhode, and has been developed with great ability. According to this writer, the Bactrians, Medes, and Persians composed the common and primitive Iran, speaking the Zend language or its different dialects, and coming originally from *Eerene Veedjo*, and from Mount *Albordj*, which he finds near the sources of the Oxus and the mountains to the north of India, the names of which were transferred in a later age to Caucasus and Armenia. The arguments adduced by this writer in support of his hypothesis are drawn from the Zend books, and in particular from the Vendidad, at the commencement of which latter work an account is given of the creation, or, as Rhode expresses it, of the successive inhabitings of various countries, and in the number of which we find, after *Eerene Veedjo*, *Soghdō* (Sogdiana), *Moore* (Merou), *Bakhdī* (probably *Balk*), *Nezē* (Nysa), *Haroui* (Herat), &c. Rhode sees in this enumeration an ancient tradition respecting the migrations of a race, for a long period of nomadic habits, who kept moving on gradually towards the south, under the conduct of Djemschid, as far as *Ver* or *Var*, a delightful country, where they finally established themselves, and where Djemschid built a city and palace, *Var-Djemagherd*, which Rhode, after Herder, takes for Persia proper (*Persis*) or *Pars*, with its capital Persepolis, identifying at the same time Achæmenes with Djemschid. M. Von Hammer adopts, in general, this opinion of Rhode in regard to the geography of the Vendidad, with the exception of the last point. He thinks that *Ver* and *Var-Djemschid* cannot be *Pars* or *Pars* and Persepolis, but the country more to the north, where are at the present day *Damaghan* and *Karwin*, and where stood in former days Hecatompylos, the true city of Djemschid. The celebrated traveller and Orientalist, Sir W. Ouseley, without identifying *Var* and *Pars* as Rhode does, inclines, nevertheless, to the belief that it is to Persepolis, its edifices, and the plain in which it is situated, that the Zend-Avesta refers under the names already mentioned, as well as under that of *Djemkand*. Without presuming to offer any opinion on this disputed point, we may take the liberty of remarking, that the Greeks themselves speak of the *Artii* as a large family of nations, to which the Magi, and, in general, all the Median tribes or castes were considered as belonging. (*Mayoi tēs kai nūn tō 'Apeiov γένος*.—*Damasc.*, ap. **Wolf*, *Anecd. Græc.*, 3, p. 259.—Compare *Herod.*, 7, 62, and 1, 101.) The Persians called their ancient heroes 'Aptaiōi (*Herod.*, 7, 61.—*Id.*, 6, 98.—*Hellanic.*, ap. *Steph. Byz.*, s. v. 'Aptaiōi), and *Artazerxes* is said to signify, as an appellation, "a great warrior," and to be compounded of *Art* or *Arā*, "strong," and the Zendic *Kshetra*, "a warrior," which is almost identical in form with the Sanscrit *Arta-Kshatriya*. Moreover, the terms *Arii* and *Aria* or *Ariana*, together

with *Artas* and *Ari* or *Eeri* (a root found in various Zendic terms, such as *Ariema*, *Eerene*, *Eerimeno*, *Eerene-Veedjo*, &c.), re-appear in the *Aryas* and *Aria-Verta* of the Sanscrit books, "the illustrious," and "the land of the illustrious," or "of heroes." (Compare the Greek 'Hpoer, a word of the same origin.) All these analogies, joined to the striking resemblance between the Zend, the Parsi, and the Sanscrit, point to a primitive race of one and the same origin, speaking at first one and the same language, but subsequently divided into various nations and dialects. The tribes in Bactriana and the neighbouring country, continuing to dwell in the neighbourhood of the parent source, remained more faithful than others to the ancient name and language. Other tribes moved off in a southeast direction, and towards the region of Caucasus, whither they transported with them the names of both *Albordj* and *Ariema* (*Armenia*). Hence we have both Eastern and Western *Arii*, and these last became in time a separate nation, the Medes, known to the Hindus under the name of *Pahlavas* (*Pehlavan* is "a hero" in Firdousi), which recalls to mind the *Pehlvi*, their language, the fruit of their intermixture with people of another race. Finally, the Persians, the antiquity of whose name (*Parsi*, "the clear," "the pure," "the brilliant," "the inhabitants of the country of light"), as well as their idiom, worship, and traditions, would seem to indicate a close and long-continued connexion with the first branch, established themselves, we know not at what epoch, in the country of *Pars* or *Pars*, which became, in the time of Cyrus, the centre of an empire, that recalled to mind in some degree the fabulous sway of his great progenitor Djemschid. (*Rhode*, *Heilige Sage*, p. 60, *seqq.*—*Id.*, *über Alter.*, &c., p. 18, *seqq.*—*Von Hammer*, *Heidelb. Jahrb.*, 1823, p. 84, *seqq.*—*Ouseley's Travels*, vol. 2, p. 305, *seqq.*—*F. Von Schlegel*, *Wien. Jahrb.*, vol. 8, p. 458, *seqq.*—*D'Anquetil*, *Zend-Avesta*, vol. 1, p. 2, 263, *seqq.*; vol. 2, p. 408.—*Creuzer*, *Symbolik*, par *Guignaut*, vol. 2, p. 677, *seqq.*)—According to the Pehlvi traditions, the first dynasty in Iran was that of the Pischdadians. *Keioumaratz*, say the same legends, was the first who governed in the world. He lived a thousand years, and reigned thirty. Covered with the skin of a tiger, he descended from the mountains and taught men the use of vestments and more nutritive food. Ahriman, the genius of evil, sent a demon to attack him. *Siamet*, the son of *Keioumaratz*, was slain in the conflict. *Houcheng* avenged the death of his father. He came to the throne at the age of forty years. He reigned with justice, taught men the art of cultivating and sowing the fields, and made them acquainted with the use of grain. Meeting, on one occasion, a monster in a forest, he seized an enormous stone to attack him; the stone, striking against a rock, flew into a thousand pieces, and fire was discovered. With the aid of this element he invented the art of working metals: he thus formed the pincers, the saw, and the hammer. He directed also the courses of rivers, and constructed canals. He taught his subjects, moreover, the art of raising cattle and of substituting woolen stuffs for the skins of animals. *Theioumouratz*, son of *Houcheng*, succeeded. He was the first that pursued the chase with the onca and the falcon, and taught music to men. An angel, sent from heaven, presented him with a lance and horse, to combat and subdue the evil spirits. He gave them battle at the head of the Iranians, completely defeated them, and took a great number prisoners. These begged for life, and, in return for the boon, taught him writing and the elements of knowledge. *Theioumouratz*, the conqueror of these demons, reigned thirty years. He was succeeded by his son *Djemeschid*. The birds, and the *peris* or good spirits, obeyed him. He invented the cuirass, precious stuffs, and the art of embroidery. He built the city of *Var Djemeschid*, divided his sub-

PERSIA.

jects into four castes, and during three hundred years reigned in the utmost prosperity and power, until his pride impelled him to revolt against the deity. *Dzohák* was at this time prince of the *Tasi*, and held communication with the evil genii. He collected together the subjects of *Djemischid*, who had abandoned their sovereign since his altered course of conduct, put himself at their head, dethroned *Djemischid*, and deprived him of existence after a reign of seven hundred years. *Dzohák* reigned a thousand years. His tyranny reduced Persia to the utmost wretchedness. By the malice of the evil spirits, two serpents sprang from his shoulders and remained attached to them. To appease their craving appetites, they had to be fed every day with the brains of men. By an adroit stratagem, the cooks of the palace saved each day one of the two persons destined thus to afford nourishment to the serpents, and sent him to the mountains: it is from these fugitives, say the traditions of Persia, that the Kurds of the present day derived their origin. A dream forewarned the sanguinary *Dzohák* of the lot that awaited him, and of the vengeance that would be inflicted on him by *Feridoun*, the son of one of his victims. He caused diligent search to be made for the formidable infant, but the mother of *Feridoun*, who had given him to the divine cow *Pour-mayeh* to be nursed, saved herself and her child by fleeing to Mount *Albrouz*, in the north of India. There *Feridoun* was brought up by a Parsi. Having attained the age of sixteen years, he descended from the mountain and rejoined his mother, who made him acquainted with the story of his birth and misfortunes: for he was a member of the royal line, which had been driven from the throne of Persia by the sanguinary *Dzohák*. Burning with the desire of avenging his wrongs, he seized the first opportunity that presented itself. A sedition broke out in Persia, headed by a smith, who affixed his apron to the point of a spear, and made it the standard of revolt. The continued searches ordered by *Dzohák* had apprized the people both of the dream of the tyrant and the existence of the young prince whom he persecuted. The Persians ran in crowds to their deliverer, who caused the apron of the smith to be profusely adorned with gold and precious stones, adopted it as the royal standard, and named it *Direfeh-gawány*; and this standard continued to be in after ages an object of the greatest veneration throughout all the empire of Persia. *Feridoun* immediately marched against the tyrant, crossed the Tigris where Bagdad now stands, proceeded to *Beit-ul-makadder*, the residence of *Dzohák*, conquered his antagonist, and confined him with massive fetters in a cavern of Mount *Demaوند*. The two sisters of *Djemischid*, *Chehrmus* and *Amevas*, had been the favourite wives of *Dzohák*. *Feridoun* found them, though after the lapse of a thousand years, still young enough to espouse. He had by them three sons, whom he married to three princesses of *Yemen*. The eldest was *Selm*, the second *Tour*, and the youngest *Iredj*. He divided the earth among them. *Selm* received *Roum* and *Khâwer*, that is to say, Greece, Asia Minor, and Egypt. *Tour* obtained *Tourân* and *Djin*, that is, the country beyond the Oxus and China. *Iredj* became master of Persia (*Iran*) and Arabia. Dissatisfied with this division, the first two made an inroad, at the head of an army, into Persia; slew *Iredj*, who had come to their camp for the purpose of appeasing them, and sent his head to *Feridoun*. The afflicted father prayed the gods to prolong his life until he could avenge the death of his son. Only one of the wives of *Iredj* proved with child; she gave birth to a daughter, whom *Feridoun* united to *Menoutchehr*, his brother's son. He brought him up in wisdom, and when he had reached the age of manhood, gave this *Menoutchehr* the throne. *Selm* and *Tour*, having endeavoured, but in vain, to appease their irritated father, determined to have recourse to arms. Their forces,

PERSIA.

composed of the people of *Djin* and *Khâwer*, entered Persia, but were defeated in succession, and their leaders slain. *Feridoun* died beloved by his subjects, whom he had rendered happy during a period of five hundred years. During this time lived the valiant *Sém*, son of *Nerimân*, prince of *Sedjestan*, and of *Zaboulستان* or *Ghizneh*. His son *Zal* received from *Menoutchehr* the sovereignty of all the countries from *K'about* to the river *Sind*, and from his father the country of *Zaboulستان*. *Mikrâb* reigned at this period in *K'about*. He was of *Tasi* origin, and of the race of *Dzohák*. *Zal* married his daughter *Roudabeh*, and became the father of *Roustem*, the hero of Persia, and whose exploits form the principal subject of the poem of *Firdousi*. *Menoutchehr* transmitted the crown to his son *Nasrder*. This latter followed not the precepts of his father: his subjects revolted, and his kingdom being invaded by *Afrasiâb*, the son of *Pecheng*, king of *Touran*, he fell into the hands of his opponent and was put to death, after a reign of only seven years. *Afrasiâb* then quitted the province of *Dahestân*, which had been the theatre of the war, and entered by *Rei* into *Iran*, where he placed the crown of the *schahe* upon his own head. During this invasion of *Afrasiâb*, *Zal*, the son and successor of *Sém*, had taken upon him, in his turn, the defence of the dynasty of *Feridoun*, and had caused a member of the race to be proclaimed *schahe*: this was *Zou*, son of *Thamasp*. During five years the country was exposed to the ravages of war, and afterward a general scarcity prevailed. Peace was concluded; according to the terms of which the river *Gihon* (*Djikhoun* or *Oxus*) was declared the common limit of the two empires. *Zou* died soon after, leaving as his successor his son *Gerschâsp*, who only reigned nine years, and left Persia, at his death, without a master. With him ended the dynasty of the *Pischdadians*.—Before proceeding to the consideration of the second or *Kaïanian* dynasty, we shall offer a few remarks on the one of which we have just been treating. The lives and reigns of 700 and 1000 years will obtain, of course, no credit now. *Djemischid* and *Dzohák* represent, in all probability, entire families.—It would be useless to compare the Greek traditions with the monstrous recital of the *Schah-nameh*, through which we have just passed. These recitals, having only been collected under the Sassanides, have reached us full of fable and improbability. It will be safer and more reasonable to limit ourselves to some general approximations. The Greek historians mention three principal facts: 1. The existence of a vast empire, known among them by the name of the Assyrian empire; 2. The overthrow of this empire by the Medes; 3. The frequent incursions of the Scythian tribes from the region of Caucasus, from the vicinity of the Caspian, and from the Oxus. These three grand movements may be traced without difficulty in the Persian traditions. In fact, the theatre of the first four reigns of the *Schah-nameh* is, beyond a doubt, Media, where was established the worship of fire by *Houcheng*. *Kaïoumaratz* and his successors were then a Median dynasty dethroned by *Dzohák*, a *Tasi* or Arab prince, and who began what is called by the Greeks the Assyrian empire. The word *Tasi* designates, at the present day, the inhabitants of Arabia; but there is nothing to prevent the belief that anciently it was applied to all the people of the Semitic race, and consequently to the Assyrians. The new dynasty of *Dzohák*, so detested by the Iranians, because it was composed of strangers, and brought in with it an impure and devilish worship, was probably none other than that of the Assyrian princes, who, according to the Greek writers, were masters of all Persia as far as the Indus and Oxus (*Djikhoun* or *Gihon*). *Feridoun* himself, who, according to the *Schah-nameh*, dethroned and imprisoned *Dzohák*, will be the representative of the new dynasty of the Medes, which commenced with *Dejoces* and

overthrew the Assyrian empire. The Assyrian princes, or *Tasi*, did not inhabit Jerusalem, as one might be inclined to suppose from the name *Beit-ul-makaddes*, "the holy dwelling," given by Firdousi to their residence, and which is that by which the Arabs designate the capital of the Jews. The Persian poet himself gives us the requisite information on this point, by adding that *Beit-ul-makaddes* also bore the *Tasi* name of *Hamah-el-Harran*. It was probably, therefore, *Harran*, in Mesopotamia, in the region called *Diar Modzar*. According to traditions still existing, this city was built a short time after the deluge; and it is regarded by the people of the East as one of the most ancient in the world. *Albrouz* is the ancient name of the great chain of mountains which commences on the west of the Cimmerian Bosphorus, borders the Caspian Sea to the southeast and south, and, proceeding eastward, joins the Himalayan chain which separates Hindoostan from Thibet. It comprehends, therefore, the Caucasus of our days, the mountains of *Ghilian*, Mount *Damascend*, the chain of *Chorasan*, and the Paropamisus or *Hindu-Khos*. Feridoon, coming from Media to found the new Median empire on the ruins of the Assyrian, descended Mount *Albrouz*. Eastern Persia, comprising *Sedjestan* and *Zaboulistan*, which is the country of *Ghizneh*, was subject to the *schah*, but governed under him by the princes of the race of *Sâm*. As to *Kaboul*, it was only tributary, and belonged to a branch of the family of *Dzohâk*, that is, to princes of Assyrian origin who had treated with the Medes. The third analogy between the Greek and Persian traditions is found in the invasions of barbarous tribes from Eastern Persia. The incursions of the Scythian Nomades, mentioned by the Greek writers, will agree very well with those of the princes of *Touran*, coming from beyond the *Djihadun* or *Oxus*. From the earliest periods, Persia has been exposed to invasion from the tribes in the direction of Caucasus, the Caspian, and the *Oxus*. The Greeks called all these tribes Scythians, because they had no other name by which to designate these barbarous communities. The Persians call them *Turan* and *Djin* (Turks and Chinese), although at this time (700 B.C.) neither the one nor the other of the two last-mentioned people were to be found on the eastern borders of Persia. When, however, the *Schah-nameh* was composed, the Persians knew only the Turks and Chinese, and they gave their names to all those who had at any time preceded them. The ancient enemies of Persia, in this quarter, were probably *Hunnic* and *Tudesic* tribes, to whom, about the era of the Sassanides, succeeded the Turks and Chinese.—The main fact that results from a comparison of these traditions is, that two empires followed in succession: one, coming from Assyria, ruled over Media and all Eastern Asia; the other, coming from Media, reacted on the first, and drove the Semitic communities across the Tigris and Euphrates; and, finally, to these two great revolutions were joined frequent invasions on the part of the barbarous tribes coming from Caucasus, Scythia, and the banks of the *Oxus*.—To the *Pischiadian* succeeded the *Kaianian* dynasty. The recital of the *Schah-nameh* respecting this second dynasty is as disfigured by fable as that which treats of the first; and it would be of no use to seek in it any exact coincidences with the narratives of Xenophon and Herodotus. The Dejeoces of the latter historian was, like *Kai K'obad*, chosen king on account of his justice and wisdom, at a time when Persia was involved in misery and anarchy. We find also another resemblance between Dejeoces and *Kai K'obad*. *Kai K'obad* is called *Arch* by some Mohammedan authors, and *Dejeoces* is called *Arcezes* by Ctesias. Herodotus informs us that Dejeoces had for his successor a son named Phraortes, and it is to this Median prince that he ascribes the conquest of Persia. Firdousi makes

no mention of this monarch; he probably confounds his reign with that of his father. Nevertheless, a Mohammedan author mentions this second Phraortes, and he states that *Kai K'aus* was the son of *Aphra* and grandson of *Kai K'obad*. It would appear, moreover, that the history of *Kai K'aus*, as given by Firdousi, is at one and the same time that of Cyaxares and Astyages. The blindness of *Kai K'aus* and his army is probably nothing else but the total eclipse of the sun, which took place between Cyaxares and the Lydians, and which had been predicted to the Ionians by Thales. The expedition against *Hameuer* appears to coincide with the siege of Nineveh mentioned by the Greek writers; and these same writers also agree with Firdousi, when they make the operations of the siege to have been broken off by an invasion of the Scythians. The statement also, made by Herodotus, respecting the marriage of Astyages with the daughter of the Lydian monarch, agrees with that of the Persian author, who informs us of the marriage of *Kai K'horou* with *Sendabek*. With regard to *Kai K'horou*, or simply *K'horou*, it appears evident that he was the same with the Cyrus of the Greek writers. *K'horou*, however, according to Firdousi, was not the grandson of the *schah* of Persia, but of *Afrasiab*, king of *Touran*, and the scene of the history of his youth is laid entirely in this latter country. After *Kai K'horou*, the narrative of the Mohammedan writers begins to differ totally from that of the Greeks. Down to the time of Alexander, there are only two points of resemblance between the two statements: the first is the name of *Gouchtasp*, who is the *Darius Hystaspis* of the Greeks; and the other, that of *Ardecheer Dirazdest* (Artaxerxes Longimanus), given to Bahmen of the *Schah-nameh* by *Mirkhond*. (*Klaproth, Tableaux Historiques de l'Asie, &c.*, p. 5, seqq.)

3. Later history of Persia.

The accession of Darius Hystaspis is fixed by chronologists in the year 521 B.C.; and in his reign, supposing him to be the same with *Gouchtasp*, all authorities seem to agree that the famous *Zerdusht*, the Zoroaster of the western writers, succeeded in establishing his new religion. The reign of *Gouchtasp* is extended by the Persian historians over sixty years, that of Xerxes, his son and successor, being wholly passed over; but *Isfunder*, who is supposed by Sir John Malcolm to be the same as Xerxes, is made the hero of his reign. His chivalrous achievements are rivalled only by those of the illustrious *Roustem*, who is again brought on the scene, and *Isfunder* is slain by him in an unjust war, in which he had reluctantly engaged, at the command of his wicked father, with the king of *Segistan*. It is from the Western historians only that we learn anything of the leading events of the reign of Darius Hystaspis. In like manner, all the great events of the history of Xerxes, which form the most brilliant page in the history of Greece, are passed over in silence in the Persian annals. The assassination of Xerxes, by his relative Artabanus, took place B.C. 461, in the twenty-first year of his reign. He was succeeded by his third son, Artaxerxes Longimanus, the Bahmen or Ardecheer Dirazdest of the Persian annals, and the Ahasuerus of the book of Esther. Something like a disguised or confused account of these transactions is found in the pages of Firdousi. After *Isfunder* had subdued all the foreign enemies of his father *Gouchtasp*, he is sent to reduce to obedience the King of *Segistan*, who had thrown off his allegiance. In this expedition he is represented as engaging with the greatest reluctance, and he meets his death from the hand of *Roustem*, to whom, nevertheless, the dying hero commits his son, Bahmen, entreating him to educate him as a warrior. That son, however, on ascending the throne, soon became jealous of *Roustem*, and, having invaded

and subdued his hereditary province, put him to death with his family, on the pretext of avenging the blood of his father. The general facts, that Roustem, a powerful chief, slew Isfundeer, yet protected his son; that a civil contest attended the accession of Ardecheer; and that it terminated in the massacre of Roustem and his family, so far accord with what the Greek historians state respecting the character and fate of Artabanus, as to leave little doubt that both stories relate to the same personages. Of the identity of Ardecheer with Artaxerxes *Μακρόχειρ* or Longimanus, there can be no doubt. His surname, *Dirazdest* ("Long arms") is a full proof of this. The author of the *Tarikh Tabres* states, that under this monarch, to whom he erroneously ascribes the overthrow of Belshazzar, the Jews had the privilege granted them of being governed by a ruler of their own nation; and the favours they experienced, it is added, were owing to the express orders of Bahmen, whose favourite lady was of the Jewish nation. Josephus expressly affirms, that Artaxerxes Longimanus was the husband of Esther; and the extraordinary favour which he showed to the Jews strengthens this testimony. He would seem, indeed, to have been the first monarch of Persia who, strictly speaking, by the subjugation of Segistan, "reigned from India even to Ethiopia, over a hundred and twenty-seven provinces." Persian historians assign to this great monarch a reign of a hundred and twelve years, but the Greek writers limit it to forty, and his death is fixed in the year B.C. 424. He was succeeded, according to the Persian annals, by his daughter Homai, who, after a reign of thirty-two years, resigned the crown to her son, Darab I., the Darius Nothus of the Greeks. It is natural that no notice should be taken of the ephemeral reigns of Xerxes II. and Sogdianus, which together occupied only eight months; and in Ptolemy's canon, Darius Nothus is made the immediate successor of Artaxerxes Longimanus, his reign extending from 424 B.C. to 406. Homai appears to be the Parysatis whom the Greek writers make to be the queen of her half-brother Darius, and to whom they attribute a very prominent part in the transactions of his reign. Her son Arsaces is stated to have succeeded to the throne under the title of Artaxerxes, to which the Greeks added the surname of *Mnemon*, on account of his extraordinary memory. No sovereign, however, besides Longimanus or Dirazdest, is ever noticed by Oriental writers under the name of Ardecheer; it is therefore highly probable, that Mnemon is the Darab I. of the Persian annals, and that he succeeded his mother Homai or Parysatis, who might reign conjointly with Darius Nothus, whether as her husband or her son. The banishment of Queen Parysatis to Babylon, in the reign of her son Artaxerxes, may answer to the abdication of Queen Homai. This is a most obscure epoch in the native annals. The Egyptian war which broke out in the reign of Darius Nothus, the revolt of the Medes, and the part taken by Persia in the Peloponnesian war, are not referred to. Even the name of the younger Cyrus is not noticed by any of the Oriental writers, nor is the slightest allusion made to the celebrated expedition which has given immortality to its commander. The pages of Herodotus, Thucydides, and Xenophon leave little room, however, for regret that these events have not found an Oriental historian. With respect to the second Darab of the Persians, who is made the immediate successor of the first, his identity with the Darius Codomanus of the Greeks is completely established by the conquest of Persia during his reign by Alexander of Macedon. The intermediate reigns of Artaxerxes Ochus, the most barbarous and abandoned monarch of his race, and of his son Arses, both of whom were assassinated, appear to be passed over, or to be included in that of Darab I. The reign of this Darab is distinguished in the native annals by the

breaking out of a war with Philippos of Roum (Macedon), which, though at first unsuccessful, is stated to have terminated gloriously for the Persians; and Philip was glad to make peace, on the terms of giving his daughter to Darab, and becoming his tributary. This daughter is fabled to have been the mother of the Macedonian conqueror. Darab I. built Darabjird, a city about 150 miles east of Shiraz. (*Malcolm*, vol. 1, p. 69.)—The character of Ochus seems, however, to have been transferred by the Persians to the unfortunate and noble-minded Darius, who is alleged to have been deformed in body and depraved in mind; as if, Sir John Malcolm remarks, "to reconcile the vanity of the nation to the tale of its subjugation." It is nevertheless true, that the crimes of their monarchs, the mal-administration into which the affairs of the government had fallen, the assassinations and massacres occasioned by the repeated disputes for the succession, and the slender bond which held together the various provinces of so gigantic an empire, had prepared the way for its easy dissolution. The traditions which the Eastern writers have preserved of the Macedonian hero (whom they call Secunder and Iskander) are very imperfect; and upon a few historical facts, they have reared a superstructure of the most extravagant fable. They agree, however, with the Greek writers in most of the leading facts; such as the invasion of Persia, the defeat and subsequent death of Darius, the generosity of the conqueror, and the strong impression which his noble and humane conduct made upon his dying enemy. They allude, too, to the alliance which Alexander established with Taxilis or Omphis, to his battle with Porus, and his expedition against the Scythians; but the circumstances in which these events are disguised are for the most part fabulous. "His great name," says Sir John Malcolm, "has been considered sufficient to obtain credit for every story that imagination could invent; but this exaggeration is almost all praise. The Secunder of the Persian page is a model of every virtue and of every great quality that can elevate a human being above his species; while his power and magnificence are always represented as far beyond what has ever been attained by any other monarch in the world." The quarrel between the two monarchs originated, according to the author of the *Zeenut-ul-Twarikh*, in Alexander's refusing to pay the tribute of golden eggs to which his father had agreed, returning the laconic answer by the Persian envoy, that "the bird that laid the eggs had flown to the other world." Upon this, another ambassador was despatched to the court of the Macedonian, bearing the present of a bat and a ball, in ridicule of Alexander's youth, and a bag of very small seed, called *gunjud*, as an emblem of the innumerable army with which he was threatened. Alexander, taking the bat and ball in his hand, compared the one to his own power, and the other to the Persian's dominions; and the fate which would await the invaders was intimated by giving the grain to a fowl. In return, he sent the Persian monarch the significant present of a bitter melon. (*Modern Traveller*, pt. 37, p. 64, *seqq.*)—The native writers, as has been said, make Alexander to have been the son of Darius and a daughter of Philip of Macedon! and they add that Darius sent his wife home to her father, on account of her offensive breath; from which circumstance the war between the two monarchs arose! (*Klaproth, Asia Polyglotta*, p. 3.) The Persian writers give no detailed account of the operations of Alexander in Persia, erroneously stating that Darius was killed in the first action.

4. Parthian Dynasty.

Passing over the period of the Macedonian power in Asia, which is detailed in other parts of this volume, we come to the establishment of the Parthian kingdom,

PERSIA.

the mention of which falls naturally under the present article, from the circumstance of the Parthians being designated as *Persians* by many of the Roman writers, particularly the poets, although they were, in fact, of Scythian rather than Persian origin.—Seleucus was succeeded in his Asiatic empire by his son Antiochus Soter, who reigned nineteen years, and left his throne to his son Antiochus Theos. In his reign (B.C. 250) a man of obscure origin, whom some, however, make to have been a tributary prince or chief, and the native writers a descendant of one of the former kings of Persia, slew the viceroy of Parthia, and raised the standard of revolt. His name was *Ashk*, or *Arsaces*, as the Western historians write it. After having slain the viceroy, he fixed his residence at Rhé, where he invited all the chiefs of provinces to join him in a war against the Seleucids; promising at the same time to exact from them no tribute, and to deem himself only the head of a confederacy of princes, having for their common object to maintain their separate independence, and to free Persia from a foreign yoke. Such was the commencement of that era of Persian history which is termed by the Oriental writers the *Moulouk ul Towdeif*, or commonwealth of tribes, and which extends over nearly five centuries. Pliny states that the Parthian (meaning the Persian) empire was divided into eighteen kingdoms. The accounts of this period given by Persian writers are vague and contradictory. "They have evidently," Sir John Malcolm remarks, "no materials to form an authentic narrative; and it is too near the date at which their real history commences to admit of their indulging in fable. Their pretended history of the Ashkanians and Ashganians is, consequently, little more than a mere catalogue of names; and even respecting these, and the dates they assign to the different princes, hardly two authors are agreed. Ashk the First is said to have reigned fifteen years: Khondemir allows him only ten. Some authors ascribe the defeat and capture of Seleucus Callinicus, king of Syria, to this monarch; and others to his son, Ashk II. The latter prince was succeeded by his brother Shahpoor (or Sapor), who, after a long contest with Antiochus the Great, in which he experienced several reverses, concluded a treaty of peace with that monarch, by which his right to Parthia and Hyrcania was recognised. From the death of this prince there appears to be a lapse of two centuries in the Persian annals; for they inform us that his successor was Baharam Gudurz; and if this is the prince whom the Western writers term Gutarzes, as there is every reason to conclude it is, we know from authentic history that he was the third prince of the second dynasty of the Arsacids.—From the death of Alexander till the reign of Artaxerxes (Ardecheer Babigan) is nearly five centuries; and the whole of that remarkable era may be termed a blank in Eastern history. And yet, when we refer to the pages of Roman writers, we find this period abounds with events of which the faintest nation might be proud, and that Parthian monarchs, whose names cannot now be discovered in the history of their own country, were the only sovereigns upon whom the Roman army, when that nation was in the very zenith of its power, could make no impression. But this, no doubt, may be attributed to other causes than the skill and valour of the Persians. It was to the nature of their country, and their singular mode of warfare, that they owed those frequent advantages which they gained over the disciplined legions of Rome. The frontier which the kingdom of Parthia presented to the Roman empire extended from the Caspian Sea to the Persian Gulf. It consists of lofty and barren mountains, of rapid and broad streams, and of wide-spreading deserts. In whatever direction the legions of Rome advanced, the country was laid waste. The war was made, not against the army, but the supplies by which it was supported; and the mode in

PERSIA.

which the Parthian warrior took his unerring aim, while his horse was carrying him from his enemy, may be viewed as a personification of the system of warfare by which his nation, during this era of its history, maintained its independence. The system was suited to the soil, to the man, and to the fleet and robust animal on which he was mounted; and its success was so certain, that the bravest veterans of Rome murmured when their leaders talked of a Parthian war." (*Malcolm*, vol. 1, p. 84, *seqq.*)—The blank which occurs in the native annals may be accounted for, Sir John Malcolm thinks, by the neglect into which the rites of Zoroaster fell during the dynasty of the Arsacids, and the decay of letters consequent upon the depression of the priesthood. In that nation, as in others similarly circumstanced, the literati and the priesthood were synonymous terms; and as the priests alone cultivated letters, so they would be prompted to avenge themselves on the enemies of their faith and order by consigning their race, so far as they had the power, to oblivion. The Arsacids, Gibbon affirms (but without citing his authority), "practised, indeed, the worship of the magi, but they disgraced and polluted it with a various mixture of foreign idolatry."—According to the Western historians, it was under Mithradates I., the fourth in descent and the fifth in succession of the Arsacids, that the Parthian power was raised to its highest pitch of greatness. That monarch, having subdued the Medes, the Elymeans, the Persians, and the Bactrians, extended his dominions to the Indus, and, having vanquished Demetrius, king of Syria, finally secured Babylonia and Mesopotamia also to his empire. (*Prideaux*, vol. 2, p. 404.)—Justin states that this monarch, having conquered several nations, gathered from every one of them whatsoever he found best in its constitution, and from the whole collection framed a body of most wholesome laws for the government of his empire. If one half of this be true, what is history, that it should have preserved no more minute record of such a sovereign!—The remainder of the history of Parthia will be found under that article.

5. Dynasty of the Sassanids.

Artaxerxes is said to have sprung from the illegitimate commerce of a tanner's wife with a common soldier. The tanner's name was Babec, the soldier's Sassan; from the former Artaxerxes obtained the surname of *Babigan* (son of Babec), from the latter all his descendants have been styled *Sassanids*. (*Gibbon*, *Decline and Fall*, c. 8.)—The flattery of his adherents, however, represents him as descended from a branch of the ancient kings of Persia, though time and misfortune had gradually reduced his ancestors to the humble station of private citizens. (*D'Herbelot*, *Bibl. Orient.*, Ardecheer.)—The establishment of the dynasty of the Sassanids took place in the fourth year of the Emperor Severus, 326 years after the Christian era. One of the first acts of the new monarch was the re-establishment of the magi and of the creed of Zoroaster. A reign of fourteen years ensued, which formed a memorable era in the history of the East, and even in that of Rome. Having, after various alternations of victory and defeat, established his authority on a basis which even the Roman power could not shake, he left behind him a character marked by those bold and commanding features that generally distinguish the princes who conquer from those who inherit an empire. Till the last period of the Persian monarchy, his code of laws was respected as the groundwork of their civil and religious policy. Artaxerxes bequeathed his new empire, and his ambitious designs against the Romans, to Sapor, a son not unworthy of his great father; but those designs were too extensive for the power of Persia, and served only to involve both nations in a long series of destructive wars and

reciprocal calamities. (Gibbon, c. 8.)—The subsequent history of the dynasty of the Sassanids will be found detailed in part under the articles Sapor, Chosroes, &c.

6. *Remarks on the Constitution of the Persian Empire in the time of Darius.*

Cyrus and Cambyzes had conquered nations: Darius was the true founder of the Persian state. The dominions of his predecessors were a mass of countries only united by their subjection to the will of a common ruler, which expressed itself by arbitrary and irregular exactions. Darius first organized them into an empire, where every member felt its place and knew its functions. His realm stretched from the Ægean to the Indus, from the steppes of Scythia to the cataracts of the Nile. He divided this vast tract into 20 satrapies or provinces, and appointed the tribute which each was to pay to the royal treasury, and the proportion in which they were to supply provisions for the army and for the king's household. A high road, on which distances were regularly marked, and spacious buildings were placed at convenient intervals to receive all who travelled in the king's name, connected the western coast with the seat of government: along this road, couriers trained to extraordinary speed successively transmitted the king's messages. The satraps were accountable for the imposts of their several provinces, and were furnished with forces sufficient to carry the king's pleasure into effect.—Compared with the rude government of his predecessors, the institutions of Darius were wise and vigorous; in themselves, however, unless they are considered as foundations laid for a structure that was never raised, as outlines that were never filled up, they were weak and barbarous. He had done little more than cast a bridge across the chaos over which he ruled: he had introduced no real uniformity or subordination among its elements. The distribution of the provinces, indeed, may have been grounded on relations which we do not perceive, and may, therefore, have been less capricious than it seems. But it answered scarcely any higher end than that of conveying the wealth of Asia into the royal treasury, and the satraps, when they were most faithful and assiduous in their office, were really nothing more than farmers of the revenue. Their administration was only felt in the burdens they imposed: in every other respect the nations they governed retained their peculiar laws and constitution. The Persian empire included in it the dominions of several vassal kings, and the seats of fierce, independent hordes, who preyed on its more peaceful subjects with impunity. In this, however, there was much good and comparatively little mischief. The variety of institutions comprehended within the frame of the monarchy, though they were suffered to stand, not from any enlarged policy, but because it would have been difficult or dangerous to remove them, and there was nothing better to substitute for them, did not impair, but rather increased its strength; and the independence of a few wild tribes was more a symptom than a cause of weakness. The worst evil arose from the constitution of the satrapies themselves. The provinces were taxed not only for the supply of the royal army and household, but also for the support of their governors, each of whom had a standing force in his pay, and of whom some kept up a court rivaling in magnificence that of the king himself. The province of Babylon, besides its regular tribute and the fixed revenue of its satrap, which was equal to that of a modern European prince of the first rank, defrayed the cost of a stud and a hunting equipage for his private use, such as no European prince was ever able to maintain. Four large villages were charged with the nourishment of his Indian dogs, and exempted from all other taxes. It must, however, be observed, that when an extraordinary bur-

den was thus laid on a particular district, the rest of the province was not relieved, but the more heavily loaded. When the king granted the revenues of whole cities to a wife or a favourite, he did not give up any portion of his own dues; and the discharge of all these stated exactions did not secure his subjects from the arbitrary demands of the satraps and their officers. If the people suffered from the establishment of these mighty viceroys, their greatness was not less injurious to the strength of the state and the power of the sovereign. As the whole authority, civil and military, in each province was lodged in the hands of the satrap, he could wield it at his pleasure without any check from within; and if he were unwilling to resign it, it was not always easy to wrest it from him. The greater his distance from the court, the nearer he approached to the condition of an independent and absolute prince. He was seldom, indeed, tempted to throw off his nominal allegiance, which he found more useful than burdensome, or to withhold the tribute which he had only the task of collecting; but he might often safely refuse any other services, and defy or elude the king's commands with impunity: and least of all was he subject to control in any acts of rapacity or oppression committed in his legitimate government. Xenophon, indeed, in his romance, represents the founder of the monarchy as having provided against this evil by a wise division of power. (*Cyrop.*, 8, 6.)—Cyrus is there said to have appointed that the commanders of the fortresses and of the regular troops in each province should be independent of the satrap, and should receive their orders immediately from court; and a modern author finds traces of this system in the narrative of Herodotus himself. (*Heeren, Ideen*, vol. 1, pt. 1, p. 403.)—But it seems clear, that if the conqueror designed to establish such a balance of power, it was neglected by his successors, and that the satraps engrossed every branch of authority within their respective governments. Thus the huge frame of the Persian empire was disjointed and unwieldy; and the spirit that pervaded it was as feeble as its organization was imperfect. The Persians, when they overthrew the Medes, adopted their laws, religion, and manners; their own, though they may have resembled them in their principal features, were certainly more simple, and better fitted to a conquering people. The religion of the two nations was probably derived from a common source; but before the Persian conquest it appears to have undergone an important change in the reformation ascribed to Zoroaster. In what points his doctrine may have differed from those of the preceding period is an obscure question; but it seems certain that the code of sacred laws which he introduced, founded, or at least enlarged, the authority and influence of the Magian caste. Its members became the keepers and expounders of the holy books, the teachers and counsellors of the king, the oracles from whom he learned the divine will and the secrets of futurity, the mediators who obtained for him the favour of heaven, or propitiated its anger. How soon the tenets of their theology may have been introduced into Persia, is not clear: but, as they were a Median tribe, it is only with the union of the two nations under Cyrus that they can have begun to occupy the station which we find them filling at the Persian court. If the religion of Zoroaster was originally pure and sublime, it speedily degenerated, and allied itself to many very gross and hideous forms of superstition: and if we were to judge of its tendency by the practice of its votaries, we should be led to think of it more harshly or more lightly than it may probably have deserved. The court manners were equally marked by luxury and cruelty: by luxury refined till it had killed all natural enjoyment, and by cruelty carried to the most loathsome excesses that perverted ingenuity could suggest. It is above all the atrocious barbarity of the women

that fills the Persian chronicles with their most horrid stories: and we learn from the same sources the dreadful depravity of their character, and the vast extent of their influence. Cramped by the rigid forms of a pompous and wearisome ceremonial, surrounded by the ministers of their artificial wants, and guarded from every breath of truth and freedom, the successors of Cyrus must have been more than men if they had not become the slaves of their priests, their eunuchs, and their wives. The contagion of these vices undoubtedly spread through the nation: the Persians were most exposed to it, as they were in the immediate neighbourhood of the court. Yet there is no difficulty in conceiving that, long after the people had lost the original purity and simplicity of their manners, the noble youth of Persia may have been still educated in the severe discipline of their ancestors, which is represented as nearly resembling the Spartan. They may have been accustomed to spare diet and hard toil, and trained to the use of horses and arms. These exercises do not create and are not sufficient to keep alive the warlike spirit of a nation, any more than rulers and precepts to form its moral character. The Persian youth may still have been used to repeat the praises of truth and justice from their childhood, in the later period of their history, as they had when Cyrus upbraided the Greeks with their artifices and lies: and yet in their riper years they might surpass them, as at Cunaxa, in falsehood and cunning, as much as they were below them in skill and courage. Gradually, however, the ancient discipline either became wholly obsolete or degenerated into empty forms; and the nation sank into that state of utter corruption and imbecility which Xenophon, or, rather, the author of the chapter that concludes his historical romance, has painted, not from imagination, but from the very life. —(*Thirlwall's Greece*, vol. 2, p. 185, *seqq.*)

PERSIUS SINUS, a part of the Indian Ocean, on the coast of Persia and Arabia, now called the *Persian Gulf*.

PERSIA, or PERSIA PROPRIA, the original province of the Persians. (*Vid.* Persia.)

PERSIUS, or AULUS PERSIUS FLACCUS, a Roman satirist, was born at Volaterræ, a town of Etruria, about the 20th year of the reign of Tiberius, A.D. 34. He was of equestrian rank. He lost his father at the age of six years, and his mother, Fulvia Sisenna, married a second time, but the stepfather whom she gave her son lived only a short period. Persius appears to have shown towards his mother the strongest filial affection. He was trained at Volaterræ till his twelfth year, and he then proceeded to Rome, where he studied grammar under Rhennius Falsmon, and rhetoric under Virgilius Flaccus. At the age of sixteen he became a pupil of Annæus Cornutus, a Stoic philosopher, who had come from Leptis in Africa to settle at Rome. Lucan, the poet, was his fellow-disciple in the school of Cornutus. Persius and Cornutus were bound to each other by feelings more like those of father and son, than such as usually subsist between preceptor and scholar. This friendship continued without interruption till the death of Persius, which took place in his 28th or 30th year. The poet bequeathed his books and a large sum of money to Cornutus, who, however, declined to receive the latter, and gave it up to the sisters of Persius. The materials for a life of Persius are scanty, but they are sufficient to show him in a very favourable light. Amid prevailing corruption, he maintained a high moral character. He consistently applied his principles as a Stoic to the purposes of self-discipline. His acquaintance with men and things was the result of private study more than of actual converse with the world, so that, as his writings testify, he viewed human life as he thought it should be, rather than as it really was. Different opinions are formed of Persius as a satirical poet. Quin-

tilian and Martial, with some of the early Christian writers, bear a high testimony to his merits, as do likewise several modern critics. Others consider him not worth reading. Gifford, who studied him thoroughly, says, among many eulogies of him, "His life may be contemplated with unabated pleasure; the virtue he recommends he practised in the fullest extent; and, at an age when few have acquired a determinate character, he left behind him an established reputation for genius, learning, and worth."—The works of Persius consist of six satires, with a prologue. The metre of the latter is of the kind called Choliambic (lame iambic), being an iambic trimeter, with a spondee in the sixth place instead of an iambus. The Satires contain altogether only 650 hexameters; and in some manuscripts they are given as one continuous work. Whether Persius wrote more than we now possess, as the author of his life attributed to Suetonius affirms, we know not; but since Quintilian and Martial speak of his claims to distinction, though he left "only one book," we should conclude that no other production of his was known in their time. The chief defect of Persius is an affected obscurity of style, which is so great and so general that there are few scholars who read these performances for the first time, whose progress is not arrested at almost every line by some difficulty that presents itself. It has been conjectured, and not without some show of reason, that one of the causes of the great obscurity of Persius is the caution with which he constantly conceals his attacks upon Nero. The scholiast, moreover, expressly states, with regard to several verses of the poet, that they were intended for the emperor. This may be a sufficient apology for Persius as far as Nero is concerned; but why allow the same obscurity to pervade the rest of his poem? The Satires of Persius would, in fact, be absolutely unintelligible for us, if we had not the labours of an ancient scholiast, or, rather, a collection of extracts from several scholiasts, to guide us; and even with this aid we are frequently unable to comprehend the meaning of the satirist. The conclusion seems irresistible, that much of this obscurity is owing to the peculiar character of the poet's mind, to his affected conciseness, and to the show of erudition which he is so fond of exhibiting. Some critics, who condemn the negligent style of Horace, give the preference to Persius as a satirist on account of the greater harmony of his hexameters. Melody of diction, however, cannot compensate for the want of perspicuity; besides, the style of Horace, in his satires, is purposely made to approximate to that of familiar life. It must appear surprising that Persius is so reserved respecting the gross vices and immorality of the age in which he lived. The best way of accounting for this is to ascribe it to the retired life led by the youthful poet in the bosom of a virtuous family, and his consequent want of experience in the excesses of the day. The best editions of Persius are, that of Isaac Casaubon, revised by his son Meric, *London*, 1647, 4to; Bond, *Norib.*, 1631, 8vo; Koenig, *Gött.*, 1803, 8vo, and also with Rupert's edition of Juvenal, *Glasg.*, 1825.

PERTINAX, Publius Helvius, a Roman emperor after the death of Commodus, was born about A.D. 126, at Villa Martis, near Alba Pompeia, on the banks of the Tanarus, in the modern *Piedmont*. His father was a freedman, who dealt in charcoal, an important article of fuel in Italy even at the present day. He received from his parent a good education, and was placed by him under the tuition of Sulpicius Apollinaris, a celebrated grammarian, who is repeatedly mentioned by Aulus Gellius. Pertinax became a proficient in the Greek and Roman languages; and, after the death of his master, he taught grammar himself. But, being dissatisfied with the small profits of his profession, he entered the army; and, being assisted by the interest of Lollius Avitus, a man of consular fami-

ly, and his father's *patronus*, he was promoted to a command. He was sent to Syria at the head of a cohort, and served with distinction against the Parthians, under L. Verus, the colleague of Marcus Aurelius. He was afterward sent to Britain, where he remained for some time. He subsequently served in *Moesia*, Germany, and *Dacia*, but, upon some suspicion of his fidelity, he was recalled by Marcus Aurelius. Having cleared himself, he was made *prætor*, and commander of the first legion, and obtained the rank of senator. Being sent to *Rhætia* and *Noricum*, he drove away the hostile German tribes. His next promotion was to the consulate, and he publicly received the praise of Marcus Aurelius, in the senate and in the camp, for his distinguished services. In Syria he assisted in repressing the revolt of *Avitus Cassius*. He was next removed to the command of the legions on the Danube, and was made governor of *Moesia* and *Dacia*, and afterward returned to Syria as governor, where he remained until the death of Marcus. *Capitolinus* says, that his conduct was irreprehensible till the time of his Syrian government, when he enriched himself, and his conduct became the subject of popular censure. On his return to Rome, he was banished by *Perennis*, the favourite of *Commodus*, to his native country, *Liguria*. Here he adorned *Villa Martis* with sumptuous buildings, in the midst of which, however, he left his humble, paternal cottage untouched. He remained three years in *Liguria*. After the death of *Perennis*, *Commodus* commissioned him to proceed to Britain, where the licentiousness of the troops had degenerated into mutiny. On his arrival, the soldiers wished to salute him as emperor, and were with difficulty prevented by *Pertinax*, who seems to have found the discipline of the legions in a most deplorable state. One of the legions revolted against him; and, in trying to repress the revolt, he was wounded and left among the dead. On his recovery he punished the mutineers, and solicited the emperor for his recall, as his attempts at restoring discipline had rendered him obnoxious to the army. He was then sent as *proconsul* to *Africa*, and was afterward made *prætor* of *Rome*, in which office he showed much moderation and humanity. After the murder of *Commodus*, two of the conspirators, *Lætus* and *Electus*, went to *Pertinax* and offered him the empire, which the latter at first refused, but afterward accepted, and was proclaimed emperor by the senate on the night previous to the first of January, A.D. 193. In the speech which *Pertinax* delivered on the occasion, he said something complimentary to *Lætus*, to whom he owed the empire, on which *Q. Sosius Falco*, one of the consuls, observed, that it was easy to foresee what kind of an emperor he would make, if he allowed the ministers of the atrocities of *Commodus* to retain their places. *Pertinax* mildly replied, "You are but a young consul, and do not yet know the necessity of forgiving. These men have obeyed the orders of their master *Commodus*, but they did it reluctantly, as they have shown whenever they had an opportunity." He then repaired to the imperial palace, where he gave a banquet to the magistrates and principal senators, according to ancient custom. The historian *Dio Cassius* was one of the guests. *Pertinax* recalled those who had been exiled for treason under *Commodus*, and cleared from obloquy the memory of those who had been unjustly put to death. But his attempts to restore discipline in the army alienated the affections of the soldiers, who had been accustomed to license during the reign of *Commodus*. As he found the treasury empty, he sold the statues, the plate, and all the valuable objects amassed by his predecessor. By this means he collected money to pay the *prætorians*, and to make the usual gifts to the people of *Rome*. He publicly declared that he would receive no legacies or inheritance from any one, and he abolished several taxes and tolls which had been

imposed by *Commodus*. *Pertinax* was cherished by the senate and people; but the turbulent *prætorians*, secretly encouraged by the traitor *Lætus*, conspired against the new emperor. After offering the empire to several persons, they went to the palace three hundred in number. The friends of *Pertinax* urged him to conceal himself until the storm had passed; but the emperor said that such conduct would be unworthy of his rank; and he appeared before the mutineers, and calmly remonstrated with them upon the guilt of their attempt. His words were making an impression upon them, when one of the soldiers, a German by birth, threw his spear at him, and wounded him in the breast. *Pertinax* then covered his face, and, praying the gods to avenge his murder, was slain by the other soldiers. *Electus* alone defended him as long as he could, and was killed with him. The soldiers cut off the head of *Pertinax* and carried it into their camp, and then put up the empire at auction, offering it to the highest bidder. It was purchased by *Didius Julianus*. *Pertinax* was 67 years of age, and had reigned 87 days. (*Capitol.*, *Vit. Pert.*—*Dio Cass.*, 73, 1.—*Encycl. Useful Knowl.*, vol. 17, p. 509.)

PERUSIA, now *Perugia*, one of the most ancient and distinguished cities of *Etruria*, situate at the south-eastern extremity of *Lacus Trasymenus*, or *Lago di Perugia*. The era of its foundation long preceded that of *Rome*, though the precise period cannot be ascertained with certainty. In conjunction with the other *Etrurian* states, it long resisted the Roman arms, but, when reduced, it became a powerful and wealthy ally. It was a Roman colony about 709 A.U.C., under the consulship of *C. Vibius Pansa*; and, some years after, sustained a memorable siege, in which *Antony* held out against *Octavius Cæsar*, but was at last forced by famine to surrender. On this occasion, many of the *Perusians* were put to death, and the city was accidentally burned; a madman having set fire to his own house, a general conflagration ensued. (*Appian*, *Bell. Civ.*, 5, 49.—*Compare Vell. Patere.*, 2, 74.—*Florus*, 4, 5.—*Suet.*, *Vit. Aug.*, 96.) *Perusia* appears, however, to have risen again from its ruins, according to *Appian* and *Dio Cassius* (48, 15); and under the Emperor *Justinian* we find it maintaining a successful siege against the *Goths*. (*Cramer's Ancient Italy*, vol. 1, p. 219.)

PERENNUS. *Vid. Niger*.

PESSINUS (gen. *-untis*; in Greek *Πεσινός*, gen. *-οντος*), a city of *Galatia*, on the river *Sangarius*, and near the western confines, according to *D'Anville's* map. It was of very early origin, but chiefly famous on account of the worship of *Cybele*. *Strabo* says, that *Mount Dindymus* (whence she was named *Dindymene*) rose above the town. So great was the fame of the shrine and statue of the goddess, that the *Romans*, enjoined, as it is said, by the *Sibylline books*, caused the latter to be conveyed to *Rome*, since the safety of the state was declared to depend on its removal to *Italy*. A special embassy was sent to *King Attalus*, to request his assistance on this occasion: this sovereign received the *Roman* deputies with great kindness and hospitality, and, having conveyed them to *Pessinus*, obtained for them permission to remove the statue of the mother of the gods, which was nothing else but a great stone. On its arrival at *Rome*, it was received with great pomp and ceremony by the *Roman* senate and people, headed by *Scipio Nasica*, who had been selected for this office by the national voice as the best citizen, according to the injunction of the *Pythian oracle*. This took place in the year 547 U.C., near the close of the second *Punic* war. (*Liv.*, 29, 10, *seqq.*—*Strab.*, 567.) *Stephanus* of *Byzantium* affirms, that *Pessinus* originally bore the name of *Arabyza*, when the district in which it stood belonged to the *Caucones*; but he does not mention from what author he derives this information. (*Steph.*

Byz., s. v. 'Αράβια.) Herodian and Ammianus give various derivations of the name of Pessinus, which are not worth repeating. (*Herod.*, 1, 11.—*Ammian. Marcell.*, 22, 22.—Compare *Steph. Byz.*, s. v. Πέσινος.) It would seem that the inhabitants of Pessinus, after parting with the image of their goddess to the Romans, had still another one in store, for we learn from Livy, that the worship of Cybele was still observed in this city after its occupation by the Gauls, since the priests of the goddess are said to have sent a deputation to the army of Manlius, when on the banks of the Sangarius. (*Livy*, 38, 18.) Polybius mentions the names of the individuals who then presided over the worship and temple of Cybele. (*Polyb.*, *fragm.*, 20, 4.) In the fourth century, also, the Emperor Julian turned away from his line of march against the Persians, for the purpose of visiting the shrine. (*Amm. Marcell.*, 22, 9.)—Pessinus was the chief city of the Tolistobii, who settled in this part of the country, and, according to Strabo's account, was a place of considerable trade. It sank in importance under the Romans; and although Constantine the Great, in his new arrangement of the provinces, made Pessinus the capital of Western Galatia (*Galatia Salutaris*.—*Hierocles*, p. 697), yet the city gradually disappeared from notice after the commencement of the sixth century.—Great uncertainty exists with regard to the site of this place, since its ruins have not been explored by any modern traveller. From the Antonine Itinerary we know that it was ninety-three miles from Ancyra, with which it communicated through Germa, Vindia, and Papiria. Germa, the first of these stations, is known to answer to Yerma, on the modern road leading from *Eski-cher* to Ancyra: the Itinerary would lead us to place it sixteen miles from that site, towards the Sangarius. The Table Itinerary, on the other hand, gives a route from Dorylæum to Pessinus, by Midæum and Tricomia, and allows seventy-seven miles for the whole distance. But the road from Dorylæum to Ancyra did not pass by Pessinus, but by Archelaïum and Germa, as appears from another route in the Antonine Itinerary (p. 202), so that it is evident that Pessinus could not have been situated where Colonel Leake would place it, beyond Juliopolis, or Gordium, on the right bank of the Sangarius, and near its junction with the Hierus, as it would then have been exactly on the road to Ancyra, and such a route as that by Germa would never have been given in the Antonine Itinerary. We ought therefore, perhaps, to look for the ruins of Pessinus not far from the left bank of the Sangarius, somewhere in the great angle it makes between its junction with the Yerma and the Pursak. In Lapie's map, the ruins of Pessinus are laid down in the direction which we have just mentioned, on a site called *Kahé*, but the authority for this is not given. (*Cramer's Asia Minor*, vol. 2, p. 86, *seqq.*—*Leake's Tour*, p. 88, *seqq.*)—The temple of Cybele at Pessinus, as also its porticoes, were of white marble, and surrounded by a beautiful grove. The city was indebted for these decorations to the kings of Pergamus. The priests of the goddess were at one time high in rank and dignity, and possessed of great privileges and emoluments. (*Strab.*, 567.)

PETILIA, I. a town of Italy, in the territory of the Brutii, on the coast of the Tarentine Gulf, and to the north of Crotona. It was fabled to have been settled by Philoctetes after the Trojan war. (*Virg.*, *Æn.*, 3, 401.) In the opinion of the most judicious and best informed topographers, it occupied the situation of the modern *Strongoli*. (*Holsten.*, *ad Steph. Byz.*, p. 307.—*Romanelli*, vol. 1, p. 206.) This small town, of whose earlier history we have no particulars, gave a striking proof of its fidelity to the Romans in the second Punic war, when it refused to follow the example of the other Brutian cities in joining the Carthaginians. In consequence of this resolution, it was

besieged by Hannibal, and, though unassisted by the Romans, it held out until reduced to the last extremity of famine; nor was it till all the leather in the town, as well as the bark and young shoots of trees, and the grass in the streets, had been consumed for subsistence, that they at length surrendered. (*Vel. Paterc.*, 6, 6.—*Liv.*, 23, 30.) Ptolemy incorrectly classes Petilia with the inland towns of Magna Græcia (p. 67), and Strabo confounds it with the Lucanian Petilia. (*Cramer's Anc. Italy*, vol. 2, p. 389.)—II. A town of Lucania, confounded by Strabo with the Brutian Petilia. It is supposed to have been situated on what is now the *Monte della Stella*, not far from Pæstum. (*Cramer's Anc. Italy*, vol. 2, p. 368.)

PETILIVS, an individual at Rome, surnamed *Capitolinus*. According to the scholiasts on Horace (*Sat.*, 1, 4, 94), he had been governor of the Capitol. They add, that he was accused of having stolen, during his office, a gold crown consecrated to Jupiter, and that, having plead his cause in person, he was acquitted by the judges in order to gratify Augustus, with whom he was on friendly terms. Hence, they say, arose his surname of *Capitolinus*. One part, at least, of the story is incorrect, since the *Capitolini* were a branch of the Petilian family long before this. (Compare *Vaillant*, *Num. Fam. Rom.*, vol. 2, p. 222.) What degree of credit is due to the rest of the narrative it is hard to say. A full examination of the whole point is made by Wieland (*ad Horat.*, l. c.).

PETOSIRIS, a celebrated astrologer and philosopher of Egypt. He wrote, according to Suidas, an astrological work, compiled from the sacred books; a treatise concerning the mysteries of the Egyptians, &c. (*Suidas*, s. v.—*Pliny*, 2, 23.—*Juv.*, 6, 581.—*Athenæus*, 3, p. 114.—*Jacobs*, *ad Anthol. Gr.*, vol. 2, pt. 2, p. 470.—*Salmas.*, *de Ann. Clim.*, p. 66, 353.) Ptolemy everywhere calls him 'Αρχαῖος, and says that he and Necepeus were the authors of the *κλιμακτηρικῆς ἀγωγῆς*, that is, of the art of computing a person's nativity from an enumeration of "climacteric years," reference being also had at the same time to the position of the stars. (*Salmas.*, l. c.)

PETRA, I. a city of Arabia, the capital of the Nabathæi, and giving name to the division of the country called Arabia Petraea. It was situate a short distance below the southern boundary of Palestine. The ordinary form of the name is Petra (ἡ Πέτρα); Josephus, however, in some places gives the neuter plural (τὰ Πέτρα), and many of the Church-fathers the feminine plural *Petra* (αἱ Πέτρας). The appellation given to the city originated in the peculiar nature of its situation. It stood on an elevated plain, and was well supplied with fountains and trees; but all around were rocks, which only allowed an access to the place on one side, and that a difficult one. Hence the name of the place, from πέτρα, "a rock." The country beyond this, especially towards the borders of Palestine, was a continued sandy waste. According to Diodorus Siculus (19, 55), there was no city in this quarter in the time of Antigonus, but only a place strongly fortified by nature, and supplied with numerous caves that were used as dwellings. Here, upon a rock (ἐπὶ τινὲς πέτρας), the Nabathæi were accustomed to leave their families and plunder whenever they went on distant expeditions, and this served them as a stronghold. The troops of Antigonus, on their sudden inroad into the country, found in this spot a large quantity of frankincense and myrrh, and also five hundred talents in silver. (*Diod.*, l. c.) The incense and myrrh show that they carried on an overland traffic with the neighbouring communities, and it is to this same traffic that the city of Petra owed its origin. All subsequent writers speak of Petra as a city, and an important place of trade. Eckhel gives a coin, on which we find the inscription 'Αδριανῆ Πέτρα Μητροπόλις. If the coin be genuine, it shows that in the time of the Emperor

Hadrian, Petra not only belonged to the Roman sway, but had also adopted the name of its conqueror. (*Dio Cass.*, 68, 14.) The Syrians (and the Church fathers) call this place *Rakem* ('Ρεκίμ) which also denotes "a rock;" and *Arhekeme* ('Αρεκίμ).—*Josephus*, *Ant. Jud.*, 4, 7. Josephus states that Aaron died in its neighbourhood; he calls it in this passage *Arke* ('Αρεκ) by contraction. (*Ant. Jud.*, 4, 4.) St. Jerome makes it the same with the Sela of Scripture (2 *Kings*, 14, 7). Traces of the Syrian name remained at a late period, and we find the place mentioned by Abulfeda under the appellation of *Ar Rakim*, with the remark that there were dwellings here cut out of the rock. D'Anville names it incorrectly *Karak*. Petra seems not to have continued a place of trade for any very long time; at least Ammianus Marcellinus is silent respecting it, though he enumerates very carefully the important places in this region. Petra lay, according to Diodorus (19, 108), at the distance of 300 stadia from the Dead Sea; and, according to Strabo (779), three or four days' journey, or from twelve to sixteen geographical miles in a southern direction from Jericho.—The remains of the ancient city were for a long time undiscovered by modern travellers. Burckhardt and Bane, at last, discovered them at *Wady Moussa*, in 1812, but could not give them a close examination through fear of the Arabs. In 1828, two French travellers, De la Borde and Linant, visited the spot, and gave a description of the ruins; but the best and fullest account is that afforded by the pages of Mr. Stephens, who was at Petra in 1836. (*Incidents of Travel*, vol. 2, p. 50, *seqq.*—*Mannert*, *Geogr.*, vol. 6, pt. 1, p. 137, 2d ed.)—II. A fortress of Macedonia, among the mountains beyond Libethra, the possession of which was disputed by the Perrhæbi of Thessaly and the kings of Macedonia. (*Liv.*, 39, 26.—*Id.*, 44, 32.) It commanded a pass which led to Pythium in Thessaly by the back of Olympus.—III. A fortress on Mount Hæmus. (*Liv.*, 40, 22.)—IV. A Corinthian borough or village, of which Eëtion, the father of Cypselus, was a native. (*Herod.*, 6, 91.)—V. A rock-fortress in Sogdiana, taken by Alexander. (*Quint. Curt.*, 7, 11.) It was also called *Oxi Petra*, probably from its being near the river Oxus.

PETRAEA, one of the divisions of Arabia, so called, not, as is commonly supposed, from its *stony* or *rocky* character (πέτρα, "a rock," "a stone"), but from its celebrated emporium Petra. (*Vid.* Petra, I.) It was bounded on the east by Arabia Deserta, on the west by Egypt and the Mediterranean, on the south by the Red Sea, which here divides and runs north in two branches, and on the north by Palestine. This country contained the southern Edomites, the Amalekites, the Cushites, who are improperly called the Ethiopians, the Hivites, &c. Their descendants are at present known by the general name of Arabians; but it is of consequence to notice the ancient inhabitants as they are mentioned in the text of Scripture. (*Vid.* Arabia.)

PETREIUS, Marcus, a Roman commander. He was lieutenant to the consul C. Antonius, and was intrusted by the latter, who feigned indisposition, with the command of the Roman forces against the army of Catiline, whom he totally defeated. (*Sall.*, *Bell. Cat.*, c. 59, *seq.*) Faithful to the cause of the republic, he became one of Pompey's lieutenants in Spain during the civil contest, and endeavoured, in conjunction with Afranius, to oppose the progress of Cæsar in that country. They were both, however, compelled to surrender (*Cæs.*, *Bell. Civ.*, 1, 38, *seqq.*), and retired after this to Greece, where they joined the army of Pompey. After the battle of Pharsalia, Petreius fled to Patrae, where Cato afforded him an asylum; and he subsequently accompanied Scipio into Africa. Here again, however, the defeat at Thapsus disappointed his hopes, and he fell, according to Livy, by his own hand, after having performed the same sad office for Juba,

the partner of his flight. (*Liv.*, *Epit.*, 114.) According to Hirtius, however, Juba and Petreius having agreed to die by each others' hands, the African prince easily killed his Roman friend, who was already advanced in years; but having attempted, without effect, to slay himself, persuaded one of his own slaves to become his executioner. (*Hirtius*, *Bell. Afric.*, c. 94.—Compare *Florus*, 4, 2, 69.—*Appian*, *Bell. Civ.*, 2, 100.—*Senec.*, *Suas.*, 7.—*Id.*, *de Provid.*, 2.)

PETRAÏNUM, a village in the district of Sinuessa, in Italy. (*Hor.*, *Epist.*, 1, 5, 5.)

PETROCORI, a Gallic tribe, belonging originally to Celtic Gaul, but subsequently forming part of Gallia Aquitania, when this last was detached from Celtica. Their territory corresponded to the modern *Perigord*, and their capital Petrocorii answers to the present *Perigueux*. Both these modern names retain manifest traces of the ancient appellation. (*Cæs.*, *B. G.*, 7, 75.—*Lemaire*, *Ind. Geogr. ad Cæs.*, s. v.)

PETRONIUS, Titus, surnamed *Arbiter*, because Nero had named him *Arbiter elegantiae*. He was born, according to some modern scholars, at Massilia (*Marseille*) or somewhere in its vicinity, of a good family, but received his education at Rome. No one knew better how to unite the love of letters with the most unrestrained desire for pleasure. His portrait has been drawn by Tacitus with the hand of a master. It must be confessed, however, that the Petronius of Tacitus has the prænomen of Caius, and the Petronius of whom we are now treating that of Titus. There prevails, indeed, much uncertainty respecting the prænomen of Petronius; Pliny (87, 7) calls the Petronius of Tacitus, Titus; while the scholiast on Juvenal gives him the name of Publius.—We will here insert the passage of the historian above mentioned, which gives us graphic a description of the character of the man: "He passed his days in sleep, and his nights in business or pleasure. Indolence was at once his passion and his road to fame. What others did by vigour and industry, he accomplished by his love of pleasure and luxurious ease. Unlike the men who profess to understand social enjoyment, and ruin their fortunes, he led a life of expense without profusion; an epicure, yet not a prodigal; addicted to his appetites, but with taste and judgment; a refined and elegant voluptuary. Gay and airy in his conversation, he charmed by a certain graceful negligence, the more engaging as it flowed from the natural frankness of his disposition. With all his delicacy and careless ease, he showed when he was governor of Bithynia, and afterward in the year of his consulship, that vigour of mind and softness of manners may well unite in the same person. From his public station he returned to his usual gratifications, fond of vice, or of pleasures that bordered upon it. His gayety recommended him to the notice of the prince. Being in favour at court, and cherished as the companion of Nero in all his select parties, he was allowed to be the *arbiter* of taste and elegance. Without the sanction of Petronius nothing was exquisite, nothing rare or delicious. Hence the jealousy of Tigellinus, who dreaded a rival, in the good graces of the emperor almost his equal, in the science of luxury his superior. Tigellinus determined to work his downfall, and accordingly addressed himself to the cruelty of the prince; that master passion to which all other affections and every motive were sure to give way. He charged Petronius with having lived in close intimacy with Sævinus the conspirator; and, to give colour to that assertion, he bribed a slave to turn informer against his master. The rest of the domestics were loaded with irons. Nor was Petronius suffered to make his defence. Nero at that time happened to be on one of his excursions into Campania. Petronius had followed him as far as Cumæ, but was not allowed to proceed farther than that place. He seemed to linger in doubt and fear, and yet he was not in a hur-

ry to leave a world which he loved. He opened his veins and closed them again, at intervals losing a small quantity of blood, then binding up the orifice, as his own inclinations prompted. He conversed during the whole time with his usual gayety, never changing his habitual manner, nor talking sentences to show his contempt of death. He listened to his friends, who endeavoured to entertain him, not with grave discourses on the immortality of the soul or the moral wisdom of philosophers, but with strains of poetry, and verses of a gay and natural turn. He distributed presents to some of his servants, and ordered others to be chastised. He walked out for his amusement, and even lay down to sleep. In his last scene of life he acted with such calm tranquillity, that his death, though an act of necessity, seemed no more than the decline of nature. In his will, he scorned to follow the example of others, who, like himself, died under the tyrant's stroke: he neither flattered the emperor, nor Tigellinus, nor any of the creatures of the court; but having written, under the fictitious names of profligate men and women, a narrative of Nero's debauchery, and his new modes of vice, he had the spirit to send to the emperor the tablets, sealed with his own seal, which he took care to break, that, after his death, it might not be used for the destruction of any person whatever." (*Tacitus, Ann.*, 16, 18, *seqq.*)—Some critics have thought that the Petronius to whom this passage refers is not the same with the author of the work that has come down to us, entitled *Satyricon*. Their chief argument is, that the work which, according to Tacitus, Petronius, when dying, caused to be sent to Nero, was written on portable tablets (*codicilli*), a circumstance that militates against the idea of its being a production of any length. It is urged, moreover, that the accomplices in the tyrant's debaucheries and crimes were named in the work, whereas the actors in the *Satyricon* bear fictitious names. It is evident, indeed, that the *Satyricon* is not the piece of which Tacitus makes mention, and that Nero caused the latter to be destroyed; but it would seem that the critics who advocate this opinion go too far when they deny also the identity of the writers. What is there to prevent our supposing that Petronius, having now no measure to keep with the world, amused himself with tracing on his testamentary tablets the scandalous lives of the individuals, whose general manners he was content with depicting in his larger work? Those critics, on the other hand, who do not see in the author of the *Satyricon* the friend and intimate companion of Nero, are divided in opinion as to the period when he lived. Some carry him up as high as the era of Augustus, while others place him under the Antonines, or even in the fourth century. Both parties ground their respective arguments on his style. The former discover in it the purity of the golden age, while the latter find it marked with many low and trivial expressions, and with many solecisms that indicate the decline of the language. Without wishing to throw the blame of some of these faults on the manuscript itself, which is in so deplorable a state that many passages remain incapable of being deciphered, notwithstanding all the efforts of the commentators, may we not suppose that these pretended solecisms have been purposely put by the author in the mouths of individuals of the lower class, and that the unusual words employed by him only appear such to us, because we are unacquainted with the language of debauchery and intoxication among the Romans?—Some critics, surprised that Seneca makes no mention of Petronius, think that this silence is owing to the circumstance of that philosopher's believing himself to be alluded to in the following lines aimed by Petronius against the Stoics:

"*Ipsi qui cynica traducunt tempora scena,
Nonnumquam nummis sendere verba solent.*"
1036

If it were certain, as some suppose, that Terentianus Maurus was the contemporary of Martial, there would remain but little doubt respecting the epoch when Petronius lived, since Terentianus cites him once under the name of Arbiter, and another time under that of Petronius. In 1770, a learned Neapolitan, Ignarra, supported, with some new reasons, the opinion that Petronius lived towards the end of the era of the Antonines. It appears more than probable, he maintains, that the *Satyricon* was written in the same city in which the scene of the banquet of Trimalcion is laid, and that its object is to depict the manners of the Neapolitans. Many helleisms and solecisms, some of which still remain among the lower orders at Naples, prove, he thinks, that Petronius was either born in that city, or received his education there. As to the period in which he lived, he indicates it himself, according to Ignarra, in the 44th, 57th, and 76th chapters, and elsewhere, by giving to the city of Naples the title of colony, or in speaking of the colonial magistrates. Ignarra then proceeds to show that Naples only became a Roman colony towards the close of the reign of Commodus. Finally, he remarks that Petronius, in the 76th chapter, makes mention of the mathematician Serapion, who lived under Caracalla, as appears from a passage in Dio Cassius (78, 4). Ignarra thinks that Petronius, born under the Antonines, had, by a careful study of good models, appropriated to himself much of the elegance of the golden age, without getting entirely rid of the corruption of that in which he happened to live. (*De Palaestra Neapolitana, &c.*, p. 182, *seqq.*) Wytenbach appears to favour the opinion of Ignarra, in some of its features (*Bibl. Crit.*, pt. 5, p. 84, *seqq.*); but many arguments might be cited against it.—Some critics, again, have thought that the author of the *Satyricon* was not called Petronius, but that, as the treatise on the art of cookery was entitled *Apicius*, and the Distichs *Cato*, so this Menippean Satire has been styled *Petronius* by the author: this opinion, however, is altogether untenable.—The *Satyricon* of Petronius is written in the Varronian or Menippean style of satire. We have merely a fragment of it, or, to speak more correctly, a succession of fragments, which some lover of loose and indecent reading would seem to have selected from the work in the middle ages, for it is said that the *Satyricon* existed entire in the twelfth century. The fragments that remain form so many episodes: the most witty of these is the well-known history of the Ephesian Matron; but the longest, and the one most descriptive of the manners of the day, is the Banquet of Trimalcion, a ridiculous personage, intended, as some think, to represent the Emperor Claudius. This fragment was found in the 17th century at Trau in Dalmatia, in the library of a certain Nicolaus Cippius, and was published for the first time at Padua, in 1662. It gave rise to a very warm contest among the scholars of the day. Adrien de Valois and Wagenseil attacked its authenticity, which was defended in its turn by Petit, the celebrated physician, in a treatise in which he assumed the name of Marinus Statileius. The manuscript was sent to Rome and examined by some of the first critics of the day. It passed after this into the library of the King of France. At present there is no doubt as to its authenticity.—The noise which this discovery made in the literary world induced a French officer named Nedot to attempt an imposture, which did not, however, answer his hopes. He published, in 1693, at Rotterdam, a pretended Petronius, complete in all its parts, which he said had been found at Belgrade, in 1688, by a certain Dupin. At first, some members of the academies of Nimes and Arles suffered themselves to be imposed upon; the fraud, however, was soon discovered. We must not confound with this last-mentioned individual a Spaniard named Marchena, who, in 1800, amused himself with publishing a new fragment

of Petronius, found, according to him, in the library at St. Gall. (*Repertoire de Littér. Anc.*, vol. 1, p. 259.)—A poem in 295 verses, on the fall of the Roman republic, forms a fine episode to the Satyricon of Petronius. The Satyricon itself, it may be remarked, in concluding, is admirable for the truth with which the author delineates the characters of his personages. It contains many pleasing pictures, full of irony; and it is characterized by great spirit and gayety of manner; but it is to be regretted that the author has employed his abilities on a subject so truly immoral and disgusting. The style is rich, picturesque, and energetic; but often obscure and difficult, either from the unusual words which we meet with in it, or by reason of the corrupt state of the text. The best edition is that of Burman, 4to, *Ultraj.*, 1709; to which may be added that of Reinesius, 1731, 8vo, and that of C. G. Anton, *Lips.*, 1781, 8vo. (*Schöll, Hist. Lit. Rom.*, vol. 2, p. 416, *seqq.*—*Bähr, Gesch. Röm. Lit.*, vol. 1, p. 577, *seqq.*)

PEUCE, a name applied to the land insulated by the two principal arms of the Danube at its mouth. The ancient appellation still partly remains in that of *Picuzina*. It was called Peuce from *πεύκη*, a pine-tree, with which species of tree it abounded. From this island the Peucini, who dwelt in and adjacent to it, derived their name. We find them reappearing in the Lower Empire, under the names of *Piezimiges* and *Patrinacites*. (*Lucan*, 3, 202.—*Plin.*, 4, 12.)

PEUCETIA, a region of Apulia, on the coast, below Damia. The Peucetii, according to Dionysius of Halicarnassus, derived their name from Peucetius, son of Lycaon, king of Arcadia, who, with his brother CEnotrus, migrated to Italy seventeen generations before the siege of Troy. But modern critics have felt little disposed to give credit to a story, the improbability of which is so very apparent, whether we look to the country whence these pretended settlers are said to have come, or the state of navigation at so remote a period. (*Fyeret, Mem. de l'Acad.*, &c., vol. 18, p. 87.) Had the Peucetii and the CEnotri really been of Grecian origin, Dionysius might have adduced better evidence of the fact than the genealogies of the Arcadian chiefs, cited from Pherecydes. The most respectable authority he could have brought forward on this point would unquestionably have been that of Antiochus the Syracusan; but this historian is only quoted by him in proof of the antiquity of the CEnotri, not of their Grecian descent. (*Dion. Hal.*, 1, 2.—*Strabo*, 289.—*Plin.*, 3, 11.) The Peucetii are always spoken of in history, even by the Greeks themselves, as barbarians, who differed in no essential respect from the Daunii, Iapyges, and other neighbouring nations. (*Cramer's Anc. Italy*, vol. 2, p. 296.)

PEUCINI. *Vid.* Peuce.

PHACUSA, a town of Egypt, on the Pelusiac arm of the Nile. The ruins are found near the modern *Tell Phakus* (hill of Phacusa). (*Steph. Byz.*, s. v.)

PHACUSSA, one of the Sporades, now *Gaiphonisi*. (*Plin.*, 4, 12.—*Steph. Byz.*, s. v. *Φάκουσα*.)

PHACIA, the Homeric name for the island of Corcyra. (*Vid.* Corcyra.) When visited by Ulysses, Alcinoüs was its king, and his gardens are beautifully described by the poet. The Phaciæans are represented as an easy-tempered and luxurious race, but remarkable for their skill in navigation. They were fabled to have derived their name from Phæax, a son of Neptune. (*Hom. Od.*, 6, 1, *seqq.*—*Id. ib.*, 7, 1, *seqq.*—*Völcker, Homerische Geographie*, p. 66.)

PHÆDON, a native of Elis, and the founder of the Eliæ school. He was descended from an illustrious family; but had the misfortune early in life to be deprived of his patrimony, and sold as a slave at Athens. It happened that Socrates, as he passed by the house where Phædon lived, remarked in his countenance traces of an ingenuous mind, which induced him to per-

suade one of his friends, Alcibiades or Crito, to redeem him. From that time Phædon applied himself diligently to the study of moral philosophy under Socrates; and to the last adhered to his master with the most affectionate attachment. He instituted a school at Elis after the Socratic model, which was continued by Plietæstus, an Elian, and afterward by Menedæmus of Eretria. One of the dialogues of Plato is named after Phædon, namely, the celebrated one respecting the immortality of the soul. (*Diog. Laert.*, 2, 106.—*Aul. Gell.*, 2, 18.)

PHÆDRA, a daughter of Mines and Pasiphaë, who married Theseus, by whom she became mother of Acamas and Demophdön. (*Vid.* Hippolytus I.)

PHÆDRUS (or PHÆDER, for the genitive *Phædri* admits of either of these forms being the nominative), a Latin fabulist. All that we know respecting him is obtained from his own productions, for no ancient writer down to the time of Avienus has made mention of him, except, perhaps, on one occasion, Martial. Avienus speaks of him in the preface to his own Fables, and his authority can only be combated by the erroneous assertion, that the Fables of this latter writer himself are the productions of more modern times. (*Christ. Prolus.*, de *Phædro*, p. 8.—Compare, on the opposite side of the question, the *Nachträge zu Sulzer*, p. 36, *seqq.*) Martial also alludes to a Phædrus in one of his epigrams (3, 10), where some very erroneously refer the name to an Epicurean philosopher, one of Cicero's early instructors. (*Christ. Prolus.*, p. 6), and others to a certain writer of mimes. (*Farnab. ad Martial.*, l. c.—*Hulsemann, de Cod. Fab. Avien.*, *Gött.*, 1807.) The whole question turns on the true force of the epithet "*improbus*," as applied by Martial to Phædrus, and this has been well discussed by Adry, who decides in favour of the Fabulist. (*Dissertation sur les quatre MSS. de Phèdre*, p. 195.—*Phædrus*, ed. Lemaire, vol. 1.) Phædrus is generally supposed to have been a Thracian by birth; and two passages in his writings (*Prol.*, lib. 3, 17, and 54) would seem to indicate this. Some of the later editors make him a Macedonian, but he can only be called so as far as the term Macedonian comprises that of Thracian also. (*Schwabe, Vit. Phædr.*) The year of his birth is unknown: it is not ascertained either whether he was born in slavery, or whether some event deprived him of his freedom. The year that Cicero was proconsul in Asia, C. Octavius, the father of Augustus, and propretor in Macedonia, gained a victory over some Thracian clans. It has been conjectured that Phædrus, still an infant, was among the captives taken on this occasion; but, if this be true, then Phædrus will have written a portion of his fables at the age of more than seventy years; which appears contrary to a passage in his work (lib. 4, epil. 8), in which he prays one of his patrons not to put off his favours to a period when, having reached an advanced age, he would be no longer able to enjoy them. However this may be, Phædrus was brought to Rome at a very early age, where he learned the Latin tongue, which became as familiar to him as his native language. Augustus gave him his freedom, and the means of living comfortably without the necessity of exertion. Under the reign of Tiberius he was persecuted by Sejanus, who became his accuser and effected his condemnation. The cause of Sejanus's hatred, and the pretext for the accusation, are equally unknown. Some commentators, and, in particular, Brotier, think they have discovered the motive for this persecution in the sixth fable of the first book, on the marriage of the sun. They have supposed that by the sun Phædrus meant to designate Sejanus, who aspired to the hand of Livilla, widow of the son of Tiberius; but in this fable the allusion is to a marriage, not to a project of marriage. It is more probable that, in order to render the poet suspected by Tiberius, some one had persuaded the tyrant, who,

since his retirement to the island of Caprea, was become an object of general contempt, that Phædrus meant him, in the second fable of the first book, by the log given to the frogs as their king. But, if Phædrus has indeed represented Tiberius under the allegory of a log, the hydra, which takes its place, will indicate the successor of the monarch, unless we suppose Sejanus to be intended by the reptile: this interpretation, however, appears extremely forced. Titze thinks that Phædrus may have been at first a favourite of Sejanus, and afterward involved in his disgrace; and that Eutychus, in the reign of Caligula, had given him hopes of a restoration to imperial patronage. This theory, however, is contradicted by the prologue to the third book of the fables (v. 41.—*Titze, Introduct. in Phædr.—Id., de Phædri vita, scriptis, et usu.*).—Phædrus composed five books of fables, containing, in all, ninety fables, written in Iambic verse. He has the merit of having first made the Romans acquainted with the fables of Æsop; not that all his own fables are merely translations of those of the latter, but because the two thirds of them that appear original, or, at least, with the originals of which we are unacquainted, are written in the manner of Æsop. Phædrus deserves the praise of invention for the way in which he has arranged them; and he is quite as original a poet as Fontaine, who, like him, has taken from other sources besides the fables of Æsop the materials for a large portion of his own. He is distinguished for a precision, a gracefulness, and a naïveté of style and manner that have never been surpassed. The air of simplicity which characterizes his pieces is the surest guarantee of their authenticity, which some critics have contested. His diction is at the same time remarkable for its elegance, though this occasionally is pushed rather too far into the regions of refinement. The manuscripts of Phædrus are extremely rare. The one from which Pithou (Pithous) published, in 1596, the *editio princeps* of the fables, passed eventually, by marriage, into the hands of the Lepelletier family; and is now in the library of M. Lepelletier de Rosanbo (*De Xivrey, ad. Phædr., p. 23, seqq.—Id. ib., p. 40, seqq.*). A second manuscript, which Rigalt used in his edition of 1617, was destroyed by fire at Rheims in 1774; but we have remaining of this a very accurate collation. A third one, or, rather, the remains of one, is now in the Vatican library, and is said to contain from the first to the twenty-first fable of the first book. (*Notit. Literar. de Codd. MSS., Phædri, No. 3, de Cod. Danielis.*) This rarity of manuscripts is one cause of the doubts that have been entertained by some respecting the authenticity of the fables ascribed to him, and even the very existence of the poet. Some other circumstances lend weight to these doubts: the silence, namely, of the ancient writers concerning Phædrus, and the positive declaration of Seneca, who remarks (*Consol. ad Polyb., c. 27*) that the Romans had never attempted to compose after the manner of the Æsopic fables. (*"Non audeo te usque eo producere, ut fabellas quoque et Æsopæos logos, intentatum Romanis ingeniis opus, solita tibi venustate connectas."*) Another argument on this same side of the question is as follows: Nicolas Perotti, who, about the middle of the 15th century, was archbishop of Manfredonia, and one of the patrons of Greek literature in Italy, cites in his *Cornu Copiæ* a fable which he says he took in his early days from the fables of Avienus. (*"Allusit ad fabulam, quam nos ex Avieno in fabellas nostras adolescentes Iambico carmine transtulimus."* *Cornu Cop., p. 963, 34, seqq., ed. Basil, 1532, fol.*) The fable, however, is not in the collection of Avienus, but forms the 17th of the 3d book of Phædrus; and from this inaccuracy of citation, which was regarded as a falsehood, some concluded that Perotti was a plagiarist, while others regarded Phædrus as a supposititious author. Both these opinions were a little too precip-

itate; and the discovery that was made, at the beginning of the 18th century, of the manuscripts of the fables of Perotti, cleared up at once the whole mystery. One of the titles of this MS. is as follows: "*Nicolai Perotti Epitome Fabularum Æsopi, Avieni, et Phædri,*" &c.; and to this are subjoined some verses, in which Perotti openly declares that the fables are not his, but taken from Æsop, Avienus, and Phædrus. The fables taken from Phædrus in this collection are the 6th, 7th, and 8th of the first book, together with the epilogue; a large number of the second book; from the 19th to the 24th of the fourth book, and the first five of the 5th book. Perotti, therefore, is by no means the plagiarist some suppose him to be, since he names the authors from whom he borrows. Two other arguments may also be adduced in favour of the opinion which makes the fables of Phædrus much earlier than Perotti's time: one is afforded by a monumental inscription, found at Apulum, in Dacia, and consisting of a verse of one of the fables of Phædrus (3, 17.—*Mannert, Res Trajani ad Danub., etc., p. 78*); the other argument is deduced from the age of the MSS., which is much earlier than the era of the Bishop of Manfredonia, and falls in the ninth or tenth century. It has been conjectured, and with great appearance of probability, that the fables of Phædrus were frequently taken by the writers of the twelfth, thirteenth, and fourteenth centuries, and converted into prose, and in this way we are to account for the great destruction of MSS.—There is, however, another question connected with this subject. The manuscript of Perotti, to which we have just alluded as having been discovered near the beginning of the eighteenth century, had, by some fatality or other, been again lost, and remained so until 1808, when it was rediscovered at Naples, and in 1809 a supplement of 32 new fables of Phædrus (as they were styled) was published by Casitto and Jannelli. A literary warfare immediately arose respecting the authenticity of these productions, in which several eminent scholars took part; and the opinion is now very generally entertained, that they are not, as was at first supposed, the composition of Perotti, but of some writer antecedent to his time, though by no means from the pen of Phædrus himself. (Consult *Adry, Examen des nouvelles fables de Phèdre, Paris, 1812.—Phædrus, ed. Le-maire, vol. 1, p. 197, seqq.*)—It remains but to add a few words in relation to the time when Phædrus published his fables. The main difficulty here arises from the words of Seneca, already quoted, and which expressly state that the Romans had never attempted to compose after the manner of the Æsopic fables. Brotier thinks that Seneca makes no mention of Phædrus, because the latter was a barbarian, not Roman-born. This reason, although given also by Fabricius and Vossius, is very unsatisfactory. What would we say of a writer who, having to speak of the Latin comic poets, should omit all mention of Terence because he was a native of Africa? Vavasour thinks, that, as Phædrus expresses himself with great freedom, his fables were suppressed under Tiberius, Caligula, Claudius, and Nero, so that Seneca had never heard of them. "Perhaps," he adds, "it was an act of pure forgetfulness on his part;" and he seems almost induced to believe, that Seneca, through jealousy towards an author who had written with so much simplicity, and so unlike his own affected manner, has purposefully passed him over in silence. Desbillons, dissatisfied with both these reasons, believes that Phædrus, who survived Sejanus, lived to the third year of the reign of Claudius, a period when Seneca, writing his work on "Consolation," might easily say, that the Romans had not as yet any fabulist, since the productions of Phædrus might not yet have been published. This explanation is not devoid of probability.—The best editions of Phædrus are, that of Burmann, *Amst., 1698*;

Lugd. Bad., 1727, 4to, and 1745, 8vo; that of Bentley, at the end of his *Terence*, *Canab.*, 1726, 4to, and *Amst.*, 1727, 4to; that of Brotier, *Paris*, 1783, 12mo; that of Schwabe, *Brunsv.*, 1806, 2 vols. 8vo; that of Gail, in Lemaire's collection, *Paris*, 1826, 2 vols. 8vo; and that of Orelli, *Turici*, 1831, 8vo. (*Schöll, Hist. Lit. Rom.*, vol. 2, p. 343, *seqq.*—*Bähr, Gesch. Röm. Lit.*, vol. 1, p. 308, *seqq.*)

PHAETHON (Φαίθων), son of Helios and the Ocean-nymph Clymene. His claims to a celestial origin being disputed by Epaphus, son of Jupiter, Phaëthon journeyed to the palace of his sire, the sun-god, from whom he extracted an unwary oath that he would grant him whatever he asked. The ambitious youth instantly demanded permission to guide the solar chariot for one day, to prove himself thereby the undoubted progeny of the sun. Helios, aware of the consequences, remonstrated, but to no purpose. The youth persisted, and the god, bound by his oath, reluctantly committed the reins to his hands, warning him of the dangers of the road, and instructing him how to avoid them. Phaëthon grasped the reins, the flame-breathing steeds sprang forward, but, soon aware that they were not directed by the well-known hand, they ran out of the course; the world was set on fire, and a total conflagration would have ensued, had not Jupiter, at the prayer of Earth, launched his thunder, and hurled the terrified driver from his seat. He fell into the river Eridanus. His sisters, the Heliades, as they lamented his fate, were turned into poplar-trees on its banks, and their tears, which still continued to flow, became amber as they dropped into the stream. Cynus, the friend of the ill-fated Phaëthon, also abandoned himself to mourning, and at length was changed into a swan (κύκνος). (*Ovid, Met.*, 1, 750, *seqq.*—*Hygin., fab.*, 152, 154.—*Nonnus, Dionys.*, 38, 105, 439.—*Apoll. Rhod.*, 4, 597, *seqq.*—*Virg., Æn.*, 10, 190.—*Id., Eclog.*, 6, 62.) This story was dramatized by Æschylus, in the *Heliades*, and by Euripides in his *Phaëthon*. Some fragments of both plays have been preserved. Ovid appears to have followed closely the former drama.—The legend of Phaëthon is regarded by the expounders of mythology at the present day as a physical myth, devised to account for the origin of the *electron*, or amber, which seems to have been brought from the Baltic to Greece in the very earliest times. The term *ἡλεκτρον*, as Welcker observes, resembles *ἡλεκτρον*, an epithet of the sun. In the opinion of this last-mentioned writer, the story of Phaëthon is only the Greek version of a German legend on the subject. The tradition of the people of the country was said to be (*Apoll. Rhod.*, 4, 611), that the amber was produced from the tears of the sun-god. The Greeks made this sun-god the same with their Apollo, and added that he shed these tears when he came to the land of the Hyperboreans, an exile from heaven on account of his avenging upon the Cyclops the fate of his son Æsculapius. But, as this did not accord with the Hellenic conception of either Helios or Apollo, the Heliades were devised to remove the inconsistency. The foundation of the fable lay in the circumstance of amber being regarded as a species of resin, which drops from the trees that yield it. That part of the legend which relates to the Eridanus, confounds the Po with the true Eridanus, in the north of Europe. (*Welcker, Æsch. Trilogie*, p. 566, *seq.*—*Keightley's Mythology*, p. 57, *seq.*)

PHAETHONTIÆDES or PHAETHONTIDES, the sisters of Phaëthon, changed into poplars. (*Vid. Heliades*, and *Phaëthon*.)

PHALANTHUS, a Lacedæmonian, one of the Partheniæ, and the leader of the colony to Tarentum. (*Vid. Partheniæ*.)

PHALANUS, a tyrant of Agrigentum in Sicily, whose age is placed by Bentley in the 57th Olympiad, or about 550 B.C. This, however, is done by that emi-

nent scholar, in the course of his well-known controversy with Boyle and others, merely to give more force to his own refutation, since it is the latest period that history will allow, and, therefore, the most favourable to the pretended letters of Phalaris, which provoked the discussion. (*Monk's Life of Bentley*, p. 62.) It is from these same letters that Boyle composed a life of Phalaris; but the spurious nature of the productions from which he drew his information, and the absence of more authentic documents, cast an air of suspicion on the whole biography. According to this life of him, he was born in Astypalea, one of the Sporades, and was banished from his native island for allowing his ambitious views to become too apparent. Proceeding thereupon to Sicily, he settled at Agrigentum, where he eventually made himself master of the place and established a tyranny. (Compare *Polyænus*, 5, 1.) He at first exercised his power with moderation, and drew to his court not only poets and artists, but many wise and learned men, whose counsels he promised to follow. Deceived by this state of things, the people of Himera were about to request his aid in terminating a war which they were carrying on with their neighbours, when Stesichorus dissuaded them from this dangerous scheme by the well-known fable of the horse and the stag. (*Vid. Stesichorus*.) The seditions which afterward took place in Agrigentum compelled Phalaris to adopt a severer exercise of his authority, and hence his name has come to us as that of a cruel tyrant. The instrument of his cruelty, also, namely the brazen bull made by the artist Perillus, is often alluded to by the ancient writers. (*Vid. Perillus*.) The manner of his death is variously given. Some make him to have been stoned to death for his cruelty by the people of Agrigentum; others relate that his irritated subjects put him into his own bull and burned him to death. (*Vid. Perillus*.)—We have remaining, under the name of Phalaris, a collection of letters, supposed to have been written by him, but which Bentley has shown to be the mere forgeries of some sophist, who lived at a later period. The letters of Phalaris were first published by Bartholomæus Justinopolitanus in 1498, *Venet.*, 4to. This edition, which is very rare, ought to be accompanied by a Latin version; since Bartholomæus promises one in his prefatory epistle to Peter Contarenus; but no copy occurs with one. (*Laire, Index Libr.—Hoffmann, Lex. Bibliogr.*, vol. 3, p. 210.) The most esteemed among subsequent editions is that of Van Lennep, completed by Valckenaer, *Groning.*, 1777, 4to, republished under the editorial supervision of Schæfer, *Lips.*, 1823, 8vo, maj. The edition of Boyle, which gave rise to the controversy between the Christ-Church wits and the celebrated Bentley, was issued from the Oxford press in 1695, 8vo, and reprinted in 1718. It owes its only notoriety to the lashing which Bentley inflicted upon the editor, the Hon. Charles Boyle, brother to the Earl of Orrery, and, at the time of the first publication, a member of Christ-Church. In preparing this edition, Boyle was assisted by Mr. John Freind, one of the junior students of the college, afterward the celebrated physician, who officiated as his private tutor. The preface contained a remark, reflecting, though without any just grounds whatever, on Bentley's want of courtesy in not allowing a manuscript in the King's Library, of which he was keeper, to be collated for Boyle's edition. This drew from Bentley his first Dissertation on the Epistles of Phalaris, in the form of Letters to Mr. Wotton, a work which, though afterward eclipsed by the enlarged dissertation, is no less amusing than learned. The author is completely successful in proving the epistles spurious. His arguments are drawn from chronology, from the language of the letters, from their matter, and, finally, from their late discovery. Having overthrown the claim of Phalaris to

a place among royal or noble authors, Bentley examines certain other reputed pieces of antiquity, such as the Letters of Themistocles, of Socrates, and of Euripides; all which he shows not to be the productions of the individuals whose names they bear, but forgeries of some sophists many centuries later. The publication of this work excited a sensation in the literary and academical circles that was without example. The society of Christ-Church was thrown into a perfect ferment, and the task of inflicting a full measure of literary chastisement upon the audacious offender was assigned to the ablest scholars and wits of the college. The leaders of the confederacy were Atterbury and Smalridge, but the principal share in the attack fell to the lot of the former. In point of classical learning, however, the joint stock of the coalition bore no proportion to that of Bentley: their acquaintance with several of the books on which they comment appears only to have been begun upon this occasion; and sometimes they are indebted for their knowledge of them to the very individual whom they attack, and compared with whose boundless erudition their learning was that of schoolboys, and not always sufficient to preserve them from distressing mistakes. But profound literature was at that period confined to few; while wit and raillery found numerous and eager readers. The consequence was, that when the reply of the Christ-Church men appeared, this motley production of theirs, which is generally known by the name of "Boyle against Bentley," it met with a reception so uncommonly favourable as to form a kind of paradox in literary history. But the triumph of his opponents was short-lived. Bentley replied in his enlarged Dissertation, a work which, while it effectually silenced his antagonists, and held them up to ridicule as mere sciolists and blunderers, established on the firmest basis his own claims to the character of a consummate philologist. (*Monk's Life of Bentley*, p. 49, *seqq.*)

PHALĒRON, the most ancient of the Athenian ports; but which, after the erection of the docks in the Piræus, ceased to be of any importance in a maritime point of view. It was, however, enclosed within the fortifications of Themistocles, and gave its name to the southernmost of the long walls, by means of which it was connected with Athens. Phaleron supplied the Athenian market with abundance of the little fish named Aphys, so often mentioned by the comic writers. (*Aristoph.*, *Acharn.*, 901.—*Id.*, *Av.*, 96.—*Athen.*, 7, 8.—*Aristot.*, *Hist. An.*, 6, 15.) The lands around it were marshy, and produced very fine cabbages. (*Hesych.*, s. v. *Φαλαγγικαί*.—*Xen.*, *Æcon.*, c. 19.) The modern name of Phaleron is *Porto Fanari*. "Phalerum," says Hobhouse (vol. 1, p. 301, *Am. ed.*), "is of an elliptical form, smaller than Munychia; and the remains of the piers on each side of the narrow mouth are still to be seen. The line of its length is from east to west, that of its breadth from north to south. On the northeast side of the port, the land is high and rocky until you come to the fine sweep of the bay of Phalerum, perhaps two miles in length, and terminated on the northeast by a low promontory, once that of Colias. The clay from this neighbourhood was preferred to any other for the use of the potteries."

PHANÆ, a harbour of the island of Chios, with a temple of Apollo and a palm-grove in its vicinity. Near it also was a promontory of the same name. (*Strabo*, 645.—*Liv.*, 36, 43.—*Id.*, 44, 28.) Phanæ was in the southern part of the island, and the neighbourhood was remarkable for its excellent wine. (*Virg.*, *Georg.*, 2, 98.) The promontory is called at the present day *Cape Mastico*. (*Mannert.*, *Geogr.*, vol. 6, pt. 3, p. 326.)

PHANÔTE, a town of Chaonia in Epirus, corresponding to the modern *Gardiki*, a fortress once belonging to the Suliots. (*Cramer's Greece*, vol. 1, p. 99.)

PHAON, a mariner of Lesbos, accustomed to ferry passengers across from the island to the main land (*πορθύς ἢ θάλασσα*.—*Palaph.*, *de Incred.*, 49). Lucian calls him a native of Chios. (*Dial. Mort.*, 2, 2.) According to one legend, he was beloved by Venus, who concealed him amid lettuce. (*Ælian.*, V. H., 12, 18.) Another version of the fable stated, that Venus came to him on one occasion under the form of an aged female, and, having requested a passage, was ferried across to the main land by him, free from charge, such being his wont towards those who were in indigent circumstances. The goddess, out of gratitude, presented him with an alabaster box, containing a peculiar kind of ointment, and, when he had rubbed himself with this, he became the most beautiful of men. Among others, Sappho became enamoured of him, but, finding her passion unrequited, threw herself into the sea from the promontory of Leucate. (*Vid.* Sappho, and Leucate.—*Palaph.*, l. c.—*Ælian.*, l. c.—*Arct.*, *Violar.*, p. 461, *ed. Walz*.—*Eudocia*, p. 413.—*Suid.*, s. v. *Φαῖον*.)

PHARÆ, I. a borough of Tanagra in Boeotia. (*Strabo*, 405.)—II. One of the twelve cities of Achaia, situate on the river Pirus, about 70 stadia from the sea, and 120 from Patræ. (*Pausan.*, 7, 22.) It was annexed by Augustus to the colony of Patræ. The ruins were observed by Dodwell on the left bank of the *Camenitza* (vol. 2, p. 310).—III. A town of Crete. (*Steph. Byz.*, s. v. *Φαρά*.)—IV. A town of Messenia, on the Sinus Messenicus, northwest of Cardamyla. Among other divinities worshipped here were Nicomachus and Gorgazus, sons of Machaon. They had both governed this city after the death of their father, to whom, as well as themselves, was attributed the art of healing maladies. (*Steph. Byz.*, s. v.)

PHARNACŪSÆ, I. two islets a short distance from the Attic shore, in the Sinus Saronicus, east of Salamis. In the larger of these Circe was said to have been interred. (*Strabo*, 395.—*Steph. Byz.*, s. v. *Φαρνακούσσα*.) They are now called *Kyra*. (*Chandler's Travels*, vol. 3, p. 220.)—II. An island of the Ægean Sea, southwest from Miletus, and about 120 stadia distant from that place. It is known as the place where Julius Cæsar was taken by the pirates. (*Plut.*, *Vit. Cæs.*)

PHARNACĒS, I. grandfather of Mithradates the Great, and son and successor of Mithradates IV. of Pontus. He conquered Sinope and Tium (*Strab.*, 645.—*Diod. Sic.*, *Frag.*), and was engaged in a war with Eumenes, king of Pergamus, which lasted for some years, and was put an end to chiefly through the interference of Rome. (*Polyb.*, *Exc.*, 24, 4, *seqq.*) Polybius records of Pharnaces that he was more wicked than all the kings who had preceded him. (*Polyb.*, 27, 15.)—II. Son of Mithradates the Great, proved treacherous to his father when the latter was forming his bold design of advancing towards Italy from Asia, and crossing the Alps as Hannibal had done before him. Although the favourite son of that celebrated monarch, he incited the army to open rebellion, disconcerted all his father's plans, and brought him to the grave. As a reward of his perfidy, Pharnaces was proclaimed King of Bœporus, and styled the ally and friend of the Roman nation. (*Appian.*, *Bell. Mithrad.*, c. 103, *seqq.*) During the civil war waged by Cæsar and Pompey, Pharnaces made an attempt to recover his hereditary dominions, and succeeded in taking Sinope, Amisus, and some other towns of Pontus. But Julius Cæsar, after the defeat and death of Pompey, marched into Pontus, and, encountering the army of Pharnaces near the city of Zela, gained a complete victory; the facility with which it was gained being expressed by the victor in those celebrated words, "*Veni, Vidi, Vici*." (*Hirt.*, *Bell. Alex.*, c. 72.—*Plut.*, *Vit. Cæs.*—*Sueton.*, *Vit. Cæs.*, 37.—*Dio Cass.*, 42, 47.) After his defeat, Pharnaces retired to the Bœporus,

where he was slain by some of his own followers. (*Appian, Bell. Mithrad.,* c. 120.—*Dio Cass.,* l. c.)

PHARNACIA, a city of Pontus, on the seacoast, and in the territory of the Mosyneci. It is erroneously confounded with Cerasus by Arrian (*Peripl.,* p. 17), while the anonymous geographer, though in this instance he copies that writer, yet afterward places Cerasus 530 stadia farther to the east (p. 13). It should be observed, also, that Strabo says that Cotyzerum, and not Cerasus, had contributed to the foundation of Pharnacia (*Strabo,* 548); and he afterward names Cerasus as a small place distinct from that town and nearer Trapezus. Pliny, moreover, distinguishes Pharnacia and Cerasus, and he besides informs us that the former was 100 miles from Trapezus (6, 4). Xenophon and the Greeks were three days on their march from Trapezus to Cerasus, a space of time too short to accomplish a route of 100 miles over a difficult country. (*Anab.,* 5, 3, 5.) It is apparent, therefore, that the Cerasus of Xenophon is not to be identified with Pharnacia, though it might be thought so in Arrian's time; and it is remarkable that this erroneous opinion should have prevailed so strongly as to leave the name of *Keresoson* to the site occupied by the ancient Pharnacia. With respect to this latter place, it appears to have been founded by Pharnaces, grandfather of Mithradates the Great, though we have no positive authority for the fact. We know only that it existed in the time of the last-mentioned monarch, since it is spoken of in Plutarch's Life of Lucullus. Mannert is inclined to think, that Pharnacia was founded on the site of a Greek settlement named Chorasdes, which Scylax places in this vicinity (p. 33). It is also noticed by Stephanus of Byzantium as a town of the Mosyneci, on the authority of Hecataeus (s. v. *Χορσάδες*.—*Mannert, Geogr.,* vol. 6, pt. 2, p. 386.—*Cramer's Asia Minor,* vol. 1, p. 281).

PHAROS, I. a small island in the bay of Alexandria, at the entrance of the greater harbour, upon which was built, in the reign of Ptolemy Philadelphus, a celebrated tower, to serve as a lighthouse. The architect was Sostratus, son of Dexiphanes. This tower, which was also called Pharos, and which passed for one of the seven wonders of the world, was built with white marble, and could be seen at the distance of 100 miles. It had several stories raised one above another, adorned with columns, balustrades, and galleries, of the finest marble and workmanship. On the top, fires were kept lighted in the night season, to direct sailors in the bay, which was dangerous and difficult of access. The building of this tower cost the Egyptian monarch 800 talents, about 850,000 dollars. According to Strabo, there was on the tower the following inscription, cut into the marble, ΕΩΣΤΡΑΤΟΣ ΚΝΙΔΙΟΣ ΔΕΞΙΦΑΝΟΥΣ ΘΕΟΙΣ ΕΩΤΗΡΕΙΝ ΥΠΕΡ ΤΩΝ ΠΛΩΖΟΜΕΝΩΝ ("Sostratus the Cnidian, son of Dexiphanes, to the gods the preservers, for the benefit of mariners"). Pliny also speaks of the magnanimity of Ptolemy, in allowing the name of Sostratus, and not his own, to be inscribed upon the tower. (*Strab.,* 791.—*Plin.,* 36, 12.) Lucian, however, tells a different story. According to that writer, Sostratus, wishing to enjoy in after ages all the glory of the work, cut the above inscription on the stones, and then, covering them over with cement, wrote upon the latter another inscription, which assigned the honour of having erected this structure to the author of the work, King Ptolemy. The cement, however, having decayed through time, Ptolemy's inscription disappeared, and the other became visible. (*Lucian, Quomodo hist. conscribitur,* 62.) Where Lucian obtained this story is not known; it is certainly a most incredible narrative, and very probably an invention of his own. (*De Soul, ad Lucian.,* l. c.)—The island of Pharos was eight stadia from the main land, and connected with it by a causeway, which had two bridges, one at either end. (*Ves-*

sius, ad Mel., 3, 7, p. 761.) Strabo, however, and Josephus call the mound or causeway *ἡμικατάστροφον γέφυρα*, or one of seven stadia, referring probably to the work itself, exclusive of the bridges. (*Strabo, l. c.*—*Joseph., Ant. Jud.,* 12, 2, 12.) Ammianus Marcellinus, and some other writers after him, make Cleopatra to have erected the tower and built the causeway (*Amm. Marcell.,* 22, 16.—*Tzet., Cedren.,*) and some critics suppose that the tower must have been destroyed by Caesar in the Alexandrine war, and rebuilt by the Egyptian queen. This, however, can hardly have been the case, since Caesar merely speaks of his having ordered the private dwellings to be pulled down, but refers to the Pharos apparently as still standing. (*Bell. Alex.,* 19.) As to the causeway itself, it is possible that Cleopatra may have continued it to the main land, after the bridge at that end had been destroyed. (*Voss., ad Mel.,* l. c.) The Nubian geographer, in a later age, gives the elevation of the Pharos as 300 cubits, from which it would appear that the tower must have lost a portion of its original height. (*Falconer, ad Strab.,* l. c.) The name *Pharos* itself would seem to have been given to the tower first, and after that to the island, if the Greek etymology be the true one, according to which the term comes from the Greek *φάω*, "to shine" or "be bright" (*φάω, φάος, φάερός, φάρος*). Jablonaki, however, makes the word of Egyptian origin, and deduces it from *pharax*, "a watch-tower" or "look-out place." (*Voc. Egypt.,* s. v.—*Opusc.,* vol. 1, p. 378, ed. *Te Water.*) The celebrity of the Egyptian Pharos made this a common appellation among the ancients for any edifice that was raised to direct the course of mariners either by means of lights or signals. The Emperor Claudius ordered one to be erected at Ostia, and there was another at Ravenna. (*Voss., ad Plin.,* 36, 12.)—Instead of the ancient Pharos at Alexandria, there is now only a kind of irregular castle, without ditches or outworks of any strength, the whole being accommodated to the inequality of the ground on which it stands. Out of the midst of this clumsy building rises a tower, which serves for a lighthouse, but which has nothing of the beauty and grandeur of the old one.—II. An island off the coast of Illyricum, to the east of Issa, and answering to the modern *Lessina*. It was settled by a colony from Paros (*Scylax, p. 8.*—*Scymn., Ch.,* v. 425), and was the birthplace of Demetrius the Pharian, whose name often occurs in the writings of Polybius. (*Polyb.,* 3, 10, 8.—*Id.,* 2, 65, 4, &c.)

PHARSALIA, I. the region around the city of Pharsalus in Thessaly, celebrated for the battle fought in its plains between the armies of Caesar and Pompey. (*Vid. Pharsalus.*)—II. The title of Lucan's epic poem. (*Vid. Lucanus.*)

PHARSALUS, a city of Thessaly, situate in that part of the province which Strabo designates by the name of Thessaliotis. It lay southwest of Larissa, on the river Enipeus, which falls into the Apidanus, one of the tributaries of the Peneus. Although a city of considerable size and importance, we find no mention of it prior to the Persian invasion. Thucydides reports that it was besieged by the Athenian general Myronides after his success in Boeotia, but without avail (1, 111). The same historian speaks of the services rendered to the Athenian people by Thucydides the Pharsalian, who performed the duties of prænomen to his countrymen at Athens (8, 92); and he also states that the Pharsalians generally favoured that republic during the Peloponnesian war. At a later period, the plains in the vicinity of this city became celebrated for the battle fought in them between the armies of Caesar and Pompey. (*Vid. Pharsalia I.*)—Livy seems to make a distinction between the old and new town, as he speaks of Palæo-Pharsalus (441.—Compare *Strabo,* 431). Dr. Clarke (*Thesaur.,* vol. 7, p. 328, *Lond. ed.*) observes, that there are few anti-

gories at Pharsalus. The name of *Pharsa* alone remains to show what it once was. Southwest of the town there is a hill surrounded with ancient walls, formed of large masses of a coarse kind of marble. Upon a lofty rock above the town to the south are other ruins of greater magnitude, showing a considerable portion of the walls of the Acropolis and remains of the Propylæa. (*Cramer's Anc. Gr.*, vol. 1, p. 398.)

Pharvæti, a people of Africa, beyond Mauritania, situate perhaps to the east of the Autololes, which latter people occupied the Atlantic coast of Africa, opposite to the *Insulæ Fortunatæ*. (*Mela*, 1, 4, 23.—*Vossius*, *ad loc.*)

PHASĒLIA, a town of Lycia, on the eastern coast, near the confines of Pamphylia. Livy remarks, that it was a conspicuous point for those sailing from Cilicia to Rhodes, since it advanced out towards the sea; and, on the other hand, a fleet could easily be despatched from it (37, 23). Hence the epithet of *ἑρμύσσα* applied to it by Dionysius Periegetes (v. 854). We are informed by Herodotus (2, 178), that this town was colonized by some Dorians. Though united to Lycia, it did not form part of the Lycian confederacy, but was governed by its own laws. (*Strabo*, 667.) *Phaselis*, at a later period, having become the haunt of pirates, was attacked and taken by Servilius Isauricus. (*Flor.*, 3, 6.—*Eutrop.*, 6, 3.) Lucan speaks of it as nearly deserted when visited by Pompey in his flight after the battle of Pharsalia (8, 251). Nevertheless, *Strabo* asserts that it was a considerable town, and had three ports. He observes, also, that it was taken by Alexander, as an advantageous post for the prosecution of his conquests into the interior. (*Strab.*, 666.—Compare *Arrian*, *Exp. Al.*, 1, 24.—*Plut.*, *Vit. Alex.*) *Phaselis*, according to *Athenæus*, was celebrated for the manufacture of rose perfume (14, p. 688). *Nicanor* certainly commends its roses (*ap. Athen.*, p. 688).—"On a small peninsula, at the foot of Mount *Takhtalu* (the highest point of the Solymean mountains)," says Captain Beaufort, "are the remains of the city of *Phaselis*, with its three ports and lake as described by *Strabo*. The lake is now a mere swamp, occupying the middle of the isthmus, and was probably the source of those baneful exhalations which, according to *Livy* and *Cicero*, rendered *Phaselis* so unhealthy. The modern name of *Phaselis* is *Tekrova*." (*Karamania*, p. 56.) "The harbour and town of *Phaselis*," observes Mr. Fellows, "are both extremely well built and interesting, but very small. Its theatre, stadium, and temples may all be traced, and its numerous tombs on the hills show how long it must have existed." (*Tour in Asia Minor*, p. 211.)—Beyond *Phaselis* the mountains press in upon the shore, and leave a very narrow passage along the strand, which at low water is practicable, but, when storms prevail and the sea is high, it is extremely dangerous: in this case, travellers must pass the mountains, and proceed into the interior by a long circuit. The defile in question, as well as the mountains overhanging it, was called *Climax*, and it obtained celebrity from the fact that Alexander led his army along it, after the conquest of Caria, under circumstances of great difficulty and danger; for, though the wind blew violently, Alexander, impatient of delay, hurried his troops forward, along the shore, where they had the water up to their middle, and had great difficulty in making their way. (*Strab.*, 666, *seq.*—*Arrian*, *Exp. Al.*, 1, 26.—*Plut.*, *Vit. Alex.*) Captain Beaufort remarks, that "the shore at present exhibits a remarkable coincidence with the account of Alexander's march from *Phaselis*. The road along the beach is, however, interrupted in some places by projecting cliffs, which would have been difficult to surmount, but round which the men could readily pass by wading through the water." (*Karamania*, p. 115, *seq.*—Compare *Leake's Tour*, p. 190.)

PHASĪNA, a district of Armenia Major, through which the river *Phasis* or *Araxes* flows; whence the name of the region. The beautiful birds, which we call pheasants, still preserve in their name the traces of this their native country. (*Vid. Araxes* I.)

PHASĪAS, a patronymic given to *Medea*, as being born in Colchia, on the banks of the *Phasis*. (*Ovid*, *A. A.*, 2, 381.)

PHASIS, I. a river of Asia, falling into the Euxine after passing through parts of Armenia, Iberia, and Colchia. According to *Strabo* and *Pliny*, it rose in the southern portion of the Moschian mountains, which were regarded as belonging to Armenia. (*Strabo*, 498.—*Plin.*, 6, 4.) *Procopius* states that in the early part of its course it was called *Boas*, but that, after reaching the confines of Iberia, and becoming increased in size by several tributaries, it took the name of *Phasis*. (*Procop.*, *Pers.*, 2, 29.) Its modern name is *Rion* or *Rioni*, which would seem more properly to belong to the Rhoen, one of its tributaries. The Turks call it the *Fasch*. The *Phasis* is famous in mythology from Jason's having obtained in its vicinity the golden fleece of Grecian fable. *Arrian* (*Peripl.*, *Mar. Eux.*) says, that the colour of the water of the *Phasis* resembled that of water impregnated with lead or tin; that is, it was of a bluish cast. It was said, also, not to intermingle with the sea for some distance from land.—For some general remarks on the name *Phasis*, consult remarks at the end of this article. (*Mannert*, *Geogr.*, vol. 4, p. 394, *seq.*)—II. A city at the mouth of the Colchian *Phasis*, founded by a Milesian colony. (*Mela*, 1, 85.) It does not appear to have been a place of any great trade. In Hadrian's time it was a mere fortress, with a garrison of 400 men. (*Arrian*, *Peripl.*—*Amian. Marcell.*, 22, 8.) The place is not mentioned by *Procopius*. In the vicinity of this spot, the Turks, in former days, had the small fortress of *Potti*. (*Mannert*, *Geogr.*, vol. 4, p. 396.)—III. A river of Armenia Major, the same with the *Araxes*. (*Vid. Araxes*, I.)—The name *Phasis* would seem to have been a general appellation for rivers in early Oriental geography, and the root of it may be very fairly traced in the Indo-Germanic dialects. (*Phas*.—*Was*.—German *Wasser*, "Water."—Consult *Ritter*, *Vorhalle*, p. 466.)

PHAVORINUS (in Greek *Φαβωρίνος*), a native of Arimate in Gaul, who lived at Rome during the reigns of Trajan and Hadrian, and enjoyed a high degree of consideration. He wrote numerous works, but no part of them has reached us except a few fragments in *Stobæus*. *Aulus Gellius*, however, has preserved for us some of his dissertations in a Latin dress. (*Noct. Att.*, 12, 1; 14, 1, 2; 17, 10.) *Phavorinus* loved to write on topics out of the common path, and more or less whimsical; he composed, for example, a eulogium on *Thersites*, another on *Quartan Fever*, &c. Having had the misfortune to offend the Emperor Hadrian, his statues, which the Athenians had raised to him, were thrown down by that same people. He bequeathed his library and mansion at Rome to *Herodes Atticus*. *Phavorinus* was a friend of *Plutarch's*, who dedicated a work to him. For farther particulars relating to this individual, consult *Philostratus* (*Vit. Sophist.*, 1, 8, 1), and *Lucian* (*Eumuck.*, c. 7.—*Demon.*, c. 12, *seq.*—*Schöll*, *Gesch. Gr. Lit.*, vol. 2, p. 607.)

PHAZANIA, a region of Africa, lying to the south of Tripolis. It is now *Fazzan*. (*Plin.*, 5, 3.)

PHANĪUS (Φάνειος), a city in the northern part of Arcadia, at the foot of Mount *Cyllena*. It was a town of great antiquity, since *Hercules* is said to have resided there after his departure from *Tiryns*, and *Homæ* has mentioned it among the principal Arcadian cities. (*Il.*, 2, 605.) The place was surrounded by some extensive marshes, which are said to have once inundated the whole country, and to have destroyed the ancient town. They are more commonly called

the Lake of Pheneus, and were principally formed by the river Aroanius or Olbius, which descends from the mountains to the north of Pheneus, and usually finds a vent in some natural caverns or katabethra at the extremity of the plain; but when, by accident, these happened to be blocked up, the waters filled the whole valley, and, communicating with the Ladon and Alpheus, overflowed the beds of those rivers as far as Olympia. (*Eratosth., ap. Strab., 389.*) Pausanias reports, that vestiges of some great works undertaken to drain the Phenean marshes, and ascribed by the natives to Hercules, were to be seen near the city (8, 14). The vestiges of the town itself are visible, according to Dodwell, near the village of *Phonia*, upon an insulated rock. The lake is said to be very small, and to vary according to the season of the year. (*Dodwell, vol. 2, p. 436.—Cramer's Anc. Gr., vol. 3, p. 321.*)

PHERRÆ, I. a city of Pelasgiotis, in Thessaly, one of the most ancient and important places in the country. It was the capital of Admetus and Eumelus, as we learn from Homer (*Il., 2, 711, seq.*) and Apollonius (*Arg., 1, 49.—Compare Hom., Od., 4, 798.*) Pherræ was famed at a later period as the native place of Jason, who, having raised himself to the head of affairs by his talents and ability, became master not only of his own city, but of nearly the whole of Thessaly. (*Vid. Jason, II.*) After the death of Jason, Pherræ was ruled over by Polydorus and Polyrophon, his two brothers. The latter of these was succeeded by Alexander, who continued for eleven years the scourge of his native city and of the whole of Thessaly. (*Xen., Hist. Gr., 6, 5.*) His evil designs were for a time checked by the brave Pelopidas, who entered that province at the head of a Boeotian force, and occupied the citadel of Larissa; but, on his falling into the hands of the tyrant, the Boeotian army was placed in a most perilous situation, and was only saved by the presence of mind and ability of Epaminondas, then serving as a volunteer. The Thebans subsequently rescued Pelopidas, and, under his command, made war upon Alexander of Pherræ, whom they defeated, but at the expense of the life of their gallant leader, who fell in the action. (*Plut., Vit. Pelop.—Polyb., 8, 1, 6, seqq.*) Alexander was not long after assassinated by his wife and her brothers, who continued to tyrannize over this country until it was liberated by Philip of Macedon. (*Xen., Hist. Gr., 6, 4.—Diod. Sic., 16, 38.*) Many years after, Cassander, as we are informed by Diodorus, fortified Pherræ, but Demetrius Poliorcetes contrived, by secret negotiations, to obtain possession of both the town and citadel. (*Diod. Sic., 20, 110.*) In the invasion of Thessaly by Antiochus, Pherræ was forced to surrender to the troops of that monarch after some resistance. (*Liv., 36, 9.*) It afterward fell into the hands of the Roman consul Acilius. (*Id., 36, 14.*) Strabo observes, that the constant tyranny under which this city laboured had hastened its decay. (*Strab., 436.*) Its territory was most fertile, and the suburbs, as we collect from Polybius, were surrounded by gardens and walled enclosures (18, 2). Stephanus Byzantinus speaks of an old and new town of Pherræ, distant about eight stadia from each other. Pherræ, according to Strabo, was ninety stadia from Pagassæ, its emporium. (*Cramer's Ancient Greece, vol. 1, p. 393.*)—II. A town of Ætolia. (*Steph. Byz., s. v. Φεραί*).—III. A town of Messenia, to the east of the river Pamisus. At this place Homer makes Telemachus and the son of Nestor to have been entertained by Diocles, on their way from Pylos to Sparta. (*Od., 15, 186.*) It is also alluded to in the Iliad (5, 543). Pherræ was one of the seven towns offered by Agamemnon to Achilles. (*Il., 9, 151.*) It was annexed by Augustus to Laconia, after the battle of Actium. (*Pausan., 4, 36.—Cramer's Ancient Greece, vol. 3, p. 141.*)

PHERRÆA, a surname of Jason, as being a native of Pherræ. (*Vid. Jason, II.*)

PHERRÆOTES, a comic poet of Athens, contemporary with Plato, Phrynichus, Aristophanes, and Eupolis. (*Suid., s. v. Πέρραιος.—Clinton, Fast. Hell., vol. 1, p. xl.*) Little is known of him. He is said to have written 21 comedies, of which a few fragments remain. The following are the titles of some of his pieces: "The Deserters," "Chiron," "The Old Women," "The Painters," "The False Hercules," &c. Such was the license which prevailed at this period on the Greek stage, that Pherecrates was particularly commended for having abstained entirely in his pieces from any personal attacks. He was also the inventor of a species of verse, which was called from him the *Pherecratean* or *Pherecratic*. The Pherecratic verse is the Glyconic deprived of the final syllable, and consists of a spondee, a choriambus, and a catalectic syllable. The first foot was sometimes a trochee or an anapaest, rarely an iambus. When this species of verse has a spondee in the first station, it may then be scanned as a dactylic trimeter. It has been conjectured that the trochee was originally the only foot admissible in the first place of the Pherecratic. (*Ramsay, Lat. Pros., p. 192.—Schöll, Hist. Lit. Gr., vol. 2, p. 90.*) The fragments of Pherecrates were given with those of Eupolis, by Runkel, *Lips.*, 1829, 8vo.

PHERECYDES, I. a Grecian philosopher, contemporary with Terpander and Thales, who flourished about 600 B.C., and was a native of the island of Scyros. The particulars which remain of the life of Pherecydes are few and imperfect. Marvellous circumstances have been related of him, which only deserve to be mentioned in order to show, that what has been deemed supernatural by ignorant spectators may be easily conceived to have happened from natural causes. A ship in full sail was, at a distance, approaching its harbour; Pherecydes predicted that it would never come into the haven, and it happened accordingly, for a storm arose which sunk the vessel. After drinking water from a well, he predicted an earthquake, which happened three days afterward. It is easy to suppose that these predictions might have been the result of a careful observation of those phenomena which commonly precede storms or earthquakes, in a climate where they frequently happen. Pherecydes is said to have been the first among the Greeks who wrote concerning the nature of the gods; but this can only mean that he was the first who ventured to write upon these subjects in prose. For, before his time, Orpheus, Musæus, and others, had written theogonies in verse. Some have ascribed to him the invention of the sundial; but the instrument was of a more ancient date, being mentioned in the Jewish history of Hezekiah, king of Judea. (*3 Kings, 20, 11.*) Concerning the manner in which he died, nothing certain is known; for, as to the story of his having been gradually consumed for his impiety by the loathsome disease called *morbus pedicularis*, this must doubtless be set down in the long list of idle tales by which the ignorant and superstitious have always endeavoured to bring philosophy into contempt. He lived to the age of eighty-five years.—It is difficult to give, in any degree, an accurate account of the doctrines of Pherecydes; both because he delivered them, after the manner of the times, under the concealment of symbols, and because a very few memoirs of this philosopher remain. It is most probable, that he taught those opinions concerning the gods and the origin of the world which the ancient theogonists borrowed from Egypt. Another tenet, which is, by the universal consent of the ancients, ascribed to Pherecydes, is that of the immortality of the soul, for which he was, perhaps, indebted to the Egyptians. Cicero says (*Tusc. Quæst., 1, 16*) that he was the first philosopher in whose writings this doctrine appeared. He is also said, and not im-

probably, to have taught the doctrine of the transmigration of the soul; for this was a tenet commonly received among the Egyptians, and afterward taught by Pythagoras. Whether it was that Pherecydes instituted no sect; or that his writings fell into disuse through their obscurity; or that Pythagoras designedly suppressed them, that he might appear the original author of the doctrines which he had learned from his master; or whatever else might be the cause, we are left without farther information concerning his philosophy. (*Enfield's History of Philosophy*, vol. 1, p. 362, *seqq.*) There are extant some fragments of a Theogony composed by him, which bear a strange character, and have a much clearer resemblance to the Orphic poems than to those of Hesiod. They show that, by this time, the characteristic of the theogonic poetry had been changed, and that Orphic ideas were in vogue. (*Müller, Hist. Gr. Lit.*, p. 234.) The fragments of Pherecydes, together with those of his namesake of Leros, were edited by Sturz, *Gera*, 1789, 8vo, and a new edition appeared in 1824, *Leips.*, 8vo, with additional fragments, and more enlarged explanations. The preface to this latter edition contains the greater part of Matthiæ's dissertation, which Sturz undertakes to refute. The dissertation just mentioned was published by Matthiæ, in 1814, *Allenb.*, 8vo, and was reprinted in Wolf's *Analekten*, vol. 1, p. 321, *seqq.*—Pherecydes, and Cadmus of Miletus, are said to have been the first of the Greeks that wrote in prose. (*Schöll, Hist. Lit. Gr.*, vol. 1, p. 212.—*Hoffmann, Lex. Bibliogr.*, vol. 3, p. 219.)—II. A native of Leros, one of the Sporades, and a contemporary with Herodotus. He was the last of the *Logographers*, or compilers in prose of historical traditions (*λόγοι*, and *γράφει*). After him the regular historians begin. Pherecydes, among other works, made a collection of traditions relative to the early history of Athens. The fragments of this writer have been edited, along with those of Pherecydes of Scyros, by Sturz, *Gera*, 1789, 8vo, republished at Leipzig in 1824. (*Schöll, Hist. Lit. Gr.*, vol. 2, p. 140.)

PHEREUS, son of Cretheus, and of Tyro the daughter of Salmoneus. He founded Phereæ in Thessaly, where he reigned, and became the father of Admetus, and of Lycæus, king of Nemea. (*Apollod.*, 1, 9, 11.—*Id.*, 1, 9, 13.)

PHIDIAS, a celebrated statuary, son of Charmidas, and a native of Athens. Nothing authentic is related concerning his earlier years, except that he was instructed in statuary by Hippias and Ageladas, and that, when quite a youth, he practised painting, and made a picture of Jupiter Olympius. (*Plin.*, 36, 8, 34.—*Siebel., Indic. Winkelm.*, p. 324.—*Jacobs, Amalth.*, vol. 2, p. 247.) Respecting Hippias we have little information. In what period Phidias was a pupil of Ageladas is likewise uncertain; but as Pausanias makes Ageladas a contemporary of Onatas, who flourished about the 78th Olympiad (*Pausan.*, 8, 43, 4), and as in this period Ageladas was both distinguished by his own productions as an artist, and was at the head of a very celebrated school of statuary, we may properly assume this as the time in which Phidias was under his tuition. Between the date just mentioned and the third year of the 85th Olympiad, there is an interval of 30 years. If with these conclusions we attempt to ascertain the time of the birth of Phidias, it is by no means an improbable conjecture that he was about 20 years of age when he received the instructions of Ageladas, and, therefore, was born in the first year of the 73d Olympiad, or B.C. 488, a date very nearly according with that given by Müller. This computation will explain the fact, that in B.C. 438, Phidias, then 50 years of age, represented himself as bald on the shield of the Athenian Minerva. He must also have been about 56 years of age at the time of his death. (*Siebel., Diet. Art.*, s. v.)—Phidias brought to his pro-

fession a knowledge of all the finer parts of science which could tend to dignify and enhance it. With the most exquisite harmonies of poetry, and the most gorgeous fictions of mythology, he was no less familiar than with geometry, optics, and history. From Homer, whose works he must have deeply studied, he drew those images of greatness, which he afterward moulded in earthly materials with a kindred spirit. The circumstances which, by a singular felicity, not often accorded to genius, elicited the powers of Phidias, was the coincidence, in point of time, of the full maturity of his talents with the munificent administration of Pericles. Intent on his great national design of adorning Athens with the choicest specimens of art, this statesman saw with eagerness, in the genius of Phidias, the means of giving form, shape, and completeness to the most glorious of his conceptions. He accordingly appointed this great sculptor the general superintendent of all the public works then in progress, both of architecture and statuary (*Plut., Vit. Pericl.*, 13), and well did the event sanction the choice which was thus made by him. The buildings reared under the direction of Phidias, though finished within a comparatively short period, seemed built for ages, and, as observed by Plutarch, had the venerable air of antiquity when newly completed, and retained all the freshness of youth after they had stood for ages. The beautiful sculptures on the frieze of the Parthenon were the work of Phidias and his scholars, while the statue of the goddess within the temple was his entire production. This was, indeed, the most celebrated of all his works, if we except the Olympian Jupiter at Elis. Independently of the workmanship, the statue was of noble dimensions and of the most costly materials. It was twenty-six cubits, or thirty-nine feet in height, and formed of ivory and gold; being most probably composed originally of the former, and overlaid, in part, by the latter. The goddess was represented in a noble attitude, erect, clothed in a tunic reaching to her feet. On her head was a casque: in one hand she held a spear; in the other, which was stretched out, an ivory figure of Victory, four cubits high; while at her feet was a buckler, exquisitely carved, the concave representing the war of the giants, the convex the battle between the Athenians and Amazons, and portraits of the artist and his patron were introduced among the Athenian combatants, one cause of the future misfortunes which envy brought upon the author. On the middle of her helmet a sphinx was carved, and on each of its sides a griffon. On the ægis or breastplate was displayed a head of Medusa. The golden sandals were sculptured with the conflict between the Centaurs and Lapiths, and are described as a perfect gem of minute art. On the base of the statue was represented the legend of Pandora's creation, together with the images of twenty deities. (*Pausan.*, 1, 24, 5.—*Siebelis, ad loc.*—*Max. Tyr., Diss.* 14.—*Plin.*, 36, 5, 4.) It was from this statue that Philargus took away the golden head of Medusa (*Isocraz. ad Callim.*, 57, ed. Bekk.), in the place of which an ivory figure of this head was afterward introduced, which was seen by Pausanias. (*Böckh, Corp. Inscript.*, 1, 242.) This magnificent statue was repaired by Aristocles, in Olymp. 95.3 (*Böckh, Corp. Inscript.*, 337); and that it might not be without the necessary moisture, as it was placed on the dry ground, they were accustomed to sprinkle water on the ivory. (*Pausan.*, 8, 11, 5.) According to the account of an ancient writer named Philochorus (*ap. Schol. ad Aristoph. Pac.*, 604), Phidias, soon after completing this statue, was charged with having embezzled a portion of the materials intended for the work, and, in consequence, fled to Elis, where he was employed in making the famous statue of Jupiter; but here again he was accused of similar embezzlement, and was put to death by the Elisians. The best critics, however, consider this whole story

to be false. Heyne, though he errs in maintaining that this statue was dedicated before that of Minerva, yet has very properly observed that, had Phidias been guilty of embezzlement in relation to it, the Elians would never have allowed him to inscribe his name on it, nor would they have intrusted its preservation to his descendants. (*Antiq. Aufz.*, vol. 1, p. 301.) Müller, too, examines the whole subject with great impartiality, and comes to the conclusion, that the fame which Phidias had acquired by his Minerva induced the Elians to invite him to their country, in connexion with his relations and pupils; and that this journey was undertaken by him in the most honourable circumstances. (*Müller, de Phidia Vita*, p. 25, *seqq.*)—The statue of the Olympian Jupiter graced the temple of that god at Olympia in Elis, and was chryselephantine (made of gold and ivory), like that of Minerva. Like it, too, the size was colossal, being sixty feet high. The god was represented as sitting on his throne: in his right hand he held a figure of Victory, also made of gold and ivory, in his left a sceptre beautifully adorned with all kinds of metals, and having on the top of it a golden eagle. His brows were encircled with a crown, made to imitate leaves of olive; his robe was of massive gold, curiously adorned, by a kind of encaustic work probably, with various figures of animals, and also with lilies. The sandals, too, were of gold. The throne was inlaid with all kinds of precious materials, ebony, ivory, and gems, and was adorned with sculptures of exquisite beauty. On the base was an inscription recording the name of the artist. (*Pausan.*, 5, 11.—Compare *Quatremère de Quincy, Jup. Olymp.*, p. 310.—*Siebelis ad Pausan.*, l. c.) Lucian informs us, that, in order to render this celebrated work as perfect in detail as it was noble in conception and outline, Phidias, when he exposed it for the first time after its completion to public view, placed himself behind the door of the temple, and listened attentively to every criticism made by the spectators: when the crowd had withdrawn and the temple gates were closed, he revised and corrected his work, wherever the objections he had just heard appeared to him to be well-grounded ones. (*Lucian, pro Imag.*, 14.) It is also said, that when the artist himself was asked, by his relation Panæon, the Athenian painter, who, it seems, aided him in the work, whence he had derived the idea of this his grandest effort, he replied, from the well-known passage in Homer, where Jove is represented as causing Olympus to tremble on its base by the mere movement of his sable brow. (*Il.*, 1, 528.) The lines in question, with the exception of their reference to the "ambrosial curls," and the brow of the god, contain no allusion whatever to external form, and yet they carry with them the noble idea of the Supreme Being nodding benignant assent with so much true majesty as to cause even Olympus to tremble. (*Strab.*, 354.—*Polyb.*, *Exc. L.*, xxx., 16, 4, 8.—*Müller, de Phid. Vit.*, p. 69.)—Of the whole work Quintilian remarks, that it even added new feelings to the religion of Greece (*Inst. Or.*, 12, 10, 9), and yet, when judged according to the principles of genuine art, neither this nor the Minerva in the Parthenon possessed any strong claims to legitimate beauty. It does not excite surprise, therefore, to learn that Phidias himself disapproved of the mixed effect produced by such a combination of different circumstances, nor will it appear presumptuous in us to condemn these splendid representations. In these compositions, exposed, as they were, to the dim light of the ancient temple, and from their very magnitude imperfectly comprehended, the effects of variously reflecting substances, now gloom, now glowing with unearthly lustre, must have been rendered doubly imposing. But this influence, though well calculated to increase superstitious devotion, or to impress mysterious terror on the bewildered sense, was mesmeric, and altogether diverse from the solemn
